For present purposes we might think of a toxin as a chemical substance which would be unknown to science except for its association with microbial growth and one which has an extraordinarily high lethality per unit weight. Many toxins are nerve poisons, resembling the nerve gases in their effect on the body, but far more potent. For example, the lethal dose of botulinus toxin is about one millionth of a gram. This means that one could easily carry in a dispatch case a quantity of toxin sufficient to wipe out the human population, although the image would imply that the human herd would line up for the slaughter. The very high potency of such toxins is certainly a factor in their military potential but may even be outweighed by other considerations, like the possibility of specific immunization of an aggressor force or population.

Even after agreement to eliminate biological weapons, we will still remain very vulnerable to a form of biological warfare which is beyond the reach of any covenant that we can make. This is the warfare practiced upon us by nature, the unremitting barrage of infection by old and by new agents that still constitute a very large part of the perils to normal and healthy life.

We have all had vexing, perhaps even tragic, personal experiences with virus infections. You will all recall the global epidemic of influenza that was first identified in Hong Kong about three years ago. This was not a particularly severe form of the virus and its eventual mortality was probably only in the tens of thousands. It is wrong, however, to believe that there is any assurance that the next epidemic of this kind will be as mild; and we have still developed only the most feeble and precarious protection against this threat whose impact is shared by all the nations, but against which very little common defense has been erected.

You will also recall having read from time to time about small outbreaks of mysterious new diseases like "Lassa fever" and the "Marburg virus." These were both extremely dangerous threats; and while much credit must be given to the diligence of the medical people who dealt with the outbreaks, a large element of pure luck was involved in localizing these incidents. We must expect that there are many additional viruses already indigenous to primate and human populations in primitive areas and to which the inhabitants of advanced countries are extremely vulnerable.

Yellow fever is a historically important disease which now belongs in the same category. It is now maintained on earth mainly through an animal reservoir of infection, in the monkeys in tropical jungles. Urban populations are now protected from yellow fever by campaigns to abolish the fever-carrying species of mosquitos in South America and by the availability of excellent vaccines in advanced countries. Mosquito species very well capable of transmitting yellow fever are, however, abundant in South Asia and the accidental introduction of yellow fever, for example, into India would be a human tragedy of catastrophic dimensions. Specialists in epidemiology are quite puzzled that this accident has not already eventuated and we have no good explanation for this good fortune. I would not mention facts like these which might stimulate psychotic imaginations if they were not already well known. My purpose is not to suggest the vulnerability of the Asian continent to biological military attack but rather to point out immense gaps in the pattern of international cooperative defenses that should be mounted but which have a relatively feeble standing in the present-day world. This is in no way a derogation of the splendid efforts of the World Health Organization which is centered here in Geneva but an indication of the limitations of its budget and a suggestion that much more needs to be done and could be done with resources that might be given over to biological work in the future.

Countries which are undergoing a transition in the development of their agriculture are vulnerable to analogous threats in biological warfare directed against crops as distinguished from human targets. The introduction of new crop varieties, that has had all of the human benefits attached to the expression "the green revolution," also means that the food supplies of vast territories are now committed to specialized strains of wheat, rice, and so forth. These are now newly vulnerable to destruction by plant pests of either natural or artificial origin. A potentially tragic outbreak of "coffee rust" is at this moment a serious threat to the agriculture and economy of Brazil.

The promulgation of an international agreement to control biological warfare in a negative sense should, therefore, be accompanied by steps urgently needed to build positive efforts at international cooperation, a kind of defensive biological research against natural enemies of the human species.

One of the best assurances that any country might have that the microbiological research of its neighbors was directed towards human purposes would be constantly expanding participation in international health programs. Any country that publicly and avowedly subscribed to the total renunciation of secret BW research might conceivably be able to continue clandestine effects without revealing their substantial *content*. It would, however, have great difficulty in maintaining such an effort, at any substantial level or quality of operation, while still keeping its very *existence* secret. This applies especially to those among its own citizens who are specialists in health-oriented research and who are deeply involved in furthering health research activities within the framework of the international community. Therefore, besides the obvious direct health benefits of expanded international cooperation we would also be rewarded by a higher level of mutual assurance that every party was indeed living up to the spirit of its obligations under a BW convention.

In conclusion, let me say that some of the speculations I have mentioned are ones which all of us must fervently hope will never materialize. But it would seem to me both foolish and arrogant to assume that our good will alone, without concrete arrangements, will serve to forestall the further development, proliferation and possible eventual recourse to what surely is one of the most ghastly methods of warfare imaginable.

As a scientist whose research career has centered on the genetics of bacteria, I have a profound personal interest in efforts being made in this forum to minimize the risk that infectious disease will become a routine weapon in future conflicts, civil or international. You have heard reasons, that I believe are compelling, for promptly reaching a ban on the development, production, proliferation or use of biological weapons. I will be indebted to you for this opportunity if I can return to my laboratory with the hope of having made the most modest contribution to the fulfillment of the urgent task before you.

Good luck.

THE RED BLOC PUPPET NATIONS SUMMIT CONFERENCE

HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1970

Mr. RARICK. Mr. Speaker, the so-called nonalined nations summit conference just concluded at Zambia—Africa's base for Communist guerrillas—seems to parrot the party line being resounded by other Communist and socialist movements around the world.

The nonalinement claim must mean their influence as nations—UNO vote—is up for sale to the highest bidder.

Now that their anti-USA saber-rattling, subsidized with foreign aid, has passed over, they can be expected to approach our diplomats for more foreign aid handouts and to receive the usual support for give-a-ways in the name of aid for friendly backward emerging nations.

Mr. Speaker, I insert several news-clippings and a report by George S. Schyler:

[From the Evening Star, Sept. 11, 1970]

ZAMBIA TALKS END, RESULTS ARE UNCERTAIN

LUSAKA, ZAMBIA.—The third summit conference of nonaligned nations ended yesterday with host President Kenneth Kaunda singing a revolutionary freedom song—but there was no official word on what was accomplished at the meeting.

Kaunda kept more than 100 newsmen waiting an hour and a half for a scheduled news conference, then canceled it without explanation. A government statement said resolutions which were approved at the three-day gathering would be distributed Monday.

There were conflicting reports on whether the conference passed a resolution dealing with the Middle East, and if so, whether it demanded U.N. sanctions against Israel or merely asked the United Nations to act if Israel does not withdraw from occupied Arab territory.

Sources within the conference said draft resolutions that were likely to be passed included a request for the withdrawal of all foreign troops from South Vietnam, a call for the United States and other nations to stop aiding Portugal and South Africa and a request for all nations of the world to help people "fighting against colonialism, racial discrimination and apartheid in Africa through the Liberation Committee of the Organization of African Unity."

[From the Washington Post, Sept. 11, 1970]

THIRD-WORLD TALKS END WITH RASH OF MILD ATTACKS

(By Jim Hoagland)

LUSAKA, ZAMBIA, Sept. 10.—The third nonaligned nations' summit conference closed today in a blaze of moderately worded resolutions praising peace, justice and economic development.

Obviously striving for a show of unity that would dispute critics who contend that the self-styled nonaligned nations have few common interests, the conference toned down a resolution on the Middle East, accepted a relatively moderately worded resolution of Indochina and even eased slightly its condemnation of countries selling arms to South Africa.

Zambia's President Kenneth Kaunda, who was chairman for the summit, closed the meeting with a paraphrase of a Christian hymn. Kaunda, the son of a minister, declaimed:

"Onward soldiers of nonalignment! Raise ye the banner of the movement . . . fight relentlessly for freedom, justice and peace . . ."

LIBYANS COMPLAIN

The only outward breach in the day's mood of agreement for agreement's sake came when the Libyan delegation complained that the conference was not being as rough on Israel as it was on South Africa.

Most of the 57 official delegations were from Africa, the Middle East or Asia. Europe was represented by Yugoslavia, which fought for watering down any resolutions that would have produced a walkout.

The dozen or so important conference resolutions were not made public as the three-day summit closed, but most of them had been made available to the press by conference sources.

The Middle East draft resolution, which calls for the withdrawal of Israeli troops from occupied Arab territory, also asks the United Nations to impose unspecified sanctions against Israel for "obstructing" the Middle East peace talks.

WORDING CHANGED

But during the last-minute deliberations the words "all adequate measures" were substituted for "sanctions." Conference sources said Liberia had pushed for the change.

This led the Libyans to complain that while the nonaligned countries were willing to make demands on and condemn South Africa, they only made requests on Israel. The Libyan delegate later criticized the conference's "dictatorial process."

The conference's final draft resolution on decolonization adopted the tough anti-apartheid program Ethiopian Emperor Haile Selassie once had urged, conference sources said.

The resolution calls on all countries to break diplomatic relations with South Africa, Portugal and Rhodesia, to enforce trade embargoes against the three countries and to refuse landing rights to airlines and shippers that use the ports of the three countries.

It also proposes to set up special funds to aid African nationalist movements attempting to overthrow the white-minority governments in southern Africa.

But in the final resolution concerning arms sales to South Africa the conference dropped a specific condemnation of France for continuing to sell arms to South Africa despite a six-year-old U.N. embargo.

The French were condemned by the Organization of African Unity in its summit meeting last week and had lobbied hard here to avoid being singled out again. With help from their former African colonies they succeeded in changing the statement to a general condemnation of countries that continue supplying weapons to Pretoria.

Britain, however, is specifically condemned in the resolution for its announced intention to resume limited arms sales to South Africa.

Another section assails the United States, Britain, France, West Germany, Italy and Japan for "economic, military and political" ties with South Africa.

On Vietnam, the conference balanced off a paragraph blaming "the presence of United States armed forces" for "the untold suffering and loss of life" in Indochina with an uncontroversial call for the removal of "all foreign forces" from the area.

OTHER RESOLUTIONS

Two other resolutions ask that the Indian Ocean be made a military-free zone and set out the establishment of a bureau to examine economic development in the Third World.

Speakers at today's open session included representatives from the Vietcong's Provisional Revolutionary Government of South Vietnam, the Palestinian Liberation Organization and African nationalist movements. The three had observer status at the conference.

[The Zambian government, seeking to explain its arrests of reporters, covering the conference, said "the monopoly press of the West" was trying to defame the meeting, AP reported.]

[From the Atlanta Journal, Sept. 8, 1970]

NEUTRAL SUMMIT OPENS IN ZAMBIA

LUSAKA, ZAMBIA.—President Kenneth Kaunda opened the third nonaligned summit conference Tuesday by telling representatives of more than half the world's peoples, "We seek a place of honor and respect."

"We must move nonalignment out of what critics consider mere political and idle rhetoric," he said.

As the president spoke in the crowded main assembly hall at Mulungushi Village, two of the world's best known women leaders listened intently.

Mrs. Indira Gandhi, premier of India, and Mrs. S. Bandaranaike, premier of Ceylon, sat alongside world leaders including Emperor Haile Selassie of Ethiopia, President Tito of Yugoslavia, Archbishop Makarios of Cyprus and Presidents Obote of Uganda and Nyerere of Tanzania.

Cambodia's seat was vacant because foreign ministers failed to agree in day-long debate Monday which government should be admitted—Premier Lon Nol's government or Prince Norodom Sihanouk's government in exile in Peking.

Cannons boomed outside in salute as the heads of state and government arrived. A flourish of bugles announced their arrival inside the hall for the start of the three-day meeting.

Two other nonaligned summits have been held—in Belgrade in 1961 and in Cairo in 1964.

Kaunda, who is also chairman of the 41-nation organization of African Unity this year, told the assembly:

The continued exclusion of Communist China from the United Nations "is a blunder and there can be no legitimate reason for refusing her admission to the world body."

Regarding Western military and economic aid to the white minority governments of southern Africa, "Those who delay the discharge of justice, those who stand in the way of peaceful change toward majority rule, make violence inevitable."

SIX JOURNALISTS BELIEVED HELD BY ZAMBIANS

LUSAKA, ZAMBIA.—Six foreign journalists were missing and presumed held by security police today as the third nonaligned summit conference opened here.

Three of the newsmen—Kenneth L. Whiting of the Associated Press, Hans Reinhardt of the German Press Agency, and Ron McDonnel of Viesnews, a British agency—were taken by plainclothes policemen Monday night from the conference hall and the university residences where the press is housed.

This morning, plainclothes police escorted Chris Munnion of the London Daily Telegraph, based in Salisbury, from the conference hall.

The other two journalists, Tony White of Reuters and Dan Van der Vat of the Times of London, were missing as the conference began.

No reason was given for the arrests, but all of the newsmen are based either in South Africa or Rhodesia, and Zambian President Kenneth Kaunda is a staunch opponent of the area's white-minority governments.

The American Embassy was trying to make contact with Whiting this morning. It was understood that the British and German embassies were making similar moves.

[From the Evening Star, Sept. 11, 1970]

ROGERS ASKS FULL FOREIGN AID FUNDING

(By Dana Bullen)

Secretary of State William P. Rogers, urging approval of the administration's foreign aid fund requests, said today the United States must show Asian nations it continues to back them.

"We must convince our Asian friends that a reduced military presence does not mean we are abandoning them," he said in testimony prepared for a Senate Appropriations subcommittee.

"Our economic assistance program is one of the most effective ways to maintain our credibility as an Asian power," Rogers said.

Rogers called for Senate restoration of $532 million pared by the House from President Nixon's $1.8 billion foreign aid request, the lowest administration request for aid funds in 15 years.

Rogers said the House reduction "cripples our entire aid program."

Aid funds provide support technical, agricultural, development and related programs in underdeveloped countries around the globe.

For Vietnam, the administration asked $366 million for supporting assistance, but the House cut $40 million of this.

As U.S. military expenditures decline in Vietnam, Saigon needs substantial economic aid to meet increased costs of the war without imperiling economic stability. Rogers said.

"If the House cut . . . is not restored, the goals of Vietnamization will be significantly more difficult to achieve," Rogers said.

Elsewhere in Asia, he said, economic assistance must continue at adequate levels while President Nixon withdraws U.S. troops from Thailand, South Korea and the Philippines.

Rogers said $8.9 million was diverted from last year's aid program to provide military assistance to Cambodia, and he said the administration expects to divert $40 million more to Cambodia out of the funds being sought for the present fiscal year.

The secretary of state said this aid does not mean the United States is assuming responsibility for Cambodia's defense. But, he said, it is considered "appropriate" to provide Cambodia material assistance to defend itself "against a foreign invader."

In regard to Latin America, Rogers said, the House decision to cut off a third of the funds sought for Alliance for Progress development loans would require reductions in existing high priority programs in agriculture and education.

Similarly, the secretary of state asserted, a continued decline in assistance for African state could "place in question our genuine interest in the people of Africa."

Rogers' views were contained in testimony prepared for a hearing today that later was canceled. It was not clear whether he would appear personally at a later date or have his testimony placed in the hearing record.

AFRICA—THE COMRADES BEAT THE BUSHES

(George S. Schuyler is an internationally famous author, lecturer, and syndicated journalist. Mr. Schuyler has written two novels, Black No More, and Slaves Today! and has contributed to such national magazines as American Mercury, The Nation, The Freeman, Plain Talk, and Negro Digest. George Schuyler's excellent autobiography, Black And Conservative, is currently available from Arlington House.)

Since the last *Scoreboard*, the nets of Communist subversion have drawn tighter around Africa. There were foulups and setbacks but the Reds are learning fast.

Where surplus small arms and automatic weapons have seemed inappropriate or premature, there have been generous offers of aid and trade, scholarships at Patrice Lumumba University and similar schools, all-expense conferences with delegates picked for their loyalty and eager to vote yes, and freebies of shoddy goods and toys for the bush yokelry. There have also been weapons carriers, tanks, bazookas, and occasionally old warplanes for the big boys, either free or on jawbone. Blacks who had never been ten miles across the veldt were flown to China or Cuba to learn how to blow up a presidential palace or assassinate a dusky Cabinet Minister reluctant to toe the Party line.

Varied success has attended these approaches between the Mediterranean and the Zambesi. The Maghreb seems to be more Middle East than African, but this is deceptive. Each of these Mediterranean States impinges upon a Black African country easily accessible in these days of air travel. Morocco has been wooed into accepting Red goodies, while cadging aid from increasingly apprehensive France. Algeria, broke despite its oil riches, is a pliant Soviet preserve. Oil-rich Libya has all the zeal of a recent convert to Communism, and Egypt is completely down the Tiger's throat. Western bases, once outposts of empire, are now available to the Russian fleet patrolling Mare Nostrum. Pro-West Tunis shivers.

Soviet prestige has grown immensely since the end of the Nigerian civil war, and its merchant, fishing, and war vessels make it *persona grata* to the black politicians hungry for help. Only Southern Africa stands strongly in the way of an ultimate continental sweep by the Comrades. With the Red Fleet visiting the Red Sea, the Persian Gulf, and the Indian Ocean, even Southern Africa's remoteness is no guarantee that it will escape the Communist drive.

SPANISH WEST AFRICA

Largely desert (102,703 square miles and 48,000 population), this miserable little country so lacks resources that not even Morocco wants it. Curiously, however, it offers an attraction to the Reds, who currently are directly wooing its authoritarian master in Madrid with some prospects of success.

MAURITANIA

An even bigger desert than the Rio de Oro to its northwest, its 418,000 square miles and one million wandering herdsmen surrounded by the Atlantic, Algeria, Mali, and Senegal, Mauritania is a politico-economic appanage of Paris. The French control its rich iron ore and copper deposits, its growing fishing industry, and market its cattle, camels, and gum salt. No hidin' place for Reds. President Moktar Ould Daddah has made that clear. But, he broke diplomatic relations with the United States on June 7, 1967, to show his solidarity with the Arab world, citing U.S. support of Israel.

SENEGAL

The likelihood of the U.S.S.R. making inroads in this erstwhile French colony of 76,000 square miles and 3,500,000 population is slight. Its black intellectual President Leopold-Sedar Senghor is more French than Pompidou, and there are more Frenchmen in Dakar than before independence—including several thousand white troops. While Dakar is the greatest port south of Casablanca, it remains a nest of intrigue, and the ubiquitous Russian fishing fleets operate nearby. Senghor, the apostle and author of *Negritude*, wields a strong hand. When domestic unrest involving students and workers grew troublesome last June, he promptly declared a state of emergency. In December he cancelled a radio program about the glories of the Soviet Union, suspended a Soviet cultural review, and threatened to expel Russian newsmen after an alleged Soviet press and radio campaign against Senegal. The Reds piped down.

Last December Senegal rushed troops when the embattled Portuguese shelled some Senegalese villages used as staging areas for the Russian-subsidized Party for the Independence of (Portuguese) Guinea and Cape Verde Islands, headed by the Communist agitator Amilcar Cabral. The arrival of the troops from Dakar sealed off the Senegal-Portuguese Guinea border. With 25,000 Portuguese troops and thousands of local native levies withstanding the invaders from Casamance district, the P.A.I.G.C. militants had to retire to Guinea under the sheltering arm of Comrade President Sekou Toure.

GAMBIA

In April, 1970, this most improbable African mini-State voted 84,968 to 35,638 to become a republic within the British Commonwealth. The new Gambian republic, with a population of 360,000 in a territory of 4,000 square miles along the Gambia River, is formed in the shape of a finger pointing into Senegal. Sir Dawda Kairaba Jawara, Prime Minister since 1962, became the first President. What Communists there are remain mum.

Ever since the British bought the colony from Portugal in 1588, Gambia has been subsidized by London, since its one crop (peanuts) will not support it. Outside Bathurst, Russian fishing boats reap a harvest with no competition from the easygoing natives.

PORTUGUESE GUINEA

With an area of 13,948 square miles and 529,000 people, this enclave has been Portuguese since 1446. Its Governor, responsible to Lisbon, is a native Negro. Since the Communist-subsidized P.A.I.G.C. attacks from the Guinea springboard provided by Sekou Toure, the Portuguese have with traditional determination stood fast, killing all invaders. Red chances there are non-existent.

GUINEA

Following the recent coup in Mali, suspicious President Sekou Toure, the Communist ruler of this 95,000 square mile "republic" and its 3,500,000 people, rounded up suspected subversives and executed seven high-ranking Army officers for plotting against him.

Both Soviet and Chinese Communist instructors operate training camps here. Conakry is headquarters for Amilcar Cabral's P.A.I.G.C., and here extremists of Sierra Leone's All-People's Congress were armed and trained before their Party won power. The new Soviet Embassy is a fortress-like compound where 250 personnel have schools, offices, housing, entertainment—and protection. The rivalry between the Russian and Chinese is intense, but neither group associates with the natives socially. What price integration! Nkrumah, the former President of Ghana, heads Moscow's Gulf of Guinea Project for West African conquest and publishes a Red journal here.

SIERRA LEONE

Last September after a long period of Governmental changes culminating in the All People's Congress taking over after its leaders were trained in neighboring Guinea, the East German-African Society (a Government organization) chose Freetown (with the approval of the Sierra Leone Government) as the venue for an "international" conference on how to increase East Germany's "participation" in liberating Africa. It was attended by a hundred delegates from twenty-five African countries. In addition to delegations from the Sudan, Nigeria, Tanzania, Congo (Kinshasa), Ghana, Guinea, Ivory Coast, Somalia, Upper Volta, and Zambia, there were delegates from three Soviet Front organizations: the World Council of Peace, the World Federation of Democratic Youth, and the International Union of Students.

Even though Sierra Leone (27,925 square miles and 2,180,355 population) is rich in alluvial diamonds, accounting for eighty percent of its income, it is assumed that the East German regime paid for the big bash. Sierra Leone's Minister of Lands, Mines and Labor, C. A. Kamara-Taylor, gave the open-

ing address, and the Prime Minister, Dr. Siaka Stevens, gave the closing speech.

All African Heads of State were urged to "normalize" their relations with East Germany and afford it diplomatic recognition. Youth and students throughout the world were urged to intensify the "struggle against imperialism." But, so far, only Tanzania maintains diplomatic relations with East Germany, and that is the Red "republic" which shares with Communist China the rule of the island of Zanzibar.

The campaign to spread love for East Germany in Africa is directed by Professor Albert Norden, a member of Walter Ulbricht's Politburo, who has been successful in setting up cultural relations in many African countries—notably Guinea, where President Sékou Touré lauded East Germany's "positive anti-imperialist policy."

LIBERIA

A lot can be said about President William V. S. Tubman, whose one-Party dictatorship has kept him in office since 1943, but the best thing is that he is anti-Communist and has no truck with the Soviet Union or any other Red State. Liberia, about the size of Ohio, was founded by American freedmen in 1821, and has since grown to a population of about a million.

IVORY COAST

Covering 127,520 square miles, and with 4.7 million people, this former prize French colony was prosperous before independence (1960) and is prosperous now. Originally President Félix Houphouet-Boigny was a Socialist, a physician (he was Health Minister in the French Cabinet), and a successful agronomist. His current attitude may be gathered from the fact that there are more whites in the Ivory Coast now than ever. Foreign-owned businesses predominate. He is as much at home in Paris as in Abidjan, and is so suspicious of Communists that last May thirtieth Ivory Coast severed diplomatic relations with the Soviet Union and asked Russian Chargé d'Affaires J. Semenov to leave at once—all without explanation.

There have been internal troubles, sternly repressed. Near the capital is stationed a combat battalion of French troops—just in case.

GHANA

Left holding an $800 million debt incurred by Communist Kwame Nkrumah's totalitarian excesses, Ghana is in no mood for further radical adventures. Dr. Kofi A. Busia, the new freely-elected Prime Minister, is strongly anti-Communist and makes no bones about it. Nkrumah's old Convention People's Party is outlawed; the Chinese, North Vietnamese, and North Koreans have been chased home. Unhappily, the new regime has also just banished sixty thousand unregistered black aliens, confiscating their businesses and property (an old African custom). The Russian Embassy remains in Accra, but its bomb-tossers are lying low. Nonetheless, this 92,100 square mile territory, with 8 million people and great wealth in cocoa (one-third of the world's production), gold, manganese, and bauxite, remains a great temptation to Comradely intervention.

TOGO

This improbable republic of 1,603,000 people in a 20,400 mile elongated area has since independence assassinated one President (Sylvanus Olympio) and chased out another (Nicolas Grunitzky). Once a colony of imperial Germany, its best friend and customer today is West Germany. Reds are scarce. Its military regime, under Lt. Colonel Etienne Eyadema, seems determined to keep it that way.

DAHOMEY

This former slave-selling State has had four putsches and as many Presidents since its 1960 independence. Its 2,500,000 people in 45,000 square miles eke out a precarious existence on tropical products and annual subventions cadged from France. There is nothing to do but vote. There are innumerable factions but no Reds, and the current President is Emile-Derlin Zinsou.

MALI

This immense State (584,942 square miles of largely desert country with an estimated 4,900,000 people) borders Red Algeria and shares its political tastes. After a military coup ousted Communist President Modibo Keita, the young Army officers were stuck with the collectivist set-up Keita had imposed. An estimated one thousand Red Chinese technicians operate the sugar, match, cigarette, and textile factories. The Chinese Reds issue weekly progress bulletins. Mao's propaganda and his little red book are everywhere. There are scores of Russian-trained civil servants. Children are taught Marxism and Maoism.

Some $320 million in aid has been given Mali by the Soviet Union and its East European satellites since 1960. Soviet and East German goods abound. Even the sports stadium is Russian-built. Although "positively nonaligned," this country supports the Vietcong with fervor.

Following the collectivist bent, Mali is bankrupt yet hires a thousand new civil servants yearly. It's crazy, Man!—but that's true of collectivism everywhere. A 500-mile border with oil-rich Red Algeria assures steady communication with the Communist world. Ironically, the trade deficit is astronomical and, believe it or not the military junta is financially dependent upon France. Lieutenant Moussa Traore, the junta boss, has a right to sing the blues.

UPPER VOLTA

This landlocked, primitive, impoverished 105,841 square mile "republic" (1960) of 5 million people was carved from the old Mossi kingdoms, long a barrier to onrushing Islam. Four years ago President Maurice Yaméogo was deposed by Lt. Colonel Sangoulé Lamizana, who wisely never moved to his predecessor's palace but remains in his villa inside the Army encampment near Ouagadougou, the capital.

Imposing strict austerity, the military regime has balanced the budget, restored credit, and quadrupled cotton production. More than a half million people, however, aid the economy by working in adjacent and more prosperous Ivory Coast, Ghana, and Togo. Colonel Lamizana fought with the French Army against the Communists in Indo-China, his military staff is his Cabinet, and he stands no nonsense, what with Red Mali on his northern flank.

NIGER REPUBLIC

This vast land (484,000 square miles) has some 4 million poor nomadic people in its barrens and only three percent of its population lives in the scattered towns; but it has 14 million cattle, consumer and producer cooperatives, and State-owned corporations. There are rich mineral deposits and much subterranean water, but no money with which to exploit them.

Niger came into being in 1960 after a fierce struggle between pro-Western President Hamani Diori and pro-Communist Djibo Bakary. Diori won and Bakary wisely went into exile. Subsequently, there have been abortive and brief flareups, one Army mutiny, and an attempted assassination of President Diori in a Niamy mosque. This anti-Communist leader has established close relations with Nationalist China, and in October visited Chiang Kai-shek in Taiwan, before going on to Seoul. With three Communist States to its north, and quasi-Red Nigeria to its south, Niger needs friends.

NIGERIA

This country has been deceptively united by the conquest of Biafra, thanks to Soviet and British arms and the escape to Ivory Coast of Biafra's Colonel Odumegwu Ojukwu. This huge coup-wracked federation (a 350,000 square mile area and 56 million people), with its great mineral and agricultural wealth, is Russia's latest prize. When at the outbreak of the civil war a three-man delegation flew from Lagos to Moscow for aid, it was promptly given, with planes (flown by Russian-trained Egyptian pilots), tanks, and other heavy arms landing at Kano airport within days. This assured ultimate Biafran defeat. Under the guise of Commonwealth solidarity, Britain supplied smaller arms, ever sure of the need to protect the rich oil fields which supply so much of her needs.

Almost daily, Moscow's *Radio Peace And Progress* praises pro-Left Nigerians like Chief Awolowo, the Federal Commissioner of Finance who just authored *A People's Republic* advocating a Communist economy; Bola Ige, Nigeria's Western State Commissioner for Agriculture and Natural Resources, who praised the "reasoned Socialist guideline" of Awolowo's book and urged the promotion of "democratic" Socialism; and, Dr. Tunji Otegbeye, leader of the pro-Russian Marxist-Leninst Workers' and Farmers' Party (S.W.A.F.P.) which publishes the *Advance*, a Communist sheet bankrolled with rubles; Wahab Goodluck and S. U. Bassey, respectively President and Secretary-General of the ultra-Leftist Nigerian Trade Union Congress (N.T.U.C.); Eskor Toyo, National Secretary of the "neutralist" Nigerian Afro-Asian People's Solidarity Organization; and, the chief members of the Committee of Ten, a powerful Leftist pressure group. The extensive Russian radio campaign is masterminded by V. Korovikov on behalf of the Soviet Foreign Ministry. Comrade Korovikov made an on-the-spot investigation last June.

The Red Chinese are active here too. In Benin last May (1969) the pro-Peking Nigerian-Chinese Friendship Society held a two-day meeting in which funds were asked for propagation of Maoism and Communism in Nigeria. The Society has been operating since 1960.

Significantly, Nigeria has effectively destroyed the Christian hierarchy in what was Biafra by ousting or jailing the priests and nuns for aiding the enemy by supervising food distribution during the war. The food had been received through anti-Communist Portugal and Spain. This is a further extension of the Islamic-Christian conflict continuing since the Seventh Century. Biafra was a Christian stronghold surrounded by Moslems.

At war's end, Nigeria's Moscow Ambassador, G. T. Kurubo, strongly praised Moscow's extensive military aid which made victory possible. He said Soviet assistance—"more than any other single thing—more than all other things together," had sealed Biafra's doom. Kurubo moved that the Soviet Union "came out openly and honestly on the side of right," the side of the Federal Government.

The Soviets have flown in sixty Russian doctors—not to tend war victims but to "reorganize and improve" medical services. Which means they are creating cells all over the country. This, however, is minor compared to the commericial and financial agreements between the two countries. Russia has "found a new baby."

CAMEROUN

This State was born in 1960 after a five-year Communist-led revolt led by Rueben Um Nyobe in the forests and Dr. Felix Moumie abroad. Nyobe was killed and Dr. Moumie mysteriously poisoned in Geneva. President Ahmadou Ahidjo, preoccupied by internal subversion and revolt, took dictatorial powers in 1962, making Cameroun a one-Party State and arresting other political leaders. With great potential wealth in export agriculture and the processing of its bauxite, this "republic" of 6 million people in 182,381 square miles may well look with apprehension at neighboring victory-flushed Nigeria's new, battlehardened, 200,000-man Army.

EQUATORIAL GUINEA

Save for the excellent Spanish-built airfield and the fine harbor at Santa Isabel, the capital, this tiny (260,000 people on 10,820 square miles) and newest (October 12, 1968) African mini-State has nothing to recommend it—except to Russia, which in January sent a fourteen-man diplomatic delegation seeking air rights. President Francisco Macias Nguema, a Leftist, will grant the concession asked if paid to do so.

CHAD

François Tombalbaye, President of this 495,450 square mile semi-desert, wth its scattered 3,300,000 Berbers and Bantus, has learned the hard way that if you lie down with dogs, you get up with fleas. Strictly from hunger, he flirted with Russian and succumbed to Soviet blandishments, inviting "experts" to show him the way to the fleshpots. As usual the Russians double-crossed him and supported the northern nomads' *Front de Liberation Nationale du Tchad,* which is out to eliminate the Bantu politicians in Fort Lamy, the capital.

The leader of the Red effort, Dr. Abba Siddick, is a former associate of the President and lives in Algiers, Khartoum, or Tripoli. Wherever he is, he gets active support (including arms) from Algeria, the Sudan, and now Tripoli. The rebel movement is backed by the Afro-Asian-Latin American People's Solidarity Organization based in Havana.

So during the past year war has raged in the barrens, with 3,500 French troops aiding the Chadian Army in this African Vietnam. Since the northern rebel area borders on Libya, that newly-Red Government is aiding them. One of France's reasons for offering the Red Libyan junta 110 French Mirage jet fighters was to lure them to stop supporting the Chadian rebels, but Tombalbaye has learned that if this happens adjacent Red Sudan will give them the necessary materiel and financial support.

Chad is so strategically important that the French cannot afford to lose it. Moscow feels the same way. So, despite rising criticism in the French Chamber of Deputies, the Foreign Legion is continuing its Beau Geste war here.

CENTRAL AFRICAN REPUBLIC

General Jean Bedel Bokassa, a bull-necked veteran of the French Army, runs his 240,000 square mile "republic" with an iron hand and has no trouble with Reds. When he suspected that his Minister of Finance and closest associate was plotting his assassination, he tried and executed him at dawn. Jailing whites and blacks with a grand sense of equality, Bokassa is a bemedaled tyrant with whom the Communist Conspiracy has not sought to tangle. The only thing he cannot control is the "republic's" location. It is landlocked.

GABON

This country of 450,000 people in 103,317 square miles is well-off with diamonds, iron, uranium, natural gas, gold, cocoa, and coffee. There are more whites here than ever and resources are being developed by big French corporations. No wonder the Russians are so interested in a foothold in neighboring Equatorial Guinea. President Bernard-Albert Bongo is as anti-Communist as Leon M'Ba, his predecessor, who died in office on November 28, 1967. President Bongo maintains close ties with Nationalist China, but France is his second country.

CONGO REPUBLIC (BRAZZAVILLE)

A coup-ridden country of 900,000 people in an area of 139,000 square miles, this former French colony is as Red as a place can be. *The Internationale* is the national anthem and red flags fly from all public buildings since former President Alphonse Massemba-Debat was deposed in August of 1968. Soviet aid has been eagerly grabbed; a big irrigation project and a swank hotel and hospital have been built by Moscow; sixty Soviet teachers have been employed; and, three hundred youths have been sent to the U.S.S.R. for study. The "rival" Chinese subsidize plantations and set up socialist industries. Their nationals are numerous but aloof socially from the natives.

Red Romania is now trying to establish itself here alongside Red Russia and Red China. Two old revolutionaries, Antoine Gizenga and Christian Gbenye, who ran the abortive Communist State around the other Congo's Stanleyville, now live in Brazzaville biding their time. Wang Yu-tien, Peking's most experienced Africanist, is the Chinese Ambassador here. There now seem to be no Cuban troops present.

CONGO (KINSHASA)

Under the rugged rule of President Joseph D. Mobutu (who took years to learn what Moise Tshombe knew all along), the Communist menace has with Belgian cooperation been greatly reduced. This 905,582 square mile empire, with 15 million diverse peoples, is prospering just as Tshombe foresaw. Chief danger comes from nearby Red Brazzaville. The border has been closed for months.

ANGOLA

Except for a little bushwhacking in its northwest corner, where occasional rebel bands from the Congo try to break through the string of fortified Portuguese villages, this vast and prospering province and its 6 million multi-racial population is flourishing as never before. A few guerrilla gangs have attempted to penetrate from western Zambia but without success. The Portuguese are too alert and too tough.

SOUTH AFRICA

During the year this vast (471,440 square miles) land, with its 19,600,000 people of diverse origins, religions, and colors has flouted its traducers and enemies, and flaunted its growing industrial, commercial, financial, and military power. It has perfected its much-denounced system of *apartheid* with Bantustans, border industries, and growing mass housing for the poor. Its expanding fleet and air force is prepared to challenge the Soviet naval expansion in the Indian Ocean designed to cut commerce (especially oil) around the Cape.

The establishment of diplomatic relations with the black countries of Southern Africa has strengthened the buffer against Communist invasion. The recent reelection of the Nationalist Party indicates white approval of the regime. The last remaining (overt) Communists have been detained or forced into exile.

LESOTHO

This little (11,716 square miles) country of 888,258 people is entirely dependent economically upon South Africa, to which 200,000 men go yearly to work in the mines. Long a hideout for black and white South African Communists, it was once the headquarters of the subversive Pan-Africanist Congress, an extremist Bantu rebel group. Under big beaming Chief Leabua Jonathan, the Prime Minister, Lesotho has been rough on Reds although the Basuto Communist Party still remains—taking orders from the South African Communist Party now domiciled in London. Jonathan apparently lost the February election but retained power through a coup, detaining the opposition leaders and even the "Liberal" King Moshoeshoe II. There are full diplomatic relations with South Africa.

SWAZILAND

A Massachusetts-size, hilly country within South Africa, and bordering on Mozambique, Swaziland is virtually immune from Communist subversion and infiltration, and old King Sobhuza II and Prime Minister Makhosini Dlamini plan to keep it that way. It has diplomatic relations with South Africa. With 8,000 whites and 4,000 Euro-Africans, it has become something of a vacation spot for those favoring interracial association. Its bars, hotels, and casinos draw no color line.

BOTSWANA

Completely surrounded by strongly anti-Communist Rhodesia, South Africa, South West Africa, and Angola (and with only a 300-yard border with Zambia), this 225,000 square mile country (550,000 population) is cut off from Communist infiltration. There have been invasion attempts by small guerrilla bands from Zambia but none got through. In the Caprivi Strip on most of its northern border, South Africa has recently established one of its self-governing Bantustans. President Seretse Khama, a London-trained barrister, will have no truck with Communists. There is a treaty with South Africa and a diplomatic representative there. Botswana also has an Ambassador in Russia!

MOZAMBIQUE

This 302,328 square mile Portuguese province, with its 7,300,000 people, has been part of Portugal since early in the Sixteenth Century, and Lisbon is determined to keep it that way. It is a thorn in the side of the Communists, not only because of Portugal's anti-Red policy but because she has thoroughly thwarted the rebellion and invasion in the north fomented by the Mozambique Liberation Front (F.R.E.L.I.M.O.) and by a new one, *Partazona de Mozambique.* To counter ten thousand Communist-armed troops, the Portuguese have thrown in forty, thousand crack troopers. Rebel forces are under the general direction of the Liberation Committee of the Organization of African States, headquartered in Dar es Salaam, with training camps spread over Tanzania and Zambia.

Long-range Red strategy is to delay or prevent the construction of the giant Cabora Bassa Dam on the Zambesi, which will be bigger than Aswan, and will supply power and light to all Southern Africa. Mozambique is rich now and, thanks to the safety in its anti-Communism, will be richer still.

MALAWI

All Black African politicians have denounced (and envied) this landlocked, Pennsylvanian-sized agricultural country which has had the wisdom to oust all Communists, ally itself with Portugal, South Africa, and Rhodesia, and is thereby easing life for its 4 million people. President Hastings Banda maintains diplomatic relations with them all. Though his nation borders on Tanzania and Zambia, Banda has stopped the Red guerrillas and infiltrators with tough military measures. Understandably, Malawi has been a constant target of *Radio Moscow's* slanderers and rumormongers.

RHODESIA

Next to South Africa, the main African target of the Communist attack is this rich, industrial, landlocked republic of 150,332 square miles and 5 million people, which a supposedly friendly West has sought to make (along with South Africa) an international pariah. By rigorous action it has banned the subversive black conspiratorial Parties, detained their leaders, and freed the people from terror attacks. Its Army has exterminated all guerrilla invasions. Fifteen blacks sit in its Parliament and its Salisbury University is interracial. Rhodesia's destruction is plotted by Communists and non-Communists. Its determination to survive under Prime Minister Ian Smith is admired by all free men.

ZAMBIA

This lung-shaped, 290,587 square mile country of 4 million people is landlocked and surrounded by Malawi, Mozambique, Rhodesia, Angola, and the Congo. It is rich with Copper Belt mines and smelters.

Zambia is now a base for Communist

guerrilla forces. From scattered training camps staffed by Maoist, Russian, and East German military experts, six hundred members of the Angolan Popular Liberation Front have been readied for invasion of Zambia's anti-Communist neighbors. President Kenneth Kaunda, a so-called Christian Socialist (what a contradiction!) and Vice President Simon Mwansa Kapwepwe, a Communist often praised by the Kremlin, are rivals. Both are anti-white. Kaunda has now taken direct charge of the ruling United National Independence Party.

Red China has agreed to build the 1,100-mile Tanzam Railroad to Dar es Salaam, and the two black countries concerned will pay sixty percent of the $340 million cost by purchase of Chinese consumer goods ($21 million annually). But, Red China has a limited range of goods they can buy, so they are stuck. A 700-man Chinese surveying team is roaming the country, and unspecified thousands of Chinese workers have been imported—probably enough to man an army division. Everything is set for a Red takeover of this, the world's fourth largest producer of copper. Already the mines and banks have been nationalized.

TANZANIA

Julius Nyerere, President-dictator of this 363,708 square mile former U.N. Trust Territory of 10 million people, is the perfect Communist stooge. Here the Chinese, Russians, East Germans, and South African and Mozambique guerrillas rule the roost. Mao's propaganda signs are everywhere in military off-limit areas. Zanzibar is a major depot for Communist arms shipment.

Already Americans, building a trans-Tanzanian road, and Chinese railroad workers have physically clashed. More seriously, the Africans are clashing with the socially aloof Asians who run the small businesses.

UGANDA

When President Apollo Milton Obote took control in 1967 after deposing King Edward Mutesa of Buganda in an armed conflict claiming 15,000 killed, he declared: "Uganda will move left to acquire her new identity." Last December he announced a Common Man's Charter with the basic theme that the rich must be made poorer, and the poor must become rich. In an interview with the late Philippa Schuyler he said, grinning: "You know, I'm a Communist." He is.

There is a one-Party system in Uganda, and the Press, once free, has been muzzled. The Asian tradesmen are being forced out. Anti-Communists took heart when on December nineteenth Comrade Obote was shot in the head by an assassin as he left the annual convention of the Uganda People's Party garbed in a red shirt. Their hopes were dashed when he recovered.

RWANDA

Since the Tutsi ruling class was slaughtered in the thousands and 140,000 chased out in 1966, the proletarian Hutus have run this incredibly backward mountain enclave of 10,365 square miles and 4 million inhabitants, which even the United Nations hesitated to make free. Despite Chinese Communist activities in Burundi, its neighboring Gold Dust Twin, Rwanda under President Grégoire Kayibanda has steered clear of Reds.

BURUNDI

Almost identical in area and population with Rwanda, things have been livelier, and bloodier, here. The Tutsi minority brutally put down a bloody rebellion of the eighty-five percent majority Hutu serfs in 1965. The Red Chinese Embassy was active in the intrigue from the start, and one of its attachés almost upon arrival escaped to the U.S. Embassy and told all, whereupon the Chinese were invited out. Last September another Hutu plot was uncovered and heads rolled under President Michel Micombero's Draconian decree. Two of the three Prime Ministers have been executed, and a Health Minister died "under questioning."

The Red Chinese Embassy is now back in business, but the Maoists are lying low. As one of the four thousand Europeans living in the country remarked, "This isn't a happy time in Burundi. It isn't a happy place." He could have said that again! In December, twenty-three persons, including two former Government officials and nineteen military men, were executed as plotters; two other former Ministers were jailed for life; and the Belgian Ambassador, whose wife is a black, became *persona non grata:* The Communists are understandably mum.

THE SUDAN

Not since the Ninth Century, when Islam converted this early Christian country with the scimitar, have there been more coups here than during the past year. It is the only big crop that has been harvested, and today this arid 967,500 square mile land and its 14 million people are locked in the Communist Russian camp. Of course civil war in the Christian-pagan South has been going on since independence in 1957, with a half million casualties, but since last April bewildering changes have taken place.

On May 25, 1969, a group of lower-rank military officers staged the year's first coup by overthrowing the shaky Coalition Government, and designating the Leftist former Chief Justice Babiker Awadallah as Premier and Foreign Minister. The revolutionary junta was headed by Colonel Jaafar al-Nimairi, and the new Premier announced "a socialist democratic course." Interestingly enough, the following day the Deputy Chief of Staff, Mohammed Idris Abdullah, arrived hat-in-hand in Moscow. The next step was to recognize East Germany. Then all salaries were cut and bureaucrats had to go to their "work" in buses instead of Cadillacs. The regime was said to be solidly behind the Arab cause in Palestine and against imperialism in Africa. Four of the twenty-four Cabinet officers were Communists, albeit the Party had been outlawed for three years. President Ismail al-Azhari was ousted, of course, and the prestigious former Premier Muhammad Ahmad Mahgoub could not be found.

To prove himself a Tough Oscar, General al-Nimairi said the three Southern provinces would never be allowed to secede, noting: "We do not believe in secession." Then six U.S. diplomats were expelled for aiding local "plotters," albeit the Sudan had broken relations with the United States at the time of the 1967 Arab-Israeli war, and our boys worked out of the Dutch Embassy. A month later Premier Awadallah charged that the U.S.A. was trying to "sabotage" his regime, while al-Nimairi magnanimously gave the Southern (Christian-pagan) provinces the right of autonomy (which they had been fighting for since 1957), and the "right" to establish relations with the Communist bloc. On August 26, 1969, former President Ismail al-Azhari "died after a heart attack," and on October twenty-eighth the new Leftist Premier was deposed and General al-Nimairi replaced him. The 50,000-strong Communist Party was riding high, so it was easy to suppress a fifth coup.

When the Communist revolt in Libya occurred, al-Nimairi stepped forward as pal of the new regime, and of Comrade Nasser. There are 150 Russian military instructors in the Sudan with 250 "technicians" working on "hospital projects," while artillery and tanks have arrived from Yugoslavia, and arms were supplied to the Communist Eritrean rebels against Ethiopia. Last October al-Nimairi visited Moscow, to discuss "expansion of trade."

SOMALI

This Texas-size semi-desert country of 3 million cattle grazers has also had its share of coups during the past year. Oddly enough for Africa, Premier Mohammed Hagi Ibrahim Egal won reelection last March twenty-sixth in competition with sixty-three Parties, none stable. He then presumably worked out a détente with Kenya and Ethiopia to end the bloody border strife with them over grazing grounds (the main trouble being lack of water). Then, touring the drought-stricken areas on October fifteenth, President Abdirashid Ali Scermarke was assassinated. He had visited the Soviet Union, China, Britain, and the U.S.A. He established close ties with the Kremlin, which supplied the usual weapons. Premier Egal was at the time conveniently away on a visit to America.

On October 21, 1969, the Somali Army and police seized power, announcing a policy of nonalignment and neutrality, and jugged all Government Ministers, including Premier Egal, whom the radio denounced as a "blood-sucker of the people" shortly after he flew home from California. The revolutionary council ruled by decree, a twelve-hour curfew was imposed, planes forbidden to land, all political Parties banned, the Supreme Court abolished, and the sixty-man U.S. Peace Corps contingent told to leave by year's end. Another Moscow victory!

KENYA

That Old Black Magic probably won't work much longer for Jomo Kenyatta, high priest of the Mau Mau. The assassination in July of Tom Mboya by a Kikuyu, the tribal rioting at his funeral rites where Kenyatta's Mercedes was stoned and Mboya's widow gassed, and the cries of "bull" from the oppositionist Kenya People's Union adherents of Communist Oginga Odinga, were the handwriting on the wall which materialized boldly just three days after the Luo Fabian Minister of Economic Affairs and heir-apparent was killed. Mboya was unpopular, and only two years before had barely escaped another gunman. It will be recalled that prior to that the Army mutinied. Kenyatta responded by sending back a shipment of Soviet arms ordered by Odinga, expelled Russian and Czech journalists, asked for the recall of the Red Chinese Ambassador, and ousted all leaders with Marxist leanings, including then Vice President Oginga Odinga.

Daniel Moi, the current Vice President, hinted that a Communist plot was behind the shooting of Mboya: "an international conspiracy in the world." He absolved the West. Interestingly, it was disclosed that Mboya's killer, a member of Oginga Odinga's Party, had been to "school" in Communist Bulgaria.

As tribalism became more tense, Jomo took to the stump, the old Mau Mau oaths were taken again and the Luos rushed almost en masse to the oppositionist Kenya People's Union. As tension grew, Kenyatta was heckled by Odinga's followers, who were arrested and detained along with their leader after gunfire killed eleven and wounded seventy-three at the dedication of a Soviet-built hospital in Kisumu. The Government charged the K.P.U. was working with "foreign and unfriendly elements to destroy the peaceful running of the country."

At the Parliamentary elections on December 8, 1969, five Ministers lost their seats. A month later 23,000 school-teachers struck because they had not been paid. To appease the mob, the regime ordered nearly a thousand Asians to close their businesses by January 11, 1970, even though six hundred of them were Kenya citizens.

When the K.P.U. was banned on December twelfth, it was charged that Odinga and his henchmen had visited the Russian and Chinese Embassies in Kenya and nearby countries. Indications are that when 79-year-old Kenyatta goes, the takeover will come.

ETHIOPIA

This oldest Christian nation, with its mountainous 395,000 square miles and its

estimated 22 million diverse tribesmen, is on the verge of disintegration. Surrounded as it is by Communist Sudan and Somali, and hostile northern provinces of Kenya which the Somali shiftas control, it is not surprising that arms from Czech arsenals find their way to the Eritreans through hostile Sudan and Somalia.

In 1960 the American-trained Army mutinied, but Haile Selassie flew in from Rio de Janeiro and crushed it. Since then there have been student strikes and hijacked commercial planes. The Emperor, who was born in 1892 and has been in charge since 1930, has seen the Red Sea turn politically Red, with the Communists in power across the narrow Strait of Bab el Mandeb.

Ethiopia is a one-man State, and that man will soon be gone. The Emperor is fully aware of the Red threat and has asked repeatedly for American military assistance. Guerrillas of the Eritrean Liberation Force are getting bolder than they were before Sudan went Communist.

MALAGASY

A California-size island of 6,300,000 people flanking Mozambique across the 300-mile Mozambique Channel, Malagasy is of the greatest strategic importance to the Communist Conspiracy. The island was rent by a Red revolt in 1947–1948, which the French crushed with great difficulty. President Philibert Tsiranana, a good-humored, effective Francophone leader who founded the Social Democratic Party in 1956, and won the first election after 1960 independence, is an outspoken anti-Communist.

A moderating influence in African politics, Tsiranana has linked up a bloc of French-speaking African States in the *Organisation Commune Africaine et Malgache* (O.C.A.M.), which greatly irritates Moscow and Peking. Significantly, he last June arranged closer relations with South Africa and Portugal. This came none too soon.

Moscow's mouthpiece politically on the island is the pro-Communist opposition Party called A.K.E.M., which has, its leader says, "total devotion to scientific socialism." A.K.E.M. has proposed the old trap of coalition, and the granting of facilities to Soviet ships "engaged in oceanic survey work." These are really disguised units of the Soviet Far East Fleet serving as liaison vessels with the Red squadrons gradually penetrating the Indian Ocean and the Mozambique Channel, through which all the area's oil ships pass.

The top A.K.E.M. Communist here is the "Reverend" Richard Andriamaniato. He and his Secretary General, Cisele' Rabesahala, have become frequent visitors to the Moscow fleshpots and other Soviet bloc countries. At the A.K.E.M. Party Congress late last year, there were fraternal delegates from the Russian, French, and Italian Communist Parties. Strong pressure was put on President Tsiranana to hasten the coalition. He wouldn't budge.

The Soviet Union pants for use of the former French naval base at Diego Saurez at the northernmost tip of Madagascar, which the Japanese were desirous of capturing during the dark days of World War II. With a foothold there, along with the Malagasy airports, the Communists could dominate the Mozambique Channel and cut off most of the oil bound for industrial Western Europe.

Alive to this, trade ties were strengthened in October between South Africa and Malagasy as a result of a mission from the Transvaal Chamber of Industries, and efforts are being made to increase tourism from South Africa. So the embattled Southern African bloc has another nonwhite ally, and Mozambique has a protected flank.

BUREAUCRATIC LAWLESSNESS

HON. ALLARD K. LOWENSTEIN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1970

Mr. LOWENSTEIN. Mr. Speaker, there is a pervasive feeling abroad in the land that things are happening over which people have no control.

Their sons are sent off across the globe and they are taxed to support a war about which neither they nor their elected representatives ever had anything to say; big corporations over which they have no control spew their industrial wastes into the air and water that we all must use; the airlines violate with impunity the peace and quiet of those of us living near airports; manufacturers turn out products that are defective and then do not stand behind them; the rich escape their fair share of taxes through a variety of loopholes, while the middle class is taxed at every turn; more money is spent to finance inadequate and overpriced medical services than in any other country in the world, yet our public health statistics place us below most Western industrial countries; our cities are crumbling eyesores during the day and off-limits at night, and the surrounding suburbs are monuments to greedy development schemes that have left a soulless shambles instead of interesting, well-planned communities—all of these things are happening and the general sense of crisis that they inspire is compounded by the feeling that the people's political representatives are powerless to do anything about it. People from all walks of life simply do not believe their elected representatives can sufficiently get a grip on things to put the times back into joint.

One aspect of this deepening sense of doubt about the effectiveness and responsiveness of our institutions is brilliantly analyzed in the August issue of the Washington Monthly by John Rothchild. I am inserting it in the RECORD for those who may have missed it:

THE CULTURE OF BUREAUCRACY: WASHINGTON'S OTHER CRIME PROBLEM

(By John H. Rothchild)

The D.C. Crime Bill doesn't mention it, but one of the worst breeding places of lawlessness in the nation's capital is inside the federal bureaucracy.

A pattern of consistent, willful, and open violation of statutes, Congressional mandates, court decisions, and the Constitution has emerged from some of the agencies entrusted with selling poor people on the idea of law and order, the agencies that are supposed to improve the social and economic conditions that harbor crime and produce riots.

Far from eliminating the conditions that create crime in the ghetto, those agencies (the Department of Health, Education and Welfare and the Department of Housing and Urban Development, among others) have themselves become extensions of the ghetto—pockets where ritual rules over regulation, where power alters and then becomes the law, and where illegal acts are often matters of survival, of procedure, and of business-as-usual. (Similar patterns of lawlessness can be found elsewhere in the federal government, notably at the Pentagon, but here we are concerned only with agencies that purport to help the poor.)

Out of the illusions of the New Frontier, where the boundaries of justice, law, and a decent life were supposed to extend to include all citizens, we have fashioned an Old Frontier, where the ideals expressed in Congressional legislation are so far removed from the realities of the political and economic power structure as to be essentially unenforceable. What we accepted in principle, and told the government to do, goes far beyond what we are able to enforce in practice; and following the law, in some agencies, has become a courageous act, and therefore an infrequent one. For example, in the wave of firings at HEW and Justice and the Pentagon in the past year, the common factor is that those ousted were held guilty of attempting to obey the law.

It is by no means certain that any of the benevolent federal programs, where rhetoric is often more lavish than appropriation, could succeed even if they carefully followed all of their mandates. Bureaucracy has proven to be an impotent and often counterproductive means of solving human problems. But when a government—whose stated goal is a just society—chooses not to follow its own laws, the damage goes beyond that of mere inefficiency or insufficiency.

The most glaring examples of this condition (and convincing ones, since the agency admits them) are contained in a report recently compiled by HEW. In an unusually self-revelatory gesture, HEW said that 39 states and the District of Columbia are violating federal regulations, acts of Congress, Supreme Court decisions, or all three, in the operation of federally-funded welfare and social rehabilitation programs. HEW continues to fund these programs.

What HEW doesn't say in its report is that this kind of thing has been going on for years and has become accepted practice. Until about four months ago, HEW not only failed to enforce the regulations, it didn't even bother to systematically record the violations.

The violations that HEW now admits, in a state-by-state breakdown, are not mere fine points of law over which reasonable men may quibble. They are not individual abuses; they are illegal state policies. In most cases, they are blatant refusals to submit plans, as required by the government, explaining how regulations will be implemented. This means that most of the states named have not only failed to follow the law, they have refused to register even an intent to follow it—that chronic, scoffing kind of disrespect that judges find in hoodlums.

The violations are stated by HEW in bland federalese:

Arizona: Deprivation of parental support: Compulsory inclusion of unrelated man in AFDC assistance grant; income of unrelated male is assumed. (Arizona had eight other categories of violations.)

California: Adjustment of maximum payment—AFDC: maximums not proportionately adjusted. (California had seven other categories of violations.)

District of Columbia: Adjustment of assistance standards: standards have not been fully updated. (The District had eight other categories of violations.)

Hawaii: Need and amount of assistance: differential treatment of applicants and recipients of AFDC in amount of assistance grant. (Hawaii had seven other categories of violations.)

Indiana: Prior notice of payment termination: recipients are not being provided prior notice of payment termination and decreases. Fair hearings: not carrying out fair hearings

requirements in practice. (Indiana had five other categories of violations.)

Not surprisingly, HEW's report provides no figures on the importance of the state violations. Its pose is calculated to put any but the most devoted observer to sleep, when, in fact, the law breaking permitted by HEW adds up to a massive deprivation of human rights. Welfare critics like Jonathan Kaufman, research director of the National Welfare Rights Organization, and Richard A. Cloward of Columbia University estimate that if the law were fully enforced, twice as many Americans would be on the welfare rolls, and many now on welfare would draw higher benefits. That prospect—12 million more Americans drawing federal and state welfare payments—is sufficient to explain the nation-wide pattern of government lawlessness.

The very size of the federal operation encourages malpractice from those who believe that laws should be followed not when they are just, but only when they are enforceable. But an even greater asset to federal lawlessness, as illustrated in the HEW report, is its statistical style. When bureaucrats blink at the law, it is not the bizarre, daredevil, and personal kind of scandal that becomes newsworthy and feeds the public fantasy, like the Senator accepting a bribe or free rides in some lobbyist's airplane. For like so much else in the bureaucracy, its illegality is strikingly devoid of flair, of passion, and of individuality. If it is hidden from the public, it hides not behind a well-constructed shield of secrecy, but behind a camouflage of boredom. Federal lawlessness is the result of a systematic series of decisions that become impersonal and eventually uninteresting, except to the victims. It is no thrill; it is a sure thing, accomplished from nine to five, with regular coffee breaks.

The exasperating technicality and organization of this bureaucratic lawbreaking gives it a permanent immunity. The immunity is preserved through channels of correction that are as winding and endless as the channels of violation. Although John D. Twiname, HEW social and rehabilitation administrator, emphasizes that "obviously, we cannot permit non-compliance with federal requirements," his organization continues to do just that.

"We are making every attempt," Twiname says, "through our regional offices, to *negotiate* with the states to resolve the issues. But when these efforts do not bear fruit, after a six-month negotiating period, we will bring our Washington offices into the picture and examine every apparent violation carefully to determine whether federal hearings should be held."

HEW's enforcement formula in itself seems like undue process. It shouldn't take six months of negotiating (what is there to negotiate about?), while states are still using federal money illegally, to decide to examine what you already knew in the first place—that the law is being broken. But the actual delays in enforcement have far exceeded even the ones that are built into the system.

It has taken HEW more than three years to threaten to hold hearings for states that have not complied with a 1967 law requiring them to adjust maximum welfare levels to correspond with higher costs of living. Recently, HEW announced that it has finally scheduled hearings for three such states, and for Arizona, the latter for failing to comply with residence requirements. But HEW has not announced hearings to deal with the massive list of other violations that it admits continue to occur in 39 states.

Even if HEW hasn't pursued the lawbreakers, it at least admits that the laws are being broken. It is, in this sense, far more civilized than other federal agencies, where it is difficult to figure out exactly what the law is or which conflicting law applies. In some cases, federal lawlessness is not only a condition where specific laws are not upheld, but also one in which there are so many rules and regulations as to make any law essentially meaningless.

Although bureaucracy, on the face of it, is the opposite of anarchy, being over-organized rather than under-organized, it may be a better means of achieving the ends that anarchy desires. The longer an organization exists, the more chance it has of reaching the point of diminishing returns, the condition of overlaw, where any action can be justified by some rule or another and where no action is any more or less legal than any other. When bureaucracy becomes a memocracy, it also erodes into an on-going federal riot, where any additional regulation only further obscures the meaning of whatever the organization is supposed to be doing, or of what the original statute says. This has happened in the Bureau of Indian Affairs, where the bureaucrats have virtually unchecked power over Indians' lives and can justify any decision through the Indian Affairs Manual, which fills 33 volumes that stack some 6 feet high and contains more than 2,000 regulations, 389 treaties, 5,000 statutes, 2,000 federal court decisions, and 500 opinions of the Attorney General. The manual is the product of years of bureaucratic sedimentation—procedure piled on procedure, law on law—until even legal scholars can no longer make any sense out of it.

When little internal laws help men break larger laws that were the basis for setting up an organization in the first place, we are far along the road to the system that Hannah Arendt describes in her recent book *On Violence*. She defines bureaucracy as:

"The rule of an intricate system of bureaus in which no men, neither one or the best, neither the few nor the many, can be held responsible, and which could be properly called rule by Nobody. (If, in accord with traditional political thought, we identify tyranny as government that is not held to give account of itself, rule by Nobody is clearly the most tyrannical of all, since there is no one left who could even be asked to answer for what is being done. It is this state of affairs, making it impossible to localize responsibility and to identify the enemy, that is among the most potent causes of the current worldwide rebellious unrest, its chaotic nature, and its dangerous tendency to get out of control and to run amuck.)"

But while bureaucracy gets more uncontrollable as it grows, it retains the ability to respond quickly to certain outside pressures. Although it may be government by Nobody, it does please certain people and serves those people very effectively. A few groups have learned to manipulate the bureaucracy to get from it what they want. Unfortunately, they are not the groups that the agencies were set up to help, but the ones they were set up to counterbalance.

Food commodity programs, for example, can be molded to become another asset for producers instead of for the hungry—guided not by what the poor need to eat, but by what the big farmers want to unload. Thus, Nobody operates as a disguise for the designs of those groups that use lawless programs for their own ends. The best example of how interests can accomplish this is found in the relocation programs of the Department of Housing and Urban Development.

In urban relocation, the legislative intent is clear. As early as 1949, Congress required that no contracts for local renewal programs be signed until "there are or are being provided . . . decent, safe, and sanitary dwellings equal in number to the number of and available to" displaced families. When it was found that the requirement was not being complied with, it was reiterated several times by Congress. By 1969, nothing had changed. Things had even gotten worse, since many slum areas were being replaced by affluent housing while the poor were forced into more compact and squalid ghettos by the same federal money that was supposed to help improve their living conditions.

Requiring that urban relocators provide poor people with housing did not facilitate the quick flattening of areas that was necessary to get the money flowing into the cities, nor did such a requirement please the economic interests who could get much more for their money by building middle-class dwellings and office buildings. Therefore, the deliberate lying to overstate the amount of housing available to displaced people was merely a convenient means of sacrificing the law to benefit expediency and profit.

The Government Accounting Office (GAO) has documented HUD's failure to do anything about such practices: "Although HUD was aware that the City of Cleveland had serious deficiencies relating to existing housing codes and their enforcement and was also aware that the calling of these deficiencies to the attention of responsible city officials was not bringing results, it continued to recertify the city's workable program."

The same thing was occurring across the nation, as substitute housing for renewal victims was compiled from classified ad sections of newspapers, from drive-by inspections, from substandard dwellings, from areas soon to be demolished, and sometimes was even counted three or four times in an effort to provide the illusion that those being moved out of the slums had places to go. All these evasions avoided nasty delays in the "progress" of cities.

There is a long history in urban renewal of discrepancies between local office records and the ones sent to HUD regional offices, where grant applications are processed. In one city, 23 of 24 randomly-selected families from one project and 25 of 35 in another were found to be living in substandard housing, although local reports said that all had been relocated into acceptable dwellings.

The way the housing figures were compiled in Newark, New Jersey, illustrates how many people can be left out in the cold after such relocation shell games. In November, 1967, Newark claimed it had 3,668 vacancies available for people removed by relocation. Of these, however, 1,187 vacancies were located in areas designed for clearance or removal in the near future, which meant a family would be forced out of one demolition area and into another. Out of the remaining 2,481 vacancies, 24 per cent were in substandard condition. So there were about 1,800 vacant dwellings fit for occupation—and of those it is not known how many fell outside the accepted residential zones or could have been disqualified for other reasons.

As a result of this chicanery, at least half of the displaced families in Newark that year were removed from their homes with nowhere to go. In Camden, New Jersey, similar statistical maneuvering meant that housing vacancies were overstated by 1600 per cent. What happened in the Northgate section of Camden dramatizes how people are victimized by such numbers. Demolition was in process there, and many residents, without substitute housing, remained in their old homes, facing daily fires, widespread vandalism, collapsing walls, rubble-littered streets, and rampant rat invasion—conditions that rival any produced by the ghetto riots that occurred across the country at about the same time.

But while rioters are shot or arrested, the bureaucrats in HUD have been protected, individually and collectively, from the consequences of their own illegal acts. HUD, like HEW, according to Edgar Cahn, director of the Citizens Advocate Center in Washington, D.C., refuses to consider sanctions against lawbreakers that would be reasonable and enforceable. It insists that the only remedy

at its disposal is the total abolition of any relocation program in which wrongdoing is discovered. An illegal program, it argues, is better than no program at all.

Aside from the fact that this is not true from the point of view of the person removed from his home (if there were no program, he would not be removed), HUD's all-or-nothing defense protects it from the law as surely as an overtime parker would be protected if capital punishment were the only means of enforcing parking violations. By refusing to ask Congress for lesser sanctions, the agency effectively shields itself against having to act. What HUD means to say is that an illegal program is better than a legal one in that it pleases the right people. And Congress only asks polite questions about why its mandates have been violated. It has never threatened to cut off HUD funds. In fact by 1969, in the 20th year of HUD lawlessness, Congress merely required the Secretary of HUD to "review" local relocation plans and implementations at least every two years.

Thus, the bureaucracy can be molded, even made to break its laws, to fit certain trends or interests. It is when it confronts the powerless, the people it was supposed to help, that the bureaucracy becomes a brutal and invisible enemy. It is noteworthy that one part of HEW, the Social Security Administration, has an excellent record of obeying the law, of handling grievances, and of informing people of their rights. But people on social security have clout; they are not outcasts like welfare recipients.

The benevolent and do-good agencies like HEW were supposed to be the allies of poor people, to fill the vacuum of power that exists with disenfranchised groups, to plug the holes of poverty and despair, to remedy the pockmarks and sores left by the unchecked flows of business and politics in America. But it was illusory to expect that those agencies would not soon have to answer to the same power and interest groups that produced the need for federal intervention in the first place. It was more than optimistic to hope that the agencies set up to work where the free enterprise system had done the most damage would not be thwarted by the same factors that made that system naturally unreformable.

Bureaucratic lawlessness ends up serving bureaucratic self-interest. It is easier to weather a complaint from a black welfare mother who doesn't get her check this month than it is to outrage a white Senator who wonders why federal or state agencies should waste their time listening to black people. It is easier to "inconvenience" a ghetto resident by removing him from his home during urban renewal without providing him substitute housing than it is to inconvenience some eager developer and his friends in public office who don't want to wait until such housing is found before they start profitably razing the neighborhood. It is more politic to serve the oil man who wants the Indian land than to help the Indian defend that land.

The powerful will accept a theoretical statement about the rights of the poor, as contained in the legislation that sets up federal agencies, but may resist if any real change in the relationship between them and the poor becomes possible. Many times we find that the best way for a bureaucracy to succeed (continue to exist) is not to do what it was established to do. OEO's legal services operation, as described in the June *Washington Monthly*, is one of those programs that is too successful to be continued. Cahn says that the Child Development Group in Mississippi, another OEO program, was arbitrarily discontinued in 1965, without proper hearing because it had achieved all too well the goals of maximum feasible participation of the poor. The reality of the black poor running their own program was too much for OEO—or the white Mississippi politicians—to accept. So the program was scrapped in favor of more "legitimate" ones.

Lawlessness in the government also results when statutes (what the government says it wants to do) don't correspond to realities (what the government really wants to do). Much of the benevolent legislation is passed during liberal high-water marks, when the composition of Congress is most advantageous and when all available political capital is expended on getting the bill passed, leaving little for ensuring enforcement. Badgering bureaucrats for enforcement is at best unrewarding for the Congressman. He can gain headlines and favor with liberal constituencies by helping to pass the enabling legislation. But those constituencies, not being directly victimized by the agency's lawlessness, will not subsequently press him to fight for enforcement. In his role as ombudsman, the Congressman is much more likely to hear from, and respond to, an urban developer who complains that his profits are being held up by some silly federal technicality, than he is likely to respond to the developer's victims.

The compromise between those who want a good program and those who don't care if there is any program at all turns out to be an unenforced program. Breaking the law bridges the gap between diverse interests, and becomes a political entente, a savvy arrangement in which all interests (those that serve justice and those that serve power) are taken into account, the laws satisfying the former, and the programs the latter.

Federal programs can also serve those who are essentially opposed to their success because the very enactment of a program deprives any disadvantaged group of the legitimacy of protest. When the regulatory agencies took the fervor from the muckrakers and turned it over to bureaucratic muckpassers inside the government, the policing of industry became automatically the province of the government, not of the people, and any further non-governmental action could be countered with the argument that the problem was now the job of government. Likewise, the poverty and welfare programs, good or bad, deprive the poor of any further public leverage. "You've got welfare, you've got tax money and free food, now why are you bitching?" To the many voters who believe that the enactment of a program equals solution of the problem, the idea of people on welfare protesting about anything (even if they aren't getting the welfare) is abhorrent. One good way to keep people in their place is to establish a bad program that gives lip service to the concept of social progress.

Since poor people have little say in relocation and welfare policy and since the bureaucracy is shielded from the political push and pull of the electorate, a person denied his rights by a government agency has little means of regaining them. The courts are a possibility, but, as Cahn points out, nobody has the "right" to do business with the government, and courts have been wary of using their judicial prerogative to perform what should be government's watchdog function. If a person is illegally cut off welfare, it is hard for him to prove it, especially if he has no access to the basic regulations that are used to justify such decisions. It is usually impossible for him to spend the money and time it takes to sue the government. In some cases where suits are brought, court decisions have not forced bureaucracy to desist from unlawful practices. And often people who bring such suits are induced to settle out of court, so that no judicial precedent can be established.

A more real possibility would be to organize the poor to demand fair and legal treatment, much as the workers banded together in unions to meet the power of the companies. But welfare and other federal program recipients, unlike union workers, have nothing to give to the government, no services with which to bargain. It is possible to imagine welfare boycotts, where large numbers of people refuse the bureaucratic services until some wrong is redressed, but it is not probable that needy people could refuse welfare checks in an attempt to reform the system. And even if they could, the bureaucracy might find ways to keep on functioning as if those people did not exist, sending the money down and diverting it into other pockets. The government is too large to be treated as the unions treated companies during the early stages of bargaining. And as long as the non-welfare public believes that people on welfare don't deserve it anyway, then any protest against the welfare system, however justified, will not get needed outside support.

The other possibility is that the groups now receiving government services or money will gain political power and become an "interest" to be taken into account. Politicians might have to worry about getting the welfare vote, the handicapped vote, the substandard occupant vote, much as they now worry about the Jewish vote or the Wall Street vote. Depending on their size, such new political subgroups might form a natural check on federal lawlessness and provide the impetus for Congress to police the Executive Branch.

This dream is interrupted, however, by the bureaucracy itself, which, as it grows to take in more areas of social concern, becomes the greatest obstacle to the poor man's chances of acquiring power. America sets up massive legions of experts whose stated goal is to program people into self-sufficiency. The contradiction in this is most apparent where the government has become most all-encompassing, on the Indian reservations.

For non-Indians, the Indian story has in it more than a mere compassionate rendering of the condition of one more oppressed group. It may warn us about the state of our own future under a pervasive and institutionalized banditry that governs in the name of "our own good." For as the Indian was a pioneer on our land, so he is the pioneer in the total trusteeship society, the Great American Welfare State, where in the name of efficiency, expertise, and most qualified leadership, every aspect of his life is controlled—from health, schools, politics, economics, and trade to his private pocketbook. As government grows, more people are becoming Indians.

The Bill of Rights was not extended to Indians until 1968, and they still have almost no judicial access, little political power, and hardly any economic control. But they do have the Bureau of Indian Affairs, and its thousands of experts, to protect them from themselves. BIA, with all those treaties and statutes behind it, carries on a loud and almost obscene monologue with Indians, denying them lawyers, forcing their children to go to schools thousands of miles away, making them pay exorbitant rates on the trading-post monopolies supervised by the BIA, and cheating them out of their land. Although examples of BIA noncompliance could go on ad absurdum, conditions on the reservations speak more convincingly as to the effect of BIA rule.

While white men continue to delve into Indian psyche to find cultural keys to his lack of "development," the real reasons have more to do with the BIA. Since that agency makes all major decisions on reservations and is solely responsible for the Indians *in loco parentis*, who else could be held accountable for the fact that Indians have lost much of the land the government guaranteed them (from 138 million acres in 1887 to 55 million in 1966), that the mineral assets of reservations have been exploited by outsiders, that they have no economic opportunity, and that health conditions are generally among the worst in the nation?

The BIA has made Indians so dependent on it that most Indians, though recognizing the agency as an enemy, do not support the idea of abolishing it. To further this condition, the BIA attempts not to get Indians off welfare but to get them on it. It encourages them to sell their land (a pre-condition for welfare) and then doles out the money in small parcels often below subsistence levels. The more Indians on welfare, the more control the BIA has over their lives, and the more the assets of the reservation can be manipulated to fall into the hands of developers and economic interests. And the more the Indian's life erodes, the more BIA bureaucrats are needed to do something about it.

If this seems like a cynical assessment of the role of a federal agency, consider the Pine Ridge Reservation in South Dakota, second largest in the nation, where, according to Cahn's study, about $8,000 a year is spent per family to help the Oglala Sioux, and yet the median income of those same families is only $1,910. The rest of the money supports the BIA officers—one for each family on the reservation—who are there to raise the Indians' living standard. Although it would seem obvious that the way to do this would be to eliminate the bureaucrats and give the money to the Indians directly, thus immediately raising their incomes from $1,910 a year to $8,000 a year, such a move would not inspire Indian "self-sufficiency" or the growth rate of the BIA.

Indian poverty is an important industry, feeding thousands of white men and creating for them the illusion of work. The last thing the industry, as a whole, would accept is the very idea on which it was launched—Indian self-sufficiency and economic equality. Thus lawlessness, in its broadest sense, serves the bureaucracy by continually aggravating the bad conditions upon which it depends. Benevolent bureaucracies grow only if problems grow. Problems grow if lawlessness grows.

Federal lawlessness may be the ultimate solution to the middle-class employment problem, as the bureaucracy becomes a kind of middle-class welfare program where thousands are paid to administer non-programs. If bureaucracy is the tapeworm of despair, its lawlessness may move us toward a nation in which most citizens either work for, or are worked on, by the federal government. If half a nation can administer programs to the other half, we may eliminate unemployment by handing money back and forth between us, while machines do all the real work. The federal government and television may be the two great means of filling in leisure time.

But as the government grows through its own lawlessness and inefficiency, we may find that the highest price will be paid not in the areas the bureaucrats' work affects, but in the offices where the bureaucrats work. Even the actors in an illegal system cannot long believe in what they are doing. Lawlessness inside the government encourages the same sense of degradation, hopelessness, and immorality that the urban ghetto is said to produce. It remains to be seen whether the result of this will be hardcore bureaucratic crime, with administrative muggings, dossier thefts, inter-desk gang wars, stabbings, and smuggling of unwanted memos, or, in the fresh and unlawful vision of George Wallace, all those briefcases floating down the Potomac.

As President Johnson's Commission on Law Enforcement and Administration of Justice said: "Finally, no system, however well-staffed or organized, no level of material well-being for all, will rid a society of crime if there is not a widespread ethical motivation, and a widespread belief that by and large the government and the social order deserve credence, respect, and loyalty."

THE FREE PRESS

HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1970

Mr. RARICK. Mr. Speaker, the American people are becoming increasingly aware that something is wrong with what they are being fed as news. Many read the daily paper only to pick an argument, while others look to see what the liberal extremists are doing.

But, few take the time to analyze in detail why the establishment media has stooped to such distorted reporting that the credibility of news is being destroyed.

Such an analytical report, explaining controlled news, has been prepared by Mr. Gary Allen, which appeared in the September 1970 American Opinion.

I feel that many of our colleagues would enjoy the following exhaustive report:

THE MEDIA—A LOOK AT ESTABLISHMENT NEWSPAPERS

(Note.—Gary Allen, a graduate of Stanford University and one of the nation's top authorities on civil turmoil and the New Left, is author of Communist Revolution In The Streets—a highly praised and definitive volume on revolutionary tactics and strategies, published by Western Islands. Mr. Allen, a former instructor of both history and English, is active in anti-Communist and other humanitarian causes. Now a film writer, author and journalist, he is a Contributing Editor to American Opinion. Gary Allen is also nationally celebrated as a lecturer.)

For years Americans have grumbled about the radicalism of their newspapers, all too painfully aware that the "Liberal" Establishment dominates the nation's mass media, slanting the news to the Left with an ease bordering on license. Until recently, however, this general frustration was ignored by mainstream politicians. It seemed not even the bravest paladin dared challenge the terrible power of the media. Then along came Spiro T. Agnew, charging madly on a white steed to do public battle with the dark powers of the Establishment's alley journalists. Here was a man saying, even shouting, in public what Americans had been saying to each other in private for two decades. The people loved it!

Vice President Agnew became an instant hero. Here at last was a public official who dared to protest the nasty little games regularly played in the Establishment Press. Most conservatives nearly exploded in glee. Even the hard-core Right, though dubious of Greeks bearing gifts, was cautiously pleased.

For decades conservatives have known that what Spiro Agnew claims concerning the media is true. Having suffered through the efforts of the mass media to politically assassinate Senators Robert Taft, Joseph McCarthy, and Barry Goldwater, conservatives were all too aware of the commitment of the media to radical interests. But now the polls showed that nearly half of America's citizens believed that television and newspaper reporting regularly served Leftist prejudices. The ruse of objectivity was finished, and the politicians didn't miss the point.

Against this background Spiro Agnew journeyed to Birmingham, Alabama, where the Establishment media are as popular as a tarantula at a nudist camp. There the noble Spiro did vigorously flay the *New York Times* and *Washington Post*—a calculated act of courage not unlike denouncing maxi-skirts at a convention of Peeping Toms.

Suddenly this former labor lawyer and favorite of the United Auto Workers, this man who had run for Governor of Maryland as a champion of forced integration in private housing, this "Republican" who had refused to support Goldwater in 1964, this protégé and supporter of Nelson Rockefeller, turned up in Wallace country, speaking Wallace's lines, and became a household word among conservatives. That's the Southern Strategy—lots of boula-boula rhetoric from Mr. Agnew while the President skirts Left end on the old "Statue of Liberty" play.

But even as conservatives delighted in the writhings of the media boys after the Agnew attack, few doubted that if the silent majority falls to drive home its demand for an end to managed news the Vice President's words will be as sound and fury signifying nothing.[1] Conservatives know that the Communist Conspiracy has thrived only because its real nature and accomplishments have been hidden from the American people by those who dominate the mass media. The Establishment Press provides a paper curtain behind which Communists and Fabians have operated in America for many years. It, alone, now stands between the people and the greatest anti-Communist renaissance in history.

Communist penetration of America's news media has over the years been the subject of a number of investigations by both the House Committee on Un-American Activities and the Senate Internal Security Subcommittee. Not surprisingly, the results of such investigations were given almost no coverage by the Press and their findings did not become a matter of popular knowledge. While a few Communists were broiled as scapegoats, the reaction by the news industry made further investigation seem to the investigators very unhealthy indeed, with all-out attacks on those members of Congress who dared expose Communist cells operating within the mass media.

Communist efforts to subvert, manipulate, and control our Press are, of course, to be expected. As the conference of the All-Union Communist Party at Moscow declared as early as 1938: ". . . the chief decisive weapon must be the press." In America the key to infiltrating the bourgeois Press was the Newspaper Guild, which for many years was dominated by the Communists. As former top Communist Joseph Kornfedder commented:

Years later (1937) came the organization of the "Newspaper Guild" and through it the communists moved into the news field in a big way . . . . Through the "Newspaper Guild" the communists moved into the big "daily" press itself. Those were the days of the "red honeymoon" with the "New Deal." Infiltration was conducted on a large scale all around, but the "Guild" device was a big operation even for those days.

The "Guild" is an organization which takes in news personnel from the news services (U.P. and A.P., etc.) down to the individual newspapers. Included is the official Communist press. The Guild, from the ground up, was designed and carried forward by the communists, using the late Heywood Broun (a fellow traveler) as a front man (president). As usual, most of the men who joined it did not know what they were being used for and some do not even know it today.

As late as 1960, in its Report called *The Technique Of Soviet Propaganda*, the Senate Internal Security Subcommittee observed:

There are in the world few organs of the press, even when "bourgeois," in which the Soviet apparatus has no intelligence. The main task of auxiliaries in the press is to manipulate the editor, or if that is not

Footnotes at end of article.

feasible, the reporters, without the editor's knowledge. General notions like "this paper is conservative" or "Catholic" are not at all sufficient any longer to recognize the policy it follows toward Moscow. Sometimes the managers themselves are unaware that their newspaper is "permeated."

The Communists know that one story slanted to their purpose in a non-Communist periodical is worth hundreds of articles in official Communist publications which are read only by dutiful members of the Party. And the Communists do not care whether an article is written by a Party member or a mere sympathizer. They still operate under what is called the "Stalin Standard":

Some are members of the Party, and some are not; but that is a formal *difference. The important thing is that* both serve *the same common purpose.* (Speech by Joseph Stalin, February 9, 1946, *House Document 169*, 80th Congress, 2nd Session.)

Yet, most of the Leftward slant of our mass media is created neither by members of the Communist Party nor of their conscious sympathizers. Rather it is a product of that "Liberalism" grafted into budding journalists while studying under Fabian Socialist professors in America's colleges. And the first law of the politicalized campus is that if there is only one Leftist professor on an entire faculty, he will gravitate toward journalism and the school newspaper.

In days of yore, editors lashed their galley slaves with the whip of objectivity. Reporters received on-the-job training where they were taught to present the facts and leave the opinions to the boys who wrote the editorial page. Then, comparatively recently, college social science departments added schools of journalism which began promptly to promote a modern, up-to-date, progressive version of reporting. The traditional five Ws—the who, what, when, where, and why—were abandoned for a new approach called "interpretive reporting," in which every cub reporter was to be converted into a philosopher king to stencil the reaction of his own glands onto the developments of the day.

The interpretive reporter, rather than faithfully recording a speaker's words in an orderly way, would explain instead what he "felt" to be the "meaning" and "overall importance" of what had been said. This view is usually justified with the contention that otherwise the average reader, who hasn't had his mind improved in the brain laundry at Old Siwash, might not understand the report. And, it is pointed out, the broadened attitude given the reporter permits him to bring in explanatory background material (which he selects), and to employ a writing style which is more lively and interesting. Where such training in "journalism" has been combined with that presented by the other laundry masters within the social sciences, the result has proved devastating to the quality and honesty of American journalism.

Pulitzer Prize-winner Morrie Ryskind was one of Hollywood's best and most highly paid screenwriters until he "lost" his talent as a writer on a train returning from Hearings in Washington at which he gave testimony against Communists in the film industry. Now a nationally syndicated columnist, Mr. Ryskind says of contemporary reporting:

If I return to the subject of "interpretive reporting," it is because it remains the biggest psychological weapon in the armament of the Liberal Establishment. In the bright lexicon of revolution—and that's what we're going through, whether we realize it or not—the news is not nearly as important as the manner in which it it filtered down to the public. And no item is too small to be passed without going through the screening process. After all, war is war.

The Establishment Left has for a number of years supported such key journalism schools as those at Harvard and Columbia with multi-million-dollar grants from the Ford Foundation. The boys who know that the Ford (Foundation) Has A Redder Idea are not unaware of how best to invest a revolutionary buck. Graduates of the Columbia School of Journalism, for instance, now include 45 newspaper publishers, 152 newspaper editors, and 71 magazine editors. There is not a conservative in the carload.

While it is usually admitted that the workaday editor or reporter tends to be a "Liberal," it is generally believed that the *owners* of the media are very conservative. And, though many owners are still nominal Republicans for purposes of social or business camouflage, they are, on the whole, men of the Left. If the owners of the media were conservatives they would not permit the flagrant Leftist bias that pervades the news industry. The Brinkleys, Cronkites, Krafts, *ad nauseam*, are obviously retained on the payroll to promote the line that the Establishment owners want propagated.

We are talking, of course, about the Establishment Press. More specifically, about who owns and runs it. But that term "Establishment" has been used far too loosely in recent years and needs to be defined before we can proceed further.

WHAT IS THE ESTABLISHMENT?

In general, as the term "Establishment" is used here, it refers to the men who belong to that mysterious group known as the Council on Foreign Relations (C.F.R.) and/or its satellite organizations. The C.F.R., housed at Park Avenue and 68th Street in New York City, counts in its exclusive membership some 1,450 of the most powerful men in American politics, industry, finance, communications, and the academy. Yet, so far as the American public is concerned, it operates almost anonymously.[2]

The C.F.R. is a subsidiary of the Royal Institute for International Affairs in London, which was founded to promote the concepts of One World Government as envisioned by Cecil Rhodes and his financial angel, Lord Rothschild. In his extremely revealing book, *Tragedy And Hope*, Professor Carroll Quigley (Harvard, Princeton, Georgetown, Brookings Institution, *etc.*) writes:

. . . the relationship between the financial circles of London and those of the eastern United States . . . reflects one of the most powerful influences in twentieth-century American and world history. The two ends of this English-speaking axis have sometimes been called, perhaps facetiously, the English and American Establishments. There is, however, a considerable degree of truth to the joke, a truth which reflects a very real power structure. . . .

From its inception, the C.F.R. Establishment was the tool of international financiers who sought to establish a socialist World Government under their control, through which they could eliminate competition and exercise hegemony over world trade, communications, transportation, finance, and natural resources. This can only be accomplished within a socialist World Government, and it is the above objectives and not any do-gooder urge to uplift downtrodden masses which have motivated the international banking interests and their colleagues in the C.F.R. to work for international socialism. Certain obvious strategies were employed immediately. For example, in order to maintain control over government you must control the mass media; therefore, the C.F.R. Establishment has been deeply involved in financing and manipulating the American communications industry.

The Council on Foreign Relations has been financed and controlled from the beginning by the Rockefellers, those in control of the Andrew Carnegie fortune, the J. P. Morgan organization, and the five American satellites of the European Rothschild banking interests. Because of the role they play in controlling the Establishment Press, the satellite firms merit a quick synopsis.

Most important in the group is Kuhn, Loeb and Company, whose head (Jacob Schiff) invested $20 million in financing the Russian Revolution of 1917.[3] According to a report from Paris forwarded by U.S. representatives to the State Department on March 3, 1932, Kuhn, Loeb and Company also laid out and financed the Soviet's first Five Year plan. (This Paris report is, incidentally, still in the State Department archives.)

Congressman Louis McFadden revealed that Schiff was sent to the United States by the European Rothschilds to gain control of the American railroads. Whatever the original objective, his efforts proved highly successful. Kuhn, Loeb and Company, today headed by John Schiff, Frederick Warburg, and Thomas E. Dewey Jr., is still a leader in investment banking. As the *New York Times* noted on January 29, 1967: "It has handled more international syndicated issues of securities in the last four years than any other financial institution in the world except the Deutsch Bank."

Another Establishment banking house famous for its support of Leftist activities is Lehman Brothers. The late Herbert Lehman (C.F.R.), in addition to serving as U.S. Senator from New York, was a founder of the Fabian Socialists' Americans For Democratic Action, served on the board of directors of the N.A.A.C.P., was a sponsor of the National Council of American-Soviet Friendship and of the American Association for the U.N., and was a favorite of the Fabian Socialists' League for Industrial Democracy. Lehman served as Director General of the United Nations Relief and Rehabilitation Administration (U.N.R.R.A.) which, according to U.S. Ambassador to Poland Arthur Bliss Lane, was used to ensure Soviet subjugation of Poland.

So important was Lehman in the Establishment that on May 29, 1950, the *Chicago Tribune* published photographs of Henry Morgenthau Jr., Felix Frankfurter, and Herbert Lehman accompanied by a commentary declaring that "a person with highest state department connections identified these three figures as the secret government of the United States." A bit hyperbolic, perhaps, but close enough to the truth as to be discomforting.

Lehman's niece, Helen Lehman Buttenwieser, kept Alger Hiss and his family at her Westchester home while the Communist spy was being tried. She later posted $60,000 bail for convicted Communist spy Robert A. Soblen, who fled the country. Her husband Benjamin Buttenwieser (C.F.R.) is a Kuhn, Loeb partner and a trustee of the Socialist New School for Social Research.[4]

Because Lehman Brothers is a partnership and not a corporation, we do not know its total wealth, but the *Los Angeles Times* of March 29, 1964, observed:

Certainly in capital assets, or money available, Lehman Brothers is one of the richest firms in the world. The fortune of the Lehman family, high into the hundreds of millions, is a factor, as well as the wealth of many of its partners.

Another key Establishment firm is Lazard Freres & Company of New York, a subsidiary of the Rothschilds' Paris operation of the same name. A power within Lazard Freres is Eugene Black (C.F.R.), a member of the secretive Pilgrim Society, a director of the Rockefeller's Chase Manhattan Bank and of the *New York Times*, a trustee of the Ford Foundation, former President of the World Bank, and former trustee of the Brookings

Footnotes at end of article.

Institution and the Atlantic Council. Retired head of the firm is Frank Altschul (C.F.R.), a Lehman brother-in-law.

Until his death last year the big man at the Establishment banking firm of Goldman, Sachs & Company was Sidney Weinberg, who once sat on the board of directors of thirty of the nation's largest firms. Though a key *Insider* in getting business support for F.D.R.'s New Deal, Weinberg raised $6 million before the 1952 Republican Convention to stop conservative Robert Taft and deliver the nomination for Eisenhower. Among the new partners at Goldman, Sachs & Company is Henry Fowler—perhaps, next to Henry Morgenthau Jr., the worst Secretary of the Treasury in the history of the Republic. Fowler is apparently receiving his reward from the international banking fraternity for denuding the nation of its gold and silver reserve, much of which has wound up in the coffers of the banking *Insiders*.

The last of the Rothschilds' "big five" is Dillon, Read & Company, headed by C. Douglas Dillon (C.F.R.), Secretary of the Treasury under John Kennedy. Dillon is, or has been, chairman of the board of the ultra-Leftist Brookings Institution, a director of the Chase Manhattan Bank, and a trustee of the Rockefeller Foundation. It was Douglas Dillon who arranged the demise of America's silver certificates, our last redeemable money. Another officer of Dillon, Read & Company is August Belmont, grandson of the original August Belmont sent here in the 1840s by the Rothschilds as their first American representative. The Rothschild representative on President Nixon's staff is Peter Flanigan, Assistant to the President. He is on loan from Dillon, Read & Company, where he is a vice president.[5]

The above firms represent the Establishment interests about which we are speaking when we talk to the Establishment Press. We will get to the details of ownership and control shortly.

THE ESTABLISHMENT'S TIMES

Few will doubt that the *New York Times* represents the kingdom and the power of the Establishment communications system. As John C. Merrill observed in his *The Elite Press:* "With the exception of the *Wall Street Journal* or the *Christian Science Monitor*, the *New York Times* is the nearest thing in the United States to a national newspaper."

The *Times* is found in practically every academic library (there are 2,500 subscribers to its microfilm service) and is read by more than half of the presidents of our nation's colleges. Ultimately, it is The Important Paper For Important People Everywhere. Fifty copies of the *Times* go to the White House every day. Most Congressmen and Senators read it as a daily bible. Seventy-one embassies in Washington subscribe, including that of the Soviets. It is even read by the Comrades in Peking, and thirty-nine copies are sent to Moscow. (See *Saturday Evening Post*, October 9, 1965.) "A significance of the *Times*," Timesman James Reston has written, "is its multiplier effect. What appears in the *Times* automatically appears later in other places."

Concerning this multiplier effect, Alice Widener, columnist for *Barron's*, notes:

It is a fact that most editors and newsmen on the staffs of Life, Look, Time, Newsweek, etc., *and most editors, reporters and commentators at NBC, CBS, and ABC take their news and editorial cues from the* New York Times. *Technically, it is a great newspaper; but it reports much of the news in conformity with its editorial policies.*

The smug, self-important arrogance of the *Times* is reflected in this statement by James Reston (C.F.R.), its vice president, syndicated columnist, and former chief Washington correspondent:

Our primary responsibility is not, perhaps unfortunately, an obligation to the commuter reading the paper on the train down from Westchester. Our primary responsibility is to the historian of 50 years from now. Unique among newspapers, the Times *is prime source material—and we must never poison the stream of history.*

Future generations fishing in the *New York Times* for details of the activities of the International Communist Conspiracy will do well to run the most vigorous tests of that stream before drinking the water or devouring the fish. Doubtless the best expert on how the stream is poisoned is Mr. Herman H. Dinsmore. After serving thirty-four years on the news staff of the *Times*, including many years as associate foreign editor and nine years as editor of its international edition, Mr. Dinsmore could no longer take the increasingly Leftist slant of the paper and retired to write a book exposing it. In his book, *All The News That Fits* (a parody of the *Times'* slogan, "All The News That's Fit To Print"), Dinsmore observes:

. . . *The* New York Times *took no really effective steps to counter these Communist thrusts and all too frequently appeared to back them, as if to play the Soviet regime off against the United States and other democratic nations of the West. The* New York Times *in more recent years has stated that it wants a balance of power in the world—as if it were possible to maintain such a thing. Editorially, it has freely criticized the United States while but sparingly finding fault with Communist actions. . . .*

The attitude of the New York Times *toward the Soviet Union has resulted in remarkable distortions in its news columns and in its editorial judgments. . . .*[6]

The *Times* is, incidentally, the sole U.S. recipient of news from Russia's *TASS* news agency. And, it has employed a number of reporters whose pro-Communist diatribes are notorious. Such men as Herbert L. Matthews (C.F.R.), Harrison Salisbury (C.F.R.), Lester E. Markel (C.F.R.), Ralph Parker, and Walter Duranty spent the greater portion of their careers with the *Times* as side-show barkers for every Communist regime able to rattle a cage.

When the noted philologist, Dr. Medford Evans, set out in 1956 to do a two-year study that he thought might prove the *Times* followed the editorial lead of the Communist *Worker*, he discovered that just the opposite was true. As Professor Evans noted in American Opinion for September 1969:

When John B. Chapple, of Ashland, Wisconsin, publisher of the Ashland Press, *was a young man he went to Yale, became a Marxist, joined the Communist Party, and took a trip to Russia—this was about 1927—in the company of Robert Minor, subsequently editor of the* Daily Worker, *one of the top Communists of this country at that time. Chapple, who long ago renounced Communism and is now a devout Christian, still remembers vividly that Minor once said to him, "Son, read the* New York Times *every day so that you will always know what the line is."*

Not surprisingly, when the Senate Internal Security Subcommittee began to investigate a Communist cell within the *Times*, publisher Arthur Hays Sulzberger (C.F.R., Pilgrim Society, Rockefeller Foundation, and Norman Thomas Foundation) nearly blew a tube. Sulzberger, it seemed, wouldn't recognize a Communist if one attacked him with a hammer and sickle. He wrote in the *New York Times Magazine* that he would not "institute a witch hunt" to eliminate Communists from his staff. You see, he noted, "even if we found a Communist or two . . . we would run the risk of destroying the atmosphere needed for the production of the kind of newspaper we are publishing." Which is, of course, the point. Sulzberger's feeling of comradeship extended to the point of loaning newsprint to the Communist *Daily Worker* when it ran short. (*Harpers*, January 1969, Page 72.)

Despite the extreme discomfort of Arthur Hays Sulzberger, the government questioned a number of *Times* employees about their Communist connections and activities. These included: John T. McManus and Allan James Aronson (both of whom later went to work for openly Communist publications), Jack Shafer, Samuel Weissman, Seymour Pect, Nathan Alexkovsky, Robert Shelton, Matilda Landsman, Jerry Zalph, James S. Glaser, and Alden Whitman. What was absurd about an investigation at such a level is that it is not the card-carrying streetbunder Communists who make this voice of the C.F.R. Establishment so dangerous. The danger comes from the *Insiders* of the so-called legitimate world" who control the *Times*. Let us look at that part of the story.

The modern history of the *New York Times* dates from 1896, when Adolph Ochs took over the paper. Gerald Johnson notes in *An Honorable Titan* that Ochs' mother, Bertha Levy Ochs, had been so involved in the Communist Revolution of 1848, that her family was "advised" to leave Bavaria. Doubtless Comrade Bertha regaled young Adolph with tales of workers throwing off their chains and of world revolution financed by the humanitarian *Insiders* of international banking. The debt-ridden Ochs jumped from the *Chattanooga Times* into the big apple by taking over the foundering *New York Times* for the borrowed sum of $75,000. Johnson tells how Ochs arranged it:

He had arrived in New York almost unknown; but by August 17, 1896, he was well and favorably known to a group of men whose power in the financial, business and political worlds was out of all proportion to their numbers.

Mr. Ochs' backers in taking control of the *Times* were international bankers J. P. Morgan; August Belmont; and Kuhn, Loeb's Jacob Schiff. The latter two were Rothschild agents. (Johnson, Pp. 130, 132, 137–138.) Later, the Lehman Brothers began working with the *Times* on other ventures. Ferdinand Lundberg reports in *America's 60 Families:* "Although not conspicuously connected with publishing, this banking family stands close to the *New York Times* . . . it has the outstanding interest in the Kimberly Clark Corporation, a paper-making enterprise which, with the *New York Times*, jointly controls the Spruce Falls Power and Paper Company . . ."

The Rothschilds' voice of the American Establishment passed from the publishing hands of Adolph Ochs (C.F.R.) to his son-in-law Arthur Hays Sulzberger (C.F.R.) to his son-in-law Orvil E. Dryfoos (C.F.R.) to the current publisher, Arthur Ochs "Punch" Sulzberger (C.F.R.). "Punch" Sulzberger's cousin, John Oakes (C.F.R.) is editor of the editorial page and is described by Herman Dinsmore as a "foaming-at-the-mouth Leftist who has done much to destroy the paper's objectivity." So far to the Left is John Oakes that he chose to attend the national convention of the Socialist League for Industrial Democracy in other than a reportorial capacity. He boasts that his militantly Leftist editorial policy is carefully contrived:

We try to take a point of view that we think is beneficial to the country—broadly called Liberal and generally internationalist—and then we go ahead and argue it as vigorously as possible. I rule the expression "on the other hand" off the page.

Another high official in the *Times* empire is Amory Bradford (C.F.R.), who had the good fortune to marry Carol Warburg Rothschild. Harding Bancroft (C.F.R.), of the Interstate Broadcasting Company and Carne-

Footnotes at end of article.

gie Endowment for International Peace, serves as the *Times'* executive vice president. Bancroft, who is closely associated with C.I.A. Director Richard Helms, was responsible for the *Times'* hatchet job on former State Department security evaluator Otto Otepka.[7] Mr. Otepka had in his files information about Bancroft's pro-Soviet activities which established that he had been under the influence of Alger Hiss.

Alger Hiss had many friends at the *New York Times*. Richard Nixon notes on Page 20 of *Six Crises* that it was *Times* Vice President James Reston (C.F.R.) who recommended Alger Hiss (C.F.R.) to John Foster Dulles (C.F.R.) to head the Carnegie Endowment for International Peace. Reston is regarded as the Establishment successor to Walter Lippmann as journalistic spokesman for the *Insiders*. Follow his columns closely and you will soon suspect that you are plugged into an *Insider* intercom.

Yet, as large as the influence of the *New York Times* is now, it is about to be multiplied many times. Its news service, which provides editorials and "interpretive" news stories to 212 daily papers, is planning to offer a computer service in 1971. According to *Editor And Publisher* for April 5, 1969, *Times* Vice President Ivan Veit has announced that the Times Information Bank is programming a third generation I.B.M. 360/50 computer to provide background information on people and events for newspapers, broadcast networks, university researchers, and government planners. Of course, the decision as to what information goes into the computer and what goes into the "Memory Hole" is up to the unbiased judgment of the Establishmentarians who run the *New York Times*. Almost certainly this service will be used by the networks and wire services so that "All The News That's Fit To Tint" will go into virtually every home in the country.

THE ESTABLISHMENT AXIS

New York, of course, is one end of the Establishment axis, and New York's afternoon Leftist daily is the Establishment's *New York Post*, headed by Dorothy Schiff, granddaughter of Jacob Schiff, the Daddy Warbucks of the Russian Revolution. The *Post*, which had once been the property of the notoriously radical family of Thomas Lamont (C.F.R.), and which was later run by Jacob Schiff's son-in-law, George Backer, an executive in the Red American Labor Party, makes the *Times* look conservative by comparison. It is now edited by James Wechsler, a former official of the Young Communist League who discovered he could be more effective on the outside. Dorothy Schiff, who is related to both the Warburgs and the Rothschilds, has had five husbands. Like many people who are incapable of manning their own lives, she is sure she knows how to run those of everybody else.

The Washington end of the Establishment's New York-Washington newspaper axis is the redoubtable *Washington Post*, often referred to in the Intelligence community as the Washington edition of *Pravda*. What the *Post* prints is important as it is the capital's only morning newspaper and is read by most members of Congress. What the *Post* does not print is also important and notorious. A long-time staffer at the Library of Congress told us that fully half of the articles cited in Congressional debate (not including appendages in the *Congressional Record Appendix*) come from either the *Washington Post* or the *New York Times*.

The *Post* is the creature of the late Eugene Meyer (C.F.R.), whose family immigrated to America in the backwash of the failure of the Communist Paris Commune of 1848. Meyer's father, Gunther, was named U.S. representative of the Rothschilds' firm of Lazard Freres. Eugene studied international banking in **Hamburg, Berlin, Paris,** and London and also became associated with Lazard Freres. Later he became a partner of Bernard Baruch in Alaskan mining adventures and Baruch brought Meyer to Washington in 1917 to head a division of the War Industries Board. Messers Baruch and Meyer held almost complete dictatorial control over America's wartime industry and placed billions of dollars in war production contracts with friends and associates.

President Wilson soon put Meyer in charge of the War Finance Corporation which had charge of selling War Bonds. Eugene Meyer's dealings there were shady to say the least. According to Congressman Louis McFadden, then Chairman of the House Banking Committee:

I call your attention to House Report No. 1635, 68th Congress, 2nd Session, which reveals that at least twenty-four million dollars in bonds were duplicated. Ten billion dollars worth of bonds were surreptitiously destroyed. Our committee on Banking and Currency found the records of the War Finance Corporation under Eugene Meyer Jr. extremely faulty. While the books were being brought before our committee by the people who were custodians of them and taken back to the Treasury at night, the committee discovered that alterations were being made in the permanent records.

Meyer, who held important positions in every Administration between Wilson and Truman, was author of the Reconstruction Finance Corporation Act, and was made Chairman of the R.F.C. when the Act was passed. He was also a governor of the Federal Reserve Board and the first head of the World Bank.

Using money made from his World War I manipulations, Eugene Meyer bought the *Washington Post* in 1933, ostensibly to support F.D.R.'s New Deal, but also reportedly to squelch investigations into how Meyer and his partners in New York and Europe had helped to maneuver the United States into the war and then helped themselves to enormous profits. Eugene Meyer's first move was to fire the *Post's* editor for refusal to editorially support U.S. recognition of the Soviet Union.

Over the years the Establishment *Washington Post* has done everything possible to promote Leftist interests in all matters foreign and domestic. It has sought to smear every investigation of Communist subversion, and its talented cartoodlum, Herblock, has performed the most vicious sort of hatchet job on every conservative personality to impress the Washington scene over the past three decades.

The *Post* is now in the control of the Eugene and Agnes Meyer Foundation so that the Meyer family will not have to pay the taxes which the *Washington Post* advocates for those of us who are unilluminated. After the death of Meyer control over the operation was vested in Philip Graham (C.F.R.), Meyer's son-in-law and a former law clerk of *Insider* Felix Frankfurter. Graham ran the show until he could take it no longer and put a bullet in his brain in 1963. Control is now in the hands of his widow, Katherine Graham, Eugene's daughter. Chairman of the board of the Washington Post Company is Frederick S. Beebe (C.F.R.).

The Establishmentarian *Post* has recently become so overtly revolutionary as to resemble a high-class undergrounder. New Leftist staffers like firebrand Nicholas Von Hoffman are so radical that Mrs. Graham has let it be known that even she is worried about the revolutionary rhetoric which appears in her paper. Sophisticated Washingtonians say this is social camouflage, noting that Mrs. Graham would certainly terminate the employ of any staffer whose rhetoric so much as suggested anti-Communism.

The Washington Post Company now publishes the powerful Paris *Herald Tribune* in partnership with the *New York Times*. The *Post* also owns a wire and feature service specializing in editorials and "interpretive" news stories which it operates in cooperation with the formerly conservative *Los Angeles Times*. Sixty-eight daily papers, with a combined circulation of over 12 million, use the *Post* news service. The Post Company also owns the C.B.S. outlets in Washington, WTOP-TV and WTOP-AM and FM (an all news station). The firm's newspaper, radio, and TV outlets—plus its magazine, *Newsweek*—all reel out the same editorial line. They combine to give the *Insiders* a powerful ideological pull in the nation's capital.

ON THE OTHER COAST

The West Coast end of the Establishment's newspaper complex is the *Los Angeles Times*—gross sales, $396 million, the nation's third-largest news medium. Before 1960, it would have been difficult to find a more conservative newspaper in the United States, but in less than a decade the paper did a virtual about-face. While it remains nominally Republican, its Republicanism is strictly of the Rockefeller (C.F.R.) stripe and conservatives regularly take a bludgeoning in its feature articles and on the editorial page—which more and more resembles that of its partner the *Washington Post*.

The *Times* is not the least bit shy about taking strong political stands, almost always on the "Liberal" side. Gone from its pages are such stalwarts as Morrie Ryskind, Henry J. Taylor, Robert Allen, Paul Scott, Holmes Alexander, and (the crowning blow!) Al Capp, whose savage satires of the hick ideologies of contemporary "Liberals" just aren't funny to the *Times*.

A key figure in helping to ruin the *Los Angeles Times* is reported to be E. O. Guthman, its national news editor. Guthman rose from obscurity while a reporter for a Seattle newspaper when he did a series exonerating a University of Washington professor charged with being a Communist. For his effort he won a Pulitzer Prize, a Nieman Fellowship, and a place on the staff of Senator Robert Kennedy. From there he came to roost high on the staff of the *Times*. The ex-wife of the man who provided us with this information, himself a former Communist, was a member of the same Communist Party cell as the professor whom Guthman is said to have cleared.

The *Times* began to move Left after Dorothy "Buff" Chandler successfully pushed her husband Norman out as publisher, using a series of flagrant indiscretions by Norman as the lever. Replacing Norman Chandler was their son Otis, a man of imposing physical (but limited mental) qualities. Whether Otis is a foil for his Machiavellian mother or is manipulated by the entourage of "intellectuals" for whom he flaunts admiration is an oft debated subject.[8]

For whatever reason, Otis Chandler indicated in a speech at the 1969 stockholders' meeting of the Times-Mirror Corporation that he sees the role of the *Times* as the "education" of its subscribers to adjust to the revolution which he says has already begun. Here is Otis Chandler's amazing statement:

Our role as a major class circulation newspaper is a difficult one to fulfill. For this nation is in the midst of a revolution. Our job on The Times is to patiently and gently, but honestly, reveal this fact to our nearly million reading families, most of whom do not want to believe what is happening in our society....

It seems to me that the core of our problem as a nation—and more specifically the core of our problem on The Times—is to be able to accept the fact that a revolution does exist, that it will not simply wither away, that we must determine how to adjust our institutions and modify our living styles to meet the conditions of the latter half of the 20th century.

And just that—recognizing the existence

Footnotes at end of article.

of the revolution—will be a traumatic experience for most of us. Traumatic for what is called the "power structure" or the "establishment," traumatic for the very solid middle class which is the real power structure in this community, traumatic for our romanticists and our idealists, even traumatic for those of us on The Times.

A mass newspaper—like the Los Angeles Times—must remember that the preponderance of its subscribers have a basic interest in preserving the status quo—or they think they have.

A mass newspaper, then, once it has begun slowly to grasp the dimensions of the problems of its society, can begin slowly to document them—to fulfill one of its primary purposes, which is to educate.

This is what we are now doing each day with our many staff by-line exclusive articles . . . .

I think this is the most difficult of all our roles—to educate—because more often than not we will be attempting it against the will of our subscribers. . . . The preponderance of them will not want to believe anything about "the system" has become obsolete. The preponderance will insist that most of the blacks and most of the young are really quite happy with the way things are, and that only the kooks and the racists are objecting, and that even these kooks and racists are doing it solely because they are only troublemakers.

They will not want to believe that the hearts of our cities—in which most of them do not live after 6 p.m.—have become unlivable and ungovernable.

They will want us to stop talking about it—stop breeding discontent—stop inciting riots—stop publicizing troublemakers. I hear it every day.

They will accuse us of destroying respect for the Flag, respect for our elected officials, respect for private enterprise, respect for self-respect itself.

They will find it very hard indeed to believe that we are not determined to destroy a society and a nation that they live. . . .

They will, indeed, Mr. Chandler!

Since the *Times*, Los Angeles' sole morning newspaper, has joined the Establishment's created revolution, it has won the plaudits of the "Liberal" elite and is now declared to be one of the Top Ten newspapers in America. As John Merrill writes in *The Elite Press:*

. . . If there is a paper on the West Coast which comes closest to being like the New York Times, *it is the* Times *of Los Angeles. It is the West Coast's biggest and wealthiest daily; . . . It consumes more newsprint than any other American daily, and accounts for at least 20 per cent of all newsprint used in the eleven Western states. . . .*

The *Times* is extremely aggressive in acquiring other media properties. It now controls New American Library, a large Leftist paperback publishing company which produces Penguin, Mentor, and Signet books. The *Times* also recently purchased the *Dallas Times Herald* for a staggering $91.4 million. It then turned around and bought fifty-one percent of the Long Island *Newsday*, which has the largest circulation of any suburban newspaper in America, for $33 million. And, oh yes, the Times-Mirror Corporation's chief executive officer is now former U.C.L.A. Chancellor Franklin Murphy (C.F.R.).

Another very important newspaper group in California is the strategic McClatchy chain, which owns the *Sacramento Bee* in the state's capital, as well as other newspapers and eight radio and TV stations. In his will founder Charles K. McClatchy required his heirs and assigns to fight for socialism. The will states:

One fundamental issue will never change and that is the vital issue of government ownership. I want the McClatchy newspapers to battle for that principle at any and all times no matter against what odds.

The McClatchy clan has lived up to the will both in letter and spirit.

IN MIDDLE AMERICA

Voice of the Establishment-financed revolution in middle America is the extremely wealthy Field family, owner of the *Chicago Sun-Times* and *Daily News*, WFLD–TV, The Publishers-Hall Syndicate, and *World Book Encyclopedia*. Revolutionary activity in the Field Family began with Marshal Field III, who inherited a fabulous fortune which made him one of the world's richest men. When young Field, a Catholic educated in England, became severely disturbed after two unsuccessful marriages, he put himself in the care of psychiatrist Gregory Zilboorg. The *Saturday Evening Post* of December 6, 1941, noted:

What the New Deal failed to accomplish in altering Field's outlook psychoanalysis did. In 1935, after being divorced by his second wife, Field spent a year in baring his psyche to an eminent psychoanalyst. It was after emerging from the medical confessional that this instinct for public service . . . began to lope, then to charge. The main course of the charge . . . happened to agree with the political orientation of Field's psychoanalyst, who mixes pure science with an intellectual sponsorship of liberal causes. . . .

The *Saturday Evening Post* continues:

Dr. Zilboorg, whose clientele includes many rich Manhattanites, once identified himself as an "intellectual revolutionist." Before becoming a soul doctor he was a busy politico in Russia, where he was born. . . .

In 1941, encouraged by F.D.R. and his "intellectual revolutionist," Field bought the *Chicago Daily News*, already in the control of the Kuhn, Loeb Company, in order to develop a more powerful Leftist voice to offset the booming conservatism of Colonel Robert H. McCormick and his *Chicago Tribune*. Later he created the *Chicago Sun-Times*, a grisly Leftist tabloid. Field became active in such subversive causes as the Titoist American Committee for Yugoslav Relief, the American Society for Russian Relief, the Chicago Civil Liberties Committee, and the Chicago Council of American-Soviet Friendship.

During World War II, after inheriting another 97 million tax-free dollars, Field started the pro-Soviet New York newspaper *PM*. As the House Committee on Un-American Activities reported: "Our investigation has shown that a steady barrage against Congress comes from Marshall Field's *PM*. (Sometimes described as the uptown edition of the *Daily Worker*. . . .)" (*House Report No. 2277*, Page 3, June 25, 1942.) Field lost more than $4 million on the effort. He could afford it.

The Field Foundation, endowed by Marshall Field, was found by the Cox Committee, a House Committee to Investigate Foundations, to have been heavily infiltrated by the Communists. The Field Foundation, at one time headed by Adlai Stevenson, has funded such officially cited Communist Fronts as The Open Road; the People's Institute of Applied Religion, Inc.; the Southern Conference for Human Welfare; the Institute of Pacific Relations; the Highlander Folk School; and, the American Committee in Aid of Chinese Industrial Cooperatives. And, of course, the Field Foundation was a major financial backer of the late Martin Luther King's Southern Christian Leadership Conference and poured $250,000 into backing the Communist project known as "Resurrection City."

The latest Left Field is Marshall Field V, at twenty-nine the youngest major newspaper publisher in the United States. The *Daily News* publisher was educated at Harvard and worked for the embarrassingly Leftist *Boston Globe*, the defunct *New York Herald Tribune*, and Random House. Young Field makes no bones about his commitment to the revolution. As he puts it, ". . . the Field Newspapers will continue to support the dissent and protest that historically have produced social change." Master Field indicated to *Newsweek* that he has no regard for those historic forces which have produced Western Civilization:

I guess I'm part of the new generation. I don't feel I owe anything to the past. The toughest thing at my age is to see a problem and want to change it and then run into people, politics, heartache and agony. The faster I can go, the better I will like it . . . .

The mod-dressed, sideburned Field is especially proud that his newspapers are aimed at countering the conservative *Tribune*. He says: "The audience in Chicago gets quite a choice of representation in the news if they want two sides to a story. All they have to do is buy a *Tribune* and a *Sun-Times* the same day on the same story."[9]

The *Daily News* is the fifth-largest evening paper in the country and the *Sun-Times* is the fifth-largest morning paper, but the Field group, represented in the C.F.R. by William Osgood Field Jr. and Leland Stone, has a voice which carries far beyond the Chicago area through its news service, which is subscribed to by seventy-two newspapers having a combined circulation of 12.5 million.

Two years ago young Field bought out the Hall Syndicate and turned it into the Publishers-Hall Syndicate, which pushes a battery of Establishment columnists including Joseph Kraft (C.F.R.), Carl Rowan, David Lawrence (C.F.R.), Roscoe Drummond (C.F.R.), and Evans and Novak. Included for syndication are Leftist political cartoonists Herblock, Mauldin, Feiffer, and Fischetti.

And, with the purchase of the Hall Syndicate, Field inherited Paul Scott, possibly the foremost conservative columnist in the nation. Scott was quickly told by Publishers Hall that he would not be allowed to criticize Communist activity in the nation for six months, and that he must no longer make any references to Martin Luther King's connections with the Communists. When Mr. Scott discovered that important facts were being edited out of his columns before they were sent by Publishers-Hall to the newspapers who had contracted for them, he told the Field crew to find themselves a hack Leftist to fill the spot and began to distribute his own column.

The owner of the largest group of major newspapers in the country is the mysterious Samuel Newhouse, who runs twenty-two important daily papers, three radio stations, and six television stations—having an estimated worth of $300 million.[10] Not surprisingly, our Wall Street sources tell us that Kuhn, Loeb and Stern-Rosenwald (the Sears, Roebuck fortune) arranged many of the loans with which Newhouse obtained control of the papers which form his chain. He is a "Liberal" Democrat and outspoken admirer of Nelson Rockefeller, but the claim is made that he runs his newspapers strictly for money and avoids ideological commitment. Yet when Newhouse—who counts among his properties newspapers in Portland, St. Louis, Denver, Cleveland, and Birmingham—purchased the *New Orleans Times-Picayune* and the *New Orleans States-Item*, he crowed, "I just bought New Orleans." (*Time*, July 27, 1962.) He paid more for them than did President Jefferson for the entire Louisiana Purchase.

There can be little doubt that Samuel Newhouse, an immigrant from Russia, knows that as an outsider in those areas where he owns newspapers he is mistrusted and must move slowly. In some conservative areas, and in special situations like St. Louis where his *Globe Democrat* couldn't possibly take a stance to the Left of the Pulitzer family's *Post Dispatch*, Newhouse keeps his finger out of the editorial pie. Yet, by coinci-

Footnotes at end of article.

dence, anti-Communist columnist Paul Scott was recently dropped by *ten* Newhouse papers. Hardly a coincidence.

While Newhouse is the largest owner of major dailies, the equally mysterious Lord Thomson of Fleet (Roy Thomson of Toronto) has added to his international publishing empire some fifty-six American papers in small and medium-sized towns. Thomson is also owner of the *London Times*, traditional voice of the British Establishment—where the Royal Institute for International Affairs is controlled by the same people who control our C.F.R. Thomson is a member of the elitist Pilgrim Society, which seeks to merge the United States into the British Commonwealth as a base for World Government. The major international banking firms on both sides of the Atlantic are well represented in the Pilgrim Society, and recently made it easy for Thomson to lay out $72 million for a dozen Busch-Moore newspapers in America. This was accomplished with the recent purchase of the *Philadelphia Inquirer* and *Daily News*, from U.S. Ambassador to the Court of St. James, Walter Annenberg (owner of *TV Guide*) The Knight chain is now one of the top three chains in the country in circulation. Cost of the latest acquisitions: $55 million. John Knight (Detroit C.F.R.) controls such increasingly Left-leaning dailies as the *Detroit Free Press*, the *Miami Herald*, the *Akron Beacon Journal*, and a dozen others. The Establishment *Insiders* lean Left, Lefter, Leftist.

DEVICES FOR CONTROL

Though newspapers are increasingly supplementing A.P. and U.P.I. with the wire and feature services of the more blatantly Leftist *New York Times*, *Washington Post*, *Los Angeles Times*, and *Chicago Daily News*, the Associated Press and United Press International are used by practically all newspaper, radio, and TV stations as basic sources of news. The wire services are in the main Establishment vehicles. One notes that Arthur Hays Sulzberger was one of the organizers of the Associated Press in the South and was a director of A.P. from 1901 until 1952. Former Timesman Dinsmore maintains, "The Associated Press and the United Press follow the *New York Times* closely, and I mean that these news gathering agencies follow it deliberately."

Associated Press is a co-operative, and the reliability and slant of the news it puts on the wires is largely dependent on the local bureau chief. The United Press International is owned by the Scripps-Howard organization, a chain of eighteen newspapers. Scripps-Howard decides on editorial policy based on a vote of all of its editors and pursues what is today a moderately "Liberal" approach.

Next to outright ownership the most effective Establishment control over what appears in our newspapers lies in the power to make or break a paper through control of advertising. The average newspaper depends on advertising for from two-thirds to three-fourths of its revenues. Ike McAnally, for four decades a reporter with the *New York Daily News*, comments in *Counterattack:*

The most persistent influence upon the editorial policies of metropolitan newspapers today is the large advertiser. In many instances these advertisers are department stores. Some of these make open and contemptuous demands upon the front offices of newspapers to support the left wing. Others relay "suggestions" . . .

. . . Newspapers have surrendered unconditionally to left wing front office pressures, real and imaginary . . .

. . . They realize that if they write a story which might draw unfavorable reaction from, for instance, a department store, the city editor is apt to throw their copy back at them . . . It is inevitable that with front offices swinging over, individual newsmen have more elastic principles.

Here's how it works. Every one of the major department store chains—R. H. Macy & Company, Federated Department Stores, Gimbel Brothers, Sears, Roebuck & Company, J. C. Penney Company, The May Department Stores Company, Interstate Department Stores, and Allied Stores Corporation—has on its board of directors at least one officer who is a member of the Council on Foreign Relations and/or a partner in Kuhn, Loeb; Lazard Freres; Lehman Brothers; Dillon, Read & Company; or Goldman Sachs. These chains own most of the major department stores in America's great cities, although you might not recognize them by name as the names of store founders are usually retained when they are sold out to a chain.

Establishment adventures will, of course, permit a paper to take a moderately conservative stand, but it is taboo to discuss the Establishment and its links with the International Communist Conspiracy. This is largely the reason why the information you read in American Opinion, which is readily available to all reporters, is not found in your local daily.

The fact of the matter is, in short, that the Establishment *Insiders* have virtually sewn up control of America's newspapers. They have control of our major television networks and newsmagazines too, but that is an area of The Media which we shall save for discussion in next month's issue of American Opinion. The details are as bizarre as they are fascinating.

FOOTNOTES

[1] The Vice President has now become not only the President's best life-insurance policy against the ultimate excess of the unsophisticated Maniac Left, but also his ticket to re-election. The conservative wing of the G.O.P. will likely be kept from bolting the Party in 1972 by the prospect of Agnew for President in 1976.

[2] See "The C.F.R.—Conspiracy To Rule The World," *American Opinion*, April 1969.

[3] For details of the role played by Schiff and his Warburg brothers-in-law in the Communist Revolution, see "The Bankers," *American Opinion*, March 1970.

[4] For his service while in the Kennedy-Johnson Administrations, George Ball (C.F.R.) was made a Lehman Brothers partner.

[5] The direct representative of the English Rothschilds in the United States is Peter Fleck (C.F.R.), a partner in the bank of N.M. Rothschild & Sons of London. He has an office at 70 Pine Street, New York.

[6] Herman Dinsmore's well-documented exposé (Arlington House, New York, 1969) got the silent treatment from the Establishment media at the same time Gay Talese's *The Kingdom And The Power*, a gossipy book written with the help of the *Times* to offset the influence of Dinsmore's book, received the full hullabaloo treatment from the Establishment Press.

[7] The *Times* has voiced opposition to every federal official who ever opposed domestic Communism—from A. Mitchell Palmer in 1918 to Otto Otepka in 1969.

[8] Certainly other members of the Chandler family are extremely patriotic and conservative, but they have been frozen out of all authority in the running of the newspaper.

[9] The *Chicago Tribune* has moved a long way into the middle of the road since the passing of Colonel McCormick. The *Trib's* Sunday Book Review section now comes from the *Washington Post*, a fact which must cause the Colonel to spend Sundays spinning in his grave.

[10] Naturally enough, Establishmentarian Newhouse keeps much of his wealth carefully protected within a tax-exempt foundation. He has 18 million readers, many of them in cities without competition. As Newhouse brags: "I've got more circulation around New York—765,000—than the *New York Times*."

HOPE FOR WORLD PEACE IN CURRENT SALT NEGOTIATIONS

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1970

Mr. BIAGGI. Mr. Speaker, the strategic arms limitation talks—SALT—between this country and the Soviet Union have developed to a point where it now appears that a meaningful treaty is likely to emerge. I have continuously urged that such negotiations be conducted, and hailed the President's action at starting the talks last year.

The possibilities of halting the ever-escalating number of offensive and defensive missiles, such as the MIRV and the ABM, and the further possibility of reduced troop requirements in Europe fills the mind with a hope for real world peace.

However, though the potential may be there, success in the area of national security can only be measured in terms of hard facts and proved safety. Therefore, before the final treaty is signed, we must be sure that it contains the safeguards necessary to insure against violation of its covenants and that it does not leave the United States at a disadvantage from the start.

A treaty with the dimensions this one could have, and the fact that it is between the two superpowers of the world, is often difficult to relate to the domestic front and particularly to each individual and each family. Nevertheless, if we can meet with success in this area during the next year, the beneficial consequences for every American are innumerable.

OFFENSIVE MISSILE LIMIT

The broad aspects of agreements, as briefly outlined in the communique issued by the negotiators last month, indicate that present offensive missiles will be limited quantitatively. This would mean that our present arsenal of ICBM's and Polaris/Poseidon missiles would be frozen at present levels as would that of the Soviet Union.

This in itself would mean a substantial savings in offensive weapons production. We have a parity position—or perhaps a slight edge—with the U.S.S.R., at the moment which assures us of substantial firepower in case of nuclear attack. At present levels, our offensive weapons can inflict a degree of damage that would be unacceptable to the Soviets.

ABM LIMITATION

But there is a further and more significant provision being discussed in the current talks. This is the limitation of the U.S. defensive antiballistic missile systems—ABM—and the giant SS–9's. Freezing the development of these multi-billion-dollar systems would reduce the need for increased defense spending in the country over the next 20 years.

The ABM system became necessary when the Soviet Union began deployment of its massive SS–9's, an offensive missile which threatens to upset the balance between the two superpowers. At the same time, the U.S.S.R. began de-

velopment of its own ABM system around Moscow. The combination of fully deployed Soviet SS–9 and ABM systems would make the U.S. nuclear deterrent meaningless.

Top officials of the President's staff made public the offer of abandonment of the ABM system at a press briefing recently. It was also revealed that the Soviets have a 64-site antimissile system now installed around Moscow compared with the two U.S. sites under construction and two planned for locations out West.

BLUE CHIP ABM

The administration argues that the present ABM development planned by this country will serve as a blue chip in the table stakes during the Vienna conference. It is said that the system, once completed, would nullify the effects of the SS–9's; thus serving as an effective bargaining point. Be this as it may, if these talks are successful, the need for development of the ABM would be eliminated.

However, if the U.S.S.R. continues its production of the SS–9's and its ABM system, and pressures in the United States for reduced defense spending continue to prevail, the Soviets could be placed in the dominant position of being able to launch an all-out nuclear attack without fear of significant retaliation.

However, the SALT agreement could put a halt to this dangerous escalation and serve as a vehicle for further talks that might lead to mutlilateral reduction of international tensions between the two giants.

TROOP REDUCTION IN EUROPE

It is this latter possibility that offers the greatest hope for the future. The United States presently maintains over 300,000 troops in Europe as part of its commitment to NATO and as a first line of defense for this country. These troops cost the U.S. taxpayer $14 billion annually.

The Soviets and their allies in Eastern Europe have indicated a willingness to reduce U.S.-Soviet troop levels on the continent on a bilateral basis. This would result in significant savings for the U.S. Government without compromising our national security position.

The billions of dollars that are presently slated to go for the ABM system, the MIRV system, and other necessary nuclear deterrents, could be channeled into needed domestic programs and lowered taxes. A successful treaty negotiation will definitely help ease the economic pressure that the increased defense spending needs have placed on the average taxpayer.

More importantly than the savings of billions of dollars, however, is the new national sense of security that eased international tensions and a real world peace would bring—a sense of security that is not based on a reign of terror and compounded by the fear of a possibly misguided and completely ruinous nuclear war.

HISTORICAL BACKING

This Nation shed the blood of many of its citizens in two world wars during this century. Their efforts were supposed to bring peace to the world and an end to war for all time. That dream and that goal have yet to be realized.

At last this Nation is in a position to negotiate a treaty that will make the lives of those men lost so many years ago worth the terrible cost this country and their families have paid.

Peace! Peace through mutual realization of the life that the world can give, not the death that nuclear destruction could bring.

It is difficult not to express some words of joy at the hope that the dreams of our predecessors in this century may finally be realized at our hands. Every effort must be made—every channel pursued—to assure a U.S.-U.S.S.R. treaty on strategic arms limitation that will bring this goal to fruition. I am confident that the time for a lasting world peace is at hand and the writing on the wall spells SALT.

ROBERT ALEX BARON—FIGHTER FOR QUIETER CITIES

HON. WILLIAM F. RYAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1970

Mr. RYAN. Mr. Speaker, there is increasing awareness of the dangerous environmental hazard of noise pollution.

Scientists have proven that noise is not only damaging to the hearing, but also to the physical and mental health of human beings.

I have introduced legislation with 22 cosponsors—the Noise Control Act of 1970 (H.R. 16520 and H.R. 16708)—which would set up an Office of Noise Control within the Office of the Surgeon General of the United States.

The problem of noise has also aroused citizen group concern.

One such group is in New York City. The Citizens for A Quieter City, Inc., led by its director Robert Alex Baron, is working hard to document the danger of noise, to bring it to the attention of New Yorkers, and to see that something is done—before it is too late.

Recently, this organization received a $300,000 grant from the Ford Foundation to make an initial study on noise and its effects.

I am including in the RECORD a profile from the August 25 New York Post, "Daily Closeup—The Storm Before the Quiet," by Lindsy Van Gelder. This article tells of Mr. Baron's work to make New York City a less noisy one.

I urge my colleagues to read this article, and to join the fight against noise pollution.

The article follows:

THE STORM BEFORE THE QUIET

"Unlike air pollution, noise doesn't kill you outright," says Robert Alex Baron. "It just makes every day a living nightmare."

Baron, executive director of Citizens for a Quieter City Inc., adds that excessive noise has been shown to cause fatigue, stress, accidents, irascibility, pain, occasional deafness and possible harm to unborn children. He's trying to do something about it.

The danger zone for human ears starts when noise, especially if prolonged, registers 85 decibels. Rumbling trucks and buses often register 95, jackhammers 100, lawnmowers 98, building-top air conditioners 100, motorcycles 115, overhead jets 115, and amplified rock bands 120. One recent experiment showed that laboratory rats suffered death after prolonged exposure at 150 decibels.

"Big city noise is getting worse all the time, as new noisemakers are invented and put into use and congestion gets worse," said Baron, sitting in his Park Ave. office not far from a clattering Xerox machine.

"The problem now," he added, "is to get people moving before noise reaches the crisis level. We don't want to wait until the blood is running out of our ears."

Baron's organization recently received a $300,000 grant from the Ford Foundation to study noise. The group plans to go into a New York neighborhood—as yet undisclosed—and begin sometime this fall.

The next step will be to "develop concern for the issue within the community and get people to demand quieter equipment and the implementation of the present anti-noise laws." Baron calls it "a sort of urban noise abatement demonstration project."

Baron got into the noise abatement business six years ago, purely by accident. Born in 1920 on Chicago's West Side, he was the oldest of four children of Morris Baron, a dairy technician, and the former Emma Bagus. Following in his father's footsteps, he graduated magna cum laude in dairy technology from the University of Illinois.

"That means I could make cottage cheese," he explains wryly. "Cheddar cheese was a graduate course." Baron worked briefly as a milk sanitarian outside Chicago and then joined the Army, serving in France and Germany in World War II.

While in the service, he helped produce soldier shows. After the war, he earned an M.A. in theater at Smith College and came to New York. He spent the next 20 years in the entertainment business with "a checkered career" of stage managing, running a theater tour service and doing research for the theater industry.

Six years ago, Baron and his wife, theater manager Joan DeKeyser Baron, were living on Sixth Av. and 55th St. with their daughter Stacey, then 2. Across the street, the Transit Authority was building a new subway station.

"The construction noise began at 7 a.m. and went to 5 p.m.," Baron recalled. "Plus a few evenings by permit." Tranquilizers didn't work.

The Barons and other frazzled tenants organized the Upper Sixth Av. Noise Abatement Assn. and appealed to their local legislators. "To our shock, we found that most of the noise was legal. Even today, only a fraction of city noise is against the law—like undue horn-honking. The noise ordinances are incredibly out of date."

Baron began spending increasing amounts of time buttonholing people at City Hall, the Transit Authority and the Health Dept. Then he went to Cincinnati for a six-month stint as a theater manager and stayed at a hotel located in the midst of a sand-blasting urban renewal project.

"I began to realize that this was a national problem, but there wasn't any national organization to combat it," he said. Baron joined a British noise abatement society—"I was so desperate to find some rapport."

Since his organization was officially incorporated in 1966, Baron has traveled to Holland, Germany and England for noise abatement conferences and he points out that Europeans have placed a high priority on the use of quieter sanitation, subway and construction equipment.

Baron now works full time as a noise fighter, with lecture work, writing (a book, "The Tyranny of Noise," will be published in the fall) and consulting.

He is a member of the Mayor's Council

on the Environment and the Commerce Technical Advisory Board Noise Abatement Panel of the U.S. Dept. of Commerce.

His hobby? "Reading everything I can get my hands on about noise."

EARL WARREN OF THE UNITED NATIONS ORGANIZATION

HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1970

Mr. RARICK. Mr. Speaker, the United Nations Association Chairman, Earl Warren, and his guests were quite outspoken recently on the recent hijacking of the U.S. aircraft.

Many find it strange that Chairman Warren did not explain his complicity in the international situation which he worked so many years to create and nurture, and which continues to destroy constitutional government and reduce the strength of the American people.

Perhaps the reason Mr. Warren and his group are more concerned about the hijacking of an airliner in the Middle East than about the hijacking of the USS *Pueblo*, the EC–121, and the USS *Liberty* or the many hijackings to Cuba, is that the Boeing 747 was not owned by Pan American but rather by a New York City bank.

Mr. Speaker, I include two related newsclippings at this point:

[From The Evening Star, Sept. 10, 1970]

"ALMOST UNBELIEVABLE"

(By Ymelda Dixon)

Secretary of State and Mrs. William P. Rogers stopped by briefly at the John Quincy Adams Rooms of the State Department last night.

He was outspoken on the hijackings: "It is almost an unbelievable situation. How could any people do these things?"

Rogers was deeply concerned about the welfare of the women and children on the planes. "It is so hot in those planes. I checked with Charles Tillinghast, president of TWA today. The airlines people are very helpful, and the other governments are as concerned as we are."

The Rogers, taking time to stop by at the reception which honored Henry Cabot Lodge, U.S. envoy to the Vatican and chairman of the President's Commission for the Observance of the 25th Anniversary of the United Nations, showed their esteem for Lodge and the United Nations.

Lodge, in town for meetings of the commission, will return to Rome in November.

He looks 10 years younger than when he was handling the peace talks with the North Vietnamese in Paris. He laughingly admitted it is much easier to deal with Rome than with the North Vietnamese.

Hosts at the magnificent 6 to 8 o'clock reception was the chairman of the United Nations Association of the U.S.A., former Chief Justice Earl Warren and Mrs. Warren.

Guests of honor with Lodge, were Frederick L. Ehrman and Spyros P. Skouras.

Skouras is general chairman of the annual United Nations Concert and Dinner in Washington, set for Oct. 17. A former movie mogul, he now is chairman of the Board of Prudential-Grace Lines.

In the manner of the Golden Greeks, he is building a great shipping line and hopes to help restore the prestige of the American merchant marine.

Mrs. Skouras is a rarity among the wives of film families—the first and only wife.

Last night, Mrs. Skouras and the Skouras' daughter, Mrs. George Fowler, wife of a Connecticut surgeon, both wore Dior gowns with diamond and turquoise jewelry.

Ambassador of Israel and Mrs. Rabin came to the reception, Rabin plainly showing the strain of the past weeks.

Leah Rabin was smart in an Israeli midi dress.

"Israeli women, with all their troubles, take time to think of fashion and are wearing the midi," said Mrs. Rabin, who recently returned from her homeland.

Secretary of Agriculture and Mrs. Clifford Hardin and many chiefs of diplomatic missions and their wives also attended.

[From the Washington Post, Sept. 11, 1970]

TERRORISM: FALLOUT ON PAN AMERICAN

(By Robert J. Samuelson)

The Arab terrorists who destroyed a Boeing 747 in Cairo earlier this week may have channeled $24 million into the coffers of Pan American World Airways.

Although the plane carried Pan Am's insignia, the jet actually belonged to the First National City Bank, which leased the aircraft to Pan Am.

Pan Am, however, shouldered the responsibility for insuring the plane, and now the company is considering keeping the $24 million in insurance payments, airline officials said yesterday. Another Boeing 747—owned outright by the company—would be substituted in the lease agreement.

With large, unused lines of bank credit, Pan Am faces no immediate cash shortage, company officials said yesterday. Nevertheless, the extra $24 million would provide an additional cushion of funds during a period marked by increasing anxiety over "liquidity."

Last year, Pan Am lost $25 million, and, so far in 1970, the company has recorded a $12 million deficit, although these losses don't accurately reflect the airline's cash flow. Depreciation on equipment, for example, officially counts as an expense but doesn't represent an immediate cash outlay.

According to one high Pan Am official, the airline could also decide to repay First National City Bank for the jet and simply eliminate the lease. In that case, he said, the airline actually might record a small profit, because the lease price is $23 million and the insurance coverage is nearly $24 million.

Precisely what happens, this official said, depends on a multitude of highly-technical factors—including which of two insurance policies covers the Cairo explosion. One policy protects the company from ordinary losses against airplane destruction (this is called "hull" insurance), and the other (called "war-risk" insurance) comes into force only as a result of a wartime loss.

"The war risk (insurers) claim that the loss is commercial, and the commercial (insurers) claim that it's war risk," the official said.

Reports that international airlines are receiving cancellation notices of insurance, industry experts said yesterday, probably center on war-risk policies. According to these experts, it's likely that hijacking losses will be classified universally as "war risks" for international carriers, and the policy rates may be raised.

These experts, however, minimized the possibility of a permanent loss of insurance.

For Pan Am, the loss of the 747 may constitute something less than a grave hardship, one airline analyst said yesterday Like many other airlines, he said, Pan Am may have too many planes—too much "capacity"—for the available traffic.

If Pan Am decided to substitute another Boeing 747 for the destroyed plane in the First National City Bank lease the $24 million in cash would not be recorded in as profit but simply as a transfer of assets from capital equipment to cash.

MAN'S INHUMANITY TO MAN—HOW LONG?

HON. WILLIAM J. SCHERLE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1970

Mr. SCHERLE. Mr. Speaker, a child asks: "Where is daddy?" A mother asks: "How is my son?" A wife asks: "Is my husband alive or dead?"

Communist North Vietnam is sadistically practicing spiritual and mental genocide on over 1,500 American prisoners of war and their families.

HOUSE OF REPRESENTATIVES—*Monday, September 14, 1970*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

The just shall live by faith. Romans 1: 17.

Almighty and most merciful Father, we begin the week conscious of our own need and yet aware of Thy great power to sustain us in our endeavors on behalf of our beloved land. Keep us faithful in the performance of our duties, loyal to every high and holy principle, responsive to the needs of our citizens, and above all receptive to the leading of Thy living spirit.

We pray for our country—that as a people we may be delivered from malice, bitterness, and ill will. Strengthen within us all a true sense of justice, a due regard for the rights of others, and a genuine spirit of good will. Together may we get in step with Thee and with one another as we go forward to one Nation with liberty and justice for all.

In the Master's name, we pray. Amen.

THE JOURNAL

The Journal of the proceedings of Thursday, September 10, 1970, was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Arrington, one of its clerks, announced that the Senate had passed without amendment a bill of the House of the following title:

H.R. 16539. An act to amend the National Aeronautics and Space Act of 1958 to provide that the Secretary of Transportation shall be a member of the National Aeronautics and Space Council.

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 4182. An act to authorize voluntary admission of patients to the District of Columbia institution providing care, education, and treatment of mentally retarded persons; and

H.R. 17809. An act to provide an equitable system for fixing and adjusting the rates of pay for prevailing rate employees of the Government, and for other purposes.

The message also announced that the Senate agrees to the amendment of the House to the amendments of the Senate to the bill H.R. 16968 entitled: "An act to provide for the adjustment of the Government contribution with respect to the health benefits coverage of Federal employees and annuitants, and for other purposes."

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 5. An act to promote the public welfare; and

S. 437. An act to amend chapter 83 of title 5, United States Code, relating to survivor annuities under the civil service retirement program, and for other purposes.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.
September 11, 1970.

The Honorable the SPEAKER,
U.S. House of Representatives.

DEAR SIR: I have the honor to transmit herewith a sealed envelope from the White House, received in the Clerk's Office at 11:50 a.m. on Friday, September 11, 1970, said to contain a Message from the President wherein he transmits the report of the American Revolution Bicentennial Commission.

With kind regards, I am,
Sincerely,

W. PAT JENNINGS,
Clerk, U.S. House of Representatives.

REPORT OF THE AMERICAN REVOLUTION BICENTENNIAL COMMISSION—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Foreign Affairs:

To the Congress of the United States:

The report of the American Revolution Bicentennial Commission, which I am transmitting to the Congress today, presents cogent suggestions for commemoration of the 200th anniversary of the birth of our nation.

I strongly endorse the Commission's primary recommendations that:

—The commemoration be national in scope, seeking to involve every State, city and community;

—The Bicentennial be a focal point for a review and reaffirmation of the principles on which the nation was founded and for a new understanding of our heritage;

—This be the occasion for looking ahead, for defining and dedicating ourselves to our common purposes, and for speeding the accomplishment of specific local projects responsive to our changing national priorities.

The goal which the Commission has established is most appropriate for our nation at this time: "to forge a new national commitment, a new spirit for '76, a spirit which vitalizes the ideals for which the Revolution was fought; a spirit which will unite the nation in purpose and dedication to the advancement of human welfare as it moves into its third century."

I concur with the Commission's concept of a Bicentennial Era with its focal point in 1976.

The Commission is now moving from the planning to the development stage of the Bicentennial Era. To assist it in its task, I have these comments on some specific areas:

ON MAKING THE CELEBRATION NATIONAL IN SCOPE

1. I invite the Bicentennial Commissions now formed or forming in each of the 50 States, along with Puerto Rico, the District of Columbia, and the Territories, to share in a special effort to ensure active and nationwide participation in the celebration of America's 200th birthday. In the year preceding July 4, 1976, I invite each of those areas to accept the responsibility for a single week in which national focus would be on that area's local traditions and commemorative activities, in a way that would permit the Nation and the world to observe both our historic development and our local activities to meet the challenges of the third American century.

2. The Commission urges a "multi-city exposition" and quite properly concludes "there should be no commercially-oriented world's fair in the traditional sense anywhere in the Nation during the Bicentennial Era." I agree. There can be no single Bicentennial city. Nor is any traditional type of world's fair in one city adequate to the challenge of a national celebration.

However, since American civilization has drawn on the genius and traditions of nations throughout the world, and has contributed as well to their development, we should actively encourage international participation in our celebration. To do this in an orderly and well-planned way, we should select a principal site on which that international participation can focus. Philadelphia, site of the signing of the Declaration of Independence, and the creation of our Constitution, would be the natural place for this activity.

Accordingly, I am now instructing the Secretary of State to proceed officially with appropriate registration procedures with the Bureau of International Expositions for an international exposition in Philadelphia in 1976. Such an exposition, however, is to be primarily cultural, inspirational and non-commercial in character, with the emphasis on quality rather than size.

Pursuant to the provisions of Public Law 91-269, I am directing the Secretary of Commerce to review the financial and other support to be secured for the Philadelphia exposition from both government and private sources and, together with David J. Mahoney, Chairman of the Commission, and George P. Shultz, Director of the Office of Management and Budget, to report to me the result of this review.

If suitable financing arrangements can be worked out, Philadelphia can be an exciting focal point for international participation in a way that will carry forward the regard of our Founding Fathers for "the opinion of mankind" without in any way restricting the scope of the celebration to a single city. In fact I hope that foreign visitors and visiting groups, including artists and performers, will travel to every corner of the Nation and participate in as many Bicentennial events as possible.

3. It would be appropriate for the Nation's capital to play an important role in helping to set the tone for the national celebration. I have already made known my support for such long-range projects as a new rapid transit system, the Federal City Bicentennial Development Corporation, and an acceleration of urban renewal plans. I am directing Chairman Mahoney to begin a series of meetings with Mayor Washington, the National Capital Planning Commission, Chairman Mark Evans of the National Capital Historic Region Bicentennial Committeee, Counselor to the President Daniel P. Moynihan and Director Shultz to define specific plans and costs for my review and to recommend ways to achieve community participation in the planning and development process.

4. The Commission report asks the City of Boston "to develop a program to explore and examine the revolutionary roots of America through its great historical resources" and endorses the completion of Miami's permanent Trade and Cultural Center (Interama) "as a part of the Bicentennial observance." These plans, as well as others from cities in other sections of the country, are to be strongly encouraged.

5. The Commission pointed out that improved travel facilities would "contribute greatly to a successful Bicentennial celebration," and expressed particular interest in special urban corridor projects in the Northeast which would not only expedite the flow of visitors from one historical site to another, but would also provide permanent benefits for a significant percentage of the American population. I am instructing Secretary Volpe and Director Shultz to analyze these projects, including costs and timing, and to submit their recommendations to me.

ON FINANCE AND ORGANIZATION

1. I will refrain from making commitments to any particular project rec-

ommended by the Commission until timing and cost data are submitted and studied. As policy choices and costs become evident, Chairman Mahoney will resubmit some of these recommendations to the Commission and will inform me of the Commission's preferences.

2. The Commission will have important operational responsibilities: the Bicentennial Calendar, publications, films, the setting of standards and the coordination and monitoring of many projects closely tied to the national celebration. It may be advisable to enlarge the Commission and constitute it as the "Board of Directors" of a corporate structure equipped to deal with operating functions. I am asking Chairman Mahoney to meet with Director Shultz and to recommend to me a plan for future Commission organization and funding.

ON THE OVERALL THEME

A "Festival of Freedom" does not, in my opinion, grasp the unique character of the American experience. True, this event will be festive, colorful and affirmative; yet it must also be thoughtful, profound and searching.

There is a phrase in the Declaration of Independence that is based on English political philosopher John Locke's concept of "Life, liberty and property" being the inalienable rights of man. Thomas Jefferson's dream for the new nation transcended the material; he saw property rights not as an end in itself, but as one means to human happiness.

For that reason, he substituted the phrase "the pursuit of happiness," and that ideal has constantly reasserted itself—most recently as a renewed concern for "the quality of life."

That thread is woven through the fabric of American life over two centuries. It keeps us from getting smug about our success; it reminds us of the need for the spiritual as we attain more of our material needs; it keeps us moving, growing, changing for the better.

Improving the quality of life is, in a sense, a more compelling concept in this era of advanced technology than it was in the time of Jefferson. I believe that this is the area in which we will find the fundamental theme for our anniversary observance of the continuing revolution that is the United States of America.

RICHARD NIXON.

THE WHITE HOUSE, *September 11, 1970.*

COMMUNICATION FROM THE CLERK OF THE HOUSE

The Speaker laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C., *September 11, 1970.*

The Honorable the SPEAKER,
U.S. House of Representatives.

DEAR SIR: I have the honor to transmit herewith a sealed envelop from the White House, received in the Clerk's Office at 11:50 a.m. on Friday, September 11, 1970, said to contain a message from the President entitled "A Call for Cooperation" concerning pending legislation.

With kind regards, I am,

Sincerely,

W. PAT JENNINGS,
Clerk, U.S. House of Representatives.

A CALL FOR COOPERATION—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 91-381

The SPEAKER laid before the House the following message from the President of the United States; which was read, referred to the Committee of the Whole House on the State of the Union, and ordered to be printed:

To the Congress of the United States:

A CALL FOR COOPERATION

In the course of the past year and one-half I have sent more than 50 messages to the Congress proposing legislation to deal with certain problems, or to achieve certain national objectives. On two occasions I have sought to provide a comprehensive summation of these messages, thereby presenting an administration philosophy.

In the first of these, my message of October 13, 1969, I asserted that if ours is not to be an age of revolution it must be an age of reform, and declared that this would be the watchword of the Administration: REFORM. I listed then a series of such measures already proposed:

Reform of the Draft
Reform of the Welfare System
Reform of the Tax Code
Revenue-Sharing Reform
Postal Reform
Manpower Reform
Social Security Reform
Reform of the Grant-In-Aid System
Electoral Reform
D.C. Government Reform
OEO Reform

I spoke then of further issues for which the Administration proposed new initiatives: with respect to hunger and malnutrition; population; crime; narcotics and pornography; manpower facilities and unemployment insurance; public transportation and air facilities.

In my State of the Union Message of January 22, 1970, I returned to this theme, proposing that as we enter the seventies, we should enter also a great age of reform of the institutions of American government.

The first principle of reform is that government programs and institutions should be effective. They should deliver what they promise. Too many promises of the 1960s have not been kept. The nation is now paying a price for this.

This principle is a cornerstone of the New Federalism. We seek to develop a new sense of partnership between the Federal government and State and local governments, to assign responsibility and authority for public functions to the level best qualified to carry them out. In the name of the "urban crisis," for example, the 1960s saw the Federal government increasingly caught in issues of municipal housekeeping that are most appropriately the business of a city council. But simultaneously the great fiscal power of the Federal government was never brought to play—through revenue sharing—to provide local governments with sufficient resources to enable them to solve their own problems in their own ways.

The second principle of reform is that America must find a way to direct its own growth. We have entered a decade in which our gross national product will increase by $500 billion, an amount greater than the entire growth of the American economy from 1790 to 1950. Out of this vast increase in wealth we can create a life of unprecedented achievement for ourselves, and for the nation. Or we can choke on it. "Toward Balanced Growth: Quantity with Quality," the theme of the report of the National Goals Research Staff, could well be the theme of the 1970s.

In foreign affairs I have held out the hope that if our new policies succeed America may have the best chance since World War II to enjoy a generation of uninterrupted peace. More then is the reason to consider forthwith how we are to use the abundance of peace.

The great question of the seventies, as I pointed out in my State of the Union Message, is, shall we surrender to our surroundings, or shall we make our peace with nature and begin to make reparations for the damage we have done to our air, to our land and to our water? I promised a national growth policy, to bring balance and order to the great changes in population, industry, and patterns of education and training that would affect the quality of life in the three decades ahead.

In February I sent to the Congress the most comprehensive proposals in the area of environmental protection and enhancement ever set forth by any adminstration. Since then I have proposed the creation of the Environmental Protection Agency to establish a focal point for setting general environment pollution standards affecting all media and forms of pollution.

I have now virtually completed the domestic legislative proposals I will make to the present Congress. I would like then to take one further opportunity to sum up. I would like to acknowledge the important achievements already behind us, and also to stress the very considerable amount of work which is still before the Congress and which must be done if we are to meet our responsibility to this new decade, much less to begin to fulfill its promise.

In my message of last October I stated that if a working partnership between men of differing philosophies and different parties is to continue, then candor on both sides is required.

Candor requires first that we acknowledge the exceptional circumstances which were thrust upon us by a relatively rare event in American history. For the first time in 120 years an incoming President of one party has faced a Congress dominated by another.

Given the system of "checks and balances" built into our government, it would be reasonable to predict that in such a situation the institutions of the Presidency and the Congress would thwart one another, and that stalemate would ensue. The American Constitution was devised in large measure to limit the exercise of power. We should not be surprised if on occasion it makes such exercise difficult.

Yet this need not be. It is not less a quality of our Constitution that by providing a voice to wide ranging and diverse interests it makes it possible from time to time to face up to issues of national importance, and to make genuinely national decisions about them. Some decisions can be reached only if both parties are willing to share responsibility; some programs can be enacted only if both parties share the credit.

This, then, is a time to face such issues. As President, I have sought to do so. I have proposed to Congress legislation dealing with issues about which there has been an unmistakable national judgment that something needs to be done. Revenue sharing, for example, was pledged by both parties in their 1968 platforms. We need it; the public supports it. Yet, until now, no President has felt it possible to propose revenue sharing, no Congress has made any move toward enacting it. Draft reform, welfare reform, crime control, environmental protection, are other issues that need urgent actions. I have felt it possible to approach these matters as national issues about which we could make national decisions in which both parties would participate, for which both would honorably accept responsibility and justly claim recognition.

Whatever will be the judgment of history, the record of this moment is that Congress has not responded. There are exceptions, of which all involved can and should be proud. But the larger fact is that Congress, in a mood of nostalgia and partisanship, has too much devoted its energies to tinkering with programs of the past while ignoring the realities of the present and the opportunities of the future.

Time now slips away. The Congress is coming to a close. Its work is not done. The issues I have asked to be considered have not been considered. And yet matters press. We cannot wait for politics. We must seek a record of achievement all can share.

As we build this record, we must not lose sight of the overriding need for fiscal responsibility. Year after year during the 1960s the Federal government incurred a deficit. In the early years of the decade there was a justification for this. The economy was operating at less than full employment capacity. In the later years there was no justification whatever: persistent deficits could lead only to a disorderly and punishing inflation. This was predictable; it was predicted; it came to pass.

It need not happen again, and it must not. This is why I have been forced to veto appropriation bills sent me by the Congress in amounts well above those requested. I understand full well the feeling for worthy purposes that inspires such action. But there is a higher national interest. Economics has taught us to think in terms of the entire economic system. To affect one part is to affect all parts. The Federal government must act in accordance with that knowledge and reality. Just as the President sends a unified Budget to the Congress, the Congress surely should devise some manner of unified response. I have suggested that Congress establish an overall spending ceiling, and adjust the various appropriation bills to accord with that ceiling. There may be other and better ways of attaining this goal. But we can no longer avoid the necessity of finding some means whereby the present fragmented and competitive legislative process that mandates and promotes Federal spending can be brought under control so that the impact of the total Federal budget is to sustain and encourage economic growth, rather than to disrupt it. This is the course of fiscal responsibility.

If restraint is one condition of fiscal responsibility, timeliness is surely another. In recent years Congress has more and more tended to put off the enactment of appropriations bills until months after the beginning of the fiscal year. It is now September. The fiscal year began July 1st. Yet only four out of fourteen appropriations bills have been enacted. This practice begins to threaten the very basis of orderly and effective government.

Fiscal restraint in no sense precludes a reordering of national priorities. To the contrary, it is only when such restraint is exercised that a purposeful direction of events can occur. In fiscal 1971, for example, for the first time in two decades, the expenditures of the Federal government on Human Resources are greater than the expenditure on Defense and Defense-related activities. We have reversed the trend of the 1960s. Our priorities *have* changed. But this change can be effective only in the context of disciplined and responsible fiscal policy. The matter may be put more strongly. Anyone who seriously wishes to see a reordering of priorities for the nation either must insist on doing so in a responsible and disciplined manner, or must be judged not to be serious.

REFORMING THE INSTITUTIONS OF THE PAST

Of the major items of reform which I have proposed to the Congress, and which I described in my message of October 13, 1969, some have been acted upon.

The Tax Reform Act of 1969, which had some troublesome features, nevertheless did incorporate most of the measures reforming the Tax Code which I had proposed.

The Administration asked for and obtained the extension of the *Economic Opportunity Act* to permit the OEO to carry out its new role.

One of the most important measures of reform passed by this Congress so far is the *Postal Reorganization Act* establishing the United States Postal Service. It is a landmark bill demonstrating not only ability to respond to a complex and persisting problem with bold and creative measures, but demonstrating as well the power of bipartisan effort when it is exercised with determination and will. This Act will need to be improved upon as the new system is established, but we have a sound structure.

Last year the Congress passed legislation I recommended to permit a change from the oldest-first to a youngest-first order of call in Selective Service, to reduce the period of prime vulnerability to one year, and to select individuals through a lottery system.

Thus we have made a beginning. But our work is nowhere near ended. The other major reforms I listed last October still have not been enacted. Since that time I have proposed a wide range of measures of equal importance. In far the greater proportion these, too, await action by Congress.

REFORM OF THE DRAFT

As long as the draft is necessary to meet our military manpower needs, it must be made to operate as equitably and consistently as possible.

This year, by Executive Order, future occupational, agricultural, and paternity deferments were eliminated. At the same time, I requested the Congress to restore the discretionary authority of the President on undergraduate student deferments so that these deferments could also be eliminated in the future. I also proposed that legislation be enacted to improve the random selection system by permitting the establishment of a direct national call of inductees. The Congress has not acted on these proposals. But the only long range solution is to end our need to draft by attaining an all-volunteer armed force. On April 23, 1970, I proposed military pay legislation to the Congress as an important step toward achieving an objective of reducing draft calls to zero. Unfortunately, this legislation has not been enacted.

In the meantime—and for all time—America owes an obligation to the men who have fought in Vietnam, and not less to those who backed them in the Armed Forces elsewhere. The *Vietnam Veterans Assistance Act* which I have proposed to the Congress would provide important new GI Bill benefits relating to post-secondary school training, the provision of Small Business Administrations loans to veterans from minority groups, and the provision of guaranteed loans for the purchase of mobile homes. This legislation has not been enacted; it should be.

REFORM OF THE WELFARE SYSTEM

The *Family Assistance Act* has been properly described as the most important piece of domestic legislation to go before the Congress in thirty-five years. It is one of the dozen or half-dozen most important pieces of domestic legislation in American history. The Act provides a basic national income supplement for all needy families with children. It abolishes the bankrupt welfare system of the past, which has so greatly contributed to our present crisis, and creates an altogether new system based upon work incentives (including support for child care services), job training and provision, and directed primarily to creating self-sufficient independent families. Where persons are genuinely dependent, as are the aged and disabled, or female headed families with young children, the bill provides national standards of benefits which will enormously improve the condition of the poor in many parts of the nation.

In April of this year the *Family Assistance Act* passed the House of Representatives by a resounding and gratifying vote. Hearings are now taking place in the Senate. It would be tragic beyond words if this historic opportunity were to be allowed to slip away from us. I am confident that this will not happen, but to prevent it the Senate will, of course, have to move with some dispatch.

The Family Assistance Plan is the keystone of an income strategy for the elimination of poverty in the United States. In 1969 the first move in this strategy was accomplished when Congress adopted the Administration's proposal to abolish income taxes for the poor. Reform of the Manpower Program and Unemployment Insurance are equally essential, and the latter has now also been enacted. But the strategy will be incomplete until the Family Assistance Plan is enacted as well.

On May 6, 1969, before the Family Assistance Plan was proposed, I sent to Congress a message on hunger and malnutrition, in which I declared that the moment is at hand to put an end to hunger in America itself for all time. Since then, major reforms have been carried through toward this goal. But legislation is required. The *Food Stamp Act Amendments*, which I recommended to the Congress, established the path-breaking principles that very poor families would receive free stamps, that for other families cash requirements would be limited to 30 percent of family income, that uniform minimum national eligibility standards would be established, and a range of similiarly important reforms. This legislation still has not been enacted.

Family welfare is necessarily related to family size and the availability of health services. On July 18, 1969, I sent the first Message to Congress ever on the subject of population. At the time I proposed that we should establish as a national goal the provision of adequate family planning services within the next 5 years to all those who want but cannot afford them, adding that in no circumstances will the activities associated with our pursuit of this goal be allowed to infringe upon the religious convictions or personal wishes and freedom of any individual, nor will they be allowed to impair the absolute right of all individuals to have such matters of conscience respected by public authorities. Part of this program has gone forward, but in order to reach our goal of being able to serve the estimated five million women who are in need of subsidized, publicly assisted family planning services, family planning legislation should be enacted by the Congress this year.

On the broader question of the future course of population growth and its implications for our society, I am pleased to observe that the *Commission on Population Growth and the American Future* which I proposed in my Message has been approved by the Congress and is now in operation.

In February of this year this Administration sent to the Congress the *Health Services Improvement Act* dedicated to the creation of integrated, effective, consumer-oriented health care systems by the consolidation of four existing and overlapping programs in this field. The Act would "decategorize" certain aspects of these programs, provide "joint funding", authorize the transfer of funds among these programs and encourage experimentation in the delivery of health services. The Congress has not yet taken final action on this legislation.

REVENUE-SHARING REFORM

As I stated in October, for the first time in the history of this government, we have recommended a national policy of permanent sharing of the Federal income tax revenues with the States and lesser political units of the country. My proposal, the *Revenue Sharing Act of 1969*, would begin with $1 billion in its first full fiscal year, and rise to approximately $5 billion by FY 1976: It would be difficult to identify another proposal that has received such widespread endorsement. It is elemental economics, elemental good sense, elemental good government. Both parties endorsed Revenue Sharing in their 1968 platforms, and it has widespread public support. Yet neither the House nor the Senate has held hearings on this Administration's bill.

MANPOWER REFORM

Earlier in this message I stated that the first principle of reform is that government programs should be effective. With this object in view I have proposed a *Manpower Training Act* which would consolidate the major manpower training programs carried on by the Department of Labor into one funding authority, abolish categorical programs, provide that the administration of the programs be progressively decentralized to the States and metropolitan areas, and further provide an automatic increase of 10 percent in manpower funds when the national unemployment rate equals or exceeds 4.5 percent for three consecutive months.

Here is the New Federalism in action. Consolidate in the interests of flexibility. Decentralize where operations are best managed locally. Assert national standards of performance, and provide automatic adjustments to changes in the national economy. In the history of American Federalism there has been no comparable transfer of functions: a process that for more than a third of a century has taken responsibilities away from State and local governments and lodged them in Washington would now for the first time be reversed, not to reestablish an old arrangement, but to create a new one. Hearings have been held in both the House and Senate, but as yet neither body has responded to the essentials of this historic legislation.

One of the most important measures to pass either session of the Congress thus far is the recently enacted *Employment Security Amendments of 1970*, which I recommended July 8, 1969. This precedent-shattering legislation will not only cover 4.75 million additional jobs—in small businesses, nonprofit organizations, State hospitals, and State institutions of higher education among others—it will also provide an extension of the benefit period up to 13 weeks which is automatically triggered when the insured unemployment rate for the nation reaches 4.5 percent for three consecutive months, and would remain in operation until that rate drops below 4.5 percent for a corresponding three months. These provisions become effective January 1, 1972.

This is the most extensive reform of the unemployment insurance program ever enacted. Something of moment has occurred. This important income maintenance program has been made flexible, responsive, equilibrating. This is what modern government should be doing in a dozen such areas.

SOCIAL SECURITY REFORM

In the *Social Security Amendments* currently before the Congress, I requested an automatic cost-of-living adjustment in Social Security benefits to compensate elderly Americans, as I stated in October, for the losses they are suffering because of an inflation they could do nothing either to prevent or to avoid. This is an act of fairness which I proposed in my 1968 campaign for the Presidency and which the Congress should no longer deny to our senior citizens. In addition, I proposed several benefit liberalizations and reforms which would make social security a more equitable and effective instrument of income security for the aged. This measure has passed the House and awaits action in the Senate.

REFORM OF THE GRANT-IN-AID SYSTEM

The Congress consented to my reorganization plan which provided for the establishment of the new *Office of Management and Budget* and the *Domestic Council*. I am confident that these new entities will be major factors in improving the management of domestic affairs in the years ahead. However, there are other aspects of management reform which require legislation which has not been acted upon.

In the fourth month of the Administration I proposed to reform the increasingly chaotic and unmanageable grant-in-aid system of the national government by providing the President with power, subject to Congressional veto, to consolidate related assistance programs.

This is no small matter. It is one of the reforms that is absolutely necessary if our present governmental system is to be made to work. Again we face a familiar situation. We have made some improvements through action by the Executive Branch, but legislation is necessary. Hearings have been held on the *Grant Consolidation Act* in both the House and the Senate, but neither body has acted.

We have recently proposed dramatic changes in the manner in which Social Services are delivered to their intended beneficiaries. As an amendment to the Family Assistance Act, we proposed greater flexibility in the use of services money and related HEW programs—including permissive authority for State and local governments to transfer up to 20 percent from one appropriation to another under certain conditions. More-

over, we would launch a new Government Assistance Program to help Mayors and Governors strengthen their policy direction and management of important HEW services. The Senate Finance Committee was gratifyingly prompt in holding hearings on this important amendment, and I hope the Congress will enact it this year.

The *Federal Economy Act* is a related measure. Programs need to be consolidated; from time to time they need to be eliminated. This is an elemental principle of the decent management of public affairs. In February, 1970, I proposed program changes that would save $2.1 billion in Fiscal Year 1971—money urgently needed for other programs. More than half of those changes that require Congressional approval have not been put into effect. Further, the Congress is blocking over $170 million of the savings I proposed to achieve by executive action. In all, Congress is not acting on over $700 million in savings, or one-third of my proposals. In those areas where I have been left free to act I am accomplishing 100 percent of the savings planned.

ELECTORAL REFORM

No one subject more profoundly involves the issue of popular sovereignty than the method of electing the President. For almost two centuries the system of the Electoral College has somehow worked, albeit just barely at times, and at other times even doubtfully. Every four years the American democracy places a large, unacceptable, and unnecessary wager that it will work one more time, that somehow an institution that never in any event functioned the way the framers of the Constitution anticipated, will somehow confer the Presidency on that candidate who obtains the largest number of votes. The Electoral College need not do so. Indeed on occasion it has not done so. But far more importantly—whatever the popular vote—it need not confer the Presidency on any candidate, if none has a majority of the electoral vote.

Our ability to change this system in time for the 1972 elections is a touchstone of the impulse to reform in America today. It will be the measure of our ability to avert calamity by anticipating it.

As I stated in my October 1969 message, I originally favored other methods of reforming the electoral college system, but the passage by the House of a direct popular election plan indicated that this thoroughly acceptable reform could be achieved, and I accordingly supported it. Unfortunately, the Senate has not completed action. Time is running out. But it is still possible to pass the measure and to amend the Constitution in time for the 1972 elections.

D.C. GOVERNMENT REFORM

Last October I called to the attention of Congress one of the truly unacceptable facts of American life, and asked for the enactment of legislation I had proposed which would bring about the orderly transfer of political power to the people of the District of Columbia. I called for a Constitutional amendment giving the District at least one representative in the House and such additional representatives as Congress may approve, and providing for the possibility of two United States Senators. (We need to keep continually in mind the population of the District is greater than that of at least ten States.) I asked for an interim arrangement providing the District with a non-voting Congressional representative, and the creation of a Commission on Government for the District of Columbia to propose a permanent governmental arrangement. I have been heartened by progress toward the non-voting representative, but I share the chagrin that most Americans feel at the fact that Congress continues to deny self-government to the nation's capital. I would remind the Congress that the founding fathers did nothing of the sort. Home rule was taken from the District only after more than seventy years of self-government, and this was done on grounds that were either factually shaky or morally doubtful. Surely we cannot allow this inadmissible situation to persist as the American Bicentennial dawns.

FOREIGN TRADE

In a message to the Congress of November 18, 1969, I proposed the *Trade Act of 1969* which would significantly strengthen the trade agreements program of the United States, recognizing that ultimately it is rising world trade and production that must form the base for the prosperity of developing nations. At the same time, the bill would establish a viable program of tariff adjustments for industries and adjustment assistance for firms and workers affected by imports. It would also promote the reduction or elimination of non-tariff barriers to trade, by eliminating the American Selling Price System. While this legislation awaits enactment, I again express my concern about the growing tone of protectionism in the arguments being made in the Congress.

The *Merchant Marine Act Amendments* provide for a long-range merchant marine building program of 300 ships in the next ten years, with a lessening of dependence on operating-differential subsidy for liner carriers, and the buildup of the bulk commercial carrier fleet for the foreign commerce of the United States. This is a trade expansion measure of fundamental importance. The bill has passed the House of Representatives, but has not as yet passed the Senate.

CRIME

In my October, 1969 Message I declared that there is no greater need in this free society than the restoration of the individual American's freedom from violence in his home and on the streets of his city or town. These words were carefully chosen. The issue of crime is easily misunderstood, and on occasion deliberately so. The issue of crime is freedom. When individual citizens are the direct victims of violence, or the indirect victims when they are forced to restrict their own movements out of fear of violence, fundamental liberties are abridged. A government that fails to protect those liberties is not worthy of the name. At the time of my statement the issue had been the source of more legislative requests from the Administration than any other single subject. Today, not far from a year later, only two bills have passed. One was the *District of Columbia Court Reform and Criminal Procedure Act*—a measure of major importance. It provides for the expansion and strengthening of the entire system of law enforcement and criminal justice in the nation's capital. As I said in October, the Act provides more judges, new enforcement tools, reorganization of the archaic court system, a new public defender's office, and reform in the procedures for dealing with juvenile offenders.

The second was an amendment to the *Federal Youth Corrections Act* to provide more effective and improved methods for dealing with young people in the Federal criminal justice system.

Among the most important crime proposals that have been before the Congress for more than a year, and which have not been enacted, are these:

—*The Controlled Dangerous Substances Act.* This Act would substantially revise existing drug laws by providing new means for controlling dangerous drugs by establishing a new, comprehensive and realistic penalty structure designed to provide courts with guidance and flexibility in handling offenders, and by providing more effective enforcement tools for diminishing the availability of dangerous drugs.

—*Organized Crime Control Act.* This is an omnibus bill embodying recommendations of the President's Crime Commission, the National Commission on Reform of Federal Criminal Laws, and other groups. The ten titles codify and strengthen existing Federal laws relating to the prosecution of organized crime. Again, this is an issue easily misunderstood. The most important issues involved in organized crime are not those which are most commonly discussed. It has been estimated that as much as $50 billion a year passed through the hands of organized crime in illegal gambling alone. What is involved here is not the act of gambling by the individual citizen, but the corruption of government that invariably accompanies it. Similarly, the social consequences of the drug traffic controlled by organized crime spread far beyond the personal tragedy of the addict. They weaken the fabric of society itself.

This proposal would make large-scale gambling a federal offense and would make it a felony for large-scale gamblers and law enforcement officers or public officials to obstruct enforcement of State and local laws against gambling through bribery of government officials. And it would replace numerous disparate witness-immunity laws scattered throughout the United States Code with a single uniform provision. It is a long overdue reform. This bill provides, among other things, for increased sentences, up to 30 years, for dangerous adult special offenders—the recidivist, the professional offender, and the organized crime leader.

—*Wagering Tax Amendments.* This proposal would prohibit the use against the taxpayer of information obtained through his compliance with the wager-

ing tax, while at the same time increasing the coverage and amount of the taxes, and authorizing a grant of immunity to essential witnesses.

—*The Bail Reform Act Amendments.* This proposal would authorize a judge to detain, after a hearing, a person charged with certain categories of Federal crimes who was found to pose a danger to another person or the community if released.

—*Protection of Minors from Obscenity Act and the Prohibition of Transportation of Salacious Advertising Act.* These two bills would prohibit the use of the mails for the distribution of matter harmful to minors or advertisements explicitly designed and intended to appeal to a prurient interest in sex.

—*Criminal Justice Act Amendments.* This proposal would institute fundamental and urgently needed reforms in the provision of legal defenders for poor persons. Crime involves the issue of freedom, and that includes freedom from unjust arrest and conviction. Vigorous and competent legal defense is fundamental to this freedom, and it results in justice for not only the accused but also the accuser.

These crime control measures have been before the Congress for more than a year. There are further measures of equal and as great urgency also before the Congress.

—*The Omnibus Crime Control and Safe Streets Amendments.* The Law Enforcement Assistance Administration was established in 1968 in the Department of Justice to assist, through a grant program, State and local governments in strengthening and improving law enforcement. These amendments now pending in Congress would authorize appropriations for this important program for fiscal year 1971 and beyond and would amend the basic authority to permit better utilization of the available funds.

—*Explosives Regulation Proposals and Amendments.* We have proposed legislation to regulate the business of importing, manufacturing or dealing in explosives through a system of licenses and permits as well as prohibiting the purchase of explosives by mail-order. In addition, we have proposed amendments to the U.S. Criminal Code which would provide urgently needed powers to control the epidemic of terrorist bombings and nihilist destruction which has suddenly become a feature of American life. Here again the object of crime control is not simply to deter people from breaking the law and to punish persons who have broken the law, but more importantly to maintain and protec the freedom of citizens to live their lives without fear and without injury. The stability of democratic society is what really is at stake.

EDUCATION REFORM

If the impulse to reform may be muted with respect to some areas of American life, there would seem to be near universal agreement that reform is overdue and urgent at every level in the field of education. There is a difference, however, between reform and retribution. If education has failed—*where* it has failed—the remedy is not to destroy it, but to restructure it. Moreover, failure as perceived by one group may be success in the eyes of another. Opinions about education must be informed by knowledge about the subject. From this it follows that the first thing to understand about education is that our understanding of the process is weak indeed. At most, it can be described as just beginning. This is a lesson we learned in the 1960s at no little cost.

During that decade, Congress was extraordinarily generous in its support of education, particularly in its enthusiasm for trying to compensate through education for the environmental disadvantages of our least fortunate children. Support for education comprised the fastest-growing segment of the Federal budget by the mid-point of that ten-year period. This support—regarded as long overdue by most Americans, and begrudged by almost no one—generated an extraordinary flurry of activity in American education at all levels.

Much of this activity was based on the familiar premise that if only the resources available for education were increased, the amount that youngsters learn would increase, too. Somehow, it seemed reasonable to assume that the amount of dollars invested in education was all that really mattered. For we thought we knew what education was all about.

It is, therefore, perfectly understandable that we, as a nation, have been reluctant to accept the findings of massive research and bold scholarly analysis which suggest that perhaps our cherished assumptions may simply not be true. Or, if true, they are far more complex and difficult to understand than we thought. It is entirely understandable that we have all been reluctant to acknowledge how little return our investment has brought, how disappointing the educational results of our ambitious programs have been. But the simple and alarming fact has gradually become apparent, that we did not really understand the educational process well enough to have a purposeful effect on its outcome, which is, of course, what children learn.

There is no shame associated with this conclusion, and no blame to be assigned. But it is time to realize that every time we invest a billion dollars in a compensatory program, we raise the hopes of millions of our most disadvantaged citizens; which hopes are more than likely destined to be dashed, for the programs and strategies on which they rest are themselves based on faulty asssumptions and inadequate knowledge. This is bad government. It is bad politics. It is bad education.

This Administration did not take the easy way out of this sad paradox. The easy response would have been to ignore the research findings or to stop spending money across the board on education. In fact, the total sums budgeted by this Administration for education have risen steadily—to nearly $12 billion this year—and will continue to do so. For many of these programs have auxiliary benefits that should not be denied our young people. Far from cutting back—or pretending that programs "work" when in fact they do not—this Administration has chosen the tougher route of *reform and research.* For we are confident that the day will come when in fact every young American can learn as much and go as far as his abilities will permit. But that day will be slow in coming if we fail now to abandon outmoded precepts and to move beyond simplicities. (While at the same time giving full honor and credit to those who re-awakened the nation to its educational shortcomings.)

Accordingly, this Administration has taken a number of executive actions aimed at the reform and renewal of American education, consistent with the principle of the New Federalism that elementary and secondary education are properly the province of States and localities. The *Office of Child Development* has been created within HEW as the focal agency for our Early Learning Program and other activities aimed at enhancing The First Five Years of Life. The *President's Commission on School Finance* is now at work examining the pressing and complex problems associated with the financial support of public and non-public schools. The *Right to Read* has been established as a prime educational goal and a *National Reading Council* has been appointed to monitor the nation's progress toward it. We initiated a rigorous—and continuing—review of the Title I program.

But the reforms in Federal education programs that are most needed must represent the combined efforts of the Congress and the Administration. In two major Messages to Congress last March, I made a series of proposals for reform and renewal, first in elementary and secondary education, then in higher education. These were augmented by our proposed *Emergency School Aid Act*, and by the thorough-going reform of the Impacted Aid Program transmitted as part of the *Federal Economy Act.*

In these proposals I asked that the Congress establish a *National Institute of Education*, within the Department of Health, Education, and Welfare, in order to bring to education the intensity and quality of research and experimentation that we have grown accustomed to in biomedical research under the National Institutes of Health. Staffed by scholars and experts from many fields, and free of many of the constraints on established agencies, the National Institute would offer reasonable hope that in time we might convert our present ignorance about the processes of education into hard knowledge about learning and how to effect it. Its purpose is to assist schools in solving the pressing problems which beset them. Congress has not held hearings on this important and far-reaching proposal.

I asked that the Congress reform the mammoth—and in its present form, inexcusable—program popularly known as Aid to Federally-impacted Areas. As I observed in March, this program neither assists States to determine their own education expenditures nor re-directs funds to the individual districts in greatest need. Four Presidents, representing both parties, have asked Congress to take up the long overdue but politically un-

popular task of eliminating its most egregious flaws. Although hearings have been held on this long-needed reform, no Committee action has been taken in either house.

I asked the Congress to enact a special two-year *Emergency School Aid Program* to expedite and encourage the process of desegregation in the United States, and to enhance the possibility that our youngsters can benefit from interracial educational experiences. Surely there has been no domestic public issue in twenty years to engage the attention and concern of more citizens than the relationship of the races within our nation's schools. To the extent that this relationship can be eased and assisted through the use of Federal funds, I have asked Congress to join with the Administration in doing so. I hope that Congress will complete action on this legislation at an early date.

My request that Congress speedily appropriate $150 million under existing authority so that we might begin this challenging task before schools open this September was regrettably cut in half to $75 million.

In higher education, the Administration submitted one of the most comprehensive pieces of education legislation in history, the *Higher Education Opportunity Act*. Its key elements bear repeating.

By substantially revising the present structure of student financial aid, it would be possible, for the first time, to assure every lower-income student entering college a combination of Federal grants and subsidized loans sufficient to give him the same ability to pay as a student from a family earning $10,000.

At the same time, I proposed to make Federally-guaranteed loans available to *every* college and graduate student in the United States, regardless of income. *The National Student Loan Association*—a "secondary market" for student loan paper—would make this possible, and the loans that we propose to guarantee would be sufficient in amount, and flexible enough in length of repayment, that any student prepared to invest in his own future could finance his own education. By making loans available to all, and by concentrating subsidies on those who need them most, the United States would finally be able to tell its young people that no qualified student who wants to go to college need be barred by lack of money.

In looking at the complex ties between institutions of higher education and the Federal government, this Administration concluded that for three decades now the Federal government has been hiring universities to do work it wanted done. The time has come for the Federal government to help academic communities to pursue excellence and reform in fields of their own choosing as well, and by means of their own choosing. Accordingly, I asked Congress to create a *National Foundation for Higher Education*, to be funded initially at $200 million a year, and to be guided in its policies by a Board representative of the general public as well as the higher education community itself. In creating this Foundation, it would also be possible to consolidate a series of narrow categorical programs that have long distorted the needs and wishes of our colleges and universities.

It would be naive to ignore the all-too-apparent fact that higher education may not be as popular in the United States as formerly. There has been a serious loss of faith in our universities, not least within the institutions themselves. The specter of "student unrest"—and the alleged political consequences of appearing to reward disruptive students and faculty—has tended to paralyze efforts in this field. But it is too easy to do nothing, to let our dismay over the behavior of individual persons and institutions prevent us from sustaining and reforming our long-range investment in education. This is the time to move beyond politics, to move even beyond our individual sentiments, and to take the bold steps that alone can assure the continuation of excellence and the opening of opportunity in American higher education. I therefore urge the Congress to look again at the *Higher Education Opportunity Act* that I submitted, to understand the Administration's complete openness to responsible amendments, and to join with me in moving together on behalf of our young people.

URBAN AFFAIRS

In my October 1969 message I also asked the Congress to enact an *Urban Mass Transportation Assistance Act*. This measure will provide the nation's deteriorating public transportation system an unprecedented measure of public support. In the six year period that ended in June of this year, the Federal government provided only $800 million to aid the public transit industry. The Urban Mass Transportation Assistance Act would provide for a program that is four times greater over the next five years, and altogether totals $10 billion over the next twelve years. Both the Senate and the House have been actively concerned with this legislation, and a reasonably similar bill has passed the Senate. But I am still waiting for a sound bill for signature.

Beyond this, the Administration has sent to the Congress a wide range of legislation dealing with transportation—including highway authorization and user charges, railroad safety, and emergency transportation assistance.

The *Housing and Urban Development Act of 1970* is a measure of comparable importance. The object of the bill is to reform the primary Federal housing programs in such a way as to markedly increase their effectiveness in stimulating the production of housing for families of low, moderate, and middle income. The improvements take the form of simplifying, consolidating, and making consistent the numerous programs now on the books. There are now more than 50 narrowly conceived programs in the Federal Housing Administration which would be reduced to eight basic programs with sufficient flexibility to meet widely varying needs. The various subsidized housing programs would be combined into three basic programs, each providing the same level of subsidy to families in similar circumstances. This measure is urgently needed if Federal housing programs are to be made effective and equitable. Unfortunately, although hearings have been held in both the House and the Senate, neither body has acted.

The Congress did enact the vitally-needed *Emergency Home Finance Act*, and the Department of HUD launched its creative "Operation Breakthrough" applying new technology to housing. But basic reform is necessary to help move these forward steps toward the goal.

CONSUMER PROTECTION

In a Message to the Congress at the end of October last year I proposed a comprehensive program of consumer protection, involving eighteen recommendations for the advancement of consumer interests. Five bills were subsequently introduced, embodying eleven of these recommendations requiring legislative action, The *Consumer Representation Act* provides for the establishment of an Office of Consumer Affairs in the Executive Office of the President and a Consumer Protection Division in the Department of Justice. The *Consumer Protection Act* would broaden the powers of the Federal Trade Commission in the field of consumer protection, and would create for the first time on a national basis a cause of action in Federal courts in cases of unfair and deceptive practices without regard to the amount in controversy. The *Consumer Product Testing Act* would promote the development of adequate and reliable methods of testing characteristics of consumer products. The *Drug Identification Act* and the *Consumer Warranty Act* would provide important new standards in their respective areas.

Almost a year has passed. Not one of these bills, except for a modified warranty bill passed by the Senate, has been acted on by either body of the Congress.

EMPLOYEE WELFARE AND PUBLIC INTEREST PROTECTION

In a Message to Congress on August 6, 1969, on the subject of *Occupational Safety and Health* I proposed the establishment of a comprehensive Federal occupational safety and health program. It does not exaggerate to declare that such a program ought to have become Federal law three generations ago. This was not done, and three generations of American workers have paid for it. I proposed legislation to create a Presidentially-appointed independent *Occupational Safety and Health Board* to promulgate standards on a national basis, and to provide broad powers of enforcement by the Secretary of Labor. Unaccountably, this urgent legislation has not been enacted.

On March 13, 1970 I proposed the *Employee Benefits Protection Act* which would broaden and strengthen the provisions of the Welfare and Pension Plan Disclosure Act. This proposal has received wide endorsement from labor and management groups which would be affected by it, but Congress to date has not acted.

In August, 1969, the Administration's proposed *Equal Employment Opportunity Enforcement Act* was introduced in the Senate and the House. Unfortunately, in the thirteen months that have passed, neither House has acted to provide these powers necessary to improve the effectiveness of the Equal Employment Opportunity Commission.

On February 27 of this year I proposed to Congress the *Emergency Public Interest Protection Act* which would add important new procedures to the emergency disputes provisions of the Taft-Hartley Act. In addition, I proposed the establishment of a *National Special Industries Commission* to conduct a wide ranging study of labor relations in industries which are particularly vulnerable to national emergency disputes. Again, Congress has not acted.

CREATING THE CONDITIONS OF THE FUTURE

The first task of government in the post-industrial age, as I have stated, is that of reforming the institutions of the past. The second task is that of creating the conditions of the future. The fundamental fact is that of choice. We can choose to debase the physical environment in which we live, and with it the human society that depends on that environment, or we can choose to come to terms with nature, to make amends for the past, and build the basis for a balanced and responsible future.

The most neglected and the most rapidly deteriorating aspect of our national life is the environment in which we live. In my State of the Union Message last January, I promised to arrest that decline and begin to revive our habitat. In the eight months that have followed, the Administration has proposed a program that fulfills that promise, the most comprehensive and costly program in this field in America's history. During the same period, the Administration has taken a series of executive actions aimed at the same goals. But the Congress has not yet seen fit to take final action on any of our legislative proposals. If it was not evident before, it must surely now be apparent to anyone who lived through the grim smog and pollution that gripped the Eastern Seaboard in late July, that prompt and vigorous action is necessary if our lives and those of our children are not to be blighted by *preventable and curable* environmental deterioration.

As my first official act of the decade, on January first I signed into law the *National Environmental Policy Act* establishing the *Council on Environmental Quality*. The Council is charged with analyzing important environmental conditions and trends, making a thorough review of all Federal programs which affect the environment, and recommending policies for protecting and improving the quality of the environment.

On July 9 I sent to the Congress a reorganization plan which would establish an *Environmental Protection Agency*, consolidating the major environmental pollution standard setting responsibilities of the Federal government together with certain related research, enforcement and abatement programs. At the same time I proposed formation of the *National Oceanic and Atmospheric Administration* within the Department of Commerce to consolidate Federal programs for monitoring and understanding the environment. Among other things, this would provide better coordination and direction of our oceanic programs.

Responsibility for anti-pollution programs is now fragmented among several Departments and agencies, thus weakening our overall Federal effort. Air pollution, water pollution and solid wastes are different forms of a single problem, and it becomes increasingly evident that broad systems approaches are going to be needed to bring our pollution problems under control. The reorganization would give unified direction to our war on pollution and provide a stronger organizational base for our stepped-up effort.

On February 10 of this year, I sent to the Congress a special message on the environment. This presented a 37-point action program, with special emphasis on strengthening our fight against water and air pollution.

In the field of water pollution, my major legislative recommendations included:

—Authorization of $4 billion to cover the Federal share of a $10 billion program to provide expanded municipal waste treatment facilities.

—Establishment of an *Environmental Financing Authority* to help finance the local share of treatment plant costs.

—Reform of the rigid formula by which funds are allocated under the treatment grant programs.

—Greatly strengthened enforcement authority, including provisions for court-imposed fines of up to $10,000 a day for violations.

The Senate has held hearings on the water pollution proposals, but has taken no floor action. The House has not even held hearings.

Among my major legislative recommendations for the control of air pollution were:

—More stringent procedures for reducing pollution from motor vehicles.

—Establishment of national air quality standards.

—Establishment of national emissions standards for pollutants from stationary sources.

—A major strengthening of enforcement procedures, including extension of Federal air pollution control authority to both inter- and intra-state situations and provision for fines of up to $10,000 a day for violators.

While the House passed these proposals in June, the legislation has not yet been reported to the Senate for floor action.

In addition, the message spelled out 14 separate measures I was taking by administrative action or Executive Order. These included such wide-ranging initiatives as launching an extensive Federal research and development program in unconventionally-powered, low-pollution vehicles, requiring the development of comprehensive river basin plans for water pollution control, re-directing research on solid waste management to place greater emphasis on re-cycling and re-use, and the esablishment of a *Property Review Board* to recommend specific Federal properties which should be converted to other high priority uses including conversion to parklands, or sold.

I again urge the Congress to act soon and favorably on the legislative proposals contained in that message. They are vital to our growing effort to protect and improve our environment.

On February 4, I issued an Executive Order directing a prompt clean-up of air and water pollution caused by Federal facilities. This task is well underway. As I said then, the Federal government should set an example for the rest of the country. We are doing so.

On April 15, I sent a message to the Congress requesting legislation that would, if enacted, bring to an end the dumping of dredged spoils into the Great Lakes as soon as disposal sites are available. Neither the House nor the Senate has even held hearings on this bill.

On May 20, I submitted to the Congress two treaties and amendments to another treaty dealing with the prevention of oil spills. At that time, I also submitted a comprehensive *Ports and Waterways Safety Act* to aid further in attacking the causes of oil pollution. Although Senate hearings have been initiated on one of the treaties, Congressional action on these important measures remains uncompleted.

On May 23, I announced that the United States would propose a new treaty placing the natural resources of the deep seabed beyond the 200 meter depth under international regulation.

On June 1st, a revised National Contingency Plan for dealing with oil spills was announced at my direction by the Chairman of the Council on Environmental Quality.

On June 11, I sent a message to the Congress requesting the enactment of legislation cancelling twenty Federal oil leases for off-shore drilling which had been granted in 1968 in the Santa Barbara Channel, and creating a Marine Sanctuary. The Senate has held hearings but taken no floor action. The House has not even held hearings, this despite the fact that oil spillages near our beaches and shores may be the single most offensive and reprehensible assault on the environment that we have yet witnessed.

To repeat, the most comprehensive and costly program of environmental control in the history of the Nation is now before the Congress. The clock is running. We dare not be too late.

THE CHALLENGES OF CHANGE

In a review such as this, extended as it is, not all of the important measures proposed by my Administration and still pending before the Congress could be discussed. Some others must be mentioned—the legislation to reform the Federal government's relationship to the American Indians, to enhance the role of public broadcasting, to limit the operations of one-bank holding companies. Of crucial importance also are the revenue-producing measures proposed but not acted upon—including the extension of

certain excise taxes, the acceleration of collection of gift and estate taxes, the stockpile disposal bills, the proposed *Postal Revenue Act*, and a special tax on the lead used in gasoline—which are so necessary to the maintenance of a sound fiscal position. Legislation is also needed to establish a realistic and effective farm program.

I have sought here to describe the issues of substance and of process which confront us at this time, setting them in the framework of a general approach to government as we come to the end of one era of social policy and begin the grand adventure of another.

For I believe the nation to have moved into a new era. I believe further that this view is shared by commentators and analysts of widely varying political positions. It is a view increasingly voiced by political leaders. It has become a matter of increasing public perception, and in measure, common acceptance.

The era upon which we are entered is not so easily defined as it is perceived. But it is not on those grounds any less real. To the contrary, the emergence of a post-industrial society is the dominant social reality of the present moment. Our task is to understand, and to respond to these changed circumstances.

The problems of this new era surround the question of choice: what kind of life would we live; what kind of society would we have? Growth becomes less of a goal and more of an issue. What kind of growth? For what purposes? With what consequences?

Our present problems in large degree arise from the failure to anticipate the consequences of our past successes. It is the fundamental thrust of technological change to change society as well. The fundamental task of government in the era now past was to somehow keep abreast of such change, and respond to it. The task of government in the future will be to anticipate change: to prevent it where clearly nothing is to be gained; to prepare for it when on balance the effects are to be desired; and above all to build into the technology an increasing degree of understanding of its impact on human society. With this in mind, the *National Commission on Productivity*, which I recently appointed, will be evaluating the impact of technology and other factors related to achieving higher levels of productivity vital to the healthy growth of our economy.

What is true of technology is equally true of government. It must become more self-aware, self-examining, self-correcting. There are amends to make and promises to keep that will engage our energies for years to come. But most of all there is a great adventure to be lived. For a period in the not distant past it might have seemed that American society was faltering. It may have been. But we have steadied now. We are regaining a sense of balance, of direction, and of forward thrust. This has been the achievement of the people. The measure of government—the challenge to government—is to sustain that movement.

This challenge is now before the Congress. It is a challenge not merely to the men who now hold office there but to the institution itself. Congress has not been spared the attacks on the institutions of American democracy which have increasingly characterized this period of our history.

There is but one answer to such charges, and that is to respond with energy and good faith to the legislative issues before it.

It is the responsibility of the President to take the initiative in such matters, and I have done so. A legislative program that will mark this era in history has been presented, and is ready for enactment. More is at stake than the issues with which that legislation deals, transcendent as some of these may be. More is at stake than the reputation of one political party or another for legislative wisdom or political courage. What is at stake is the good repute of American government at a time when the charge that our system cannot work is hurled with fury and anger by men whose greatest fear is that it will.

Matters press, we cannot wait for politics. We must seek a record of achievement all can share. It may be that none of us knows how fateful the outcome will prove.

RICHARD NIXON.

THE WHITE HOUSE, *September 11, 1970.*

THE STRANGE POLLUTION ARITHMETIC OF PRESIDENT NIXON

(Mr. PATMAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PATMAN. Mr. Speaker, President Nixon cannot make up his mind—one month, he is all for fighting pollution; the next month, he decides it is all too costly, and says we must give up the fight in the name of fiscal integrity.

In the midst of reprinting the text of presidential campaign documents, I hope the press will find space somewhere to point out the inconsistencies and incongruities of the President's shifting position on pollution. Last Friday, as part of "Campaign 70," the President sent up a message citing the Congress for failing to act on various measures. During the course of his lengthy dissertation, the President patted himself on the back for legislation authorizing $4 billion of Federal funds to help pay for expanded municipal waste treatment facilities.

To many, and this apparently includes most of the Nation's press, President Nixon's statement makes it appear that this administration is willing to spend whatever is necessary to end pollution and to prevent the dumping of raw sewage in our streams and lakes.

However, this is the same President who exactly 1 month earlier—August 11, 1970—blasted the Congress for voting $500 million to help local communities build water and sewer facilities. This is the same President who went on national television to veto these funds for water and sewer facilities.

On August 11, President Nixon attacks the Congress for voting funds for water and sewer facilities. On September 11, the President attacks Congress for failing to vote more funds for water and sewer facilities.

On August 11, the President sent a message up telling the Congress:

> I flatly refuse to go along with the kind of big spending that is wrong for all of the American people.

On September 11, the President faced the other direction and pronounced:

> To repeat, the most comprehensive and costly program of environmental control in the history of the nation is now before the Congress. The clock is running. We dare not be too late.

What will he do for October 11?

Mr. Speaker, the President's inconsistencies on our environmental problems only serve to illustrate the pure political nature of his attack on the Congress last Friday. I am sure that many of President Nixon's advisers are totally disinterested in the problems of pollution and it was easy for them to forget that this same President had already delivered a crushing blow to the very programs he now claims to be promoting.

Actually, the President's message is more significant for the omissions than it is for substantive legislative issues mentioned. Many of the major issues that have come before the Banking and Currency Committee were strangely omitted from the President's list of priorities. These include measures in the area of banking reform, control of organized crime, consumer protection, and housing.

After seeing the President's message, I wrote him calling his attention to the omissions and asking that he clarify his position on these essential legislative matters. I place in the RECORD a copy of my letter to President Nixon:

WASHINGTON, D.C.,
September 12, 1970.

The PRESIDENT,
The White House,
Washington, D.C.

MY DEAR MR. PRESIDENT:

In a spirit of legislative cooperation, I urge you in the strongest terms to correct the serious omissions in your message to Congress on Friday. Mr. President, these omissions, which have not gone unnoticed among Washington's army of lobbyists, will deal a serious blow to essential legislation to bring about banking reform, control of organized crime and consumer protection.

In a sweeping message covering dozens of pieces of legislation and thousands of words, it is startling that there is no mention of the legislation to bring one-bank holding companies under regulation. As you know, this legislation is the most important banking legislation to come before the Congress since the early 1930's and its outcome will determine the economic structure of this nation for years to come. This measure has passed the House and the issue is before the Senate this very next week. It is amazing that on the eve of this important legislative decision, your all-encompassing message completely omits mention of bank holding companies.

This omission, Mr. President, must have heartened the big bank lobbyists who have descended on Washington in record numbers and who are now holed up in hotel suites awaiting the opening gun in the Senate battle over this legislation.

The failure to mention this legislation appears to be such a massive switch in position by an Administration that has constantly reassured the public and the Congress that it was seriously interested in meaningful regu-

lation of these giant conglomerates and against the tremendous economic concentration they represent. Mr. President, many of us in the Congress have depended on your words of March 24, 1969, when you told the House and Senate:

"Legislation in this area is important because there has been a disturbing trend in the past year toward erosion of the traditional separation of powers between the suppliers of money—the banks—and the users of money—commerce and industry.

"Left unchecked, the trend toward the combining of banking and business could lead to the formation of a relatively small number of power centers dominating the American economy. This must not be permitted to happen; it would be bad for banking, bad for business, and bad for borrowers and consumers.

"To protect competition and the separation of economic powers, I strongly endorse the extension of Federal regulation to one-bank holding companies and urge the Congress to take prompt and appropriate action."

What has happened that now causes you to downgrade this essential measure? I hope you will clarify your position before the Senate takes up this legislation next week.

Likewise, I was amazed that your message contained no mention of the Congress' efforts to control the use of secret foreign bank accounts for illegal purposes. As you know these secret numbered accounts are the very lifeblood of nearly all the organized crime that is carried on in this nation. Law enforcement experts everywhere agree that the control of the use of these accounts by U.S. citizens will be one of the most serious blows that can be dealt against organized crime.

Some of the crime that would be controlled under this legislation is what popularly known as "white collar and Wall Street" style crime, and I hope that this fact did not cause any of your advisors to leave out mention of this bill in your message.

Mr. President, after a long struggle and many difficulties created by shifting positions of your people in the Treasury Department, we passed the secret foreign bank account bill in the House and it now awaits action in the Senate. I hope you will see fit to support this as a major fight against crime.

Your message contains a section entitled, "Consumer Protection," but for some reason leaves out mention of the "Fair Credit Reporting" legislation. This legislation, of course, would give the American consumer protection against the improper use of credit information, and gives him recourse against malicious and careless defamation of his character. This is a serious problem and in many cases credit-worthy consumers have been denied needed credit and even lost employment because of the improper and careless use of information collected by credit reporting agencies. Your support is greatly needed to get enactment of this measure.

I am happy to see your recognition of the need for housing and urban development legislation and I hope this now means that your Administration will be supporting the New Towns measure which has been reported out of the Housing Subcommittee of the House Banking and Currency Committee over solid Republican opposition. As you know, the Administration this year sent up a limited bill, primarily designed to recodify existing law and extend existing housing programs. The Democrats in Congress felt this would be totally inadequate in face of the mounting housing and urban problems. As a result, the Democrats in both Houses have introduced new measures in these areas and I hope that they will have your support and that you will do whatever possible to diminish opposition from within your party in the Congress.

Enactment of good housing and urban development legislation of course has been made much more difficult by your veto of funds of the Department of Housing and Urban Development last month. Without question, your veto has created great confusion about housing legislation and has resulted in a serious delay in these programs. Your veto eliminated funds for urban development and for critically needed water and sewer facilities. This veto has strengthened the hands of those who have always opposed such legislation, but I hope that your vetoes will not have resulted in a loss of good housing legislation in the 91st Congress.

Your message mentions environmental problems in several instances, but the greatest blow at programs to deal with pollution came when your veto eliminated the money needed to help local communities build water and sewer facilities. What assurance does the Congress have that additional legislation voted in this area will not be vetoed? In all candor, Mr. President, you have created the great delay in dealing with these problems.

Once again, I am gravely disappointed by the failure of your message to give recognition to the American people's deep concern about high interest rates and their destructive effect on the economy. The Congress, in Public Law 91–151, gave you wide powers to control interest rates—to roll them back—and to see that credit was allocated to areas where it was needed the most and away from inflationary sectors. You have not used the power although I am convinced that a tremendous majority of the American people want lower interest rates.

To many, it may seem strange that a President would send forward a message chiding the Congress about legislative action when the President has not used laws which this same Congress has already put on the books to correct serious economic problems.

Mr. President, I respectfully urge you to review your message and send forward a new communique indicating your support of essential legislation.

Sincerely,

WRIGHT PATMAN.

U.S. INCREASED PARTICIPATION IN FOUR MULTILATERAL INSTITUTIONS—COMMUNICATION FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. N. 91–383)

The SPEAKER laid before the House the following communication from the President of the United States; which was read and referred to the Committee on Banking and Currency and ordered to be printed:

THE WHITE HOUSE,
Washington, September 11, 1970.

Hon. JOHN W. MCCORMACK,
Speaker of the House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: There is now pending before the House a bill of vital importance to the international economic and financial interests of the United States. H.R. 18306 authorizes increased U.S. participation in four multilateral financial institutions: The International Monetary Fund, the World Bank, the Inter-American Development Bank, and the Asian Development Bank.

We and many other nations have given these institutions strong support in the past. They have earned this support by using their resources well in the service of a growing and prosperous world economy, a more stable international monetary system, and a more rapid growth of the developing countries. Their hallmark is shared contributions, impartial expertise, and the assurance of high standards of economic performance.

In asking the Congress to adopt this legislation, I have taken particular care to see that the financial obligations it entails are compatible with this Administration's fiscal programing. H.R. 18306 is a prudent and financially responsible combination of contingent liabilities, monetary transactions and expenditures carefully spaced over a long period of time.

A large part—almost $900 million—of the total authorization represents contingent liabilities and will enable the World Bank and the Inter-American Development Bank to borrow further in private markets to carry out important parts of their lending programs. This guarantee or callable capital subscription should not involve budgetary costs.

Another substantial portion of the authorization—$1.5 billion—is a monetary transaction involving an increase in our IMF quota. This Fund quota increase will not result in budegtary costs.

As to the remaining authorizations in H.R. 18306, less than $1.3 billion will require an actual expenditure of dollars; of which $35 million will be spent in fiscal year 1971, $70 million in fiscal year 1972 and $155 million in fiscal year 1973, with the rest spread out over a number of additional years.

Passage of the legislation is essential

—to maintain United States leadership in international monetary affairs and to avoid a substantial and continuing loss in our share of allocations of Special Drawing Rights beginning on January 1, 1971;

—to enable other countries to subscribe to almost $2 billion of World Bank capital stock and to carry out a policy of maintaining equity in Bank and Fund subscription which we have strongly advocated in the past;

—to allow us to participate with other developed countries in the peaceful development in Asia;

—to join with our Latin American neighbors in an effort to speed economic and social progress.

This legislation has my full support. I believe that the national interest will be served by passage of H.R. 18306, and I strongly urge prompt and favorable action by the House of Representatives.

Sincerely,

RICHARD NIXON.

THE LATE JOHN A. McELVENEY

(Mr. ROONEY of New York asked and was given permission to address the House for 1 minute.)

Mr. ROONEY of New York. Mr. Speaker, my beloved mother many times used an expression, "Here today and away tomorrow; be prepared."

On Thursday last when this House adjourned shortly after 8 o'clock in the evening, there sat in his usual seat in the third row on the right Jack McElveney. You will remember that Jack McElveney was the immaculately neat, always cheerful and pleasant gentleman who has been with us for many, many years. He first became an employee of

the House of Representatives 49 years ago, on March 4, 1921.

On Saturday afternoon Jack suddenly was away from us, and it now becomes my sad duty today to announce his sudden passing.

His remains are at Gawler's Funeral Home on Wisconsin Avenue and may be viewed from 9 o'clock tomorrow morning until 10 o'clock tomorrow night. The family, including his two brothers, will be present from 2 to 4 tomorrow afternoon and from 7 to 9 in the evening.

A Solemn Requiem Mass for the repose of Jack's soul will be said on Wednesday, September 16, at St. Joseph's Church, Second and C Streets NE., at 11 a.m.

I might remind those of us who came here in recent years that Jack McElveney in years gone by was an aide to such men as James M. Mead before he was elected a Member of the other body, while he was a Member of the House of Representatives from Buffalo, N.Y.; by the late Representative Peter Gansevoort Ten Eyck of Albany, N.Y., and by the late Representative Parker Corning of Albany, N.Y. He also served as the bill clerk of the House.

I know that he will be missed by his many friends among the membership and personnel of the House. May God have mercy on his soul.

Mr. MATSUNAGA. Mr. Speaker, will the gentleman yield?

Mr. ROONEY of New York. I yield to the distinguished gentleman from Hawaii.

Mr. MATSUNAGA. Mr. Speaker, I am deeply grieved to learn of the death of our amiable assistant bills clerk, Jack McElveney. As many of us know, Jack used to occupy almost habitually the aisle seat nearest the Democratic entrance in the third row. There was hardly a legislative day that went by in the last 8 years that I did not sit next to him, as we talked about "kings and cabbages," but mostly about politics and Hawaii. He meticulously clipped out news articles about Hawaii that he had come across in his reading of the New York Times, the Washington Post, or the Washington Evening Star. We talked about the Congress and Members of Congress of earlier days. I sat there beside him and listened to his fabulous anecdotes. I was fascinated by his expertise on horses. I am truly going to miss Jack. As I try now to analyze why it was that I felt so close to Jack McElveney, I find my reasoning leading me to the conclusion that we had something very strong in common—a great love for this House of Representatives.

Perhaps many do not know, Mr. Speaker, that Jack McElveney had retired several years ago and that since then he was in attendance every day in this Chamber out of love for this body, and performed his usual tasks without compensation, other than his retirement pay. He would have reached his 78th birthday next month.

Mr. Speaker, I join the distinguished gentleman from New York (Mr. ROONEY) in grieving over the loss of a dear and beloved friend.

I extend my heartfelt condolences to his brothers, Dan and Leo, and other members of his family.

Mr. ZABLOCKI. Mr. Speaker, upon entering the House Chamber this noon, I was shocked and saddened to learn of the sudden passing of John A. B. "Jack" McElveney.

His usual cheerful and sincere greeting as well as the interesting anecdotes and stories about his past experiences will be sorely missed. He served the Congress in both the Senate and House for 42 years and it was obvious that he enjoyed his work and his association with the House of Representatives.

He would offer his services and assistance without hesitation. On innumerable occasions when he was asked the status of bills on the calendar, the action taken on certain legislation, the record vote outcome on bills, the information was always available and accurately reported to the Members.

At the close of business last Thursday, as was his usual custom, he said to me:

> Congressman, are you going to Wisconsin this weekend?

He followed his query with the admonition:

> Take it easy—don't work too hard. Have a good weekend here or in your wonderful Wisconsin.

Little did we realize that those were to be his last words to me. To his family and to his many friends I extend my sincere condolences.

GENERAL LEAVE TO EXTEND

Mr. ROONEY of New York. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks with regard to the passing of the late beloved Jack McElveney.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

FILING OF DISCHARGE PETITION ON H.R. 18279, THE ORGANIZED CRIME CONTROL ACT OF 1970

Mr. RANDALL. Mr. Speaker, I have today filed a petition to discharge House Resolution 1169 which will provide for 4 hours general debate on H.R. 18279, which is essentially and substantially the same as S. 30, that passed the other body in January of this year.

During the recess in conversation with my constituents I found one of the subjects most on the minds of people in my district was crime and student unrest. I found there was as much concern about these matters as about inflation, unemployment, and the condition of the economy.

If there should be any reluctance on the part of Members to sign a discharge petition because it might circumvent ordinary parliamentary procedures, I think we should remember that for a long while now certain criminal elements in this country have been regularly and continuously circumventing the property rights and personal rights of our law-abiding citizens.

Let me emphasize that those Members who do see fit to sign this petition are in effect saying to their constituents they are trying to do something about crime. By signing the discharge petition they are putting themselves squarely on record that they are determined to pass a comprehensive crime bill before we go home this fall. We can accomplish this objective if sufficient signatures are obtained on the discharge petition.

I invite Members on both sides of the aisle to sign this petition. This is not a partisan matter. I plan to renew this invitation frequently during the remainder of this session.

REMARKS BY DOROTHY ELSTON, TREASURER OF THE UNITED STATES

(Mr. JACOBS asked and was given permission to address the House for 1 minute.)

Mr. JACOBS. Mr. Speaker, for the record, the venom in high places in this administration has filtered down to the Treasurer of the United States, Dorothy Elston, who in Indianapolis on this past weekend found it possible to describe our late President, John F. Kennedy, as a "horrible misfit in the Presidency."

You expect that kind of talk from some people in our society, but have we not had enough hate in high places? President Lincoln said:

> I have no malice in my heart for any man. What I deal in is too vast for malice.

AIR PIRACY MUST BE STOPPED

(Mr. ALBERT asked and was given permission to address the House for 1 minute to revise and extend his remarks.)

Mr. ALBERT. Mr. Speaker, I heartily applaud the announcement by President Nixon last Friday of the steps this Nation is taking to deal with the terrible menace of air piracy to which this Nation and the world have been subjected in the last few days. The United States, in order to protect its citizens and other passengers on U.S. airlines, must act forthrightly and decisively. I have long contended that armed guards should be placed on certain flights. We must do everything in our power to prevent air piracy and hijackings. Undoubtedly, armed security personnel on our planes will help.

In my view, however, it will be easier to deter such crimes than to prevent them. It is imperative that all nations agree to extradite or punish air pirates. These modern-day freebooters must have no hope of finding a safe haven after their attacks on international commerce. Where ever they land, air pirates should know that they face swift and sure justice.

Until those nations of the world which harbor air pirates and refuse to punish them or extradite them are ready to meet their international responsibilities, U.S.-flag air carriers should be prevented from landing in those countries. In fact, I would urge we go a step further. A total quarantine by all international airlines should be imposed upon any nation which refuses to deal speedily and effectively with air pirates. Taking scores of innocent people hostage for political

purposes is an act of the most heinous nature and should be dealt with as such.

Civilized people the world over are becoming sick and tired of violence—violence in the streets—violence on the campuses—violence in the skies. Of all these crimes, none is more repulsive than air piracy. It must be stopped.

PRESIDENT NIXON'S MESSAGE OF SEPTEMBER 11 TO THE CONGRESS

(Mr. MYERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MYERS. Mr. Speaker, the political experts and the campaign managers of both parties are pointing to a very disturbing factor in this off-year election; that is, voter apathy. Even though the country is wracked with dissension, and the issues are many, the voters do not seem to care if they go to the polls in November or not. A principal reason for that apathy, Mr. Speaker, may well be that the electorate has lost faith in the powers of Congress to accomplish anything definitive. President Nixon stresses this mistrust and loss of confidence in his message to the Congress last Friday. The President said:

> More is at stake than the reputation of one political party or another for legislative wisdom or political courage . . . what is at stake is the good repute of the American government at a time when the charge that our system cannot work is hurled with fury and anger by men whose greatest fear is that it will.

The White House message listed 16 broad categories and more than two score specific measures Congress has failed to act on, and they include social security reform, draft reform, electoral reform, the crime bills, consumer protection, and the family assistance program.

I can state, here and now, that the bulk of that legislation has been held up by Democrats, whose only purpose appears to be obstructionism. The Democrats have stalled all of those vital measures of the Nixon administration for the unannounced but obvious reason of pure partisanship. Stripped of leadership, trying to edge away from their past concessions to the ultraliberals, this party tries to compensate for its weakness by manipulating Congress. The President's message is without rancor, but it clearly indicates his concern with a so-called loyal opposition that seems to put the best interests of the party ahead of their country.

THERE IS STILL TIME TO SALVAGE A PROGRESSIVE RECORD FOR THE 91ST CONGRESS

(Mr. RHODES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RHODES. Mr. Speaker, President Nixon has sent to Congress a damning dossier on Democratic dalliance, an exposé of the formula of failure that has characterized too much of the tenure of the 91st Congress.

I cannot discern what political gains the majority Members of the House envision from their policies of becoming roadblocks in the path of progress. I believe the American people asked for answers when they changed the party leadership at the White House in 1968, and they will be embarking on the same quest when they change party leadership in the House in November. The President has shown a willingness to tackle problems. The leadership of this Congress has shown an unwillingness to shoulder responsibility, a perverse partisanship, but a willingness to sacrifice the Nation's good on the altar of political gimmickery.

It is notable that Democrat National Chairman Lawrence O'Brien last Thursday charged that President Nixon is a "do-nothing" President. It stretches everyone's credulity to hear such a charge when a wagonload of bills awaits action—sent to Congress by the President, but sat on by the Demo-leadership in the House.

There is still time to salvage a remnant of progressive record for the 91st Congress, and I would hope that, if only in self-defense, some of the thinking Members on the other side of the aisle would don their work shoes and help us get some of this legislation on the books.

CONSENT CALENDAR

The SPEAKER pro tempore (Mr. BOGGS). This is Consent Calendar day. The Clerk will call the first measure on the Consent Calendar.

U.S. PARTICIPATION IN THE 1972 UNITED NATIONS CONFERENCE ON HUMAN ENVIRONMENT

The Clerk called House Resolution 562, expressing the sense of the House of Representatives that the United States should actively participate in the 1972 United Nations Conference on Human Environment.

Mr. GROSS. Mr. Speaker, I ask unanimous consent that the resolution be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

PREVENTING UNAUTHORIZED MANUFACTURE AND USE OF CHARACTER "JOHNNY HORIZON"

The Clerk called the bill (S. 3838) to prevent the unauthorized manufacture and use of the character "Johnny Horizon," and for other purposes.

There being no objection, the Clerk read the bill as follows:

S. 3838

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior may establish and collect use or royalty fees for the manufacture, reproduction, or use of the character "Johnny Horizon," originated by the Bureau of Land Management and announced in the July 3, 1968, issue of the Federal Register (33 Federal Register 9677) as the official symbol for a public service antilitter program to maintain the beauty and utility of the Nation's public lands.

SEC. 2. The Secretary of the Interior shall deposit into a special account all fees collected pursuant to this Act. Such fees are hereby made available for obligation and expenditure for the purpose of furthering nationwide antilitter campaigns.

SEC. 3. Chapter 33 of title 18 of the United States Code is amended by adding a new section to be known as section 714, as follows:

"§ 714. 'Johnny Horizon' character or name

"As used in this Act, the name or character 'Johnny Horizon,' means the representation of a tall, lean man, with strong facial features, who wears slacks and sport shirt buttoned to the collar (both green, when colored), no tie, a field jacket (red, when colored), boot-type shoes (brown, when colored) and who carries a backpack, which was originated by the Bureau of Land Management, United States Department of the Interior, as the official symbol for a public service antilitter program to maintain the beauty and utility of the Nation's public lands.

"Whoever, except as authorized under rules and regulations issued by the Secretary of the Interior, knowingly manufactures, reproduces, or use the character 'Johnny Horizon', or any facsimile thereof, or the name 'Johnny Horizon' as a trade name or mark, or in such a manner as suggests the character 'Johnny Horizon', so that such use is likely to cause confusion, or to cause mistake, or to deceive, shall be fined not more than $250 or imprisoned not more than six months, or both.

"This section shall not make unlawful the use of any such emblem, sign, insignia, or words which was lawful on the date of enactment of this Act.

"A violation of this section may be enjoined at the suit of the United States attorney, upon complaint by the Secretary of the Interior."

SEC. 4. The analysis of chapter 33 immediately preceding section 701 of title 18 is amended by adding at the end thereof:

"714. 'Johnny Horizon' character or name."

SEC. 5. The rights in the name and character "Johnny Horizon" shall terminate if the use by the Secretary of the Interior of the name and character "Johnny Horizon" is abandoned. Nonuse for a period of two years shall constitute abandonment.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AMENDING THE FEDERAL PROPERTY AND ADMINISTRATIVE SERVICES ACT OF 1949 TO PERMIT ROTATION OF CERTAIN PROPERTY

The Clerk called the bill (S. 406) to amend the Federal Property and Administrative Services Act of 1949 to permit the rotation of certain property whenever its remaining storage or shelf life is too short to justify its retention, and for other purposes.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill.

Mr. GROSS. Mr. Speaker, reserving the right to object, I should like to ask someone conversant with this bill what happens to stocks that may be sold in foreign countries? Are those stocks sold to foreigners? What happens to them?

Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

RELEASING THE CONDITIONS IN DEED TO LAND HERETOFORE CONVEYED BY THE UNITED STATES TO THE SALT LAKE CITY CORPORATION

The Clerk called the bill (S. 1366) to release the conditions in a deed with respect to a certain portion of the land heretofore conveyed by the United States to the Salt Lake City Corporation.

Mr. HALL. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

Mr. BROOKS. Mr. Speaker, reserving the right to object, will the gentleman yield to me on that or, rather, let me ask him if there is anything I can tell him about the Salt Lake City bill which will clarify the matter for him. It is a very noncontroversial Senate bill.

Mr. HALL. If the gentleman will yield to me?

Mr. BROOKS. I am glad to yield to the gentleman.

Mr. HALL. I will say, first of all, there is a statement by the Department of the Interior that the action has already been taken and hence this legislation is unneeded. Second, the request for putting over without prejudice is by request insofar as the gentleman from Missouri is concerned. Inasmuch as the action has been taken, the gentleman now has the time, and I will give him any more information I have, if he will continue to yield, but that is the legislative situation.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

ALLOWING PURCHASE OF ADDITIONAL SYSTEMS AND EQUIPMENT FOR PASSENGER MOTOR VEHICLES OVER AND ABOVE STATUTORY PRICE LIMITATION

The Clerk called the bill (S. 2763) to allow the purchase of additional systems and equipment for passenger motor vehicles over and above the statutory price limitation.

Mr. GROSS. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

AUTHORIZING GENERAL SERVICES ADMINISTRATOR TO ENTER INTO CONTRACTS FOR JANITORIAL SERVICES, TRASH REMOVAL, AND SO FORTH

The Clerk called the bill (H.R. 17455) to amend the Federal Property and Administrative Services Act of 1949, as amended, to authorize the Administrator of General Services to enter into contracts for janitorial services, trash removal, and similar services in federally owned and leased properties for periods not to exceed 3 years, and for other purposes.

There being no objection, the Clerk read the bill as follows:

H.R. 17455

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection 210(a) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 490(a)), is further amended (1) by striking the semicolon after the word "owned" in paragraph (14) and inserting a comma in lieu thereof, and (2) by adding the following new provision after the word "and" at the end of paragraph (14): "for janitorial services, trash removal, and similar services in federally owned and leased properties; and".

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PROVIDING FOR ADDITION OF FREEMAN SCHOOL TO HOMESTEAD NATIONAL MONUMENT OF AMERICA, NEBR.

The Clerk called the bill (H.R. 3259) providing for the addition of the Freeman School to the Homestead National Monument of America in the State of Nebraska, and for other purposes.

There being no objection, the Clerk read the bill as follows:

H.R. 3259

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in order to further the interpertation and commemoration of the pioneer life of early settlers of the West, the Secretary of the Interior is authorized to acquire by donation or purchase with donated or appropriated funds the following described lands and interests therein, on which is situted the old school building known as Freeman School:

Begining at the southeast corner of the southeast quarter of section 22, township 4 north, range 5 east, sixth principal meridian, Gage County, Nebraska, thence running north on the east line of the said quarter section 297 feet, thence west 214.5 feet, thence south 297 feet, thence east 214.5 feet to the point of begining.

The Secretary is further authorized, in order to protect the setting of the Freeman School, preserve an adequate visual relationship with the existing Homestead National Monument of America, and provide access to the school from the national monument, to acquire by any of the above methods such lands and interests therein, as he deems necessary within the areas in certain sections of township 4 north, range 5 east, sixth principal meridian, Gage County, Nebraska, which are described as follows:

Section 22, beginning at a point 297 feet north of the southeast corner of the southeast quarter on the east line of the said quarter section, thence north along the east line of the said quarter section 103 feet, thence west 300 feet, thence south 400 feet to the south line of said quarter section, thence east along the south line of said quarter section, 85.5 feet to the boundary of the Freeman School property, thence north along the boundary of the school property 297 feet, thence east along the boundary of the school property 214.5 feet to the point of beginning;

Section 23, the south 300 feet of the southwest quarter thereof;

Section 26, the north 300 feet of the northwest quarter northwest quarter thereof;

Section 27, beginning at the northeast corner of the northeast quarter, thence south along the east line of the said quarter section 300 feet, thence west 300 feet, thence north 300 feet to the north line of said quarter section, thence east along the north line of said quarter section 300 feet to the point of beginning; all containing about 31 acres.

SEC. 2. The property acquired pursuant to this Act shall be administered by the Secretary of the Interior as part of the Homestead National Monument of America, in accordance with the Act of March 19, 1936 (49 Stat. 1184), and the Act of August 25, 1916 (39 Stat. 535), as amended and supplemented (16 U.S.C. 1 et seq.).

SEC. 3. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

With the following committee amendment:

Page 3, beginning on line 18, delete all of section 3 and insert in lieu thereof:

"SEC. 3. For the purposes of this Act, there are authorized to be appropriated not more than $50,000, of which not more than $45,000 (April 1970 prices), plus or minus such amounts, if any, as may be justified by reason of ordinary fluctuations in construction costs as indicated by engineering cost indices applicable to the types of construction involved herein shall be appropriated for the rehabilitation and development of the Freeman School."

The committee amendment was agreed to.

Mr. ASPINALL. Mr. Speaker, H.R. 3259 by our colleague from Nebraska (Mr. DENNEY) provides for the addition of the Freeman School to the Homestead National Monument in Nebraska.

Homestead National Monument was authorized by the Congress in 1936 as a memorial to the pioneers who settled and civilized the West. At this site—the place believed to be the first homestead in the country—visitors can visually relive the pioneer life at the homestead cabin of Daniel Freeman.

H.R. 3259 will add a new dimension to the historic character of the area by adding to it the Freeman Schoolhouse. The school is not within the existing monument grounds, but it is located nearby so that no large land acquisition program is necessary. The bill contemplates the purchase of protective easements for the corridor connecting the monument and the school grounds—not more than $5,000 is expected to be needed for this purpose—and the school building and the 1.2-acre tract upon which it is located is to be donated to the United States by the Homestead Historical Association.

Basically, the old school house is a sound structure, Mr. Speaker, but some repairs and restoration work will be needed. In addition, a parking lot, fence and interpretive devices are to be installed. Altogether, these improvements will involve an investment of about $45,000.

The committee recommends one amendment to the bill which merely places a ceiling on the amounts authorized to be appropriated for the acquisition and development program contemplated. As reported by the committee, expenditures will be limited to no more than $50,000.

Mr. Speaker, that briefly describes the nature and purpose of H.R. 3259, as recommended by the committee. The mem-

bers of the committee feel that the Freeman School will be a suitable addition to the existing Homestead National Monument and we urge the enactment of the bill.

Mr. DENNEY. Mr. Speaker, this bill provides for the addition of the Freeman School to the Homestead National Monument in the State of Nebraska.

This legislation should have special meaning for all those Americans who are interested in passing on to future generations important symbols of the early development of our country.

The bill would preserve a red brick schoolhouse that was built by Mr. Daniel Freeman, America's first homesteader under Lincoln's famous Homestead Act, for his own large family.

Constructed from handmade brick and measuring 36 feet by 20 feet, with walls 12 feet high, "the little red schoolhouse" was used as a place of education from 1872 through 1967—96 years. It is Nebraska's oldest, continually operated school.

The land on which it is situated is adjacent to the Homestead National Monument in Gage County, Nebr., established several years ago by Congress on the original Freeman property. Fortunately, the school is only one-fourth of a mile from the visitors' center, so it can easily be administered by the National Park Service in conjunction with existing facilities.

In fact, the National Park Service recommended in 1968 that the one-room schoolhouse be added to the monument grounds. In making its recommendations after a thorough study, the Park Service made these observations:

As a schoolhouse, it symbolizes the pioneers' determination to civilize the frontier and provide opportunities for the common man as soon as possible.

The one-room country school will soon be a thing of the past, and it seems appropriate that an example be preserved by the National Park Service.

The office of the Secretary of the Interior has also joined in support of this measure. Let me read briefly from a letter sent from his office late last year concerning the particulate of this legislation and their possible cost:

The parcels described . . . are: (1) The property now held by the Homestead Historical Association and an adjacent strip of road right-of-way owned by the State Highway Department, which together comprise 1.2 acres; and (2) a 600-foot-wide strip of land lying between the school and the present monument boundary, 300 feet on either side of the ¼ mile section of State Route 4 which separates the two, together with the protective strips adjacent to the monument boundary and the school property, altogether comprising about 31 acres. We expect that the former lands will be donated to the United States: as to the latter, we expect to acquire scenic easements, by donation or for nominal cost, which would protect the setting of the school and preserve an adequate visual relationship with the monument. Access to the school would be provided by the existing State Route 4. The estimated cost of acquiring scenic easements, which embrace parts of five ownerships, is not more than $5,000. The estimated cost of developing the school property, including rehabilitation of the school and constructing a parking facility, is approximately $45,000.

The Bureau of the Budget has advised that there is no objection to the presentation of this report from the standpoint of the Administration's Program.

A measure identical to this one was introduced in the U.S. Senate by Senators HRUSKA and CURTIS, and it passed that body last April 27.

The American educational system is today the best in the world. It is only fitting that we remind our fellow citizens, through the preservation of the Freeman School, how far we have come in so short a time period.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

Mr. ASPINALL. Mr. Speaker, I ask unanimous consent for the immediate consideration of a similar Senate bill (S. 58) providing for the addition of the Freeman School to the Homestead National Monument of America in the State of Nebraska, and for other purposes.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

There was no objection.

The Clerk read the Senate bill as follows:

S. 58

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in order to further the interpretation and commemoration of the pioneer life of early settlers of the West, the Secretary of the Interior is authorized to acquire by donation or purchase with donated or appropriated funds the following described lands and interests therein, on which is situated the old school building known as Freeman School:

Beginning at the southeast corner of the southeast quarter of section 22, township 4 north, range 5 east, sixth principal meridian, Gage County, Nebraska, thence running north on the east line of the said quarter section 297 feet, thence west 214.5 feet, thence south 297 feet, thence east 214.5 feet to the point of beginning.

The Secretary is further authorized, in order to protect the setting of the Freeman School, preserve an adequate visual relationship with the existing Homestead National Monument of America, and provide access to the school from the national monument, to acquire by any of the above methods such lands and interests therein, as he deems necessary within the areas in certain sections of township 4 north, range 5 east, sixth principal meridian, Gage County, Nebraska, which are described as follows:

Section 22, beginning at a point 297 feet north of the southeast corner of the southeast quarter on the east line of the said quarter section, thence north along the east line of the said quarter section 103 feet, thence west 300 feet, thence south 400 feet to the south line of said quarter section, thence east along the south line of said quarter section 85.5 feet to the boundary of the Freeman School property, thence north along the boundary of the school property 297 feet, thence east along the boundary of the school property 214.5 feet to the point of beginning;

Section 23, the south 300 feet of the southwest quarter thereof;

Section 26, the north 300 feet of the northwest quarter northwest quarter thereof; and

Section 27, beginning at the northeast corner of the northeast quarter, thence south along the east line of the said quarter section 300 feet, thence west 300 feet, thence north 300 feet to the north line of said quarter section, thence east along the north line of said quarter section 300 feet to the point of beginning; all containing about 31 acres.

SEC. 2. The property acquired pursuant to this Act shall be administered by the Secretary of the Interior as part of the Homestead National Monument of America, in accordance with the Act of March 19, 1936 (49 Stat. 1184), and the Act of August 25, 1916 (39 Stat. 535), as amended and supplemented (16 U.S.C. 1 et seq.).

SEC. 3. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

AMENDMENT OFFERED BY MR. ASPINALL

Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ASPINALL: Strike out all after the enacting clause of S. 58 and insert in lieu thereof the provisions of H.R. 3259, as passed.

The amendment was agreed to.

The Senate bill was ordered to be read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 3259) was laid on the table.

AUTHORIZING SECRETARY OF THE INTERIOR TO STUDY FEASIBILITY AND DESIRABILITY OF NATIONAL LAKESHORE ON LAKE TAHOE

The Clerk called the bill (S. 2208) to authorize the Secretary of the Interior to study the feasibility and desirability of a national lakeshore on Lake Tahoe in the States of Nevada and California, and for other purposes.

There being no objection, the Clerk read the bill as follows:

S. 2208

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in order to consider preserving appropriate segments of the lakeshore of Lake Tahoe and adjoining lands and waters in their natural condition for public outdoor recreation, the Secretary of the Interior (hereafter referred to as the "Secretary") shall study, investigate, and formulate recommendations on the feasibility and desirability of establishing such areas as a national lakeshore. The Secretary shall consult with the Secretary of Agriculture; the Chief of Engineers, Department of the Army; and any other interested Federal agencies, as well as the Tahoe Regional Planning Agency and other State and local bodies and officials involved; and shall coordinate the study with applicable outdoor recreation plans, pollution control plans, highway plans, and other planning activities relating to the Lake Tahoe Basin. Federal departments and agencies are authorized and directed to cooperate with the Secretary and, to the extent permitted by law, to furnish such statistics, data, reports, and other material as the Secretary may deem necessary for purposes of the study.

SEC. 2. The Secretary shall submit to the Congress, within one year after the date of this Act, a report of his findings and recommendations. The report of the Secretary shall contain but not be limited to, findings with respect to—

(a) the scenic, scientific, historic, outdoor recreation, and natural values of the water, lakeshore, and related upland resources involved, including their use for driving for

pleasure, walking, hiking, riding, bicycling, boating, swimming, picnicking, camping, forest management, fish and wildlife management, scenic and historic site preservation, hunting, fishing, and winter sports;

(b) the potential alternative beneficial uses of the water, lakeshore, and related upland resources involved, taking into consideration appropriate uses of the land for residential, commercial, industrial, agricultural, and transportation purposes, and for public services;

(c) the type of Federal, State, and local programs that are feasible and desirable in the public interest to preserve, develop, and make accessible for public use the values identified;

(d) the relationship of any recommended national lakeshore to existing or proposed Federal, State, and local programs to manage in the public interest the natural resources of the entire Lake Tahoe Basin.

SEC. 3. Pending submission of the report of the Secretary to the Congress, the heads of Federal agencies having administrative jurisdiction over the Federal lands within the area referred to in section 1 of this Act shall, consistent with the purposes for which the lands were acquired or set aside by the United States and to the extent authorized by law, encourage and provide maximum opportunities for the types of recreation use of such lands referred to in section 2(a) of this Act.

SEC. 4. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

With the following committee amendments:

Page 2, line 12, strike out "Congress," and insert "President and the Congress of the United States,"

Page 3, line 7, strike out "and".

Page 3, line 11, strike out "Basin." and insert "Basin; and".

Page 3, following line 11, insert a new subsection (e) as follows:

"(e) alternative means of restoring and preserving the values inherent in the area under present ownership patterns."

Page 4, lines 1 and 2, strike out "such sums as may be necessary" and insert in lieu thereof "not more than $50,000".

The committee amendments were agreed to.

Mr. ASPINALL. Mr. Speaker, like H.R. 16977, which was cosponsored by Representatives WALTER BARING and HAROLD JOHNSON, S. 2208 is drafted to prompt a study of Lake Tahoe to determine the feasibility and desirability of establishing a national lakeshore on its shoreline.

As every Member of this House knows, the Secretary of the Interior has general authority to make studies of this type and the Congress seldom plays any role in determining what areas are to be studied or when. Naturally, these studies play a part in our policymaking decisions because no legislative action is appropriate until basic background information is available.

S. 2208 authorizes and directs the Secretary to conduct a specific study on the Lake Tahoe shoreline within 1 year. The spokesman for the Department of the Interior indicated that this is a reasonable period of time to collect and prepare the information needed by the Congress to determine the best possible course of action.

Mr. Speaker, there is no other method available to the Congress to establish priorities and prerequisites for these studies. Whether we authorize them specifically or not, they require some investment of public funds. The only question is whether these moneys will be used to compile information on areas which the Congress wants studied or whether they will be used to study areas which the Department wishes to have considered.

EXPLANATION OF COMMITTEE AMENDMENTS

Three substantive amendments are recommended by the committee:

The first is drafted to require the Secretary to transmit a report of his findings and recommendations to the President and the Congress simultaneously, within 1 year.

The second requires the study to include in its considerations the alternative of accomplishing the environmental objective without disrupting present ownership patterns.

The third limits the amount authorized to be appropriated to conduct the study to $50,000. It should be emphasized that this reflects the amount of money estimated to be needed by the Department.

The members of the committee feel that it is appropriate for Congress, in its wisdom, to give some guidance to the Secretary on matters such as these, from time to time. The Congress has approved study bills like S. 2208 for other areas when it felt such action warranted. In this instance, the committee feels that this study should be expedited. It is conceded that this area needs some attention. If the information suggests that a lakeshore would be desirable, then further legislative action may be taken, but until we have the basic information to make such a determination, no legislative action would be appropriate. For these reasons, I urge the enactment of S. 2208, as recommended by the Committee on Interior and Insular Affairs.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

POTOMAC VALLEY CONSERVANCY DISTRICT

The Clerk called the joint resolution (H.J. Res. 1179) granting the consent of Congress to amendments to the compact creating the Potomac Valley Conservancy District and establishing the Interstate Commission on the Potomac River Basin.

The SPEAKER pro tempore. Is there objection to the present consideration of the joint resolution?

Mr. GROSS. Mr. Speaker, reserving the right to object, I should like to ask someone what the cost of this legislation would be to the Federal Government?

Mr. JOHNSON of California. Mr. Speaker, will the gentleman yield?

Mr. GROSS. Yes; I am glad to yield to the gentleman.

Mr. JOHNSON of California. The 1940 compact imposed a $30,000 per year ceiling upon the total contribution of the four States and the District of Columbia to the support of the commission. The 1940 compact, authorized the United States, which is not a signatory party to contribute to the support of the commission, but without the monetary limitation imposed upon the signatories. Nevertheless, the amount of the U.S. contribution has been related to the amounts of the other contributions. Thus, in fiscal years 1969, 1970, and 1971 only $5,000 was appropriated each year by the Congress.

Because the $30,000 limit is no longer realistic as a total contribution for the four States and the District of Columbia the amendments simply remove the monetary ceiling on the signatory contributions. The amendments in no way affect the amounts the United States may contribute.

However, we have been assured that the amount of contribution required by Federal appropriations will not exceed $10,000.

Mr. GROSS. In other words, the gentleman is saying there is going to be a 100-percent increase in the Federal Government's contribution to this compact between Virginia, Maryland, and how many other States?

Mr. JOHNSON of California. The District of Columbia, Pennsylvania, and West Virginia.

Mr. GROSS. Why should the Federal Government be involved in this expenditure at all? Why should not the District of Columbia and the States of Virginia, Maryland, Pennsylvania, and West Virginia take care of the costs of this commission or compact?

Mr. JOHNSON of California. At the present time it relates only to pollution. Now it will apply to all water resources development of this particular river and area between the States of Virginia, Maryland, Pennsylvania, and the District of Columbia, and West Virginia. Now, I do believe that the Federal Government has a vital interest in the pollution and water resources problems, and I think that if there is no more than $10,000 spent for this participation, that that is a very small sum for the Federal Government to participate in.

Mr. GROSS. As a matter of principle why is there an increase of $5,000? Can the gentleman tell me?

Mr. JOHNSON of California. That is because they are broadening the scope of the compact here to consider all of the water resources problems, not just pollution.

Mr. HARSHA. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Ohio.

Mr. HARSHA. Mr. Speaker, as the bill now stands there is no restriction or limitation or reason in the law for the Federal Government to contribute anything. Now, as far as upping the contribution of the Federal Government to $10,000 in furtherance of pollution abatement control, and because of other increasing activities in these areas, there is a prospect that the Federal Government may increase its contribution, but it has no requirement to make the contribution.

Mr. GROSS. It does not have to make a contribution of any kind?

Mr. HARSHA. That is correct, under the existing law.

Mr. KYL. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Iowa.

Mr. KYL. My colleague, of course, understands that the Federal Government has to get involved because the very nature of the interstate compact involves the Federal Government. There are some things the States among themselves cannot do without advice and direction from the Federal Government.

It is my opinion that in compacts of this nature the Federal Government has in fact saved a great deal of money and a great deal of time, because in interstate water compacts the Federal Government could—and in most cases has—assumed the total burden of all the research and development, and so on. Here the States themselves are trying to operate together.

Mr. GROSS. That is what the gentleman from Iowa hopes, and both the gentlemen from Iowa hope, that the States will assume their share of the burden, but I do not know whether they will. The gentleman from Iowa is well aware, I am sure, that there are other compacts between States in which the Federal Government is not involved, and I know of no good reason why these four States and the District of Columbia cannot take care of financing this compact themselves.

And I might say, in addition, that we get the doubtful pleasure of paying a part of the contribution of the District of Columbia to this compact. I am fearful, as the gentleman from Iowa and other Members of the House should be, that the Federal Government's partial involvement in this compact will eventually wind up with the Federal Government carrying the big end of the load for whatever is done with respect to the Potomac River, to which these States and the District of Columbia contribute heavily to its pollution.

Mr. KYL. Mr. Speaker, if the gentleman will yield further, as this proposal is written at the present time it does not carry any obligation beyond this participation of the Federal Government. I share the concern of the gentleman about these matters, but if indeed the Federal Government is to contribute more, or if it is to become more deeply involved, it will require more and additional legislation later on. And I am sure the gentleman from Iowa will be here to protect the interests of the Federal Government.

Mr. GROSS. Of course, the gentleman from Iowa presently addressing the House has no sinecure on life I might be here today and gone tomorrow. This is the time when attention ought to be given to the commitment on down the road and into the future. I am not going to make a further issue of this, but I am fearful of what I see here.

(Mr. JOHNSON of California asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. JOHNSON of California. Mr. Speaker, House Joint Resolution 1179, which we bring to the floor today is of vital importance to the conservation of the water resources of the Potomac River Basin. The committee is unaware of any objection to this bill. House Joint Resolution 1179 would:

First, broaden the authority of the Interstate Commission on the Potomac River Basin to include water resources and associated land resources. Its present authority is restricted to water pollution abatement.

Second, allow the Interstate Commission on the Potomac River Basin to cooperate, assist, and provide liaison for and among public and nonpublic agencies in the formulation and coordination of plans and programs for the protection and development of the water and associated land resources of the Potomac River Basin.

Third, provide for the establishment of sections of the commission for the purpose of dealing with problems of pollution and of water and associated land resources in specific areas which affect two or more, but not all signatory bodies.

Fourth, eliminates a provision in the original compact which limits the total contributions of the signatories to not over $30,000 annually. Although no limitation is stated in the amendments to the compact, there is a provision which contains a formula for pro rating contributions among the States of Maryland, West Virginia, Pennsylvania, and Virginia, District of Columbia, and United States. One thing I would stress is that the amendments to the 1940 Potomac River Sanitation Compact which we have before us today should not be confused with the proposed Federal interstate compact which was developed in 1967 by the Potomac River Basin Committee. The proposed Federal interstate compact which is modeled after the existing Delaware River Basin compact is presently under review by the interested States and Federal agencies. Should the Advisory Committee's proposal be accepted by the States and the Congress at sometime in the future it would absorb the functions of the Interstate Commission on the Potomac River Basin with which House Joint Resolution 1179 is concerned.

The Interstate Commission on the Potomac River Basin was established in 1941 by a compact among the States and District of Columbia following the grant of congressional consent thereto. As it was created the concern of the Commission was limited to the abatement and prevention of water pollution, and, in fact, its authority was limited strictly to making recommendations. In order to have its recommendations accepted it had to create a climate of mutual concern and cooperation among State agencies. Through the development of public interest the Commission was of service to the respective governing bodies in furthering the necessary activities required for pollution control.

The Commission's activities have produced commendable results in the control of water pollution, particularly in the light of the constraints which were placed upon it; however, with the increasing demand of the public for the proper development in conservation of our water resources and the enhancement of our total environment, the enactment of the proposed amendments would permit the Commission to provide the necessary coordination and leadership required for the best utilization of all the resources of the Potomac River Basin.

The current trend in providing adequate control measures for water, water pollution control, and related land resources is to attack the problems of a river basin as an entity through the development of comprehensive planning. This objective would be effectively carried out on the Potomac River Basin by this legislation. Congressional consent to the proposed amendments will permit the Commission to update its activities and to cope with the problems of today and to plan for the future.

During the committee's consideration of this legislation the Department of the Interior suggested certain changes in the compact. We have been able to accommodate their recommendations by withholding approval to article II(f)(2). The interested States and the District of Columbia have advised us through the Interstate Commission on the Potomac River Basin that there is no objection to withholding of Federal consent to the provision and that the compact amendments would be effective without the need for any additional State legislation.

I wish to express my appreciation to the Chairman of the Public Works Committee, the gentleman from Maryland (Mr. FALLON) who introduced House Joint Resolution 1179, and who has been primarily responsible for bringing this legislation to the floor today; the gentleman from Minnesota (Mr. BLATNIK), the chairman of the Subcommittee on Rivers and Harbors, the Subcommittee which considered this legislation; the gentleman from Ohio (Mr. HARSHA), and the remainder of my colleagues on the Public Works Committee on both sides of the aisle who have been so helpful at all times.

(Mr. FALLON (at the request of Mr. JOHNSON of California) was granted permission to extend his remarks at this point in the RECORD.)

Mr. FALLON. Mr. Speaker, the law which created the Potomac River Conservancy District and the Interstate Commission on the Potomac River Basin was adopted by the State of Maryland and West Virginia and the Commonwealths of Pennsylvania and Virginia in 1940. During discussions preceding the development of this compact proposal, it was agreed that because of the severity of water pollution throughout the Potomac River Basin the authority of the Interstate Commission should be directed solely to alleviating this problem.

During the subsequent years this proved to be a wise decision. First efforts were directed toward determining the facts regarding pollution and toward securing the enactment of adequate States laws requiring pollution control. Recent reports indicate that 97 percent of the sewered population of the basin are now served by secondary type water pollution control plants. A similar condition exists within the industrial com-

munity. It would be difficult to find a comparable river basin with this kind of a record.

Even so we have a long way to go to secure a satisfactory water quality in the Potomac. Ever increasing populations will require treatment plants with more capacity and greater capability to remove pollutants. Sediment must be controlled as well as other pollutants such as bacteria and nutrients contained in land runoff. We are also faced with the critical need for additional water supplies in the Washington region and in other areas throughout the basin.

We have discovered that the utilization and development of water and associated land cannot be separated from pollution in today's society.

House Joint Resolution 1179, which I had the privilege of introducing, would provide congressional approval to amendments to the Potomac sanitation compact which have been adopted by the States of Maryland and West Virginia and the Commonwealths of Pennsylvania and Virginia, and would authorize the District of Columbia to enter into the amended compact.

The amendments would:

First. Broaden the authority of the Interstate Commission on the Potomac River Basin to include water resources and associated land resources. Its present authority is restricted to water pollution abatement.

Second. Allow the Interstate Commission to cooperate, assist, and provide liaison for and among public and nonpublic agencies in the formulation and coordination of plans and programs for the protection and development of the water and associated land resources of the Potomac River Basin.

Third. Allow the Commission to establish "sections" for the purpose of dealing with problems of pollution and of water and associated land resources, in specific areas which directly affect two or more signatories. No signatory may be excluded from any section. The exercise of any powers vested solely in a section must be financed through funds provided by the signatories, including the United States, participating in the section.

Fourth. The amendments drop a provision in the original compact law which limited the total contributions of the signatories to not over $30,000 annually.

These amendments to the Potomac River sanitation compact should not be confused with the proposed Federal-interstate compact which was developed in 1967 by the Potomac River Basin Advisory Committee. Should the Advisory Committee's proposal be accepted by the States and the Congress at some time in the future it would absorb and take over the functions of the present Commission. In the meantime these amendments will allow the Interstate Commission to proceed with its programs on a more adequate and satisfactory basis.

I wish to express our appreciation for the excellent work on this bill by the gentleman from Minnesota (Mr. BLATNIK), the chairman of the River and Harbor Subcommittee, the gentleman from California (Mr. JOHNSON) who is so ably managing the legislation today, the gentleman from Ohio (Mr. HARSHA), and all the members of the Committee on Public Works on both sides of the aisles who have cooperated so splendidly in bringing this legislation to the floor today.

Mr. HARSHA. Mr. Speaker, the purpose of the resolution we are considering today is to broaden the authority of the Interstate Commission on the Potomac River Basin to include water resources and associated land resources. This will be in addition to the present authority of water pollution abatement. In addition, it would allow the Interstate Commission to provide for liaison among public and nonpublic agencies, and aid the formulation and coordination of plans and programs necessary for the protection and development of water and associated land resources of the Potomac River Basin. It would do away with the limit, now in the law, on the total contributions of the signatories so that in the future it may exceed over $30,000 annually. It provides for the establishment of sections of the Commission so that problems of pollution and of water-associated land resources which affect two or more signatory bodies can be dealt with effectively.

The resolution before us would grant the consent of Congress to these changes and would result, I believe, in the strengthening of the compact's pollution abatement responsibilities as well as authorizing the Commission to contribute to and coordinate the activities of the Federal, State, local, and private agencies concerned with the Potomac River Basin.

I wish to emphasize that this does not affect the proposed Federal-State compact that has been recommended by the Potomac River Advisory Commission and is being considered by the legislatures of the States of Maryland and Virginia. Indeed, the purpose of the existing compact and the amendments is to provide an interim working organization until such time as the proposed Potomac River Basin Authority Committee makes its proposals, which in turn must be accepted by the States and the Congress. At that time, a new operating agency would be developed. This interim action will provide for time for the States to consider the proposals for the new compact and generally will serve as that steppingstone to the development of an effective Potomac River Basin control.

The SPEAKER pro tempore. Is there objection to the present consideration of the joint resolution?

There was no objection.

The Clerk read the joint resolution as follows:

H.J. RES. 1179

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the consent of Congress is hereby given, subject to the conditions set forth in section 2 of this joint resolution, to the amended compact creating the Potomac Valley Conservancy District and establishing the Interstate Commission on the Potomac River Basin which has been entered into by the States of Maryland and West Virginia, and the Commonwealths of Virginia and Pennsylvania, and the District of Columbia, which compact as amended reads as follows:

"COMPACT

"Whereas, it is recognized that abatement of existing pollution and the control of future pollution of interstate streams can best be promoted through a joint agency representing the several states located wholly or in part within the area drained by any such interstate stream; and

"Whereas, the Congress of the United States has given its consent to the States of Maryland and West Virginia, the Commonwealths of Pennsylvania and Virginia, and the District of Columbia to enter into a compact providing for the creation of a conservancy district to consist of the drainage basin of the Potomac river and the main and tributary streams therein, for 'the purpose or regulating, controlling, preventing, or otherwise rendering unobjectionable and harmless the pollution of the waters of said Potomac drainage area by sewage and industrial and other wastes'; and

"Whereas, the regulation, control, and prevention of pollution is directly affected by the quantities of water in said streams and the uses to which such water may be put, thereby requiring integration and coordination of the planning for the development and use of the water and associated land resources through cooperation with, and support and coordination of, the activities of Federal, State, local and private agencies, groups, and interests concerned with the development, utilization and conservation of the water and associated land resources of the said conservancy district;

"Now, therefore, the States of Maryland and West Virginia, the Commonwealths of Pennsylvania and Virginia, and the District of Columbia, hereinafter designated signatory bodies, do hereby create the Potomac Valley Conservancy District, hereinafter designated the Conservancy District, comprising all of the area drained by the Potomac river and its tributaries; and also, do hereby create, as an agency of each signatory body, the Interstate Commission on the Potomac River Basin, hereinafter designated the Commission, under the articles of organization as set forth below.

"ARTICLE I

"The Interstate Commission on the Potomac River Basin shall consist of three members from each signatory body and three members appointed by the President of the United States. Said Commissioners, other than those appointed by the President, shall be chosen in a manner and for the terms provided by law of the signatory body from which they are appointed and shall serve without compensation from the Commission but shall be paid by the Commission their actual expenses incurred and incident to the performance of their duties.

"(A). The Commission shall meet and organize within thirty days after the effective date of this compact, shall elect from its number a chairman and vice-chairman, shall adopt suitable bylaws, shall make, adopt and promulgate such rules and regulations as are necessary for its management and control, and shall adopt a seal.

"(B). The Commission shall appoint and, at its pleasure, remove or discharge such officers and legal, engineering, clerical, expert and other assistants as may be required to carry the provisions of this compact into effect, and shall determine their qualifications and fix their duties and compensation. Such personnel as may be employed shall be employed without regard to any civil service or other similar requirements for employees of any of the signatory bodies. The Commission may maintain one or more offices for the transaction of its business and may meet at any time or place within the area of the signatory bodies.

"(C). The Commission shall keep accurate accounts of all receipts and disbursements and shall make an annual report thereof and shall in such report set forth in detail the operations and transactions conducted by it

pursuant to this compact. The Commission, however, shall not incur any obligations for administrative or other expenses prior to the making of appropriations adequate to meet the same nor shall it in any way pledge the credit of any of the signatory bodies. Each of the signatory bodies reserves the right to make at any time an examination and audit of the accounts of the Commission.

"(D). A quorum of the Commission shall, for the transaction of business, the exercise of any powers, or the performance of any duties, consist of at least six members of the Commission who shall represent at least a majority of the signatory bodies; *Provided, however,* That no action of the Commission relating to policy or stream classification or standards shall be binding on any one of the signatory bodies unless at least two of the Commissioners from such signatory body shall vote in favor thereof.

"ARTICLE II

"The Commission shall have the power:

"(A). To collect, analyze, interpret, coordinate, tabulate, summarize and distribute technical and other data relative to, and to conduct studies, sponsor research and prepare reports on, pollution and other water problems of the Conservancy District.

"(B). To cooperate with the legislative and administrative agencies of the signatory bodies, or the equivalent thereof, and with other commissions and Federal, local governmental and non-governmental agencies, organizations, groups and persons for the purpose of promoting uniform laws, rules or regulations for the abatement and control of pollution of streams and the utilization, conservation, and development of the water and associated land resources in the said Conservancy District.

"(C). To disseminate to the public information in relation to stream pollution problems and the utilization, conservation and development of the water and associated land resources of the Conservancy District and on the aims, views, purposes, and recommendations of the Commission in relation thereto.

"(D). To cooperate with, assist, and provide liaison for and among public and non-public agencies and organizations concerned and pollution and other water problems in the formulation and coordination of plans, programs, and other activities relating to stream pollution or to the utilization, conservation, or development of water or associated land resources, and to sponsor cooperative action in connection with the foregoing.

"(E). In its discretion and at any time during or after the formulation thereof, to review and to comment upon any plan or program of any public or private agency or organization relating to stream pollution or the utilization, conservation, or development of water or associated land resources.

"(F) (1). To make and, if needful from time to time, revise and to recommend to the signatory bodies, reasonable minimum standards for the treatment of sewage and industrial or other wastes now discharged or to be discharged in the future to the streams of the Conservancy District, and also for cleanliness of the various streams in the Conservancy District.

"(2). To establish reasonable physical, chemical and bacteriological standards of water quality satisfactory for various classifications of use. It is agreed that each of the signatory bodies through appropriate agencies will prepare a classification of its interstate waters in the District in entirety or by portions according to present and proposed highest use, and for this purpose technical experts employed by appropriate state water pollution control agencies are authorized to confer on questions relating to classification of interstate water affecting two or more states. Each signatory body agrees to submit its classification of its interstate waters to the Commission with its recommendations thereon.

"The Commission shall review such classification and recommendations and accept or return the same with its comments. In the event of return, the signatory body will consider the comments of the Commission and resubmit the classification proposal, with or without amendment, with any additional comments for further action by the Commission.

"It is agreed that after acceptance of such classification, the signatory body through its appropriate state water pollution control agencies will work to establish programs of treatment of sewage and industrial wastes which will meet or exceed standards established by the Commission for classified waters. The Commission may from time to time make such changes in definitions of classifications and in standards as may be required by changed conditions or as may be necessary for uniformity and in a manner similar to that in which these standards and classifications were originally established.

"It is recognized, owing to such variable factors as location, size, character and flow and the many varied uses of the waters subject to the terms of this compact, that no single standard of sewage and waste treatment and no single standard of quality of receiving waters is practical and that the degree of treatment of sewage and industrial wastes should take into account the classification of the receiving waters according to present and proposed highest use, such as for drinking water supply, bathing and other recreational purposes, maintenance and propagation of fish life, industrial and agricultural uses, navigation and disposal of wastes.

"ARTICLE III

"For the purpose of dealing with the problems of pollution and of water and associated land resources in specific areas which directly affect two or more, but not all, signatory bodies, the Commission may establish Sections of the Commission consisting of the Commissioners from such affected signatory bodies, *Provided, however,* That no signatory body may be excluded from any Section in which it wishes to participate. The Commissioners appointed by the President of the United States may participate in any Section. The Commission shall designate, and from time to time may change, the geographical area with respect to which each Section shall function. Each Section shall, to such extent as the Commission may from time to time authorize, have authority to exercise and perform with respect to its designated geographical area any power or function vested in the Commission, and in addition may exercise such other powers and perform such functions as may be vested in such Section by the laws of any signatory body or by the laws of the United States. The exercise or performance by a Section of any power or function vested in the Commission may be financed by the Commission, but the exercise or performance of powers or functions vested solely in a Section shall be financed through funds provided in advance by the bodies, including the United States, participating in such Section.

"ARTICLE IV

"The moneys necessary to finance the Commission in the administration of its business in the Conservancy District shall be provided through appropriations from the signatory bodies and the United States, in the manner prescribed by the laws of the several signatory bodies and of the United States, and in amounts as follows:

"The pro rata contribution shall be based on such factors as population; the amount of industrial and domestic pollution; and a flat service charge; as shall be determined from time to time by the Commission, subject, however, to the approval, ratification, and appropriation of such contribution by the several signatory bodies.

"ARTICLE V

"Pursuant to the aims and purposes of this compact, the signatory bodies mutually agree:

"1. Faithful cooperation in the abatement of existing pollution and the prevention of future pollution in the streams of the Conservancy District and in planning for the utilization, conservation, and development of the water and associated land resources thereof.

"2. The enactment of adequate and, insofar as is practicable, uniform legislation for the abatement and control of pollution and control and use of such streams.

"3. The appropriation of biennial sums on the proportionate basis as set forth in Article IV.

"ARTICLE VI

"This compact shall become effective immediately after it shall have been ratified by the majority of the legislature of the States of Maryland and West Virginia, the Commonwealths of Pennsylvania and Virginia, and by the Commissioner of the District of Columbia, and approval by the Congress of the United States; *Provided, however,* That this compact shall not be effective as to any signatory body until ratified thereby.

"ARTICLE VII

"Any signatory body may, by legislative act, after one year's notice to the Commission, withdraw from this compact."

SEC. 2. (a) The consent granted by this joint resolution does not extend to any of the four paragraphs making up article II (F) (2) of the amended compact.

(b) Nothing contained in the amended compact set forth in this joint resolution shall be construed as impairing or in any manner affecting any right or jurisdiction of the United States in and over the region which forms the subject of this compact.

SEC. 3. The Commissioner of the District of Columbia is authorized, on behalf of the District of Columbia, to enter into the amended compact set forth in this joint resolution.

SEC. 4. The right to alter, amend, or repeal this joint resolution is hereby expressly reserved.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. JOHNSON of California. Mr. Speaker, I ask unanimous consent for the immediate consideration of a similar Senate joint resolution (S.J. Res. 67) granting the consent of Congress to the States of Maryland and West Virginia and the Commonwealths of Virginia and Pennsylvania and the District of Columbia, as signatory bodies, for certain amendments to the compact creating the Potomac Valley Conservancy District and establishing the Interstate Commission on the Potomac River Basin.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. GROSS. Mr. Speaker, reserving the right to object, is this the same bill in its provisions which the gentleman seeks to substitute?

Mr. JOHNSON of California. Yes, this

is substantially the same bill with a minor change.

Mr. GROSS. With a minor change in the bill, did the gentleman say?

Mr. JOHNSON of California. There is no substantive change. The differences in the two versions are solely limited to the drafting foremat.

Mr. GROSS. It does not increase the obligation on the part of the Federal Government for this compact; does it?

Mr. JOHNSON of California. No, it does not. I might say to the gentleman from Iowa, I do not think there is any interstate compact involving interstate rivers where the Federal Government is not involved and has a responsibility. But in this bill, it does not increase that responsibility with respect to the Federal appropriations that we spoke about.

Mr. GROSS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California (Mr. JOHNSON)?

There was no objection.

The Clerk read the Senate joint resolution as follows:

S.J. RES. 67

Joint resolution granting the consent of Congress to the States of Maryland and West Virginia and the Commonwealths of Virginia and Pennsylvania and the District of Columbia, as signatory bodies, for certain amendments to the compact creating the Potomac Valley Conservancy District and establishing the Interstate Commission on the Potomac River Basin

Whereas, by Public Resolution Numbered 93, Seventy-sixth Congress, third session, approved July 11, 1940 (54 Stat. 748), Congress granted consent to the States of Maryland and West Virginia and the Commonwealths of Virginia and Pennsylvania and the District of Columbia, hereinafter designated signatory bodies, to enter into a compact for the creation of a Potomac Valley Conservancy District and the establishment of the Interstate Commission on the Potomac River Basin; and

Whereas, all said signatory bodies have entered into said compact; and

Whereas, all the said signatory bodies have adopted identical proposed amendments to said compact, for which they seek the consent of Congress, by virtue of which amendments said compact will read as follows:

"COMPACT

"Whereas, it is recognized that abatement of existing pollution and the control of future pollution of interstate streams can best be promoted through a joint agency representing the several states located wholly or in part within the area drained by any such interstate stream; and

"Whereas the Congress of the United States has given its consent to the States of Maryland and West Virginia, the Commonwealth of Pennsylvania and Virginia, and the District of Columbia to enter into a compact providing for the creation of a conservancy district to consist of the drainage basin of the Potomac river and the main and tributary streams therein, for 'the purpose of regulating, controlling, providing, or otherwise rendering unobjectionable and harmless the pollution of the waters of said Potomac drainage area by sewage and industrial and other wastes'; and

"Whereas, the regulation, control and prevention of pollution is directly affected by the quantities of water in said streams and the uses to which such water may be put, thereby requiring integration and coordination of the planning for the development and use of the water and associated land resources through cooperation with, and support and coordination of, the activities of Federal, State, local and private agencies, groups, and interests concerned with the development, utilization and conservation of the water and associated land resources of the said conservancy district;

"Now, therefore, the States of Maryland and West Virginia, the Commonwealths of Pennsylvania and Virginia, and the District of Columbia, hereinfater designated signatory bodies, do hereby create the Potomac Valley Conservancy District, hereinafter designated the Conservancy District, comprising all of the area drained by the Potomac River and its tributaries; and also, do hereby create, as an agency of each signatory body, the Interstate Commission on the Potomac River Basin, hereinafter designated the Commission, under the articles of organization as set forth below.

"ARTICLE I

"The Interstate Commission on the Potomac River Basin shall consist of three members from each signatory body and three members appointed by the President of the United States. Said Commissioners, other than those appointed by the President, shall be chosen in a manner and for the terms provided by law of the signatory body from which they are appointed and shall serve without compensation from the Commission but shall be paid by the Commission their actual expenses incurred and incident to the performance of their duties.

"(A). The Commission shall meet and organize within thirty days after the effective date of this compact, shall elect from its number a chairman and vice-chairman, shall adopt suitable bylaws, shall make, adopt and promulgate such rules and regulations as are necessary for its management and control, and shall adopt a seal.

"(B). The Commission shall appoint and, at its pleasure, remove or discharge such officers and legal, engineering, clerical, expert and other assistants as may be required to carry the provisions of this compact into effect, and shall determine their qualifications and fix their duties and compensation. Such personnel as may be employed shall be employed without regard to any civil service or other similar requirements for employees of any of the signatory bodies. The Commission may maintain one or more offices for the transaction of its business and may meet at any time or place within the area of the signatory bodies.

"(C). The Commission shall keep accurate accounts of all receipts and disbursements and shall make an annual report thereof and shall in such report set forth in detail the operations and transactions conducted by it pursuant to this compact. The Commission, however, shall not incur any obligations for administrative or other expenses prior to the making of appropriations adequate to meet the same nor shall it in any way pledge the credit of any of the signatory bodies. Each of the signatory bodies reserves the right to make at any time an examination and audit of the accounts of the Commission.

"(D). A quorum of the Commission shall, for the transaction of business, the exercise of any powers, or the performance of any duties, consist of at least six members of the Commission who shall represent at least a majority of the signatory bodies: *Provided, however*, That no action of the Commission relating to policy or stream classification or standards shall be binding on any one of the signatory bodies unless at least two of the Commissioners from such signatory body shall vote in favor thereof.

"ARTICLE II

"The Commission shall have the power:

"(A). To collect, analyze, interpret, coordinate, tabulate, summarize and distribute technical and other data relative to, and to conduct studies, sponsor research and prepare reports on, pollution and other water problems of the Conservancy District.

"(B). To cooperate with the legislative and administrative agencies of the signatory bodies, or the equivalent thereof, and with other commissions and Federal, local governmental and non-governmental agencies, organizations, groups and persons for the purpose of promoting uniform laws, rules or regulations for the abatement and control of pollution of streams and the utilization, conservation and development of the water and associated land resources in the said Conservancy District.

"(C). To disseminate to the public information in relation to stream pollution problems and the utilization, conservation and development of the water and associated land resources of the Conservancy District and on the aims, views, purposes and recommendations of the Commission in relation thereto.

"(D). To cooperate with, assist, and provide liaison for and among, public and nonpublic agencies and organizations concerned with pollution and other water problems in the formulation and coordination of plans, programs and other activities relating to stream pollution or to the utilization, conservation or development of water or associated land resources, and to sponsor cooperative action in connection with the foregoing.

"(E). In its discretion and at any time during or after the formulation thereof, to review and to comment upon any plan or program of any public or private agency or organization relating to stream pollution or the utilization, conservation or development of water or associated land resources.

"(F)(1). To make, and, if needful from time to time, revise and to recommend to the signatory bodies, reasonable minimum standards for the treatment of sewage and industrial or other wastes now discharged or to be discharged in the future to the streams of the Conservancy District, and also for cleanliness of the various streams in the Conservancy District.

"(2). To establish reasonable physical, chemical and bacteriological standards of water quality satisfactory for various classifications of use. It is agreed that each of the signatory bodies through appropriate agencies will prepare a classification of its interstate waters in the District in entirety or by portions according to present and proposed highest use, and for this purpose technical experts employed by appropriate state water pollution control agencies are authorized to confer on questions relating to classification of interstate waters affecting two or more states. Each signatory body agrees to submit its classification of its interstate waters to the Commission with its recommendations thereon.

"The Commission shall review such classification and recommendations and accept or return the same with its comments. In the event of return, the signatory body will consider the comments of the Commission and resubmit the classification proposal, with or without amendment, with any additional comments for further action by the Commission.

"It is agreed that after acceptance of such classification, the signatory body through its appropriate State water pollution control agencies will work to establish programs of treatment of sewage and industrial wastes which will meet or exceed standards established by the Commission for classified waters. The Commission may from time to time make such changes in definitions of classifications and in standards as may be required by changed conditions or as may be necessary for uniformity and in a manner similar to that in which these standards and classifications were originally established.

"It is recognized, owing to such variable factors as location, size, character and flow and the many varied uses of the waters subject to the terms of this compact, that no single standard of sewage and waste treatment and no single standard of quality of receiving waters is practical and that the degree of treatment of sewage and industrial wastes should take into account the classification of the receiving waters according to present and proposed highest use, such as for drinking water supply, bathing and other recreational purposes, maintenance and propagation of fish life, industrial and agricultural uses, navigation and disposal of wastes.

"ARTICLE III

"For the purpose of dealing with the problems of pollution and of water and associated land resources in specific areas which directly affect two or more, but not all, signatory bodies, the Commission may establish Sections of the Commission consisting of the Commissioners from such affecting signatory bodies: *Provided, however,* That no signatory body may be excluded from any section in which it wishes to participate. The Commissioners appointed by the President of the United States may participate in any section. The Commission shall designate, and from time to time may change, the geographical area with respect to which each section shall function. Each section shall, to such extent as the Commission may from time to time authorize have authority to exercise and perform with respect to its designated geographical area any power or function vested in the Commission, and in addition may exercise such other powers and perform such functions as may be vested in such section by the laws of any signatory body or by the laws of the United States. The exercise or performance by a section of any power or function vested in the Commission may be financed by the Commission, but the exercise or performance of powers or functions vested solely in a section shall be financed through funds provided in advance by the bodies, including the United States, participating in such section.

"ARTICLE IV

"The moneys necessary to finance the Commission in the administration of its business in the Conservancy District shall be provided through appropriations from the signatory bodies and the United States, in the manner prescribed by the laws of the several signatory bodies and of the United States, and in amounts as follows:

"The pro rata contributions shall be based on such factors as population; the amount of industrial and domestic pollution; and a flat service charge; as shall be determined from time to time by the Commission, subject, however, to the approval, ratification and appropriation of such contribution by the several signatory bodies.

"ARTICLE V

"Pursuant to the aims and purposes of this compact, the signatory bodies mutually agree:

"1. Faithful cooperation in the abatement of existing pollution and the prevention of future pollution in the streams of the Conservancy District and in planning for the utilization, conservation and development of the water and associated land resources thereof.

"2. The enactment of adequate and, insofar as is practicable, uniform legislation for the abatement and control of pollution and control and use of such streams.

"3. The appropriation of biennial sums on the proportionate basis as set forth in Article IV.

"ARTICLE VI

"This compact shall become effective immediately after it shall have been ratified by the majority of the legislature of the States of Maryland and West Virginia, the Commonwealths of Pennsylvania and Virginia, and by the Commissioner of the District of Columbia, and approval by the Congress of the United States: *Provided, however,* That this compact shall not be effective as to any signatory body until ratified thereby.

"ARTICLE VII

"Any signatory body may, by legislative act, after one year's notice to the Commission, withdraw from this compact."

Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the consent of Congress is hereby given to the States of Maryland and West Virginia and the Commonwealths of Virginia and Pennsylvania and the District of Columbia to adopt the aforementioned amendments and enter into the amended compact hereinbefore recited and every part and article thereof: *Provided,* That nothing contained in such amended compact shall be construed as impairing or in any manner affecting any right or jurisdiction of the United States in and over the region which forms the subject of this compact: *And provided further,* That the consent herein given does not extend to section (F) (2) of article II of the amended compact.

SEC. 2. The Commissioner of the District of Columbia is authorized to enter into, on behalf of the District of Columbia, the amended compact hereinbefore recited.

SEC. 3. The right to alter, amend, or repeal this joint resolution is hereby expressly reserved.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar joint resolution H.J. Res. 1179, was laid on the table.

PROVIDING FOR CONGRESSIONAL RECOGNITION OF THE GODDARD ROCKET AND SPACE MUSEUM

The Clerk called the Senate concurrent resolution (S. Con. Res. 49) providing for congressional recognition of the Goddard Rocket and Space Museum.

There being no objection, the Clerk read the Senate concurrent resolution as follows:

S. CON. RES. 49

Resolved by the Senate (the House of Representatives concurring), That the Congress hereby recognizes the Goddard Rocket and Space Museum of the Roswell Museum and Art Center, Roswell, New Mexico, as a fitting memorial to Doctor Robert H. Goddard, who pioneered in rocket experimentation and contributed to America's success in landing men on the moon, and who is known as the "Father of the Rocket", and as an appropriate and outstanding institution for the collection, preservation, and display of the works and memorabilia of Doctor Goddard.

Mr. FULTON of Pennsylvania. Mr. Speaker, as ranking minority member of the House Science and Astronautics Committee, and member of the Manned Space Flight Subcommittee, I strongly urge the Members of the House of Representatives support Senate Concurrent Resolution 49. This resolution provides for congressional recognition of the Goddard Rocket and Space Museum of the Roswell Museum and Art Center, of Roswell, N. Mex.

Dr. Robert H. Goddard was an outstanding, world famed U.S. scientist. His dedication and determination in the field of rocketry have been largely responsible for mankind's ability to reach outer space. Dr. Goddard's vision and efforts in rocketry and space flight often were ridiculed. His ability to foresee the future of science, technology, and space flight urged him on to the development of the basic launching systems which the United States uses even today.

Much of Dr. Goddard's work on liquid rocket development was done on the high plateau near Roswell, N. Mex. In 1945, shortly after Dr. Goddard's death, his launching tower was moved to the grounds of the Art Center and Museum in Roswell. Other contributions have been made over the years, such as rocket parts and photographic murals. Most recently, a reconstruction of the Goddard workshop and a new Goddard planetarium have been constructed. Funds from the Daniel and Florence Guggenheim Foundation have assisted in building a special wing in which to house the Goddard collection at Roswell.

On April 25, 1959, the Robert H. Goddard Rocket and Space Museum was dedicated by Dr. Wernher von Braun. This outstanding collection at Roswell represents our country's early efforts in rocketry and especially the efforts and dedicated work of Dr. Robert H. Goddard. This history of determination, research and development in rocketry, space, and propulsion are a part of our great American heritage. We in Congress should recognize the high ability and dedication of Dr. Robert H. Goddard in placing U.S. technology first in rocketry, foremost in space, and first in the successful landing of not one but two fine teams of astronauts, the Apollo 11 crew and the Apollo 12 crew, on the lunar surface and returning them safely.

Dr. Goddard, had he lived, would have been thrilled as any U.S. citizen with this accomplishment, as well as the space rescue of the Apollo 13 crew, which was achieved through the high competence and cooperation of ground mission control and the Apollo 13 astronauts themselves.

My compliments to the people of Roswell and the State of New Mexico as well as to the Guggenheim Foundation on their good work in preserving our space program and this goodly heritage for the present American generation and for all future generations.

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

PROVIDING FOR DISPOSITION OF FUNDS APPROPRIATED TO PAY JUDGMENTS IN FAVOR OF THE SAC AND FOX INDIANS

The Clerk called the bill (H.R. 11771) to provide for the disposition of funds appropriated to pay judgments in favor of the Sac and Fox Indians, and for other purposes.

Mr. STEED. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

Mr. HALEY. Mr. Speaker, reserving the right to object, may I ask the gentleman from Oklahoma if the only thing involved in this bill is the difference be-

tween the two tribes as to the percentage of the amount that each tribe should receive under a judgment awarded by the Indian Claims Commission; is that correct?

Mr. STEED. That is correct. My purpose in asking that it be passed over without prejudice is to give the Oklahoma tribe a little more time to consider the matter before the House acts on it.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma (Mr. STEED)?

There was no objection.

PROVIDING FOR DISPOSITION OF FUNDS APPROPRIATED TO PAY A JUDGMENT IN FAVOR OF THE CHEMEHUEVI TRIBE OF INDIANS

The Clerk called the bill (H.R. 14396) to provide for the disposition of funds appropriated to pay a judgment in favor of the Chemehuevi Tribe of Indians.

There being no objection, the Clerk read the bill as follows:

H.R. 14396

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the funds on deposit in the Treasury of the United States to the credit of the Chemehuevi Tribe of Indians which were appropriated (by the Act entitled "An Act making supplemental appropriations for the fiscal year ending June 30, 1965, and for other purposes", approved April 30, 1965 (79 Stat. 81)) to pay the judgment awarded by the Indian Claims Commission (dockets numbered 351 and 351–A), together with interest thereon, shall be distributed by the Secretary of the Interior (hereafter in this Act referred to as "Secretary") in equal shares to those persons whose names appear on the roll prepared in accordance with section 2 of this Act.

SEC. 2. (a) (1) The Secretary shall prepare a roll of all persons—

(A) who were born on or prior to and living on the date of enactment of this Act;

(B) who are lineal descendants of members of the Chemehuevi Tribe as it existed in 1860; and

(C) whose name or the name of a lineal ancestor appears as a Chemehuevi Indian on any available census roll or other record or evidence acceptable to the Secretary.

(2) Applications for enrollment must be filed in the manner and within the time limits prescribed by the Secretary for that purpose.

(b) Any person who has applied for and has been determined as eligible to share in the awards granted by the Indian Claims Commission in dockets numbered 88, 330, and 330–A, to the Southern Paiute Indian Nation or in dockets numbered 31, 33, 37, 80, 80–D, 176, 215, and 347, to "Certain Indians of California" shall not be entitled to share in the awards granted under this Act.

SEC. 3. (a) The Secretary shall distribute a share payable to a living enrollee directly to such enrollee. The Secretary shall distribute the per capita share of a deceased enrollee to his heirs or legatees upon proof of death and inheritance satisfactory to the Secretary. Sums payable to enrollees or their heirs or legatees who are less than twenty-one years of age or who are under a legal disability shall be paid in accordance with such procedures, including the establishment of trusts, as the Secretary determines to be appropriate to protect their best interests.

(b) Any individual aggrieved by a determination of the Secretary under this Act shall be given an opportunity to be heard upon reasonable notice in accordance with the provisions of chapter 5 of title 5, United States Code. Unless such individual otherwise agrees, the hearing shall be held in the State of California within sixty days of the date of notice. An individual aggrieved by the decision rendered after such hearing shall be entitled to judicial review of such decision in accordance with sections 701–706 of title 5, United States Code.

SEC. 4. No part of any funds distributed under this Act shall be subject to Federal or State income taxes or any lien, debt, or attorney fees.

SEC. 5. The roll prepared by the Secretary of the Interior pursuant to this Act shall not be deemed to constitute the membership roll of the Chemehuevi Tribe.

With the following committee amendments:

Page 2, line 16, add a new sentence reading as follows: "The determination of the Secretary regarding the utilization of available rolls and records and eligibility for enrollment of an applicant shall be final."

Page 2, line 21, after "31," strike out "33," and after "215," insert "333,".

Page 2, line 24, strike out "(a)".

Page 3, lines 9 through 18, strike out all of subsection (b).

Page 3, lines 20 and 21, strike out "taxes or any lien, debt, or attorney fees." and insert "taxes."

Page 3, following line 24, insert a new section 6 as follows:

"SEC. 6. The Secretary may make appropriate withdrawals from the judgment fund and interest thereon, using interest funds first, to pay costs incident to carrying out the provisions of this Act."

The committee amendments were agreed to.

The bill was ordered to be read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

Mr. ASPINALL. Mr. Speaker, I ask unanimous consent for the present consideration of Senate bill S. 4033, an identical bill to the House bill, as amended.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

There was no objection.

S. 4033

An act to provide for the disposition of funds appropriated to pay a judgment in favor of the Chemehuevi Tribe of Indians

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the funds on deposit in the Treasury of the United States to the credit of the Chemehuevi Tribe of Indians which were appropriated (by the Act entitled "An Act making supplemental appropriations for the fiscal year ending June 30, 1965, and for other purposes", approved April 30, 1965 (79 Stat. 81)), to pay the judgment awarded by the Indian Claims Commission (dockets numbered 351 and 351–A), together with interest thereon, shall be distributed by the Secretary of the Interior (hereafter in this Act referred to as "Secretary") in equal shares to those persons whose names appear on the roll prepared in accordance with section 2 of this Act.

SEC. 2. (a) (1) The Secretary shall prepare a roll of all persons—

(A) who were born on or prior to and living on the date of enactment of this Act;

(B) who are lineal descendants of members of the Chemehuevi Tribe as it existed in 1860; and

(C) whose name or the name of a lineal ancestor appears as a Chemehuevi Indian on any available census roll or other record or evidence acceptable to the Secretary.

(2) Applications for enrollment must be filed in the manner and within the time limits prescribed by the Secretary for that purpose. The determination of the Secretary regarding the utilization of available rolls or records and the eligibility for enrollment of an applicant shall be final.

(b) Any person who has applied for and has been determined as eligible to share in the awards granted by the Indian Claims Commission in dockets numbered 88, 330, and 330–A, to the Southern Paiute Indian Nation or in dockets numbered 31, 37, 80, 80–D, 176, 215, 333, and 347, to "Certain Indians of California" shall not be entitled to share in the awards granted under this Act.

SEC. 3. The Secretary shall distribute a share payable to a living enrollee directly to such enrollee. The Secretary shall distribute the per capita share of a deceased enrollee to his heirs or legatees upon proof of death and inheritance satisfactory to the Secretary. Sums payable to enrollees or their heirs or legatees who are less than twenty-one years of age or who are under a legal disability shall be paid in accordance with such procedures, including the establishment of trusts, as the Secretary determines to be appropriate to protect their best interests.

SEC. 4. No part of any funds distributed under this Act shall be subject to Federal or State income taxes.

SEC. 5. The roll prepared by the Secretary of the Interior pursuant to this Act shall not be deemed to constitute the membership roll of the Chemehuevi Tribe.

SEC. 6. The Secretary may make appropriate withdrawals from the judgment funds and interest thereon, using interest funds first, to pay costs incident to carrying out the provisions of this Act.

The Senate bill was ordered to be read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 14396) was laid on the table.

(Mr. ASPINALL asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. ASPINALL. Mr. Speaker, the purpose of S. 4033 is to authorize the use of a judgment against the United States recovered by the Chemehuevi Tribe of Indians in Indian Claims Commission Dockets Nos. 351 and 351–A. The net amount available is $1,064,844.41.

The money has been appropriated and invested temporarily in interest-bearing securities. The Indians may not use the money, however, until Congress has approved their plans.

The tribe has not existed as an organized entity for many years. The lineal descendants of the original tribe are scattered. Many of them are enrolled at the Colorado River Indian Reservation, but none of them live on the Chemehuevi Reservation. The latter was established in 1907 by Executive action. It now consists of 28,223 acres of land that are uninhabited but have potential recreation value.

The Department of the Interior estimates that the living lineal descendants eligible for enrollment will number 1,300 to 1,400. The bill provides for a per capita distribution of the entire judgment to the enrollees. Under the circumstances involved here no other use of the money is feasible. Although some of the Chemehuevis are attempting to organize the

tribe and establish a tribal government, it is clear that not all of the Chemehuevis will join the new organization and that the new organization will not be the successor of the aboriginal tribe.

(Mr. PETTIS asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. PETTIS. Mr. Speaker, I am delighted that the chairman of the Interior Committee, the gentleman from Colorado (Mr. ASPINALL) has supported my bill H.R. 14396 from the time I first introduced it until this day. And on behalf of the Chemehuevi Indians I thank my colleagues in both the House and the Senate for bringing equity and justice to this very deserving tribe at this time.

PROVIDING FOR THE DISPOSITION OF FUNDS APPROPRIATED TO PAY JUDGMENTS IN FAVOR OF THE YAKIMA TRIBES

The Clerk called the bill (H.R. 15469) to provide for the disposition of funds appropriated to pay judgments in favor of the Yakima Tribes in Indian Claims Commission dockets numbered 47–A, 162, and consolidated 47 and 164, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

Mr. ASPINALL. Mr. Speaker, I ask unanimous consent that a similar Senate bill, S. 3337, be considered in lieu of the House bill, H.R. 15469. In explanation thereof, I will state they are identical bills.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There being no objection, the Clerk read the Senate bill as follows:

S. 3337

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the funds appropriated by the Act of October 31, 1965 (79 Stat. 1133, 1152), to pay judgments to the Yakima Tribes of the Yakima Reservation in Indian Claims Commission dockets numbered 47–A and 162, and by the Act of July 22, 1969 (83 Stat. 49), in consolidated dockets 47 and 164, together with interests thereon, after payment of attorney fees and litigation expenses, may be advanced, expended, invested, or reinvested for any purpose that is authorized by the tribal governing body and approved by the Secretary of the Interior.

SEC. 2. Any part of such funds that may be distributed per capita under the provisions of this Act shall not be subject to Federal or State income tax; and any per capita share payable to a person under twenty-one years of age or to a person under legal disability shall be paid in accordance with such procedures, including the establishment of trusts, as the Secretary determines will adequately protect the best interest of such persons.

(Mr. ASPINALL asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. ASPINALL. Mr. Speaker, the purpose of S. 3337 is to authorize the use of a judgment recovered against the United States by the Yakima Tribes in Indian Claims Commission dockets No. 47–A, 162, and consolidated dockets 47 and 164. The net amount available, including accumulated interest, is $2,119,370.

The money has been appropriated and most of it has been invested temporarily in certificates of deposit. The Indians may not use the money, however, until Congress has approved their plans.

The tribes have an enrolled membership of 5,748 persons. About 3,850 of them live on the reservation. The others live away from the reservation.

The tribes propose to invest $250,000 and use the revenues for an additional educational fund. The remainder will be used to make a $300 per capita payment to each member of the tribes.

The tribal income from reservation resources has been increasing steadily each year, and in fiscal year 1970 it amounted to $5,435,000. From this income the tribes make an annual per capita distribution of $250 to each member, which takes about $1,467,000. This leaves a substantial sum each year which goes into a variety of reservation programs and into a cash reserve. In view of these plans for development of reservation resources with current income, the tribes want to use most of the present judgments to supplement the annual per capita payments.

The Southern Ute Tribe proposes to invest its funds until a specific program for their use has been developed.

The Department of the Interior has agreed that secretarial approval for the use of the funds will not be given until more detailed plans are submitted for approval by this committee.

These three tribes have made good use of other judgment money received in the past.

(Mrs. MAY asked and was given permission to extend her remarks at this point in the RECORD.)

Mrs. MAY. Mr. Speaker, as sponsor of H.R. 15469, the House bill providing for disposition of the appropriated funds to pay judgments in favor of the Yakima Tribes of Indians, I am pleased this bill is before the House today, and I urge passage.

This bill is noncontroversial, providing for the procedures to be followed in the award of Indian Claims Commission judgments to the Yakimas. The claims involved settlements in connection with erroneous interpretations of the land descriptions under the 1855 treaty.

I might say that the funds, $2,210,991.40, were previously appropriated and this bill, therefore, does not provide for the expenditure of additonal funds.

It is commendable of both the Yakima Tribal Council and the Yakima General Council that they plan to retain from the judgment funds $250,000 to be invested as an educational fund. These funds are to be invested and the interest will be utilized annually in support of the Tribe's education programs.

The remainder of $2,100,000 in consolidated dockets covered by the legislation will be paid prorata to the tribal membership, at $300 per capita. I have been advised that many of the Yakimas who have school-age children, have been counting on this distribution of the funds to help them get their youngsters ready for school this fall. House passage of the bill at this time, is welcome news to these parents, especially.

It was my pleasure to introduce this measure at the request of the Yakimas and it is my pleasure today to urge its adoption.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 15469) was laid on the table.

CONVEYING CERTAIN FEDERALLY OWNED LAND TO THE CHEROKEE TRIBE OF OKLAHOMA

The Clerk called the bill (H.R. 15624) to convey certain federally owned land to the Cherokee Tribe of Oklahoma.

There being no objection, the Clerk read the bill as follows:

H.R. 15624

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That upon payment by the Cherokee Tribe of Oklahoma, as provided in section 2 of this Act, all the right, title, and interest of the United States in that part of the northwest quarter lying south of United States Highway Numbered 62, section 20, township 16 north, range 22 east, Indian meridian, Oklahoma, comprising 38.5 acres more or less, heretofore acquired for school purposes, shall vest in the Cherokee Indian Tribe of Oklahoma, and such land shall not be subject to any exemption from taxation, or restrictions on use, management, or disposition because of Indian ownership.

SEC. 2. In full consideration for the transfer of title, the Cherokee Tribe of Oklahoma shall pay the United States $2,258.80, payment to be made to the Secretary of the Interior within ninety days after this Act is approved and deposited in the general fund of the United States Treasury.

With the following committee amendment:

Page 2, following line 7, insert a new section 3 reading as follows:

"SEC. 3. The Indian Claims Commission is directed to determine in accordance with the provisions of the Act of August 13, 1946 (60 Stat. 1050), the extent to which the value of the title conveyed by this Act as of August 20, 1964, less the payment of $2,258.80 as provided in section 2, should or should not be set off against any claim against the United States determined by the Commission."

The committee amendment was agreed to.

(Mr. ASPINALL asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. ASPINALL. Mr. Speaker.

The purpose of H.R. 15624 is to sell to the Cherokee Tribe of Oklahoma 38.5 acres of land for $2,258.80, which is the amount paid by the United States when it bought the property. The property is a part of a 93-acre tract that was purchased by the Government in 1935 for an Indian school farm. The school farm has been discontinued, and the property is excess to the needs of the Bureau of Indian Affairs.

Forty acres of the original 93 acres were conveyed to the tribe by the Act of August 20, 1964 (78 Stat. 559), without consideration, and the land has been developed by the tribe for industrial uses.

The 38.5 acres covered by this bill are needed by the tribe to continue this development. Developments already completed include a restaurant, arts and crafts shop, service station, warehouse, office building, and indstrial building. Further developments contemplated include a motel, expansion of the industrial building, retail shopping area, and various tourist oriented projects. This industrial program should contribute significantly to Indian employment and an improved standard of living.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PROVIDING FOR THE DISPOSITION OF FUNDS APPROPRIATED TO PAY A JUDGMENT IN FAVOR OF THE CONFEDERATED BANDS OF UTE INDIANS AND OTHERS

The Clerk called the bill (H.R. 16833) to provide for the disposition of funds appropriated to pay a judgment in favor of the Confederated Bands of Ute Indians in Court of Claims case 47567, and a judgment in favor of the Ute Tribe of the Uintah and Ouray Reservation for and on behalf of the Uncompahgre Band of Ute Indians in Indian Claims Commission docket numbered 349, and for other purposes.

There being no objection, the Clerk read the bill as follows:

H.R. 16833

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the unexpended balance of funds on deposit in the Treasury to the credit of the Confederated Bands of Ute Indians appropriated by the Act of May 13, 1966 (80 Stat. 141), pursuant to the final judgment entered in Court of Claims case numbered 47567; and the funds on deposit to the credit of the Ute Tribe of the Unitah and Ouray Reservation, for and on behalf of the Uncompahgre Band of Ute Indians, that were appropriated by the Act of April 30, 1965 (79 Stat. 81), to pay a judgment by the Indian Claims Commission in docket numbered 349; and the interest thereon, less attorney fees and litigation expenses, shall be available for use by the respective tribes in accordance with the Act of August 21, 1951 (65 Stat. 193; 25 U.S.C. 672), the Act of August 12, 1953, (67 Stat. 540; 25 U.S.C. 674), the Act of June 28, 1954 (68 Stat. 300; 25 U.S.C. 676), and the Act of August 27, 1954 (68 Stat. 868; 25 U.S.C. 677), as amended.

SEC. 2. Any portion of the funds distributed per capita to the members of the respective tribes shall not be subject to Federal or State income tax.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. ASPINALL. Mr. Speaker, I ask unanimous consent for the immediate consideration of a similar Senate bill, S. 3997.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 3997

An act to provide for the disposition of funds appropriated to pay a judgment in favor of the Confederated Bands of Ute Indians in Court of Claims case 47567, and a judgment in favor of the Ute Tribe of the Uintah and Ouray Reservation for and on behalf of the Uncompahgre Band of Ute Indians in Indian Claims Commission docket numbered 349, and for other purposes

Be is enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the unexpended balance of funds on deposit in the Treasury to the credit of the Confederated Bands of Ute Indians appropriated by the Act of May 13, 1966 (80 Stat. 141), pursuant to the final judgment entered in Court of Claims case numbered 47567; and the funds on deposit to the credit of the Ute Tribe of the Uintah and Ouray Reservation, for and on behalf of the Uncompahgre Band of Ute Indians, that were appropriated by the Act of April 30, 1965 (79 Stat. 81), to pay a judgment by the Indian Claims Commission in docket numbered 349; and the interest thereon, less attorney fees and litigation expenses, shall be available for use by the respective tribes in accordance with the Act of August 21, 1951 (65 Stat. 193; 25 U.S.C. 672), the Act of August 12, 1953 (67 Stat. 540; 25 U.S.C. 674), the Act of June 28, 1954 (68 Stat. 300; 25 U.S.C. 676), and the Act of August 27, 1954 (68 Stat. 868; 25 U.S.C. 677), as amended.

SEC. 2. Any portion of the funds distributed per capita to the members of the respective tribes shall not be subject to Federal or State income tax.

(Mr. ASPINALL asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. ASPINALL. Mr. Speaker, the purpose of S. 3997 is to authorize the use of a judgment against the United States recovered by the Confederated Bands of Ute Indians in Court of Claims docket No. 47567, and the use of a judgment against the United States recovered by the Ute Tribe of the Uintah and Ouray Reservation in Indian Claims Commission docket No. 349. The net amounts available, after division between the three Ute Tribes entitled to share, are as follows:

Ute Indian Tribe of the Uintah and Ouray Reservation	$2,371,546
Southern Ute Tribe	830,000
Ute Mountain Tribe	963,017

The money has been appropriated, but the Indians may not use the money until Congress has approved their plans.

The bill provides that the money may be used for any purpose requested by the tribe and approved by the Secretary of the Interior. The Ute Indian Tribe of the Uintah and Ouray Reservation proposes to pool this judgment money with several other tribal funds, and to establish three investment funds the earnings from which will be used for educational grants, tribal government operations, and per capita payments to members.

The Ute Mountain Tribe proposes to invest approximately $622,706 in an economic development fund for the reservation, and to use the balance to make a $300 per capita payment to its members.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 16833) was laid on the table.

AMENDING CENTRAL VALLEY RECLAMATION PROJECT TO INCLUDE BLACK BUTTE PROJECT

The Clerk called the bill (H.R. 18298) to amend the Central Valley reclamation project to include Black Butte project.

There being no objection, the Clerk read the bill, as follows:

H.R. 18298

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Central Valley project, California, authorized by section 2 of the Act of Congress of August 26, 1937 (50 Stat. 850), is hereby amended to include the Black Butte project on Stony Creek, which was authorized for construction by the Corps of Engineers by the Flood Control Act approved December 22, 1944 (58 Stat. 887). Subject to the provisions of this Act, the Black Butte project shall be financially integrated with the Central Valley project and coordinated operationally with the other storage units of the Central Valley project by the Bureau of Reclamation under the Secretary of the Interior: *Provided,* That the Black Butte Dam and Reservoir will be physically operated and maintained by the Corps of Engineers and in a manner compatible with recreational use of the reservoir: *Provided further,* In the event that prior to January 1, 1971, one or more agencies enter long-term contracts with the Secretary of the Interior under reclamation law to repay the cost of the Black Butte project allocated to conservation, and the Secretary of the Interior has received resolutions of the Boards of Directors of said agency or agencies expressing the desire not to be so included, then said project will not be included in the Central Valley project.

With the following committee amendments:

Page 1, line 4, strike "60" and insert in lieu thereof "50"; and

Page 2, beginning on line 5, strike out "reservoir:" and all of the proviso ending on line 13 and insert "reservoir."

The committee amendments were agreed to.

(Mr. ASPINALL asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. ASPINALL. Mr. Speaker, H.R. 18298 is a fairly simple bill albeit an urgent one that should be passed as soon as possible. Its purpose is to authorize the Black Butte Reservoir project constructed and operated by the Corps of Engineers, Department of the Army, to be integrated operationally and financially with the Central Valley Federal reclamation project. There is no direct cost to the Federal Government involved in this legislation and there is no change in operation jurisdiction contemplated.

Black Butte Dam and Reservoir were authorized in 1944 for the multiple purposes of flood control and water conservation with the stipulation that the Secretary of the Interior would be responsible for marketing of the water yield and the return of the reimbursable costs associated therewith. To overcome delays in the marketing of the water and to achieve the benefits of flood control at an early date, the State of California pursuant to an act of its legislature entered into an agreement with the Bureau of Reclamation to underwrite the reimbursable costs of the project if long-term water sales contracts were not con-

summated by January 1, 1971; or alternatively legislation was not enacted to integrate the project into the Central Valley development.

The long-term contracts have not been forthcoming and the agreement is approaching its terminal date. If H.R. 18298 is not enacted, the control of the water supply will pass from the Federal Government into the hands of the State which can then dispose of the resource in any manner it sees fit.

There is a growing need for the water yield from Black Butte Reservoir in the Federal service area of the Central Valley project, and I believe that this federally developed water supply should be retained in Federal hands so that it can be used to meet this growing need. In our hearings before the Committee on Interior and Insular Affairs there was no objection to this philosophy, albeit there is little doubt that the State would be pleased to assume jurisdiction over this resource.

If H.R. 18298 is passed, it will be possible to develop plans for conjunctive operation of this reservoir with reservoirs under the control over the Bureau of Reclamation which will increase the effectiveness of the total storage system.

In conclusion, Mr. Speaker, it is important to note that the Congress in authorizing Black Butte Dam and Reservoir obviously intended that the water yield from it would be marketed and utilized in the general area of the project. As matters now stand, the only way that we can be certain that this will, indeed, take place is to enact this measure and retain Federal jurisdiction over the issue.

For this reason, I support H.R. 18298 and urge that all Members join with me in extending their support.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ASPINALL. Mr. Speaker, I ask unanimous consent that all Members may extend their remarks in explanation of H.R. 18298 immediately prior to passage of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

REPORT ON INSTITUTIONAL INVESTORS STUDY

The Clerk called the joint resolution (H.J. Res. 1247) to amend section 19(e) of the Securities Exchange Act of 1934.

There being no objection, the Clerk read the joint resolution, as follows:

H.J. RES. 1247

Whereas additional time is required for the Securities and Exchange Commission to complete its institutional investors study, and file a report with respect thereto, pursuant to section 19(e) of the Securities Exchange Act of 1934: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That section 19(e) of the Securities Exchange Act of 1934 (15 U.S.C. 78s(e) is amended by striking out in paragraph (1) "September 1, 1970" and inserting in lieu thereof "December 31, 1970".

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

DEPARTMENT OF COMMERCE STUDIES

The Clerk called the bill (H.R. 8668) to authorize the Department of Commerce to make special studies, to provide services, and to engage in joint projects, and for other purposes.

There being no objection, the Clerk read the bill as follows:

H.R. 8668

A bill to authorize the Department of Commerce to make special studies, to provide services, and to engage in joint projects, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of Commerce is authorized, upon the request of any person, firm, organization, or others, public or private, to make special studies on matters within the authority of the Department of Commerce; to prepare from its records special compilations, lists, bulletins, or reports; to perform the functions authorized by section 2 of the Act of September 9, 1950 (64 Stat. 823; 15 U.S.C. 1152); and to furnish transcripts or copies of its studies, compilations, and other records; upon the payment of the actual or estimated cost of such special work.

In the case of nonprofit organizations, research organizations, or public organizations or agencies, the Secretary may engage in joint projects, or perform services, on matters of mutual interest, the cost of which shall be apportioned equitably, as determined by the Secretary, who may, however, waive payment of any portion of such costs by others, when authorized to do so under regulations approved by the Bureau of the Budget.

SEC. 2. All payments for work or services performed or to be performed under this Act shall be deposited in a separate account or accounts which may be used to pay directly the costs of such work or services, to repay or make advances to appropriations or funds which do or will initially bear all or part of such costs, or to refund excess sums when necessary: *Provided,* That said receipts may be credited to a working capital fund otherwise established by law, and used under the law governing said funds, if the fund is available for use by the agency of the Department of Commerce which is responsible for performing the work or services for which payment is received. Acts appropriating funds to the Department of Commerce may include provisions limiting annual expenditure from said account or accounts.

SEC. 3. The following laws, or parts of laws, are hereby repealed:

(a) That proviso in the Act of March 1, 1919 (ch. 86, sec. 1, at 40 Stat. 1256), which reads as follows: *"Provided further,* That all moneys hereafter received by the Bureau of Foreign and Domestic Commerce in payment of photographic and other mechanical reproduction of special statistical compilations from its records shall be covered into the Treasury as a miscellaneous receipt."

(b) The Act of May 27, 1935 (ch. 148, 49 Stat. 292; 15 U.S.C. 189a, 192, 192a).

(c) The proviso in the Act of May 15, 1936 (ch. 405, sec. 1, at 49 Stat. 1335; 15 U.S.C. 189), which reads as follows: *"Provided,* That the Secretary of Commerce may make such charges as he deems reasonable for lists of foreign buyers, special statistical services, special commodity news bulletins, and World Trade Directory Reports, and the amounts collected therefrom shall be deposited in the Treasury as miscellaneous receipts."

(d) The Act of December 19, 1942 (ch. 780, 56 Stat. 1067; 15 U.S.C. 1520).

(e) The proviso in section 3 of the Act of September 9, 1950 (64 Stat. 823; 15 U.S.C. 1153), which reads as follows: *"Provided,* That all moneys hereafter received by the Secretary in payment for publications under this Act shall be deposited in a special account in the Treasury, such account to be available, subject to authorization in any appropriation Act, for reimbursing any appropriation then current and chargeable for the cost of furnishing copies of reproductions as herein authorized, and for making refunds to organizations and individuals when entitled thereto: *And provided further,* That an appropriation reimbursed by this special account shall, notwithstanding any other provision of law, be available for the purposes of the original appropriation."

(f) The proviso in title III of the Act of October 22, 1951 (ch. 533, title III, section 301 at 65 Stat. 586; 15 U.S.C. 1153a), which reads as follows *"Provided,* That moneys hereafter received by the Secretary pursuant to section 3 of said Act of September 9, 1950, for publications provided thereunder, shall be available for reimbursing any appropriation as provided by said section."

SEC. 4. Except as to those laws expressly repealed herein, nothing in this Act shall alter, amend, modify, or repeal any existing law prescribing fees or charges or authorizing the prescribing of fees or charges for services performed or for any publication furnished by the Department of Commerce, or any of its several bureaus or offices.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. STAGGERS. Mr. Speaker, I ask unanimous consent for the immediate consideration of a similar Senate bill (S. 1170) to authorize the Department of Commerce to make special studies to provide services, and to engage in joint projects, and for other purposes.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1170

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of Commerce is authorized, upon the request of any person, firm, organization, or others, public or private, to make special studies on matters within the authority of the Department of Commerce; to prepare from its records special compilations, lists, bulletins, or reports; to perform the functions authorized by section 2 of the Act of September 9, 1950 (64 Stat. 823; 15 U.S.C. 1152); and to furnish transcripts or copies of its studies, compilations, and other records; upon the payment of the actual or estimated cost of such special work.

In the case of nonprofit organizations, research organizations, or public organizations or agencies, the Secretary may engage in joint projects, or perform services, on matters of mutual interest, the cost of which shall be apportioned equitably, as determined by the Secretary, who may, however, waive payment of any portion of such costs by others, when authorized to do so under

regulations approved by the Bureau of the Budget.

SEC. 2. All payments for work or services performed or to be performed under this Act shall be deposited in a separate account or accounts which may be used to pay directly the costs of such work or services, to repay or make advances to appropriations or funds which do or will initially bear all or part of such costs, or to refund excess sums when necessary: *Provided*, That said receipts may be credited to a working capital fund otherwise established by law, and used under the law governing said funds, if the fund is available for use by the agency of the Department of Commerce which is responsible for performing the work or services for which payment is received. Acts appropriating funds to the Department of Commerce may include provisions limiting annual expenditure from said account or accounts.

SEC. 3. The following laws, or parts of laws, are hereby repealed:

(a) That proviso in the Act of March 1, 1919 (ch. 86, sec. 1, at 40 Stat. 1256), which reads as follows: *"Provided further*, That all moneys hereafter received by the Bureau of Foreign and Domestic Commerce in payment of photographic and other mechanical reproduction of special statistical compilations from its records shall be covered into the Treasury as a miscellaneous receipt."

(b) The Act of May 27, 1935 (ch. 148, 49 Stat. 292; 15 U.S.C. 189a, 192, 192a).

(c) The proviso in the Act of May 15, 1936 (ch. 405, sec. 1, at 49 Stat. 1335 (15 U.S.C. 189)), which reads as follows: *"Provided*, That the Secretary of Commerce may make such charges as he deems reasonable for lists of foreign buyers, special statistical services, special commodity news bulletins, and World Trade Directory Reports, and the amounts collected therefrom shall be deposited in the Treasury as miscellaneous receipts."

(d) The Act of December 19, 1942 (ch. 780, 56 Stat. 1067; 15 U.S.C. 1520).

(e) The proviso in section 3 of the Act of September 9, 1950 (64 Stat. 823; 15 U.S.C. 1153), which reads as follows: *"Provided*, That all moneys hereafter received by the Secretary in payment for publications under this Act shall be deposited in a special account in the Treasury, such account to be available, subject to authorization in any appropriation Act, for reimbursing any appropriation then current and chargeable for the cost of furnishing copies or reproductions as herein authorized, and for making refunds to organizations and individuals when entitled thereto: *And provided further*, That an appropriation reimbursed by this special account shall, notwithstanding any other provision of law, be available for the purposes of the original appropriation."

(f) The proviso in title III of the Act of October 22, 1951 (ch. 533, title III, section 301 at 65 Stat. 586; 15 U.S.C. 1153a), which reads as follows: *"Provided*, That moneys hereafter received by the Secretary pursuant to section 3 of said Act of September 9, 1950, for publications provided thereunder, shall be available for reimbursing any appropriation as provided by said section."

SEC. 4. Except as to those laws expressly repealed herein, nothing in this Act shall alter, amend, modify, or repeal any existing law prescribing fees or charges or authorizing the prescribing of fees or charges for services performed or for any publication furnished by the Department of Commerce, or any of its several bureaus or offices.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 8668) was laid on the table.

ESTABLISHMENT OF A PROGRAM FOR THE RESEARCH AND PROMOTION OF WHEAT

The Clerk called the bill (H.R. 13543) to establish a program of research and promotion for U.S. wheat.

Mr. HALL. Mr. Speaker, inasmuch as this bill is also listed under the suspensions for today, and it does need debate, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

LEASE AND TRANSFER OF BURLEY TOBACCO ALLOTMENTS

The Clerk called the bill (H.R. 18686) to authorize the lease and transfer of burley tobacco acreage allotments.

Mr. JOHNSON of Pennsylvania. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The SPEAKER. This concludes the call of the eligible bills on the Consent Calendar.

HALTING INTERNATIONAL AIR PIRACY; FIRST ORDER OF BUSINESS FOR 25TH U.N. GENERAL ASSEMBLY

(Mr. ZABLOCKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ZABLOCKI. Mr. Speaker, I join today with concerned citizens throughout our Nation and the world in welcoming the opening tomorrow of the United Nation's 25th General Assembly. My sincere hope and prayer is that the event will signal the strengthening of this international peacekeeping organization. And what better way for it to do so than to take the firm and resolute action necessary to once and for all effectively cope with the problem of airplane hijacking.

Such violence and terrorism as we have seen in the past several days can only be met with the determined cooperation of all nations under the direction of the United Nations. First and foremost, it should be the responsibility of the U.N. to establish agreements among all nations whereby landing privileges would be denied to all hijacked planes and sanctuary would not be given to air pirates. In addition, an international tribunal should be established to try all hijackers, with a guilty verdict bringing the death penalty.

It should also be within the United Nations' power to insure safety against hijacking by placing transportation blockades on any country which would not agree to such antihijacking measures.

Because the world today is so dependent upon the air transportation industry for business and pleasure, its security must be insured to the greatest extent. In that connection, the use of armed security guards on international and domestic flights would present an active and effective deterrent.

Mr. Speaker, the world has reached the end of its patience on this question. Air piracy and the destruction of private property cannot be tolerated any longer. This question deserves and demands top-priority consideration at the coming sessions of the 25th General Assembly.

ARMED FORCES PROCUREMENT AUTHORIZATION AND PERSONNEL STRENGTH OF RESERVES

Mr. RIVERS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 17123) to authorize appropriations during the fiscal year 1971 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength of the Selected Reserve of each Reserve component of the Armed Forces, and for other purposes, with a Senate amendment thereto, and disagree to the Senate amendment.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

Mr. GROSS. Mr. Speaker, reserving the right to object, is a bill being called up under unanimous consent? What is the legislative situation?

The SPEAKER. The gentleman has asked unanimous consent to take from the Speaker's table the House bill (H.R. 17123), with a Senate amendment thereto, and disagree to the Senate amendment.

Mr. GROSS. Mr. Speaker, I withdraw my reservation.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

APPOINTMENT OF CONFEREES ON H.R. 17570, AMENDMENTS TO PUBLIC HEALTH SERVICE ACT

Mr. STAGGERS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 17570) to amend title IX of the Public Health Service Act so as to extend and improve the existing program relating to education, research, training, and demonstrations in the fields of heart disease, cancer, stroke, and other related diseases, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia? The Chair hears none, and appoints the following conferees: Messrs. STAGGERS, JARMAN, ROGERS of Florida, SPRINGER, and NELSEN.

MARINE SCIENCES COUNCIL EXTENSION

Mr. LENNON. Mr. Speaker, I move to suspend the rules and pass the bill (H.R.

16607) to amend the Marine Resources and Engineering Development Act of 1966 to continue the National Council on Marine Resources and Engineering Development.

The Clerk read as follows:

H.R. 16607

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (f) of section 3 of the Marine Resources and Engineering Development Act of 1966 (33 U.S.C. 1102(f)) is amended by striking out "June 30, 1970" and inserting in lieu thereof "June 30, 1971".

The SPEAKER. Is a second demanded?

Mr. MOSHER. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from North Carolina is recognized.

Mr. LENNON. Mr. Speaker, H.R. 16607 would amend the Marine Resources and Engineering Development Act of 1966 to continue for 1 year the National Council on Marine Resources and Engineering Development. In amending the 1966 act, the bill would change the expiration date of the National Council from June 30, 1970, to June 30, 1971, a 1-year extension beyond the expiration date provided for by Public Law 89-454, as amended by Public Law 90-242, and Public Law 91-15. The Senate has already provided for this 1-year extension, having passed S. 3617.

The Marine Sciences Council is a Cabinet-level, policy planning, and coordinating body chaired by the Vice President. It was organized to advise and assist the President in developing policy and coordinating national marine science activities. The Council was established on an interim basis but it has been continued yearly since it was organized in 1966 to coordinate Federal programs affecting our marine resources until some permanent agency could be created. One of the principal functions of the Marine Sciences Council therefore has been to make recommendations concerning a National Oceanic and Atmospheric Administration—NOAA. In this respect, on July 9, 1970, the Congress received from the President Reorganization Plan No. 4, to create such an agency. This plan is now pending before the Congress.

My Subcommittee on Oceanography and the full Committee on Merchant Marine and Fisheries were unanimous in their view that the National Marine Sciences Council should be continued for an additional year. Should Reorganization Plan No. 4 go into effect as expected, the Council would assist in the administrative coordination that will be required during the transition period.

Mr. Speaker, there was no opposition to this bill during our hearings. Departmental reports were all favorable. Accordingly, I recommend that H.R. 16607 be passed.

Mr. Speaker, I would be delighted to answer any inquiries which might be put regarding this matter. It merely extends for a period of 1 year the life of the existing National Council on Marine Resources and Engineering Development. It came from the subcommittee and the full committee by unanimous vote. It has received the approval of all departments, agencies, and bureaus of the Federal Government, including the Bureau of the Budget.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. LENNON. I am delighted to yield to the gentleman from Iowa.

Mr. GROSS. The life of this commission or council, whatever it is, has been twice extended; has it not?

Mr. LENNON. The life of the Council has been extended twice before for a period of 6 months each time. It would be extended by this bill.

I know the gentleman is familiar with the fact that on July 9 of this year the President sent to the Congress two reorganization plans, Reorganization Plans Nos. 3 and 4. In the judgment of the committee, it is essential that the life of the Council be continued for at least 1 year, in order to determine the final implementation of the presidential recommendations with respect to those two reorganization plans.

Mr. GROSS. Where does this Council gets its funds?

Mr. LENNON. Is the gentleman familiar with the composition of the Council? Is the gentleman familiar with the membership on the Council?

Mr. GROSS. No; I am not.

Mr. LENNON. Let me say to the gentleman that the Vice President of the United States is the Chairman of the Council. The Secretary of State, the Secretary of the Navy, the Secretary of the Interior, the Secretary of Commerce, the Chairman of the Atomic Energy Commission, the Director of the National Science Foundation, the Secretary of Health, Education, and Welfare and the Secretary of the Treasury constitute the members of this National Council.

The President was authorized by the original legislation to establish a staff sufficient in his judgment to make this a viable organization.

I want to say we would have, in my judgment, few oceanography or marine science programs today if it were not for the work, to a great degree, this Council has done since it came into being. It is not our intention to continue it indeterminately, but we wish to have it continued until such time as it has to a substantial degree related its efforts to the President's request for Reorganization Plans Nos. 3 and 4. We wish to continue the life of this Council as a coordinating body at that policy level.

Mr. GROSS. This Council was established in 1966; was it not?

Mr. LENNON. That is true.

Mr. GROSS. And its life has been twice extended and there is the protestation in the report that it is not contemplated that it be extended indefinitely. However, it seems to have a rather long life for a council that was supposed to be of short duration.

Mr. LENNON. If the gentleman will help us to expedite the President's recommendation for the reorganization plan, which has been delayed for a period of 3 weeks by reason of the House's recess, then I am sure we could bring this Council's life to some ultimate end.

I do say in all sincerity that I personally know the work this Council has been able to accomplish both in the prior and this present administration, and I believe if the gentleman were as familiar with it as I am, he would undoubtedly be in favor of this bill.

Mr. GROSS. I thank the gentleman for yielding and for his explanation.

Mr. MOSHER. Mr. Speaker, I join my distinguished colleague from North Carolinia, the chairman of our Subcommittee on Oceanography (Mr. LENNON), in urging this House to consider favorably H.R. 16607, to extend the Marine Science Council for 1 additional year.

I believe I should emphasize that the gentleman from California (Mr. MAILLIARD) and I introduced this legislation, H.R. 16607, at the request of the White House. It is an administration measure. However, we also introduced it because we personally believe it is important. It is especially important that during the present interim period when we are considering the President's reorganization Plan No. 4, which would create a National Oceanic and Atmospheric Administration—NOAA—within the Department of Commerce, and also undoubtedly important in the early months of NOAA's life—I repeat, it is especially important that during that period that the Marine Science Council be maintained to provide vigorous staff support to the President, and as a coordinating mechanism, to help maintain our present momentum in oceanic activities.

The National Council on Marine Resources and Engineering Development, as this body is formally designated, was established by the Marine Resources and Engineering Development Act of 1966, Public Law 89-454. The Marine Resources Act represented the culmination of some 7 years of intensive congressional effort to develop an effective statutory base for a comprehensive long-range and coordinated national program in marine science.

The act also established a Commission on Marine Science to make a comprehensive investigation and study of all aspects of marine science in order to recommend an overall plan for an adequate national oceanographic program that would meet the present and future needs of this Nation. The Commission under the leadership of Dr. Julius Stratton issued its report entitled "Our Nation and the Sea" in January 1969.

The Commission's life expired following submission of its report. As a corollary to the Commission on Marine Science, the Marine Science Council was established to assist the Commission and the President in carrying out their respective responsibilities under the act.

The Council under the chairmanship of the Vice President and composed of six Cabinet Secretaries, the Chairman of the Atomic Energy Commission, and the Director of the National Science Foundation has performed a vital role in coordinating the diverse efforts of the

United States in the field of marine science.

The work of the Council originally was intended to terminate 120 days following submission of the report of the Commission on Marine Science to the Congress. Public Law 90-242, however, extended the life of the Council to June 30, 1969. At that time, while your Subcommittee on Oceanography was holding extensive hearings on the report of the Commission, it was felt that the Council should continue to fill its essential coordinating role for at least an additional year. Accordingly, Public Law 91-15 extended the Council to June 30, 1970.

President Nixon now has submitted Reorganization Plan No. 4 to the Congress to establish a National Oceanic and Atmospheric Administration within the Department of Commerce. It is expected that plan will become effective the first week of October, and it has received the overwhelming support of your Subcommittee on Oceanography. The chairman of our subcommittee and I have had the honor of testifying in support of this reorganization plan before the Committee on Government Operations and at that time represented 23 of our colleagues of the Merchant Marine and Fisheries Committee.

Undoubtedly, there will be a period of months before the National Oceanic and Atmospheric Administration—NOAA—becomes fully operational and is able to assume its leadership role.

While the Marine Resources and Engineering Development Act established both the Commission on Marine Science and the Marine Science Council as temporary bodies, the act does place upon the President continuing responsibilities in the field of marine science, including the assignment of lead agency responsibility for the conduct of on-going marine science activities and the annual review of our marine science activities conducted by the various departments and agencies of the United States. The act also requires the President to transmit to Congress in January of each year a comprehensive report of the activities and accomplishments of all agencies and departments in the field of marine science during the preceding fiscal year, together with an evaluation of such activities in terms of the objectives of the act.

The President undoubtedly will be assisted in carrying out these continuing responsibilities by the National Oceanic and Atmospheric Administration. However, in view of the time required for this new agency to become fully operational, it is essential that the President have at his disposal an executive-level coordinating body. The Council is the best mechanism to assist the President during this final phase of our national effort to create a focal point for civil oceanic and atmospheric programs.

Mr. Speaker, H.R. 16607 will extend the Council for 1 additional year to June 30, 1971. The other body has passed an identical bill which I understand will be called up following passage of H.R. 16607. This bill was unanimously reported by your Committee on Merchant Marine and Fisheries, and I urge the House to give it their favorable consideration.

The SPEAKER. The question is on the motion of the gentleman from North Carolina that the House suspend the rules and pass the bill H.R. 16607.

The question was taken; and—two-thirds having voted in favor thereof—the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

Mr. LENNON. Mr. Speaker, S. 3617, an identical bill to H.R. 16607, is now pending before the Committee on Merchant Marine and Fisheries. Mr. Speaker, I ask unanimous consent that the Committee on Merchant Marine and Fisheries be discharged from further consideration of the Senate bill—S. 3617—to amend the Marine Resources and Engineering Development Act of 1966 to continue the National Council on Marine Resources and Engineering Development, which is identical to the House bill, and I ask for the immediate consideration of the Senate bill.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The Clerk read the Senate bill as follows:

S. 3617

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (f) of section 3 of the Marine Resources and Engineering Development Act of 1966 (33 U.S.C. 1102(f)) is amended by striking out "June 30, 1970" and inserting in lieu thereof "June 30, 1971".

The Senate bill was ordered to be read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

A similar House bill—H.R. 16607—was laid on the table.

SEAMEN'S SERVICE ACT

Mr. GARMATZ. Mr. Speaker, I move that the House suspend the rules and pass the bill—H.R. 15549—to further the effectiveness of shipment of goods and supplies in foreign commerce by promoting the welfare of United States merchant seamen through cooperation with the United Seamen's Service, and for other purposes, as amended.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Seamen's Service Act".

SEC. 2. It is the purpose of this Act, by authorizing appropriate departments and agencies of the United States Government to cooperate with the United Seamen's Service (a nonprofit, charitable organization incorporated under the laws of the State of New York) in the establishment and operation of facilities for United States merchant seamen in foreign areas, to promote the welfare of such seamen, essential to the overall interests of shipment of United States goods and supplies to such areas.

SEC. 3. Chapter 155 of title 10, United States Code, is amended—

(1) by adding the following new section at the end thereof:

"§ 2604. United Seamen's Service: cooperation and assistance

"(a) Whenever the President finds it necessary in the interest of United States commitments abroad to provide facilities and services for United States merchant seamen in foreign areas, he may authorize the Secretary of Defense, under such regulations as the Secretary may prescribe, to cooperate with and assist the United Seamen's Service in establishing and providing those facilities and services.

"(b) Personnel of the United Seamen's Service who are performing duties in connection with the cooperation and assistance under subsection (a) may be furnished—

"(1) transportation, at the expense of the United States, while traveling to and from, and while performing, those duties, in the same manner as civilian employees of the armed forces;

"(2) meals and quarters, at their expense or at the expense of the United Seamen's Service, except that where civilian employees of the armed forces are quartered without charge, employees of the United Seamen's Service may also be quartered without charge; and

"(3) available office space (including space for recreational activities for seamen), warehousing, wharfage, and means of communication, without charge.

"(c) No fee may be charged for a passport issued to an employee of the United Seamen's Service for travel outside the United States to assume or perform duties under this section.

"(d) Supplies of the United Seamen's Service (including gifts for the use of merchant seamen, may be transported at the expense of the United States, if it is determined under regulations prescribed under subsection (a) that they are necessary to the cooperation and assistance provided under this section.

"(e) Where practicable, the President shall also make arrangements to provide for convertibility of local currencies for the United Seamen's Service, in connection with its activities under this subsection (a).

"(f) For the purposes of this section, employees of the United Seamen's Service may not be considered as employees of the United States."; and

(2) by adding the following new item at the end of the analysis:

"2604. United Seamen's Service: cooperation and assistance."

The SPEAKER. Is a second demanded?

Mr. MOSHER. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

Mr. GARMATZ. Mr. Speaker, H.R. 15549 would authorize certain departments and agencies of the Government particularly the Department of Defense, to cooperate with the United Seamen's Service. The United Seamen's Service is a nonprofit, charitable organization incorporated under the laws of the State of New York. Its purpose is to help U.S. merchant seamen, particularly in foreign ports.

The U.S. Government has historically supported merchant seamen in foreign ports. Normally, this support is provided under the supervision of the U.S. consulates. Since World War II, however, the United Seamen's Service has been pro-

viding welfare services to U.S. seamen in foreign ports. During World War II, services such as commissary privileges, PX, warehousing, transportation and communication facilities were provided by the Defense Establishment under emergency powers of the President. This legislation is required since the Executive order provided for this support has expired.

The proposed legislation is virtually identical to present law supporting the American Red Cross overseas.

Under the bill, personnel of the United Seamen's Service may be furnished transportation at Government expense in their performance of duties. Also, meals and quarters, available office and recreational space, warehousing, wharfage, and means of communication may be authorized.

The Secretary of Defense would have discretion to provide these services after a finding by the President that it is necessary in the interest of the United States.

There is no additional direct cost to the United States under this legislation. The cost of the United Seamen's Service is substantially borne by the personnel of the merchant marine and by contributions of interested private organizations and individuals.

The legislation is supported by the Defense and State Departments and by the Maritime Administration of the Department of Commerce. There was no opposition to the bill.

Your committee unanimously concluded, therefore, that this bill is desirable legislation to help U.S. merchant seamen in foreign ports and recommends that H.R. 15549 be enacted into law.

Mr. HALL. Mr. Speaker, will the gentleman yield?

Mr. GARMATZ. I yield to the gentleman from Missouri.

Mr. HALL. Mr. Speaker, I appreciate the gentleman yielding.

Mr. Speaker, I notice in the report of the distinguished gentleman's committee that it says repeatedly that there is no direct cost to the U.S. Treasury, and indeed on page 4 it says there is no cost to this legislation, yet it says also, under an item on page 2 of the report, that the personnel of the United Seamen's Service will be transported at Government expense.

Also meals and quarters, office and recreational space, warehousing, wharfage, and communications that may be authorized. It just seems to one not familiar with this legislation that you cannot have it both ways. These things are very costly items of expense to the Government. If we are going to furnish them regardless of the merit of the bill, why do we on the one hand say there is no cost to the Government, and then on the other hand say that we will furnish all these services?

Mr. GARMATZ. Wherever there is space available for transportation, communications, warehousing, things of that sort, but only where there is space available.

Mr. HALL. If the gentleman will yield further, would these seamen then come under the same priorities of space-available transportation as regular Government employees within the intent of this bill?

Mr. GARMATZ. No. Not necessarily.

Mr. HALL. We would not again have a situation where State Department people, or summer students of Defense universities, were enabled to preempt transportation from GI's and their dependents on a space-available basis; is that correct?

Mr. GARMATZ. That is not correct.

Mr. HALL. One final question, if the gentleman will yield further: Is this the same fund that has been active politically and rather generous in support of some of its champions politically?

Mr. GARMATZ. No.

Mr. HALL. This is not the same fund?

Mr. GARMATZ. No.

Mr. HALL. I thank the gentleman.

Mr. GARMATZ. I might tell the gentleman that there could probably be some considerable savings in providing these seamen with recreational facilities on shore, and not having to be paid overtime by staying on ship in these foreign ports.

Mr. HALL. I understand, but when it says meals, quarters, transportation, and office and recreational space, it does not say on a space-available basis, plus communications, it makes one wonder.

Now, does this mean, Mr. Speaker, that these people if they were carrying on duties in some foreign port would be able to utilize, for example, U.S. Navy or Department of Defense communications agencies means for messages, or transportation, and if so at what priority would they be?

Mr. GARMATZ. I still say it would be on a space-available basis.

Mr. HALL. In other words, it would go on the line only after priority traffic had been exercised by Department of Defense, Department of State, or other departments?

Mr. GARMATZ. That is correct.

Mr. HALL. Mr. Speaker, I think it is important that we establish this legislative intent, and I wonder if the gentleman's committee has a real estimation of the expense of this bill, even on a space-available or priority-available traffic basis?

Mr. GARMATZ. No, not at this time; and I cannot answer the gentleman in that particular.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. GARMATZ. I yield to the gentleman from Iowa.

Mr. GROSS. Is there any other organization aside from the International Red Cross that the gentleman knows of that will get this kind of treatment in the matter of transportation, the elimination of passport fees, and so on, and so forth?

Mr. GARMATZ. Probably the USO or some organization of that sort.

Mr. GROSS. Of course, the gentleman does not compare the services of those other organizations with those of the Red Cross. The Red Cross is a broad gage organization. It is not limited to seamen and aid to seamen in foreign ports or anywhere else.

Mr. GARMATZ. No, I would not.

Mr. GROSS. Would the gentleman think that we are setting here some kind of precedent in the matter of treatment of an organization which provides the services only to one group of citizens of this country?

Mr. GARMATZ. No; this particular service was in existence during World War II and it is nothing new.

Mr. GROSS. Well, there are a lot of services that were provided during World War II that are not provided in so-called peacetime, I will say to the gentleman. I doubt if that is a very valid argument.

The SPEAKER. The Chair recognizes the gentleman from Ohio (Mr. MOSHER).

Mr. MOSHER. Mr. Speaker, I salute the gentleman from Missouri and the gentleman from Iowa for asking questions I think needed to be asked to clarify this situation.

This organization, the United Seamen's Service, is essentially like the USO, and these services with which we are dealing here are rendered only to seamen when they are in foreign ports. Seamen in such a situation have always been considered to be in a rather unique category of American citizens.

Mr. Speaker, I join the chairman of the Committee on Merchant Marine and Fisheries (Mr. GARMATZ) in support of H.R. 15549, the United Seamen's Service Act.

Hearings before the Merchant Marine and Fisheries Committee clearly established that the United Seamen's Service, a nonprofit, charitable organization, has filled an essential role providing services to U.S. merchant seamen in foreign ports in much the same way as the well-known USO provides services for military personnel.

During the Vietnam war, particularly in the build-up period, hundreds of American merchant ships spent weeks in port awaiting pier space to discharge. Had it not been for the efforts of the United Seamen's Service, the men serving aboard these merchant ships would have been compelled to remain on board ship during their entire stay in port, at great cost to the ship operators and to the U.S. Government.

The United Seamen's Service provides clubs, facilities, communication and transportation facilities, for merchant seamen while in foreign ports. These men are not eligible to enjoy USO facilities which are only available to military personnel.

H.R. 15549 will authorize the President to support the United Seamen's Service in the same manner that the U.S. Government now assists the USO. This legislation has the full support of the executive department and is an extremely worthwhile measure. The gentleman from Maryland (Mr. GARMATZ) has explained the provisions of the bill, and I see no need to repeat them at this time.

Mr. Speaker, I urge unanimous support for this legislation.

The SPEAKER. The question is on the motion offered by the gentleman from Maryland that the House suspend the rules and pass the bill H.R. 15549, as amended.

The question was taken; and—two-

thirds having voted in favor thereof—the rules were suspended and the bill, as amended, was passed.

The title was amended so as to read: "A bill to amend title 10, United States Code, to further the effectiveness of shipment of goods and supplies in foreign commerce by promoting the welfare of United States merchant seamen through cooperation with the United Seamen's Service, and for other purposes."

A motion to reconsider was laid on the table.

STATE INCOME TAX WITHHOLDING FOR INTERSTATE TRANSPORTATION EMPLOYEES

Mr. STAGGERS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 10634) to amend the Interstate Commerce Act and the Federal Aviation Act of 1958 in order to exempt certain wages and salary of employees from withholding for tax purposes under the laws of States or subdivisions thereof other than the State or subdivision of the employee's residence, as amended.

The Clerk read as follows:

H.R. 10634

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That part I of the Interstate Commerce Act is amended by redesignating section 26 as section 27 and by inserting before such section a new section as follows:

"EXEMPTION OF CERTAIN WAGES AND SALARY OF EMPLOYEES FROM WITHHOLDING BY OTHER THAN RESIDENCE STATE

"SEC. 26. (a) No part of the wages or salary paid by any railroad, express company, or sleeping car company, subject to the provisions of this part, to an employee who performs his regularly assigned duties as such an employee on a locomotive, car, or other track-borne vehicle in more than one State, or who is engaged principally in more than one State, in maintaining roadways, signals, communications, and structures or in operating motor trucks out of railroad terminals, shall be withheld for income tax purposes pursuant to the laws of any State or subdivision thereof other than the State or subdivision of such employee's residence, as shown on the employment records of any such carrier; nor shall any such carrier file any information return or other report for income tax purposes with respect to such wages or salary with any State or subdivision thereof other than such State or subdivision of residence.

"(b) For the purposes of this section, the term 'State' also means the District of Columbia."

SEC. 2. (a) Section 202(b) of the Interstate Commerce Act is amended by inserting after "Nothing in this part" a comma and the following: "except as provided in section 226A,".

(b) Part II of the Interstate Commerce Act is amended by inserting after section 226 a new section as follows:

"EXEMPTION OF CERTAIN WAGES AND SALARY OF EMPLOYEES FROM WITHHOLDING BY OTHER THAN RESIDENCE STATE

"SEC. 226A. (a) No part of the wages or salary paid by any motor carrier subject to the provisions of this part or by any private carrier of property by motor vehicle, to any employee who performs his regularly assigned duties as such an employee on a motor vehicle in more than one State, shall be withheld for income tax purposes pursuant to the laws of any State or subdivision thereof other than the State or subdivision of such employee's residence, as shown on the employment records of such carrier; nor shall such carrier file any information return or other report for income tax purposes with respect to such wages or salary with any State or subdivision thereof other than such State or subdivision of residence.

"(b) For the purposes of this section, the term 'State' also means any possession of the United States or the Commonwealth of Puerto Rico."

SEC. 4. (a) Part III of the Interstate Commerce Act is amended by redesignating section 324 as section 325 and by inserting immediately after section 323 the following:

"FILING OF INFORMATION RETURNS OF OTHER REPORTS FOR INCOME TAX PURPOSES WITH OTHER THAN RESIDENCE STATE

"SEC. 324. No water carrier or vessel operator shall file any information return or other report for income tax purposes with any State or subdivision thereof other than the State or subdivision of residence of the employee concerned, as shown on the employment records of such water carrier or vessel operator, with respect to the wages or salary of any master, officer, or seaman who is a member of the crew on a vessel engaged in foreign, coastwise, intercoastal or noncontiguous trade or in the fisheries of the United States."

(b) The table of contents contained in section 301 of the Interstate Commerce Act is amended by striking out

"Sec. 324. Separability of provisions."

and inserting in lieu thereof:

"Sec. 324. Filing of information returns or other reports for income tax purposes with other than residence State.

"Sec. 324. Separability of provisions."

SEC. 4. (a) Title XI of the Federal Aviation Act of 1958 is amended by inserting after section 1111 the following new section:

"EXEMPTION OF CERTAIN WAGES AND SALARY OF EMPLOYEES FROM WITHHOLDING BY OTHER THAN RESIDENCE STATE

"SEC. 1112. (a) No part of the wages or salary paid by any air carrier to an employee who performs his regularly assigned duties as such an employee on an aircraft in more than one State shall be withheld for income tax purposes pursuant to the laws of any State or subdivision thereof other than the State or subdivision of such employee's residence, as shown on the employment records of such carrier; nor shall such carrier file any information return or other report for income tax purposes with respect to such wages or salary with any State or subdivision thereof other than such State of subdivision of residence.

"(b) For the purposes of this section, the term 'State' also means the District of Columbia and any of the possessions of the United States."

(b) That portion of the table of contents contained in the first section of the Federal Aviation Act of 1958 which appears under the heading "TITLE XI—MISCELLANEOUS" is amended by adding at the end thereof the following:

"Sec. 1112. Exemption of certain wages and salary of employees from withholding by other than residence State."

SEC. 5. The amendments made by this Act shall become effective on the first day of the first calendar year beginning after the date of enactment of this Act.

The SPEAKER. Is a second demanded?

Mr. GROSS. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The Chair recognizes the gentleman from West Virginia (Mr. STAGGERS).

Mr. STAGGERS. Mr. Speaker, this bill will remedy a problem which has increased in recent years with respect to requirements of some of the individual States that interstate common carriers withhold taxes for their employees. Under the bill only the State of a particular employee's residence would be allowed to require his employer to withhold State taxes. The bill is of importance to the employees and the employers of the railroad, motor carrier, water carrier, and air carrier industries. I believe that you can readily see what a burden it is on a carrier and also on its employees when you consider the number of States in which an employee works in a transcontinental aircraft. Substantially the same problem occurs in interstate bus or truck transportation or in rail services. The bill would do away with multiple withholding and income reporting requirements. It does not affect or attempt to affect the powers of the individual States to tax. It has the support of all of the affected industries and also of the employees of those industries. The hearing record reflects opposition from the Advisory Commission on Governmental Relations, the Department of Revenue of Alaska, the National Association of Tax Administrators, and the Multistate Tax Commission. Merchant seamen and fishermen were not included because under a separate law they are protected from the withholding of income by States. However, they were not protected from multistate requirements as to the reporting of their income. The bill sent to the desk includes an amendment which would remove the multistate requirements as to reporting by the employers of these seamen and thus bring them into a comparable position with that of other interstate transportation employees.

I urge that the Members vote for the passage of this legislation.

The SPEAKER. The question is on the motion of the gentleman from West Virginia that the House suspend the rules and pass the bill H.R. 10634, as amended.

The question was taken; and (two-thirds having voted in favor thereof, the rules were suspended and the bill, as amended was passed.

The title was amended so as to read: "A bill to amend the Interstate Commerce Act and the Federal Aviation Act of 1958 in order to exempt certain wages and salaries of employees from withholding for income tax purposes under the laws of States or subdivisions thereof other than the State or subdivision of the employee's residence."

A motion to reconsider was laid on the table.

REVISING BOUNDARIES OF MINUTE MAN NATIONAL HISTORICAL PARK

Mr. ASPINALL. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 13934) to amend the act of Sep-

tember 21, 1959 (72 Stat. 591) to authorize the Secretary of the Interior to revise the boundaries of Minute Man National Historical Park, and for other purposes, as amended.

The Clerk read as follows:

H.R. 13934

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1 of the Act of September 21, 1959 (73 Stat. 590) is amended by inserting "(a)" after the word "that" in the first sentence and adding two subsections, as follows:

"(b) Notwithstanding the description set forth in subsection (a) of this section, if the Secretary should determine that the relocation of Highway 2 by the Commonwealth of Massachusetts makes it desirable to establish new boundaries in common with, contiguous or adjacent to the proposed right-of-way for that highway, he is authorized to relocate such boundaries accordingly, and shall give notice thereof by publication of a map or other suitable description in the Federal Register: *Provided,* That any net acreage increase by reason of the boundary revision and land exchanges with the Commonwealth shall not be included in calculations of acreage in regard to the limitation set forth in subsection (a) of this section, but shall be in addition thereto.

"(c) Any lands added to the Minute Man National Historical Park, pursuant to subsection (b) may be acquired only if such acquisition can be accomplished without cost for land acquisition and, when so acquired, shall be subject to all laws, rules, and regulations applicable thereto."

SEC. 2. Section 6 of the Act of September 21, 1951 (73 Stat. 590), is amended by (1) deleting "$8,000,000" and inserting "$13,900,000" and (2) deleting "$5,000,000" and inserting "$10,900,000".

The SPEAKER. Is a second demanded?

Mr. GROSS. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

Mr. ASPINALL. Mr. Speaker, H.R. 13934 is a bill which was cosponsored by the members of the Massachusetts congressional delegation. It authorizes certain changes in existing law with respect to the Minute Man National Historical Park.

The two changes which the bill encompasses are not complex:

The first deals with the boundaries of the historical park and amends existing law to permit the enlargement of the area if the lands are made available by the State, without additional cost to the Federal Government.

The second authorizes increased appropriations to complete the land acquisition program within the original boundaries of the park.

Taking these matters in reverse order, Mr. Speaker, let me briefly refresh the recollection of my colleagues with respect to this historical park. In 1959, the Congress considered and approved legislation authorizing the acquisition of up to 750 acres of land to be restored and developed as the Minute Man National Historical Park. Included within this park were some of the lands where the American Revolution began—Lexington, Concord, Lincoln, and Bedford.

As with other authorizations considered at that time, the Congress relied on information supplied by the National Park Service in determining how much money would be required for the land acquisition program. Unfortunately, the cost data supplied was not based upon reliable appraisal techniques and, as a result, the cost limitation written into the bill did not reflect the true value of the properties involved. This error has been seriously compounded with the passage of time so that today the remaining 144.37 acres of land will cost appreciably more than they would have had they been promptly purchased.

Although much of the land has been acquired with the $5 million authorized and appropriated, 58 properties containing 62 improvements remain unpurchased. It is expected that these properties will require an additional investment of $5.9 million and the increased authorization is limited to that amount. Naturally, the sponsors of the bill are anxious to complete this project—particularly in light of the role which this area will play in the bicentennial of our Independence.

It is unfortunate that it is necessary to consider this increased authorization ceiling, but I hasten to add that it was deliberately included in the original legislation in order to preclude the administering agency from exceeding the cost estimates upon which the original legislation was founded. Because the Congress has written appropriation ceilings into all of these authorizations, the cost estimates which have been presented to us in more recent years have proven to be much more reliable.

The second feature of this legislation involves the possible revision of the boundaries of the park. At the present time, the Commonwealth of Massachusetts is proceeding with plans to relocate one of its State highways near the park boundaries. In anticipation of this action, this legislation provides that the park boundaries may be adjusted by the Secretary of the Interior; however, the bill as amended, requires that no additional Federal land acquisition expenditure be incurred as a result of these adjustments.

Mr. Speaker, the Congress recognized the national value of this historic area over a decade ago. While much progress has been made in acquiring and restoring the area in the ensuing years, the job is not yet complete. For this reason, the Committee on Interior and Insular Affairs recommends the enactment of H.R. 13934 with the Committee amendments.

(Mr. ASPINALL asked and was given permission to revise and extend his remarks.)

Mr. GROSS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I take this time to ask the gentleman from Colorado if the amendment offered by the gentleman cuts the cost of this bill, which now, according to the report, is approximately $14 million?

Mr. ASPINALL. If the gentleman will yield, the amendment which we have would make a total cost of the project of $13,900,000.

Mr. GROSS. That is the amendment? That is the total cost?

Mr. ASPINALL. That would be the total cost.

Mr. GROSS. Of which approximately $11 million is to be used for the purchase of lands and interest in lands?

Mr. ASPINALL. It is $10,900,000.

Mr. GROSS. And did the gentleman say that this involved the purchase of 730 acres, or some such amount?

Mr. ASPINALL. Originally it was set at about that amount. If my colleague will yield further, and as I said in my presentation, the amount that will be involved is approximately that amount, with 144.37 acres still remaining unpurchased, and that is where the additional cost comes.

Mr. SAYLOR. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Pennsylvania.

Mr. SAYLOR. Mr. Speaker, the gentleman is correct. The total limitation in the bill is 770 acres, of which 145 acres is still to be acquired.

Mr. GROSS. Is the State of Massachusetts not making some contribution to this?

Mr. ASPINALL. Mr. Speaker, if my colleague, the gentleman from Iowa will yield further, the State of Massachusetts has made contributions all along the line.

Mr. GROSS. Such as 730 acres of land?

Mr. ASPINALL. I do not believe they have made any contribution of acreage of land.

Mr. MORSE. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Massachusetts.

Mr. MORSE. Mr. Speaker, under the authority of this present bill, the Commonwealth transferred to the Federal Government, National Park Service, several acres for relocation and redefinition of the boundaries.

Mr. GROSS. Several acres, s-e-v-e-r-a-l?

Mr. MORSE. Several acres; yes.

Mr. GROSS. Seven hundred and fifty acres is more than "several."

Mr. MORSE. There are 750 authorized. Most of those have already been acquired. There are only 140 remaining to be acquired.

Mr. GROSS. I will ask the gentleman from Massachusetts: Would this be considered as the Federal Government's expenditure in connection with the establishment of this national historic park?

Mr. MORSE. This is the total authorization that would be required. It is $10.9 million for land acquisition and $3 million for rehabilitation and so forth.

Mr. GROSS. The gentleman would not expect the Federal Government to be called upon to provide more money, except for the maintenance of the park?

Mr. MORSE. I am sure of that.

Mr. GROSS. I thank the gentleman.

Mr. SAYLOR. Mr. Speaker, will the gentleman yield time to me?

Mr. GROSS. Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. SAYLOR).

Mr. SAYLOR. Mr. Speaker, I rise in support of H.R. 13934, a bill to authorize the Secretary of the Interior to revise the boundaries of the Minute Man National Historical Park and for other purposes.

The purpose of this legislation is to

amend the act, establishing the Minute Man National Historical Park by authorizing the Secretary of the Interior to revise the boundaries of the park to conform to the proposed relocation of State Highway Route 2, and by increasing the appropriation authorization for acquisition of land within the existing boundaries of the historical park.

Approximately 145 acres of lands within the existing boundaries of the park are yet to be acquired. This bill authorizes the appropriation of $5,900,000 to acquire these properties and will complete the acquisition program under the original legislation. The bill also provides that the revision of the boundaries as a result of the proposed highway relocation contemplates no land acquisition costs.

Mr. Speaker, this legislation is necessary in order to protect the investment which the Federal Government has already made in this park. It may be costly, but the increased acquisition costs are the result of the overall problem of escalating land costs, in addition to unreliable estimates. Since the legislation will also complete our program in the Minute Man National Historical Park and round out the park development, I urge the rules be suspended and the bill be passed.

(Mr. TAYLOR asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. TAYLOR. Mr. Speaker, the bill now before the House (H.R. 13934) amends the act establishing the Minuteman National Historical Park. The park was created during the 86th Congress to commemorate the first battle of the American Revolution. Since it was authorized, more than 500 acres of land, several historic structures, and many other improvements have been acquired. The object of the park is to restore, to the extent possible, a small part of this historic region to its appearance in 1775 when the shots opening the Revolutionary War were fired.

In spite of the progress which has been made with the $5 million invested so far, eight important historic structures—valued at $942,200—and numerous other improvements located on about 125 acres of land remain unacquired. If the objectives of the park are to be achieved, this acquisition program must be completed and it should be completed as expeditiously as possible.

Like land values elsewhere, the value of these lands has increased over the years; consequently, the Government will have to pay proportionally more for these properties today than it did for the properties already purchased. This matter is further complicated by the fact that most of the remaining lands contain some improvements. The best cost estimates available to the committee indicate that $5.9 million more will be required to acquire these remaining properties.

The moneys for these acquisitions will, of course, be appropriated from the land and water conservation fund which the Congress created for this purpose. And it should be noted that the fund should be capable of meeting this need in the reasonably foreseeable future if the present administration maintains its interest in investing the money which the Congress has made available.

Mr. Speaker, this is one of those five or six areas which we have known would require further congressional attention. The situation here is similar to that which we encountered at Padre Islands National Seashore in Texas, Point Reyes National Seashore in California, and at Cape Cod National Seashore. We regret the necessity of bringing these projects before the Congress again, but we recognize the value of including these appropriation limitations when these authorizations are considered.

No one, I am sure, would contend that this significant historic area is unworthy of national recognition. It is already a popular unit of the national park system attracting more than a half million Americans annually and the number of visitors is bound to increase as we approach the bicentennial of our Independence.

Mr. Speaker. I am pleased to join the chairman of the full committee and my Massachusetts colleagues in supporting the enactment of H.R. 13934, as amended.

Mr. PHILBIN. Mr. Speaker, this bill seeks to revise the boundary lines of the Minute Man National Historical Park, with respect to protective and usage viewpoints, and further it seeks to remove the existing limitations on appropriations, which are now limited to $8 million for land acquisition and development.

There is a sense of real urgency with regard to Minute Man Park, in that it would be most desirable if the Congress would act now, in 1970, in order to complete this wonderful historical park in time for the Nation's Bicentennial Celebration, and also for Massachusetts in time for the special anniversary of the battle of April 19, 1775, by "the rude bridge, which arched the flood, where once the embattled farmers stood and fired the shot heard 'round the world."

Minute Man is an exceedingly popular park, as indicated by the number of visitors during 1969 when a total of 529,300 visitors toured the area. This number will increase as we approach the Nation's 200th birthday, and I would hope that the Congress, over the next 4 fiscal years would assist, as in the past, in acquiring the needed properties to complete Minute Man Park and have it ready for the great Bicentennial Celebration.

At a time when liberty and free government is under fire all over the world, and in our own country, it is all the more important that we stand firmly here and make sure that we defend and protect our security and rich heritage of freedom.

I respectfully submit to the Members of this House that action now on H.R. 13934 will do much to promote patriotic sentiment and assist the Nation and the American people in appropriately celebrating this great anniversary.

As I pointed out, you have helped us before with respect to this park, and the Cape Cod National Seashore, which I also initiated in the House, and I would like especially to express my warm appreciation and sincere thanks to the distinguished chairman of the Subcommittee on National Parks and Recreation (Mr. TAYLOR); and to the great leader of the Interior and Insular Affairs Committee, my esteemed friend, Chairman ASPINALL, who have gone out of their way, together with other members of the committee, to expedite this very important historical legislation.

I respectfully urge the House to pass this bill unanimously and sincerely thank the Members for their consideration and support.

The SPEAKER. The question is on the motion of the gentleman from Colorado that the House suspend the rules and pass the bill H.R. 13934, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title was amended so as to read: "An act to amend the Act of September 21, 1959 (73 Stat. 590), to authorize the Secretary of the Interior to revise the boundaries of Minute Man National Historical Park, and for other purposes."

A motion to reconsider was laid on the table.

ESTABLISHMENT OF A PROGRAM FOR THE RESEARCH AND PROMOTION OF WHEAT

Mr. PURCELL. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 13543) to establish a program of research and promotion for U.S. wheat, as amended.

The Clerk read as follows:

H.R. 13543

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act shall be known as the "Wheat Research and Promotion Act."

SEC. 2. The Secretary of Agriculture is authorized to enter into agreements with organizations of wheat growers, farm organizations, and such other organizations as he may deem appropriate to carry out a program of research and promotion designed to expand domestic and foreign markets and increase utilization for United States wheat and to carry out any other such program which he deems will benefit wheat producers in the United States. Notwithstanding any other provision of law, the Secretary shall use the total net proceeds from the sale of export marketing certificates during the marketing year ending June 30, 1969, to finance the cost of such agreements, except that he shall provide for the issuance of a pro rata share of export marketing certificates for such marketing year to any producer eligible therefor under section 379c of the Agricultural Adjustment Act of 1938, as amended, who applies for such certificates not later than ninety days after the date of enactment of this Act. The Secretary is authorized to prescribe such rules and regulations as may be necessary to carry out the provisions of this Act.

The SPEAKER. Is a second demanded?

Mr. BELCHER. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from Texas is recognized.

Mr. PURCELL. Mr. Speaker, it is my privilege to rise today in support of H.R. 13543, which would authorize the Secretary of Agriculture to enter into agreements with organizations of wheat-growers, farm organizations, and other organizations to carry out a program of research and promotion designed to expand domestic and foreign markets and increase utilization for U.S. wheat.

The Agricultural Adjustment Act of 1938, as amended, contains basic provisions regarding export marketing certificates, from which this program would be funded. It requires that export certificates shall be issued to all persons equivalent to the number of bushels exported. The cost of such certificates per bushel to the exporter is to be that amount determined by the Secretary of Agriculture on a daily basis which would make U.S. wheat and wheat flour generally competitive in the world market, avoid disruption of world market prices, and fulfill the international obligations of the United States. These certificates are to be issued on a pro rata basis.

During the 1968–69 marketing year, the total value of wheat export certificates collected exceeded the total value of export subsidies paid by slightly over $4.2 million. Under existing legislation, the Secretary is required to distribute this accumulation pro rata to farmers who participated in the 1968 wheat program. Under present law, the Department does not intend to issue checks for less than $1, except upon request.

Mr. Speaker, the report on H.R. 13543 points out the serious problems the wheat industry now faces. In the past 20 years, annual flour consumption per capita has declined from 136 pounds to 112 pounds. A great deal could be done to reverse this deplorable trend. Recent developments in enrichment processes, flour blends, and new wheat products indicate there is expansion potential for wheat in the field of human nutrition. There are also exciting prospects for wheat utilization in industrial channels. Preliminary experimentation has shown that various wheat properties lend themselves to usage as wet and dry strength additives for paper and boxboard, as a substitute for carbon black in rubber manufacture, in the production of industrial alcohol—possible for use as a motor fuel additive, as a bonding agent in plywoods and other wood products, and in the production of protein film. In many of the instances mentioned, both in nutritional and industrial usage, basic research is well along and an acceptable product is available. The assistance needed now is in market testing or promotion, or in some cases additional research on the marketing of byproducts is needed in order to make the wheat utilization economically feasible.

There are other areas where producer efforts to support a comprehensive program for the relief and benefit of this industry are stretched woefully thin. Marketing research, promotional efforts such as the "Day of Bread" and public relations efforts on behalf of all agriculture; certainly these are central to the well-being of the wheat farmer and should be considered legitimate uses for such funding as this legislation would make available.

It is toward these ends that the instant bill is directed. It authorizes the Secretary to use the net proceeds from the sale of export marketing certificates during the marketing year ending June 30, 1969, to finance the costs of the agreements the bill authorizes. It does not authorize the use of these funds unless the producer fails to apply for them, and safeguards are taken that the funds so used would do so constructively.

Mr. Speaker, I heartily recommend passage of this bill today.

Mr. Speaker, at this time I shall be glad to try to answer questions any Member might have in mind with regard to the purpose of this program.

Mr. HALL. Mr. Speaker, will the gentleman yield?

Mr. PURCELL. I yield to the gentleman from Missouri.

Mr. HALL. Mr. Speaker, my only question is, what happens to the money which might not be used in this program? Will it revert to the growers? Will it revert to the General Treasury? Will it be used otherwise in the promotion of wheat?

Mr. PURCELL. Under this program all growers who have earned the right to have this money refunded to them will have 90 days to request that their money be refunded. The money which is left when that 90 days has expired would be handled by the Department. The Department would have authority, under the criteria established, to use the money by contract, dealing with organizations oriented toward the wheat producers.

Mr. HALL. Does the gentleman mean in the promotion of the use of wheat and its products?

Mr. PURCELL. Yes; as to the use of wheat. If when this is all done, the money has not all been used, then that money will revert to the Treasury.

Let me say, this is a one-shot deal. This is money which has accumulated now under circumstances which are not apt ever to develop again. We see no reasonable prospect of it ever developing again.

The report shows, as to some large number of participants, that 832,000 potential payees are involved, and 229,000 of these would receive less than $1.

Also, 186,000 would receive payments of $5 or more, 54,000 would receive payments of $11.60 or more, and 4,900 payees would receive payments of $58 or more. The Department indicated that it does not plan to have to write checks for less than $1. This is the purpose of it. It is to try to get benefits for all producers of wheat from this amount of money, namely, something over $4 million. This will not occur again. We think that the wheat producers whose money it is will get more benefits in the true sense of the word than by having to write several thousand 58-cent or 72-cent checks.

When it was passed unanimously out of the subcommittee, there was no objection from anyone, and the full committee passed it without objection.

Mr. HALL. If the gentleman will yield further, Mr. Speaker, I want to say I appreciate his forthright and overt explanation.

I would like to say that I read and reread the committee report. I understood the small amounts of refunds involved and compliment the broad base, but nowhere could I find that first priority on the return of the money went to the individual contributor. As I understand it from his explanation, it will be so if they exercise that right within 90 days.

The rest of the gentleman's explanation has been very beneficial. I thank the gentleman for yielding.

Mr. BELCHER. Mr. Speaker, I yield such time as she may consume to the gentlewoman from Washington (Mrs. MAY).

Mrs. MAY. Mr. Speaker, I rise in support of this bill.

Mr. Speaker, the legislation before us is really the result of the excellent research and promotional activities of our wheat commissions in the major U.S. wheat producing States. Over the years, these 10 commissions—including especially those of my own State of Washington and the Pacific Northwest States—have put together an excellent record of achievement, and have clearly established that funds for research and promotion can be expended constructively and to good purpose.

The outstanding success of the wheat commissions in the areas of production research and overseas market promotion can be both supplemented and complemented through enactment of this bill to expand our national wheat research and promotional activities through utilization of the net proceeds of export marketing certificates accumulated during the 1968–69 marketing year.

As is pointed out in our committee report, recent developments in enrichment processes, flour blends, and new wheat products indicate that there is expansion potential for wheat in the field of human nutrition. And, there are also exciting prospects for wheat utilization in industrial channels.

Various wheat properties, it has been shown, lend themselves to usage as wet-and-dry-strength additives for paper and boxboard, as a substitute for carbon black in rubber manufacture, in the production of industrial alcohol—possibly for use as a motor fuel additive, as a bonding agent in plywoods and other wood products and in the production of protein films.

Basic research in many of these areas has already been completed, and the potential products need development, market testing or promotion. In some cases, additional research on byproduct marketing is needed in order to make the wheat utilization economically feasible.

Under this legislation, each producer would make the determination as to whether he wished to receive his pro-rata portion of the certificate pool, or allow it to be used for this type of research effort. He would be afforded a period of ninety days in which to request redemption of his certificates, and the decision would be an entirely voluntary, individual one on his part.

Enactment of this bill could result in

substantial benefit to the wheat industry of this Nation, Mr. Speaker, and I urge my colleagues to give it their support.

The SPEAKER pro tempore (Mr. ALBERT). The question is on the motion of the gentleman from Texas (Mr. PURCELL) that the House suspend the rules and pass the bill H.R. 13543, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

PROVIDING FOR CONTINUANCE OF CIVIL GOVERNMENT FOR THE TRUST TERRITORY OF THE PACIFIC ISLANDS

Mr. ASPINALL. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 15978) to amend section 2 of the act of June 30, 1954, as amended, providing for the continuance of civil government for the Trust Territory of the Pacific Islands, as amended.

The Clerk read as follows:

H.R. 15978

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2 of the Act of June 30, 1954 (68 Stat. 330), as amended, is amended by deleting "for fiscal year 1969, $5,000,000 in addition to the sums heretofore appropriated, for fiscal year 1970, $50,000,000 and for fiscal year 1971, $50,000,000" and inserting in lieu thereof the following: "for each of the fiscal years 1971, 1972, 1973, 1974, and 1975, $60,000,000".

The SPEAKER pro tempore. Is a second demanded?

Mr. SAYLOR. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

Mr. ASPINALL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker and Members of the House, I shall take a little more time on this particular piece of legislation than on some of the other bills that have been before us this afternoon. I think that the gentleman from Pennsylvania is inclined to do the same thing.

Mr. Speaker, the legislation now before the House, providing for the continuance of civil government in the Trust Territory of the Pacific Islands, involves a most serious obligation of the United States, to promote the political, economic, educational, and social development of these islands, and their inhabitants.

The genesis of this obligation evolves from our trusteeship agreement with the Security Council of the United Nations to act as the trustee and administering authority for this part of the world which is almost equal in total area, to the coterminus United States.

For the purpose of orientation, the Trust Territory of the Pacific Islands, often called Micronesia, embraces three major archipelagoes in the Western Pacific Ocean. They are: the Caroline Islands, the Marshall Islands, and the Marianna Islands, exclusive of Guam. The trust territory comprises some 2,141 islands, scattered over 3 million square miles of ocean, with a total land area of 687 square miles, and supports a population of approximately 100,000 people.

Since 1947, the United States has exercised its responsibility as the administering authority of the strategic trust area. In 1951, this responsibility was transferred from the Department of the Navy to the Department of the Interior.

During the past 20 years, the Committee on Interior and Insular Affairs has, in authorizing appropriations to carry on the civil government of the trust territory, been very responsive to administration authorization requests. In fact, the Committee on Interior and Insular Affairs has increased the appropriation authorizations from a low of $7.5 million in 1961 to the $50 million level for fiscal 1971. Our committee has, at the same time, requested each administration to provide a balanced program of necessary capital improvements and public works relating to health, education, transportation, and communication, and other public functions in the trust territory, to insure that our obligation under the trusteeship agreement is carried out.

While there may be some criticism of our administration of the trust territory, I want to assure my colleagues that such criticism is not directed at the financial assistance provided by the Congress.

The legislation, H.R. 15978, now before you, provides a 5-year appropriation authorization for the continuance of civil government in the trust territory. The bill provides a $10 million increase in the appropriation authorization for fiscal 1971, from $50 million to $60 million and the bill authorizes the appropriation of $60 million for each of the fiscal years 1972, 1973, 1974, and 1975.

The appropriation authorizations contained in this legislation were justified before the Committee on Interior and Insular Affairs by the administration on the basis of a 5-year planned, action-oriented program, to provide new impetus for the development of Micornesia. Approximately 40 percent of the total program will be in construction. This 5-year program only seeks to provide for the Micronesian people only those things which they can not provide for themselves—and those things which we here in this country take for granted—these things are: schools for children, access to medicine and medical care, reasonably safe and efficient ways to transport goods and people, a dependable communications system, secure title to property, clean potable water, treated sewage systems, electrical power and a growing economy.

The Committee on Interior and Insular Affairs, while endorsing this 5-year program is also attuned to the demands by some Micronesians for a stronger voice in the management and future of Micronesia. The committee is especially abreast of developments in the trust territory and, in particular, the Congress of Micronesia, concerning the future political status of the Trust Territory of the Pacific Islands. With respect to this emerging issue over the future political status of Micronesia, it will serve the best interests of the United States for the Committee on Appropriations of our Congress to carefully consider and monitor the implementation of this authorizing legislation, and to reconsider and reevaluate the level of Federal programs and expenditures in the Trust Territory of the Pacific Islands.

Administration of the Trust Territory of the Pacific Islands is a myriad of problems and shortcomings which requires a government capable of meeting the educational, economic, political, and social needs of the people. For the United States, the basic challenge is to win the hearts and minds of the Micronesian people as they strive to conquer disease, ignorance, poverty, and acute hardship. This legislation authorizes the appropriations to meet that challenge in the trust territory.

Mr. Speaker, I support and urge my colleagues to suspend the rules and pass this legislation.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. ASPINALL. I am glad to yield to my colleague.

Mr. GROSS. Mr. Speaker, I thank the gentleman from Colorado for yielding.

I have no doubt that we will have to continue to support Micronesia. But I do question the wisdom of a 5-year commitment at the rate of $60 million a year.

I shudder to think of what the situation would be if within 5 years we got into a real financial crisis in this country and found ourselves compelled to cut back on the commitments in this area. I do question in the present financial situation that prevails the wisdom of a $300 million, 5-year commitment to Micronesia.

I fervently hope we do not have a financial showdown. But I think it would be a serious situation if we were compelled to cut back after having made this commitment and assured them that we were prepared to spend $300 milllion out there.

Mr. ASPINALL. May I say to my colleague, I can understand his concern. May I say also that if that should take place; that is, those things the gentleman suggests, we need that area in friendly hands and we need it properly developed. We need these people to be fit and friendly and we need them where they can be helpful as they were during the Second World War—very helpful to us. They are so widely scattered and the area is so difficult of administration and they have such limited facilities to keep them in such position of helpfulness.

I would say to my colleague, if what he suggests does happen, this authorization ceiling does not necessarily have to be the maximum, or the minimum, either one. That would be up to the Congress at that time as they take care of the appropriations. But the money is needed at the present time for the development that is projected.

Mr. GROSS. Mr. Speaker, will the gentleman yield for one quick observation?

Mr. ASPINALL. I yield to the gentleman.

Mr. GROSS. If we can win the hearts and minds of people around the world, and we have not been successful thus far despite having spent a couple of hundred billion dollars on foreign aid in an effort to do this. I shudder to think, I say again, of what will happen when we are compelled to drastically cut back in spending after having dished out Federal funds as though money was going out of style.

Mr. ASPINALL. May I say again, I understand my colleague's concern.

These are our people. These are our friends. We want to keep them that way.

Mr. KYL. Mr. Speaker, will the gentleman yield?

Mr. ASPINALL. I am glad to yield to the gentleman.

Mr. KYL. In further response to my colleague, the gentleman from Iowa, and in specific response to his comment regarding the length of time that we would be responsible, financially or otherwise to these islands, I would say personally I hope that we would have a great deal of responsibility for a long time, in fact in perpetuity.

Under the United Nations agreement which brings us into connection with Micronesia, we are supposed to be helping those people in leading them to a time when they can determine for themselves what their governmental and political status will be.

I hope that they do decide when the proper time comes on some kind of association with the United States as many other peoples of that area of the Pacific have. At the same time I know the chairman of the full committee—and I agree completely with the gentleman from Iowa (Mr. GROSS)—is trying to guarantee these funds will be used wisely and as efficiently as possible. One of the serious problems we have had, as the chairman has suggested, is that when you try to do this job development on an annual basis, there is so much built-in inefficiency in a 12-month planning period, you just do not get the job done that you set out to do. At least now we should have some guidelines for wise expenditure of these funds.

Mr. SAYLOR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 15978, a bill to provide for the continuance of civil government for the Trust Territory of the Pacific Islands.

This bill authorizes the appropriation of $300 million over a 5-year period to carry out the functions of the civil government in the trust territory. The bill authorizes an increase of $10 million for fiscal year 1971, from $50 to $60 million, and $60 million for each of the fiscal years 1972, 1973, 1974, and 1975.

In Micronesia, the United States as the administering authority, is providing the whole range of public and private services at all levels of government which are necessary to a developing society in keeping with our objectives to bring the Micronesian people toward self-determination or independence on the basis of self-sufficiency. Involved in this program are approximately 100,000 people of six principal cultures and myriads of subcultures, scattered over 100 settled islands of separate little communities, spread over 3 million square miles of ocean.

The Trust Territory of the Pacific Islands is an area that was, and still is, in many places, devastated by World War II. Starting from the chaos of that war, the mission of the United States in the trust territory has been to create maximum self-sufficiency, adequate transportation and supply systems, an educational system, a health and medical care system, and an organized, functional government at every level. Our mission has also been to have this done to the fullest possible extent by the Micronesians themselves.

There is one basic conflict with our goals is administering the trust territory which is not clearly recognized and understood, and that is that the United States has vital national security interests in the trust territory. And, it must be clearly understood and recognized that the trusteeship agreement specifically permits the accommodation of those interests. Despite expressions to the contrary, the United States has not exploited that provision of the trusteeship agreement over the last 23 years.

The next few years will be most important in the history of the United States—trust territory relationships. These years will determine whether the people of the trust territory will continue a close relationship with the United States or seek some other status. What must be made clear during these years is that the United States will not be gouged, blackmailed, or wooed in protecting its own interests of national security or those of the people of Micronesia. The United States does not intend to engage again in military combat to gain freedom for the people of Micronesia and protect her own national security.

At the end of fiscal 1970, the United States has spent through direct appropriations $250 million in the trust territory. While our program in the trust territory has begun to move with the increased appropriations of recent years, the record of the United States does include some measurable achievement in many areas considering the magnitude of the task involved.

This legislation, H.R. 15978, provides a program of action through which the United States is demonstrating its responsiveness to Micronesian aspirations consistent with our national security requirements. In this respect this Country is keeping faith with the people of the trust territory and our obligations under the trusteeship agreement.

In view of recent actions by the Congress of Micronesia, I agree with the statement of the Chairman of the Full Committee, that the House Committee on Appropriations should carefully consider the implementation of this 5-year appropriation authorization and reevaluate the level of Federal expenditures in the trust territory. With the understanding that the House Committee on Appropriations will so act, I urge the rules be suspended on this bill, H.R. 15978, be passed.

Mr. DON H. CLAUSEN. Mr. Speaker, will the gentleman yield?

Mr. SAYLOR. I yield to the gentleman from California.

Mr. DON H. CLAUSEN. Mr. Speaker, I commend the gentleman from Pennsylvania for his statement and also commend the chairman of the committee and the members of the committee for advancing this legislation.

There is no doubt in my mind that the trust territories and the manner in which the United States handles Micronesia and other territories in the immediate future are going to have major significance as far as our ultimate success in maintaining and protecting American interests in the entire Pacific Basin. I believe the legislation before us today is a major step in the direction of giving that area the kind of attention that is long overdue.

I wholeheartedly support the legislation and look forward to working with the committee toward improving on what we have done today.

Mr. ASPINALL. Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. CAREY) chairman of the Subcommittee on Territories and Insular Affairs.

Mr. CAREY. Mr. Speaker, I rise in support of the legislation, and as a proponent and sponsor of the legislation, I commend the chairman of the full committee and the ranking minority member of the committee, and my counterpart, the gentleman from Arizona (Mr. STEIGER) who have had so much concern and have worked so hard to bring this bill to the floor today.

There is no doubt in my mind that this is mandatory legislation, and no doubt also that it will be productive of a more coordinated and unified and organized policy toward the people of Micronesia.

This is the aim the chairman of the full committee and I and other members of the committee have had for a long time in trying to get the departments downtown to work together for a clear-cut policy on our problems in connection with Micronesia. We do not understate that problem. We recognize it, and although we are far removed from the area, we are closely joined with the people of the area in what is best for the people of Micronesia, because they are joined to our interest also.

Mr. Speaker, we have had commitments by several Presidents, and at the very least we have communicated to the people of Micronesia, by President Kennedy, that at least the health facilities within Micronesia would be in the foreseeable future at least equal to the standards in the continental United States. We have not reached that goal, and it is to keep that promise that this legislation is needed, in order for us to keep our commitment, and so the people of Micronesia can understand what we mean by a close confluence between Micronesia and America in terms of human progress.

This is needed legislation, and it is in our national interest, and I hope it will enable the United States to carry out what I believe to be well-organized efforts to bring about close association with Micronesia through the use of artful and humanitarian means that will

enable the people of that area to come to an understanding of what this association means.

Mr. Speaker, it is my privilege, as chairman of the Subcommittee on Territorial and Insular Affairs, to have some part in bringing this important legislation before the House for consideration.

The bill, H.R. 15978, to provide for the continuance of civil government in the Trust Territory of the Pacific Islands, is more than an appropriation authorization. It is legislation which provides a people-to-people program. A program of human beings sharing a community of interest and wealth. Even, more so, this legislation is evidence of our dedication to meet our obligation, under the provisions of the U.N. Charter and the trusteeship agreement. This legislation authorizes the funding of the programs which foster the educational, economic, political, and social development of the Micronesian people so that they will be ready for the opportunity to exercise their right of self-determination without fear of economic oppression or ignorance.

The purpose of H.R. 15978 is to amend the basic act providing for the continuance of civil government in the Trust Territory of the Pacific Islands, by increasing the appropriation authorization by $10 million for fiscal 1971, from $50 million to $60 million, and by authorizing the appropriation of $60 million for each of the fiscal years 1972, 1973, 1974, and 1975.

This 5-year appropriation authorization was recommended by the administration and continues the evolution of our basic policy in the trust territory of providing the necessary programs in communications, education, health, transportation, economic development, and increasing the involvement of Micronesians in their own government.

Despite some views to the contrary, the civil government of the trust territory is a government administered for the benefit of the Micronesian people. This government is unique in the sense that it must provide the whole range of Federal, State, local, public, and private services necessary for the education, economic, political, and social development of the people of the trust territory. This means, from building sewers to issuing passports—from building and operating schools to setting interisland surface freight rates—from providing legal services to maintaining public roads and buildings.

The 5-year appropriation authorization contained in this legislation is not a totally American program. This 5-year program is the product of joint participation of both, the people of Micronesia, through their elected representatives in the Congress of Micronesia and at local levels, and the High Commissioner and his staff. This development coordinating committee functioned at the request of the administering authority and devoted its efforts toward determining the best action-oriented program which will lead to the achievement of specific goals in the next 5 years.

This 5-year program is based upon a new impetus being given by this Administration to the development of Micronesia. In justifying this program, the Department of the Interior made it clear that a lower level of funding will stretch out the program, involve inherent increases associated with construction planning, and will compel the making of geographic priorities within the trust territory.

As a result of the Micronesian input into the planning of this program, the Micronesian people are looking forward to improving their health and education programs and facilities, developing a viable money economy in the next five years which requires land reforms and public works improvements, increasing their ability to communicate with each other and with the rest of the world, and increasing the number of Micronesians in high-ranking and responsible positions in their government.

Some highlights of this 5-year program are as follows: In the field of education.

a. Kindergarten education opportunity will be provided to 2,200 5-year-olds—none exists now.

b. All educable children of elementary age will be in school with age-in-grade 1 to 3 comparable to the United States with assurance of progressing on an age/grade accomplishment equivalency.

c. Eighty percent of elementary school graduates will enter high school and of these 90 percent will complete high school.

d. Vocational training to meet growing skill requirements will be met through prevocational training in secondary schools and at the Micronesian Occupational Center.

e. All new teachers will have 14 years of formal education compared with 11.1 years in 1969. Teachers will spend 10–15 percent of their time to compensate for pre-service training deficiencies.

f. Classroom construction costs and time will be reduced through use of simple pre-engineered designs using local labor and, where possible, indigenous materials.

HEALTH AND MEDICAL SERVICES

The Ponape Teaching-Referral Hospital, district hospitals, and local dispersaries will be developed to adequately meet health needs—7.3 beds per 1,000 population.

TRANSPORTATION AND COMMUNICATIONS

The transportation system will be improved to provide adequate service by: construction of 370 miles of roads; bringing all district airports to FAA standards; replacing interisland ships, and by improving harbors to eliminate lightering.

WATER, SEWERAGE, AND POWER

a. All district centers are to be served with potable water, adequate sewerage, and electric power for Government, commercial, and residential demands.

b. Outer islands will have small-scale community or home water storage facilities, sanitary devices for 95 percent of the population, and electric power for principal communities.

RESOURCE, COMMERCIAL, AND INDUSTRIAL DEVELOPMENT

a. Land rights and clear titles will be provided on 84,600 parcels of privately owned land, thereby identifying the public domain lands.

b. Economic growth will be accelerated.

Mr. Speaker, there are many observers and outside experts who continue to tell us what this Nation should be doing in the trust territory. While we are appreciative of these expressions, we are more in need of advice from those who have been there and know the people of Micronesia, and those who are more interested in providing the programs and financial assistance to improve the welfare of the people, and not those who are only interested in postulating the future political status of this area without having experienced firsthand its problems and shortcomings.

Mr. Speaker, this legislation and the program it authorizes will produce goodwill and better conditions in the trust territory. In this light, the future political status of the trust territory will determine itself.

I urge that the rules be suspended and the bill be passed.

Mr. MATSUNAGA. Mr. Speaker, as a Representative of our Union's westernmost State, closest to the Trust Territory of the Pacific, I rise in support of H.R. 15978, which would provide for the continuance of civil government for the trust territory.

Twenty-three years ago, the United Nations confidently placed the Micronesian Islands under the trust of the United States. In recent years we have read reports, which have become especially numerous in recent months, indicating that unparalleled progress and development has not characterized America's stewardship. In fact, what is most disturbing is the oft-repeated assertion that life of the islanders was better before the United States assumed trust responsibility.

The U.N. trust mandate charges the United States with responsibility for promoting the economic, educational, social, and political advancement of the inhabitants of the trust territory, toward self-government or independence. Yet we waited almost 20 years before making any serious attempt to replace roads, schools, electric power, and water facilities destroyed during the Second World War.

Moreover, the World Health Organization reports that very little has been done to control outbreaks of leprosy, amoebic dysentery, and gastroenteritis—diseases that have been almost eliminated in the United States.

In spite of this long history of neglect, citizens of the trust territory have the utmost esteem for the United States. Although not compelled to do so, many of their young men are serving in our Armed Forces and giving their lives in Vietnam. Micronesian citizens are constantly demonstrating their loyalty to the country to which they look for protection.

The largest island groups coming within the U.N. trusteeship are the Mar-

shalls, the Carolines, and the Marianas, except Guam. Altogether, the trust territory comprises 2,141 islands and extends through an area of the South Pacific equal to the Continental United States. The inhabitants number about 100,000.

Mr. Speaker, H.R. 15978 would help us to improve our civil administration in the trust territory of the Pacific Islands by increasing the appropriation authorization from $50 million to $60 million for each of the 5 fiscal years commencing with fiscal year 1971.

The 5-year program will help the United States in fulfilling its pledge to promote the economic, educational, social, and political development of the people of Micronesia. Among the main goals of the 5-year program are:

First, improvement of health and education programs and facilities;

Second, development of a viable money economy requiring land reform and public works improvements;

Third, increasing the ability of the Micronesians to communicate; and

Fourth, bringing more Micronesians into high-ranking and responsible positions of government, and including the Congress of Micronesia and the district legislatures directly in the planning and budget process.

Mr. Speaker, H.R. 15978 will enable the United States to improve the nature and extent of its trust obligation in Micronesia. I therefore strongly urge a unanimous vote for the measure.

GENERAL LEAVE TO EXTEND

Mr. ASPINALL. Mr. Speaker, I ask unanimous consent that all Members desiring to do so may extend their remarks in the RECORD immediately after the remarks of the gentleman from Pennsylvania (Mr. SAYLOR).

The SPEAKER pro tempore (Mr. ALBERT). Is there objection to the request of the gentleman from Colorado?

There was no objection.

The SPEAKER pro tempore. The question is on the motion of the gentleman from Colorado that the House suspend the rules and pass the bill (H.R. 15978), as amended.

The question was taken; and—two-thirds having voted in favor thereof—the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

Mr. ASPINALL. Mr. Speaker, I ask unanimous consent for the immediate consideration of a similar Senate bill (S. 3479) to amend section 2 of the act of June 30, 1954, as amended, providing for the continuance of civil government for the Trust Territory of the Pacific Islands.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

Mr. GROSS. Mr. Speaker, reserving the right to object, would the Senate bill increase the time element, increase the 5 years, and would it increase the amount of money?

Mr. ASPINALL. Mr. Speaker, if the gentleman will yield, the Senate bill is a 2-year authorization, and after very careful study, the House Committee decided that the 5-year authorization was the only kind of extension that we could honestly bring to the floor of the House. That is the time difference in the two bills—the 5 years in the House bill and the 2 years in the Senate legislation.

Mr. GROSS. But no difference as to amount?

Mr. ASPINALL. No.

Mr. GROSS. And the Senate bill would be then amended, increasing the time to 5 years?

Mr. ASPINALL. That is right.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 3479

A bill to amend section 2 of the Act of June 30, 1954, as amended, providing for the continuance of civil government for the Trust Territory of the Pacific Islands

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2 of the Act of June 30, 1954 (68 Stat. 330), as amended, is further amended to read as follows:

"SEC. 2. There are hereby authorized to be appropriated not to exceed $50,000,000 for fiscal year 1970, and $60,000,000 for each of the fiscal years 1971 and 1972, to remain available until expended, to carry out the provisions of this Act and to provide for a program of necessary capital improvement and public works related to health, education, utilities, highways, transportation facilities, communications, and public buildings: *Provided,* That except for funds appropriated for the activities of the Peace Corps no funds appropriated by any Act shall be used for administration of the Trust Territory of the Pacific Islands except as may be specifically authorized by law."

AMENDMENT OFFERED BY MR. ASPINALL

Mr. ASPINALL. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ASPINALL: Strike out all after the enacting clause of S. 3479 and insert in lieu thereof the provisions of H.R. 15978, as passed.

The amendment was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 15978) was laid on the table.

ESTABLISHING FORT POINT NATIONAL HISTORIC SITE, SAN FRANCISCO, CALIF.

Mr. TAYLOR. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 18410) to establish the Fort Point National Historic Site in San Francisco, Calif., and for other purposes, as amended.

The Clerk read as follows:

H.R. 18410

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in order to preserve and interpret for future generations the historical significance of Fort Point in the Presidio of San Francisco, California, the Congress hereby establishes the Fort Point National Historic Site comprising the area depicted on the map entitled "Boundary Map, Fort Point National Historic Site, California", numbered NHS–POI–91,000 and dated July 1970, together with such adjacent lands as may hereafter be transferred, without monetary consideration, to the Secretary of the Interior by the Secretary of the Army. Such additional lands, which shall neither exceed ten acres of fast lands nor sixty-three acres of submerged lands, shall, when transferred, be added to the Fort Point National Historic Site and shall be administered in accordance with the provisions of this Act: *Provided,* That no transfer of lands pursuant to this section shall be consummated until sixty days after the description, terms, and conditions of the proposed transfer have been forwarded to the Committee on Interior and Insular Affairs of the House of Representatives and Senate of the United States.

SEC. 2. The Secretary of the Interior shall administer the Fort Point National Historic Site in accordance with the Act of August 25, 1916 (39 Stat. 535), as amended and supplemented (16 U.S.C. 1 et esq.), and the Act of August 21, 1935 (49 Stat. 666; 16 U.S.C. 461–467).

SEC. 3. There are authorized to be appropriated for development of Fort Point National Historic Site such sums as may be necessary, but not more than $5,250,000 (February 1970 prices), plus or minus such amounts, if any, as may be justified by reason of ordinary fluctuations in construction costs as indicated by engineering cost indices applicable to the types of construction involved herein.

The SPEAKER pro tempore (Mr. ALBERT). Is a second demanded?

Mr. SAYLOR. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from North Carolina is recognized.

Mr. TAYLOR. Mr. Speaker, I yield such time as he may consume to the gentleman from Colorado (Mr. ASPINALL).

Mr. ASPINALL. Mr. Speaker, it is a pleasure for me to rise in support of H.R. 18410 as recommended by the Committee on Interior and Insular Affairs. This bill establishes the Fort Point National Historic Site in California.

Fort Point is located in the Presidio of San Francisco. Unlike many of the other coastal forts around the country, it is readily accessible to the general public without undue interference with existing military activities. Being located, as it is, in San Francisco, this fort should serve not only the residents living in and near that major American city, but it will provide a significant attraction to the millions of tourists from all parts of the country who visit that city every year.

If enacted as recommended by the committee, H.R. 18410 will establish the historic site as of the date of its enactment. The members of the committee were concerned because the details of the agreement for the transfer of the necessary lands from the Department of the Army to the Department of the Interior were not sufficiently firm to assure the future of the site. As a consequence of this concern, it was determined that the historic site should be estab-

lished by the Congress to the extent that the two agencies had reached agreement and that the future enlargement of the site to include certain submerged and adjacent lands should be contingent upon a mutually acceptable agreement compatible with the purposes of this legislation. Sixty days before such an agreement is to be consummated, the details of the proposed transfer are to be transmitted to the Congress for review.

Mr. Speaker, the members of the committee are satisfied that the fort and the 29 acres of land on which it is located will make a suitable national historic site and that it will be capable of meeting the needs of the public in the immediate years ahead. The potential additions which the bill would permit are explicitly limited and would be necessary only to assure the integrity of the site and to accommodate the public when the visitor volume increases.

All of the lands immediately or potentially involved in this proposal are federally owned; consequenty, no land acquisition costs will be incurred. Other than annual operating costs, the only costs attributable to the project will be those associated with its rehabilitation and preparation for a large volume of visitors. It is estimated that development costs will total $5,250,000 and the bill limits the authorization to that amount. In this respect, the committee amended the cost limitation to reflect the maximum amount expected to be needed. The original appropriation ceiling contained in the bill did not include any expenditures anticipated after the first 5 years.

Mr. Speaker, that explains the nature and the purpose of H.R. 18410 very briefly. As chairman of the Committee on Interior and Insular Affairs, I believe that the bill, as amended, is sound legislation and I recommend its approval to the Members of the House.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. ASPINALL. I am glad to yield to my friend from Iowa.

Mr. GROSS. Again I thank the gentleman for yielding.

All the land for this project is to be donated by the Federal Government?

Mr. ASPINALL. That is correct.

Mr. GROSS. Yet there is $5,250,000 cost attached to this. The improvements within that area, must be in a sad state of disrepair, if it is going to cost $5,250,000 for rehabilitation.

Mr. ASPINALL. It is not in such a sad state of repair, but improvements are needed to get it ready for the use of the public.

Also, the approximately $2,190,000 is here as a contingent authorization, so that if the seawall which is present there needs rehabilitation, then the money will be available.

Mr. GROSS. If I may ask the gentleman, was this an area that the hippies and the yippies took over?

Mr. ASPINALL. No. The gentleman is thinking of Alcatraz, which was a former Federal penitentiary. This is not that area. This is an old fort. And might I say that it is one of two in the United States of a four tier construction, and, it is the only fort constructed as such on the Pacific coast.

Mr. GROSS. I thought they did stage some kind of a demonstration there. I am well aware of the demonstration and takeover of Alcatraz, but I thought there was another demonstration that was staged here, where they took this over for a short period of time.

Mr. ASPINALL. May I say to my good friend that I have been busy out in the beautiful land of the sun, Colorado, and if there had been anything like this, it did not get into our papers.

Mr. DON H. CLAUSEN. Mr. Speaker, will the gentleman yield?

Mr. ASPINALL. I am glad to yield to my colleague from California.

Mr. DON H. CLAUSEN. I would like to say to my good friend from Iowa that this is probably the least likely spot where the hippies or the yippies would be able to take over.

Mr. GROSS. I understand it is a military reservation, but that sometimes does not stop them from taking over. If I remember correctly, they invaded the Department of Justice in Washington and invaded other military installations of one kind or another.

May I ask the gentleman one other question? What is meant by "fast land"?

Mr. ASPINALL. I understand that is land that is completely attached to the shoreline.

I will be glad to yield to my friend from Iowa for an explanation of that.

Mr. GROSS. I have never seen the term before, fast land.

Mr. KYL. Will the gentleman yield?

Mr. ASPINALL. I am glad to yield to the gentleman.

Mr. KYL. There is associated with this historic site area some submerged lands, and the fact is that the term "fast land" is used to distinguish the land which is always above water from that which is submerged.

Further to respond to the gentleman's question about the development cost, the main portion of $3.5 million would be for the development of roads, parking areas, trails, and viewpoints, as well as the construction of a visitor information station. Then there is an additional $1.9 million that would probably be needed to improve the existing seawall. There will also be some slope protection and landscaping done in connection with the project.

I would also like to add for general information this piece of land which we are making into a historic site here is among the very highest valued land in the United States. If this piece of land were put up for auction, the purchase price, I am sure, would be staggering. This is some of the most valuable land in the country.

Mr. GROSS. Will the gentleman yield further?

Mr. ASPINALL. I am glad to yield to the gentleman.

Mr. GROSS. Is it more valuable than what they propose to do in Washington in trading the land near Shirley Highway adjacent to the Pentagon? I wonder if it is more valuable than that?

Mr. ASPINALL. May the gentleman in the well be excused from answering that question?

Mr. SAYLOR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 18410, a bill to establish the Fort Point National Historic Site in the city of San Francisco, Calif.

Fort Point is located on the south side of the entrance of San Francisco Bay, and near the south end of the Golden Gate Bridge. It was originally the site of an old Spanish fort in 1794, and in 1850, the area surrounding this site, commonly known as the Presidio, was declared a military reservation. The fort was reconstructed in 1853, and is one of the two forts constructed in this country with the arrangement of guns in multiple tiers. Thereafter, this fort and surrounding area, although part of the larger Presidio area, became known as Fort Winfield Scott.

This fort, like Fort Hunt and Fort Washington here on the Potomac River, and others throughout this country, represent the efforts of our forefathers in establishing the defenses and national security of this Nation. As such, Fort Point presents an outstanding opportunity to preserve this historic site. The fort has remained in relatively good condition because it has been within the confines of an active military reservation.

In 1960, the Fort Point Museum Association, an historic-minded nonprofit citizens organization in California, sought to begin the preservation of this historic site and leased some lands from the Department of the Army. They have restored a 2-acre area and operate the site as a military museum. Through the efforts of this association and without the advantages of national recognition, some 200,000 visitors each year have been able to see and enjoy this historic fort and site.

The bill, H.R. 18410, as amended by the committee, will establish a 29-acre historic site by transferring the lands from the jurisdiction of the Secretary of the Army to the Secretary of the Interior, with the potential addition of another 10 acres in the future.

Since the lands involved are federally owned, there are no land acquisition costs involved in this legislation. However, approximately $3,500,000 is needed for development and possibly an additional $1,900,000 to rehabilitate an existing seawall. The development planned will consist of roads, parking areas, trails, viewpoints, a visitor's information station, picnic areas and general repair and rehabilitation of the fort.

In my judgment, establishment of the Fort Point National Historic Site will provide a valuable addition to the nationally recognized historic sites across the Nation. These sites tell the story and history of this country and should be available for the public to enjoy.

Mr. Speaker, I urge that the rules be suspended and the bill be passed.

Mr. DON H. CLAUSEN. Mr. Speaker, will the gentleman yield?

Mr. SAYLOR. Mr. Speaker, I yield to the gentleman from California (Mr. CLAUSEN).

Mr. DON H. CLAUSEN. Mr. Speaker, I rise today in strong support of the legislation before us to establish Fort Point as a national historic site. As a cosponsor of the legislation being considered, I am particularly gratified by the prompt action of the House on this matter.

This legislation will allow the preservation of what has been termed "the best remaining example of the surviving forts of the gold rush era." According to experts in this field, none of the surviving forts of that period can compare, architecturally, with Fort Point, and it remains as the best existing example of American military architecture at its highest level.

One factor alone, in my judgment, that dictates that Fort Point should be preserved as a national historic site; that is, its proximity to one of the Nation's major metropolitan centers—San Francisco.

Located at the entrance to San Francisco Bay, Fort Point is within easy reach of the several million residents of the Bay Area and, scenically, combines a view of San Francisco Bay, the Golden Gate Bridge, and Alcatraz Island.

Fort Point would be truly unique in that it would afford visitors an opportunity to view this vast panorama, as well as the port itself and its 110 years of history.

At present, the Fort Point Museum Association, a nonprofit organization, leases approximately 2 acres from the Army, including the fort itself, and just this past summer, welcomed its 300,000th visitor to the fort. This is truly an amazing statistic, since the fort is open only on Saturdays and Sundays. The National Park Service has estimated that this tremendous structure, in the heart of a major metropolitan area, will attract 600,000 visitors annually.

Since the land on which the fort is located currently is owned by the Federal Government, there are no acquisition costs involved with the project. There will, of course, be minimal cost to restore and operate the site. The legislation merely transfers the land from the Department of the Army to the Department of Interior and establishes it as a unit of the National Park Service.

Again, I strongly urge favorable and early congressional action on this legislation.

Mr. SAYLOR. Mr. Speaker, I have no further requests for time, and I reserve the balance of my time.

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, today we consider four bills originating in the Subcommittee on National Parks and Recreation and important to the history of our Nation. The first dealing with Minute Man National Historical Park in New England has already been passed. The one that we are now considering would make a historic site of an outstanding example of American military architecture in the State of California. The third deals with a battlefield in the Midwest and the fourth establishes a historic site in the South. It just happens that they are so distributed. All, we think, hold historic value for our Nation.

This is a time when we need to turn the spotlight on American history and remind our people of the events and sacrifices which made our Nation what it is today.

Now, Mr. Speaker, the object of H.R. 18410 is to authorize the establishment of the Fort Point National Historic Site.

There are many persuasive arguments for preserving this fort as a part of the national park system. It is an outstanding example of American military architecture. Although it is not unique, it is one of only two forts built with four tiers of guns and it is the only major coastal fort on the west coast.

Thanks to the fact that it is located within an active military reserve, the fort has survived the wrecker's ball. In fact, even when the world-famous Golden Gate Bridge was constructed, its historic and architectural values were recognized and a special effort was made to save it from destruction. Now, this little American fort stands partially under the southern end of the bridge posing an extremely interesting contrast for people interested in the history of American architecture.

The structure is basically sound and unaltered, but some repairs, restoration, and refurbishing will be required to assure the safety of the visiting public and to provide for its proper interpretation.

Mr. Speaker, during the recent recess, a few members of the Subcommittee on National Parks and Recreation had an opportunity to visit this site and discuss this legislation with the commanding officer of the Presidio. As a result of our meeting, we can advise the House that the Department of the Army fully supports H.R. 18410, as amended, and that the Army will cooperate fully in making this a meaningful historic area for the edification and enjoyment of the American people.

While we did not seek any commitments with respect to the possible future transfer of the submerged lands and adjacent lands, I feel confident that suitable arrangements will be agreed upon as the needs arise. There was no objection to the immediate transfer of the 29 acres and of the fort to the Interior Department.

As the chairman of the full committee mentioned, Mr. Speaker, no land acquisition costs are involved in this legislation. Under the terms of the bill, appropriations are limited to no more than $5,250,000, but all of this money will not be needed if the potential future transfers are not consummated and some of the costs attributable to the historic site may be reduced if both the Department of the Army and the Department of the Interior benefit from some of the improvements—such as roads, seawall and pier rehabilitation, and so forth. In any event, it is not contemplated that all of the development money will be requested or appropriated in the immediate years ahead.

Mr. Speaker, in conclusion, I merely want to say that, having visited this proposed historic site, I am proud to have played a part in this legislation, because, I believe that a significant part of the story of the American Nation and her people can be told here. It is the kind of a place that makes one take stock in his country and realize that, in spite of all our problems today, it is still a great place in which to live—and its getting better all the time. H.R. 18410 will make it possible to tell what American life was like a century ago—I support it—and I urge its enactment.

Mr. BURTON of California. Mr. Speaker, will the gentleman yield?

Mr. TAYLOR. I yield to the gentleman from California (Mr. BURTON).

Mr. BURTON of California. Mr. Speaker, I rise in support of the legislation.

Mr. Speaker, H.R. 18410, which I introduced and which was coauthored by my distinguished colleague from San Francisco, Mr. MAILLIARD, and others, would establish the Fort Point National Historic Site in San Francisco, Calif.

I am grateful for the efforts of the chairman of the subcommittee which heard this bill, Mr. TAYLOR, and of the distinguished chairman of the Interior and Insular Affairs Committee, Mr. ASPINALL, without whose assistance the creation of the Fort Point Historic Site would have been impossible.

The passage of this bill by the House will be welcome news to the Fort Point Museum Association and to all others who have worked so hard to make the Fort Point National Historic Site a reality.

This area represents a significant piece of American history. The construction of the fort was authorized by the Secretary of War, Jefferson Davis, in 1852. The building of the fort was supervised by 1st Lt. George Washington Custis Lee, son of Robert E. Lee.

The only block fortress built in the West, its granite blocks were transported more than 100 miles from the Mormon Island quarries, near Folsom, Calif.

The passage of this legislation will preserve Fort Point and this important bit of American history for posterity.

Mr. MAILLIARD. Mr. Speaker, I am especially pleased that the legislation to establish Fort Point National Historic Site has finally reached the floor for consideration.

I gave the measure its first introduction to the House in July of 1967. Since then, it has experienced the usual ups and downs of the legislative process, including Senate passage in 1968 under the sponsorship of Senator Kuchel. Today the bill enjoys bipartisan cosponsorship by eight of your colleagues from Arizona, California, New York, and Puerto Rico.

We should note that setting aside old Fort Point as an historical site will have twofold significance. First, this move would provide for the conservation of valuable open space in the midst of the rapidly expanding San Francisco Bay Area metropolis. Second, the enactment of this legislation will insure the preservation of one of our Nation's unique historical sites.

I might also add that Fort Point has received considerable local support from the members of the Fort Point Museum Association. As a nonprofit educational group, its mission has been to establish Fort Point as a museum and to make its historical contents available to the public—a task which thas been successfully accomplished.

With its magnificent view from the southern base of the Golden Gate Bridge, and with its history dating from 1854, Fort Point will be an invaluable addition to our system of national parks monuments and historic sites.

Mr. Speaker, I strongly urge House approval for the bill H.R. 18410.

Mr. RYAN. Mr. Speaker, I am pleased to support H.R. 18410, establishing the Fort Point National Historic Site in San Francisco, Calif. This bill, of which I am a sponsor along with seven of my colleagues, serves to preserve the most massive brick fortification to be erected on the west coast of North America. Constructed by the U.S. Army between 1854 and 1861 to guard the Golden Gate—the entrance to San Francisco Bay—it has long been abandoned for military use. But it remains a part of America's heritage which well deserves preservation.

It is especially gratifying that the House has the opportunity to vote for H.R. 18410, not only because of its worthy end and because I am a sponsor of this legislation, but also because this bill's principal sponsor is our distinguished colleague from California (Mr. BURTON). Having served in the House with him since his arrival in Congress, and having sat on the House Committee on Interior and Insular Affairs with him, I have first hand knowledge of the dedicated commitment of the gentleman from California (Mr. BURTON). His perspicacity, his legislative know-how, his enlightened views, and his voting record mark our distinguished colleague as one of the most valuable Members of the House. It is, therefore, an honor for me to cosponsor, with the gentleman from California (Mr. BURTON), H.R. 18410.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from North Carolina (Mr. TAYLOR) that the House suspend the rules and pass the bill H.R. 18410, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

PROVIDING FOR THE ESTABLISHMENT OF THE WILSON'S CREEK BATTLEFIELD NATIONAL PARK

Mr. TAYLOR. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1160) to amend the act of April 22, 1960, providing for the establishment of the Wilson's Creek Battlefield National Park, as amended.

The Clerk read as follows:

H.R. 1160

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act entitled "An Act to provide for the establishment of the Wilson's Creek Battlefield National Park, in the State of Missouri," approved April 22, 1960 (74 Stat. 76), is amended as follows:

(a) Strike out "Wilson's Creek Battlefield National Park" in the title and in section 2 (a), and substitute "Wilson's Creek National Battlefield".

(b) Amend section 3 to read as follows:

"SEC. 3. For development of the Wilson's Creek National Battlefield, there are authorized to be appropriated not more than $2,285,000 (March 1969 prices), plus or minus such amounts, if any, as may be justified by reason of ordinary fluctuations in construction costs as indicated by engineering cost indices applicable to the types of construction involved herein."

The SPEAKER pro tempore. Is a second demanded?

Mr. SAYLOR. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

Mr. TAYLOR. Mr. Speaker, I yield such time as he may consume to the gentleman from Colorado (Mr. ASPINALL)

Mr. ASPINALL. Mr. Speaker, H.R. 1160 is a bill introduced by our colleague from Missouri, Hon. DURWARD HALL. The basic objective of the bill is to authorize the appropriation of additional funds for the development of the unit of the National Park System presently known as "Wilson's Creek Battlefield National Park." If enacted, the bill would also redesignate the area as "Wilson's Creek National Battlefield."

The establishment of this area was originally authorized by the 86th Congress. At that time, we included the usual provision limiting the amount authorized to be appropriated—the ceiling established totaled $120,000 of which not more than $20,000 was expected to be used for land acquisition. All of the lands in the battlefield, however, have been acquired and donated to the United States by the State of Missouri because of its keen interest in the historic confrontation which took place there in August 1861. It was at Wilson's Creek that many Union and Confederate soldiers saw their first and last battle of the Civil War and it was there that the future course of the State of Missouri was determined.

The battle which took place in those Missouri hills had a significant effect on the future course of the war and the events which occurred there should be fully interpreted for the visitors at the site. If H.R. 1160 is enacted, it is expected that a visitors center, a tour road, interpretive trails and footbridges, as well as other public use and interpretive facilities will be constructed. Naturally, all of these things require a substantial investment, so the bill must reflect their estimated cost. As recommended by the committee, H.R. 1160 authorizes the appropriation of $2,285,000—an increase of $2,165,000.

While this is an increased authorization, Mr. Speaker, I do want to emphasize that it contemplates a broader development program than we originally recommended in 1960 and that it does not reflect an erroneous cost estimate. In this case, the committee members feel that the additional investment is warranted; therefore, we recommend this new authority to accomplish the development program which will best serve the public interest.

In conclusion, I want to point out that the bill—like others that have come up from time to time—redesignates the area as a national battlefield. This designation will more appropriately reflect the principal feature of the area.

With that brief explanation, Mr. Speaker, I want to urge the Members of the House to approve the bill, as recommended.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. ASPINALL. I yield to the gentleman.

Mr. GROSS Mr. Speaker, if I read the report correctly concerning this bill, the State of Missouri unlike most other States contributed 1,727 acres.

Mr. ASPINALL. The gentleman is correct. Of course, there have been other States, such as the State of North Carolina and others that have likewise contributed large areas of land. It is because of this that I think you will be very much interested in this legislation and very charitable toward the increased cost of development.

Mr. GROSS. This is one of the virtues of this legislation, that the State of Missouri saw fit to purchase and turn over to the Federal Government the land necessary to create this national historic park.

Mr. ASPINALL. May I say to my friend, the gentleman from Iowa, we have two very much desired proposed national park areas that we are holding up at the present time because the States involved do not see fit to cooperate to this extent.

Mr. GROSS. I commend the gentleman and thank him for yielding.

Mr. SAYLOR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 1160.

The purpose of this legislation is to amend the act authorizing the establishment of Wilson's Creek Battlefield National Park by: First, increasing the amount authorized to be appropriated for land acquisition and development from $120,000 to $2,285,000, and second, redesignating the park as "Wilson's Creek National Battlefield."

Since this national park was established in the 86th Congress, because of its historical significance in the Civil War, the State of Missouri has donated 1,727.54 acres of land for this park. The result has been that the $120,000 appropriated by the 1960 act has been expended and additional funds are needed for development. The developments proposed include a battlefield tour road, interpretive exhibits, parking areas, battlefield trails, a visitor center with museum exhibits and administrative facilities.

In keeping with the specific designation of areas in the National Park Service, I support the redesignation of the Wilson's Creek Battlefield National Park

as the Wilson's Creek National Battlefield.

Mr. Speaker, I urge the rules be suspended and the bill be passed.

Mr. SAYLOR. Mr. Speaker. I yield such time as he may desire to the gentleman from Missouri (Mr. HALL), the author of the bill.

Mr. HALL. Mr. Speaker, I sincerely want to compliment the distinguished chairman of the House Committee on Interior and Insular Affairs, Mr. ASPINALL, and the chairman of their subcommittee on national parks and recreation, Mr. TAYLOR, for reporting H.R. 1160. Their assistance, as well as that of their committee's staff, has been invaluable.

H.R. 1160, as originally introduced, provided for the establishment of the Wilson's Creek Battlefield National Park. Basically, this bill provided for two things:

First It would redesignate the park as the "Wilson's Creek National Battlefield."

Second. It would authorize the appropriation of $2,514,000.

Mr. Speaker, the Department of Interior submitted a favorable departmental report on May 28 of this year. In that report they concurred with the changing of the name to "Wilson's Creek National Battlefield," and made one modification in regard to the amount of the authorization. Their recommendation was that the amount of "$2,285,000" be substituted for the amount of "$2,514,000" that appeared in my bill. I certainly cannot quarrel with this alteration and have been more than willing to accept it.

Now Mr. Speaker, this legislation may appear as a routine matter, but to the people of southwest Missouri it constitutes the preservation of the site of one of the two most important military engagements fought west of the Mississippi during the Civil War. This battle, which took place on August 10, 1861, was ostensibly a victory for the Confederacy, but since they failed to pursue the Union retreat they were deprived of Missouri's food supplies, minerals, arsenal, and industry.

The fury and intensity of the events that day are briefly and concisely described in the National Park Service's pamphlet in the following manner:

General Lyon, leaving 1,000 troops in Springfield to guard his supplies, decided to make a surprise attack with 5,400 troops on the Southern camp early on the morning of August 10. Minutes before the battle started, a man was said to have galloped by on a mule warning residents of the area "Git back in yore homes! Thar's goin' to be a hell of a battle here in a few minutes!" There was.

For the next five hours the hills shook with what turned out to be one of the bloodiest battles of the Civil War. The fighting was at close range, frequently hand to hand. Though this was one of the first battles of the war and many of the troops had little training, on no battlefield of the War Between the States was there a greater display of courage and bravery. Officers, many of them West Point graduates and veterans of the Mexican and Indian Wars, led their men in person.

At times, the Federals would gain a few yards, only to see their gains erased by a counterthrust. The process would then be reversed. It was later reported in the official records of the Union and Confederate armies that, during the great fury of the battle, "some of the best blood in the land was being spilled as recklessly as if it were ditch water."

Though already wounded twice, General Lyon was struck by a rifle ball in the chest as he was trying to lead another charge. He fell from his horse into the arms of his orderly and gasped, "Lehman, I am killed." Later his body was carried by the Confederates to Ray's farmhouse, a mellowed and weather-beaten frame structure which still stands.

The losses were about equal on both sides. Approximately 16 percent of the total engaged were either killed or wounded. On Bloody Hill where most of the fighting took place, 25 percent of the men were either killed or wounded. The casualties at Wilson's Creek were greater than in any battle ever fought west of the Mississippi. After the battle, the ground was so covered with dead and wounded that one eyewitness later wrote, "one could have stepped from one man to another."

Quite a day, indeed. A battle that sired the future general officer, E. G. Sturges, and others.

When this project was initiated as a joint Federal-State project the State of Missouri agreed to purchase the land. This has now been done, in that the State has spent almost $700,000 for the acquiring of 1,730 acres. It is now time for us in Washington to fulfill our responsibilities by providing the money for a visitors' center with museum exhibits, a battlefield tour road, interpretive exhibits, parking areas, and battlefield trails. These proposed facilities will go far in accommodating and informing the increasing number of visitors that visit the park each year. In addition, these proposed improvements will serve as an inducement for more and more Americans to visit this historic spot. For the committee's information 41,619 people visited Wilson's Creek in 1968. This number increased to 47,314 persons in 1969. This shows the increasing interest in this historical site.

Finally, Mr. Speaker, I respectfully hope that the House of Representatives will act favorably, in light of the fact that H.R. 1160 was unanimously approved by the House Committee on Interior and Insular Affairs, and since the Department of the Interior recommended its passage.

Finally, let us fulfill our Federal obligations since the State of Missouri has fulfilled its obligations through land acquisition; since an increase of visitors tour the site, and most importantly since this legislation would be another important step in preserving our American heritage. It is living history for today's students.

Mr. SAYLOR. Mr. Speaker, I yield to the gentleman from California (Mr. DON H. CLAUSEN).

Mr. DON H. CLAUSEN. Mr. Speaker, I rise briefly to support the legislation, but more specifically to commend the gentleman from Missouri (Mr. HALL), the author of the bill, for his presentation before the committee and his cooperation as we developed the legislation which was most commendable and which I think needs to be included in the RECORD.

He has championed the development of the Wilson's Creek National Battlefield Park, and his presentation before our committee, in advancing this legislation, was forceful, articulate, and detailed in content. The committee, as evidenced by the passage of the bill today, has responded, once again, to the very reasonable and responsible requests of our very able colleague, the gentleman from Missouri (Mr. HALL).

Mr. TAYLOR. Mr. Speaker, in 1960 the Congress authorized the establishment of the Wilson's Creek Battlefield National Park in Missouri. At that time, it was thought that it should be protected for the edification and enjoyment of the people of the United States, but only a modest development program was contemplated. H.R. 1160, if approved, will enable the National Park Service to undertake a development program more consistent with the purposes for which this site was made a part of the national park system.

The State of Missouri has been most cooperative in assisting in this effort. The Wilson's Creek Battlefield Park Commission, a State agency, acquired title to all of the lands needed for the interpretation of the battlefield—approximately 1,727 acres—and it has donated them to the United States. This has made it possible for the National Park Service to utilize all of the $120,000 authorized and appropriated to construct an entrance road, to install certain public use facilities, and to conduct archeological research and site restoration.

A number of additional improvements are planned if H.R. 1160 is enacted. It is estimated that an effective interpretive program at the site will require an investment of $2,165,000 in addition to the $120,000 already expended. These costs are based on March 1969 construction prices. Because of the fact that these construction costs fluctuate, the bill provides that the authorization limitation may be adjusted in accordance with standard construction cost indices. This will enable the Park Service to complete the development program outlined during the hearings on the bill, even if construction costs require an expenditure beyond the amounts authorized.

In this regard, however, I want to call the attention of the Members to the language contained in our report which makes it absolutely clear that the administering agency is to advise the committee if it expects expenditures to exceed the limitation imposed by the bill. We expect to be informed of these price increases prior to the request for appropriations so that we will have an opportunity to comment on them. This language in the bill is a fairly recent innovation, Mr. Speaker. It should avoid the necessity of considering minor cost changes necessitated by changing prices, but it does not authorize the Park Service to change the development plan which it presented to the committee. In other words, it allows a measure of flexibility to accomplish the objective which we are authorizing, but major changes in the development plan, requiring an increased outlay, will still require a new authorization by the Congress.

Mr. Speaker, H.R. 1160 merits the support of the Members of the House and I recommend it to my colleagues.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from North Carolina that the House suspend the rules and pass the bill H.R. 1160, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

AUTHORIZING THE ESTABLISHMENT OF THE ANDERSONVILLE NATIONAL HISTORIC SITE, GA.

Mr. TAYLOR. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 140) to authorize the establishment of the Andersonville National Historic Site in the State of Georgia, and for other purposes, as amended.

The Clerk read as follows:

H.R. 140

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in order to provide an understanding of the overall prisoner-of-war story of the Civil War, to interpret the role of prisoner-of-war camps in history, to commemorate the sacrifice of Americans who lost their lives in such camps, and to preserve the monuments located therein, the Secretary is hereby authorized to designate not more than five hundred acres in Macon and Sumter Counties, Georgia, for establishment as the Andersonville National Historic Site.

SEC. 2. Within the area designated pursuant to section 1 of this Act, the Secretary of the Interior may acquire by donation, purchase with donated or appropriated funds, transfer from any Federal agency, or exchange lands and interests therein for the purposes of this Act. When an individual tract of land is only partly within the area designated, the Secretary may acquire the entire tract by any of the above methods to avoid the payment of severance costs. Land so acquired outside the designated area may be exchanged by the Secretary for non-Federal lands within such area, and any portion of the land not utilized for such exchanges may be disposed of in accordance with the provisions of the Federal Property and Administrative Services Act of 1949 (63 Stat. 377), as amended (40 U.S.C. 471 et seq.). In exercising his authority to acquire property by exchange, the Secretary may accept title to any non-Federal property within such area, and in exchange therefor he may convey to the grantor of such property any federally owned property in the State of Georgia under his jurisdiction which he classifies as suitable for exchange or other disposal. The values of the properties so exchanged either shall be approximately equal, or if they are not approximately equal the values shall be equalized by the payment of cash to the grantor or to the Secretary as the circumstances require. Notwithstanding any other provision of law, Federal property designated for the purposes of the national historic site may, with the concurrence of the head of the agency having custody thereof, be transferred, without a transfer of funds, to the administrative jurisdiction of the Secretary of the Interior for the purposes of this Act.

SEC. 3. The Secretary of the Interior shall administer the Andersonville National Historic Site in accordance with the Act of August 25, 1916 (39 Stat. 535), as amended and supplemented (16 U.S.C. 1 et seq.), and the Act of August 21, 1935 (49 Stat. 666; 16 U.S.C. 461–467).

SEC. 4. There are authorized to be appropriated not more than $363,000 for the acquisition of lands and interests in lands and not more than $1,605,000 (March 1969 prices), for development, plus or minus such amounts, if any, as may be justified by reason of ordinary fluctuations in construction costs as indicated by engineering cost indices applicable to the types of construction involved herein.

The SPEAKER pro tempore. Is a second demanded?

Mr. SAYLOR. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The Chair recognizes the gentleman from North Carolina (Mr. TAYLOR).

Mr. TAYLOR. Mr. Speaker, I yield such time as he may consume to the gentleman from Colorado (Mr. ASPINALL).

Mr. ASPINALL. Mr. Speaker, the bill now before the House is H.R. 140 by our colleague from Georgia (Mr. BRINKLEY). It provides for the establishment of the Andersonville National Historic Site.

It may seem strange to some people that the Congress would consider legislation to designate a place which is infamous in the annals of history as a national historic site, but the members of the Committee on Interior and Insular Affairs recognize the historic significance which this prison camp, and others like it, played in the course of our history. Like Ford's Theater and all of the national battlefields in the country, Andersonville was a place of great tragedy. Like other Civil War prison camps established by both the North and the South, Andersonville was overcrowded and plagued by disease and starvation. The inhuman conditions which existed there were not unique in those times, and unfortunately have not been uncommon elsewhere in the decades that have followed.

No other place comparable to Andersonville exists in this country today. The existing prison park contains the corners, gates, and outline of the stockade and memorials mark the loss of men from Connecticut, Illinois, Indiana, Iowa, Maine, Minnesota, New Jersey, New York, and Pennsylvania. By making this relatively small area a national historic site, we memorialize not only those who sacrificed their lives at this place and time, but the thousands of men from all parts of the country who have perished as prisoners of war.

Mr. Speaker, if enacted, H.R. 140 will create a national historic site comprising approximately 500 acres of land. Almost half of this is federally owned—211 acres—and will be transferred to the Department of the Interior without cost, the remainder—294 acres—will be purchased at an estimated cost of $362,000. Development of the area, which will include the construction of an interpretive center, walking trails, picnic areas, and the restoration of the landscape is expected to require an additional $1,605,000 over a 5-year period.

I particularly want to call the attention of the Members of the House to one of the amendments recommended by the committee. As has been our usual practice, we recommend that the amount authorized to be appropriated be limited to the amounts which we were told would be needed to effectuate this legislation. In recent times we have imposed these limitations on both land acquisition and development funds. Because of the fact that construction costs fluctuate from time to time and because the construction activities are often spread across a period of several years, it seems appropriate to provide some measure of flexibility with respect to development moneys. Consequently, the committee is recommending that the development cost limitations be tied to standard construction cost indices. This means that to the extent that the development of a particular facility increases or decreases in accordance with these indices, the authorization fluctuates accordingly. This language is not intended to authorize the administering agency to substantially alter its development program and thereby cause an increase to be incurred—that action would require additional legislation.

In exercising its oversight authority, the committee expects to be fully advised of all circumstances which may cause this escalator clause to be implemented. To the extent possible, we expect to be informed of this fact before any binding commitments are executed and, most certainly, we expect to be advised of the necessity for funds above the amounts specified before any additional appropriations are requested. It is with this understanding that the committee included this language in the legislation.

In conclusion, Mr. Speaker, I want to emphasize that the Andersonville National Historic Site is undoubtedly a nationally significant place. The events which occurred there may not represent our finest hour, but they are a part of the history of this Nation which we must recognize, which we must try to understand, and from which we should learn.

The members of the Committee on Interior and Insular Affairs considered this matter carefully and we recommend the enactment of the bill, as amended.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. ASPINALL. I am glad to yield to the gentleman from Iowa.

Mr. GROSS. I should note something that I neglected to point out earlier, and that is the coincidence of having passed the preceding bill to establish the Wilson's Creek Battlefield National Park in the district of the gentleman from Missouri (Mr. HALL). This is today his birthday. He refuses to divulge his age, but says he is 39 and still counting. I congratulate the gentleman from Missouri on his birthday and thank the gentleman from Colorado for yielding.

Mr. ASPINALL. May I say in reply to my colleague from Iowa that I saw the gentleman from Missouri (Mr. HALL), before the session began today and asked of him charity and peace, and extended to him all good wishes on this day—his natal celebration.

(Mr. SAYLOR asked and was given

permission to extend his remarks at this point in the RECORD.)

Mr. SAYLOR. Mr. Speaker, I rise in support of H.R. 140, the bill to authorize the establishment of the Andersonville National Historic Site in the State of Georgia.

The bill authorizes the Secretary of the Interior to designate not more than 500 acres of land for the establishment of the Andersonville National Historic Site in Macon and Sumter Counties in the State of Georgia. The bill also authorizes the acquisition of 294 acres of privately owned lands at an estimated cost of $362,000 and $1,605,000 for development. The additional 201 acres are already in Federal ownership including an 84-acre prison park and a 117-acre national cemetery which are presently administered by the Department of the Army.

The story told here at Andersonville, Ga., and its relationship to the Civil War and the struggle of this Nation to achieve its manhood deserve national recognition. While there still are some people who do not wish to recognize the cohesive and unifying effect of that internal and bitter struggle, there is no single event in the great history of this Nation which portrays so vividly the frailties of human beings and the determination and wisdom of those who sought to preserve a more perfect Union. The result has been the growth and development of this Nation as a world power unforeseen in the previous history of the world.

Mr. Speaker, I urge the rules be suspended and the bill be passed.

Mr. TAYLOR. Mr. Speaker, H.R. 140, by Representative JACK BRINKLEY, authorizes the establishment of the Andersonville National Historic Site in the State of Georgia.

The story which this historic site can tell the visiting public is an important one. In many ways, it is an unpleasant one because it evokes a story of pain and suffering almost beyond imagination. But a far more important story can be told at Andersonville than the gory details of disease and malnutrition that stalked many of the crowded prison camps of the Civil War period.

Many places in the national park system have been set aside as a tribute to the contributions of Americans who have helped to make this Nation what it it, but there is no area comparable to Andersonville. Here the contributions of American prisoners-of-war can be told. Andersonville is the last remaining Civil War period site where that aspect of our history can be explained.

As contemplated by the bill, Mr. Speaker, the historic site would include the old prison camp and the Andersonville National Cemetery. It is expected that the National Park Service will acquire the lands needed to connect these two areas and that the acquired grounds will be restored, as nearly as possible to their natural condition. Of the lands included in the site, 211 acres are already federally owned and the Department of the Army endorses their transfer to the Interior Department for this purpose. The remaining 294 acres of land are privately owned and will be purchased or acquired, if possible by exchange.

Proper development of this area is extremely important if it is to accomplish its mission. I am confident that the National Park Service will utilize its talented personnel so as to make this area a meaningful memorial not only to those imprisoned there, but also to the patriots who have struggled—at home and abroad—and suffered the anguish and loneliness of captivity.

The enactment of H.R. 140 is highly appropriate, Mr. Speaker, and I urge my colleagues in the House to approve it.

(Mr. BRINKLEY (at the request of Mr. TAYLOR) was granted permission to extend his remarks at this point in the RECORD.)

Mr. BRINKLEY. Mr. Speaker, as the author of the legislation which would authorize the establishment of the Andersonville National Historic Site, I wish to compliment the distinguished chairman of the Subcommittee on National Parks and Recreation, the gentleman from North Carolina, for the excellent manner in which he has presented this legislation today. Also, I want to thank the distinguished chairman of the full Interior and Insular Affairs Committee, the gentleman from Colorado, and all other members of the committee, for holding hearings and reporting favorably on this bill which I believe, on its merits, has so much national appeal.

It would seem to be right and proper to establish this site in order to honor the memory of the men who gave their lives for the preservation of the Union but who sleep in the soil of their then alienated countrymen. From personal observation, I can attest to the inspiration of the monuments erected to their memory by the States from which they come.

As Members of this august body know, Andersonville Prison was the largest and most publicized of the prison war camps, and is the only Civil War prison site in the Nation physically in existence and still untouched by urban growth. It has been my privilege to work very closely with local citizens in their attempts to develop this site into a proper historical memorial, and I sincerely believe that these efforts have much merit and are of great national interest. I feel certain that this site, when developed, will be an outstanding point of interest and will attract many, many thousands of visitors each year. A large population is within an easy day's drive of the site and this includes significant portions of Alabama and northern Florida. It is located approximately 60 miles south and west of Macon, Ga., approximately 120 miles south of Atlanta and approximately 50 miles south and east of Columbus, Ga. Interstate 75 runs approximately 25 miles east of Andersonville and the site is also easily accessible to other main road connectors and hence readily available to all of our Nation's citizens.

This legislation has been enthusiastically supported by all of the local communities in the area and attested to by written resolutions and letters of endorsement from local city governments and also from the Governor of the State of Georgia, the Georgia State Department of Industry and Trade, the State historical commission, and local chamber of commerce which were presented at the committee hearings on this proposal.

I have some excellent photographs with me showing several monuments erected by States whose sons fought with the Union. These again attest to the interest and reflect the strong national appeal of Andersonville. I would be happy for you to come by and look at these touching photographs and observe them more closely.

I commend the National Parks Service for developing a plan for this site which will offer the untold overall prison story of the Civil War, as well as the role of the war camp history, and wish to strongly urge your approval of this measure.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from North Carolina that the House suspend the rules and pass the bill H.R. 140, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF H.R. 18306, INTERNATIONAL FINANCIAL INSTITUTIONS

Mr. BOLLING. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1179 and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 1179

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 18306) to authorize United States participation in increases in the resources of certain international financial institutions, to provide for an annual audit of the Exchange Stabilization Fund by the General Accounting Office, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Banking and Currency, the bill shall be read for amendments under the five-minute rule by chapters instead of by sections. It shall be in order to consider without intervention of any point of order the amendment recommended by the Committee on Banking and Currency now printed on page 8, line 6 through line 10 of the bill. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from Missouri (Mr. BOLLING) is recognized for 1 hour.

Mr. BOLLING. Mr. Speaker, I yield 30 minutes to the gentleman from California (Mr. SMITH), pending which I yield myself such time as I may consume.

Mr. Speaker, this resolution provides for an open rule. As those who listened will know from the reading of the resolution, the rule provides the bill shall be read for amendment under the 5-minute rule by chapters instead of by sections.

The waiver of points of order is to a section which provides for an alternate Executive Director for the Inter-American Development Bank. We were told in the Rules Committee that the provision was not germane, and that is why we granted the waiver.

Mr. Speaker, as far as I know, there is no controversy whatsoever on the rule. I, therefore, reserve the balance of my time.

Mr. SMITH of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the gentleman from Missouri has adequately explained the rule and the reason for the waiver of points of order.

As far as the bill is concerned, the purpose of the bill is to increase our quotas and subscriptions to several international financial institutions. Rather than report several bills, as has been the case in the past—one for each such institution—the committee has combined them all in one bill.

The bill provides for congressional approval for a U.S. contribution of $100,000,000 to the Asian Development Bank's consolidated special fund. This contribution will be made in three installments: in fiscal 1970, $25,000,000; in 1971, $35,000,000; in 1972, $40,000,000. Our contribution would be in the form of noninterest-bearing letters of credit.

Loans from the special fund are for high priority development projects in emerging nations. Interest rates range from 1½ to 3 percent with repayment periods of up to 40 years. Projects assisted deal with land irrigation and development, transportation and highway development, and power transmission projects.

The bill authorizes the U.S. Governor to the International Monetary Fund to agree to an increase of $1,540,000,000 in the U.S. quota to the Fund. Our representative is also authorized to agree to an increase of $3,000,000,000 in capital stock of the World Bank. The U.S. share of the increase would be $246,100,000, of which 10 percent would be immediately paid in and the remaining 90 percent would be subject to call as needed. On both these actions, prior to voting for such changes, our Governor to the International Monetary Fund must have congressional approval.

Of the $1,540,000,000 increase in the U.S. quota in the Fund, 25 percent, or $385,000,000, is payable in gold. The balance will be paid in the form of a letter of credit held by the Fund.

The International Monetary Fund, established in 1946, is used by the nations of the world to adjust their trade balances and assist them in overcoming shortrun fiscal and monetary difficulties in their balance of payments. The United States last used its resources in 1964–66. The increased quotas agreed to by the bill are equal to about 25 percent of the current quotas. Nations generally will be called on to increase their contribution by some 25 percent, based upon a formula. U.S. participation will be increased by 29.8 percent. Upon payment of this increased quota, nations will receive their full quota under the new special drawing rights program, a new international asset for settling trade balances and balance of payments outlays.

At the same time, the World Bank is seeking to increase its capital stock by $3,000,000,000. The U.S. share, based on formula, is $246,100,000. Again, congressional approval is required before the U.S. representative can agree to the increase. Only 10 percent of the increase must be immediately paid in; the remaining 90 percent is subject to be called as required.

The bill also provides for increasing the resources of the Inter-American Development Bank by authorizing an increase of the capital stock of the Bank by $2,000,000,000. Member nations will then subscribe to their proportionate share of such new stock. The share of the United States is $823,520,000. Of this total amount $673,520,000 will remain callable by the bank at some future time. The remainder, $150,000,000 will be paid into the Bank in three annual payments of $50,000,000, beginning in fiscal 1971. The United States will also contribute $1,000,000,000 in three annual payments to the Fund for special operations of the Bank.

The first payment, due in fiscal 1971, is $100,000,000. The balance will be paid in two equal payments of $450,000,000 each in 1972 and 1973.

The committee report emphasizes that the total actual cost to the U.S. Treasury of this legislation will probably not exceed $1,270,000,000, and that this total cost will be spread out over many years.

The bill authorizes a GAO audit, subject to control by the Secretary of the Treasury, of the operations of the exchange stabilization fund, a device within the Treasury for handling financial dealings with foreign countries. In order to insure that such operations remain confidential, the Secretary is given authority to remove from GAO audit any matter he determines to be internationally significant. Regular audits will still be carried on, as currently provided by statute, by auditors of the Treasury Department.

Finally, the bill requires that the National Advisory Council on International Monetary and Financial Policy, in its annual report to the Congress, shall include a statement with respect to each loan made by the World Bank, the Asian Development Bank, and the Inter-American Development Bank. This statement must state the position of the U.S. representative with respect to each loan, and how such loan will benefit the people of the recipient country. With respect to member nations of the Inter-American Development Bank, such report must also state the measures taken by each country to reduce its military expenditures and to strengthen democratic institutions.

Mr. Speaker, I know of no objection to the rule, and I urge its adoption.

Mr. BOLLING. Mr. Speaker, I have no further requests for time.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

CALL OF THE HOUSE

Mr. GROSS. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

Mr. PATMAN. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 294]

Abbitt	Feighan	Murphy, N.Y.

Fascell	Morton	

The SPEAKER. On this rollcall 303 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

INTERNATIONAL FINANCIAL INSTITUTIONS

Mr. PATMAN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 18306) to authorize U.S. participation in increases in the resources of certain international financial institutions, to provide for an annual audit of the exchange stabilization fund by the General Accounting Office, and for other purposes.

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the con-

sideration of the bill, H.R. 18306, with Mr. BURKE of Massachusetts in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Texas (Mr. PATMAN) will be recognized for 1 hour, and the gentleman from New Jersey (Mr. WIDNALL) will be recognized for 1 hour.

The Chair recognizes the gentleman from Texas (Mr. PATMAN).

Mr. PATMAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, H.R. 18306 would provide increases in the resources of four great multilateral institutions, the International Monetary Fund, the World Bank, the Inter-American Development Bank, and the Asian Development Bank.

Mr. Chairman, immediately after the House met today the Speaker of the House read a message to him from the President of the United States in which it was stated, and I will read the first paragraph, and only parts of the others:

DEAR MR. SPEAKER: There is now pending before the House a bill of vital importance to the international economic and financial interests of the United States. H.R. 18306 authorizes increased U.S. participation in four multilateral financial institutions: The International Monetary Fund, the World Bank, the Inter-American Development Bank, and the Asian Development Bank.

On page 2 it says:

Passage of the legislation is essential

To maintain United States leadership in international monetary affairs and to avoid a substantial and continuing loss in our share of allocations of Special Drawing Rights beginning on January 1, 1971;

To enable other countries to subscribe to almost $2 billion of World Bank capital stock and to carry out a policy of maintaining equity in Bank and Fund subscription which we have strongly advocated in the past;

To allow us to participate with other developed countries in the peaceful development in Asia;

To join with our Latin American neighbors in an effort to speed economic and social progress.

The last paragraph says:

This legislation has my full support. I believe that the national interest will be served by passage of H.R. 18306, and I strongly urge prompt and favorable action by the House of Representatives.

Sincerely,

RICHARD NIXON.

Mr. Chairman, first, H.R. 18306 would allow the United States to participate in a 35-percent increase in the quotas of the International Monetary Fund. Our share would be $1,540 million to be paid one quarter in gold and the remainder in the form of a letter of credit. This quota increase would be a monetary transaction and would not involve any budgetary outlay.

The International Monetary Fund is the institution through which free world countries conduct their monetary affairs and lies at the center of international economic relations. Each country's balance of payments encompasses the full range of its economic and political relations with other nations—trade, travel, investment, military spending, and foreign aid. The international monetary system links national payments positions, and hence the domestic economies of all countries. It must function smoothly if world trade, international investment and political relations among nations are to prosper—particularly since imbalances inevitably arise as some countries temporarily spend more abroad than they earn, while others correspondingly earn more than they spend.

The proposed quota increases in which this bill would authorize U.S. participation are required to expand the Fund's resources to match today's increased levels of world trade and capital movements. The size of Fund quotas determines a country's drawing rights, the ability to use the exchange resources of the Fund, and also the amount of Special Drawing Rights which a member is entitled to. It is clearly to our advantage to ensure that the Fund's supply of exchange resources is maintained at an adequate level. Further, failure to accept our quota increase would mean we would receive $135 million less in SDR allocations on each of the next two allocation dates, January 1, 1971, and January 1, 1972.

H.R. 18306 would also authorize the United States to vote for a $3 billion increase in the authorized capital stock of the World Bank and to subscribe to $246.1 million of the capital stock of the Bank, 10 percent of which would be paid in and the remainder of which would be callable in the unlikely event of a default by the Bank on its obligations. The U.S. subscription would represent 11 percent of the total $2,222 million to be subscribed by 75 members. The increases in subscriptions to the World Bank are designed to parallel the increases in quotas in the Fund. Countries which have increased in economic strength beyond the average have been assigned quota increases in the Fund beyond the general level of 25 percent by which all quotas are to be increased. The subscriptions to the Bank are designed to reflect in the Bank the shifts in economic strength which are thus reflected in quota increases in the Fund. This policy of parallel increases in the Bank to reflect changes in position in the Fund is one of long standing, but this is the first time that the United States has been asked to take such a special increase.

The World Bank is the sister institution of the Fund and stands as the premier multilateral institution in the field of development finance. It has set the pattern and standard for other multilateral development finance activities. The World Bank finances its loan operations primarily through borrowing in the world's capital markets. This borrowing is backed by the Bank's callable capital which can be called in the event of a default by the Bank on its debt obligations. The Bank has an excellent credit standing and borrows at near government rates. It relends these borrowed funds at rates and on terms which reflect its own borrowing costs and repayment obligations.

The largest outlay which H.R. 18306 would authorize would be for the Inter-American Development Bank. This is appropriate in light of the special importance Latin America has for this country and our traditional close relationship with our neighbors to the south. Our contributions to the IDB would be of three different types, paid-in capital, callable capital, and a contribution to the Fund for Special Operations.

The IDB has an ordinary lending window, like the World Bank, which makes loans on conventional terms. Like the World Bank, the IDB has paid-in capital and callable capital, the latter to be used as backing for borrowing in the world's capital markets. The IDB has borrowed successfully in the United States, Europe, Canada, and Japan. In addition, short-term bonds have been placed with central banking agencies in Latin America. H.R. 18306 would authorize a U.S. contribution of $150 million to the paid-in capital of the IDB payable in three equal annual installments and a subscription of $673.52 million to the callable capital of the IDB, to be subscribed half in fiscal year 1971 and half in fiscal year 1973, but payable only in the event of a default by the Bank on its obligations. These subscriptions to paid-in and callable capital will enable the IDB to accelerate its lending from ordinary capital resources.

The IDB also has a soft loan facility known as the Fund for Special Operations or the FSO. Loans from the FSO are made on concessional terms for projects of an infrastructure nature which do not generate immediate cash flows and to countries which cannot afford the foreign exchange burden of conventional repayment schedules and rates. The bill would authorize a U.S. contribution of $1 billion to the FSO payable $100 million in fiscal year 1971 and $450 million in each of the following 2 years. The immediate budgetary impact of these payments will be mitigated by the letter of credit payment procedure planned for the cash contributions authorized by this bill. In lieu of cash the United States will pay in nonnegotiable, noninterest-bearing letters of credit. There is no budgetary impact at the time these letters of credit are issued. The banks, once they have received these letters of credit, may make loan commitments against them. Actual cash is transferred by the United States as needed to pay presented bills of contractors and suppliers. The Banking and Currency Committee report on H.R. 18306 estimates that through the use of this letter of credit procedure, the budgetary impact of this bill will be $35 million in fiscal 1971, $68 million in fiscal 1972, and $155 million in fiscal 1973. The remaining impact will be spread into future years.

Another aspect of this bill which deserves emphasis is the fact that the multilateral approach serves to mobilize other countries' resources in the development effort. In particular, with regard to the Fund for Special Operations that fact can be dramatically illustrated. For every $2 the United States is putting up, Latin American countries will put up $1. Contrast this to the situation when the IDB was just getting underway. Taking the Social Progress Trust Fund and the FSO together the U.S. put up $11 for soft

loan resources for every $1 contributed by Latin American countries. In the 1964 contributions this ratio was reduced to 8 to 1, in 1965 to 5 to 1, and in 1967 to 3 to 1.

Finally, H.R. 18306 would authorize a contribution of $100 million to the soft loan facilities of the Asian Development Bank.

The Asian Development Bank is the regional development bank of Asia. It is truly an Asian bank. Its regional members have contributed a majority of the resources and the United States has only a 20-percent share of $200 million, being matched in ordinary capital contributions by Japan.

The limited nature of U.S. participation is appropriated in view of the strength of Japan and its ability to contribute substantially to development efforts. At the time, U.S. participation, while not dominant, serves to manifest our interest in the peaceful development of Asia.

The contribution to the Asian Development Bank which would be authorized by this bill has built-in features which will insure that others do their fair share. The bill provides that the U.S. contribution may not be the single largest contribution nor may it constitute more than half the funds provided by all countries to the Special Funds of the ADB.

Payment would be made in the form of nonnegotiable, non-interest-bearing letters of credit so that, again, the budgetary impact will be deferred.

The Asian Development Bank, founded in 1966, is young, but it has already demonstrated its ability to handle resources effectively and channel them into the necessary development of Asia.

Mr. Speaker, I firmly believe that multilateral development finance institutions are deserving of increasing levels of support. They serve to effectively mobilize both public and private resources for the development process. They provide technical expertise and a forum for the exchange of ideas between donor and donee states. The International Monetary Fund, too, needs continued support and increased resources to carry out its vital functions. It has come to play the leading role in the free world's monetary affairs. H.R. 18306 takes into account these factors while insuring that our participation is kept at levels which we can afford. I strongly urge its passage.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from Iowa.

Mr. GROSS. Well, it is very fascinating to hear the gentleman from Texas say that this is not going to cause any outflow of capital from the United States. I do not know of any reason why we should have this bill here if that is what it means. This bill is meaningless if it does not mean an outflow of capital supplied by the taxpayers.

I am particularly interested at this moment in the timing of all of the propaganda in favor of this bill. The message from the President that came in today—the demand that this bill be passed before somebody takes off on a junket to Europe—and all that sort of thing.

I would not be surprised, before the afternoon is over, to hear that there are unidentified submarines lurking off our shores or unidentified planes in the sky as a crisis reason for passing this legislation, which is going to add a huge burden to the already bad financial situation in this country.

I never cease to be amazed by statements that the House can approve bills such as this one, to provide more than $3 billion of additional financing for international institutions. Yet it is not going to cost a stinking dime.

Mr. Chairman, I thank the gentleman for yielding.

Mr. PATMAN. May I say to the gentleman that did not, at least I did not intend to say to the gentleman, that it would not cost us a dime. If I made that statement, I was in error. I said that for this fiscal year the cost, the investment, will not run more than $35 million. It is allocated in a way in subsequent years that there will not be any hardship on our country.

Mr. FULTON of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman.

Mr. FULTON of Pennsylvania. May I ask first, is this an increase, and if it is, over last year's authorization, how much is the increase; and, second, does this add to the total U.S. debt, and, if so how much?

Mr. PATMAN. The esteemed and most able and competent gentleman from Wisconsin (Mr. REUSS) is the chairman of the subcommittee that handles this particular legislation. I know he is prepared to cover that. I do not wish to duplicate his answer at this time.

Mr. HAYS. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman.

Mr. HAYS. Mr. Chairman, how much money are we going to put into this whole business? Did I not hear the gentleman say that the bill is for some $1,500,000,000?

Mr. PATMAN. Ultimately—in part, yes—but over a long period of time.

The gentleman from Wisconsin (Mr. REUSS) will allocate that the way it should be allocated according to the bill.

Mr. HAYS. If the gentleman will yield further, I understood that the gentleman read part of a letter from the President asking for this expenditure.

Mr. PATMAN. Yes, sir.

Mr. HAYS. This is the same President who says that we cannot afford more money for education; is it not?

Mr. PATMAN. Yes, sir.

Mr. HAYS. And he is the same President who says we cannot afford more money to clean up our streams; is it not—and the same President who says we cannot afford more money for air pollution; is it not?

Mr. PATMAN. Yes, to an extent.

Mr. HAYS. But we can afford $1,500,000,000 to put in these banks where even the employees, as I understand in one instance, can borrow money from them without very much security, if any.

It seems to me if the President is worried about balancing the budget and about priorities, he does not show much indication of it here. I do not think anyone who has the interest of the United States at heart ought to vote for this.

Mr. PATMAN. This will be fully discussed.

Mr. Chairman, I would like to reserve the remainder of my time and yield to the gentleman from Wisconsin (Mr. REUSS) such time as he may require.

The CHAIRMAN. The gentleman from Wisconsin (Mr. REUSS) is recognized.

Mr. REUSS. Mr. Chairman, H.R. 18306 authorizes U.S. participation in increases of the resources of four multilateral financial institutions: the International Monetary Fund, the World Bank, the Inter-American Development Bank, and the Asian Development Bank. One of these institutions, the Fund, is concerned with financial relationships among nations, the other three with development lending.

Our participation in these institutions brings important advantages to the United States. We must continue and sustain this record of success.

PROVISIONS OF THE BILL

These are the basic provisions of the bill:

First. It would authorize the U.S. Governor of the Fund to consent to an increase of $1,540 million in the U.S. quota in the International Monetary Fund and authorize an appropriation for that purpose.

Second. It would authorize the U.S. Governor of the Bank to vote for a $3 billion increase in the capital stock of the Bank, subscribe to 2,461 additional shares of the Bank's capital, and authorize an appropriation of $246.1 million for this purpose.

Third. It would extend existing legislation by allowing the U.S. Governor of the Fund to vote for allocations of Special Drawing Rights to the United States in any future basic period in an amount equal to the U.S. quota in the International Monetary Fund.

Fourth. It would authorize the United States to subscribe to an increase of $823 million to the Ordinary Capital of the Inter-American Bank, and to pledge $1 billion in contributions to the Bank's Fund for Special Operations, as well as authorize appropriations for these purposes.

Fifth. It would authorize the United States to enter into an agreement with the Asian Development Bank providing for a U.S. contribution of $100 million to the Special Funds of the Bank and to authorize appropriations for this purpose.

Since World War II the United States has been a prime mover in the free world's international financial institutions. Our initial involvement was based on the conviction that the partnership of nations forged for the needs of war should be continued for the works of peace. The success of these endeavors can be seen in the growth they have achieved and the outstanding records of accomplishment they have compiled.

The Fund, at the end of its first full year of operation had 44 member nations

and resources of $6.5 billion. By the end of 1969 it had grown to a membership of 115 nations and resources of $21.3 billion.

The Fund has recently assumed additional responsibilities in administering the new Special Drawing Rights. It is the primary institution for multilateral cooperation in international monetary matters.

The World Bank had a total of $7,670 million of authorized capital subscribed by June 30, 1946. Today it has $23 billion of subscribed capital. Through the end of calendar year 1969 the Bank had signed agreements providing for loans of over $13.4 billion, of which $9.9 billion had been disbursed. Recently the Bank has greatly increased its lending activities in line with expanding opportunities for the productive use of capital in the developing countries. Loan agreements committing over $1.8 billion were concluded between July 1, 1968, and December 31, 1969.

Alongside the original organizations, the Fund and Bank, have grown up others with specialized roles or specialized geographic areas of focus—the International Finance Corporation, the Inter-American Development Bank, the International Development Association and the Asian Development Bank.

By serving the world well, these institutions have served the United States, because only in a world of growing economies and expanding trade can we in this country continue to enjoy the fruits of our own economy. The progress and prosperity of the United States are inextricably intertwined with the progress and prosperity of the rest of the world.

ADVANTAGES OF MULTILATERAL INSTITUTIONS

The principal advantages of multilateral financial institutions are burden-sharing and economic expertise.

Through these institutions other developed countries share with the United States the cost of providing development assistance, as other nations have grown in economic strength, our share of the financial cost has declined. Looking at the record since 1945, we can see a steady reduction in the percentage of financial participation of this country. This is a major advantage for the United States.

In the Fund the United States had 34.37 percent of the initial proposed total of Fund quotas. Today the United States has 24.17 percent of Fund quotas. If the pending quotas increases become effective, the percentage will decline to 23.16 percent.

In 1945 the United States subscribed to almost 35 percent of the original proposed subscriptions of the World Bank. The present U.S. subscription is 27.53 percent. It will decline to 26.04 percent if the pending increases in the resources of the Bank become effective.

Looking at the Inter-American Development Bank in the early 1960's, the first years of the Bank, for every $1 of Latin American money the United States contributed $11 to the soft loan resources of the Bank. In 1964 the ratio was $1 to $8, in 1965 $1 to $5, and in 1968 $1 to $3. Under the provisions of this bill, this ratio would be further reduced to $1 to $2.

In the Asian Bank, we have just under 20 percent of the total capital, and Japan has an equal share.

To illustrate the burden-sharing involved in this proposal, I point out that other countries will be committing over $3.7 billion to the World Bank, the Inter-American Development Bank, and the Asian Development Bank. In the World Bank other members will subscribe $2 billion, and in the Inter-American Development Bank replenishment, the Latin American countries will contribute $1.6 billion. In the Asian Development Bank $159 million has already been pledged by other contributors.

In addition to the sharing of the financial burden of development financing, so that we do not carry all of the cost ourselves, the multilateral approach assures that lending judgments will be made on strictly economic grounds. Multilateral institutions bring together under one roof experts from all over the world. They minimize the political and ideological complications which can distort the assistance relationship.

Burden-sharing and the economic expertness help us get the most for our money.

BUDGETARY IMPACT

Let us now turn to the budgetary impact of H.R. 18306.

It is useful to keep in mind the distinction between the functions which are served by the International Monetary Fund and by the other institutions with which this bill deals. This distinction is important to an understanding of the limited budgetary impact of this bill. The other multilateral financial organizations to which the United States subscribes capital are development lending organizations. The Fund is a reserve pool in which funds are deposited and from which funds in the form of needed foreign currencies may be withdrawn. Thus, the Fund quota increase represents a monetary transaction with no budget outlay involved. The President's Commission on Budget Concepts described United States transactions with the Fund as "monetary exchanges through which the United States receives international reserve assets," and recommended that, "subscriptions, drawings, and other transactions reflecting net changes in the U.S. position with the International Monetary Fund should be excluded from budget receipts and expenditures." The Fund portion of the bill will not result in budgetary expenditures.

Moreover, only a part of the contributions to the development lending institutions will involve budgetary outlays.

The bill would authorize the United States to subscribe to $246 million of the capital stock of the World Bank. But, only 10 percent, $24.6 million, will be paid in to the Bank and thus entail a budgetary outlay.

The remaining amount, $221.4 million, represents callable capital which can be called only if needed to meet the Bank's obligations. On the strength of callable capital, the Bank borrows in the private capital markets of the world the funds which it needs to carry on its lending operations. These borrowings have mobilized private capital in the development effort and have reduced the need for Government aid contributions. The Bank has operated in this manner since its inception and has set the pattern for other development lending institutions. There has never been a call on capital. The chances are remote that there ever will be.

The same analysis applies to the Inter-American Development Bank. The bill would authorize a subscription of $673.5 million to callable capital and $150 million to paid-in capital. Only the $150 million of paid-in capital involves a budgetary outlay. The callable capital will be used as backing for public borrowing and may be called only if needed to meet the Bank's obligations. The likelihood of such a call is remote.

Thus, a total of $2.4 billion of the commitments contained in this bill will not result in budgetary costs.

Other provisions mitigate the expenditure effect of the remaining $1.3 billion of commitments. The letter of credit method of payment will be used by the United States in order to minimize the budgetary impact of those parts of the bill which involve budgetary outlays. The bill authorizes the following budgetary outlays: $24.6 million to the World Bank in fiscal year 1971; $60 million for fiscal year 1970–1971, and $40 million in fiscal year 1972 to the Asian Bank, and $150 million in fiscal year 1971 and $500 million in each of fiscal years 1972 and 1973 to the Inter-American Development Bank.

These commitments are made in the form of letters of credit, so that loan obligations can be made but these letters of credit will not be drawn upon by the recipient institutions for immediate cash outlays. A cash outlay will occur only when funds are needed to meet a contractor's or supplier's bill.

Through the use of this mechanism, the total budgetary impact of this bill is estimated at $35 million in fiscal year 1971, $70 million in fiscal year 1972, and $155 million in fiscal year 1973. The remainder will be stretched out over a number of additional years. The limited nature of the immediate budgetary impact of this bill is an important consideration in its favor.

I now turn to the reasons for the proposed subscriptions contained in each of the titles of this bill.

THE IMF

The quota increase in the fund will allow us to keep our position of leadership in the fund. Since quota size determines the amount of Special Drawing Rights which a member receives upon an SDR allocation, if we take no action on this bill the United States will receive $130 million less in SDR allocations on each of the next two allocation dates, January 1, 1971, and January 1, 1972, than we would receive if the bill were passed.

Moreover, quota size determines voting power as well as SDR allocations. If all members except the United States accept their quota increases, our voting power

would decline from the present 21.40 percent to 17.13 percent.

Third, we will receive increased drawing rights in the Fund in exchange for our quota increase. If other members subscribe to their increases as expected, the Fund will obtain $3.28 billion of the currencies of the other industrialized nations. The Fund will be better equipped to supply currencies, and the United States will have increased rights to draw currencies.

THE WORLD BANK

The proposed increases in capital subscriptions in the World Bank are designed to parallel the special quota increases in the Fund. Since the founding of the World Bank and the Fund, it has been a general principle that countries receiving special increases in their Fund quotas increase their subscriptions to the capital of the World Bank by a commensurate amount. The United States has in the past strongly supported this policy of parallel contributions on the ground that it results in a fairer sharing of contributions to the capital of the World Bank. It has, in the past, resulted in increased subscriptions of $3.5 billion. On the occasion of the present increased subscriptions, 74 other countries will be subscribing over $2 billion. The U.S. share is only 11 percent of the total increased subscriptions. It is clearly in our interest to take our share of this increase.

ASIAN DEVELOPMENT BANK

Chapter 1 of H.R. 18306 authorizes the U.S. Governor of the Asian Development Bank, the Secretary of the Treasury, to enter into an agreement with the Bank providing for a United States contribution of $100 million to the Bank. The United States contribution is to be used to finance high-priority development projects and programs in developing member countries of the Bank, with emphasis on projects and programs in Southeast Asia.

The Asian Development Bank was established in 1966 as a result of an Asian initiative to foster economic growth and cooperation in the region of Asia and the Far East.

The Bank now has 35 members and $1,004 million subscribed capital. It has 21 regional members, three of them developed—Japan, Australia, and New Zealand—and 14 nonregional members, including the United States, Canada, and 12 European countries.

In its 3 full years of operation, the Bank has maintained increasing levels of activity. It has made commitments of $163,083,000 for 32 loans to 13 countries. It has undertaken 24 technical assistance projects in 12 countries, and a number of important regional activities.

The rate of growth of the Bank's lending activities is expected to continue. In its first year of operation, 1967, the Bank organized itself. In its second year of operation, 1968, loan commitments were $42 million. In 1969, they were $98 million. New loan commitments in 1970 are expected to total more than $200 million.

The purpose of the Special Funds operations of the Asian Development Bank is to provide financing for high priority development programs and projects in Asia on concessional terms where necessary to supplement the development financing which the Bank now provides from its Ordinary Capital resources. The process of economic development requires the financing of infrastructure and other long term projects which are essential to economic growth, but which do not yield financial returns early enough or high enough to service loans made on conventional terms. Many of the member countries of the Bank do not otherwise have the capacity to finance the needed projects through conventional loans. The Bank cannot furnish this needed financing out of its ordinary resources.

The Republics of China and Korea, both members of the Bank, are good examples of Asian countries which have benefited from concessional financing of the type envisaged for the Special Funds operations of the Bank. Less than two decades ago, both countries suffered the same relative level of poverty as the poorer countries of South and Southeast Asia. Benefiting from concessional assistance, both China and Korea have experienced high rates of economic growth in recent years. The primary objective of U.S. foreign assistance programs has long been to raise less developed countries to a level of self-sustaining economic growth. It is to this end that the Special Funds operations of the Asian Development Bank are dedicated.

H.R. 18306 authorizes the appropriation of $100 million to the Special Funds resources of the Asian Development Bank in three annual installments of $25 million, $35 million, and $40 million. The U.S. contribution will be used only for high priority loans made on concessional terms and for technical assistance credits made on a reimbursable basis. Consistent with the goal of shared participation in the funding and operations of the Bank, H.R. 18306 stipulates that the total U.S. contribution to the Special Funds shall at all times constitute only a minority of the total Special Funds resources of the Bank.

The proposed contribution will have only a minimum effect on the U.S. balance-of-payments situation. The funds may be expended by the Bank only for the procurement of U.S. goods and services, unless the U.S. Governor, in consultation with the National Advisory Council on International Monetary and Financial Policies, determines that procurement elsewhere would materially improve the ability of the Bank to carry out the objectives of its special funds resources and would be compatible with the international financial position of the United States. Several contributors to the special funds have already made their funds available for procurement in other member countries.

Six countries have already offered contributions to the Bank's special funds in the total amount of $159.45 million. Japan has offered $100 million, of which $40 million has been made available and $30 million is budgeted for 1970. Canada has pledged $25 million over 5 years, of which $15 million is now available. Denmark has provided $2 million. The Netherlands has provided $1.1 million and pledged another $7.2 million. In addition, at the Bank's third annual meeting, held at Seoul, Korea, on April 9–11, 1970, Australia offered $9.75 million over 3 years and the United Kingdom offered £6 million—$14.4 million—over 4 years. Other countries have also indicated the possibility of contributions in the future. We should act now to join with these countries in building a strong, long-range concessional lending facility within the Bank.

INTER-AMERICAN DEVELOPMENT BANK

H.R. 18306 also enables the United States to participate in its share of the proposed increases in the ordinary capital and Fund for Special Operations resources of the Inter-American Development Bank.

Specifically, the legislation authorizes the U.S. Governor of the Inter-American Development Bank, the Secretary of the Treasury, to vote in favor of the resolution to increase the Bank's authorized capital stock by $2,000,000,000, and upon adoption of such resolution, to agree on behalf of the United States to subscribe to an additional 82,352 shares of the Bank's authorized capital stock, with respect to which $150 million will be paid in and $673,520,000 will be callable.

Second, it would authorize him to vote in favor of the resolution to increase the resources of the Fund for Special Operations by the equivalent of $1,500,000,000, and upon adoption of that resolution, to agree on behalf of the United States to pay to the Fund for Special Operations the sum of $1,000,000,000.

In addition, the bill authorizes the appropriation of the sums necessary to make these commitments.

These sums would enable the Bank to implement its plan to increase total lending by 50 percent or more over the next several years, from a current annual level of $600 million to $900 million or higher.

Although great emphasis has been placed by the Bank on the need to mobilize internal savings for development, internal savings will fall far short of development needs.

Approval of this replenishment proposal is thus essential to enable the Bank to meet its target, and, indeed, to continue its lending programs past 1971. The status of the ordinary capital or "hard currency windcw" of the Bank is such that by the end of this year, the hard currencies will be insufficient to carry on another full year of operations even at current levels, approximately $200 million a year, let alone reach its new target level of $300 million a year. A similar situation exists in the Bank's FSO or "soft" loan resources, which will be inadequate to meet anticipated loan commitments for calendar year 1971. The new resources will permit a progressive increase in the FSO lending from last year's rate of $400 million to about $600 million a year by 1973.

While the sums called for by this new replenishment are substantial, the impact of this authorization request on the U.S. budget will be substantially less than the authorization figure, and will be spread over a period of years.

First, the callable capital subscription, of $673.5 million, is a guaranty standing behind Bank borrowings, and it is not expected to result in any ex-

penditure now or in the future. Half would be subscribed in fiscal year 1971, and the other half in fiscal year 1973. Second, the paid-in portion of our capital subscription will be paid in equal annual installments of $50 million, beginning in fiscal year 1971, and will be in the form of a letter of credit, upon which draw-downs are not anticipated until fiscal year 1972. In this manner, this $150 million expenditure is expected to be spread over a number of years beyond 1973.

Finally, the U.S. contribution to the Fund for Special Operations would be paid in three annual installments at a rate of $100 million in fiscal 1971, and $450 million in each of the following 2 years. As with the paid-in subscription, budgetary outlays would be deferred by use of the letter-of-credit method of payment, so that actual cash outlays would extend over a number of years well beyond fiscal 1973. There will be no budgetary costs in fiscal year 1971, $48 million in fiscal year 1972, and $125 million in fiscal year 1973.

The commitment by the Latin Americans has been greatly increased both in the amount of resources they are willing to commit to their own development, and in the steps they have agreed to take to make these increased resources do the most good.

First, the Latin members of the Bank have increased their share of the replenishment of FSO resources by 67 percent, with a total of $500 million, compared with $300 million in the 1967 replenishment. This represents a continued increase in their share of the FSO. The relative proportion of United States to Latin contributors has declined progressively, from 5 to 1 in 1964, to 3 to 1 in 1967, and now to 2 to 1, in the proposed replenishment.

Second, two more countries, Chile and Colombia, have agreed, along with Argentina, Brazil, Mexico, and Venezuela, to make up to half their contributions to the FSO available for lending to other member countries. This step further increases the usefulness of Latin American local currency subscriptions.

Third, the Latins have endorsed a policy statement giving the least developed countries of the region a first priority claim on FSO resources, evidencing further intraregional cooperation.

Fourth, it was agreed that loans made out of the proposed new resources for the FSO be repayable in the currencies lent, instead of local currencies. By requiring repayment of dollar loans with dollars, the FSO will, over the long run, become a truly revolving fund.

Fifth, the Bank's Governors cited sound national economic policies and satisfaction overall economic performance as the determining factors in Bank assistance.

Finally, a Committee of Governors has been formed to study the matter of admission of developed countries not presently members of the Bank. This committee will report its recommendations by the end of the year. Specifically, the Committee will be studying such items as the possibility of dropping the requirement that new Bank members belong to the Organization of American States, and the possibility of creating a separate class of stock to be subscribed by new members.

Adoption of such a proposal would be a step toward increasing and regularizing the flow of resources to the Bank from other developed countries, while at the same time maintaining the regional character of the Bank.

Over the short span of a decade the Inter-American Development Bank has developed from a fledgling institution to the primary multilateral channel for the flow of development resources to Latin America. It has been highly successful in raising substantial funds in the world capital markets.

In just 10 years of operation, the IDB has lent $3.5 billion for Latin American development, for projects involving a total investment of nearly three times that amount. Roughly one-third of this sum has gone for high-priority agricultural development projects. Over half a billion dollars have gone to industrial and mining projects, and a similiar amount for transportation and communication projects. Substantial sums have also been provided for electric power, water supply, housing, and education.

While the sums included in this replenishment are large, the commitment of Latin Americans to their own development justifies confidence that these funds will serve both the development aspirations of Latin America and the United States interest in a viable and prosperous inter-American system.

OTHER PROVISIONS

The bill also contains a provision for a GAO audit of the Exchange Stabilization Fund, except for matters considered "internationally significant" by the Secretary of the Treasury. There is no reason why the ordinary administration of the Fund should continue to be consumed from the Controller General's contingency.

It also contains a specific reporting requirement on how loans made by multilateral lending institutions benefit the people of the recipient countries, as well as on military expenditures and democratic institutions of recipient governments in Latin America.

The Banking and Currency Committee expects the Secretary of The Treasury, and the various U.S. Executive Directors of the international institutions, to have it currently and continuously informed, in writing, of what is going on. This has not been done in the past. From now on, it will be done.

H.R. 18306 will be a major benefit to the United States. It will assure the continued vitality of a unique and highly successful adventure in international cooperation. These institutions represent what mankind can achieve through cooperative endeavor. They have combined almost universal membership, with decisionmaking based on financial participation. They have performed well. They have earned our continued support.

Mr. HAYS. Mr. Chairman, will the gentleman yield?.

Mr. REUSS. I am glad to yield to the gentleman.

Mr. HAYS. I had a man come to my office the other day, an American, who is an employee of the Asian Dovelopment Bank. He told me that the Asian Development Bank is a bank run by Japanese for the benefit of the Japanese—to the exclusion of any American business at all. He says that if it does not accrue to the advantage of Japan and directly to the Japanese, the loan is not made.

Do you know anything about that? Is not the director a Japanese?

Mr. REUSS. I am very glad to respond to the gentleman's question. The director of the Asian Development Bank is an Asian, a Japanese, Mr. Watanabe.

Mr. HAYS. How much money do they put into it, the Japanese?

Mr. REUSS. The Japanese put in considerably more money than the United States, and under the terms of this bill, the U.S. contribution must be less than that of Japan.

Furthermore, the U.S. contribution, which will be no more than $100 million over a period of years, has to be spent in the United States. That provision is written into the law, and it may only be departed from if the National Advisory Council on Monetary Affairs—which, as the gentleman knows, consists of the Secretary of the Treasury, the Secretary of State, the Eximbank, Federal Reserve, and the Secretary of Commerce—only if the National Advisory Council determines that the U.S. balance of payments will not suffer.

So while it is true that Japan plays a big role in the Asian Bank, that is good, not bad. I think it is fine that we are getting others to bear what should properly be their share of the burden, and if we can get the Japanese in Asia assuming a large scale development role, I think that is one of the more hopeful signs. I think the gentleman will agree.

Mr. HAYS. I agree they ought to assume all of it, because we are taking care of their national defense for them free of charge. They are not contributing anything. They are barring our manufactured products from Japan, and at the same time they are flooding our markets with their products.

Can the gentleman be specific and tell me how many dollars they are putting in and how many we are putting in?

Mr. REUSS. Yes, I will be very specific. The Japanese contribution is $100 million, of which $40 million has been made available and $30 million is budgeted for 1970. The top U.S. contribution, the amount authorized, is $100 million. But unless the Japanese put in some more, we cannot expend even that.

Mr. HAYS. How much have they put in?

Mr. REUSS. We, the United States, have put in to the special funds of the Asian Bank, which is what we are talking about, zero. The Japanese have already put in $70 million, so they are $70 million ahead of us.

Let me hasten to add that I wish it were twice that amount. I wish they were $140 million ahead of us.

The gentleman has said many things that need to be said about Japan's role, and particularly about Japan's attitude toward American investments and

Japan's general trade attitude. But in terms of the Asian Bank, I submit that our diplomatists have done an excellent job in compelling burden-sharing on the part of Japan.

Mr. HAYS. Let me see if I understand the gentleman correctly. Is the gentleman saying that we have not put any money into this bank at all so far?

Mr. REUSS. Oh no. What I said was that we have not put anything into the Fund for Special Operations of the Asian Development Bank, which is the only thing in this bill relating to the Asian Development Bank. When the Asian Development Bank was founded back in 1966, this country, along with 20 other countries, made its initial capital contribution. That capital contribution is mainly to enable the bank to do what the World Bank and the Inter-American Development Bank, have done—borrow in world bond markets for its so-called hard window. Just as the World Bank has a soft window, the IDA, and just as the Inter-American Development Bank has a soft window, the Fund for Special Operations, earlier the Social Progress Trust Fund, so the Asian Development Bank feels that it must have a soft window where loans on concessional terms can be made. But our American contribution must be paid back in dollars.

Mr. HAYS. Let me ask the gentleman one question. I appreciate the education the gentleman is attempting to give me about this on the Asian Bank, but I would like to have a kind of simple question answered: How many dollars have we got in it, and how many dollars have the Japanese got in it? That is mainly what I want to know.

Mr. STANTON. Mr. Chairman, will the gentleman yield?

Mr. REUSS. I yield to the gentleman from Ohio.

Mr. STANTON. Mr. Chairman, I think the total contribution of the United States since the inception of the Bank was the original contribution, $200 million, which was one-fifth of the total capitalization of the bank. The Japanese made their contribution identically.

Mr. HAYS. In other words, we put in as much as they did, but they are running the show?

Mr. STANTON. It is questionable whether they are running the show. It is the first time the Japanese have ever contributed to the international organization.

Mr. HAYS. The Japanese in this instance remind me of the old fellow who thought he was on his deathbed, and he called in this three sons and said:

> Boys, you know money is a pretty important thing in this world. I do not know what it is going to be in the next world, but I want each of you to promise that if I die, each of you will come to the coffin and say a prayer and put in $1,000, just in case.

They all promised.

When he died, the oldest son went up to the coffin and said his prayer and put in his $1,000. And the second son did the same thing, said his prayer and put in his $1,000. Then the third son went up and said his prayer and put in his check for $3,000 and took out the $2,000 in change. That is about the way the Japanese operate, as far as I can tell.

Mr. REUSS. The trouble with the gentleman from Ohio, if he will listen, is that really he has picked the wrong target. The Asian Bank is the one international institution in the world in which somebody else, in this case the Japanese, is putting in more than Uncle Sam. There are plenty of good targets around for the gentleman, but I really do think this is not a good one.

Mr. HAYS. If there is a better target around on what they are doing in international trade than the Japanese, with their national policy by which they are manufacturing articles and selling them below cost in this country, and charging their own people a profit, I do not know what that target would be. I think they are a prime target, and as the gentleman said, I am saying some of the things that ought to be said, and there ought to be people in the administration saying these things. We have carried them around on our back long enough.

Mr. REUSS. The gentleman is saying some things that probably ought to be said. The trouble is, he is saying them about the wrong bank and the wrong country.

An Asian is the Managing Director of the Asian Development Bank. It is also true that Mr. Herrera, a Chilean, is the Managing Director of the Inter-American Development Bank. It is also true that a Frenchman, Mr. Schweitzer, is head of the International Monetary Fund, and an American, Mr. McNamara, is head of the World Bank. But I do not think in an international agency we can always insist that an American be head of everything. This is one of the points of sharing.

Mr. HAYS. If the gentleman will yield, I would not insist on that at all. It may be significant, but the gentleman keeps saying, "an Asian." There are many other Asians besides the Japanese, and there are many other Asians who need it worse than the Japanese do. I would not mind if he were a Malaysian or an Indian or someone from Taiwan, or the gentleman may name it, because there are many other places out there. But there is no country that needs it certainly as little as the Japanese do.

Mr. REUSS. We will try an Indian on the gentleman from Ohio and see how he likes it.

Mr. MOORHEAD. Mr. Chairman, will the gentleman yield?

Mr. REUSS. I yield to the gentleman from Pennsylvania.

Mr. MOORHEAD. Mr. Chairman, is it not true that the vice president of the Asian Development Bank is an Indian?

Mr. REUSS. That is true. I am glad the gentleman from Pennsylvania pointed that out.

Mr. DENT. Mr. Chairman, will the gentleman yield?

Mr. REUSS. I yield to the gentleman from Pennsylvania.

Mr. DENT. Mr. Chairman, I want some information and some education too.

The money that is put up in the underdeveloped countries to develop these nations, the money that is loaned to this bank and others, including the IMF and the Inter-American, is mainly loaned to the underdeveloped countries. Is that right?

Mr. REUSS. That is correct.

Mr. DENT. It is for the purpose of creating industry and for the purpose of developing agriculture?

Mr. REUSS. I think the central purpose of development aid has got a number of facets to it. Politically, it is hoped in the long run that countries which make a little economic progress will develop moderate governments. Economically, it is hoped—and there is some reason for the hope—that they will be customers for our foreign trade exports.

Mr. DENT. Right at that point, that answers my question.

Mr. REUSS. There is also the humanitarian aspect.

Mr. DENT. But that answers my question. Who does the gentleman think are the customers of Japan? Are they the developing countries that this money is being spent in?

Right at this moment, Japan does not have enough labor to meet the demand for the goods they have to send to the United States; so they have no room for industry because they have no labor, and they are developing their own industry in other countries. In doing so, they are producing for themselves, so that they can ship back out into the world stream, where the higher wages are paid.

They are being barred pretty much in the Common Market, but they are not barred in the United States.

Let me tell the gentleman something that happened in one of the other funds; I believe the Inter-American one. Right when certain South American countries were taking our fishing ships, our California fishing fleets, 200-some miles out in the ocean, we loaned them $500 million to build their fishing fleet.

For goodness' sake. Is there someone in this Government who has a blueprint, hidden in some dusty hall, with a little light which only shines now and then, a blueprint of the United States pinpointed for destruction? No one could make the mistakes we are making unless we had a blueprint, unless somebody were directing it. One cannot make that many mistakes.

And this is one of them.

Mr. REUSS. I believe that any blueprint which exists—and I am not aware of one—must be in the possession of the President of this country, Mr. Nixon, whose attitude at least on this bill has been very forthright and very favorable.

Mr. WIDNALL. Mr. Chairman, will the gentleman yield?

Mr. REUSS. I yield to the gentleman from New Jersey.

Mr. WIDNALL. I thank the gentleman for yielding.

I should like to get back to the facts on this.

A question was raised about the Asian Development Bank, as to the millions of U.S. dollars involved. The total subscription was $1.4 billion. Our part was $200 million. Japan's part was $200 million. France was $25 million; Canada was $25 million, Italy was $20 million, Germany was $34 million, and there were other countries. Many, many countries in the Asian area subscribed. There were

likewise 15 which subscribed from outside the Asian area. Their total subscription was $380 million. The regional countries subscribed $624 million.

Mr. Watanabe became the head of the Asian Development Bank through the votes of those who are participating in the bank development. He is an extremely capable banker. He has a fine reputation. He was chosen for that work.

We have no hook on any employees of that bank, nor does anybody else, to my knowledge, from my own investigation.

Of the total paid in subscription of $100 million, the United States has paid $50 million in cash. I am talking about our subscription. We paid in $100 million of the $200 million. $50 million was in cash, and the other $50 million was in noninterest bearing letters of credit in five equal annual installments.

Therefore, assuming no present utilization of our letters of credit, the maximum potential cost to our balance of payments has been $50 million through August of 1970.

This is the type of organization we have been trying to encourage, one where there is major participation by the other countries and we are not the one left holding the bag, having actually put in all the money, as has happened in the past.

It is a very wholesome step forward. It is working out. It will develop further.

I just wish we would look completely at the facts as they are coming up. I do not want to hide anything, I know, and I do not believe anybody else on the committee does.

In the time allocated to me, and the time I allocate, since I control the time on this side, I hope to tell of the participation and how we are involved.

As a matter of fact, the total amount of money involved in this bill, for us to be called upon for U.S. participation, is $35 million in 1971, $70 million in 1972, and $155 million in 1973.

Mr. REUSS. I thank the gentleman.

I would point out, on the subject of the Asian Development Bank, that in its first 3 years of operation up to date it has made 32 loans to 13 countries and has undertaken 24 technical assistance programs in 12 countries. In every one of those projects, in every loan and technical assistance project, this was done with the entire approval of the U.S. Executive Director and Governor. This was not anything that Mr. Watanabe imposed on the United States, but was something that the United States fully concurred in.

Mr. JOHNSON of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. REUSS. Yes. I yield to the gentleman.

Mr. JOHNSON of Pennsylvania. On that point, I was looking over the types of loans made by the Asian Development Bank up to now, and it totals $163 million. I was trying to find out when any of these loans were made to expand Japanese industries in these various countries. For instance, in Ceylon there was a tea factory modernization loan for $2 million. There was a Colombo port tanker established for $2.6 million. In the Republic of China, the country that we are promoting, fostering, and trying to save, the Asian Development Bank loaned for a petroleum refinery $10 million and established a deep sea fishery for $10 million, which is not the $500 million that has been mentioned. Also, for an aluminum plant there was some $2.67 million. Continuing on, in China there was $18 million spent for a freeway to obtain mass transportation there.

In Korea—and many Members of this House have been in Korea to see what is being done there—we know that they are making a remarkable recovery. The Seoul-Inchon Expressway, which many of us have ridden on, was created with a bank loan of $6.8 million. The Korea cold storage industry is being facilitated with a loan of $7 million. An express company is being organized for $7.5 million. A medium industry bank has been organized and provided with $10 million in capital.

I have just a few more.

In Maylaysia, I do not know what the influence of Japan is on Maylaysia, but in Maylaysia they have a water supply project which has been loaned $7.2 million. There is a palm oil mill which has been loaned $2.8 million. There is a port expansion which has been fostered with $5 million in loans and an electrical supply installation which has received $3.1 million.

In Pakistan now, a development bank to develop industries there has been loaned $10 million.

In the Philippines a development corporation to develop industry there received $5 million.

In Singapore the Development Bank of Singapore received $10 million.

In Thailand the Industrial Finance Corp. of Thailand received $10 million.

Of course, it is conceivable that these development finance corporations may make loans to industries which may favor Japan. None of us know that. But I would say that the loans have been made to developing countries, as far as I am concerned and from what I can read and observe, without reasonable relationship to the fact that they might promote Japanese industry.

Mr. REUSS. The gentleman has made an awfully good point. If someone wanted to make a good anti-Asian Development Bank speech, the place to do it would be in the Japanese Diet. That would be the place to complain about the fact that Japan is the leading contributor to the Asian Development Bank and that the result of some of these contributions will be that the poorer countries in Asia begin to develop their own resources.

Let me now point out a very progressive development that has occurred in recent years in all of these international agencies, namely, the U.S. participation grows, as a percentage of the total, ever less onerous to the United States.

For example, at the start of the International Monetary Fund the United States had 34 percent of the quotas; today it is 24 percent; and under the bill it will be reduced to 23 percent.

In the World Bank we started out with 35 percent of the burden of the subscriptions. Now it is down to 27 percent, and it will be down to 26 percent under this bill.

In the early 1960's, when we started with the Inter-American Development Bank, for every $1 of Latin American money we put in $11 into the soft loan resources of the bank. This ratio has progressively gone down from 1 to 11 to 1 to 8, to 1 to 5, to 1 to 3 by 1968, and under this bill it will go down to 1 to 2. So that the burden sharing has become ever less onerous to the United States, which is indeed as it should be.

I would mention, finally, those provisions of the bill which do not relate to actual participation in the financial operation of these institutions, but relate certain overall principles and policies.

One which I would call to the attention of the Members is the provision that from here on out, there will be a GAO audit of the half billion dollar Exchange Stabilization Fund of the Treasury, except for internationally delicate operations.

Members were surprised—and not entirely pleased—to learn that a number of years ago the Exchange Stabilization Fund, without a by-your-leave from Congress, bought a villa over in Tokyo for our Treasury representative. I am not suggesting that there was any hanky-panky in connection with that villa, but the gentleman from Iowa (Mr. GROSS) will be happy to know that in this bill we make it clear that we want the General Accounting Office to audit those expenditures of the Exchange Stabilization Fund just like any other expenditures. I do not anticipate that there will be many things in this bill which will bring the flush of joy to the cheeks of the gentleman from Iowa, but this one certainly will.

Mr. GROSS. Mr. Chairman, will the gentleman yield.

Mr. REUSS. I yield to the gentleman from Iowa.

Mr. GROSS. That is an after-the-fact operation; is it not?

Mr. REUSS. Yes; although a special study was made of that villa in Tokyo deal, which is spread forth in the record for the benefit of the gentleman from Iowa, and for other Members. And I would say that it is high time that we blew a whistle on this, and called for audits. I hope that the gentleman from Iowa can find it within him to give a gentle pat on the back to the Committee on Banking and Currency for bringing this kind of a hard-nosed amendment into this legislation.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. REUSS. I will be glad to yield.

Mr. GROSS. I thought the gentleman when he started talking on the subject of the villa in Japan was going to talk about the situation right here on the gentleman's doorstep, the building of a multi-million-dollar country club right out here on the edge of the District of Columbia, which the gentleman from Iowa talked about a couple of years ago.

Now, how much more under this bill is going to be used to build plush country clubs for the International Monetary Fund in this or some other country? How much more of it is going to be used for this purpose? Has the gentleman from Wisconsin ever seen that plush layout out there?

Mr. REUSS. Yes, I have.

Mr. GROSS. Has the gentleman played golf out there?

Mr. REUSS. No. As the gentleman should know, the expenses of that country club are borne by the members of it, who are from the Fund and the Bank.

The reason for the country club is that many of the delegates and members of the Bank and the Fund are from countries other than so-called caucasian countries, and they like to play golf much like caucasians do. But they found they could not make it in the country clubs that now fringe the city of Washington.

So I think that there is a special history there. However, I will say to the gentleman, we have set up genuine GAO auditing controls, and I can assure the gentleman that there will be no more country clubs.

Mr. GROSS. I hope the gentleman's assurance can be taken at full value.

Mr. REUSS. The gentleman and I will work together on this, and at the first sign of a country club, we will sound the tocsin.

Mr. GROSS. I am just surprised that the House Committee on Banking and Currency did not move in and stop the construction of this country club out here, that is apparently, as he says, constructed for the purpose of taking care of the visiting Poobahs. I think the gentleman will find that there are a lot of people around here who find it possible to go out and enjoy all the benefits of this wonderful country club out here on the outskirts that costs the International Monetary Fund, I do not know how many millions of dollars. I am surprised that the committee did not go into this business of the construction of this club.

Mr. REUSS. We did go into it. If the gentleman will read the record, he will find that his name is mentioned by me when I demanded that the full account be spread on the record. It is in the record and I reiterate what I said a moment ago.

Mr. ANDREWS of Alabama. Mr. Chairman, will the gentleman yield?

Mr. REUSS. I yield to the gentleman.

Mr. ANDREWS of Alabama. Is it true that the employees of the World Bank who are American citizens and who live in the Washington area pay no income tax on their salaries?

Mr. REUSS. I believe that the U.S. employees of the international financial agencies are not exempt from the U.S. income tax, through I am not sure.

Mr. ANDREWS of Alabama. How on earth, if the gentleman can tell me, can that be explained? Here is a man who lives in Washington, D.C., and who works in Washington, D.C., for the World Bank and earns his salary here and he pays no income tax.

Mr. REUSS. I would recommend to the gentleman that he consult with the House Committee on Ways and Means, which has jurisdiction over tax matters, if he thinks this is an unfair loophole that ought to be plugged. I have not examined it.

Mr. ANDREWS of Alabama. I do not think it—I know it.

Mr. REUSS. This is something for the House Committee on Ways and Means that the gentleman can take up with them.

Mr. ANDREWS of Alabama. I know of a man who had a job with our Committee on Appropriations who retired and went out there and took a job with the World Bank—at a pretty good salary—and he pays no income tax.

Mr. REUSS. While the gentleman is at it, he might take up matters like the $3,000 exemption from income tax of the gentleman from Alabama and the gentleman from Wisconsin and all the rest of us. Maybe we should wipe out all loopholes, and I will join with the gentleman in a loophole-plugging foray.

Mr. HAYS. Mr. Chairman, will the gentleman yield?

Mr. REUSS. I yield to the gentleman.

Mr. HAYS. The gentleman mentioned the $3,000. I think something ought to be done about that because a Congressman comes down here and spends $6,000—and you cannot tell me that they are living here for $3,000 a year because I know better than that—he could not. But if the businessman spends $10,000, he can deduct it all—but you could not say that Congress was being discriminated against.

What I really wanted to ask you about, I am pleased to hear you say there are going to be no more country clubs. But I wonder if you could go a little bit further and tell them to just get rid of everyone of them and put the money back.

Mr. REUSS. If the gentleman from Ohio will arrange for the membership of the polygot members of the Bretton Woods Country Club in Chevy Chase and Kenwood and Burning Tree and the Congressional and others, I will pledge him my best efforts to compel through the U.S. Director——

Mr. HAYS. I will do better than that.

Mr. REUSS. I will pledge him my best efforts to compel, through the U.S. Director, the prompt sale by the Montgomery County sheriff of the Bretton Woods Country Club.

Mr. HAYS. I will do better than that. I will suggest that they work a little and not play golf so much. I do not find time to do it while I am here and I do not think that they, whose salaries we are paying, should. You will find them out there all days of the week—Monday afternoon, Tuesday afternoon, Wednesday afternoon—you name it.

Somebody once said, "What would you get if you crossed an employee of the International Bank with a baboon?" The answer is that you would get a baboon that plays golf every afternoon.

Mr. REUSS. The gentleman from Ohio, as always, is too puritanical. Simply because he denies himself these simple pleasures does not mean that international civil servants should do so also.

Mr. BINGHAM. Mr. Chairman, will the gentleman yield?

Mr. REUSS. I yield to the gentleman from New York.

Mr. BINGHAM. I thank the gentleman for yielding. I wish to make a brief comment on a point about the income tax situation of international organizations. I think the Members should bear in mind that since the nationals of other countries do not pay income tax, it would be, in a sense, a discrimination against the nationals of the United States if, as employees of the same organization, they would have to pay income tax.

Mr. REUSS. The gentleman has a point. As I have said, these tax matters are for the House Committee on Ways and Means.

Mr. HAYS. I will say to the gentleman from New York that he had better check into the laws of some of the other countries, because a good many countries require their nationals to pay the national income tax no matter who they work for.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. REUSS. I yield to the gentleman from Iowa.

Mr. GROSS. Impersonally, then, there are a good many people in Government, including Members of Congress, who are segregated. We do not have our income taxes paid. The gentleman from New York, (Mr. BINGHAM) says that they would be discriminated against. If you want to raise the issue of discrimination, why segregate us?

Mr. REUSS. Mr. Chairman, in view of the time situation, and in view of the fact that questioners seem momentarily to have exhausted themselves, I yield back the remainder of my time.

The CHAIRMAN. The Chair recognizes the gentleman from New Jersey (Mr. WIDNALL).

Mr. WIDNALL. Mr. Chairman, I yield myself such time as I may require at this point.

I wish to speak today in support of H.R. 18306, a bill which authorizes U.S. participation in increases in the resources of certain international financial institutions, and which was reported out favorably by the Committee on Banking and Currency on July 14 of this year. This bill would authorize the United States to increase its quota in the International Monetary Fund, and would provide for a related adjustment in the U.S. capital subscription in the World Bank. Furthermore, it would authorize the United States to contribute to the Fund for Special Operations of the Inter-American Development Bank as well as provide for an increase in our subscription to that Bank's paid-in and callable capital. The bill also provides for a U.S. contribution to the Special Funds of the Asian Development Bank.

I wish to discuss more specifically each proposed U.S. contribution and what I believe to be cogent reasons why—in the case of each particular institution—the best interests of the United States would be served by adoption of this bill. However, before proceeding further, I wish to emphasize the benefits of multilateral economic cooperation.

As the Committee on Banking and Currency stated in its report, this is the first time that a bill has been reported to the House which contains authorization requests for four multilateral financial institutions. The multilateral nature of the institutions concerned in this bill is representative of the ever-growing

recognition among nations since 1945 of the importance of and, indeed, necessity for international and multilateral frameworks within which to accomplish those economic goals which individual nations wish to achieve but are unable to effectively accomplish within the limitations inherent today in national, unilateral endeavors. It is my firm belief that in the area of economic development assistance multilateral financial institutions represent a highly effective instrument for promoting the economic development of less developed nations, in a manner which is also most advantageous from the standpoint of the best interests of the United States.

A major advantage of multilateral development institutions is the fact that the burden of providing development assistance can be shared with other developed, as well as less developed member countries. For example, as applied to the present proposal—

The U.S. contribution of $100 million to the ADB's Special Funds resources must also remain a minority share of all such contributions and never constitute the largest single contribution of any country. Other countries have already put up $160 million.

Our share of the World Bank capital stock increase is only 11 percent. Our subscription is $246 million. Other countries will subscribe almost $2 billion.

The Latin American members of the IDB will put up the equivalent of $1 for every $2 put up by the United States in the FSO. This represents a 67-percent increase in the Latin contribution to the Fund for Special Operations over the last replenishment.

Another significant advantage is that multilateral development institutions are able to provide for an allocation of assistance on the basis of development need, rather than from political considerations. The fact that national political motivations are thereby minimized allows these institutions to bring international influence to bear on recipient countries so that they follow acceptable and effective development policies. This influence is all the more effective given the fact that the recipient countries are themselves members of the institutions involved and have a stake in their operations.

As mentioned previously, these multilateral institutions are effective instruments for the pooling of resources. They are also able to pool knowledge and expertise in connection with development problems on a degree which no single country could obtain.

These institutions allow for the coordination of development activities in various countries and regions so that scarce development resources are not lost through needless duplication of projects. Through the use of multilateral institutions, the benefits of preinvestment studies and other preliminary technical undertakings can be made available for followup projects.

For all of these reasons, it is clear that multilateral development institutions are a highly effective means by which the economic development of less developed countries can be promoted in a framework favorable to U.S. interest.

Returning to H.R. 18306, I would like to briefly summarize the authorization requests provided for in this bill with reference to the particular institutions which would benefit from them. Chapter 1 of H.R. 18306 authorizes the U.S. contribution of $100 million to the consolidated special funds of the Asian Development Bank. The contribution would be payable in three annual installments of $25 million, $35 million, and $40 million. The bill requires that the U.S. contribution to the Asian Development Bank's special funds be used to finance loans on concessional terms and technical assistance on a reimbursable basis for high priority development projects and programs in deveolping member countries.

The Asian Development Bank was established in 1966 to finance economic development in and among the developing countries of Asia. With the addition of France, the Bank has 35 members which have subscribed to over $1 billion of authorized capital. The Bank has already committed over $163 million for 32 loans in 13 countries. It has also undertaken 24 technical assistance projects in 12 countries, along with a number of important regional activities. New loan commitments in 1970 are expected to total more than $200 million.

In addition to these ordinary capital operations, the Bank has already begun significant "soft window" or special funds operations. Contributions of almost $160 million have already been promised by other Bank members, of which almost $60 million has already been made available to the Bank. Since June of 1969 the Bank has made eight concessional loans from its special funds resources totaling about $25 million to seven Asian countries to finance projects ranging in nature from irrigation and land development to highways and power transmission.

The U.S. contribution of $100 million would not only directly help to supply the Bank with needed special operations resources, but would also encourage contribution by other Bank members. For instance, it is expected, and in fact required under the terms of H.R. 18306, that the U.S. contribution be matched dollar for dollar by Japan.

Chapter 2 of H.R. 18306 is concerned with the International Monetary Fund and the World Bank. It authorizes an increase of $1.54 billion in the U.S. quota in the IMF as part of a general increase in Fund quotas. The U.S. quota increase is a monetary transaction between the United States and the Fund and involves no budgetary expenditure. The Fund has proposed the general increase in quotas to provide for sufficient growth in its conditional credit facilities to keep pace with the rising volume of world trade and output. This rapid growth in world trade and output has also necessitated a more rapid growth in international credit facilities. Chapter 2 would also permit the United States to vote for new allocations of special drawing rights or SDR's by the Fund up to the congressionally authorized U.S. quota in the Fund in each period in which such an allocation is proposed.

Chapter 2 also authorizes an increase of $246 million in the U.S. subscription to the World Bank, the forerunner of all of the multilateral development institutions which I have discussed today. Consistent with long-established policy, the Executive Directors of the Bank have recommended special increases on the part of members of the Bank so that their relative quotas in that institution remain equal to their quotas in the Fund after completion of the latter's currently proposed increase in quotas. Only 10 percent of the U.S. special increase, or less than $25 million, must be paid in. The remaining 90 percent will be callable capital and would not result in a budgetary outlay unless called upon by the Bank to meet a debt obligation.

The World Bank was founded over 25 years ago and, since the reconstruction of Europe, has operated primarily in the developing nations of the world. Through the end of 1969, agreements providing for loans of over $13.4 billion had been concluded, of which almost $10 billion has been disbursed. The greater part of the Bank's loans has been designed primarily to help provide developing countries with needed infrastructure, although the Bank has also sought to foster an economic climate favorable to private investors through loans to local development finance companies.

The World Bank has established itself as a highly effective instrument for the promotion of economic development with an unparalleled reputation for excellence. It has been able to borrow substantial sums in the world capital markets on the basis of its sound capital structure. The paid-in portion of the U.S. contribution would serve directly to supplement the resources available to the Bank on the one hand. While, on the other hand, the callable portion of the U.S. contribution—which constitutes 90 percent of the total contribution to the Bank and which would involve no budgetary expenditure—would enable the Bank to generate funds in private markets for its development lending programs.

Chapter 3 of H.R. 18306 deals with the proposed U.S. contributions to both the capital stock and the Fund for Special Operations of the Inter-American Development Bank. The Bank was established by the members of the Organization of American States in 1959 to promote the economic development of the less developed countries in the Western Hemisphere in a spirit of self-help and mutual cooperation. In its first 10 years of existence, it made 187 loans from ordinary capital totaling almost $1.3 billion. The Bank's Fund for Special Operations is used for the financing of high-priority development and infrastructure projects on concessionary terms. One hundred and eighteen loans have been made from the Fund for Special Operations, accounting for nearly $1.6 billion.

The results of this lending are even more significant than the statistics. During the decade of the sixties the Bank directly contributed to the welfare of one out of every four Latin Americans and indirectly benefited far more. The Bank accomplished this through the broad-based lending and technical assistance

support which it has provided—at the local, national, and regional levels—for Latin America's own efforts to improve all aspects of its social and economic development in a 10-year period which coincided with the first development decade of the United Nations and the first decade of the Alliance for Progress.

H.R. 18306 authorizes an increase in the U.S. callable capital obligation to the Bank's ordinary capital resources of $673.5 million, which would involve no budgetary expenditure. The proposed U.S. paid-in capital subscription of $150 million would be payable in a letter of credit in three annual installments, which would only be drawn as needed over a period of years.

Finally, this bill would authorize a U.S. contribution to the Fund for Special Operations of $1 billion, payable in one installment of $100 million and two annual installments of $450 million. Again, these installments would be paid in the form of letters of credit and would be drawn down only over a period of years.

I strongly urge that the House give its support to the proposed U.S. participation in the increase in resources of these multilateral financial institutions. This bill has the firm support of the President and the National Advisory Council on International Monetary and Financial Policies. The proposed contributions have been based on a careful analysis of the economic development needs of the less developed countries participating in these organizations and on the ability of these multilateral institutions to effectively utilize the contributed funds to meet those needs.

The fiscal problems of the United States have also been considered in drafting this proposed legislation. The estimated budgetary impact of the total contributions authorized by this bill amount to only $35 million in fiscal year 1971, and to $70 million and $155 million in fiscal years 1972 and 1973, respectively.

I strongly feel that multilateral development institutions can serve well the economic development needs of the less developed nations. These institutions can accomplish the goal of economic development with a minimum of burden and expense on the United States. For these reasons, I recommend that the House adopt H.R. 18306 so that the highly effective efforts of these institutions can continue at an even greater pace in the decade of the seventies. The benefits of their undertaking will accrue to all nations.

Mr. Chairman, I yield 5 minutes to the gentleman from Ohio (Mr. STANTON).

Mr. STANTON. Mr. Chairman, I rise in strong support of the enactment of H.R. 18306. Technological advances in communication and transportation during this century have brought the nations of the world together as a true community of nations. They have awakened new ambitions and new hostilities among people all over the globe. Consequently, they present new challenges to those nations which can and do exercise leadership roles in the everlasting quest of mankind for a better way of life.

The United States emerged from World War II as the strongest bastion of freedom on the globe and for 25 years has shouldered the burden which that strength imposed upon us. Despite the fact that we have stumbled now and then; that some programs have been less successful than we might have wished; and despite the fact that we have sometimes demonstrated the understandable awkwardness of novices to international affairs, our efforts have, nonetheless, been commendable and, on balance, highly successful. Today, we see a world in which prosperity, economic strength, and freedom prevail in key nations on every continent.

Nevertheless, there remain many nations where prosperity and economic strength are virtually unknown and in many of these, freedom is in jeopardy. The very technology of which I spoke has increased the demands for progress in less developed nations.

At the same time, it has become increasingly apparent that the United States alone cannot carry the full burden of international aid. Badly needed domestic programs can be deferred only so long in the interest of assisting others. Recognizing this, the President has made it clear throughout the world that while the United States is willing and anxious to continue assistance to the underdeveloped nations, we expect other developed nations of the world to share this burden with us. That message has been repeated by our delegates to the international financial institutions and is reflected in the legislation before us today.

Multilateral financial institutions are the keystone on which we must build a program of cooperative international assistance for undeveloped nations. Through these institutions, the responsibility for progress is shared by those providing the aid and those receiving it. From our point of view, this offers distinct advantages. Foremost among these is that the drain on our financial resources is reduced as other developed nations take on a share of the burden. While it has been necessary in some instances to maintain or increase the actual dollar amount of our subscriptions as convincing evidence of our expressed willingness to assist, these actions have been accompanied by responses from other nations resulting in a reduction of our proportionate share of the contributions. In other words, by a convincing expression of our interest, we have stimulated new and greater efforts from other nations.

I cannot overemphasize the value of the shared responsibility inherent in the multilateral approach. Pressures upon a borrowing nation for greater political or economic stability as a condition for a loan are better received and far more effective when applied by a panel of one's peers than by a single nation which sometimes appears too domineering. Furthermore, such a panel is better able to assess the need for developments of various types within its sphere of nations than are we alone, and better able to convince recipients that they should pursue efforts which may be coordinated on a hemispheric basis.

H.R. 18306 proposes authorizations of slightly in excess of $3.7 billion. But of that amount, $2,435 million will never be spent in the sense that we ordinarily think of spending; $1,540,000,000 is callable capital which facilitates the borrowings of the International Bank for Reconstruction and Development and the Inter-American Development Bank. Of the total, only $1,275 million represents an actual outlay of funds of which only $103 million is expected to be spent during the next 2 fiscal years.

In effect, what I am saying is, that while it appears we are presenting a bill for very substantial amounts of money with this consolidated measure, a close examination of it will show that by the expenditure of quite modest sums, we are participating aggressively in a worldwide program that has proved more effective as a weapon against tyranny than the multibillion-dollar efforts in Southeast Asia.

The second point I want to emphasize is that the amounts we are requesting represent less as a percentage of the totals being subscribed for these organizations than in the past. The President and our delegates to these organizations have made it quite clear that while the United States is willing to assist underdeveloped countries, we expect other developed nations which believe in freedom to share this burden with us. These multilateral financial organizations offer what is probably the best method yet devised for such a cooperative effort and they are working well.

For example, the Asian Development Bank will have 35 members when France is formally accepted. Of its authorized capital, $1,004 million has been subscribed. The U.S. subscription is only about one-fifth of that—$200 million. This amount has been matched by Japan. Of the 21 regional members of the Asian Development Bank, only three—Japan, Australia, and New Zealand—are classified as developed nations, but 14 nonregional members are classified as developed. These include the United States, Canada, and 12 European countries. Thus, you can see that of the 35 members of the Asian Development Bank, 17, or approximately one-half, are developed nations who are sharing with the United States the task of providing adequate financing needed for national improvements in the underdeveloped nations of Asia.

Although we have no shooting war in South America, it is obvious from the kidnapings, coup d'etats, guerrilla activities, and sometimes chaotic political activities, that the battle for men's minds goes on there too. As with the Asian Development Bank, the Inter-American Development Bank is a cooperative effort. While the $1 billion requested in this bill is the largest single expenditure requested, it too is less in proportion to other nations' contributions than previously. Whereas our contribution was three times that of the other members, it has now been reduced to a 2 to 1 ratio and will probably drop further. Canada, for example, is seeking admission as a member, and other nations who will probably never be eligible

for membership in the Inter-American Development Bank, are making funds available to it.

Our subscriptions of callable capital to the Inter-American Development Bank are important for they provide an element of security which facilitates the Bank's borrowings in other nations. The Bank has moved aggressively in its search for funds in other nations. During August, for example, the Bank sold $4 million of bonds in Norway and $27.3 million of bonds in Germany. This brings the Bank's borrowings to a total of $838.3 million. Of this, $405 million has been borrowed from U.S. investors—$355.7 million from nonmember countries, and $77.6 million through short-term borrowings primarily in Latin America. The Bank has now borrowed funds in 16 different nations around the globe. They are Austria, Belgium, Finland, Germany, Israel, Italy, Japan, the Netherlands, Norway, South Africa, Spain, Sweden, Switzerland, the United Kingdom, and the United States.

But this is not the limit of international cooperation. In addition to these borrowings, the Bank administers a variety of special development funds for Canada, Sweden, the United Kingdom, the Vatican, and Norway. None of these countries is eligible, at present, for membership in the Inter-American Development Bank, but their confidence in the Bank is such that they have elected to utilize it as an administrative vehicle for specialized foreign assistance.

Mr. Chairman, I belabor these aspects of the cooperative nature of this program because I believe they are too little recognized by the American people, and even by some here in Congress. The multilateral financial institutions to which we belong have provided the most effective device in history for a truly international economic assistance program. American citizens can be proud of the leadership our Nation has provided in the development of these institutions. They can be confident that our continued participation is only undertaken in cooperation with other nations who will share the burden with us.

As Mr. WIDNALL said in the letter he addressed to his colleagues:

> As a member of the Banking and Currency Committee I have followed closely our participation in these institutions. I know the excellent work they have done and the opportunity they present for fairly sharing the burdens of providing development assistance. The detailed hearings that were held on H.R. 18306 have assured me that the proposed new commitments are vitally necessary for the institutions to continue their successful programs. I am convinced that these contributions will be carefully and efficiently used to promote our national objectives.
>
> This is a good bill. I strongly urge all my colleagues to give it their support.

Mr. Chairman, I join with Mr. WIDNALL in urging the Members of the House to support this legislation.

Mr. WIDNALL. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania (Mr. WILLIAMS).

Mr. WILLIAMS. Mr. Chairman, the International Monetary Fund was established at the conclusion of World War II, with the strong support of the United States, to provide for effective international monetary cooperation, to regulate exchange rates, and to promote balanced growth of both domestic economies and international trade. At the end of its first full year of operation, the Fund had 44 members and resources amount to $21.4 billion in regular quotas, to which must be added $5.4 billion in unutilized borrowing arrangements with the Group of Ten, the ten largest industrial members.[1] These resources are made available temporarily in the form of purchases of foreign currencies against a member's own currency to enable the purchasing member to finance balance-of-payments deficits without resort to measures destructive of national or international prosperity, in the form of either unduly harsh domestic policies or such measures as import restrictions. Such purchases must normally be reversed, or repaid, within a 3-to-5 year period.

Such drawings from the Fund have greatly increased in recent years. Of the total aggregate drawings from the Fund of $22.3 billion in its 23 years of operations, 36 percent have taken place in the less than 3 years since the end of 1967, and 57 percent have occurred in the 5½ years since the end of 1964. These facts are related to two features of the international monetary scene of recent years: the rapid growth in international trade and in other international transactions, and the extremely sharp expansion in recent years in the international mobility of capital. An important aspect of these sharp increases in use of the Fund by its members in recent years has been the much greater recourse to it by major industrial countries when faced with balance-of-payments difficulties, in part because of the greater mobility of capital. Thus, not only have the United Kingdom and France made very large use of the Fund in the past several years, but Germany—at the end of 1969—and Italy—June-July 1970—have also at times of stress obtained foreign currency from the Fund under their automatic rights to draw.

The United States, too, has made drawings from the Fund that at the time assisted in the financing of the U.S. foreign deficit and reduced gold conversions by other countries. From February 1964 through March 1968, the United States made a number of drawings which totaled $1,840 million. During the same period, purchases of U.S. dollars from the Fund by other members were occurring, which served to reverse U.S. drawings. As a result, the maximum U.S. drawings outstanding were $964 million at the end of 1966. The U.S. drawings were fully repaid by the end of 1968, and the United States had a net creditor position with the Fund of $1,164 million at the end of July 1970.

The Fund has recently assumed important additional responsibilities in creating and administering the new special drawing rights, a separate facility designed to create reserve assets for its member nations to supplement traditional reserves of gold and foreign exchange. At the beginning of this year, $3.4 billion in special drawing rights were created to the credit of 105 members that had become participants in the new facility. Under a decision taken last October by the Fund's Governors, additional special drawing rights of $3 billion will be created at the beginning of 1971 and 1972. Transactions in these new reserve assets have been proceeding smoothly, and some $561 million of SDR's have changed hands in the 8 months since the system began operations.

The Fund is steadily growing in influence and importance as the primary institution for worldwide multilateral cooperation and action in the international monetary sphere.

Under the proposed legislation, the United States would be authorized to increase its quota in the Fund by $1,540 million from the present quota of $5,160 million to $6,700 million. This, together with the necessary appropriation legislation, would enable the United States to participate in a generally applicable quota increase recommended last December by the Fund's Executive Directors and approved by the Fund's Governors in February of this year. The overall quotas in the Fund would increase from the present $21.4 billion to $28.9 billion under this exercise, or by 35 percent. The increase proposed for the United States amounts to a rise by 29.8 percent.

There have been two general increases in the quotas in the Fund, one by 50 percent in 1959 and a second by 25 percent in 1965. In each case, a certain number of selective increases were also recommended. In the present exercise, the quota increases recommended by the Executive Directors consist of increases of 25 percent or more for nearly all member countries. A major effort is also being made to readjust quota sizes to reflect recent developments in the international economic situation, and for that reason selective adjustments have been recommended for 75 countries. Among the largest increases, ranging beyond 50 percent, are those for Belgium, France, Italy, and Japan. This is the first time the United States is to have a selective increase.

In recommending the increases mentioned, the Fund took account of the fact that the growth in world trade has been in excess of 50 percent in the 5 years since the last general quota increase, and some other types of international transactions, in particular volatile movements of capital, have grown still more sharply. These high rates of growth bring with them the likelihood that countries will to a correspondingly greater extent experience balance of payments difficulties from time to time of the type for which recourse to the Fund is appropriate.

The United States will need to pay 25 percent of the quota increase, or $385 million, in gold. This payment, however, will result in an increase by the same amount in freely, quickly and automatically available U.S. drawing rights at the Fund. These automatic drawing rights are shown in the statistics of both the

[1] Belgium, Canada, France, Germany, Italy, Japan, Netherlands, Sweden, United Kingdom, United States.

Fund and the United States as reserves; hence, there will be no loss of reserves, but only a change in their composition.

The remainder of the quota increase, $1,155 million, will be paid by a letter of credit which will be drawn upon by the Fund when it has needs for U.S. dollars to meet requests for drawings in this form. Although both portions of the payment for the quota increase must be appropriated, neither portion will result in budgetary expenditure; instead, these transactions are treated for fiscal purposes as an exchange of claims, reflecting the fact that they result in valuable drawing rights on the Fund for the United States.

Other countries are likely to some extent to buy gold from the United States in order to make the required gold payment to the Fund in implementing their quota increases. However, I am glad to say that permanent and fully satisfactory arrangements have been made by the Fund to offset completely any U.S. gold losses that may arise from this source, up to as much as $700 million, which is expected to be adequate.

The Fund has been an outstandingly successful international organization within its sphere of competence. It deserves our full support in the form of approval of the proposed legislation. It should not be forgotten that, in the future as in the past, the United States itself may find it useful and appropriate to make use of balance of payments financing from the Fund; the proposed quota increase will raise the amount that could be drawn from the Fund in such conditions. Finally, members should be aware that the amount in the new special drawing rights that each member will receive on January 1, 1971, and January 1, 1972, will be based on its quota at these times. If the United States were to delay implementing its quota increase beyond the end of this calendar year, while all other members placed their recommended quota increases in force, the United States would receive $130 million less in special drawing rights than it will with the new quota in force. Thus, the implementation of the proposed quota increase will not cost the United States any of its reserves and will add to our borrowing potentialities in the Fund, should we need to make use of them, while failure to implement the quota increase before the end of this calendar year would result in the permanent loss to our reserves of $130 million in special drawing rights.

For all these reasons, some of broad national interest and some of the most specific self-interest, we should support the proposed quota increase in the Fund.

Mr. WIDNALL. Mr. Chairman, I yield 5 minutes to the gentleman from Michigan (Mr. HARVEY).

Mr. HARVEY. Mr. Chairman, I rise in support of this bill.

I would like to say a few words about how the development banks use their callable capital to raise money for lending in the world's capital markets, thereby mobilizing private capital in the development effort and reducing the need for governmental contributions.

The World Bank, the Inter-American Development Bank and the Asian Development Bank all have callable guarantee capital as part of their capital structure. Subscriptions to callable capital represent contingent liabilities which can be called only to meet the banks' debt obligations. I would like to emphasize that our subscriptions to callable capital will not result in budgetary outlays except in the event of a call. The likelihood of calls by any of these institutions is remote.

Borrowings in the world's capital markets on the basis of this callable capital have been substantial. For each of the three institutions the amounts of callable capital and borrowing outstanding are as follows.

In the World Bank, our callable capital is $5,715 million, other nations' callable capital is $15,044 million. Against this callable capital there were, as of February 28, 1970, gross borrowings of $8,237 million and net borrowings of $4,442 million. Net World Bank loans were $13,394 million.

In the Inter-American Development Bank our callable capital as of December 31, 1969, was $817.6 million, other nations' callable capital was $1,076.2 million. Against this callable capital there were gross borrowings of $881.6 million and net borrowings of $767.4 million. Inter-American Development Bank loans out of ordinary capital resources were $1,294.1 million.

In the Asian Development Bank our callable capital is $100 million, other nations' callable capital is $389 million. As of April 1, 1970, the Bank had borrowed $20 million. By December 31, 1969, the Bank had approved loans from ordinary capital totaling $117.7 million.

H.R. 18306 would authorize an additional U.S. subscription of $221.49 million of callable capital to the World Bank and $673.52 million of callable capital to the Inter-American Development Bank. Other countries will increase their callable capital by $1,975.9 million in the World Bank and $879.03 million in the Inter-American Development Bank.

The use of private borrowed capital by the development banks has two important favorable aspects for us: First, it takes a significant part of the burden off the U.S. Government and other countries for official aid contributions; and, second, through borrowing outside the United States, other currencies are used to finance development. The development banks in recent years have increased their borrowings outside the United States. During fiscal year 1965 and fiscal year 1967 the World Bank conducted 36 percent of its net borrowing outside of the United States. In fiscal year 1968 that figure rose to 51 percent and in fiscal year 1969, 77 percent of net borrowings, $540 million, was raised outside the United States. Cumulative net borrowings by the Inter-American Development Bank outside the United States have risen from 17.4 percent in 1964 to 48.9 percent in 1969 when the outstanding net amount of non-U.S. borrowing stood at $374.9 million. Asian Development Bank borrowing has to date been done wholly outside the United States.

H.R. 18306 will help the World Bank and the Inter-American Development Bank to continue to mobilize private capital for the development process.

Mr. WIDNALL. Mr. Chairman, I yield 5 minutes to the gentleman from Kansas (Mr. MIZE).

Mr. MIZE. Mr. Chairman, I rise in strong support of the legislation before us.

H.R. 18306 authorizes the United States to participate in the increase in capital of the World Bank. The U.S. share would amount to $246.1 million of which only 10 percent, or $24.6 million, would be paid in. The remaining $221.5 million would be in the form of callable capital, which will not involve a budgetary expenditure—except in the very unlikely event that the Bank is unable to meet its debt obligations out of its reserves.

The increase in the U.S. subscription is part of an increase in the capital subscriptions of 75 member countries in amounts corresponding to the increase considered special—above 25 percent—in their increased quotas in the IMF. It is a longstanding practice to take parallel action in the Bank on special increases in the Fund to reflect the relative economic strength of the member countries. It serves also to maintain a relative alinement in voting strength of members in the two institutions.

While this is the first U.S. subscription increase on such a basis, it has significant advantages for the United States from a burden-sharing point of view. The U.S. increase of $246 million represents only 11 percent of the $2.2 billion total of special increases being subscribed by 75 members. This will reduce the U.S. share of the total subscriptions to the Bank from 27.48 to 26.04 percent.

The capital thus provided will facilitate Bank borrowings in world capital markets—the Bank's primary source of new funds. It will enable the Bank to continue its activities at a high level.

In the past the United States has strongly and consistently supported the policy of parallel action by member countries on special increases in the two Bretton Woods institutions. The Bank has benefited greatly from this policy, receiving over $3.5 billion in special subscriptions. Since it is now for the first time proposed that the United States accept a special increase in its Fund quota, it is appropriate that we continue our support of this policy by taking a special increase in our subscription to the Bank. The special increases of the United States and 74 other countries will provide new resources to the Bank during a period when the Bank's need for new funds to sustain a rising volume of operations is increasing. Our favorable action on this bill would demonstrate effective U.S. leadership in support of a significant expansion of multilateral assistance on a burden-sharing basis favorable to the United States.

Mr. WIDNALL. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania (Mr. JOHNSON).

Mr. JOHNSON of Pennsylvania. Mr. Chairman, I rise in support of this bill.

Mr. Chairman, I would like to address myself to the budgetary impact of H.R. 18306.

This is the first time we have considered contributions to four multilateral financial institutions at one time. There is authorized to be appropriated $1,540 million for the International Monetary Fund, $246.1 million for the World Bank, $100 million for the Asian Development Bank, and a contribution of $1 billion to the fund for special operations of the Inter-American Development Bank, as well as a subscription of $823 million to the ordinary capital of that Bank. However, H.R. 18306 contains features which very substantially lessen the budgetary impact of the expenditures involved. I would like to explain these features because I think they are extremely important to the House in the consideration of this bill and figure prominently among the favorable aspects of the bill.

First, with regard to the International Monetary Fund, $1,540 billion outlay, it should be explained that the bill will involve no budgetary outlay. This is because an increase in our quota is basically a monetary transaction—an exchange of assets. The quota increase is partially subscribed in gold—$358 million—and partially in the form of a dollar letter of credit—$1,155 million. We receive equal value from the Fund for these commitments. Our quota increase will entitle us to receive automatic rights to draw on the Fund either immediately in the form of gold tranche drawing rights or subsequently whenever our dollar letter of credit is actually drawn down. The President's Commission on Budget Concepts described our transactions with the IMF as "monetary exchanges through which the United States receives international reserve assets," and recommended that "subscriptions, drawings, and other transactions reflecting net changes in the U.S. position with the International Monetary Fund should be excluded from budget receipts and expenditures."

Thus, although H.R. 18306 authorizes the appropriation of $1,540 million for the Fund, this appropriation will have no impact whatsoever on the Federal budget. The United States receives full value in return in the form of international reserve assets.

Second, with regard to the World Bank, H.R. 18306 authorizes the appropriation of $246.1 million for the payment of the new U.S. subscription. However, it should be noted that only 10 percent of this amount, $24.6 million, is payable to the Bank at this time. The remainder, $221.5 million, is callable if needed to meet the obligations of the Bank. The likelihood of such a call is very remote.

Third, the budgetary impact of the proposed $100 million contribution to the Asian Development Bank will be spaced over time. H.R. 18306 authorizes the appropriation of $25 million for fiscal year 1970, $35 million for fiscal year 1971, and $40 million for fiscal year 1972.

However, there is a more important point. These installment commitments will only be drawn as needed to make payments to suppliers and this spreads the financial impact of our contribution over a substantial period of time.

This situation results from the fact that the U.S. contribution to the special funds of the Asian Development Bank will be in the form of non-interest-bearing letters of credit. The letters of credit will allow the Asian Development Bank to make commitments to borrowers. However, the Bank will not make expenditures of these funds until borrowers have actual bills from contractors and suppliers. It is only at such time that the United States will pay out cash against the letters of credit. Thus, the budgetary impact of this contribution will be distributed over a considerable time period.

It is estimated that the ADB special fund contribution will result in budgetary outlays of $10 million in fiscal year 1971, $20 million in fiscal year 1972, and $30 million in fiscal year 1973.

Fourth, the proposal to increase the resources of the Inter-American Development Bank has similar budget impact reducing features. First, $673.5 million takes the form of an increase in our callable capital subscription. As in the case of the World Bank subscription, an increase in our callable capital has no budgetary impact. Callable capital serves as the guarantee behind the Bank's borrowings in private capital markets. It is callable and will not result in expenditures unless the Bank needs it in order to pay off its borrowings. Neither the World Bank nor the IDB has ever made a call and such a call can be regarded as an extremely remote possibility.

The subscriptions to the Inter-American Bank contain two amounts that will have to be paid in: $150 million to the paid-in capital of the Bank and $1 billion to the Bank's fund for special operations. These payments will be spread out over a number of years. The callable capital is payable in three annual installments of $50 million. The fund for special operations contribution is payable in one installment of $100 million and two annual installments of $450 million.

Again, as in the Asian Bank subscription, there is a further mitigating factor. Each of the installments due to the Bank will take the form of a letter of credit. These letters of credit will not be drawn upon until the Bank actually needs funds for operations. As a result, it is estimated that the proposal to increase the resources of the Inter-American Bank will have no budgetary impact in fiscal year 1971, a $48 million impact in fiscal year 1972, and a $125 million impact in fiscal year 1973.

Mr. Chairman, it can be seen from this detailed explanation that H.R. 18306 is a fiscally responsible measure. The subscription to the International Monetary Fund and the callable capital subscriptions to the World Bank and the Inter-American Bank will have no budgetary impact. Thus, $2.4 billion of commitments contained in this legislation will not result in budgetary expenditures.

Of the remaining $1.3 billion in expenditures, the budgetary impact will be spread over a number of years. Thus, in voting on this bill, Members of this House should be fully aware that its total cost in fiscal year 1971 will be $35 million, in fiscal year 1972 the cost will be $70 million, and in fiscal year 1973 the cost will be $155 million. The remaining cost will similarly be spread out over a number of years, although it is not now possible to estimate the specific amounts in each year.

Mr. Chairman, it is clear that this measure is fiscally responsible. I urge that the membership of this House give it their support.

Mr. WIDNALL. Mr. Chairman, I yield 2 minutes to the gentleman from New Jersey (Mr. FRELINGHUYSEN).

Mr. FRELINGHUYSEN. Mr. Chairman, I rise in support of this bill.

Mr. Chairman, as the debate has already shown, this authorization is needed so that the United States may contribute to four international financial institutions. These contributions, it has already been pointed out, will represent only a small fraction of the amounts to be contributed by other countries.

Perhaps the only unusual feature of this bill is that authorization is to be provided in this one bill for contributions to four multilateral institutions. As a result it might seem as if unusually large U.S. contributions are being authorized. This is not the case, though there are certain additional amounts to be authorized, above the level of support currently being provided.

As the gentleman from New Jersey (Mr. WIDNALL) has pointed out, these financial institutions are an increasingly important element in the economic development of lesser developed countries. For that reason it is especially important that the House give this bill approval today.

As a member of the House Committee on Foreign Affairs I feel regret that the Banking and Currency Committee has formal jurisdiction over the activities of these multilateral financial institutions. Actually, our support, and the level of our support, represents a very real contribution in the field of foreign policy.

Thus, this is an area which is of common interest to more than one committee of Congress. In closing, let me offer my congratulations to the House Banking and Currency Committee for their action in reporting out this bill.

Mr. WIDNALL. Mr. Chairman, I yield 2 minutes to the gentleman from Ohio (Mr. WHALEN).

Mr. WHALEN. Mr. Chairman, I rise in support of H.R. 18306.

Mr. Chairman, today this Congress is being called upon to pass legislation, which along with provisions for other international financial institutions, proposes a $100 million contribution to the soft-lending window of the Asian Development Bank, known as special funds.

The Asian Bank is the most promising new regional institution to appear in Asia in many years. Dedicated to concrete objectives, it has gone about the business of organizing itself and developed its lending program in a sensible and workmanlike way. In a landscape littered with organizations that spend most of their time talking, it stands out as an entity which operates effectively.

It also strikes me as an organization which reflects the present-day situation in which the United States no longer has the resources to take the commanding lead as we have in the past. In a capi-

talization of a billion dollars, we have only a fifth, the same as the Japanese. Western Europe, Canada, and Australia have almost a third. This time these countries have faced up to the responsibilities that their new wealth is giving them and have contributed their proper share. Japan especially is now beginning to take on the role that its situation as one of the fastest growing economies on earth gives it.

The Bank opened its doors late in 1966. By early 1968, it had made its first loan. In 1968, it lent almost $100 million and this year it looks as if it will make commitments for a much higher level of lending. Most of these credits have come from the ordinary capital of the Bank on fairly hard terms—the current rate of interest is 7½ percent. The Bank has patterned itself on the World Bank where the bulk of the funds for hard lending come from bond issues guaranteed by its members. It has already sold bonds in Germany and Austria.

But just as the World Bank and the Inter-American Bank have discovered, not all the countries having worthwhile projects can accept hard terms. The International Development Association was attached to the World Bank and the Fund for Special Operations to the Inter-American Bank to make softer loans.

In the Asian Bank, the soft-loan window is called special funds. Other donor countries have already taken the lead in making contributions. Japan has offered $100 million and Canada, Britain, Australia, the Netherlands, and Denmark, together are now contributing another $60 million.

The Bank has proven itself as an effective institution. Other donors have shown their willingness to make their fair shares available. We should join with them.

(Mr. BROWN of Michigan (at the request of Mr. WIDNALL) was granted permission to extend his remarks at this point in the RECORD.)

Mr. BROWN of Michigan. I am deeply impressed, Mr. Chairman, by the way in which the Inter-American Development Bank has, in less than 10 years of operation, become one of the most respected and important financial institutions concerned with economic development. I am deeply gratified at the major accomplishments of its lending policies and programs.

The United States has always viewed the Latin American region as one of immense importance and we have through the Inter-American Development Bank, as well as the Social Progress Trust Fund, which is administered by the Bank, and the Alliance for Progress, invested a great deal of time and money in the economic and social development of the region. I believe the accomplishments already achieved, and certain significant steps to be taken in connection with the currently proposed increase in the Bank's resources, demonstrate that the investment has been and will continue to be a very wise and productive one.

Bank loans already extended will improve, or bring into production for the first time, over 6 million acres of land, build or expand 4,038 private industrial enterprises, construct or improve over 20,000 miles of highways and roads, provide over 6 million kilowatts of electric power generating facilities, build or expand over 3,000 city and rural water systems and sewage systems, modernize, expand or improve 94 universities and 465 technical institutes and vocational schools, to mention some of the most significant development prospects.

Although much still needs to be done if our Latin American neighbors are to achieve higher and more stable rates of growth, reduce high rates of unemployment and underemployment, and reduce high rates of population growth, there are well grounded reasons to believe that a higher and more stable rate of growth should be attainable during the 1970's. First, the process of planning and programing development in the Latin American countries is reaching higher levels of efficiency through institutional improvements, the adoption of more adequate development policies, and, above all, a higher priority by governments to the problems and objectives of development. Second, a higher priority is being given by the private sector to industrial production for export, rather than import substitution, which is in turn accelerated by a third factor, progress toward regional integration. Wider markets and economies of scale should result in a much more efficient use of capital resources invested in the region.

The Inter-American Development Bank plays a central role in this process; not only is it the principal vehicle of channeling external assistance needed to fund a growing stock of investment projects, in the Latin American countries, but is also one of the primary instruments in achieving better development policies and programs, and better allocation of the resources and energies of these developing countries, which have significantly improved their capacity for development.

It is extremely important that we give our full support to continued efforts by the Bank in this direction.

Moreover, the Bank has committed itself to even greater involvement in the stimulus of regional cooperation and administrative reforms in Latin American countries. The policy initiatives which were approved at the recent annual meeting of the Board of Governors provides several examples of which I mean.

First, the Bank's governors endorsed a strengthened statement regarding the importance of sound national economic policies and satisfactory overall economic performance as factors in determining the character and amount of Bank assistance.

Second, the Latin countries have endorsed a policy statement giving the least developed countries of the region a first priority claim on resources of the Fund for Special Operations.

Third, two more countries, Chile and Colombia, have agreed, along with Argentina, Brazil, Mexico, and Venezuela, to make up to half their contributions to the Fund for Special Operations available for lending to other countries.

Fourth, to further emphasize their commitment to more rigorous standards of mutual self-help, the Latin American members have agreed to a further increase in their relative share of the contributions to the Bank's FSO resources, and to repayments of loans made from the new FSO resources in the currencies lent, instead of in local currencies.

Thus, the Latin American countries, with the guidance and encouragement of the IDB have resolved to put increased effort and provide more of their own resources in developing the region. This trend is very encouraging; for example, the Latin American members have increased their relative share in each succeeding replenishment of the Fund for Special Operations. In the process, the U.S. share has been reduced from 5:1 in 1964, to 3:1 in 1967, and in the current replenishment proposal, to 2:1.

In addition, a committee of the board of governors is currently studying the possibility of removing certain legal bars to the admission of additional developed nonmember countries, which would further spread the financial burden while providing additional funds needed to accelerate regional development.

The Inter-American Development Bank has come a long way in a very short time. It is probably the single most important factor in shifting the focus in Latin American economic and social development back to the individual developing countries. That is where the primary responsibility lies; and it is only through initiatives and cooperative efforts on the part of the Latins themselves, that they can truly accomplish their development goals.

For these reasons, I strongly urge passage of H.R. 18306, containing authority for participation by the United States in its share of the proposed increase in resources of the Inter-American Development Bank.

Mr. WIDNALL. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. SCHMITZ).

Mr. SCHMITZ. Mr. Chairman, I rise in opposition to the bill.

Since we are engaged in a protracted conflict with communism and its program of subversion, terrorism, revolution and military aggression all over the world, including a full-scale war in Vietnam, it is intolerable that we should turn over billions of dollars of our financial assets to international monetary agencies which in turn make it available to our enemies. This is every bit as objectionable as direct foreign aid to them.

In light of the impending Communist take-over in Chile, the House should take particular note of the report which appeared in the Wall Street Journal of September 11 on the World Bank's business-as-usual attitude toward this disasterous prospect.

> The World Bank says Allende's victory won't alter its lending policies for Chile. Officials note that socialist Yugoslavia is one of the bank's best customers.

If Chile's would-be Communist dictator and Tito's Yugoslavia are to be among the World Bank's best customers, we should stop patronizing it altogether. There can be no justification for making our capital available to those who are committed to our destruction.

Mr. RARICK. Mr. Chairman, this bill

H.R. 18306 calls for a scandalous international boondoggle of U.S. taxpayers' dollars. Not just for one, but for four international banks. Over a billion dollars down the drain at a single throw.

One wonders when the working people of America are going to tire of having their substance drained off so that a bunch of international bankers can play Santa clause around the world. Small wonder that American prestige and confidence continue to slip the world over. How could any foreigner have respect for a country or people who continue to get hoodwinked into falling for such a Pandora's box?

If this bill is passed into law, the people's tax money will continue to subsidize world revolution—conveniently labeled progress and overcoming obsolete existing institutions—as we behold a new one-world intellectual aristocracy, promoted into power and spheres of influence because they have been chosen as cooperative by the international banking cartel.

In fact, from the pleading in the debates here, the new world citizens, the international banker, and his employees are immune from taxation on the premise that they are entitled to diplomatic immunity like the citizens of a sovereign nation. A new breed of international untouchables—self-governing, self-disciplining, and deciding what is best for the American people as they dole out our money. This must be what is meant by the third world government—an invisible government that exists in the banking circles only so long as the American taxpayers dollars hold out.

There have been many efforts to justify this outlandish outlay but none of the usual opponents of the military-industrial complex—the ABM, the South Vietnam military budget, or even the payment limitations on the Nation's wealthy farmers have protested this massive payoff to the international bankers nor explained how it can benefit the average American citizen. No one has dared to mention where under the U.S. Constitution authority is found to tax the productive American to give to an international body to subsidize world socialism? Such authority may exist under the United Nations Charter or some other international organ such as the Bretton Woods Agreement, but it is nonexistent, even by a Supreme Court interpretation, under the Constitution of the United States.

In my district, the term "international banker" is a dishonorable term—and "four international banking organizations" would be scandalous. My constituents sent me here to represent them under my oath to support the Constitution of the United States. I intend to cast their vote in their best interest by rejecting H.R. 18306, which would authorize U.S. increased participation in the International Monetary Fund by $1,540 million, the World Bank by $246.1 million, the Asian Development Bank by $100 million, and the Inter-American Development Bank by $673.5 million.

Mr. WIDNALL. Mr. Chairman, I have no further requests for time.

Mr. PATMAN. Mr. Chairman, we have no further requests for time on this side.

The CHAIRMAN. The Clerk will read the bill, according to the rule, by chapter.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.

Chapter 1.—AMENDMENT OF ASIAN DEVELOPMENT BANK ACT

Sec.
1. Amendment of Asian Development Bank Act.

§ 1. Amendment of Asian Development Bank Act

The Asian Development Bank Act (22 U.S.C. 285–285h) is amended by adding at the end thereof the following new sections:

"SEC. 12. (a) Subject to the provisions of this Act, the United States Governor of the Bank is authorized to enter into an agreement with the Bank providing for a United States contribution of $100,000,000 to the Bank in three annual installments of $25,000,000, $35,000,000, and $40,000,000, beginning in fiscal year 1970. This contribution is referred to hereinafter in this Act as the 'United States Special Resources'.

"(b) The United States Special Resources shall be made available to the Bank pursuant to the provisions of this Act and article 19 of the Articles of Agreement of the Bank, and in a manner consistent with the Bank's Special Fund Rules and Regulations.

"SEC. 13. (a) The United States Special Resources shall be used to finance specific high priority development projects and programs in developing member countries of the Bank with emphasis on such projects and programs in the Southeast Asia region.

"(b) The United States Special Resources shall be used by the Bank only for—

"(1) making development loans on terms which may be more flexible and bear less heavily on the balance of payments than those established by the Bank for its ordinary operations; and

"(2) providing technical assistance credits on a reimbursable basis.

"(c)(1) The United States Special Resources may be expended by the Bank only for procurement in the United States of goods produced in, or services supplied from, the United States, except that the United States Governor, in consultation with the National Advisory Council on International Monetary and Financial Policies, may allow eligibility for procurement in other member countries from the United States Special Resources if he determines that such procurement eligibility would materially improve the ability of the bank to carry out the objectives of its special funds resources and would be compatible with the international financial position of the United States.

"(2) The United States Special Resources may be used to pay for administrative expenses arising from the use of the United States Special Resources, but only to the extent such expenses are not covered from the Bank's service fee or income from use of United States Special Resources.

"(d) All financing of programs and projects by the Bank from the United States Special Resources shall be repayable to the Bank by the borrowers in United States dollars.

"SEC. 14. (a) The letters of credit provided for in section 15 shall be issued to the Bank only to the extent that at the time of issuance the cumulative amount of the United States Special Resources provided to the Bank (A) constitute a minority of all special funds contributions to the Bank, and (B) are no greater than the largest cumulative contribution of any other single country contributing to the special funds of the Bank.

"(b) The United States Governor of the Bank shall give due regard to the principles of (A) utilizing all special funds resources on an equitable basis, and (B) significantly shared participation by other contributors in each special fund to which United States Special Resources are provided.

"SEC. 15. The United States Special Resources shall be provided to the Bank in the form of a nonnegotiable, noninterest-bearing, letter of credit which shall be payable to the Bank at par value on demand to meet the cost of eligible goods and services, and administrative costs authorized pursuant to section 13(c) of this Act.

"SEC. 16. The United States shall have the right to withdraw all or part of the United States Special Resources and any accrued resources derived therefrom under the procedures provided for in section 8.03 of the Special Funds Rules and Regulations of the Bank.

"SEC. 17. For the purpose of providing United States Special Resources to the Bank there is hereby authorized to be appropriated $25,000,000 for fiscal year 1970, $35,000,000 for fiscal year 1971, and $40,000,000 for fiscal year 1972, all of which shall remain available until expended."

Mr. PATMAN (during the reading). Mr. Chairman, I ask unanimous consent that the first section down to page 5, line 7, be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

Mr. GROSS. Mr. Chairman, reserving the right to object, does the gentleman mean the first section or the first chapter?

Mr. PATMAN. The first chapter. Chapter 2 commences at line 8, page 5.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. GROSS. Mr. Chairman, I move to strike the necessary number of words.

Mr. Chairman, I take this time to see if I can get on the record what this bill really means in terms of a commitment on the part of the United States.

I have before me a letter from the distinguished ranking minority member of the committee (Mr. WIDNALL) in which he says:

This legislation includes authorization requests for four international financial institutions—the International Monetary Fund, the World Bank, the Asian Development Bank, and the Inter-American Development Bank. The largest single item—$1,540,000,000—is to increase the United States quota in the International Monetary Fund. Subscriptions to the three development banks are also proposed in the amount of $246,100,000 to the World Bank—

I assume that is in addition to the $1,540,000,000—

$100 million to the Special Funds of the Asian Development Bank—

I assume that also is in addition to the $1,540,000,000—

and $1,820,000,000 to the Inter-American Development Bank.

I assume that too, is in addition to the $1,540,000,000.

If this is correct, we have a commitment before us in this bill of $3,709,000,000 or approximately that amount. Am I correct, or are the figures something else?

Mr. WIDNALL. Will the gentleman yield?

Mr. GROSS. Yes. I yield to the gentleman.

Mr. WIDNALL. You are correct.

Mr. GROSS. So it is $3,709,000,000 at a time when we have not the slightest idea of how we can avoid national bankruptcy. We know that inflation has not been stopped; and we know we are headed for a financial crisis in this country unless someone gets hold of the rudder and steers a radically different course.

Mr. ANDREWS of Alabama. Mr. Chairman, would the gentleman yield?

Mr. GROSS. I am glad to yield to the gentleman from Alabama.

Mr. ANDREWS of Alabama. Mr. Chairman, I would like to ask the gentleman from Iowa if he considers this another form of foreign aid?

Mr. GROSS. I beg the gentleman's pardon—do I consider it what?

Mr. ANDREWS of Alabama. That the gentleman considers this another form of foreign aid?

Mr. GROSS. Of course it is another form of foreign aid—it cannot be anything else but foreign aid wearing a different kimono.

Mr. ANDREWS of Alabama. Mr. Chairman, will the gentleman yield further?

Mr. GROSS. I yield further to the gentleman from Alabama.

Mr. ANDREWS of Alabama. Mr. Chairman, I am sure the gentleman from Iowa recalls that when we had the foreign aid appropriation bill on the floor of the House that the committee report showed that since 1946 this country has spent $199 billion in foreign aid?

Mr. GROSS. That is right.

Mr. ANDREWS of Alabama. Now, this amount would put it above $200 billion?

Mr. GROSS. Yes; that is right. Far above $200 billion.

Mr. ANDREWS of Alabama. And that is more than half the national debt of $400 billion.

Mr. GROSS. As far as I am concerned, the gentleman could not be more right.

Then the gentleman from New Jersey (Mr. WIDNALL) goes on to say, in his letter:

It is important to stress that H.R. 18306 is fully consistent with the President's program of fiscal restraint.

Well, I apparently do not know anything about restraint. If this is fiscal restraint, I wish somebody would tell me the meaning of the word restraint.

Mr. WIDNALL. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from New Jersey.

Mr. WIDNALL. Mr. Chairman, I wish the gentleman would read the balance of that paragraph in which I explain the statement that I made as to fiscal restraint.

Mr. GROSS. I will let the gentleman from New Jersey put it in the RECORD on his own time. It does not change what the gentleman said, and I quote him once more:

It is important to stress that H.R. 18306 is fully consistent with the President's program of fiscal restraint.

I do not know what the gentleman can make out of that by any other application he may elect here this afternoon.

Mr. WIDNALL. Mr. Chairman, I ask unanimous consent that I may be permitted to insert in the RECORD a copy of my letter.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The letter follows:

HOUSE OF REPRESENTATIVES,
Washington, D.C., September 9, 1970.

DEAR COLLEAGUE: H.R. 18306, the International Financial Institutions bill, is scheduled to be debated on the House floor on Monday, September 14th. This legislation was proposed by President Nixon and is an essential part of his legislative program.

This legislation includes authorization requests for four international financial institutions—the International Monetary Fund, the World Bank, the Asian Development Bank, and the Inter-American Development Bank. The largest single item—$1,540 million—is to increase the United States quota in the International Monetary Fund. Subscriptions to the three development banks are also proposed in the amount of $246.1 million to the World Bank, $100 million to the Special Funds of the Asian Development Bank, and $1.82 billion to the Inter-American Development Bank, of which $1 billion is for that bank's Fund for Special Operations and $823 million is for an increase in its capital subscriptions.

It is important to stress that H.R. 18306 is fully consistent with the President's program of fiscal restraint. First, the proposed IMF quota increase is a monetary transaction and does not involve a budgetary expenditure. Second, of the total subscriptions, $895 million is a contingent liability in the form of callable or "guarantee" capital subscriptions to the World Bank ($221.5 million) and the Inter-American Development Bank ($673.5 million), which is not expected to result in any expenditure. Third, the appropriations authorized by H.R. 18306 are to be spread out over a period of three years (FY 71–73), and actual cash outlays will be spread out over a considerably longer period, since the bulk of the appropriated payments will be made initially by letters of credit which will be drawn upon only as funds are needed for development projects. Estimated cash outlays under the bill for fiscal years 1971, 1972, and 1973 are $35 million, $70 million, and $155 million respectively. Additional material is enclosed which further explains the provisions of the bill.

As a member of the Banking and Currency Committee I have followed closely our participation in these institutions. I know the excellent work they have done and the opportunity they present for fairly sharing the burdens of providing development assistance. The detailed hearings that were held on H.R. 18306 have assured me that the proposed new commitments are vitally necessary for the institutions to continue their successful programs. I am convinced that these contributions will be carefully and efficiently used to promote our national objectives.

This is a good bill. I strongly urge all my colleagues to give it their support.

Sincerely yours,

WILLIAM B. WIDNALL.

H.R. 18306—FACT SHEET

1. *H.R. 18306*—This bill combines authorization requests for four multilateral financial institutions: a quota increase in the International Monetary Fund, and contributions to three development banks—World Bank*, Asian Development Bank, and Inter-American Development Bank. The obligations involved are distinctly different, part is a monetary transaction, part is guarantee capital, and part will result in expenditures over a period of years.

2. *International Monetary Fund Quota Increase*—The largest single item—$1,540 million—is to increase the U.S. quota in the International Monetary Fund. *It is a monetary transaction which does not involve budgetary expenditure.* If the U.S. quota is not increased, our international leadership will be seriously impaired and our future share of allocations of Special Drawing Rights will be reduced, beginning with a $130 million loss in 1971. Other countries will be increasing their quotas by $6.1 billion.

3. *Contribution to Development Banks*—New commitments are proposed of $246.1 million to the World Bank, $100 million to the Asian Development Bank special funds and $1.82 billion to the Inter-American Development Bank of which $1 billion is for the Fund for Special Operations and $823 million is for an increase in Ordinary Capital subscriptions. Of these subscriptions, *$895 million takes the form of increases in callable capital subscriptions to the World Bank and the Inter-American Development Bank which are not expected to result in any expenditure.*

(A) *Budgetary Impact*—The appropriations authorized by H.R. 18306 for the development banks will be spread out over a period of three years (FY 71–73). Actual cash outlays will be spread out over a considerably longer period since the bulk of the appropriated payments will be made initially by letters of credit which will be drawn upon only as funds are needed for development projects. *Estimated cash outlays under the bill for fiscal years 1971, 1972 and 1973 are $35 million, $70 million, and $155 million respectively.*

(B) *Contributions by Others*—Other countries will be committing over $3.7 billion to the World Bank, Asian Development Bank, and Inter-American Development Bank. In the Inter-American Development Bank replenishment the Latin American countries will contribute $1.6 billion, in the World Bank other members will subscribe $2 billion and in the Asian Development Bank $159 million has already been pledged by other contributors.

(C) *Reasons for U.S. Contributions*—It is now time to capitalize on the advantages—burden sharing, impartial expertise, high standards of economic performance—and the expanded capabilities of these institutions.

Asian Development Bank—In its first three years in operation the Asian Development Bank has shown itself to be a soundly conceived and well run regional development institution. The Bank has given clear evidence that it can formulate and execute programs efficiently to promote the development of the countries of the region. Delay on the part of the United States would be interpreted as lack of the support for the Bank and could result in a serious setback for the Bank's operations at a time when it is gathering momentum and demonstrating its ability to play a key role in the development of Asia.

Inter-American Development Bank—The Inter-American Development Bank has established itself as a primary instrument for helping hemisphere nations to achieve their economic and social development objectives. Approval of a new replenishment of both Ordinary Capital and Fund for Special Operations resources of the Bank is necessary in order to continue its leading role and to provide for the increased need for development financing.

---

*International Bank for Reconstruction and Development.

World Bank—The United States has strongly supported the policy of parallel action by member countries on special increases in the two Bretton Woods institutions. Since it is now for the first time proposed that the United States accept a special increase in its Fund quota, it is appropriate that we continue our support of this policy by taking a special increase in our subscription to the Bank. U.S. legislation is needed to bring this subscription increase into effect and to allow other countries to subscribe over $2.0 billion in new resources.

REDUCTION IN U.S. SHARES IN CONTRIBUTIONS TO THE MULTILATERAL DEVELOPMENT LENDING INSTITUTIONS

The percentage of U.S. participation in the development lending institutions over the years has been declining because of an increasing ability on the part of other nations to share the development burden. Below are set forth some figures illustrating this trend.

WORLD BANK (IRBD)

In 1945 the U.S. subscribed to almost 35% of the original authorized capital of the World Bank. The present U.S. subscription is 27.53% and will decline to 26.04% if the pending increases in the resources of the Bank become effective.

INTERNATIONAL DEVELOPMENT ASSOCIATION (IDA)

The initial U.S. subscription to IDA in 1960 was $320,290,000 or 43.12% of the total contributed by industrialized countries. The U.S. percentage of the first replenishment in 1964 declined to 41.6%. Our share of the second replenishment in 1969 was 40%. While the U.S. percentage share declined, the total amounts involved increased so that in the second replenishment other nations pledged $720 million as compared to the U.S. pledge of $480 million.

INTER-AMERICAN DEVELOPMENT BANK (IDB)

Ordinary Capital: The U.S. share of Ordinary Capital in the IDB has remained relatively constant, declining from an initial 43% to the present 42.4%. There has been a substantial decline, however, in the U.S. share of contributions to the soft loan facilities of the IDB.

Soft Loan Facilities—Funds for Special Operations—Social Progress Trust Fund: Taking the resources of the FSO and the SPTF together the ratio of initial U.S. participation to Latin American participation was 11 to 1. In 1964 the ratio was reduced to 8 to 1, in 1965 to 5 to 1, and in 1967 to 3 to 1. Under the pending bill this ratio would be further reduced to 2 to 1.

ASIAN DEVELOPMENT BANK (ADB)

The authorized capital of the Asian Development Bank is $1.1 billion. Of this amount $978 million has been subscribed. The U.S. subscription of $200 million represents 20.45% of the total and is matched by that of Japan.

CALLABLE CAPITAL IN THE DEVELOPMENT LENDING INSTITUTIONS

The World Bank, Inter-American Development Bank, and Asian Development Bank all have as part of their capital structure callable capital. Subscriptions to callable capital represent contingent liabilities which can be called only to meet the banks' debt obligations and will not represent budgetary outlays except in the event of a call. The likelihood of calls by any of these institutions is remote. The banks use this callable capital as a guarantee for borrowings in the world's capital markets to obtain funds for development lending. These borrowings mobilize private capital in the development effort and have reduced the need for governmental aid contributions.

For each of the three institutions the amounts of callable capital and borrowing outstanding are as follows:

WORLD BANK

U.S. callable capital: $5,715 million

Other nations' callable capital: $15,044 million

Gross borrowings as of June 30, 1969: $7,574.8 million

Borrowings outstanding as of June 30, 1969: $4,081 million

INTER-AMERICAN DEVELOPMENT BANK

U.S. callable capital: $817.6 million

Other nations' callable capital: $1,076.2 million

Gross borrowings as of December 31, 1969: $881.6 million

Borrowings outstanding as of December 31, 1969: $767.4 million

ASIAN DEVELOPMENT BANK

U.S. callable capital: $100 million

Other nations' callable capital: $389 million

Borrowings as of April 1, 1970: $20 million

Financial commitments provided by H.R. 18306

[In millions]

Contingent liability in form of callable "guarantee" capital:	
World Bank	$221.49
Inter-American Development Bank	673.52
Total	895.01
Proposed expenditures:	
World Bank	$24.61
Asian Development Bank	100.00
Inter-American Development ordinary capital	150.00
Fund for special operations	1,000.00
Total	1,274.61
Monetary transactions: International Monetary Fund	1,540.00

ESTIMATED BUDGET IMPACT

The above commitments are estimated to result in a budget impact over the next three fiscal years as follows:

	Fiscal year—		
	1971	1972	1973
Asian Development Bank	10	20	30
World Bank	25	0	0
Inter-American Development Bank	0	48	125
International Monetary Fund	0	0	0

World Bank—One installment of $246.1 million in FY 1971.

Inter-American Development Bank-Ordinary Capital: Callable—two installments of $336.7 million in FY 1971 and FY 1973. Paid in—three installments of $50 million in FY 1971, 1972 and 1973.

Inter-American Development Bank-Fund for Special Operations—one installment of $100 million in FY 1971 and two installments of $450 million in FY 1972 and 1973.

Asian Development Bank—two installments of $25 million and $35 million in FY 1971 and one of $40 million in FY 1972.

International Monetary Fund—one installment of $1,540 million in FY 1971.

FINANCIAL COMMITMENTS PROVIDED FOR BY H.R. 18306

[In millions of dollars]

	Contingent liability in form of callable guarantee capital	Proposed year expenditure	Estimated budget impact			Appropriations		
			Fiscal year 1971	Fiscal year 1972	Fiscal year 1973	Fiscal year 1971	Fiscal year 1972	Fiscal year 1973
World Bank	[1] 21.49	24.61	24.61			246.1		
Inter-American Development Bank:								
Callable capital	[1] 673.52					336.7		336.7
Paid-in capital		150.00		15	30	50.0	50	50.0
Fund for special operations		1,000.00		33	95	100.0	450	450.0
Asian Development Bank		100.00	10.00	20	30	60.0	40	
International Monetary Fund						[2] 1,540.0		
Total	[1] 895.40	1,274.61						

[1] Does not involve a budgetary outlay except in unlikely event of call.
[2] Represents a monetary transaction only. No budgetary outlay involved.

Mr. GROSS. Mr. Chairman, this legislation comes up today, as I said before, in a manner that is most intriguing. I wonder why?

Can it be that the Secretary of the Treasury is on his way, or will soon be on a junket to Copenhagen for a meeting of the international Bankers, and he insisted that at least one body of the Congress give approval to this legislation before he went over so he would be equipped with $3,709,000,000 of the U.S. taxpayers' money in order to demonstrate the good faith of the people of the United States. Is this what this is all about?

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. GROSS. Yes, I will yield to the gentleman from Texas.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

(On request of Mr. PATMAN, and by unanimous consent, Mr. GROSS was allowed to proceed for 5 additional minutes.)

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Texas.

Mr. PATMAN. I would like to state that the hearings on this bill were completed in July and that it passed the bill by practically a unanimous vote. An application was made for a rule, and a rule was granted at least 4 or 5 or 6 weeks ago, and we have been ready ever since. It is not a matter of coincidence; it is a matter of not being able to get clearance through the leadership—and the leadership has had problems also, they had matters that they felt were more important and more urgent at the time, but they got to this matter just as soon as they could get to it. It just happened that we got to it today. There was no coincidence as far as the President's letter was concerned. Everybody knew he was for the bill.

Mr. GROSS. The gentleman is operating on my time. Let me say to the gentle-

man that, whether by coincidence or not, the fact is that the House is going to vote one way or another today. I hope it will vote this latest raid down—but it is going to vote today on this proposition. And if it is approved the Secretary of the Treasury will be equipped, will he not, with the approval of one House of the Congress to dish out $3,709,000,000 of the overburdened taxpayers' money of this country?

He will be able to go over and say to the bankers assembled in Copenhagen or wherever this deal is to be held, that he has at least partial approval of this kind of a handout of the taxpayers' money.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman.

Mr. PATMAN. It was certainly not withheld for the purpose of passing it or bringing it up just before the International Monetary Conference in Copenhagen. There was no such intent at all. We wanted to bring the bill up 6 weeks ago. We would have been glad to bring it up, but the program was such that we could not. There was a recess coming up.

Mr. GROSS. Does the gentleman think that we should equip the Secretary of the Treasury or anyone else with $3,709,000,000 when he goes on a junket to Europe to demonstrate the good faith of the American people?

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman.

Mr. PATMAN. I do not think it has as serious a connection or as important a connection as the gentleman outlines here at all. It is just a matter of being for the bill or against the bill. The gentleman is against it and I am for it. The President is for it. I happen to be for it and other Members are against it and for the bill. Let every Member express his own wishes and vote his own independent judgment. That is all we expect.

Mr. GROSS. If we pass legislation of this kind then we might as well forget from here on out any thought of stopping inflation in this country. We might as well forget all about inflation, interest rates, and all the rest because we are down the drain financially speaking.

Mr. DENT. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Pennsylvania.

Mr. DENT. Of course, what the shouting is all about is the fact that they are going to sit down in conference and are going to create more stock in the Bank and the Fund budget. As I understand the Bretton Woods agreement, the only way they can create more stock or vote, by a representative of a U.S. designee or representative, both for the creation of more stock in either one of the funds, is if the stock is increased without any further increase in the subscription of the United States of America.

If the United States of America does not subscribe for more participation, they can increase all the stock they want. But if we are going to pay and be involved in an increase in our subscription, then our representative must and cannot vote under the law unless we are absolved from any further increase in subscription. The purpose of the $1 billion is to do exactly that.

Mr. GROSS. We ought to be getting out of these commitments. We ought to be cutting them down instead of enlarging them. We have no business increasing them around the world as this bill does. We do not have that kind of money available and we are in deep trouble.

Mr. DENT. I did not, as you well know, and I suppose most of you had, in the first couple of years. I do not know how I made the mistake afterward. But I voted in favor of this legislation after the first couple of years that I was a member. But, in the face of the present situation in this country and in the face of the very serious situation in this country, much more serious than most of the Members of the Congress, I believe, honestly have any idea of what it is, because we are able so far with the props built into our economic system such as social security and unemployment and adjustment assistance and many of the other State laws that have been passed, in helping people—we do not quite understand what has happened to us. We are fast becoming a colony. A colony to all of the world in that we are providing the raw materials and we are providing the know-how and we are providing the money—and they are providing the products. We cannot exist without the providing of the products.

Mr. GROSS. I disagree with my friend, the gentleman from Pennsylvania, only mildly in the use of words. He said, "props" when he should have said "crutches."

Mr. DENT. They are turning into crutches. They were intended as props against American economic weaknesses and not international economic weaknesses. When we use them now they are no longer props, but they are exactly what you said they are—they are crutches.

Mr. GROSS. I thank the gentleman for his comments and I conclude by saying that if there is any fiscal responsibility left this bill should be defeated.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Chapter 2.—INTERNATIONAL MONETARY FUND

Sec.
21. Amendment of Bretton Woods Agreement Act.
22. Amendment of Special Drawing Rights Act.

§ 21. Amendment of Bretton Woods Agreements Act

The Bretton Woods Agreements Act (22 U.S.C. 286–286k–2) is amended by adding at the end thereof the following new sections:

"SEC. 22. (a) The United States Governor of the Fund is authorized to consent to an increase of $1,540,000,000 in the quota of the United States in the Fund.

"(b) In order to pay the increase in the United States quota in the Fund provided for in this section, there is hereby authorized to be appropriated $1,540,000,000, to remain available until expended.

"SEC. 23. (a) The United States Governor of the Bank is authorized (1) to vote for an increase of $3,000,000,000 in the authorized capital stock of the Bank, and (2) if such increase becomes effective, to subscribe on behalf of the United States to two thousand four hundred and sixty-one additional shares of the capital stock of the Bank.

"(b) In order to pay for the increase in the United States subscription to the Bank provided for in this section, there is hereby authorized to be appropriated $246,100,000 to remain available until expended."

§ 22. Amendment of Special Drawing Rights Act

Section 6 of the Special Drawing Rights Act (22 U.S.C. 286q) is amended to read as follows:

"SEC. 6. Unless Congress by law authorizes such action, neither the President nor any person or agency shall on behalf of the United States vote to allocate in each basic period Special Drawing Rights under article XXIV, sections 2 and 3, of the Articles of Agreement of the Fund so that allocations to the United States in that period exceed an amount equal to the United States quota in the Fund as authorized under the Bretton Woods Agreements Act."

Mr. PATMAN (during the reading). Mr. Chairman, I ask unanimous consent that chapter 2 be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. Are there any amendments to chapter 2? If not, the Clerk will read.

The Clerk read as follows:

Chapter 3.—INTER-AMERICAN DEVELOPMENT BANK

Sec.
31. Amendment of Inter-American Development Bank Act.

§ 31. Amendment of Inter-American Development Bank Act

The Inter-American Development Bank Act (22 U.S.C. 283–283n) is amended by adding at the end thereof the following new section:

"SEC. 18. (a) The United States Governor of the Bank is hereby authorized to vote in favor of the two resolutions proposed by the Governors at their annual meeting in April 1970 and now pending before the Board of Governors of the Bank, which provide for (1) an increase in the authorized capital stock to the Bank and additional subscriptions of members thereto and (2) an increase in the resources of the Fund for Special Operations and contributions thereto. Upon adoption of such resolutions the United States Governor is authorized to agree on behalf of the United States (1) to subscribe to eighty-two thousand three hundred and fifty-two shares of $10,000 par value of the increase in the authorized capital stock of the Bank of which sixty-seven thousand three hundred and fifty-two shall be callable shares and fifteen thousand shall be paid in and (2) to pay to the Fund for Special Operations an initial annual installment of $100,000,000 and two subsequent annual installments of $450,000,000 each, in accordance with and subject to the terms and conditions of such resolutions.

"(b) There are hereby authorized to be appropriated, without fiscal year limitation, the amounts necessary for payment by the Secretary of the Treasury of (1) three annual installments of $50,000,000 each for the United States subscription to paid-in capital stock of the Bank; (2) two installments of $336,760,000 each for the United States subscription to the callable capital stock of the Bank; and (3) one annual installment of $100,000,000 and two annual installments of $450,000,000 each for the United States share of the increase in the resources of the Fund for Special Operations of the Bank."

Mr. PATMAN (during the reading). Mr. Chairman, I ask unanimous consent that chapter 3 be considered as read,

printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

COMMITTEE AMENDMENTS

The CHAIRMAN. The Clerk will report the first committee amendment.

The Clerk read as follows:

Committee amendment: Page 6, line 22, insert "(a)" before "The."

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 8, after line 5, insert the following:

"(b) The first sentence of section 3(b) of the Inter-American Development Bank Act (22 U.S.C. 283a(b)) is amended by inserting immediately before the period at the end thereof the following: 'and an alternate Executive Director'."

The committee amendment was agreed to.

The CHAIRMAN. Are there any further amendments to chapter 3? If not, the Clerk will read.

The Clerk read as follows:

Chapter 4.—AUDIT OF EXCHANGE STABILIZATION

Sec.
41. Annual report.
42. Audit by General Accounting Office.

§ 41. Annual report

The last sentence of section 10(a) of the Gold Reserve Act of 1934 (31 U.S.C. 822a(a)) is amended to read: "The Secretary of the Treasury shall annually make a report on the operations of the fund to the President and to the Congress."

§ 42. Audit by the General Accounting Office

Section 10(b) of the Gold Reserve Act of 1934 (31 U.S.C. 822a(b)) is amended by striking out "not be subject to review by any other officer of the United States." and inserting in lieu thereof the following: "conclusive upon all officers of the Government; except that the fund shall be audited by the General Accounting Office at such times and in such manner as the Comptroller General of the United States may by regulation prescribe. Except for information determined by the Secretary of the Treasury to be of an internationally significant nature, there shall be furnished to the Comptroller General such information regarding the powers, duties, activities, organization, financial transactions, and methods of business of the Exchange Stabilization Fund as he may from time to time require; and the Comptroller General or any of his representatives shall, for the purpose of securing this information, have access to all books, accounts, records, reports, files, and all other papers, things, or property belonging to or in use by the United States Government (other than records, reports, files, or other papers containing information determined by the Secretary of the Treasury to be of an internationally significant nature) that pertain to the operations and financial transactions of the fund and are necessary to facilitate the audit.".

Mr. PATMAN (during the reading). Mr. Chairman, I ask unanimous consent that chapter 4 be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

Mr. GROSS. Mr. Chairman, reserving the right to object, the question occurred to me—and I was negligent in not asking the gentleman when I had the floor a few moments ago—what is the salary of Robert Strange McNamara as Chairman or President of the World Bank?

Mr. PATMAN. It can be ascertained, but I do not have it right now. It is a good salary, I hope.

Mr. GROSS. A good salary?

Mr. PATMAN. Yes; because it is for a good cause.

Mr. GROSS. Fifty or sixty thousand dollars a year?

Mr. PATMAN. I do not know, but it is easily ascertainable.

Mr. GROSS. Would it be tax exempt or tax free?

Mr. PATMAN. I do not think any of the salaries of people working for international organizations are taxed by any country, and it would certainly be unfair to tax ours. We have gone into that question a number of times.

Mr. GROSS. So the answer is that he gets an unstated salary, as far as the gentleman is concerned, say, $50,000 or $60,000 a year, tax free; is that correct?

Mr. REUSS. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Wisconsin.

Mr. REUSS. That salary is not tax free. It is subject to the U.S. income tax.

Mr. GROSS. Is the gentleman saying he pays a tax and is then reimbursed by World Bank funds for the tax. Is that what the gentleman from Wisconsin is saying?

Mr. REUSS. No; that is not what the gentleman from Wisconsin is saying. What the gentleman from Wisconsin is saying is that the President of the World Bank, Mr. McNamara, pays the United States an income tax just as you and I do.

Mr. GROSS. Reimbursement is the way they handle it in some of these international organizations.

Now, I would like to come back to the gentleman from Texas (Mr. PATMAN). In the gentleman's opinion is Mr. McNamara doing a better job than he did as Secretary of Defense?

Mr. PATMAN. I am not passing on that.

Mr. GROSS. The gentleman from Texas said McNamara was doing a good job. I was wondering if it was a better job than he did as Secretary of Defense, because he did a terrible job as Secretary of Defense, in my opinion.

Mr. HAYS. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Ohio.

Mr. HAYS. Mr. Chairman, I think it would be interesting to clear up two points. One is whether these people do or do not pay taxes. We have been told two different things here today.

Mr. REUSS. Mr. Chairman, if the gentleman will yield, the employees of the World Bank, the Inter-American Development Bank, the Asian Bank, and the International Monetary Fund—the U.S. employees do pay U.S. income taxes. There was some ambiguity in the record, but I am informed they do pay U.S. income taxes.

Mr. HAYS. Has the gentleman been informed of this?

Mr. REUSS. I have been informed of this by the Assistant General Counsel of the Inter-American Development Bank.

Mr. GROSS. Mr. Chairman, are they reimbursed out of the various funds?

Mr. REUSS. They are not reimbursed out of the various funds. However, their salaries are computed with the idea that they are paying a U.S. income tax, just as everybody else's salaries are computed with that amount in mind.

Mr. GROSS. I do not agree with that at all—that the salaries of other Federal employees make a specific allowance for Federal income taxes in their computation.

Mr. HAYS. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Ohio.

Mr. HAYS. Mr. Chairman, I have been able to get this answer, which I trust is a correct one. Could the gentleman from Texas tell us the salary of the Japanese gentleman who heads up the Asian Development Bank?

Mr. REUSS. If the gentleman will yield, I will endeavor to find that out very quickly and tell the gentleman.

Mr. HAYS. I should have thought that was something the gentleman would have on hand, when he is asking the Congress to vote a billion and a half dollars, when we cannot afford to clear up the air, and when we cannot afford to clean up the streams, and when we cannot afford more money for schools and education. That will be very interesting.

Mr. REUSS. Mr. Chairman, if the gentleman will excuse me, I will find out.

Mr. HAYS. If the gentleman will do that while I am still talking, I think if I may say so, it would be a very interesting list, and I am sure somebody will compile it, of the people who voted to sustain the vetoes for domestic programs the other day, who are now turning around, on the very next substantive vote we have after the recess, and voting to spend a billion and a half to allow Mr. Watanabe to hand out loans to his clients for the benefit of Japanese industry, because I have it on good authority that no one gets a loan, as I said earlier—and maybe we ought to have a quorum call, so all Members would know about it—from the Asian Development Bank unless it is going to help Japan directly or indirectly.

I have been as internationally minded as anybody else in this House for many, many years, but I think if we are so short of money that we cannot afford to educate our children for fear of unbalancing the budget, then we cannot afford to put any more money into the pot this year. We have a great deal in, and if this is such a bad year, maybe this is the wrong year to bring up this bill.

Mr. PATMAN. The question that is

raised has been raised for 10 years. Every time these agencies have had a bill before this House, the same question comes up, and it is not really so germane now.

Mr. HAYS. It is pretty germane, because we just had the two vetos. The gentleman remembers that, does he not?

Mr. PATMAN. I remember that. I voted to override both of them.

Mr. HAYS. So did I, and the gentleman remembers the reasons for them. Maybe the timing of the gentleman is bad, Mr. Chairman, and maybe the President's timing is bad.

Mr. PATMAN. We have different reasons.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

Mr. GROSS. Mr. Chairman, further reserving the right to object, I see the gentleman from Wisconsin has returned. I hope the little 2- or 3-minute filibuster was ample.

Mr. HAYS. Mr. Chairman, I would ask the gentleman, please do not call that a filibuster, because those sentiments came from my heart. I was really making a speech that I hoped would change a vote or two.

Mr. GROSS. Filibuster sentiments can come from the heart.

Mr. HAYS. I am glad to hear that, because I thought in filibusters they just said anything to take up time.

Mr. GROSS. Mr. Chairman, I wonder if the gentleman from Wisconsin got the information I sought a few minutes ago?

Mr. REUSS. I did the best I could. I have part of the answer. By the time I am through perhaps I will have the full answer.

The salary of Mr. Herrera, President of the Inter-American Development Bank, is $35,000 with a $10,000 expense account. I will let the gentleman know about Mr. McNamara and Mr. Schweitzer.

Mr. GROSS. Is that $10,000 spent on his own accounting? I assume it is.

Mr. REUSS. My guess is it would be about like our $3,000 stay in Washington, the congressional income tax deduction, an affidavit. It is probably about the same.

Mr. GROSS. Let me ask the gentleman a question. He said that the salaries were paid with a view to covering the Federal income tax, the salaries paid to the officials.

Mr. REUSS. That is my understanding.

Mr. GROSS. Would salaries be paid, for instance, to officials of the International Monetary Fund, with a view to covering the dues and green fees to the so-called Bretton Woods Country Club?

Mr. REUSS. No, I should not think so.

Mr. GROSS. The gentleman would not think that?

Mr. REUSS. No, any more than the salary of a corporate president is paid with a view to covering whatever he may want to do in his spare time.

Mr. HAYS. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Ohio.

Mr. HAYS. Since we are talking about this country club again, do Members know what occurred to me, what was suggested to me by I will not say whom? It is that the diplomats in this country from other countries who come from, to use the words of the gentleman from Wisconsin, a great polyglot of nations, do not have their own private country club, and seem to get along pretty well. What makes these employees of the bank so special that the taxpayers of the United States have to finance a country club for them? Can anybody answer that question?

Mr. GROSS. I am waiting for an answer.

Mr. REUSS. While the gentleman is waiting, another good question which I believe needs to be asked is: Why should the proprietor of the Bretton Woods Country Club have singled out golf players? There may be employees and officers who like to play tennis. There may be those who like to go hiking.

Mr. GROSS. They have tennis courts and swimming pools.

Mr. REUSS. I believe there is a serious question as to the provision of those facilities. I believe they might have done a fairer job if they had taken care of those who for discriminatory reasons were not enabled to get into a Washington club. I believe they could have arrived at it in some better way.

Mr. HAYS. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Ohio.

Mr. HAYS. The gentleman talks about discriminatory reasons. Can I get in the Bretton Woods Country Club, or is it just for employees?

Mr. REUSS. Knowing the gentleman's persuasive nature, I would not be surprised if he could.

Mr. HAYS. Then can you get into it?

Mr. REUSS. No.

Mr. HAYS. That answers the question. In other words, it is a discriminatory organization itself.

Mr. GROSS. Segregated.

Mr. HAYS. Only employees of the bank can get in it, I imagine; is that right?

Mr. REUSS. Bretton Woods is under the control of the Fund. I understand they let employees of the Bank in, so it is discriminatory except for banking.

Mr. HAYS. All right; so we finance it.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

COMMITTEE AMENDMENT

The CHAIRMAN. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: On page 8, line 19, strike the word "the".

The committee amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Chapter 5.—ANNUAL REPORT OF NATIONAL ADVISORY COUNCIL

§ 51. Annual report

The National Advisory Council on International Monetary and Financial Policy shall include in its annual report to the Congress (1) a statement with respect to each loan approved by the International Bank for Reconstruction and Development, the International Development Association, the Inter-American Development Bank, and the Asian Development Bank, the position taken by the United States representative, and a discussion of how each loan will benefit the people of the recipient country, and (2) a statement on steps taken jointly and individually by member countries of the Inter-American Development Bank to restrain their military expenditures, and to preserve and strengthen free and democratic institutions.

Mr. PATMAN (during the reading). Mr. Chairman, I ask unanimous consent that chapter 5 be considered as read, printed in the RECORD, and open to amendment at any point. That is the remainder of the bill.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

AMENDMENT OFFERED BY MR. REUSS

Mr. REUSS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. REUSS: At the end of the bill add the following:

"Chapter 5.—EMPLOYEE BENEFITS FOR UNITED STATES REPRESENTATIVES

"§ 52. Employee benefits

"Notwithstanding the provisions of any other law, the Executive Directors and Directors and their alternates, representing the United States in the International Monetary Fund, the International Bank for Reconstruction and Development, the Inter-American Development Bank, and the Asian Development Bank, shall, in the discretion of the Secretary of the Treasury, each be eligible on the basis of such service and the total compensation received therefor, for all employee benefits afforded employees in the civil service of the United States. The Treasury Department shall serve as the employing office for collecting, accounting for, and depositing in the Civil Service Retirement and Disability Fund, Employees Life Insurance Fund, and Employees Health Benefits Fund, all retirement and health insurance benefits payments made by these employees, and shall make any necessary agency contributions from the fund established pursuant to section 10(a) of the Gold Reserve Act of 1934 (31 U.S.C. 822a(a)). This section shall be effective as of December 14, 1966."

Mr. REUSS. Mr. Chairman, I rise in support of the amendment.

This amendment is a simple technical amendment. It is requested by the Under Secretary of the Treasury, Hon. Charls E. Walker. It is acceptable, I believe, to Members on both sides of the aisle.

What it does is to take the three U.S. executive directors of the International Monetary Fund, the Inter-American Development Bank, and the Asian Development Bank, respectively, and correct a legislative omission in the civil service retirement laws which, as they are presently written, do not entitle these three members to civil service retirement protection. They are in effect Treasury employees. They are subject to the direction of the Secretary of the Treasury of the United States. It is unfair that they should not have the rights of other civil service employees.

Mr. Chairman, I would hope that this amendment would be adopted.

I may say, for the benefit of the gen-

tleman from Iowa and the gentleman from Ohio, that I have now received another bulletin. The salary of Mr. McNamara of the International Bank for Reconstruction and Development is $50,000.

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. REUSS. Yes. I am glad to yield to the gentleman.

Mr. KAZEN. Would the gentleman tell me whether or not the other employees or the employees from other countries have any employee benefits?

Mr. REUSS. They have in each country their own retirement program.

Mr. KAZEN. As an organization in and of itself as a bank, does it have any employee benefits?

Mr. REUSS. Oh, yes. The bank itself has a retirement program for its international civil service.

Perhaps I did not make it clear. This amendment of mine does not apply to the international employees of the World Bank, the International Monetary Fund, or the Asian Development Bank but applies to the U.S. executive directors who work for us; that is, for you and for me, and not for the international institutions.

Mr. KAZEN. These directors do not have any employee benefits from the organizations they belong to?

Mr. REUSS. That is correct, because they do not belong to these organizations but belong to the United States just as the Secretary of the Treasury does.

Mr. KAZEN. The thrust of my question was are we giving them additional benefits here?

Mr. REUSS. The answer is unequivocally no. The benefits they will get under this amendment will be their exclusive retirement benefits.

Mr. KAZEN. In other words, they get no benefits by virtue of their positions now?

Mr. REUSS. That is correct.

Mr. HALL. Mr. Chairman, will the gentleman yield?

Mr. REUSS. I am glad to yield to the gentleman from Missouri.

Mr. HALL. I have just been handed a draft of this amendment that the gentleman from Wisconsin submitted. I did hear the Clerk read it, of course. Did I understand him to say (a) all of the benefits are retroactive to December 14, 1966, and (b) that there is a special fund established to pay for the retirement and health insurance and other necessary benefits by agency contribution?

Mr. REUSS. There is no language in the amendment remotely like either point just raised by the gentleman.

Mr. HALL. This is a participating benefit and it is not retroactive?

Mr. REUSS. There is no language as to retroactivity. All it means, I would say to the gentleman from Missouri, is that these three men, our U.S. executive directors, would be entitled from here on out to participate in the retirement program of the U.S. Civil Service. I presume that there would be an element of retroactivity in it in that their total U.S. civil service and military service, if any, would be counted. But there is no language such as the gentleman just alluded to in the amendment.

Mr. HALL. Under the amendment offered by the gentleman from Wisconsin (Mr. REUSS) do they participate by paying in to this fund now, and from the time of retroactivity and hence forward, or is it paid for them by the fund, or a separate fund, under the amendment?

Mr. REUSS. As I read the amendment, they would start paying now, and their benefits would accrue as of the time on which they started their payments.

Mr. HALL. The gentleman did submit the amendment himself?

Mr. REUSS. I submitted it on behalf of the Under Secretary of the Treasury, and I would say to the gentleman from Missouri that it was prepared in the Under Secretary's office. It has been submitted to both sides. I do not believe that any of these three men will get anything that they are not entitled to, and have not paid for.

Mr. HALL. The question of entitlement is a matter of personal opinion or reflection. All I want to know is in cold black and white: do they participate in their own retirement benefits as all civil servants do, or as we do, even more than civil servants do; or as anyone else might be expected to do in a pension or retirement benefit program?

Mr. REUSS. The answer is yes.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin (Mr. REUSS).

The amendment was agreed to.

Mr. REUSS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I now have, for the benefit of the gentleman from Iowa and the gentleman from Ohio, the salary of the third and last international agency official, Mr. Watanabe, the President of the Asian International Bank, who receives an annual salary of $40,000.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. REUSS. I yield to the gentleman from Iowa.

Mr. GROSS. How about McNamara?

Mr. REUSS. I said that Mr. McNamara receives $50,000 a year.

Mr. GROSS. I thank the gentleman.

Mr. REUSS. I yield back the balance of my time.

Mr. CHAIRMAN. Under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker having resumed the chair, Mr. BURKE of Massachusetts, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 18306) to authorize U.S. participation in increases in the resources of certain international financial institutions, to provide for an annual audit of the exchange stabilization fund by the General Accounting Office, and for other purposes, pursuant to House Resolution 1179, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. WYLIE

Mr. WYLIE. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. WYLIE. I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. WYLIE moves to recommit the bill H.R. 18306 to the Committee on Banking and Currency.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

Mr. PATMAN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 177, nays 140, not voting 112, as follows:

[Roll No. 295]

So the bill was passed.

The Clerk announced the following pairs:

On this vote:

Mr. Brooks for, with Mr. Berry against.

Mr. O'Neill of Massachusetts for, with Mr. Fallon against.

Mr. Philbin for, with Mr. Friedel against.

Mr. Donohue for, with Mr. Hébert against.

Mr. Murphy of New York for, with Mr. Long of Louisiana against.

Mr. Anderson of Illinois for, with Mr. Montgomery against.

Mr. Biaggi for, with Mr. Flynt against.

Mr. Boland for, with Mr. Hagan of Georgia against.

Mr. Edwards of Louisiana for, with Mr. Stephens against.

Mr. Rogers of Colorado for, with Mr. Dowdy against.

Mr. Thompson of New Jersey for, with Mr. Abbitt against.

Until further notice:

Mr. Casey with Mr. Kleppe.

Mr. Ottinger with Mr. Bell of California.

Mr. Hanna with Mr. Springer.

Mr. Staggers with Mr. Hastings.

Mr. St Germain with Mr. Weicker.

Mr. Fulton of Tennessee with Mr. Burton of Utah.

Mr. Flood with Mr. Beall of Maryland.

Mr. Mann with Mr. Landgrebe.

Mr. Yates with Mr. Collins.

Mr. Teague of Texas with Mr. Pelly.

Mr. Tunney with Mr. Sebelius.

Mr. Henderson with Mr. Brown of Ohio.

Mr. Barrett with Mr. King.

Mr. Anderson of Tennessee with Mr. Brock.

Mr. Cabell with Mr. Bush.

Mr. Daddario with Mr. Meskill.

Mr. de la Garza with Mr. Roudebush.

Mr. Dingell with Mr. Zwach.

Mr. Downing with Mr. Cowger.

Mr. Sisk with Mr. Button.

Mr. Stratton with Mr. Reifel.

Mrs. Hansen of Washington with Mr. McEwen.

Mr. Monagan with Mr. Lujan.

Mr. Landrum with Mr. Buchanan.

Mr. Hicks with Mr. Stokes.

Mr. Ashley with Mr. Conyers.

Mr. Blatnik with Mr. MacGregor.

Mr. Fascell with Mr. Kuykendall.

Mr. Feighan with Mr. Wold.

Mr. Pepper with Mr. Crane.

Mr. Meeds with Mr. Clay.

Mr. Chappell with Mr. Foreman.

Mr. Mollohan with Mr. Watson.

Mr. McCarthy with Mrs. Chisholm.

Mr. Podell with Mr. Goldwater.

Mr. Farbstein with Mr. Halpern.

Mr. Lowenstein with Mr. Nix.

Mr. Powell with Mr. Diggs.

Mr. Taft with Mr. Dawson.

Mr. Lukens with Mr. Thompson of Georgia.

Mr. Schneebeli with Mr. Pollock.

Mr. O'Konski with Mr. McCulloch.

Mr. Michel with Mr. Schadeberg.

Mr. Scherle with Mr. Mizell.

Mr. Steiger of Wisconsin with Mr. Talcott.

Messrs. YATRON, CARTER, and GOODLING changed their votes from "yea" to "nay."

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

CORRECTION OF CHAPTER AND SECTION NUMBERS

Mr. PATMAN. Mr. Speaker, I ask unanimous consent that in the engrossment of H.R. 18306 as passed the House, the Clerk may correct chapter and section numbers.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

GENERAL LEAVE TO EXTEND

Mr. PATMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed, and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 16900, TREASURY AND POST OFFICE DEPARTMENTS, EXECUTIVE OFFICE OF THE PRESIDENT, AND CERTAIN INDEPENDENT AGENCIES APPROPRIATIONS, 1971

Mr. STEED. Mr. Speaker, I ask unanimous consent that the managers on the part of the House may have until midnight tonight to file a conference report on the bill (H.R. 16900) making appropriations for the Treasury and Post Office Departments, the Executive Office of the President, and certain independent agencies, for the fiscal year 1971, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

CONFERENCE REPORT (H. REPT. No. 91-1447)

The Committee of Conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 16900) "making appropriations for the Treasury and Post Office Departments, the Executive Office of the President, and certain Independent Agencies, for the fiscal year ending June 30, 1971, and for other purposes," having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows: That the Senate recede from its amendments numbered 21, 23, 24, and 25.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 3, 4, 5, 8, 11, 13, 15, 19, 22, 26, 27, 28, 30, and 31 and agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$1,080,000"; and the Senate agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$137,000,000"; and the Senate agree to the same.

Amendment numbered 7: That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$19,600,000"; and the Senate agree to the same.

Amendment numbered 9: That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amend-

ment insert "$36,000,000"; and the Senate agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$221,500,000"; and the Senate agree to the same.

Amendment numbered 12: That the House recede from its disagreement to the amendment of the Senate numbered 12, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$655,000,000"; and the Senate agree to the same.

Amendment numbered 14: That the House recede from its disagreement to the amendment of the Senate numbered 14, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$42,300,000"; and the Senate agree to the same.

Amendment numbered 16: That the House recede from its disagreement to the amendment of the Senate numbered 16, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$162,335,000"; and the Senate agree to the same.

Amendment numbered 17: That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$62,000,000"; and the Senate agree to the same.

Amendment numbered 18: That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$6,508,000,000"; and the Senate agree to the same.

Amendment numbered 20: That the House recede from its disagreement to the amendment of the Senate numbered 20, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$657,000,000"; and the Senate agree to the same.

The committee of conference report in disagreement amendment numbered 29.

Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 16900) making appropriations for the Treasury and Post Office Departments, the Executive Office of the President, and certain independent agencies for the fiscal year ending June 30, 1971, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report as to each of such amendments, namely:

TITLE I—TREASURY DEPARTMENT

Office of the secretary

Amendment No. 1. Appropriates $9,660,000 for salaries and expenses as proposed by the Senate instead of $9,500,000 as proposed by the House.

Federal Law Enforcement Training Center

Amendment No. 2. Appropriates $1,080,000 for salaries and expenses instead of $1,000,000 as proposed by the House and $1,113,000 as proposed by the Senate.

Bureau of customs

Amendment No. 3. Authorizes purchase of fourteen passenger vehicles as proposed by the Senate instead of thirty-seven as proposed by the House.

Amendment No. 4. Authorizes purchase of four police-type vehicles as proposed by the Senate instead of twenty-seven as proposed by the House.

Amendment No. 5. Increases the limitation for purchase of police-type vehicles from $400 above the general purchase price for standard passenger type vehicles as proposed by the House to not to exceed $800 as proposed by the Senate. The conferees are agreed that this increase in limitation is for the purpose of enabling purchase of vehicles, when authorized, with adequate police-type equipment, including air-conditioning where warranted.

Amendment No. 6. Appropriates $137,000,000 for salaries and expenses, instead of $135,500,000 as proposed by the House and $137,085,000 as proposed by the Senate.

Bureau of the mint

Amendment No. 7. Appropriates $19,600,000 for salaries and expenses, instead of $18,000,000 as proposed by the House and $19,663,000 as proposed by the Senate.

Internal Revenue Service

Amendment No. 8. Appropriates $26,096,000 for salaries and expenses as proposed by the Senate instead of $25,500,000 as proposed by the House.

Amendment No. 9. Increases the limitation for temporary employment to $36,000,000 instead of $35,500,000 as proposed by the House and $36,500,000 as proposed by the Senate.

Amendment No. 10. Appropriates $221,500,000 for revenue accounting and processing instead of $220,000,000 as proposed by the House and $222,239,000 as proposed by the Senate.

Amendment No. 11. Increases the limitation for purchase of police-type vehicles from $400 above the general purchase price for standard passenger type vehicles as proposed by the House to not to exceed $800 as proposed by the Senate. The conferees are agreed that this increase in limitation is for the purpose of enabling purchase of vehicles, when authorized, with adequate police-type equipment, including air-conditioning where warranted.

Amendment No. 12. Appropriates $655,000,000 for compliance activities instead of $645,000,000 as proposed by the House and $660,000,000 as proposed by the Senate.

U.S. Secret Service

Amendment No. 13. Increases the limitation for purchase of police-type vehicles from $400 above the general purchase price for standard passenger type vehicles as proposed by the House to not to exceed $800 as proposed by the Senate. The conferees are agreed that this increase in limitation is for the purpose of enabling purchase of vehicles, when authorized, with adequate police-type equipment, including air-conditioning where warranted.

Amendment No. 14. Appropriates $42,300,000 for salaries and expenses instead of $40,000,000 as proposed by the House and $44,600,000 as proposed by the Senate. The conferees are agreed that the amount agreed upon should be adequate due to the lapse of time and consequent slippage in fiscal year 1971 programs.

TITLE II—POST OFFICE DEPARTMENT

Administration and regional operation

Amendment No. 15. Increases the limitation to $100,000 for confidential information and services as proposed by the Senate instead of $50,000 as proposed by the House.

Amendment No. 16. Appropriates $162,335,000 instead of $161,000,000 as proposed by the House and $163,670,000 as proposed by the Senate.

Research, development, and engineering

Amendment No. 17. Appropriates $62,000,000 instead of $60,000,000 as proposed by the House and $65,675,000 as proposed by the Senate.

Operations

Amendment No. 18. Appropriates $6,508,000,000 instead of $6,500,000,000 as proposed by the House and $6,517,138,00 as proposed by the Senate.

Amendment No. 19. Changes the reference to the Bureau of the Budget to its new title of Office of Management and Budget as proposed by the Senate.

Transportation

Amendment No. 20. Appropriates $657,000,000 instead of $655,000,000 as proposed by the House and $659,000,000 as proposed by the Senate.

Building occupancy

Amendment No. 21. Appropriates $255,000,000 as proposed by the House instead of $259,000,000 as proposed by the Senate.

Plant and equipment

Amendment No. 22. Increases the limitation for purchase of police-type vehicles from $400 above the general purchase price for standard passenger type vehicles as proposed by the House to not to exceed $800 as proposed by the Senate. The conferees are agreed that this increase in limitation is for the purpose of enabling purchase of vehicles, when authorized, with adequate police-type equipment, including air-conditioning where warranted.

Amendment No. 23. Appropriates $217,000,000 as proposed by the House instead of $219,000,000 as proposed by the Senate.

Postal public buildings

Amendment No. 24. Appropriates $269,825,000 as proposed by the House instead of $252,825,000 as proposed by the Senate. The conferees are in agreement that the Department should proceed with all firm projects funded in this bill without further delay.

TITLE III—EXECUTIVE OFFICE OF THE PRESIDENT

Expenses of management improvement

Amendment No. 25. Restores language stricken by the Senate making funds in this account available until expended.

Office of management and budget

Amendments Nos. 26 and 27. Change the reference to the Bureau of the Budget to its new title of Office of Management and Budget, as proposed by the Senate.

TITLE IV—INDEPENDENT AGENCIES

United States Tax Court

Amendment No. 28. Appropriates $3,288,000 for salaries and expenses as proposed by the Senate instead of $3,000,000 as proposed by the House.

TITLE V—FUNDS APPROPRIATED TO THE PRESIDENT

Amendment No. 29. Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment. The Senate amendment appropriates $1,650,000 for the protection of visiting foreign dignitaries attending the observance of the twenty-fifth anniversary of the United Nations.

TITLE VI—GENERAL PROVISION

Amendments Nos. 30 and 31. Change title and section numbers as proposed by the Senate.

CONFERENCE TOTAL—WITH COMPARISONS

The total new budget (obligational) authority for the fiscal year 1971 recommended by the Committee of Conference, with com-

parisons to the fiscal year 1970 total, the 1971 budget estimate total, and the House and Senate bills follows:

	Amounts
New budget (obligational) authority, fiscal year 1970	$2,793,537,000
Budget estimates of new (obligational) authority, fiscal year 1971 (including $1,938,000 not considered by House)	3,046,693,000
House bill, fiscal year 1971	2,971,702,000
Senate bill, fiscal year 1971	3,018,079,000
Conference agreement [1]	3,004,711,000

[1] Includes $1,650,000 in amendment No. 29 reported in technical disagreement.

Conference agreement compared with:	
New budget (obligational) authority, fiscal year 1970	+211,174,000
Budget estimates of new (obligational) authority, (as amended), fiscal year 1971	−41,982,000
House bill, fiscal year 1971	+33,009,000
Senate bill, fiscal year 1971	−13,368,000

Managers on the Part of the House.

REQUEST TO MEET TOMORROW AT 11 A.M.

Mr. ALBERT. Mr. Speaker, I see the distinguished minority leader present in the Chamber, and I wish to make a unanimous-consent request while he is present. I ask unanimous consent that when the House adjourns today that it adjourn to meet at 11 o'clock tomorrow, and that when the House adjourns tomorrow, it adjourn to meet at 11 o'clock on Wednesday.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

Mr. GROSS. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

TRIBUTE TO THE HONORABLE ROBERT TAFT, JR.

(Mr. MAYNE asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. MAYNE. Mr. Speaker, as president of the Republican 90th Club, it is my privilege to act as spokesman for 58 Members of this body who were elected in 1966, either for the first time or after a temporary absence from the House. We have many distinguished Members in the club, but none more distinguished than the gentleman from Ohio, the Honorable ROBERT TAFT, JR. He has played a leading role in our activities ever since we organized as a club shortly after arriving here in January 1967. I know of no Member of Congress, young or old, more respected by his colleagues nor more deserving of that respect. In addition to his many other responsibilities and achievements, he has been rendering truly outstanding service as chairman of the House Republican Research Committee. I am personally very grateful for the opportunity to have worked on one of the task forces organized by that committee under his leadership.

The members of the 90th Club have greeted the news of BOB'S candidacy for the other body with mixed emotions. Our deep regret at his impending departure from the House has been counterbalanced by our realization that few Americans have ever been so highly qualified to serve in the Senate through character and experience.

We have, therefore, tried to express our strong admiration for our good friend, BOB TAFT, JR., in the following resolution passed at a recent meeting of the 90th Club, which I now include at this point in the RECORD:

A RESOLUTION

Whereas Members of Congress and other public officials are looked upon to provide innovative thought and decisive judgment concerning the welfare and destiny of our country; and

Whereas the concept of revenue sharing typifies the end result of such thought, and is indicative of a desired partnership between the federal government and the states which form this national government; and

Whereas the case for revenue sharing was initially presented by a Republican Coordinating Committee Task Force on the Functions of Federal, State and Local Governments, under the chairmanship of Congressman Robert Taft, Jr.; and

Whereas, this country has been confronted with a growing rate of crime which has caused many Americans to live in constant fear, and that leadership and positive legislative programs to combat crime effectively and to make our streets safer have been consistently offered by Robert Taft, Jr; and

Whereas the House Republican Research Committee has concerned itself with many of the vital issues confronting our country today, and has conducted in depth research into each of these areas, with the result being information which has been extremely valuable to all Republican Members of Congress; and

Whereas the Research Committee Task Forces studied the issues concerning fiscal responsibility, draft reform, minority employment, agriculture, research resources and population, education and training, international trade, labor law reform, social security and human needs, transportation and urban affairs; and

Whereas The Chairman of the House Republican Research Committee, Robert Taft, Jr., was one of the seven elected members of House leadership, and this position is an indication of the respect which is placed in Mr. Taft by his colleagues, and is a further example of his legislative skill and political prowess;

Now therefore be it recommended that the 90th Club hereby highly commends the Honorable Robert Taft, Jr. for his valuable and faithful leadership as a member of Congress.

WILEY MAYNE,
President, 90th Club.

Signed at Washington, D.C., this 4th day of August 1970.

PAUL N. MCCLUSKEY, JR.,
Secretary, 90th Club.

RESOLUTION ADOPTED ON THE 50TH ANNIVERSARY OF THE POLISH SOLDIERS DAY CELEBRATION

(Mr. BYRNE of Pennsylvania asked and was given permission to address the House for 1 minute, to revise and extend his remarks and to include extraneous matter.)

Mr. BYRNE of Pennsylvania. On August 9, 1970, I was the principal speaker at exercises commemorating the 50th anniversary of the Polish Army Veterans Association, District 10, and Post 12 and its ladies auxiliary. On that occasion the various organizations assembled unanimously adopted a resolution, which it is my pleasure to insert in the CONGRESSIONAL RECORD at this point:

Today, the 9th day of August, 1970, the following Resolution was unanimously adopted at exercises commemorating the 50th Anniversary of the Polish Soldiers Day Celebration, under the co-sponsorship of the Polish Army Veterans Association, District 10 and Post 12 and its Ladies Auxiliary.

Whereas, we, citizens of the United States, former Soldiers and veterans of the Polish Army which fought valiantly alongside the Allied Forces during the 1st and 2nd World Wars for your freedom and ours, pledge allegiance and loyalty to the United States of America and to those ideals for which it stands.

Now therefore be it resolved that we call upon our Representatives and Senators in the United States Congress to bestow to the Veterans of the Polish Army in recognition of their heroic deeds on behalf of the free world in the past world conflicts the benefits that are bestowed upon the Veterans of the Services of the United States.

And be it further resolved that we pay homage to General Wladyslaw Anders, a fearless soldier, an inspirational leader who assured himself a place in history with his heroism and brilliant command at the great battle of Monte Cassino, who this year passed away in London.

Respectfully submitted,

ROMAN LANISCKI,
Commander, Polish Army Veterans, Post 12.

FRANCIS PRAWDZIK,
Commander, District 10, Polish Army Veterans.

EDMUND PAWELEC,
Chairman, Resolutions Committee.

PRESIDENT CUTS WHITE HOUSE STAFF

(Mr. STEIGER of Wisconsin asked and was given permission to address the House for 1 minute, to revise and extend his remarks and to include extraneous material.)

Mr. STEIGER of Wisconsin. Mr. Speaker, at a time when we are all concerned with reducing Federal spending, it is gratifying to note that President Nixon has set a personal example in this regard by cutting back the size of the White House staff.

As evidence of this saving, I refer to a letter to the editor in Sunday's Washington Post from Mr. Caspar Weinberger, Deputy Director of the Office of Management and Budget. In his letter, Mr. Weinberger points out that the President's budget request for the White House Office for fiscal 1971 constitutes a reduction of 28 employees and a consequent saving of more than $650,000 from the previous year.

Mr. Weinberger also points out that the President has ended the practice of previous administrations of detailing full-time employees to the White House Office staff from the departments and agencies.

Mr. Speaker, the President deserves much credit for this achievement. I in-

clude Mr. Weinberger's letter in the RECORD:

[From the Washington Post, Sept. 13, 1970]

WHITE HOUSE ON STAFF EXPENSES

An article appearing in your paper recently left the impression that the White House was doubling its staff in fiscal year 1971. Such an impression would be not only unfortunate, but quite incorrect.

The appropriation requested for the White House Office for fiscal year 1971 is in fact a decrease from the actualities of fiscal year 1970 both in personnel and in funds. For fiscal year 1970 the appropriation for the White House Office was $3,940,000, with another $2,500,000 appropriated for special projects. In addition, personnel detailed to the White House Office from the departments and agencies under authority of law resulted in basic compensation costs to those departments and agencies at the rate of $2,820,000. Thus, the 1970 level of operation was in excess of $9,200,000, involving 576 employees.

The President, when preparing the 1971 fiscal year budget, decided to discontinue the use of the special projects fund and personnel details from other agencies to augment funds available for the regular White House Office staff. He has thereby adopted a policy of bringing all regular employees of the White House directly onto the White House payrolls. This seemed to the President a more honest way of presenting the full cost of the White House operation.

Therefore, the budget request for fiscal year 1971 is for 548 employees, and funds in the amount of $8,550,000 for the White House Office. This is a substantial *decrease* of more than $650,000 in funds, and 28 in personnel—a lesson that should certainly not be lost on those who have attacked the President without benefit of the facts.

CASPAR W. WEINBERGER,
Deputy Director, Office of Management and Budget.
WASHINGTON.

BIPARTISAN ACTION ON PRESIDENT NIXON'S BILLS

(Mr. DERWINSKI asked and was given permission to address the House for 1 minute.)

Mr. DERWINSKI. Mr. Speaker, there is need for bipartisan action in Congress to meet major national problems. I urge Democrats to help seek "a history of progress all of us can share" by taking action on bills singled out Friday by President Nixon.

On Friday, September 11, the President of the United States sent this body a detailed indictment for legislative inaction on a host of basic reforms. The President's language was calm and closely reasoned but necessarily detailed in the facts he set forth.

In a time of extreme domestic unrest when both the liberal community including university students and faculties and certainly the so-called silent majority are calling for government reform to deal with a score of problems, the Democratic Congress has simply refused to act. Crime, control of drug abuse, manpower training, education, social security, foreign trade legislation, environmental cleanup, and many more problems for which President Nixon has proposed reform measures, have met with opposition and indecision from the Democrats on Capitol Hill.

Congress has even refused to approve legislation to protect our children from obscene mailings.

Adjournment is close at hand. As the President said, "we cannot wait for politics." The President has done his part. He has proposed reforms to do what must be done. Now it is up to Congress. History will record that result. We should seek a history of progress all of us can share.

FOREIGN TRADE ACT OF 1970

(Mr. GIBBONS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GIBBONS. Mr. Speaker, it appears that in the very near future we will be faced with the question of considering the Foreign Trade Act of 1970 as reported by the Ways and Means Committee, H.R. 18970.

Mr. Speaker, as you know, this bill is a radical departure from our past foreign trade policy and one that brought about vigorous dissent by many members of the Ways and Means Committee when it was finally reported shortly before the August recess. I intend to appear before the Rules Committee and ask for a modified closed rule so that members may have an opportunity to express their opinion about this trade policy. I propose to ask the Rules Committee for the granting of a rule that would allow a motion to strike that provision of title I that ties the President's hands on oil import quotas.

Mr. Speaker, as you know, this oil importation quota program now costs the American consumer, according to the President's own task force, about $5 billion per year.

I also intend to ask for a rule that will grant permission to strike title 4. This is the Domestic International Sales Corporation proposal which appears to me to be nothing more than a tax loophole. It will cost American taxpayers about a billion dollars a year.

I also intend to ask for a rule that would grant motions to strike the mandatory quotas in title 2 on textiles and garments. As you know, Mr. Speaker, the President has only very reluctantly supported trade quotas for the textiles and garment industry. It seems to me that these quotas would be highly inflationary. The textile and garment industry have wholly failed to prove a case for import quotas.

I also will ask for a provision in the rule to allow the striking of provisions of title 2 that relates to mandatory import quotas for the shoe industry. This again is another highly inflationary matter, and even the President and his Commission that studied this industry, turned down the industry's request for this trade protection, saying that this industry did not warrant the drastic remedy of quotas.

The modified closed rule that I will seek will give each Member an opportunity to vote as he wishes on this most important bill, and not have to suffer the ridiculousness of voting either for or against a bill that he has had no opportunity to amend.

The following is a copy of the rule I propose to ask the Rules Committee to grant when I appear before the committee on Tuesday, September 15:

H. RES. —

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 18970) to amend the tariff and trade laws of the United States, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed eight hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means, the bill shall be considered as having been read for amendment. No amendment shall be in order to said bill except (1) an amendment to strike out section 104, (2) amendments to exempt all textile articles from the quota provisions of title II, (3) amendments to exempt all footwear articles from the quota provisions of title II, (4) an amendment to strike out title IV, and (5) amendments offered by direction of the Committee on Ways and Means, and said amendments shall be in order, any rule of the House to the contrary notwithstanding. Amendments offered by direction of the Committee on Ways and Means may be offered to any section of the bill at the conclusion of general debate, but the said amendments shall not be subject to amendment. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

GENERAL LEAVE TO EXTEND

Mr. CORMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 13934, to revise the boundaries of Minuteman National Historical Park, which was passed by the House today.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

TO CREATE A HEALTH SECURITY PROGRAM

The SPEAKER pro tempore (Mr. MATSUNAGA). Under a previous order of the House, the gentleman from California (Mr. CORMAN) is recognized for 60 minutes.

Mr. CORMAN. Mr. Speaker, on behalf of the following Members of the House and myself: Mr. ANNUNZIO, Mr. BINGHAM, Mr. BROWN of California, Mr. CELLER, Mrs. CHISHOLM, Mr. CLAY, Mr. COHELAN, Mr. CONYERS, Mr. ECKHARDT, Mr. EDWARDS of California, Mr. FRASER, Mr. GREEN, Mr. HARRINGTON, Mr. HATHAWAY, Mr. HAWKINS, Mr. HOWARD, Mr. KOCH, Mr. LOWENSTEIN, Mr. MADDEN, Mr. MEEDS, Mr. MIKVA, Mr. O'HARA, Mr. PERKINS, Mr. RYAN, Mr. REID, Mr. REUSS, Mr. ROYBAL, Mr. STOKES, Mr. THOMPSON of New Jersey, Mr. TUNNEY, and Mr. VAN DEERLIN, I introduce for appropriate reference the Health Security Act, to create a comprehensive national health security program, through a system of national health insurance, will make health care

services available to all residents of the United States. We commend this bill to our colleagues in the Congress for favorable consideration.

The American people today face a crisis in health care of appalling proportions. The American people know that they have a right to quality health care, but they know, too, that for most people the availability and delivery of such care is virtually nonexistent today. We are offering a health security act that will convert that right from fiction to reality.

The program we envision is borrowed from no other nation, though we recognize that we are the last of the major nations to acknowledge our responsibilities in a national policy for comprehensive health care for all our citizens. It discriminates neither in favor of nor against any segment of our population, though we recognize with shame our enormous neglect of those who have most needed and deserved the best health care we could have afforded.

The Health Security Act proposes that we shall use the mechanism of national health insurance as a means of bringing about a rational system for the delivery of personal health services in a manner that is consistent with American needs, and creates an American system of health care for all our people.

Good health is a vital need, personally and nationally. Good health requires good health care. Yet, despite that dedication, great efforts and enormous expenditures, good health care is not actually available to millions of Americans. At the same time, we are using a substantial share of our national economic resources for medical care; we are confronted by costs which are rising steeply but yet not effecting improvements; the inadequacy of health care resources intensifies; and our rates of sickness, disability, and mortality—already far behind the potentials of modern health care—are getting no better and may be getting worse.

I will not burden you with a repetition of the vital statistics, so often repeated in the public information media and in the professional literature—statistics which show how little progress we have been making in recent decades toward the prevention of illness or of premature mortality, whether measured against our own past or against the vital statistics of other countries.

Nor will I burden you with a recital of what almost every family knows through its own worries and frustrations and disappointments. The average family lives in dread of illness and disability, and for good reason. The path to seeking medical care is confusing, frightening, and expensive. This dilemma is not confined to the poor, the elderly, or the disabled. It is understood just as clearly by the professional worker earning $12,000 a year whose child requires a $30,000 hospitalization—not unusual for an accident or prolonged illness—and who discovers his expensive insurance pays about 60 percent of the bill. It is understood by residents of our 157 rural counties without a single physician. It touches every community in this country.

Nor will I burden you with the recounting of the distress among the providers of health care. We all know the dedication of the health profession, the commendable efforts of the hospitals and other institutions, the support of Federal, State, and local governmental agencies and personnel. And we are familiar with the limitations under which they try to meet the national need for health care, and the technological progress through research and application which has made medical care at its best in the United States second to none in the world. We also know that the best is not adequately available.

The problems of manpower shortages, lack of organization and spiraling costs have been measured and analyzed many times. The problems are well known; it is the purpose of our program to provide realistic solutions. Fortunately, the underlying causes of our health care deficiencies are manageable—though not all at once or without great effort and commitment.

The three causes of crisis underlying all the rest can be simply stated: First, the national shortages of health manpower and institutions; second, rising costs which price medical care beyond reach; and third, inadequacies in the organizational system for the availability and delivery of medical care.

These three basic causes are so intimately interrelated one with another that if we would meet the health care needs of the Nation we must attack simultaneously on all three fronts. We must insure that we have the needed health manpower, hospitals, and other institutions; we must insure the underwriting of the unavoidable costs, while also keeping these costs within reasonable bounds; and we must encourage the development of a system which provides for efficient use of the manpower and institutions and for ready and effective availability of health services to our population.

I would emphasize the importance and the urgency of simultaneous attack on all three. Production of more health manpower or more hospitals or other institutions without improving financing and organization would at best be an exercise in futility toward dealing with needs, or at the worst would invite disastrous problems of costs. Merely trying to solve the problems of steeply rising costs by pouring more purchasing power into the medical-care channels will perpetuate a system characterized by consumer impatience, seller's monopoly, inefficiency, lack of accountability—all of which can only lead to further dissipation of resources.

Attempts to deal with the organizational system in isolation have no hope of success as decades of largely futile public and private efforts have demonstrated. Instead, we propose a comprehensive program, balanced and well-proportioned, on an evolutionary basis. And we propose that at every point we shall provide for professional and administrative protections and controls to safeguard the essential ingredient of good quality in the health care services.

Every discussion of the health care problem is, unavoidably, heavily concentrated on the costs of medical care, which have been climbing twice as fast as other consumer costs, and this continues. Between fiscal year 1960 and fiscal year 1969, health care expenditures as a whole went up from $26 billion to $60 billion, rising as a percentage of gross national product from 5.3 to 6.7 percent. Personal health care expenditures, the major part of the total, rose from $23 billion to $53 billion—from 4.9 to 5.8 percent of GNP. For the fiscal year just closed, the total expenditures were probably about $65 billion, 6.8 percent of GNP.

In the four fiscal years 1966 to 1969 inclusive, the national expenditures for personal health care, exclusive of the net costs fo private insurance, went up from $183 to $256 per capita. The most recent Consumer Price Index—CPI for July 1967—shows that medical care prices are still rising at nearly twice the rate for all items in the consumer's "market basket."

Despite massive sale of private health insurance, most of the expenditure for personal health services must still be borne out-of-pocket at the time of illness or as a debt thereafter. The reason is that nearly all private health insurance is partial and limited, covering in the aggregate only about one-third of the private costs and leaving nearly two-thirds to be paid outside the framework of insurance. Private health insurance, through a thousand private insurance carriers competing with each other, and through a bewildering array of insurance policies, can do no more than this to ease the burdensome impacts of medical care costs on American families. Nothing less than a national commitment of resources can deal with the need for adequate insurance against the costs of medical care. The health security bill makes this commitment.

It will be readily recognized that the proposed financing, starting with actual levels of expenditure, is not concerned primarily with new costs. On the contrary, the program effects mainly a rechanneling of money already being spent, in order to use it more effectively. Health security expenditures would replace large expenditures already being made by people generally, by employers, by voluntary agencies, by the Federal, State, and local governments, and would relieve State and local governments of various expenditures which they are finding burdensome. For instance, for fiscal 1970, the Medi-Cal program cost my own State of California $485 million. Had the Health Security Act been operative in 1970, the estimated savings to California in this program would have been $291.4 million. Since local property tax pays part of the State's Medi-Cal bill, the savings to homeowners would have been substantial.

Mr. Speaker, at this point I would like to outline briefly the major aspects of the health security program.

First, the health security program does not envisage a national health service in which Government owns the facilities,

employs the personnel, and manages the finances. On the contrary, it intends a partnership of the public and private sectors: Governmental financing and administrative management; joined with private provision of the personal health services through private practitioners, institutions, and other providers;

Second, the health security program would be effected through a process of gradualism, moving on an evolutionary course from what we have and where we are toward the goals we would attain; and

Third, the more or less comprehensive health services to be covered by the health security program would be financed on a budget basis, with reasoned provision of necessary funds from the pool of national resources, and with containment of the hitherto unlimited expenditure demands on the national resources, and with containment of the hitherto unlimited expenditure demands on the national economy.

The benefits of the health security program would be available, with only minor exceptions, to all persons resident in the country beginning with the middle of the program's third year of operation. Eligibility would not require either an individual contribution history or any means test.

The benefits are intended to embrace the entire range of personal health services required for personal health, including services for the prevention and early detection of disease, for the care and treatment of illness, and for physical rehabilitation. With only four exceptions, there are no restrictions on needed services, no cut-off points, no coinsurance, no deductibles, and no waiting periods. The four exceptions are dictated by inadequacies in existing resources or in management potentials, with respect to skilled nursing home care, psychiatric care, dental care—this benefit starts with those who are under age 15, and extends to others gradually—and covered medicines and appliances.

The health security program recognizes the necessity of moving rapidly and dramatically to increase the Nation's resources for the delivery of health services. Therefore the program will earmark a fixed percentage of the Health Security Trust Fund as a Resources Development Fund. The money will be used to strengthen the Nation's resources of health personnel and facilities and its system of delivery of health services, in order to enable the providers of services to meet the demands placed upon them when health security benefits become available.

Providers would be compensated in full, agreeing not to charge individuals for covered services. Hospitals and other institutional providers would be paid on the basis of approved prospective budgets. Independent practitioners—physicians, dentists, podiatrists, and optometrists—may be paid by various methods which they may elect: by fee-for-service or by capitation payments, or in some cases retainers or stipends, and by combination methods. Comprehensive health service organizations may be paid by capitation or by a combination of this method and methods applicable to payment for hospital and other institutional services. Other independent providers—for example, pathology laboratories, radiology services, pharmacies, providers of appliances—would be paid by methods adapted to their special characteristics.

The financial and administrative arrangements are designed to move the medical care system toward organized programs of health services, utilizing teams of professional, technical, and supporting personnel. Earmarked funds would be available to support the most rapid practicable development toward this goal. Federal law would supersede State statutes which restrict or impede the development of group practice operation. Thus, the program would undertake to do what it can toward assuring the availability of covered health services and not merely contributing further strains on overburdened resources.

The health security program includes various provisions to safeguard quality of care. The program would establish national standards for participating individual and institutional providers. Independent practitioners would be eligible to participate upon meeting licensure and continuing education requirements. Specialty services would be covered if, upon referral, they are performed by qualified persons. Hospitals and other institutions would be eligible for participation if they meet national standards somewhat more exacting than in medicare, and establish required utilization review and affiliation arrangements.

With respect to the problems of health manpower shortages, health security intends to supplement established Government programs. It would give incentive and continuing supports to comprehensive group practice organizations for the efficient use of personnel in short supply and for the progressive broadening of services. It would provide support funds for education and training programs for personnel especially needed for covered services, and support stipends to students and trainees—especially for those disadvantaged by poverty, membership in minority groups, and so forth. It would also provide special financial and other supports for the location of needed health personnel in both urban and rural shortage areas.

Various Federal health programs would be superseded, in whole or in part, by health security. Since all persons including those 65 and over would be covered by the program, medicare under the social security system would be terminated. Federal aid to the States for medicaid would also be terminated except to the extent that, and for so long as, services under that program are broader than under health security. As with medicaid, so also with other Federal programs which may be broader than health security. However, our bill does not undertake to revise the provisions for personal health services under the Veterans' Administration, temporary disability, or workmen's compensation programs.

The administration of the health security program is designed to concern itself with the availability of services, the observance of high quality standards, and the containment of costs within reasonable boundaries. Policy and regulations would be established by a five-member full-time board, appointed by the President—with Senate confirmation—for 5-year rotating terms and not more than three members from one political party, and serving under the Secretary of Health, Education, and Welfare. The Secretary and the Board are charged to coordinate the operation of the program with other health related programs of the Government. A statutory National Advisory Council would participate with the Board on general policy, the formulation of regulations, and the allocation of funds, its members having 4-year rotating terms and including representatives of providers and of consumers—the latter in majority. Administration would be effected through the Department's regional offices and would be mainly operational in health subareas, with advisory councils on matters of administration at each such level. Through its regulations, the Board would guide performance under the program; it would coordinate various activities with the State and regional planning agencies; it would provide an accounting of activities to the Congress; and it would engage in studies and projects for evaluation and for progressive improvements of operations.

The financial operations of the program would be managed through a Health Security Trust Fund—similar to the Social Security Trust Fund. Income to the fund would derive from three sources: 40 percent from Federal general revenues; 35 percent from a 3.5 percent on employers' payrolls; and 25 percent from a 2.1-percent tax on individual income up to $15,000 a year, whether from wages, self-employment, or other sources—nonearned income. Employers may pay all or part of employee health security tax and would be expected to preserve obligations under private—collective-bargaining—agreements. Each year, the Board—with the participation of the Advisory Council—would make an advance estimate of the amount available for expenditure—to pay for services, for program development, and for administration—and would make allocations to the several regions. These allocations would be subdivided among categories of services and designated for the health subareas, with participation by the advisory councils. Advance estimates, constituting the program budgets, would be subject to adjustments, as may become necessary, in accordance with guidelines in the act. The allocations to regions and to subareas would be guided initially by the latest available data on current levels of expenditures; thereafter they would be guided by the program's own experiences in making expenditures and by evidences of need toward meeting the program's obligations and objectives, equitably throughout the Nation.

Thus, Mr. Speaker, the Health Security Act we submit to the Congress and to the people of the United States differs

from all previous proposals for national health insurance. It is not just another proposal for insurance. It is not merely an extension of medicare by stages to everyone. It is not an ill-conceived open ended design for pumping more dollars into a chronically strained "nonsystem." It is not simply a bigger categorical program for the production of manpower and facilities without creating a system to employ them.

Our program will build for the residents of this country a rational system of national health security. The funds which we as a people can afford to provide will finance and budget the essential costs of good medical care. Simultaneously we will strengthen our capacity to deliver health services, and make good health care available and reliable without financial hardship for all families and individuals in the Nation.

We take cognizance of the fact that organized medicine shares our concern that America faces a crisis in health care. We know that our goals are the same—to provide adequate health care services for all Americans. We would hope and expect organized medicine to make a substantial contribution in setting up the mechanism for the health security program so that its long years of experience and the expertise of its members would be made available for the effective functioning of the program. As lay groups, the various advisory boards and advisory councils established under the Health Security Act would, I am sure, want to rely heavily on the cooperation and advice of organized medicine so as to insure that the highest possible quality of medical care is available to everyone and that an equitable distribution of available funds is maintained.

We expect that the introduction of the bill and consideration of its companion legislation that has already been introduced in the Senate will spark the most intensive public debate on this subject in 20 years. There are now several various legislative proposals for national health insurance before the Congress. We hope that in the course of public discussion and congressional debate each of these will be examined thoroughly, and that clarifications and improvements in each approach will emerge. We hope that the public will insist that proponents of each bill prove that the system they propose is capable of assuring the availability and quality of care as well as providing a sound mechanism for its financing.

We are confident that the Health Security Act can meet these tests.

Mr. HOWARD. Mr. Speaker, will the gentleman yield?

Mr. CORMAN. I yield to the gentleman from New Jersey (Mr. HOWARD).

Mr. HOWARD. Mr. Speaker, I am pleased and hopeful today as I join my colleague, the distinguished gentleman from California (Mr. CORMAN) in introducing the National Health Security bill.

I am pleased that this proposal has been so thoroughly and competently studied and drafted, and is now before both Houses of Congress. I am hopeful that both chambers will schedule full and complete hearings on this measure in the very near future so that we may enact this vitally needed piece of legislation.

Mr. Speaker, I am particularly enthused about this bill because it would add a most vital, and so far missing, ingredient to our Nation's health program; that is, it would establish a system in what is now a chaotic mess.

The current amount of waste and needless duplication of effort, expensive machinery, experts and specialists costs this National almost 25 cents of every dollar spent on health care. Out of a national expenditure of $63 billion in 1969, $14 billion was wasted.

Such colossal waste committed by a nation possessing such expertise in conquering disease cannot be tolerated. A nation which can deliver men to the moon, but which cannot deliver adequate health services to all of its people, is, I submit, a nation whose medical program needs serious restructuring.

We were able to place men on the moon because an adequately funded organization followed a carefully studied plan designed to achieve the mission it set out to accomplish. We are unable to provide adequate health care to all our citizens not because we lack the funds, but because we lack the carefully studied plan designed to achieve that mission. The National Health Security program offers such a plan.

I am pleased to note that the distinguished Senator from Texas (Mr. YARBOROUGH) has introduced a similar bill in the Senate and has scheduled hearings before the Committee on Labor and Public Welfare which he chairs. I respectfully urge the distinguished chairman of the Ways and Means Committee to likewise schedule hearings at an early date. There is much work to be done before the public will understand this bill. Most of our work will be in dispelling fears and false conceptions, and explaining exactly what the bill does do and how it works.

This Nation can no longer continue to fall behind the other nations of the world in the incidence of infant mortality and childbirth fatalities, nor in life expectancy rates. These basic health care categories are examples of the real problem—bringing health care, with the knowledge and facilities we possess, to the people who need the care.

The waste and inefficiency prevalent in the health care nonsystem today contributes largely and directly to the everrising cost of health care. Too many of our citizens find that a serious illness ruins them financially. Too many of our citizens do not seek the medical attention they need because they cannot afford the care or fear the excessive costs.

I do not criticize any of our doctors, who continue to do an outstanding job. They continue to be, I believe, the finest corps of physicians in the world. Nor do I fault them because of the excessive cost of the system. It is common knowledge that many doctors, not only because of their Hippocratic Oath, but because of their dedication, will gladly treat an ill but nonpaying patient. The Department of Health, Education, and Welfare has published the figures on the distribution of the medical care dollar for personal health care expenditures for the years 1950, 1960, and 1969. The share of the dollar which goes to the physician has actually declined in those years from 25 cents in 1950 to 24 cents in 1960 to 23 cents in 1969.

Private health insurance has been given a chance to prove itself and it has proved that it cannot solve the problem. In its current state, private health insurance is very expensive, too, expensive for most Americans. It is also incomplete, covering only a portion of most illnesses, particularly the expensive ones. It is not used by many persons.

A program of national health insurance working under the guidelines the Committee on National Health Insurance has devised can and will provide for the health care of every American.

The proposed program will provide not only for the payment of the costs of illness, but will emphasize preventive care, will provide sufficient facilities and personnel, and will provide the incentives for the supply and efficient employment of facilities and trained personnel, and thereby assure that the health needs of the Nation are met.

In closing, I would be remiss if I failed to mention the initiator of this program, the late Walter Reuther. His lifelong dream was to assure adequate health care to all Americans. Only his untimely and tragic death in a plane crash prevented him from proposing the program which has now been introduced in both Houses of Congress. It is high tribute to him that such a carefully thought out and practical program has been written and introduced. It is now up to us, the Members of Congress, to complete the tribute to this great national leader by enacting the program for which he laid the foundation.

Mr. CORMAN. Mr. Speaker, I thank the gentleman from New Jersey for his support and I look forward to his help as this legislation goes through the legislative process.

Mr. VAN DEERLIN. Mr. Speaker, will the gentleman yield?

Mr. CORMAN. I yield to the gentleman from California (Mr. VAN DEERLIN).

Mr. VAN DEERLIN. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I would like to congratulate my colleague, the gentleman from California (Mr. CORMAN) for taking up this great cause which our former colleague, the Honorable Cecil King, also of California, carried for so long in the committee on which the gentleman from California (Mr. CORMAN) now serves.

I do hope that although there is no practical possibility of enactment of this legislation by this Congress, that it will be reintroduced early in the 92d Congress under the gentleman's leadership and that we shall not be so long in enacting this splendid and long-needed piece of legislation as we were in enacting medicare.

Mr. CORMAN. Mr. Speaker, I sincerely thank the gentleman for his support.

Mr. COHELAN. Mr. Speaker, today I

am cosponsoring the Health Security Act along with several of my colleagues in the House. This far-reaching legislation will provide for a program of national health insurance as well as strengthen and improve the organization and delivery of health care services.

Mr. Speaker, many of us have long been aware of the present health crisis facing this Nation. The high costs of medical services coupled with a projected medical manpower shortages warrants the attention of this Congress on the problems of the availability and delivery of health care services.

The Health Security Act represents a major innovative step in our health care system. It would combine the Federal, public, and private sectors of the economy into improving health care. This act would provide for qualified health care services for all citizens as well as provide for highly qualified medical personnel. The organization, financing, and delivery of health care services would be managed under this act in such a manner in order to avoid the presently projected national health disaster.

The Health Security Act is vastly superior to all present health insurance plans. In 1969 Americans paid approximately $63 billion out of their pockets for health care services. Experts have maintained that $14 billion of that figure is waste. Hospital costs have gone up 100-percent faster than the cost of living. It has been projected that unless some attempt is made to alleviate this condition of rising medical costs, Americans will be paying twice the costs for health insurance in 1975 as they paid in 1969.

Today it was reported in the Washington Post that the President has asked officials of the Department of Health, Education, and Welfare to draft a proposal that would be designed to make Americans the healthiest people in the world. Americans spend more for health care services than any other nation in the world yet America ranks 13th in infant mortality among the industrialized nations, seventh in maternal mortality, 11th in life expectancy for women and 18th in life expectancy for men. Although Americans have been spending more in the area of health care, the above data clearly indicates that our citizens are not receiving adequate treatment.

Two years ago, Mr. Speaker, the late Walter Reuther was among the first to see our failing health care needs. In November of 1968 Mr. Reuther announced the formation of the Committee of One Hundred for National Health Insurance. This committee was charged with the responsibility of creating a national health insurance plan that would make maximum use of the political, economic, and social framework of this Nation.

This bill that I am cosponsoring today is based on the recommendations of this committee. The distinguished members of the Committee of One Hundred are to be commended for their intensive research and deliberations that took into consideration the views of all groups involved in health care, that is professional associations, labor, government, private institutions, and consumer organizations.

The Health Security Act represents a new chapter in the history of health care in this Nation. At this point, Mr. Speaker, I do not intend to give a point by point detailed analysis of this legislation as this has been ably done today by my colleague from California (Mr. CORMAN).

The Health Security Act would establish a program designed to serve all citizens who need health care services. Through a system of national health insurance, this program would guarantee the orderly and budgeted delivery of services as well as provide for incentives that would greatly generate improvements in both the organization and delivery of health care services.

This act would emphasize the maintenance of health as well as the treatment of illness. Benefits from this program that will become available by July, 1973 will include preventive medicine, the care and treatment of illness, and medical rehabilitation. A five-man Health Security Board, under the jurisdiction of the Secretary of Health, Education, and Welfare, will establish national standards for participating individuals and institutions and will be assisted by regional and local advisory councils.

This national health insurance program will be funded through a Health Security Trust Fund similar to the Social Security Trust Fund. Funds for this national health insurance program will be obtained from three sources: 40 percent from Federal revenues; 35 percent from a 3.5 percent employer's tax; and 25 percent from a 2.1 percent tax on individual incomes up to $15,000 a year. Taxation for this plan will become effective as of January 1, 1973, with the plan's benefits becoming available by July 1, 1973. This health plan will be gradually phased in and funded on a budgeted basis. All health services will be included with the exceptions of limitations on nursing home cases and psychiatric care as well as denial services that will gradually be phased in.

One of the major provisions of this plan is that there will be three separate sections established under the Health Security Trust Fund—a Health Service Account, a Health Resources Development Account and an Administration Account.

Mr. Speaker, the establishment of a Health Resources Development Account is significant in that the Health Security Board will emphasize future health needs as well as present ones.

Provisions will be made in that 5 percent of the Health Security Trust Fund will be used for the recruitment and training of providers of medical services as well as the enlargement and improvement of such organizations and institutions furnishing health care services. A continual strengthening and expansion of medical personnel and institutions will be the key to a gradual national health care delivery system that will insure essential medical services for all our citizens.

Mr. Speaker, the Health Security Act will not create new Federal expenditures but will merely rechannel those funds that are now being spent on medical services in a more efficient and less costly manner. This plan will improve medical services without additional costs and will give all Americans more adequate health care.

In conclusion, Mr. Speaker, I urge my colleagues in the Congress to give serious attention to the Health Security Act. I realize that there is not sufficient time during the remainder of this session for the Congress to fully act on a bill of this magnitude. However, given the deteriorating health care system in our Nation today I would urge the Congress to make this legislation one of the top priorities of the 92d Congress.

Mr. MIKVA. Mr. Speaker, once again the United States has fallen victim to its own chronic short-sightedness. Again we are failing to anticipate a deteriorating national condition that is fast becoming a serious cause of unrest within our society. Like our disregard of the causes of violence in our cities and the causes of our deteriorating criminal justice system; like our ignoring the millions who go hungry in our country while others feast; like our disregard of the economic and social conditions of minorities in our cities—ignoring warnings that education and housing must improve; so, too, have we disregarded a momentous burden our society has placed on the poor, the disabled, the senior citizen, I speak of the high cost of staying healthy.

Because of high rates they cannot pay; millions of Americans have been unable to afford the medical attention and care on which their lives and their children's lives depend.

Private health insurance companies do little to alleviate the cost situation. Given the high rates, the average consumer purchases only partial coverage. In 1968, of the 180 million Americans under age 65, 20 percent had no hospital insurance, 22 percent had no surgical insurance, 34 percent had no inpatient medical insurance, 57 percent had no insurance for doctors' office visits or home visits, and 61 percent had no insurance against the cost of drug prescriptions. One of the most serious gaps in private insurance is that low-income Americans have the least coverage. Sixty-four percent of families with incomes of less than $3,000 and 43 percent of families with incomes between $3,000 and $4,999 are without hospital insurance, while only 8 percent of families with incomes of $10,000 or more are not insured. Millions of people live in fear of the ever present possibility of serious illness and its financial repercussions.

Decades ago, Americans realized the profound effect an inadequate education would have on the life of every citizen; not only in regard to his future job opportunities, but in regard to his attitude to the American ideal of equal opportunities; realize this, our State and local governments made provisions for every American to receive a free public education. Today we must also realize that inadequate health care of millions of Amer-

icans has repercussions throughout the structure of our society that reach not only into the spirits of human beings, but are intermeshed with the present social programs of this country. A man incapacitated by an illness that could have been arrested at an earlier stage, becomes a burden to society. He is the victim of an illness that will affect his family life, his children's lives, and his outlook toward a society that has placed him on the welfare rolls.

Mr. Speaker, with all the medical technological expertise the United States possesses; with all the excellent medical facilities and well-trained physicians at our disposal, the fact cannot be ignored that this country does not possess a well-coordinated, efficient program for health care. The United States is the only major industrial nation in the world that does not have a national health service or program of national health insurance. With all our advances, we rank 13th among industrial countries in the death rate of infants during the first year of life; the mortality rate of nonwhites being twice that of whites, seventh among industrial countries in the percentage of mothers who die in childbirth; nearly five times as many nonwhites as white mothers dying, and 18th in the life expectancy of males and 11th for females.

The United States lacks the necessary manpower and facilities to effectively treat all those who need intensive treatment. One of the most unbelievable, yet real parodoxes of America's health care resources—hospitals, physicians, dentists, nurses, nursing homes, equipment—is that some are overused, some are underused, and many are inefficiently used. Too many people are hospitalized when they could be treated on an out-patient basis, simply because people have health insurance which pays for their hospital bills but not out-patient bills. Survey statistics show that consumers who belong to group practice prepayment programs—which provide extensive out-patient treatment—use 25 to 50 percent less hospitalization than people covered by commercial hospital insurance plans.

It is clear that the problem has reached monumental proportions. The indicators are staring us in the face. It is impossible to turn our backs on them because they exist in every large city and small town in this country. Poor health care is another piece of kindling that is part of what may very well become a funeral pyre for our society if we continue to ignore the profound interrelationships of all of these problems that beset this country.

I emphasize that the program proposed by my colleague (Mr. CORMAN), is not one that encourages a national health service in which the Government owns the facilities and pays the personnel, but one that proposes a partnership between the public and private sectors. This bill provides some far-reaching, concrete answers to alleviate the specific health care problems. First, it establishes effective organization and delivery of health care to all residents of the United States with special emphasis on teams of professional, technical, and supporting personnel. Accordingly, the program will provide funds for special training of physicians, dentists, and other health workers needed for this program, and will apply financial incentives to stimulate the movement of health manpower to medically deprived areas, while providing adequate compensation to the individuals who furnish the health service.

With the adoption of this program, we will be lifting an insurmountable burden from millions of family heads. The Health Security Act will control the mounting costs of health care by incorporating efficient organization and training of personnel, with efficient utilization of hospital and out-patient facilities. I believe this program's enactment is a necessity if we are to think of ourselves as an enlightened society. I hope we are so enlightened.

Mr. ANNUNZIO. Mr. Speaker, I am pleased today to have this opportunity to join with my esteemed colleague from California, Hon. JAMES C. CORMAN, in urging strong and immediate support for a comprehensive universal health care plan for all the people in this Nation. I wish to commend the distinguised gentleman for requesting this Special Order to focus attention on the pressing needs facing the health care system in America. I share his conviction that, as elected spokesmen of the American people, we have a vital responsibility for promoting measures which will ensure the health and well-being of all our citizens. Indeed, we have neglected for too long what noted authorities in this country are calling a "health care crisis of major proportions."

Each day our attention is drawn to new and alarming statistics all of which point to the same inescapable conclusion—that this Nation's huge annual investment in health care services is not yielding essential dividends in terms of improved or prolonged life for millions of Americans. In recent years, we have been spending ever-increasing amounts of public and private moneys in pursuit of good health. In fiscal year 1969 alone, we spent as a nation $60.3 billion on health care services, a total outlay which registered a 12-percent increase over the previous year's expenditures.

Yet vast numbers of Americans have yet to feel the benefits of these huge expenditures. Ninety-six million citizens, almost half our population, suffer from chronic ill health. And this condition of chronic ill health is not, as many of us might suppose, limited to the population over 65. More than 72 percent of the population between 45 and 64 have chronic health conditions resulting in limitations on their ability to hold down employment, keep house, further their education, or otherwise participate actively in the vigorous development of our society.

As Americans, we lay claim to the notion that we have one of the highest standards of living in the world. But, indeed, if this is so, why is it equally true that in a majority of the indexes used to compare health standing among the nations of the world, the United States does not even rank among the top ten? Why do we lag behind 13 other countries in terms of infant mortality, behind 15 other countries in overall life expectancy, behind 20 other countries in incidence of heart disease?

In recent years, our Government has recognized that it must expand its commitment to bettering the health of our people. Public sources now account for over one-third of our national health expenditures. A diverse pattern of over 100 public programs have been developed to provide adequate medical care to our country's citizens. And yet it is still a sorry fact that, in spite of our spending, in spite of our myriad of public and private health programs, we are simply not doing the job.

The ever-growing economic burdens of medical care costs restrain many people from seeking those very services which would promote and maintain their health. We are appalled to discover that increasing numbers of people hesitate to consult a physician or obtain other forms of basic medical attention until the initial complaint or ailment has reached a stage where costly and extensive therapeutic treatment is required.

And Americans are disturbed that when they do seek out medical care, they frequently encounter difficulty in obtaining a physician or point of entry into the health care system, must often wait long hours for private consultations, endure hurried and impersonal attention by overburdened medical personnel.

Several years ago, a number of concerned individuals intimately involved in the Nation's health care system decided that the time had arrived when decisive and far-reaching action was needed to avert a total collapse of health services. Under the leadership of the late Walter Reuther, a man of tremendous foresight and courage, the Committee of One Hundred for the National Health Insurance was set up to consider ways in which this imminent breakdown of health care services could be averted. We owe this outstanding group a profound debt of gratitude for their formulation of a program designed to revitalize our health care system and make available to all Americans the health services they so richly deserve.

The health security program, as embodied in the legislation introduced today by the gentleman from California, the Honorable JAMES CORMAN, and in H.R. 19050, which I introduced into this Chamber on September 9 of this year, is the fruit of the labors of this Committee of One Hundred. As my able colleague has already explained, the health security program would establish a system of universal health insurance providing comprehensive health care for anyone living in the United States. The program would be equitably financed through contributions from employers, employees, the self-employed, and general tax revenues. Important aspects of the program center around a reorganization, a redirecting of the basic resources in our present health care system. Incentives have been built into the program to eliminate duplication and fragmentation of services, to increase efficiency, and thus curtail rising medical costs.

Perhaps the most significant aspect of the program is contained in its very

name—"health security"—for this legislation would insure that every American would no longer feel the anxiety of medical care costs, would no longer encounter barriers to needed health services. Through this program we would enable all Americans to share in the achievements of medical science.

Mr. BINGHAM. Mr. Speaker, I want to commend my colleague from California (Mr. CORMAN) for arranging this special order on the need to provide for a national program of health insurance for all of our citizens. I am pleased to have introduced legislation (H.R. 19072), the National Health Security Act, to implement such a program when the House returned from its recess on September 9, and I am encouraged by the number of Members in the House who also recognize the merit of this legislation.

Despite our affluence as a nation and our world leadership in the development of new medical knowledge and methods, we lag substantially behind a great many other nations in our ability to provide health care to our people. It is widely realized that the United States ranks 13th among the nations of the world in infant deaths; 18th in the life expectancy of men; and 11th in life expectancy of women.

In more personal terms, thousands of American families face the frustration, worry, and pain that grow out of their inability, for any one of a variety of reasons, to obtain the full range of medical services they need at a reasonable cost in time, effort, and resources. In many rural areas, families must travel many miles to reach medical help and, in emergencies, often do not reach it in time. The figures show that medical care is particularly inadequate for members of minority groups, who suffer from twice the rates of infant mortality and deaths in childbirth, for example, as whites. In our largest cities, even many citizens who can afford the rising prices of hospital care find available doctors booked months in advance, hospital beds unavailable, and public health facilities overwhelmed with patients. Thousands of Americans cannot overcome these deplorable obstacles, and so are deprived of a right we have long endorsed as a Nation—the right to adequate health care.

It is no exaggeration, then, to say that we face a national health care crisis. As I see it, this crisis is a result of three related conditions: First, an appalling and increasing shortage of health care professionals and facilities; second, inadequate organization of our existing health care resources to permit maximum delivery of health care services, and third, insufficient funds to cover the costs of providing adequate health care to every American.

The bill my colleagues and I have introduced—the national health security bill—is designed to attack each of these separate elements of our health care crisis over the next several years through a national health insurance program.

It has been under formulation since 1968 by the Committee of One Hundred for National Health Insurance—a group of distinguished Americans and health experts led by the late Walter Reuther, Dr. Michael E. DeBakey, Mrs. Mary Lasker, Mr. Whitney M. Young, Jr., and U.S. Senators KENNEDY, YARBOROUGH, COOPER, and SAXBE.

This legislation has been made necessary by the evident failure of existing Government health care assistance programs and private insurance plans to overcome the inadequacies I have cited. Existing health insurance programs are geared to the costs of curing sickness, not of maintaining and assuring health. They provide remedial, not preventive care. And they do at best a partial job of that. It is estimated that as many as 34 million Americans have no private health insurance at all. In 1968, private health insurance benefits met only about a third of the private costs of health care, leaving the remainder to be paid by the patients—many of whom thought they were well covered by their insurance.

The National Health Insurance program envisioned by this legislation to meet these problems involves no Government ownership of health facilities. It involves no Government employment of health personnel or Government management of health systems. Rather, it provides for a closer partnership between the medical professions and the Government covering a full range of health services. Under this plan, the Government will provide gradually increasing funds and administrative resources which will be made available to private health practitioners and institutions, enabling them to better meet the health needs of all Americans.

A special effort has been made in this legislation to assure that it will not simply further overburden our already overburdened health care system. Special provisions have been included that earmark funds to insure expansion of medical care capacity as the number of Americans covered under the national insurance program expands.

Special care has been taken, too, to see that standards of medical care are not sacrificed as care is expanded. The program establishes national standards more exacting than under the current medicare program for participating medical professionals and institutions.

To improve the organization of available medical resources, the program suggests a system of financial incentives encouraging, for example, greater use and development of group medical practices. By using incentives rather than directives, fuller support and participation of the medical professions is likely.

The program will be financed through a health security trust fund derived from three sources: 40 percent from Federal general revenues, 35 percent from a tax of 3.5 percent on employers' payrolls, and 25 percent from a 2.1 percent tax on individual income up to $15,000 per year.

Mr. Speaker, this legislation, if examined and enacted with all possible promptness by the Congress, can bring all Americans under a program of national health insurance beginning in 1973. I want to commend the excellent work of the Committee of One Hundred in developing this program. I think it is a comprehensive bill. I think it is a bill that combines great vision and idealism with hard practicality. I think it is a bill that deserves the careful study of every Member of Congress and every American who is concerned about the health care problems we face and who is dedicated, as I am, to providing better assurances that each and every American has the kind of opportunity to preserve his health and cure his ills that is presently enjoyed only by a privileged minority of Americans.

Mr. KOCH. Mr. Speaker, I join with my colleagues today in introducing the Health Security Act providing for the establishment of a comprehensive health care program for our country's people. The bill gives us the legislative means for realizing the health security program developed by the Committee for National Health Insurance, a committee of 100 members founded in 1968 by the late Walter Reuther, then president of the United Auto Workers. One of the committee's three vice chairman, Mrs. Albert D. Lasker who has been a national leader in health care matters, resides in my congressional district.

When established to develop a national health care program, the committee was directed not simply to select from other countries the best health care program that could be found for adoption in the United States, but rather to develop a new program which would take advantage of our own medical resources and advancements and, while harmonizing with existing medical institutions, would correct the system's deficiencies. The committee observed this mandate and has produced an extraordinarily sound program: one that will meet today's challenge of high medical costs and the shortage of health manpower and institutions and one that will promote the maintenance of good health as well as the treatment of illness. It will pay for medical care for all Americans: not just the poor or elderly or those who can afford medical insurance premiums. It will make available to all persons comprehensive preventive, treatment, and rehabilitative services. And through its Resources Development Fund and the establishment of national standards for practicing individuals and institutions, it will monitor the quality of medical care received by all Americans.

Getting sick today has become so expensive that a single illness can burden a family for years with monumental medical bills. Health costs per person have more than doubled in the past decade. While in 1960 each American was spending an average of $128 for health care; in 1969 he spent $270. A great portion of this cost is reflected in the rise of patient care in a hospital: in just 5 years this cost has risen 80 percent—from $37.58 per day in 1964 to $67.69 in 1969, and in New York City's private hospitals this cost has reached $100 a day.

Added to the galloping costs of medical care is the inability of health insurance companies to cover the costs of illness.

While Americans pay an estimated $12 billion a year to health insurance companies, they are having to pay two-thirds of the medical costs out of their own pockets.

TODAY'S "SICK CARE," NOT "HEALTH CARE"

One of the most important consequences of today's high cost of medical care and the limitations of insurance coverage, is that medical care for most people is limited to "sick care" and not "health care." Often people do not seek preventive care, and instead wait for an illness to develop before obtaining medical attention. It is interesting to note that the Committee of 100 found only about half as many operations were performed on persons participating in a prepaid group practice plan as in a private insurance plan providing for only hospitalized care.

FREEDOM FROM CRIPPLING COSTS/FREEDOM TO OBTAIN MEDICAL CARE

What the health security program will do is free people from the fear of crippling costs of illness and disability. It will free people to obtain good medical care and to live in good health.

It is obvious, Mr. Speaker, that it is urgent that we do something about the state of the public's health. While our medical technology and sciences are second to none in the world, the health of our people is not at the top of the list. American men rank 18th in the world in life expectancy, giving Swedish men, who rank first, an additional 5 years of life. The United States is 15th in infant mortality, with infant mortality for nonwhites being twice that of whites. And in maternal mortality we are seventh with twice as many American mothers dying during childbirth as in Sweden.

In short, under our present medical system, the people of this country are not receiving the maximum benefits of today's medical sciences: we are not getting health care to the people. This is due to the high costs. But, it is also due to inefficiency in the administration of medical services—an inefficiency that becomes more critical each year with the increasing shortage in health care facilities and professionals.

Opponents of a comprehensive national health care program will argue that it will cost too much. But when analyzed, we will find that, in fact, it will cost no more than what we are paying now and in the long run it will cut costs because of increased efficiency in the delivery of services and increased productivity of a more healthy public. The Committee of 100 estimates that had the program been in operation in 1969, the total cost would have come to $37 billion, or approximately $200 per person. This is not $37 billion in new money but rather the rechannelization of funds that are now being spent by government agencies, insurance companies, and individuals.

The Health Security Act provides that commencing July 1, 1973, all medical services would be paid for out of a Health Security Trust Fund—to be much like the Social Security Trust Fund. There would be three contributors: the general Treasury which would provide 40 percent of the fund; employers through a payroll tax would provide 35 percent; and individuals, 25 percent. The Government appropriation and the taxes on individuals and corporations would be determined by a Health Security Board. Estimates now place the employer payroll tax at 3.5 percent, with individual salary earnings up to $15,000 a year being subject to a tax of 2.1 percent.

ILLNESS IS A NATURAL DISASTER THAT MERITS GOVERNMENT HELP

Mr. Speaker, every major industrial nation in the world now has a national health care program except the United States. We have been reluctant to change our health care institutions in great part because of their past success; but let us not let past successes doom us to failures in the future. The time for change has come—in fact we already are late in making the needed adjustments to the demands of modern medicine whose advances, while often are lifesaving, are also very expensive. Illness at any age is a natural disaster; in other instances of natural disaster our Government has assumed a responsibility to assist individuals in meeting economic hardships.

I think that our colleagues would agree that no price can be attached to good health; the opportunity for good health is something that no society can in good conscience deny any individual. It may be true that those who have the good fortune of not suffering an illness will have to pay more in dollars under the Health Security program than they would today. But is it right to let those who have the misfortune of illness to also suffer from the hardships of today's medical costs?

I commend the Health Security Act to our colleagues, and I urge that we begin immediately to obtain its approval so that a solid administrative foundation can be established throughout the country for its proposal commencement in 1973.

GENERAL LEAVE

Mr. CORMAN. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days in which to revise and extend their remarks on the Health Security Act.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

PERSONAL ANNOUNCEMENT

Mr. CHAPPELL. Mr. Speaker, I was unavoidably detained in my office working on a matter very important to my district when the vote was taken on H.R. 18306. Had I been present for the vote I would have voted "nay."

DANGEROUS SPECIAL DRUG OFFENDER SENTENCING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia (Mr. POFF) is recognized for 10 minutes.

Mr. POFF. Mr. Speaker, when the House debates H.R. 18583, the drug control bill, I will offer the amendment printed at the foot of my remarks.

It will be seen that my amendment deletes nothing from the committee bill. Rather, it adds two new sections to the law enforcement section of the bill. The amendment is a supplement to the "continuing criminal enterprise" portion of the committee bill. Together, they will constitute a twofold attack upon the repeat offender, the professional offender, the truly dangerous criminal without whom the unlawful drug culture is this country would collapse.

The text of my amendment is as follows:

DANGEROUS SPECIAL DRUG OFFENDER SENTENCING

On page 88 after line 12, insert the following:

"SEC. 509. (a) Whenever an attorney charged with the prosecution of a defendant in a court of the United States for an alleged felonious violation of any provision of this title or title III committed when the defendant was over the age of twenty-one years has reasons to believe that the defendant is a dangerous special drug offender such attorney, a reasonable time before trial or acceptance by the court of a plea of guilty or nolo contendere, may sign and file with the court, and may amend, a notice (1) specifying that the defendant is a dangerous special drug offender who upon conviction for such felonious violation is subject to the imposition of a sentence under subsection (b) of this section, and (2) setting out with particularity the reasons why such attorney believes the defendant to be a dangerous special drug offender. In no case shall the fact that the defendant is alleged to be a dangerous special drug offender be an issue upon the trial of such felonious violation, be disclosed to the jury, or be disclosed before any plea of guilty or nolo contendere or verdict or finding of guilty to the presiding judge without the consent of the parties. If the court finds that the filing of the notice as a public record may prejudice fair consideration of a pending criminal matter, it may order the notice sealed and the notice shall not be subject to subpena or public inspection during the pendency of such criminal matter, except on order of the court, but shall be subject to inspection by the defendant alleged to be a dangerous special drug offender and his counsel.

"(b) Upon any plea of guilty or nolo contendere or verdict or finding of guilty of the defendant of such felonious violation, a hearing shall be held, before sentence is imposed, by the court sitting without a jury. The court shall fix a time for the hearing, and notice thereof shall be given to the defendant and the United States at least ten days prior thereto. The court shall permit the United States and counsel for the defendant, or the defendant if he is not represented by counsel, to inspect the presentence report sufficiently prior to the hearing as to afford a reasonable opportunity for verification. In extraordinary cases, the court may withhold material not relevant to a proper sentence, diagnostic opinion which might seriously disrupt a program of rehabilitation, any source of information obtained on a promise of confidentiality, and material previously disclosed in open court. A court withholding all or part of a presentence report shall inform the parties of its action and place in the record the reasons therefor. The court may require parties inspecting all or part of a presentence report to give notice of any part thereof intended to be controverted. In connection with the hearing, the defend-

ant and the United States shall be entitled to assistance of counsel, compulsory process, and cross-examination of such witnesses as appear at the hearing. A duly authenticated copy of a former judgment or commitment shall be prima facie evidence of such former judgment or commitment. If it appears by a preponderance of the information, including information submitted during the trial of such felonious violation and the sentencing hearing and so much of the presentence report as the court relies upon, that the defendant is a dangerous special drug offender, the court shall sentence the defendant to imprisonment for an appropriate term not to exceed twenty-five years and not disproportionate in severity to the maximum term otherwise authorized by law for such felonious violation. Otherwise it shall sentence the defendant in accordance with the law prescribing penalties for such felonious violation. The court shall place in the record its findings, including an identification of the information relied upon in making such findings, and its reasons for the sentence imposed.

"(c) This section shall not prevent the imposition and execution of a sentence of imprisonment for life or for a term exceeding twenty-five years upon any person convicted of an offense so punishable.

"(d) Notwithstanding any other provision of this section, the court shall not sentence a dangerous special drug offender to less than any mandatory minimum penalty prescribed by law for such felonious violation. This section shall not be construed as creating any mandatory minimum penalty.

"(e) A defendant is a special drug offender for purposes of this section if—

"(1) the defendant has previously been convicted in courts of the United States, a State, the District of Columbia, the Commonwealth of Puerto Rico, a territory or possession of the United States, any political subdivision, or any department, agency or instrumentality thereof for two or more offenses involving dealing in controlled substances, committed on occasions different from one another and different from such felonious violation, and punishable in such courts by death or imprisonment in excess of one year, for one or more of such convictions the defendant has been imprisoned prior to the commission of such felonious violation, and less than five years have elapsed between the commission of such felonious violation and either the defendant's release, or parole or otherwise, from imprisonment for one such conviction or his commission of the last such previous offense or another offense involving dealing in controlled substances and punishable by death or imprisonment in excess of one year under applicable laws of the United States, a State, the District of Columbia, the Commonwealth of Puerto Rico, a territory or possession of the United States, any political subdivision, or any department, agency or instrumentality thereof; or

"(2) the defendant committed such felonious violation as part of a pattern of dealing in controlled substances which was criminal under applicable laws of any jurisdiction, which constituted a substantial source of his income, and in which he manifested special skill or expertise; or

"(3) such felonious violation was, or the defendant committed such felonious violation in furtherance of, a conspiracy with three or more other persons to engage in a pattern of dealing in controlled substances which was criminal under applicable laws of any jurisdiction, and the defendant did, or agreed that he would, initiate, organize, plan, finance, direct, manage, or supervise all or part of such conspiracy or dealing, or give or receive a bribe or use force in connection with such dealing.

A conviction shown on direct or collateral review or at the hearing to be invalid or for which the defendant has been pardoned on the ground of innocence shall be disregarded for purposes of paragraph (1) of this subsection. In support of findings under paragraph (2) of this subsection, it may be shown that the defendant has had in his own name or under his control income or property not explained as derived from a source other than such dealing. For purposes of paragraph (2) of this subsection, a substantial source of income means a source of income which for any period of one year or more exceeds the minimum wage, determined on the basis of a forty-hour week and fifty-week year, without reference to exceptions, under section 6(a)(1) of the Fair Labor Standards Act of 1938 (52 Stat. 1062, as amended 80 Stat. 838), and as hereafter amended, for an employee engaged in commerce or in the production of goods for commerce, and which for the same period exceeds fifty percent of the defendant's declared adjusted gross income under section 62 of the Internal Revenue Act of 1954 (68A Stat. 17, as amended 83 Stat. 655), and as hereafter amended. For purposes of paragraph (2) of this subsection, special skill or expertise in such dealing includes unusual knowledge, judgment or ability, including manual dexterity, facilitating the initiation, organizing, planning, financing, direction, management, supervision, execution or concealment of such dealing, the enlistment of accomplices in such dealing, the escape from detection or apprehension for such dealing, or the disposition of the fruits or proceeds of such dealing. For purposes of paragraphs (2) and (3) of this subsection, such dealing forms a pattern if it embraces criminal acts that have the same or similar purposes, results, participants, victims, or methods of commission, or otherwise are interrelated by distinguishing characteristics and are not isolated events.

"(f) A defendant is dangerous for purposes of this section if a period of confinement longer than that provided for such felonious violation is required for the protection of the public from further criminal conduct by the defendant.

"(g) The time for taking an appeal from a conviction for which sentence is imposed after proceedings under this section shall be measured from imposition of the original sentence.

"(h) With respect to the imposition, correction, or reduction of a sentence after proceedings under this section, a review of the sentence on the record of the sentencing court may be taken by the defendant or the United States to a court of appeals. Any review of the sentence taken by the United States shall be taken at least five days before expiration of the time for taking a review of the sentence or appeal of the conviction by the defendant and shall be diligently prosecuted. The sentencing court may, with or without motion and notice, extend the time for taking a review of the sentence for a period not to exceed thirty days from the expiration of the time otherwise prescribed by law. The court shall not extend the time for taking a review of the sentence by the United States after the time has expired. A court extending the time for taking a review of the sentence by the United States shall extend the time for taking a review of the sentence or appeal of the conviction by the defendant for the same period. The taking of a review of the sentence by the United States shall be deemed the taking of a review of the sentence and an appeal of the conviction by the defendant. Review of the sentence shall include review of whether the procedure employed was lawful, the findings made were clearly erroneous, or the sentencing court's discretion was abused. The court of appeals on review of the sentence may, after considering the record, including the entire presentence report, information submitted during the trial of such felonious violation and the sentencing hearing, and the findings and reasons of the sentencing court, affirm the sentence, impose or direct the imposition of any sentence which the sentencing court could originally have imposed, or remand for further sentencing proceedings and imposition of sentence, except that a sentence may be made more severe only on review of the sentence taken by the United States and after hearing. Failure of the United States to take a review of the imposition of the sentence shall, upon review taken by the United States of the correction or reduction of the sentence, foreclose imposition of a sentence more severe than that previously imposed. Any withdrawal or dismissal of review of the sentence taken by the United States shall foreclose imposition of a sentence more severe than that reviewed but shall not otherwise foreclose the review of the sentence or the appeal of the conviction. The court of appeals shall state in writing the reasons for its disposition of the review of the sentence. Any review of the sentence taken by the United States may be dismissed on a showing of the abuse of the right of the United States to take such review.

"SEC. 510. No limitation shall be placed on the information concerning the background, character and conduct of a person convicted of an offense which a court of the United States may receive and consider for the purpose of imposing an appropriate sentence under this Act.

TAKE PRIDE IN AMERICA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. MILLER) is recognized for 5 minutes.

Mr. MILLER of Ohio. Mr. Speaker, today we should take note of America's great accomplishments and in so doing renew our faith and confidence in ourselves as individuals and as a nation. There are four times more TV sets in the United States than any other nation in the world. There are over 89 million television receivers in the United States compared to 22 million in Japan, the second-ranked nation.

ADDRESS BY SENATOR JOHN L. McCLELLAN TO BLUECOATS, INC., AKRON, OHIO

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. AYRES) is recognized for 15 minutes.

Mr. AYRES. Mr. Speaker, the Bluecoats organization of Summit County was created in 1959 by a volunteer group of citizens who were concerned with the well-being and morale of the uniformed protective services of our country.

The objective of the organization is to maintain funds to provide financial aid to the wives and dependents of policemen, firemen, and deputy sheriffs who become disabled or who lose their lives in line of duty.

I am very proud of my membership in this very fine group from Summit County, Ohio. Other cities have similar organizations.

These men whom we serve are almost daily risking their lives on our behalf. The concern that we show them cannot help but raise their morale. This is particularly beneficial during a period when they have been under physical attack by

some of the very people whom they are trying to assist.

Last Thursday, the Akron Bluecoats had their annual dinner at the Portage Country Club. The principal speaker at the banquet was a man who has done more for law and order than almost any other man in our history. Through the hearings that he has conducted and the legislation that he has initiated, he has slowed up the activities of organized crime.

I am speaking, of course, of U.S. Senator JOHN L. MCCLELLAN. I have valued the friendship of this great man and have followed his leadership in this most important field.

As I sat listening to his speech at the Akron Bluecoats' dinner I felt that my colleagues would be very interested in his remarks. I wish to associate myself with his commendation of our police forces.

Senator JOHN L. MCCLELLAN'S remarks follow:

EXCERPTS FROM REMARKS OF SENATOR JOHN L. MCCLELLAN

We are now in the midst of a perilous period in our nation's history. Our country is in trouble; it is confronted with real dangers.

The greatest threat to our survival is not reposed in the missiles and bombs or in the armed might of any foreign foe. Although there is danger from that source—and I do not minimize it—our capacity and power of retaliation have served so far as an effective deterrent to any direct military attack upon us by any would-be aggressor. If we will continue to maintain a posture of defense adequate to repel such an attack, it is unlikely that any overt attempt will ever be made from without to conquer or destroy our country by force of arms.

I believe the greatest and more immediate danger to our national security stems from the criminal and subversive activities of enemies within.

More than 100 years ago, Abraham Lincoln said, "if danger ever reaches us, it must spring up among us. It cannot come from abroad." He further said, "if destruction be our lot, we must ourselves be its author and finisher; as a nation of free men, we must live through all time or die by suicide." History confirms that great nations are never conquered from the outside unless they become corrupt and subverted from within.

The wave of criminal behavior and the unrelenting assaults now being made on our society and constituted authority are moving us toward the brink of chaos and anarchy. These assaults have reached such momentum and gravity that they now compel urgent and profound national concern.

Lawlessness, violent dissension, and moral decay which pervade our land today have reached dimensions that portend open rebellion against society and the rule of law. The unprecedented rise in crime and the steady decline in effective law enforcement during the past decade present a most forbidding record—a record that is a reproach to our nation and to our modern civilization.

Crimes of rapacity and violence have spread until they blanket our nation. There is no sanctuary—no refuge—to which the citizen can repair for safety and for protection from criminal depredations.

Crimes today are committed everywhere with virtual impunity—in the streets and alleys, in our schools and churches, and in our homes and market places. Crime is in no way related to geography; it knows no boundaries. This growing rebellion against the rule of law threatens our internal security and endangers the survival of our country.

If, for the next 10 years, crime increases at the same rate that it has during the past decade, we will be inundated with an epidemic of lawlessness—the devastation and ravages of which the structure of our society cannot withstand and which the sovereignty of our government cannot survive.

Just as street crime is a threat to the security of our persons and property, equally menacing is the threat of organized crime to the stability of our economic system and to the integrity of government. So entrenched, cold-blooded, and powerful are the forces of organized crime that they have created outside of the law a veritable parasitic government that feeds like a leech on all segments of our economy and society.

* * * * * *

The decade of the sixties ended with crimes of violence up 131 percent. The decade of the seventies has been ushered in with a rash of diabolical and senseless bombings directed at government buildings, at public officials, and at educational, religious, and free enterprise institutions.

Some 5,000 bombings have occurred in the United States during the past 18 months. More than 1,200 of these were with high explosives bombs; the others were with incendiary devices. These bombings caused the deaths of at least 45 persons, injured more than 400 others, and resulted in property damage in excess of $25 million.

In addition to these actual bombings, some 35,000 bomb threats have been made. Some of these threats and bombings were, of course, committed by individual fanatics whose varied motivations possibly cannot be established. But, we know that many were incited and carried out under the direction and leadership of well-organized militant groups with malicious intent to commit sabotage and to instill fear and terror in the people and in the official "establishment" in the cities and communities where they occurred. I am convinced that many of these violent assaults are a phase of training for guerrilla warfare which self-styled revolutionaries are planning and intend to wage against our free society and constituted government.

These characteristic revolutionary tactics have also been resorted to by rioters and protestors to support causes, to protest alleged grievances, and to impose inordinate, unlawful, and non-negotiable demands. In fact, threats, violence, and blackmail are now instruments of common use to compel government, public officials, and our free institutions to be subservient to the will and demands of the anarchist and the mob.

There are those, too many, who seek to excuse and mitigate actual civil disobedience and crimes committed in the name of protest and dissent. But, violence and other unlawful acts are unacceptable and intolerable instruments for the advocacy of causes or as weapons of protest against rules of society or laws with which one disagrees.

Dissent is a precious right—a right that we all acknowledge and defend. But legitimate dissent does not warrant or excuse acts of arson, bombing, or violence to the property and person of another. Such actions wilfully perpetrated are crimes, and the dissenters and protestors who resort to such violent acts are law violators and should be dealt with swiftly and severely.

The right of dissent and protest does not carry with it a grant of privilege or license to violate the law or to interfere with or obstruct the legitimate rights of others.

* * * * * *

Today, the lawbreaker, in all categories—including the habitual criminal and the organized crime offender—enjoys greater immunity and protection than ever before. Only about one person out of every 20 who commits a major crime is ultimately convicted and punished. And, when they are punished, seldom are the sentences imposed commensurate with the gravity of the crimes committed.

This soft-sentencing practice is an important factor in the ever-widening gap between lawlessness and law and order. Lenient sentencing has definitely crippled the war on crime. Rising recidivism tells us that rehabilitation is seldom achieved. Upward of 75 percent of those arrested today are repeaters.

This gap is further widened by the growing inability of our police to solve many major crimes. While the overall-rate of crime was rising by 148 percent during the last 10 years, the rate of crime clearances, that is, crimes solved by law enforcement officials, declined by 32 percent.

Inordinate delays from time of arrest and indictment until trial are a mounting obstacle to the administration of justice. Most regrettably, many of these delays are occasioned by technicalities associated with "new rights" and procedural requirements that have been imposed by the Supreme Court on trial processes in criminal cases. As a result, in many jurisdictions, the criminal case docket has become so congested that it takes from a year to two years—and longer—to bring a serious criminal case to trial. During the long period of waiting for the trial to begin, the accused is usually free on bail with the opportunity to resume his criminal activities, and, too often, many do just that.

All of this stands in sharp contrast to the English system where the time from arrest to time of trial averages only six to eight weeks and another 30 to 60 days to final disposition on appeal. Obviously, there is urgent need to speed up the processes of justice and provide for quicker trials and final disposition of criminal cases.

Mr. Chief Justice Burger, in his recent State of the Judiciary address to the American Bar Association, underscored this problem and noted that it now takes twice as long as it did 10 years ago to dispose of criminal cases from indictment to sentence. This prolonged time is frequently compelled by reason of the "new rights" and technicalities to which I have just referred—and particularly to those associated with confessions, identifying witnesses, and evidence seized by the police.

I firmly believe that some Court decisions have been a contributing factor to the deterioration of law enforcement. And, I think it is unfortunate that the Supreme Court during this era of rising crime and turbulence has overruled and repudiated sound court precedents of long-standing and has reinterpreted and given strained construction and new meaning to many parts of the Constitution.

The Court has *contrived* "new constitutional rights" for the accused which have altered numerous evidentiary rules and law enforcement procedures. Many of these changes have served to make the police officer's job increasingly difficult and more dangerous.

My views on the effect of these Court decisions are shared by others—including past and present members of the Court itself. In 1967, Mr. Justice Harlan, in his dissenting opinion in *Berger vs. New York*, stated:

"Newly *contrived* constitutional rights have been established without any apparent concern for the empirical process that goes with legislative reform."

Later, when I used the word *"contrived"* in referring to certain rulings of the Court, I was taken to task by some of the liberal press and commentators. But, obviously, I did not originate the application of that terminology to Supreme Court decisions. A

member of the Court itself is apparently the author of it.

In reading many dissenting opinions of members of the Court, I find that they often use much harsher and more incisive language in criticizing the Court's opinions than I have ever used in commenting on the Court's precedent-shattering decisions.

Mr. Justice Harlan in that dissenting opinion further said:

"The Court has more and more taken to itself sole responsibility for setting the *pattern* for criminal law enforcement throughout the country."

Now, let us take a brief look at that "pattern" bearing in mind that the written Constitution has not changed—not one word of it. The meanings of its words have simply been unwisely reinterpreted by the Court and given new applications, in many instances, to overrule previous decisions and many sound precedents of long standing and to change the law of the land.

Statistics dramatically portray the picture. Out of 123 federal criminal cases decided by the Supreme Court—with a written opinion—during the past 10 years, 68 or 55 percent of them were reversed. Out of 146 state criminal cases so decided by the Supreme Court during that same period of time, 114 or 78 percent of them were reversed. That "pattern"—that record—it seems to me, leaves much to be desired, for I can hardly believe that our Federal Circuit Judges and our State Supreme Court Judges, respectively, are that unqualified and incompetent as to warrant such wholesale reversal of their decisions.

Two new members—including a Chief Justice—have been appointed to the Court within the last year. In due time, no doubt, other changes on the Court will occur. I am encouraged that the changes thus far are for the better.

As evidence of this, it is significant to note that during the last term of the Warren Court (1968–69) the Court heard and decided 26 appeals in criminal cases. The government—the prosecution—won only eight (or 31 percent) of them; 18 (or 69 percent) of them were reversed. Quite in contrast, during the first term of the Burger Court (1969–70), the Court heard and decided 29 appeals in criminal cases. The government—the prosecution—won 18 (or 62 percent) of these. Percentagewise, this represents 100 percent improvement over the previous year under the Warren Court.

This marked improvement certainly gives promise that the judicial pendulum is beginning to swing back towards a better balance of justice as between the rights of the criminal and the protection of society. This change may well indicate that the activism and false liberalism which so often characterized some of the Court's decisions during the past few years are diminishing and hopefully are being abandoned.

* * * * *

Although some of the Court's decisions may have frustrated and weakened law enforcment, they certainly are not the basic causes of criminal behavior.

Many socio-economic factors can be identified as causes of crime; such as poverty, overcrowded living conditions, unemployment, lack of education, broken homes, exposure to violence in movies and on television, drug addiction, and many others. These causes do exist in varying degrees. They, of course, should receive the attention of both government and society and should be removed or ameliorated wherever possible. In fact, the Federal Government is now spending some $40 to $50 billion annually on programs directed to problems in those areas.

But, some of these factors are too often magnified and exaggerated as major causes of crime. For, today, we have greater affluence and less poverty in America than ever before. We have better housing, more conveniences, and greater educational and economic opportunities than ever before. We had much, much less crime half a century ago—even a quarter of a century ago—when poverty was far more prevalent than it is now. And, certainly, we cannot blame poverty, overcrowded living conditions, unemployment, and such other factors for the lawless behavior and rioting of college students or for the revolutionary bombings and violent activities of such organizations as the Black Panthers, and the Students for a Democratic Society and their bomb-throwing offspring, The Weatherman.

I believe the major cause of crime and lawlessness with which we are today afflicted is more basic and goes deeper. It stems primarily from the failure of the homes, the schools, and the churches to instill into our youth high ideals and standards of moraltiy and decency and a stronger sense of citizenship obligation.

These are the institutions where discipline, respect for authority, concepts of individual responsibility, and a sense of duty to God, to country, and to our fellowman are first instilled into the hearts of minds of our children. The void created by these failures is too often filled today with an attitude of disrespect, permissiveness, cynicism, and a callousness that borders on nihilism. Unfortunately, however, those would-be nihilists of this generation offer no constructive alternative. They offer only disruption, chaos, anarchy, and destruction.

* * * * *

In addition to authorizing and funding many programs to remove or ameliorate those social and economic factors that are often cited as causes of crime, the Congress is also enacting new laws to improve and strengthen our law enforcement processes and procedures.

In 1968, Congress enacted the Omnibus Safe Streets and Crime Control Act. Title I of that Act provides for federal financial assistance to states and units of local governments. We appropriated $63 million for that purpose in 1969, $268 million for Fiscal 1970, and we will appropriate $480 million for Fiscal 1971. Within the next three to five years, this appropriation item is expected to exceed $1 billion dollars annually. It will be another four or five years before this program will come into full fruition, but by reason of this federal assistance, we will soon have better trained, better equipped, and more efficient law enforcement officials throughout the nation.

Title III of that Act provides for court-authorized and carefully controlled use of wiretaps and electronic surveillance. This Title of the bill was bitterly contested in the Senate but finally adopted by an overwhelming vote of 68 to 12. The opposition contended that this Title would legalize promiscuous snooping and the invasion of privacy of American citizens. These fears and predictions have in no way materialized. The former Attorney General, as you know, spurned this Title of the Act and refused to use it. Fortunately, however, the present Administration is making forceful and effective use of it.

During the first 18 months of this Administration, 136 court orders have been procured for wiretapping or electronic surveillance. One hundred thirty-three of these were executed. Of that 133, 121 were successful and productive, resulting in 419 arrests and 325 persons being indicted to date. Results achieved from only just a few of those court-approved wiretaps are:

(1) 124 pounds of heroin worth $8 million were seized.

(2) Two separate numbers rackets rings opearting in 60 different locations in Midwestern States were broken up with the seizure of gambling records and paraphernalia and $50,000 in cash.

(3) A half million dollars worth of stolen bonds was recovered.

(4) Plans for murder and a bank robbery were overheard which alerted officials and enabled them to prevent the murder and to apprehend the robbers and recover the stolen money immediately following the robbery.

(5) In the Nation's Capital, the police made a successful raid recovering large quantities of drugs and arrested 44 individuals, including a lawyer, a policeman, a real estate agent, a dentist, a wholesale distributor of drugs, and two members of the Mafia who imported the drugs.

(Incidentally, members of the Cosa Nostra or other organized crime groups were involved in all of these operations.)

Thus, the effectiveness of this statute in the war on organized crime is now firmly established. And, to date, contrary to predictions, there has not been reported a single instance of abuse or misuse of the authority and the power that the Act confers.

* * * * *

On January 23rd of this year, the Senate passed by a record vote of 73 to 1, S. 30, the Organized Crime Control Act of 1969. Since that time, 22 Senators who were absent and not voting have announced their support for the measure. It deals primarily with evidence-gathering and trial processes in organized crime cases. Among other things, it revamps the grand jury system, permits the securing of testimony in certain instances over the objections of self-incrimination, permits the taking of depositions of witnesses who may be in danger of reprisals, provides new anti-gambling measures, provides for the application of anti-trust type remedies to organized crime's infiltration of legitimate businesses, and provides for increased punishment for habitual, professional, and organized crime offenders.

Notwithstanding Attorney General Mitchell has termed this bill "one of the most imaginative and comprehensive proposals to combat organized crime ever introduced in the Congress"; notwithstanding many of the provisions of the bill were recommended by the President's Crime Commission; notwithstanding the bill has the endorsement of the National Chamber of Commerce, National Association of Counties, National Association of Chiefs of Police, and the American Bar Association; and notwithstanding this law is urgently needed; the bill has been languishing in the House Judiciary Committe now for more than seven months. The public interest and the safety and protection of American citizens require that the House process and pass this measure without further procrastination and delay.

Incidentally, the same forces who fought the wiretap and electronic surveillance provision of the Omnibus Crime Bill are today bitterly opposing S. 30. These forces were wrong when they fought the Omnibus Safe Streets and Crime Control Act, and they are just as wrong now in opposing this Organized Crime Control Act.

The passage of this bill means that the Congress will have given a new chest of modern tools—effective tools—to law enforcement agencies with which to protect society from the violence and depredations of professional criminals. Certainly, its enactment will greatly increase the probability that the professional gangsters and racketeers, the illegal narcotic distributors, and the members of organized crime rings and gambling syndicates will be apprehended, tried, convicted, and punished for their nefarious crimes.

The Senate, I am proud to say, has fully measured up to and met its responsibility. The Administration favors and is strongly supporting the bill. The American people

have a right to ask and to expect the House of Representatives to act promptly and favorably in adding these vital new weapons to the arsenal of law enforcement.

* * * * *

Our sheriffs and their deputies, our policemen on the streets, and, quite frequently, our municipal firemen are on the front line of resistance to criminal assaults. They are the primary target of the law violators, the subversives, and the revolutionaries. They are required to do their jobs in an atmosphere of growing resentment and hostility. They are our firing line defenders who must bear the brunt of verbal abuse and physical attacks of those who are seeking to undermine and destroy our system. They are compelled to endure the epithet, "Pigs," and the vile profanities and obscenities that ring in their ears. It is they who are expected to sustain and bear without retaliation the vulgar insults of the vandal, the arsonist, and the rioter and then be subjected to a false and malicious charge of "police brutality." It is they who under trying circumstances and ordeal must keep their "cool." In other words, they are expected to keep their heads when all about them are losing theirs and blaming them for the disorders and violence at hand.

To the dedicated, courageous, and faithful police officers of our nation, we all owe a heavy debt of gratitude. That debt is an obligation that law-abiding citizens can only partially pay by giving to them unstinting cooperation, moral support, and good will.

Time is running out. We must restore law and order in America. To do this, we must make available to our law enforcement agencies all legal weapons that can be fashioned within the framework of the Constitution. We must stop pampering the perpetrators of violence, stop coddling criminals, and stop condoning crime. I believe that the right of the citizen to be safe transcends the right of the criminal to be free. We can never have safe streets and safe homes, nor will our free institutions be secured, until we get the anarchists, the habitual criminals, and other felons off the streets and in the jails where they belong.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. HALPERN) is recognized for 5 minutes.

Mr. HALPERN. Mr. Speaker, the catastrophic events in recent days in the Middle East give all of us cause for great anxiety and concern. The outlook is dark and grim. The showdown is here and our Government can no longer make the mistakes of the past.

Israelis are disillusioned because it is now clear that the United States was not adequately prepared to monitor the cease-fire as closely as it promised Israel it would. The Egyptian-Soviet axis brazenly violated the standstill and positioned many SA–2 missiles in the prohibited 32-mile zone west of the Suez. The new sites are within 11 miles of the canal and the Egyptians may now aim at Israel planes 12½ miles east of the canal.

Indeed, many now suspect that Egypt accepted the cease-fire to gain a breathing spell for her army and to mass materiel and manpower, in preparation for military and diplomatic pressures to force Israel's capitulation to ultimata when the 90-day truce ends.

I would like to outline six steps that should be taken immediately by the United States.

One. The United States must demand that the United Arab Republic and Soviet missile troops withdraw new weapons systems installed in the area of the Suez Canal in violation of the 90-day cease-fire. The United States was the initiator of this cease-fire and gave Israel solemn assurances that Israel's security would not be compromised. Yet, these assurances proved worthless when Russian-Egyptian missiles were moved forward in violation of the standstill agreement. This step must be taken to lend credibility to the U.S. role on the eve of the visit to the United States of Israeli Prime Minister Golda Meir who is due here this week, September 17.

Second. The United States must move at once to rectify the present imbalance which menaces Israel and encourages the Arab to continue belligerency. This should be done by the grant of arms and provision of easy credit long-term loans covering other arms. Phantom jet aircraft should be delivered immediately from existing reserve stocks of the U.S. Air Force in West Germany. So should the latest electronic countermeasure devices to cope with the missiles. It is also essential that Israel receive the best available American tanks, improved Hawk missile systems, and other arms without delay. This is the least that the United States can do to balance the new situation created by the Soviet Union in addition to the deterioration of the situation in Jordan and Lebanon. It is the only way to deter even more volatile Arab aggression.

Third. The time has come to advocate a United States-Israel defense pact. Since Soviet troops now confront Israel at the Suez Canal, the risk of miscalculation is apparent. To deter the Russians from incorrectly assessing American intentions, it is essential that the United States spell out in contractual form the commitment of our country not to permit the Soviet Union to unleash its own forces against Israel. This may avert Russian involvement that may escalate and lead to world war III and the nuclear destruction of the world.

Fourth. The United States must respond vigorously to Arab hijacking. In addition to placing armed guards aboard American commercial aircraft, we must dramatize to the Arab states that we will not tolerate collaboration with the terrorists. Oh, sure some Arab regimes disavow the acts of terrorists. But they are just as responsible for the devastation wrought by the so-called liberationists. They allow terrorists camps and commando training to flourish openly in their lands and allowed them to flaunt their threats and attacks on Israel. So, when Egypt and Lebanon plead innocent to responsibility for the hijackings they are just as guilty as the actual perpetrators. We should discontinue all flights to Beirut and Cairo. We should deny admission to the United States to the aircraft of any nation that serves nations that harbor pirates. We should embargo delivery of airliners ordered here by Arab states.

Fifth. We should propose an international convention at the Hauge to draft a treaty or unlawful seizure to provide the apprehension, prosecution or extradition of hijackers and make any nation that collaborates or harbors air pirates as violators of international law subject to appropriate sanctions.

Sixth. A congressional joint resolution should be offered to insist that all passengers on American ships and aircraft be afforded the full protection of the American flag regardless of the religion and nationality of such passengers. Such resolution would provide for all measures necessary, including use of military force, to rescue persons hijacked or kidnapped when they enjoyed the protection of the American flag aboard U.S. aircraft or ships.

The time for talking about these proposals is past. We must act now.

INVITATION FOR ACTION AGAINST ORGANIZED CRIME

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri (Mr. RANDALL) is recognized for 10 minutes.

Mr. RANDALL. Mr. Speaker, for the benefit of the people of this country, who shoulder the burden of the billion dollar a year cost of organized crime, and whose mental and emotional suffering at the hands of the crime lords cannot be measured in dollars and cents, I have today filed a discharge petition on House Resolution 1169. This resolution will provide for 4 hours general debate. It will provide an opportunity for every Member to vote on meaningful legislation for dealing with the nationwide problems of organized crime.

If this petition attains the necessary 218 signatures, it will bring to the floor our bill, H.R. 18279, the Organized Crime Control Act of 1970. This bill is essentially and substantially the same as the bill S. 30, which passed the Senate and has been before our Committee on the Judiciary since January. All of my colleagues who have done their homework are familiar with the provisions of that bill.

This is the first time in my years here that I have sponsored a discharge petition. But the need for the legislation to which this petition is attached is so great, the conditions which it would help correct need correction so badly and the hour of this legislative session so late as to justify drastic procedures if they are necessary for dealing with the far-reaching effects of the multiple sins committed by organized crime rings against the people of this Nation.

In the past 2 years we have passed and then improved and enlarged upon legislation for dealing with crime in the streets. I am confident that establishment of the Law Enforcement Assistance Agency and increasing its funding for the various responsibilities bestowed upon LEAA will go far toward reducing the number of robberies, muggings, burglaries, and other crimes of local and regional nature.

But that fine law does not go nearly far enough. It does little if anything at all to strike at the sophistication of the big business of organized crime, which has branch operations and ruthless representatives and practitioners in nearly every city and town in the country. It is

this kind of crime that has supported the horrendous growth of the drug traffic that is wrecking the lives of countless thousands of young people. This is the only form of crime that can finance and run widespread, syndicated gambling and loan sharking operations that take away the earnings of America's working people. This is the form of crime that puts together and executes complex schemes for wrecking small- and medium-sized banks, or it can and does invade the ranks of legitimate business for acquiring a facade behind which its far-reaching illegal activities can be masked. It is such forms of crime to which the provisions of my bill are directed.

I ask my colleagues to join me in signing this petition, which will enable us, as their Representatives in Congress, to respond to the cries of innocent victims in our home districts and all across the Nation for legislation with which to fight the insidious growth and effects of organized crime.

As I pointed out in the beginning, my bill is similar to the bill S. 30. About the only major difference is that I have eliminated the special grand jury provisions contained in title I of the Senate-passed bill. It has been asserted by those who say they are reluctant to see S. 30 clear the Judiciary Committee, that many of its provisions are of questionable constitutionality. May I once again point out that their concern is for the constitutional rights of those individuals whose past histories and relationship to the evidence at hand bring them under suspicion and perhaps arrest for crime against the community. And may I assert as strongly they will give us the crime bills which the Senate has sent over to them.

The people may criticize the Senate for its lateness in handling the money bills for fiscal 1971, which began 10 weeks ago. But the people will forgive and no real harm will have been done when we pass continuing resolutions for financing the Government, as we have done so many times in recent years.

But if there is no action for dealing with organized crime, then the people will also criticize the House, but they will not forgive us. And we will be solely to blame for the continuing drug addictions, the new addictions, and the loss of life and wrecked homes attributable to this segment of crime. The continuing prosperity of extortion rackets, graft in high places in Government, and all the other divisions of organized crime's great department store chain will be the gift of our inaction.

The July 1970 issue of the Reader's Digest, page 71, carried a comprehensive, factually documented story of how the Mafia's power, greed, and ruthlessness nearly ruined one of America's largest industries, the 4,700-store A. & P. food chain. With murder, arson, and other unprincipled devices as their tools, organized crime laid siege to this company in their efforts to force the stocking of an inferior Cosa Nostra made detergent. The final paragraph of that article is as follows:

> That Mafia mobsters using extortion, labor racketeering and outright violence have been able to bring the world's largest food retailer to the brink of disaster demonstrates the grave imbalance in our system between criminal conspirators and law enforcement. Yet, for over a year, the House Judiciary Committee has bottled up the Senate-passed Organized Crime Control Act earnestly requested in 1969 by President Nixon.

The article tells its readers that a letter to their Congressman demanding as possible that for much too long the pendulum in this matter of constitutional protection has swung in the wrong direction. If it is impossible for a committee of this Congress to find an equal balance between the constitutional rights of criminals and those accused of crime and the rights of those who are victimized or threatened by criminal activities, then I must cast my lot on the side of crime's victims and potential victims.

In the case of the accused, there is the protection of a vast judicial network, extending all the way to the Supreme Court. But for the victim or potential victim under our present laws, there is nothing but physical and mental suffering and financial loss and disaster while crime's overlords bask in the freedom provided them through the quibbling over constitutional rights. So I put it to you, my fellow colleagues who represent the people of the United States: Do you want to continue the protection provided for the crime masters of the country through our failure to act, or will you sign this petition even if it entails the risk of shifting the balance of constitutional protection from the criminal to his victim?

In the other body last month a colloquy occurred between the majority and minority leader on their legislative accomplishments. In the spirit of fairness, the majority leader said:

> The Members of the House must be given credit (in the timeliness with which appropriations bills have been passed), although in all candor we should point out that the Senate is way ahead of the House insofar as crime, drug and pornographic legislation is concerned.

The minority leader responded:

> I would say with great respect that the other body (the House) should have acted on the crime bills because the need is great and the opportunity exists to do something about coping with the high incidence of crime.

Perhaps when Members of the other body go back to the people they will find that the people are worried—they will discover that this fear is real, that the need is great and the necessity is urgent; so that perhaps action before the House adjourns will be helpful. The article concludes with these words:

> For until law enforcers' pleas for more manpower and legal weapons are heeded, no American family is beyond the reach of Mafia muscle.

There is an element of extreme emergency in the filing of a discharge petition. But there is extremeness in the pleas of frightened Americans all over the country in their justifiable fears over the growth of crime. There is a tone of urgency or rather emergency in their pleas for relief from this plague. Your signature on discharge petition No. 8 will be a positive response to the country's demands for better law enforcement and and the improvement in handling of criminal cases.

ANGKOR WAT IN PERIL

(Mr. KOCH asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. KOCH. Mr. Speaker, the danger to Angkor Wat remains unabated. As recently as September 10, the New York Times reported that Communists and Cambodian Government troops were involved in a day-long battle near Angkor Wat, and that, and I quote:

> 13 Cambodian soldiers and at least 13 enemy soldiers had been killed in the fighting at the Angkor temples.

It was on July 16 that I first called the attention of this House to the fact that the Hague Convention for the Protection of Cultural Property in the Event of Armed Conflict, which would affect Angkor Wat and protect it, if abided by, has not been submitted by the President to the Senate for ratification. Since that time, I have again been in correspondence with the White House on this subject and would like to supplement the information of this House by setting forth that correspondence.

The reason given by the White House for not submitting to the Senate the Hague Convention for ratification is, and I quote: "because of certain military and security considerations raised by the Department of Defense." That the White House would offer such a reason for not submitting the convention is most alarming. Fifty-eight countries other than the United States have ratified the treaty. Is it not important that we lead in this matter, not only from the point of view of saving worldwide architectural and cultural treasures from despoliation and destruction during the course of war but also from the point of view of simple morality governing our relations with other countries.

I urge the Members of this House and the public at large to write to the President requesting him to immediately submit the Hague Convention for the Protection of Cultural Property in the Event of Armed Conflict to the Senate for ratification. Not to do so places this country in the same immoral position now held by North and South Vietnam, namely, the disregard for the protection of monuments of great and earlier civilizations threatened with destruction.

Correspondence follows:

> THE WHITE HOUSE,
> *Washington, August 21, 1970.*
>
> Hon. EDWARD I. KOCH,
> *House of Representatives,*
> *Washington, D.C.*
>
> DEAR MR. KOCH: This is in further response to your letter concerning the security of Angkor Wat and Angkor Thom in Cambodia and the Hague Convention for the Protection of Cultural Property in the Event of Armed Conflict.
>
> We have now looked into the matter more carefully. The Convention on the Protection of Cultural Property in the Event of Armed Conflict was signed at the Hague on May 14, 1954 by 51 countries including the United States. The Convention and accompanying Protocol entered into force on August 7,

1956. At present, some 58 countries have become parties to the Convention by ratification or accession.

The United States played a prominent role in the formulation of the Convention. The Convention is based on the principle that cultural property is entitled to the respect similar to that accorded by civilized nations to citizens, prisoners of war, medical personnel and hostages and designed to minimize the risk of destruction of cultural property. However, the United States did not submit the Convention to the Senate for its advice and consent to ratification because of certain military and security considerations raised by the Department of Defense. The advisability of submitting the Convention for the advice and consent of the Senate has been reviewed periodically since 1957 by the Secretaries of Defense without any change of position.

In practice, since the promulgation of General Order No. 100 in 1863, the United States military forces have been legally bound to protect cultural property in the event of armed conflict. For example, we are parties to the Hague Convention of 1899 and 1907 respecting the laws and customs of war on land and the Hague Convention of 1907 respecting bombardment by naval forces in time of war (IX), and the 1935 Washington Pact for the Protection of Artistic and Scientific Institutions and of Historic Documents (Roerich Pact). The Army Basic Field Manual (FM 27–19) on the rules of land warfare specifically forbids the destruction or seizure of any property "unless such destruction or seizure be imperatively demanded by the necessities of war."

In the hostilities in the Middle East and Cambodia, the U.S. Government officially supports the efforts of UNESCO and private organizations to protect cultural property under the Hague Convention. U.S. military forces involved in the Cambodian action had been instructed to avoid damaging cultural, religious and historic documents and buildings. We recognize the monuments at Angkor Wat and other Khmer monuments as major treasures of humanity as well as of the Cambodian people.

In view of the foregoing, it is not believed that it would be in the interest of the United States Government at this time to submit the Hague Convention to the Senate for its advice and consent to ratification or for the United States Government to ratify the Convention. There have been no material changes in circumstances since the last consideration was given to it in 1963.

If you believe there is any other information I can provide on this matter, please do not hesitate to let me know.

Sincerely,

WILLIAM E. TIMMONS,
Assistant to the President.

HOUSE OF REPRESENTATIVES,
Washington, D.C., August 25, 1970.

Hon. WILLIAM E. TIMMONS,
Assistant to the President,
The White House,
Washington, D.C.

DEAR BILL: I have your letter of August 21st and I appreciate your giving such care in looking into the matter of the Hague Convention's approval, but I found your conclusion to be something of a nonsequitur. For several paragraphs you outlined the various treaties we have signed giving protection to the world's art treasures as well as military policies generally forbidding the destruction or seizure of such properties. But, you conclude by saying, "In view of the foregoing, it is not believed that it would be in the interest of the United States Government at this time to submit the Hague Convention to the Senate for its advice and consent to ratification or for the United States Government to ratify the Convention."

I fail to find an argument against its ratification other than your brief statement that the Convention has not been submitted to the Senate for ratification "because of certain military and security considerations raised by the Department of Defense"—on which you elaborated no further. It can hardly be a surprise that the Defense Department would resist a restriction of their military freedom, just as it has a propensity for keeping outdated trivia under "top secret" classification. But, such resistance should be examined in the broader diplomatic as well as military context, and the protection that our ratification would effect for the temples, not through arms but through the force of worldwide public opinion. Surely, if 58 countries other than the United States have been able to ratify the treaty, it cannot be so incumbering that it would imperil our troops or country's security.

I should appreciate your advising me what "military and security considerations" the Department raised—and I would urge that further consideration be given to this matter.

Sincerely,

EDWARD I. KOCH.

THE UNIVERSITY OF MISSOURI WILL NOT TOLERATE CAMPUS VIOLENCE

(Mr. RANDALL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. RANDALL. Mr. Speaker, when I attended the University of Missouri, college was an opportunity to prepare for a useful and rewarding life. Those of us who had this opportunity felt an obligation to use it constructively.

We did not go to college to avoid the draft or to live off of our parents or just to postpone our entry into the world of business or the professions. We did not go to college to interfere with the rights of others to learn or with the duty of the faculty to teach.

Today thousands of students who attend college for constructive purposes rather than destructive ones, who study to improve our society and way of life, not to destroy or mutilate it, are back on campuses in my native State of Missouri.

These serious students are not going to be harried and intimidated by the radical, violent minority of students and hangers-on who have caused other universities to grind to a halt.

Dr. John C. Weaver, president of the University of Missouri, which has campuses at Columbia, Kansas City, Rolia, and St. Louis, has sent his alumni a letter with enclosures which describes a fair, firm and commonsense program of dealing with campus disruption and violence.

As valuable guidance for others faced with this problem I am making Dr. Weaver's letter and the accompanying statement a part of my remarks at this point:

UNIVERSITY OF MISSOURI,
September 5, 1970.

DEAR ALUMNUS: As an alumnus of the University of Missouri you will be interested in having some specific facts regarding plans to see that the University performs its function of providing quality education.

As you know, colleges and universities throughout America in recent months and years have been caught up in a swirl of problems and controversies which have led to protests, demonstrations and sometimes violence.

In light of the serious difficulties experienced by many other colleges and universities, we believe citizens have a right to be proud of the record achieved so far at the University of Missouri by the students, faculty, administration and Board of Curators. While there have been some instances of minor dissent and threatened disruption on our campuses in recent years, the University has continued its normal operations without violence and without major disturbances.

It is our purpose and desire, as I am sure it is yours, that the University do everything possible to maintain orderly campuses that will provide a proper educational atmosphere. To accomplish this purpose we are taking three steps:

(1) We reaffirm the position outlined by me and adopted by the Board of Curators on June 30, 1968. The full text of that statement is attached.

(2) Also attached is a statement of University policy on dissent and protest adopted by the Board of Curators at its meeting on September 5, 1970, including the responsibility of the faculty on holding classes; giving of grades only for work accomplished; and adherence to the academic calendar with no recess for political activity or protest.

(3) At my request each campus has established a council composed of students, faculty, administrators and members of the Board of Curators to make plans for preventing disruption or violence and to act in an advisory and communication capacity in case some disruption actually occurs.

I am sure you understand that there are persons who are not members of the student body or staff of the University who may attempt to cause interference with the operation of the University. We shall take appropriate measures to deal with these people within the best of our ability and resources.

The University needs and solicits your understanding and support. Anything you can do to help in seeing that these policies are understood or in preventing disruption will be a major contribution to the educational process of the University of Missouri. I am sure I can depend upon you to do everything possible.

Sincerely,

JOHN C. WEAVER,
President.

STATEMENT BY DR. JOHN C. WEAVER, PRESIDENT, UNIVERSITY OF MISSOURI, AS APPROVED BY THE BOARD OF CURATORS, JUNE 30, 1968

The University of Missouri will at all times defend the right of free expression of opinion, including the right of peaceful assembly. The University will, indeed, guard this right in behalf of all persons associated with the institution and will not tolerate actions by any individual or group that would seek to restrict the appropriate freedoms of any other individual or group. The University will not allow any unauthorized occupation of University facilities, nor will it permit any interference with its normal and regular activities. Discussion of issues within the University will in no circumstances be conducted under any form of duress. Attempts at unacceptable building occupation or interference with University business will be dealt with in a manner necessary immediately to relieve the situation. Any faculty, students or employees engaged in such activities, will face immediate suspension and may suffer ultimate dismissal.

STATEMENT ON PROFESSIONAL RESPONSIBILITIES, PROTEST, AND POLITICAL ACTIVITIES

(Approved by the University of Missouri Board of Curators on September 5, 1970)

In a community of learning, willful disruption of the educational process, destruc-

tion of property, and interference with the rights of other members of the community will not be permitted.

Academic and administrative procedures of this University provide for prompt and appropriate disciplinary action against those who abuse such rights as provided in the statement by the President regarding student demonstrations adopted by the Board of Curators on June 30, 1968. That statement as well as the Standard of Conduct and Rules of Procedure in Student Disciplinary matters is available to all students.

Classes will continue as usual throughout the campaign and election. There will be no recess from the normal and routine operations on any of the campuses and already approved academic calendars will be fully maintained on each campus.

We endorse the statement submitted August 26, 1970, suggested by a special committee of the Inter-campus Faculty Council charged by the President with the development of a statement on faculty responsibility, as follows:

"The Board of Curators and the Faculty affirm their intention of keeping the University of Missouri in full operation throughout the coming academic year. The Board expects that the faculty will meet their professional obligations in accordance with already existing regulations and principles of academic responsibility regarding the meeting of classes and the awarding of grades and credit.

"The Board of Curators hereby charges the faculty to re-examine and re-affirm its professional responsibilities and to develop procedures for dealing with cases in which those responsibilities are not fulfilled. We ask that this task be completed with full faculty consultation and with reasonable speed.

"Until each campus develops a full set of procedures for dealing with alleged violations of professional ethics, the Board charges each campus faculty governing body to establish immediately a temporary group for handling such cases as may arise."

The Board of Curators recognizes that any definition of faculty responsibility developed by a faculty group or groups on any campus must provide that the initial and primary responsibility for the effective function of the academic unit, including disciplinary action, resides in the administrative officers of the department, division, school or college.

Students, faculty, administrators and employees who are not in sympathy with the basic philosophy expressed herein and do not intend to abide by the rules and regulations of the University should not attend the University nor become associated with the institution nor continue to be associated with the University.

The University of Missouri is a land grant institution. I know that it is fashionable in some self-proclaimed intellectual circles to sneer at land grant colleges as "cow colleges."

Recently, a university in the East held an orientation program to inform its students on how to conduct themselves and to obtain an education at that institution. As a part of this official program an invited speaker was an attorney, William M. Kunstler, who tours the country inciting violence when he is not defending those accused of criminal acts. Mr. Kunstler has defended among others the so-called Chicago Seven where defendants and their counsel sought with some success to degrade the process of justice and turn a courtroom into a carnival.

Mr. Kunstler told the students that "burning the ROTC buildings" is a part of free speech guaranteed by our Constitution. Press accounts do not indicate that this outrageous statement was challenged either by the president of the university or by any member of its law faculty.

This muddle-headed approach to higher education is in sharp contrast to the sensible rules and guidelines in effect at the University of Missouri. I believe that many of my fellow Members will agree with me and also with the academic leadership at the University of Missouri that arson is not an essential ingredient of freedom of speech.

America has traditionally looked to public education to train our young to make democracy and the American way of life a living refutation of those who advocate dictatorship and repression.

The abuse of freedom that is officially nurtured on some campuses endangers this tradition and imperils our society.

I am proud to say that the public universities of my State are still producing enlightened citizens who carry the torch of freedom rather than the torch of anarchy.

As a matter of fact, Missouri does have an outstanding college of agriculture. We are proud of the State's dairy industry, but it should be added that the university pioneered in journalistic education and is currently pioneering in an innovative medical education program. It has long striven for academic excellence as well as to provide the opportunity for a higher education to the sons and daughters of State who cannot afford to attend expensive private schools.

I would suggest that those education administrators who condone violence or wring their hands helplessly might be helped by learning about the standards of conduct set by my alma mater.

Finally, at a time when some bureaucrats in the Department of Health, Education, and Welfare seem bent on pouring a bottomless coffer of grants and other funds into institutions which harbor violence and give academic credit for the kind of "education" picked up on the streets and alleys of the slums and in jails and penitentiaries, we in Congress might appropriately ask why more is not done for the institutions of higher learning whose faculty and student body are composed of loyal, hard-working patriots.

Some may consider it old-fashioned to go to college to learn and to attend an institution which puts evolution ahead of revolution, but I am proud to be among those who say that America needs more, not fewer, institutions such as the University of Missouri.

DEFENSE DEPARTMENT'S CONTRACT COMPLIANCE PROGRAM A FAILURE: THE McDONNELL-DOUGLAS CONTRACT

(Mr. RYAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. RYAN. Mr. Speaker, on May 6, when the military procurement authorization bill was before the House, I offered an amendment requiring that prior to the awarding of any contract under that bill, the U.S. Commission on Civil Rights would have to approve it as being in conformity with Executive Order 11246, which prohibits discrimination on the part of all Federal contractors and requires that they take affirmative action to hire, employ, and promote employees without regard to race, creed, color, or national origin. My amendment also provided that there be conformity with Executive Order No. 11375, which expands coverage to discrimination on account of sex.

That amendment was defeated. It was defeated despite the record of ignorance, negligence, and even willful disregard of the Executive orders which have so characterized Defense Department contracts. It was defeated despite the fact that the Defense Department is the largest contractor within the Federal Government, and that its effective implementation of these Executive orders would constitute a veritable revolution in civil rights.

As I said on the floor that day, enforcement of the equal employment opportunity program by the Department of Defense was deficient with regard to three textile firms early last year—Dan River Mills, Burlington Industries, and J. P. Stevens & Co. It was deficient with regard to the Department of the Navy's award of $128 million worth of contracts to the Ingalls Shipbuilding Co. of Pascagoula, Miss. It was deficient with regard to the implementation of the Newport News Shipbuilding & Dry Dock Co. plan.

I also referred in my speech in support of my amendment to the McDonnell-Douglas Aircraft Corp., which had been awarded a contract to build the F–15 jet fighter. Unfortunately, I could not disclose at that time the full extent of my knowledge regarding the company's affirmative active plan, and could only note that preaward contract procedures had not been followed in order to insure full compliance with equal opportunity standards.

But the facts concerning the McDonnell-Douglas contract situation are now public. On August 27, the Washington Post carried a story headlined "Anti-Bias Plan Called Deficient." This story reported the findings of the staff of the U.S. Commission on Civil Rights regarding the McDonnell-Douglas affirmative action plan. I will include this newspaper article in the RECORD, so that it may be read in full.

Actually, the Washington Post's story is mild, for while mentioning some of the deficiencies in the McDonnell-Douglas plan, it fails to quote from what can only be described as a devastating conclusion by the Commission's staff. I am including the full text of the report of the staff of the Civil Rights Commission with this statement and so will not attempt to detail the deficiencies which it pointed out. I would like, however, to quote from the report's conclusion, because this, more starkly, more compellingly, and more distressingly than anything I could say reveals the duplicity in the Defense Department's administration of a program mandated by Presi-

dential order and by title VII of the Civil Rights Act of 1964. The conclusion states:

Judged in terms of what reasonably could be expected of the management of the McDonnell Douglas Corporation, its affirmative action plan is extremely disappointing . . .

The completeness and clarity with which contractors are required to commit themselves to compliance with Executive Order 11246, would be no less than in other aspects of contract performance. Measured by this standard, also, the plan is inordinately vague, leaving far too much to future determination or to Company discretion.

I want to particularly emphasize the following paragraph of the conclusion for, with brevity and clarity, it offers indisputable support for the amendment which I offered to the military procurement authorization bill this past May:

There is no justification for the Department of Defense permitting serious, and remediable, deficiencies such as those described above, in the affirmative action plans of McDonnell Douglas or of other defense contractors.

The very serious nature of the McDonnell Douglas affair is compounded by the fact that the McDonnell-Douglas affirmative action plan was among the first negotiated and approved by the Defense Department under the detailed affirmative action plan requirements promulgated by the Department of Labor's Office of Federal Contract Compliance—the supposed overseer of the contract compliance program—on January 30, 1970 (41 C.F.R. 60–2)—9 days before the McDonnell-Douglas Corp adopted this plan. Again, I quote from the U.S. Commission on Civil Rights' staff memorandum to highlight the seminal importance of this particular affirmative action plan:

These deficiencies are especially significant if, as is understood to be the case, the Department of Defense proposed to use the McDonnell Douglas plan as a prototype in bringing the affirmative action plans of all other defense contractors into conformity with detailed affirmative action plan requirements promulgated by OFCC on January 30, 1970 (41 C.F.R. 60–2).

It is the height of hypocrisy to provide $20 billion to buy missiles and aircraft and tanks for the Pentagon, when the hundreds of thousands of blacks, Puerto Ricans, Mexican-Americans, and American Indians who serve in our Armed Forces and who will man this equipment, cannot even receive the Federal Government's protection in assuring equal employment opportunity in those plants and facilities manufacturing this materiel.

It is particularly ironic that the very company which has implemented this particular paper affirmative action plan will receive $370 million on its F–15 jet fighter contract under the military procurement authorization bill. We have millions for weapons, but not even administrative dedication to fairness for those who might, given the opportunity, obtain a job in defense contractors' plants.

The point of my presentation of this material is to make very clear that the contract compliance program has, so far as the Department of Defense is concerned, been merely a sop for the economically oppressed. Substantively, it is a shell. And this is unconscionable.

The news report from the Washington Post, and the report of the U.S. Commission on Civil Rights staff, follow:

[From the Washington Post, Aug. 27, 1970]

ANTI-BIAS PLAN CALLED DEFICIENT

The staff of the U.S. Commission on Civil Rights has found "serious deficiencies" in the latest plan of McDonnell Douglas Corp. for eliminating discrimination in employment practices.

The plan was submitted and approved by the Defense Department office of contract compliance last February after a commission hearing in St. Louis last January disclosed short-comings in an earlier plan.

The commission staff report, forwarded to the Defense Department, said the new plan represents a significant step forward but fails to present enough specific information to permit the contractor's obligations to be effectively enforced.

The plan, the report said, fails to provide current and projected racial employment totals for each job classification in its St. Louis area facilities.

It fails, the report said, to set goals and commitments beyond Feb. 1971, although significant increases in employment due to the company's multi-billion dollar contract for F15 fighter planes are not projected until 1975 and later.

Appraisal of hiring and upgrading goals is made difficult, the staff said, by failure to give position descriptions and salaries for various job classifications.

The plan further, it said, makes no commitments to seek modification of union security agreements.

In job training, the commission staff said the plan fails to make adequate commitment to upgrade minority employees at lower levels of employment.

STAFF MEMORANDUM: CRITIQUE OF MCDONNELL DOUGLAS CORPORATION, AFFIRMATIVE ACTION PLAN OF FEBRUARY 9, 1970[1]

The Commission's St. Louis hearing, held January 15–17, 1970, disclosed that the McDonnell Douglas Corporation's then current affirmative action plan, applicable to its facilities in the St. Louis area, in many respects failed to meet the requirements of regulations (41 CFR 60–1) issued by the Office of Federal Contract Compliance (OFCC) under Executive Order 11246. Principal deficiencies of the plan included the following:

(a) There was no analysis of minority group employment, as required by OFCC regulations;

(b) the plan did not provide in detail the specific steps to be taken to achieve equal employment opportunity, as required by OFCC regulations;

(c) the plan did not provide specific goals and time tables for bringing more minority group persons into areas where there are presently few employed, as required by OFCC regulations; and,

(d) the plan did not provide for an acceptable sensitivity training program, as required by Department of Defense contract compliance officials following their earlier reviews of the Company program.

---

[1] Deletions were made from original text to preserve the confidential status of unreleased portions of the McDonnell Douglas Corporation's Affirmative Action Plan. These deletions are indicated throughout the text by three asterisks.

The text contained in brackets, indicates the response to the Commissions' criticisms, as quoted from a June 5, 1970 letter of Arthur Fletcher, Assistant Secretary of Labor to John H. Powell, Jr., General Counsel, U.S. Commission on Civil Rights.

McDonnell Douglas Corporation submitted a new affirmative action plan to the Department of Defense on February 9, 1970.

The new plan corrects, in varying degrees, each of the deficiencies of the old plan outlined above. The new plan makes specific openings projections, and establishes numerical minority hiring and upgrading goals, for each job classification. In addition, the plan outlines several training programs which the Company will institute in order to increase hiring and upgrading goals, for each job classification. In addition, the plan outlines several training programs which the Company will institute in order to increase hiring and upgrading of minority employees.

While the plan does represent a significant step forward—principally in the specificity of its minority hiring goals and the upgrading programs it establishes—it also should be recognized that the plan has a number of serious deficiencies. These are itemized and discussed below. These deficiencies are especially significant if, as is understood to be the case, the Department of Defense proposes to use the McDonnell Douglas plan as a prototype in bringing the affirmative action plans of all other defense contractors into conformity with new detailed affirmative action plans of all other defense contractors into conformity with new detailed affirmative action plan requirements promulgated by OFCC on January 30, 1970 (41 CFR 60–2).

ESTABLISHMENT OF COMPANY GOALS

Section V of the plan * * * sets out minority hiring and upgrading goals—in terms of the number of minority hires and upgradings which will be sought for each job classification. The plan also gives the number of projected openings for each job classification.

(1) A principal purpose of a plan of affirmative action is to set out a program and timetable, for overcoming patterns of minority underutilization (see 41 CFR 60–2.11 (a),(b)). *Appraisal of the adequacy of the plan's hiring and upgrading goals is made difficult by the plan's failure to provide current and projected racial employment totals for each job classification.* In the absence of current and projected racial employment figures, the plan discloses neither the magnitude of existing minority underutilization in each job classification, nor the extent to which such underutilization will be corrected if stated goals are attained. Moreover, since the company states that employment will continue to decline for several years * * * the Company's progress in correcting patterns of underutilization has to be appraised in terms of the racial employment picture which is to result from the combined effect of layoffs and goals.

[The . . . concern of the Commission is that goals and timetables do not extend through 1975. This provision of the agreement was established pursuant to Sec. 60–2.24 of Order No. 4, which does not include such an extended period of time, as it would be difficult to accurately forecast employment needs five years in advance. However, it has been established that McDonnell-Douglas will annually review and amend its goals to incorporate the changing employment situation.]

(2) Not only does the plan fail to state the extent of minority underutilization projected to remain after one year (as noted in preceding point 1), *the plan fails to indicate what further progress the Company proposes to make in subsequent years towards correcting such patterns of minority underutilization. The plan fails to set goals, or present commitments or guidelines for the setting of goals, beyond February, 1971.* This is a particularly significant omission in view of the fact that overall increases in employment, due to the multi-billion dollar F–15 contract, apparently are not projected to

occur until 1975 and subsequent years. Furthermore, this omission makes it extremely difficult to appraise the adequacy of the Company's affirmative action training programs. The plan does not relate such programs (most of which are also open to white employees) to the levels of minority utilization, by job category or classification which the training programs are supposed to achieve.

[A . . . concern is that in the agreement, the company's hiring and upgrading goals were difficult to appraise, and they did not include current and projected racial employment totals for each job classification. This has been amended, with such data having been submitted to the Defense Department and made an addendum to the agreement.]

(3) *Appraisal of the adequacy of the plan's hiring and upgrading goals is made difficult by the plan's failure to give position descriptions and salaries for the various job classifications for which goals are set.* OFCC regulations state that a table of job classifications is part of the affirmative action program the contractor is required to keep on file (41 CFR 60–1.40(a),(c)). The absence of this information seriously hampers appraisal of the significance of specific minority hires or upgrading projected, and also makes it difficult to determine how many minority employees might be eligible for upgrading into positions for which openings are projected.

[The . . . concern of the Commission is that the agreement does not include position descriptions and salaries to various job classification. This data is routinely obtained during the course of the compliance review and is provided to the investigator at that time.]

(4) *While the plan projects continuation of layoffs, which—as the plan acknowledges—in the past have had a major impact on newly-trained and newly-hired minority personnel, the plan makes no specific commitment to seek modification of union security agreements or otherwise to lessen the impact of layoffs on minority employees.* The plan does union-management meetings to discuss obstacles to equal employment opportunity * * * but expresses no commitments on the issue of layoffs. Particularly in the absence of overall racial goals or projections for each job classification, this omission seriously undermines the plan as a commitment on the part of the Company to increase levels of minority utilization.

[. . . , although the plan projects layoffs, it has no commitment to modify union security agreements or otherwise relieve the impact on minority employees. Modification of the union security agreement was not included because the investigation identified no "affected class" and because employee layoff is based on continued length of service.]

(5) *Appraisal of the adequacy of the plan's hiring and upgrading goals is made difficult by the plan's failure to provide a complete statement of projected openings by job classification.* A distinction is made, in the plan's projection of job openings, between "new openings" and "openings by attrition" (i.e., by normal quits, retirements, deaths, etc.). * * * *the case of the manufacturing division, and of most other units of the Company, the plan gives the distribution of openings by job classification only for "new openings." The plan therefore does not enable one to determine in what job classifications the majority of openings will arise.* The reason for this omission is unclear, inasmuch as breakdown by job classification of all openings, including openings by attrition, is provided for at least one division—the engineering division * * *.

TRAINING PROGRAMS

(6) *In the entry-level training for which it provides, the plan fails to provide specific commitments, in terms of numbers of trainees, length of training or the period over which the Company will continue the programs.* Such specific commitments concerning entry-level training, at least as to the numbers of trainees and the duration of training, are an indispensable element in the commitment of the Company to a program and timetable for correcting patterns of minority underutilization. Indeed, while several new entry-level programs are called for in the plan, the Company is not specifically committed under the plan to *any* overall increase in the amount of entry-level training achieved. It may be noted that (in contrast with some other affirmative action steps described in the same section of the plan) the plan does *not* call for an increase in the level of Company participation in the National Alliance of Businessmen program for training of the "hard core" unemployed, nor in the Company's "highly successful" * * * Summer Training Employment Program.

(7) The plan's largest upgrading program is one which, each year for five years, will train * * * personnel in the bottom three categories of employment (laborer, service worker, operative), with the aim of enabling the trainee to "qualify for placement" in the next higher category * * *. The Program apparently contemplates upgrading all of the * * * employees * * * who are currently in these three categories. *In the case of employees in the service worker category, accounting for over 28% of the Company's black employees (but only 3% of the Company's white employees), the commitment of this program is to "upgrade" the employee to the level of unskilled laborer—after a year of training, for which the employee may have to wait three or four years.* The commitment of this program to minority employees at the lower levels of employment is inadequate, as to both the extent of upgrading targeted and the length of time many employees may have to wait before the training opportunity is available.

(8) The plan provides several other upgrading programs. The plan states that each year * * * employees will be selected for a two-year program designed to qualify the trainee to become an assistant foreman. In addition, (other) * * * employees each year will be trained to qualify for salaried administrative positions. In the case of these two programs, * * * the plan (i) contains no express commitment actually to promote (or to give priority in promotion to) trainees successfully completing training and (ii) opens the training programs to white employees. (The plan does recite that the Company recognized a particular obligation to train "disadvantaged and minority employees" * * *.) In addition, as noted in point 2 above, the plan does not set minority hiring and upgrading goals beyond February, 1971. *Accordingly, the plan leaves the Company free unilaterally to determine the extent to which the "assistant foreman" and "administrative position" upgrading programs in fact will be used to promote minority employees to these positions.*

HOUSING

The plan acknowledges that the fact that minority group residential areas are 12 to 15 miles distant from the Company's principal facilities "has been, and continues to be, an obstructive factor in recruitment," and presents "a serious transportation problem".

(9) The plan states that the Company will increase past efforts to "work closely with real estate agencies, subdivision developers and financial institutions, and individual homeowners where necessary, to help our minority employees find suitable housing." However, the plan fails to provide a specific program which would achieve this result. This lack is particularly significant in view of the fact that these real estate and financial interests—with which the Company is to "work closely"—have in the past furthered, or at least failed to correct, segregated housing patterns in St. Louis County. *The plan should make provision for active monitoring by the Company to assure that apartment owners, real estate brokers and others with whom the Company deals, take affirmative steps to open the housing market to minority persons. The plan also should commit the Company to such steps as affirmatively inventorying the housing needs and preferences of current or potential employees, providing legal advice or—where necessary—continuing legal representation for minority employees in connection with housing problems, renting or purchasing housing for employees, and encouraging the development of low and moderate income housing in the area of its plants.*

(10) * * *

REVIEW OF JOB REQUIREMENTS

(11) The Company is to review all position descriptions and manning qualifications to insure they involve no inadvertent discrimination * * *. *This review * * * should be expedited greatly, particularly for the jobs into which blacks are most likely to be moving.*

RECRUITMENT

(12) *While the plan provides that all minority recruitments sources are to be used by the Company, the plan omits to state that job description and manning requirement information—especially important in recruiting employees for skilled positions—is to be furnished to recruitment sources.*

(13) Efforts to contact prospective minority employees are described generally, without quantification. For example, no indication is given of the extent to which recruitment at schools or colleges of high minority enrollment will be carried out. Nor are there clear commitments (apart from McDonnell Aircraft Astronautics) *** to recruit heavily outside the St. Louis area. *The plan should be sufficiently specific about recruitment efforts at least to permit a determination whether such recruitment efforts are to be increased significantly over prior years.*

SENSITIVITY TRAINING

(14) The plan does provide for continuation of general training sessions which have been provided in the past for supervisory personnel, including a "sensitivity" training component * * *. However, in view of the importance of this matter, *it is a serious omission that the plan does not make clear how this sensitivity training is to be strengthened, in terms either of its duration, or improvements in program content.*

CONCLUSION

It is appreciated that the McDonnell Douglas affirmative action plan was negotiated under pressure of time. It would be a serious mistake, however, to set the standard for affirmative action programs on the basis of what a contractor and compliance officials can put together in a week or two of intensive activity.

Judged in terms of what reasonably could be expected of the management of the McDonnell Douglas Corporation, its affirmative action plan is extremely disappointing. Most of the criticisms outlined above consist in the failure of the plan (i) to set forth certain current or projected racial employment information or goals; (ii) to plan and describe training programs on a quantified basis; or (iii) to incorporate all relevant affirmative action techniques which are available—especially those which have been used successfully by other employers. All these deficiencies can be remedied simply by applying the needed time and skills of Company management to the development and formulation of this plan.

By the same token, it is essential that the Department of Defense, and the Office of Federal Contract Compliance, assure that affirmative action plans are sufficiently specific and informative to permit the contractor's obligations under the plan to be effectively monitored and enforced. The completeness and clarity with which contractors are required to commit themselves to compliance with Executive Order 11246, would be no less than in other aspects of contract performance. Measured by this standard, also, the plan is inordinately vague, leaving far too much to future determination or to Company discretion.

There is no justification for the Department of Defense permitting serious, and remediable, deficiencies such as those described above, in the affirmative action plans of McDonnell Douglas or of other defense contractors.

[In the other areas about which the Commission is concerned—training, housing and transportation, recruitment services and sensitivity training—the company's commitment is adequate and meets the standards for compliance.

[In addition, indications are that the company is operating in "good faith" to execute its affirmative action agreement to achieve equal employment opportunity.]

JUDGE J. DANIEL FINK

(Mr. RYAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. RYAN. Mr. Speaker, on July 17, Judge J. Daniel Fink, who sat on the civil court of the city of New York passed away. A distinguished member of the bar and of the bench, Judge Fink served as a judge for 13 years—first as a municipal court judge, and then as a judge on the civil court when the two were merged.

Judge Fink was an asset to his community and to his city. His philanthropic activities were well-known. He served as an overseer of the Jewish Theological Seminary and as a trustee of Congregation Shaare Zedek. The former head of the council of organizations of the American Jewish Congress and the United Jewish Appeal of Greater New York, he had served, also, as vice president of the Young Men's Philanthropic League.

The city of New York, my congressional district—of which Judge Fink was a resident, and his community will miss him. As a lawyer, as a jurist, and as a person, he contributed much.

To his widow, Mrs. Barbara Fink, to his daughter, Mrs. Marilyn Gerber, his sister, Mrs. Beatrice Brenner, and to the rest of his family, I want to extend the condolences of myself and of Mrs. Ryan.

Following is the obituary which appeared in the July 19 edition of the New York Times, and which records the loss of Judge J. Daniel Fink:

[From the New York Times, July 19, 1970]

DANIEL FINK DIES; CIVIL COURT JUDGE

Judge J. Daniel Fink of the City Civil Court died Friday in Beekman-Downtown Hospital, after a long illness. He was 65 years old and lived at 390 West End Avenue.

Judge Fink was born in New York and graduated from Fordham Law School. He first practiced law with the firm of Olcott, Olcott & Glass and later independently.

In 1956 he was elected on the Democratic ticket from the Fifth Manhattan District to the Municipal Court, which was later merged in the Civil Court. He was re-elected in 1966.

Before becoming a judge he had served on a bill-drafting commission of the Legislature.

He was an overseer of the Jewish Theological Seminary and a trustee of Congregation Shaare Zedek. He had formerly headed the council of organizations of the American Jewish Congress and the United Jewish Appeal of Greater New York, and had served as vice president of the Young Men's Philanthropic League.

In 1960 he received a brotherhood award of the National Business and Professional Council, Inc.

Surviving are his widow, Mrs. Barbara Fink, for many years Democratic co-leader of Manhattan's Fifth Assembly District North; a daughter, Mrs. Marilyn Gerber, and a sister, Mrs. Beatrice Brenner.

A funeral service will be held today at 2 P.M. at the Riverside, Amsterdam Avenue and 76th Street.

IMPEACHMENT OF ASSOCIATE JUSTICE WILLIAM O. DOUGLAS

(Mr. GERALD R. FORD asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous material.)

Mr. GERALD R. FORD. Mr. Speaker, in the CONGRESSIONAL RECORD of August 10, pages 28091 to 28096 inclusive, and in the CONGRESSIONAL RECORD of August 21, pages 29755 to 29759 inclusive, I have inserted for the information of all Members certain legal memorandums concerning the impeachment process as it relates to the Federal Judiciary. I am inserting herewith another exchange of arguments in this important debate between Mr. Bethel Kelley of the Detroit law firm in Dykema, Gosset, Spencer, Goodnow, and Trigg, independently prepared at my request, and Judge Simon H. Rifkind, attorney for Associate Justice William O. Douglas:

LAW OFFICES DYKEMA, GOSSETT,
SPENCER, GOODNOW, & TRIGG,
Detroit, Mich., September 1, 1970.

Re the impeachment process.

HON. GERALD F. FORD, JR.,
The Capitol,
Washington, D.C.

DEAR CONGRESSMAN FORD: You have asked us to review and respond to the August 18, 1970, letter from Judge Rifkind to Representative Celler regarding the "Kelley memorandum". The Rifkind letter concludes that the position advanced in the Kelley memorandum is historically and legally untenable and that it "is so radically subversive of cherished American principles . . . that it must not be allowed to prevail." (Page 2 of the Rifkind letter).

In order to properly answer Judge Rifkind's charge, we must reiterate and reemphasize the position of the Kelley memorandum. Our conclusion was that a violation of the Judicial Tenure provision of the Constitution, which does not necessarily constitute criminal behavior, is remediable by removal from office under the Impeachment clause. We defined "impeachable judicial misbehavior" as conduct on the part of a judge which is so grave as to cast substantial doubt upon his judicial integrity and the integrity of the entire federal judiciary. Any other interpretation of the Kelley memorandum must necessarily involve a misreading of that document and a misunderstanding of the conclusion we reached.

Judge Rifkind attempts to avoid the conclusion of the Kelley memorandum by claiming that it was "addressed to the irrelevant question whether impeachment is to be confined to *indictable*" offenses. He asserts that he is merely proposing that impeachment will lie only for "criminal conduct". The distinction is illusory. "Criminal conduct", by definition, is a violation of the criminal law; a violation of the criminal law, by definition, is an indictable offense.

Judge Rifkind attempts to weaken the impact of the Kelley memorandum by attacking the efficacy of its scholarship. He criticizes the memorandum for its failure to make reference to the records of the Constitutional Convention or to the *Federalist Papers*. In the first place, the Kelley memorandum, on page 12, does refer to that portion of the debate in the Constitutional Convention upon which Judge Rifkind rests his position. Secondly, the authorities contained in the Kelley memorandum themselves refer to the original sources in their interpretation of the Constitution. Thirdly, references to the Constitutional debates and the *Federalist Papers* shed little light on the subject. Nowhere in those two authorities is the precise question involved in the present debate discussed. The only discussion in the debates concerned the substitution of the term "high crimes and misdemeanors" for the term "maladministration"; there was no debate as to the meaning of the former term. In No. 79 of the *Federalist Papers*, Hamilton discussed the independence of the judiciary. Nowhere in that paper did he indicate that the judges would not be removable for misbehavior. He merely commented that mental or physical inability would not be impeachable because of the difficulty of ascertaining whether a judge was mentally or physically incompetent. Rifkind points to the fact that Hamilton states that impeachment is the only method of removal of federal judges. This language is not contrary to the Kelley memorandum; rather it supports the basic position that violation of the Judicial Tenure provision must be impeachable to give meaning to that provision.

Judge Rifkind also attacks the scholarship of the Kelley memorandum by claiming that it quoted the Seventh Article of Impeachment against Judge Ritter out of context by not including references to the specific acts of wrongdoing. The language was definitely not taken out of context; the entire import of the Seventh Article was its allegation that the continued course of conduct was such gross misbehavior to warrant impeachment. A careful review of the Senatorial Opinions filed in that case conclusively establishes that conviction was indeed based on that premise. It is indeed strange for Judge Rifkind to charge the Kelley memorandum with misquotations when Judge Rifkind's original memorandum contained the assertion that Senator Elihu Root, in the Archbald case, supported his position when, in fact, the same Senator Root sponsored the resolution to print, as Senate Document No. 378, the Brown article which takes the same position as the Kelley Memorandum.

Judge Rifkind attempts to show that the Congressional precedents do not support the Kelley memorandum by claiming that every judge who was convicted of impeachment was charged with "high crimes and misdemeanors." This argument places form over substance. It is true that every charge was formally labelled a "high crime and misdemeanor;" however, the debates clearly show that Congress did not subscribe to the definition of that term given by the Rifkind Memorandum. Indeed, it is the position of the Kelley memorandum that the definition of that term includes violations of the Judicial Tenure provision.

Judge Rifkind's most serious charge is that the position of the Kelley memorandum "tramples key provisions" of the Constitu-

tion, namely the First Amendment,[1] the *ex post facto* clause, the separation of powers and the independence of the judiciary. Nothing in the Kelley memorandum would sustain such an assertion. As to the First Amendment, the Kelley memorandum did not argue that protected speech could be the subject of impeachment proceedings. In fact, the Kelley memorandum recognized that the Chase case correctly established the precedent that impeachment would not lie for the expression of a judge's philosophy as found in his decisions. As to the *ex post facto,* clause, Judge Rifkind has never really expressed how the position advanced by the Kelley memorandum would violate that clause. To the contrary, when a Federal Judge accepts his office, he knows that the term of his office is for good behavior. He knows that a violation of that good behavior is a violation of his oath of office. Removal based upon such a violation could not be considered the *ex post facto* application of impeachment powers.

Judge Rifkind's concern that the position of the Kelley memorandum would violate the separation of powers and the independence of the judiciary is unfounded. The Constitution, by giving Congress power to remove federal judges, already violates those concepts in their technical meaning. Indeed, the impeachment power is designed as a check upon the power of the judiciary. Too restrictive of an interpretation of the impeachment power would upset the delicate balance of power established by the Constitution. Furthermore, the framers of the Constitution never intended that the judiciary should be absolutely independent.

In conclusion, nothing in the original Rifkind memorandum nor the Rifkind letter of August 19, 1970, alters the conclusions reached in the Kelley memorandum. Indeed, we are even more convinced of the validity of the position of the Kelley memorandum and that the correct interpretation of the Constitution is that expressed in that document.

Sincerely,

BETHEL B. KELLEY.

PAUL, WEISS, GOLDBERG, RIFKIND, WHARTON & GARRISON,
Washington, D.C., August 18, 1970

Hon. EMANUEL CELLER,
Chairman, Judiciary Committee,
House of Representatives,
Washington, D.C.

MY DEAR MR. CHAIRMAN: In his address to the House of Representatives on April 15, 1970, Mr. Gerald Ford announced his view that an "impeachable offense is whatever a majority of the House of Representatives considers [it] to be at a given moment in history."

Under date of August 5, 1970, Mr. Ford addressed a letter to you to advise you that he had obtained the opinion of Mr. Bethuel E. Kelley, a Michigan lawyer, to support his view. "The Kelley memorandum" was at Mr. Ford's request published in the Congressional Record on August 10.

Mr. Ford's definition of an "impeachable offense" means that judges serve at the pleasure of Congress. This is so utterly destructive of the principles of an independent judiciary and the separation of powers, that I could not believe that convincing historical support could be found for so radical a proposition.

Now that I have read the Kelley memorandum I am more than ever convinced that Mr. Ford's view is historically and legally as untenable as it is mischievous.

The Kelley memorandum should, however, be welcomed as a contribution to an exceedingly important debate. Mr. Ford's preoccupation with the radical definition of "impeachable offense" makes it clear that the real objective of those who have launched an attack on Justice Douglas is to establish that Federal judges can be impeached whenever a temporary legislative majority finds them wanting in "good behavior" as at that moment defined.

I had thought this proposition was laid to rest in 1787 when the Founding Fathers expressly rejected it, and that it could hardly be resurrected after the unsuccessful effort by the Jeffersonians in 1805 to remove all Federalist Justices on just such a theory. But the notion persists, and is so radically subversive of cherished American principles—separation of powers, the independence of the judiciary, freedom of speech, and the impermissibility of *ex post facto* determinations—that it must not be allowed to prevail.

* * * * *

On May 18, I furnished the Subcommittee with an extensive and fully documented legal memorandum on the grounds provided in the Constitution for impeaching Federal judges. I there noted that the Constitution itself confines impeachment to "Treason, Bribery, or other high Crimes and Misdemeanors," that at the Constitutional Convention the Founding Fathers—led by James Madison—expressly rejected a proposal to make judges impeachable for "misconduct" or "maladministration," and that Madison explained that the proposal was rejected because "so vague a term will be equivalent to a tenure during the pleasure of the Senate."

My memorandum noted that Thomas Jefferson, in his Manual of Parliamentary Practice, had conspicuously omitted the "good behavior" clause in enumerating the constitutional provisions bearing on impeachment. And I referred to Alexander Hamilton's candid explanation in the *Federalist Papers* that the authors of the Constitution deliberately confined impeachment to serious crimes even at the price of allowing unfit judges to remain on the bench—in order to protect the independence of the judiciary.[1]

I observed that Congressman Livermore of New Hampshire had stated in the very first Congress—without dissent from Members who had helped draft and ratify the Constitution—that Federal judges serving "during good behavior" could only be removed "on conviction of some crime." I referred the Subcommittee to the historic argument of Senator Stone in 1802 that only clearly defined crimes, and not less serious lapses from good behavior, could be the basis for impeachment of judges. He stated, and was not disputed, that "the words of the Constitution" would not justify impeachment of a judge who misconducted himself but did not commit "Treason, Bribery, or other high Crimes and Misdemeanors." I pointed out that such early constitutional authorities as Justice Wilson, one of the important draftsmen of the Constitution, and Justice Story agreed with this view. And I noted that these materials, particularly the Stone speech, had led Assistant Attorney General Rehnquist on April 9, 1970, to testify before a Senate Subcommittee that impeachment was not a remedy available for enforcing *noncriminal* lapses from good behavior.

I then reviewed each of the judicial impeachments in our history, noting that in *every* instance the Articles of Impeachment adopted by the House had charged "high crimes and misdemeanors," that in *every* such case there was in fact alleged a violation of previously defined law, and that the House had adhered to this standard even when it allowed itself to be a party to the shameful attempted purge of Justice Chase.

Finally, I reminded the Subcommittee that to impeach for alleged noncriminal lapses from good behavior would raise the most serious problems with respect to separation of powers, *ex post facto* determination, and freedom of speech. No canon of construction permits a reading of the impeachment clause which would violate these even more fundamental provisions of the same document. I advanced the opinion that an independent judiciary will not long survive such an interpretation.

* * * * *

Nothing in the Kelley memorandum detracts from the arguments submitted by me on May 18. It does, however, call to mind the following points:

1. There appears to have been a problem of communication between Mr. Ford and his attorney, for the Kelley memorandum is largely addressed to the irrelevant question whether impeachment is to be confined to *indictable* "high crimes and misdemeanors." We do not suggest that the criminal conduct which would constitutionally permit impeachment must be such as to require "indictment." Indeed, the constitutional reference to "misdemeanor" suggests otherwise, for in the federal system not all "misdemeanors" require indictment. The proper question is not whether an *indictable* crime must be shown, but whether a judge may be impeached for conduct which had not previously been defined as *unlawful,* and which is not of a sufficiently grave nature to warrant the appellation *"high* crimes and misdemeanors."

2. It is exceedingly strange that in a memorandum purporting to examine "the basic source material" for an interpretation of the Constitution there is no reference to the records of the Constitutional Convention, to the *Federalist Papers* which are widely regarded as the next most authoritative interpretative aid, or to statements by men who played a role in the drafting and ratification of the Constitution itself.

My May 18 memorandum was guilty of no such omissions. Citing chapter and verse, it demonstrated that the debates at the Constitutional Convention, Hamilton's essays in the *Federalist Papers,* and statements by such contemporaries as Jefferson, Congressman Livermore, Senator Stone and Justice Wilson decisively refute the notion that Federal judges may be removed from office when a temporary legislative majority concludes that they have not met the majority's then definition of "good behavior."

---

[1] The concern expressed in the Rifkind memorandum for freedom of speech for the judiciary is strangely at odds with the restraint that would be imposed on those members of Congress who have been critical of the judiciary. In the Rifkind letter to the Chairman of the Judiciary Committee of May 18, 1970, it is stated: In short, those who have attacked this great man of American law ought carefully to examine Canon 9 of the ABA's Code of Professional Responsibility which warns that "a lawyer shall not knowingly make false accusations against a judge" Rifkind would deny to members of Congress critical of the judiciary not only First Amendment protection for their expressions, but also the protection afforded by Article I, section 6 of the Constitution which provides that as to members of Congress "for any Speech or Debate in either House, they shall not be questioned in any other Place."

[1] Contrary to Mr. Ford's present view that Article III's "good behavior" clause adds an additional ground for impeaching Federal judges, Hamilton wrote in 1788, in an essay which helped to secure ratification of the Constitution, that the impeachment provision in Article II is "the only one which we find in our own Constitution with respect to our own judges." And he explained that "An attempt to fix the boundary between the regions of ability and inability, would much oftener give scope to personal and party attachments and enmities than advance the interests of justice or the public good."

These essential source materials leave no room for the curious argument that the "good behavior" clause of Article III was intended to define additional grounds for impeaching Federal judges, grounds concedely not applicable to nonjudicial officers. At the Constitutional Convention, efforts to add an impeachment provision to enforce the "good behavior" clause failed, and both Hamilton and Jefferson excluded Article III from any applicability to the impeachment process.

3. Even with respect to the single source which the Kelley memorandum does examine—past impeachment proceedings[2]—the results are extraordinarily shaky. The author is forced to concede that the attack on Justice Chase was fought on the ground that impeachment was available only for violations of clearly defined laws, not to enforce the "good behavior" clause, and that the strict constructionists prevailed. Likewise, he is forced to concede that during the Peck impeachment, James Buchanan stated that the Chase case had settled the proposition that a judge could only be impeached for violating a clearly defined rule of law.

The Kelley memorandum is then compelled to fall back upon the claim that in the 20th century standards have loosened and that in several cases, particularly those involving Judges Archbald and Ritter, judges were impeached and convicted on charges which amounted only to *noncriminal* lapses from good behavior.

The Archbald and Ritter cases prove no such proposition. In both cases, as in every other impeachment voted by the House in our Nation's history, the Articles of Impeachment charged the commission of "high crimes and misdemeanors," and allege specific criminal conduct. Although one of Judge Archbald's prosecutors later wrote a law review article attempting to expand the impeachment power, there contending that Archbald had been impeached despite the absence of criminal conduct, during the proceeding he and others saw the case in a quite different way. The House Managers, for example, resisted a motion to dismiss in the Senate by insisting that "the said articles do severally set forth impeachable offenses, high crimes, and misdemeanors as defined in the Constitution. . . ."

And Senators Elihu Root and Henry Cabot Lodge explained that they had voted to convict Archbald on several counts of securing money and other favors from litigants in his court because each such instance was a "high crime and misdemeanor." They explained they had voted to acquit on those counts which were not shown to be "high crimes and misdemeanor."

Judge Ritter was charged with six specific counts of criminal conduct, including "corruptly and unlawfully" receiving kickbacks, the "high misdemeanor" of practicing law while on the bench, willful evasion of federal income tax, and conspiracy in champertous foreclosure proceedings. Indeed, Ritter admitted the underlying facts and defended himself on the ground that he lacked the requisite criminal intent. The House impeached him on each of these charges and on a seventh blanket charge which did not add less serious, noncriminal charges—bad behavior—but expressly incorporated the more specific charges of crime. A majority, short of the necessary two-thirds, voted to convict Judge Ritter on each of the specific charges, while two thirds agreed that he had committed at least one criminal offense and voted to convict on the blanket charge incorporating the specific allegations of criminal conduct. In the face of these facts, the Kelley memorandum asserts that Judge Ritter was impeached and convicted for *noncriminal* conduct. It cites statements by several Senators who were anxious to expand their power to remove judges,[3] and purports to set out the text of the blanket charge, Article 7. I find it necessary to call to your attention the fact that the author of the Kelley memorandum has omitted a substantial portion of the language of Article 7—the portion referring to the specific criminal conduct with which Judge Ritter was charged. The omitted language charged Ritter with commission of "high crimes and misdemeanors in office," and expressly incorporated "his conduct as detailed in Articles I, II, III, and IV hereof, and by his income-tax evasions as set forth in Article V and VI hereof." In short, Article 7 did not relate to noncriminal misconduct but served as a summary of the alleged criminal offenses. The full text of the Articles of Impeachment in the *Ritter* case is appended to this letter.

Equally serious omissions occur in the Kelley memorandum's discussion of the impeachments of Judge Swayne in 1905 and Judge Louderback in 1933, both of whom were acquitted by the Senate. Both in the House and in the Senate, the primary defense by Swayne and Louderback was that even if true, the facts alleged did not constitute "an impeachable high crime and misdemeanor as defined in the Constitution of the United States." That the managers of the impeachment proceedings unsuccessfully argued to the contrary is hardly persuasive evidence that they were right. In sum, it appears that the memorandum is largely predicated on the arguments of advocates who lost their cases.

4. The Kelley memorandum does the best it can with the proceedings which have led to impeachment of Federal judges. But it curiously omits the many proceedings in which the House has declined to impeach where misconduct was shown but did not amount to the omission of a grave criminal offense.

In 1914, for example, the Judiciary Committee found that Judge Emory Speer had, among other things "exercised exceedingly poor taste and was guilty of indiscretions unbecoming a high judicial official," had "by his conduct, made his very high and honorable position one to excite the fear and suspicion, rather than to command the respect and confidence of litigants," and had committed other injudicious acts. But it concluded that these and other kinds of misconduct fall "short of impeachable offenses."

Similarly, in 1929 the House Judiciary Committee declined to recommend the impeachment of Judge Grover Moscowitz notwithstanding that the evidence showed that the judge had entered into a business arrangement with a former law partner and had appointed members of a law firm of his former partner to various receiverships, throwing "the court open to criticism and misunderstanding by the uninformed." Absent a violation of law by the judge, impeachment was not available.[4]

In that same year, District Judge Alston G. Dayton was charged with various acts of misbehavior including favoritism toward his son, misuse of services of employees paid by the government, use of his office to further friends' political activities, conflicts of interest in receivership cases, and an anti-labor bias in cases before him. The Judiciary Committee, after an investigation, refused to recommend impeachment although it found that "This evidence shows many matters of individual bad taste on the part of Judge Dayton, some not of that high standard of judicial ethics which should crown the Federal judiciary."

CONCLUSION

The above criticisms of the Kelley memorandum are not intended as personal attacks upon its author. Having explored the materials myself, I know how difficult it is to ascertain just what has led the House or Senate to act in any particular impeachment proceeding. But there are accepted tools for interpreting the Constitution, and it is the Constitution we are interpreting.

We begin with the language of the Constitution itself. Article II, the impeachment provision, speaks only of "Treason, Bribery, and other high Crimes and Misdemeanors." The language suggests that not even all "crimes" are impeachable, for otherwise there would be no need to specify "Treason, Bribery, or high Crimes. . . ." And if some crimes are not impeachable, how can less serious conduct be so regarded?

We examine other internal evidence in the Constitution, such as the provision for trial by jury "of all *crimes*, except in cases of impeachment."

We look to events at the Constitutional Convention, and there the antecedent of Mr. Ford's "good behavior" proposition was rejected on the ground that it would exact too high a price in terms of the independence of the judiciary. We look to the *Federalist Papers* and to the words of men who had been involved in the drafting and ratification of the Constitution. Again, these sources decisively refute the notion that the Founding Fathers contemplated the impeachment of federal judges for conduct not amounting to a violation of clearly defined criminal laws. When the language of the Constitution, the Convention debates, and the words of contemporaries converge on a single conclusion, there is no room for us now to redecide the question decided nearly two centuries ago.

When we turn to past impeachment proceedings, we have—at minimum—an obligation to be fair. Those who argued that impeachment was available only to punish grave criminal offenses prevailed in the Chase case, and prevailed again during the attempt to impeach President Andrew Johnson.[5] As former Justice Curtis summarized Johnson's successful defense, it rested on the proposition "that when the Constitution speaks of 'treason, bribery, and other high crimes and misdemeanors,' it refers to, and includes only, high criminal offenses against the United States, made so by some law of the United States existing when the acts complained of were done, and I say that this is plainly to be inferred from each and every provision of the Constitution on the subject of impeachment." 1 *Trial of Andrew Johnson*, p. 409.

The arguments of counsel in particular proceedings obviously have to be taken with a grain of salt, as do later writings by the participants. But one does not arrive at truth by resorting to the mutilated text of an article of impeachment—excluding from the quotation key words which are damaging to one's own case. Nor does one arrive at truth by summarizing the defenses available in

[2] A weak source indeed, for of course no Congress, still less any particular set of House Managers or defense counsel, has been licensed to amend the language of the Constitution.

[3] Even Senator Pittman, whose statement the Kelley memorandum relies on, asserted in writing that by Ritter's own admissions he was guilty of the *crimes* of false swearing on his tax return and practicing law while on the bench. He noted that his vote to convict on the blanket charge applied only to certain of the specific counts.

[4] See, also, the 1930 proceeding involving Judge Harry B. Anderson, where no grounds for impeachment were found to exist although the investigation disclosed several matters which the Committee did not approve or sanction.

[5] It should be noted that neither side during that great controversy advanced the notion—crucial to Mr. Ford's position—that impeachment of the President was to be governed by standards different from those applicable to judges. And the *Chase* precedent was successfully argued as governing Johnson's Senate trial.

particular cases—omitting to include a key defense damaging to the proposition one advocates.

Finally, this delicate question of constitutional interpretation cannot be answered in isolation without considering the other constitutional provisions which must be read in harmony with the impeachment clause. Any reading of the impeachment clause which would permit Congress to impeach a judge for conduct not previously defined as a ground for impeachment would clearly violate the *ex post facto* clause of Article I, Section 9. To interpret the impeachment clause to permit impeachment for speeches and writings violates the First Amendment, as counsel for Justice Chase successfully argued in 1805. And to condition judicial tenure upon the ability of a judge to win a popularity contest in the legislature is profoundly subversive of the principle of separation of powers inherent in the very structure of the Constitution itself.

The Kelley memorandum asserts that there is no appeal from Congress' ultimate judgment. If that is so, it underscores the high moral responsibility of Congress in exercising its awesome power under the impeachment clause so as not to infringe other sections of the Constitution.

Violations of the First Amendment, of the *ex post facto* clause, and of separation of powers, and infringement upon the independence of the judiciary, may not trouble those who proffer the Kelley memorandum. But they trouble me greatly, and I cannot sit idly by while these key provisions of our Constitution are trampled. I can understand the temptation of one branch of government to increase its own power, to subject another branch to its dominion. But in understanding this primeval drive, I am not obligated to succumb to it or to stand aside while it subverts the constitutional system which has proven its value over nearly two centuries. In my judgment, this concerted campaign to use the impeachment clause to enforce a temporary legislative majority's notions of what constitutes good behavior is a truly radical attempt to amend our Constitution. This is not the sanctioned method of change. I have great faith that when alerted to what is at stake, Constitutional scholars, the bar, the American people and their elected representatives will reject this radical proposal.

To this end, to alert the public to the nature of what Mr. Ford has proposed, I request that this letter and my May 18 legal memorandum be given the same public exposure which the Kelley memorandum has received. Since neither the May 18 legal memorandum nor this letter touch upon the factual allegations in the impeachment inquiry, there is no reason to accord them confidential treatment, and we do not claim confidential treatment for them.

Yours sincerely,

SIMON H. RIFKIND.

LEAVE OF ABSENCE

By unanimous request, leave of absence was granted to:

Mr. ADAMS, for September 15 through 18, on account of official business.

Mr. BLATNIK (at the request of Mr. ALBERT), for today, on account of official business.

Mr. HAGAN (at the request of Mr. ALBERT), for today, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. EDMONDSON, for 30 minutes, on September 15, and to revise and extend his remarks and include extraneous matter.

Mr. RANDALL, for 10 minutes, today, and to revise and extend his remarks and include extraneous matter.

(The following Members (at the request of Mr. RUTH) to revise and extend their remarks and include therein extraneous matter:)

Mr. POFF, for 10 minutes, today.

Mr. MILLER of Ohio, for 5 minutes, today.

Mr. AYRES, for 15 minutes, today.

Mr. HALPERN, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. DENNEY to extend his remarks following consideration of H.R. 3259, today.

Mr. FULTON of Pennsylvania prior to passage of Senate Concurrent Resolution 49.

Mr. RYAN to revise and extend his remarks on the bill H.R. 18410.

Mr. RANDALL and to include extraneous matter.

(The following Members (at the request of Mr. RUTH) and to include extraneous matter:)

Mr. SCHERLE in 10 instances.
Mr. RHODES.
Mr. BERRY.
Mr. WIGGINS.
Mr. HALL.
Mr. ROUSSELOT.
Mr. RIEGLE.
Mr. JOHNSON of Pennsylvania.
Mr. STEIGER of Wisconsin.
Mr. BROOMFIELD.
Mr. CRAMER in five instances.
Mr. HAMMERSCHMIDT.
Mr. NELSEN.
Mr. MCDADE.
Mr. FINDLEY.
Mr. HOSMER in two instances.
Mr. WYMAN in two instances.
Mr. HORTON.
Mr. SHRIVER.
Mr. CONTE.
Mr. HOGAN.
Mr. DERWINSKI in four instances.
Mr. CAMP.
Mr. SCHMITZ.
Mr. WHALEN.

(The following Members (at the request of Mr. CORMAN) and to include extraneous matter:)

Mr. HAMILTON in 10 instances.
Mr. PODELL in three instances.
Mr. FRASER.
Mr. NATCHER.
Mr. REUSS in six instances.
Mr. LONG of Maryland.
Mr. ANDERSON of California in two instances.
Mr. RODINO.
Mr. BROWN of California.
Mr. MATSUNAGA.
Mr. RYAN in five instances.
Mr. EVINS of Tennessee in two instances.
Mr. DADDARIO in five instances.
Mr. DINGELL in two instances.
Mr. MOORHEAD in four instances.
Mr. MARSH.
Mr. RARICK in six instances.
Mr. ROE.
Mr. POAGE.
Mr. PICKLE in two instances.
Mr. DELANEY.
Mr. PRYOR of Arkansas.
Mr. JONES of Tennessee.
Mr. VANIK in two instances.
Mr. OLSEN in two instances.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 5. An act to promote the public welfare; to the Committee on Government Operations.

S. 437. An act to amend chapter 83 of title 5, United States Code, relating to survivor annuities under the civil service retirement program, and for other purposes; to the Committee on Post Office and Civil Service.

S. 3822. An act to provide insurance for member accounts in State and federally chartered credit unions and for other purposes; to the Committee on Banking and Currency.

ENROLLED BILLS SIGNED

Mr. FRIEDEL, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 16539. An act to amend the National Aeronautics and Space Act of 1958 to provide that the Secretary of Transportation shall be a member of the National Aeronautics and Space Council; and

H.R. 16968. An act to increase the contribution by the Federal Government to the cost of health benefits insurance, and for other purposes.

ADJOURNMENT

Mr. CORMAN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 18 minutes p.m.) the House adjourned until tomorrow, Tuesday, September 15, 1970 at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2366. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a report of third country transfers of U.S. origin defense articles to which the United States has given its approval under the provisions of section 3(a)(2) of the Foreign Military Sales Act and transfers under the provisions of section 505(a) of the Foreign Assistance Act, for the period of January 1 through June 30, 1970; to the Committee on Foreign Affairs.

2367. A letter from the President of the United States, transmitting proposed supplemental appropriations and other provisions for the fiscal year 1971 (H. Doc. 91-382); to the Committee on Appropriations.

2368. A letter from the President of the United States, relative to the passage of H.R. 18306, increasing U.S. participation in the International Monetary Fund, the World

Bank, the Inter-American Development Bank, and the Asian Development Bank (H. Doc. 91–383); to the Committee on Banking and Currency and ordered to be printed.

2369. A letter from the Secretary of Health, Education, and Welfare, transmitting the second annual report of the National Advisory Committee on Handicapped Children, pursuant to title VI of Public Law 89–10, as amended; to the Committee on Education and Labor.

2370. A letter from the Secretary of the Interior, transmitting the annual report of the Office of Coal Research for 1969; to the Committee on Interior and Insular Affairs.

2371. A letter from the Nevada State Director, Bureau of Land Management, U.S. Department of the Interior, transmitting a notice of continuation of the segregation of certain public lands classified for transfer out of public ownership, pursuant to 43 U.S.C. 1411–1418; to the Committee on Interior and Insular Affairs.

2372. A letter from the Chairman, U.S. Civil Service Commission, transmitting a draft of proposed legislation to permit immediate retirement of certain Federal employees; to the Committee on Post Office and Civil Service.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. MILLER of California: Committee on Science and Astronautics. For the benefit of all mankind (Rept. No. 91–1446). Referred to the Committee of the Whole House on the State of the Union.

Mr. STEED: Committee of conference. Conference report on H.R. 16900 (Rept. No. 91–1447). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ADDABBO:

H.R. 19152. A bill to amend the National Traffic and Motor Vehicle Safety Act of 1966 to require the installation in school buses of restraining devices for the protection of children; to the Committee on Interstate and Foreign Commerce.

H.R. 19153. A bill to amend title 38 of the United States Code to provide an aid and attendance allowance to any parent entitled to dependency and indemnity compensation who is helpless or blind or a patient in a nursing home; to the Committee on Veterans' Affairs.

By Mr. BIESTER:

H.R. 19154. A bill to amend title 38 of the United States Code to provide improved medical care to veterans; to provide hospital and medical care to certain dependents and survivors of veterans; to improve recruitment and retention of career personnel in the Department of Medicine and Surgery; and for other purposes; to the Committee on Veterans' Affairs.

By Mr. DON H. CLAUSEN:

H.R. 19155. A bill to amend the Fish and Wildlife Act of 1956 to provide a criminal penalty for shooting at certain birds, fish, and other animals from an aircraft; to the Committee on Merchant Marine and Fisheries.

By Mr. COLLIER:

H.R. 19156. A bill to amend title 10 of the United States Code to provide that members of the Armed Forces be assigned to duty stations near their homes after serving in combat zones; to the Committee on Armed Services.

H.R. 19157. A bill to amend section 5 of the Department of Transportation Act to authorize the National Transportation Safety Board to employ 2,500 investigators to carry out its powers and duties under that act; to the Committee on Interstate and Foreign Commerce.

By Mr. CORMAN (for himself, Mr. CELLER, Mr. CLAY, Mr. CONYERS, Mr. EDWARDS of California, Mr. FRASER, Mr. GREEN of Pennsylvania, Mr. HARRINGTON, Mr. HATHAWAY, Mr. HAWKINS, Mr. HOWARD, Mr. KOCH, Mr. LOWENSTEIN, Mr. MADDEN, Mr. MEEDS, Mr. MIKVA, Mr. O'HARA, Mr. PERKINS, Mr. REID of New York, Mr. REUSS, Mr. ROYBAL, Mr. STOKES, Mr. THOMPSON of New Jersey, Mr. TUNNEY, and Mr. VAN DEERLIN):

H.R. 19158. A bill to create a health security program; to the Committee on Ways and Means.

By Mr. CORMAN (for himself, Mr. ANNUNZIO, Mr. BINGHAM, Mr. BROWN of California, Mrs. CHISHOLM, Mr. COHELAN, Mr. ECKHARDT, and Mr. RYAN):

H.R. 19159. A bill to create a health security program; to the Committee on Ways and Means.

By Mr. DINGELL (for himself, Mr. ROGERS of Florida, Mr. BIAGGI, and Mr. POLLOCK):

H.R. 19160. A bill to amend the National Environmental Policy Act of 1969 to require a longer period of notice before a Federal agency commences any action significantly affecting the environment, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. FISHER:

H.R. 19161. A bill to amend the Internal Revenue Code of 1954 to clarify the status of certain oil well service equipment under subchapter D of chapter 36 of such Code (relating to tax on the use of certain vehicles); to the Committee on Ways and Means.

By Mr. GUBSER:

H.R. 19162. A bill to amend the Federal Aviation Act of 1958 so as to require additional precautionary measures aboard certain aircraft in the interest of the safety of the traveling public; to the Committee on Interstate and Foreign Commerce.

By Mr. ICHORD (for himself and Mr. ASHBROOK):

H.R. 19163. A bill to amend the Emergency Detention Act of 1950 (title II of the Internal Security Act of 1950); to the Committee on Internal Security.

By Mr. MESKILL:

H.R. 19164. A bill to authorize the National Science Foundation to conduct research and educational programs to prepare the country for conversion from defense to civilian, socially oriented research and development activities, and for other purposes; to the Committee on Science and Astronautics.

By Mr. NELSEN (for himself, Mr. O'KONSKI, Mr. HOGAN, and Mr. THOMSON of Wisconsin):

H.R. 19165. A bill to amend the act of February 27, 1925, regulating the sale of dairy products in the District of Columbia, to revise the local inspection requirements under that act, and for other purposes; to the Committee on the District of Columbia.

By Mr. PATMAN:

H.R. 19166. A bill to amend the Export-Import Bank Act of 1945, as amended, to allow for greater expansion of the export trade of the United States, to exclude Bank receipts and disbursements from the Budget of the U.S. Government, and for other purposes; to the Committee on Banking and Currency.

By Mr. ROGERS of Florida:

H.R. 19167. A bill to prohibit the movement in interstate or foreign commerce of horses which are "sored", and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. ROGERS of Florida (for himself, Mr. DINGELL, and Mr. BIAGGI):

H.R. 19168. A bill to amend the National Environmental Policy Act of 1969 to require a longer period of notice before a Federal agency commences any action significantly affecting the environment, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. SNYDER (by request):

H.R. 19169. A bill to amend the Fair Labor Standards Act of 1938, to exempt certain retail or service establishments; to the Committee on Education and Labor.

By Mr. SNYDER (by request):

H.R. 19170. A bill to amend the Fair Labor Standards Act of 1938, to exempt certain high wage earners; to the Committee on Education and Labor.

By Mr. WEICKER:

H.R. 19171. A bill to authorize the National Science Foundation to conduct research and educational programs to prepare the country for conversion from defense to civilian, socially oriented research and development activities, and for other purposes; to the Committee on Science and Astronautics.

By Mr. BARRETT:

H.R. 19172. A bill to provide Federal financial assistance to help cities and communities to develop and carry out intensive local programs to eliminate the causes of lead-based paint poisoning and local programs to detect and treat incidents of such poisoning, to establish a Federal demonstration and research program to study the extent of the lead-based paint removal, and to prohibit future use of lead-based paint in Federal or federally assisted construction or rehabilitation; to the Committee on Banking and Currency.

By Mr. BRADEMAS:

H.R. 19173. A bill to amend title 18 of the United States Code to provide for better control of interstate traffic in explosives; to the Committee on the Judiciary.

H.R. 19174. A bill to regulate the importation, manufacture, distribution, storage, and possession of explosives, blasting agents, and detonators, and for other purposes; to the Committee on the Judiciary.

By Mr. FULTON of Pennsylvania:

H.R. 19175. A bill to amend the Public Health Service Act and other laws to provide increased research into, and prevention of, drug abuse and drug dependence; to provide for treatment and rehabilitation of drug abusers and drug dependent persons; and to strengthen existing law enforcement authority in the field of drug abuse; to the Committee on Interstate and Foreign Commerce.

By Mr. HOGAN:

H.R. 19176. A bill to provide for the awarding of a Medal of Honor for policemen and a Medal of Honor for firemen; to the Committee on Banking and Currency.

By Mr. JONES of Tennessee:

H.R. 19177. A bill to exempt from certain deep-draft safety statutes passenger vessels operating solely on the inland rivers and waterways; to the Committee on Merchant Marine and Fisheries.

By Mr. MINISH:

H.R. 19178. A bill to amend section 18 of the Airport and Airway Development Act of 1970 to prohibit Federal financial assistance to any airport which permits the use of its facilities by an aircraft registered in a foreign country which fails or refuses to punish aircraft hijackers or to extradite aircraft hijackers to the flag country of the hijacked aircraft; to the Committee on Interstate and Foreign Commerce.

By Mr. OLSEN:

H.R. 19179. A bill to adjust the pay of employees of the Federal Government, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. ROSTENKOWSKI:

H.R. 19180. A bill to provide for the establishment of a national urban growth policy, to encourage and support the proper growth and development of our States, metropolitan areas, cities, counties, and towns with emphasis upon new community and inner city development, to extend and amend laws relating to housing and urban development, and for other purposes; to the Committee on Banking and Currency.

By Mr. UDALL:

H.R. 19181. A bill to retain coverage under the laws providing employee benefits, such as compensation for injury, retirement, life insurance, and health benefits for employees of the Government of the United States who transfer to Indian tribal organizations to perform services in connection with governmental or other activities which are or have been performed by Government employees in or for Indian communities, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. PATMAN:

H.J. Res. 1366. Joint resolution to provide for the temporary extension of the Federal Housing Administration's insurance authority; to the Committee on Banking and Currency.

By Mr. ROE:

H.J. Res. 1367. Joint resolution authorizing the President to proclaim National Good Grooming Week from November 16, 1970, to November 22, 1970; to the Committee on the Judiciary.

By Mr. HARVEY:

H. Con. Res. 730. Concurrent resolution urging the Congress to assemble in the Hall of the House for the purpose of expressing its grave concern about the mistreatment of United States and Allied prisoners of war by North Vietnamese and other Communist forces; to the Committee on Rules.

By Mr. BROTZMAN (for himself, Mr. CLEVELAND, Mr. ICHORD, Mr. FARBSTEIN, and Mr. HOWARD):

H. Res. 1208. Resolution to amend the Rules of the House of Representatives to create a standing committee to be known as the Committee on the Environment; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

Br. Mr. GOODLING:

H.R. 19182. A bill for the relief of Stephen C. Yednock; to the Committee on the Judiciary.

By Mr. KOCH:

H.R. 19183. A bill for the relief of Mrs. Wallace S. Anderson; to the Committee on the Judiciary.

By Mrs. MINK:

H.R. 19184. A bill for the relief of Servillano C. Espi; to the Committee on the Judiciary.

By Mr. RHODES:

H.R. 19185. A bill for the relief or Alispa Rosita Bradley; to the Committee on the Judiciary.

By Mr. ROYBAL:

H.R. 19186. A bill for the relief of Jose de Jesus Ornelas-Valdez and Celia Villafana de Ornelas; to the Committee on the Judiciary.

By Mr. STAFFORD:

H.R. 19187. A bill for the relief of Lloyd B. Earle; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

587. By the SPEAKER: Petition of James R. Johnston, et al., Huron County, Mich., relative to the treatment of Americans who are prisoners of war or missing in action in Southeast Asia; to the Committee on Foreign Affairs.

588. Also, petition of the Board of Selectmen, Brookline, Mass., relative to the hijacking of airplanes; to the Committee on Foreign Affairs.

589. Also, petition of the City Council, Elizabeth, N.J., relative to the hijacking of airplanes; to the Committee on Interstate and Foreign Commerce.

590. Also, petition of Jayleen Tjoelker, Blair, Wash., et al., relative to appointments to the U.S. Supreme Court and other Federal benches; to the Committee on Judiciary.

591. Also, petition of William R. Wendt, Springfield, Mo., relative to redress of grievances; to the Committee on the Judiciary.

SENATE—*Monday, September 14, 1970*

The Senate met at 10 a.m. and was called to order by the Acting President pro tempore (Mr. METCALF).

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Almighty God, our help in ages past, our present strength, and our hope for years to come, whose ear is open to those of humble and contrite heart, hear us in our morning prayer. If we are low in spirit, lift us up. If we are lofty in pride, make us submissive in mind. If we feel feeble in intellect, strengthen us by Thy higher wisdom. If we feel impotent in will, brace us with moral courage and personal righteousness.

Come to us in our individual needs. Come to us in our national needs.

Grant us here a vision of a world that is not yet, but ought to be, and in loyal devotion to its appearing, help us to find joy and peace.

In the coming week grant us Thy help in all our duties and keep us ever faithful to our high calling as servants of all the people.

We pray in the name of the Lord of Life. Amen.

CALL OF THE ROLL

The ACTING PRESIDENT pro tempore (Mr. METCALF). Because the Senate adjourned on Friday, September 11, 1970, without a quorum, the first order of business is to obtain a quorum.

The Chair directs the clerk to call the roll to ascertain the presence of a quorum.

The legislative clerk called the roll and the following Senators answered to their names:

[No. 291 Leg.]

Aiken	Fong	Nelson
Allen	Fulbright	Packwood
Allott	Gravel	Pell
Anderson	Griffin	Proxmire
Bennett	Gurney	Ribicoff
Bible	Hansen	Russell
Burdick	Harris	Saxbe
Byrd, Va.	Hart	Schweiker
Byrd, W. Va.	Holland	Scott
Case	Hollings	Smith, Maine
Church	Hughes	Sparkman
Cook	Inouye	Spong
Cooper	Javits	Stennis
Cranston	Long	Stevens
Dole	Mansfield	Talmadge
Dominick	McCarthy	Thurmond
Eagleton	McClellan	Williams, Del.
Eastland	McGovern	Yarborough
Ellender	Metcalf	Young, N. Dak.
Ervin	Mondale	Young, Ohio
Fannin	Muskie	

Mr. BYRD of West Virginia. I announce that the Senator from Indiana (Mr. BAYH), the Senator from Nevada (Mr. CANNON), the Senator from Connecticut (Mr. DODD), the Senator from Tennessee (Mr. GORE), the Senator from Indiana (Mr. HARTKE), the Senator from Washington (Mr. JACKSON), the Senator from North Carolina (Mr. JORDAN), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Washington (Mr. MAGNUSON), the Senator from Wyoming (Mr. MCGEE), the Senator from New Hampshire (Mr. MCINTYRE), the Senator from New Mexico (Mr. MONTOYA), the Senator from Utah (Mr. MOSS), the Senator from Rhode Island (Mr. PASTORE), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Missouri (Mr. SYMINGTON), the Senator from Maryland (Mr. TYDINGS), and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

Mr. GRIFFIN. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Oklahoma (Mr. BELLMON), the Senator from Delaware (Mr. BOGGS), the Senator from Massachusetts (Mr. BROOKE), the Senator from New Hampshire (Mr. COTTON), the Senator from New York (Mr. GOODELL), the Senator from Oregon (Mr. HATFIELD), the Senator from Arizona (Mr. GOLDWATER), the Senator from Idaho (Mr. JORDAN), the Senator from Iowa (Mr. MILLER), the Senator from California (Mr. MURPHY), the Senator from Kansas (Mr. PEARSON), the Senator from Illinois (Mr. PERCY), the Senator from Vermont (Mr. PROUTY), and the Senator from Texas (Mr. TOWER) are necessarily absent.

The Senator from Nebraska (Mr. CURTIS) is absent because of death in his family.

The Senator from Nebraska (Mr. HRUSKA) is absent to attend the funeral of a friend.

The Senator from Maryland (Mr. MATHIAS) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Illinois (Mr. SMITH) is detained on official business.

The ACTING PRESIDENT pro tempore. A quorum is present. The clerk will proceed to call the roll again on Mr. DOMINICK's amendment No. 886 to S. 3418.

The assistant legislative clerk called the roll.

Mr. BYRD of West Virginia. I announce that the Senator from Indiana (Mr. BAYH), the Senator from Nevada (Mr. CANNON), the Senator from Connecticut (Mr. DODD), the Senator from Tennessee (Mr. GORE), the Senator from Indiana (Mr. HARTKE), the Senator from Washington (Mr. JACKSON), the Senator from North Carolina (Mr. JORDAN), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Washington (Mr. MAGNUSON), the Senator from Wyoming (Mr. MCGEE), the Senator from New Hampshire (Mr. MCINTYRE), the Senator from New Mexico (Mr. MONTOYA), the Senator from Utah (Mr. Moss), the Senator from Rhode Island (Mr. PASTORE), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Missouri (Mr. SYMINGTON), the Senator from Maryland (Mr. TYDINGS), and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

On this vote, the Senator from New Jersey (Mr. WILLIAMS) is paired with the Senator from New Hampshire (Mr. MCINTYRE).

If present and voting, the Senator from New Jersey would vote "nay" and the Senator from New Hampshire would vote "yea."

I further announce that, if present and voting, the Senator from Washington (Mr. JACKSON), the Senator from North Carolina (Mr. JORDAN), the Senator from Washington (Mr. MAGNUSON), the Senator from Rhode Island (Mr. PASTORE), and the Senator from West Virginia (Mr. RANDOLPH) would each vote "nay."

Mr. GRIFFIN. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Oklahoma (Mr. BELLMON), the Senator from Delaware (Mr. BOGGS), the Senator from Massachusetts (Mr. BROOKE), the Senator from New Hampshire (Mr. COTTON), the Senator from New York (Mr. GOODELL), the Senator from Oregon (Mr. HATFIELD), the Senator from Arizona (Mr. GOLDWATER), the Senator from Idaho (Mr. JORDAN), the Senator from Iowa (Mr. MILLER), the Senator from California (Mr. MURPHY), the Senator from Kansas (Mr. PEARSON), the Senator from Illinois (Mr. PERCY), the Senator from Vermont (Mr. PROUTY), and the Senator from Texas (Mr. TOWER) are necessarily absent.

The Senator from Nebraska (Mr. CURTIS) is absent because of death in his family.

The Senator from Nebraska (Mr. HRUSKA) is absent to attend the funeral of a friend.

The Senator from Maryland (Mr. MATHIAS) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Illinois (Mr. SMITH) is detained on official business.

If present and voting, the Senator from Massachusetts (Mr. BROOKE), the Senator from Nebraska (Mr. CURTIS), the Senator from Nebraska (Mr. HRUSKA), the Senator from Idaho (Mr. JORDAN), the Senator from Iowa (Mr. MILLER), the Senator from South Dakota (Mr. MUNDT), the Senator from California (Mr. MURPHY), the Senator from Kansas (Mr. PEARSON), and the Senator from Texas (Mr. TOWER) would each vote "yea."

On this vote, the Senator from Vermont (Mr. PROUTY) is paired with the Senator from Illinois (Mr. PERCY). If present and voting, the Senator from Vermont would vote "yea" and the Senator from Illinois would vote "nay."

On this vote, the Senator from Illinois (Mr. SMITH) is paired with the Senator from Oregon (Mr. HATFIELD). If present and voting, the Senator from Illinois would vote "yea" and the Senator from Oregon would vote "nay."

The result was announced—yeas 22, nays 40, as follows:

[No. 292 Leg.]

YEAS—22

Aiken	Dominick	Smith, Maine
Allott	Fannin	Stevens
Bennett	Fong	Talmadge
Byrd, Va.	Griffin	Thurmond
Case	Gurney	Williams, Del.
Cook	Hansen	Young, N. Dak.
Cooper	Nelson	
Dole	Saxbe	

NAYS—40

Allen	Hart	Packwood
Anderson	Holland	Pell

Dodd	McGee	Symington
Goldwater	McIntyre	Tower
Goodell	Miller	Tydings
Gore	Montoya	Williams, N.J.
Hartke	Moss	

So Mr. DOMINICK's amendment (No. 886) was rejected.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States submitting nominations were communicated to the Senate by Mr. Geisler, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore (Mr. METCALF) laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations received today, see the end of Senate proceedings.)

THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Friday, September 11, 1970, be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

WAIVER OF CALL OF CALENDAR UNDER RULE VIII

Mr. MANSFIELD. Mr. President, I ask unanimous consent to waive the call of the calendar for unobjected to bills under rule VIII.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

PUBLIC HEALTH SERVICE ACT AMENDMENT—UNANIMOUS CONSENT AGREEMENT

Mr. MANSFIELD. Mr. President, if I may have the attention of the Senate, and especially of the distinguished Senator from Kansas (Mr. DOLE), who I understand will offer an amendment, I ask unanimous consent that on the amendment to be offered by the distinguished Senator from Kansas there be a time limitation of 10 minutes, the time to be equally divided between the sponsor of the amendment and the manager of the bill.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, I ask further unanimous consent that on the bill there be a time limitation of 20 minutes, the time to be equally divided between the manager of the bill, the distinguished Senator from Texas (Mr. YARBOROUGH), and the minority leader or whomever he may designate to take care of the members of the committee on that side.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR PROXMIRE

Mr. MANSFIELD. Mr. President, I ask unanimous consent that following disposition of S. 3418 the distinguished Senator from Wisconsin (Mr. PROXMIRE), who already has been previously accorded an order, be recognized for the allowable 20 minutes.

ORDER FOR TRANSACTION OF ROUTINE BUSINESS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that following the remarks of the Senator from Wisconsin there be a period for the transaction of routine morning business, with a limitation of 3 minutes on statements made therein.

The ACTING PRESIDENT pro tempore. Without objection it is so ordered.

Mr. MANSFIELD. Following that, the Senate automatically returns to the consideration of Senate Joint Resolution 1.

PUBLIC HEALTH SERVICE ACT AMENDMENTS

The ACTING PRESIDENT pro tempore. Without objection, the Senate will proceed to the consideration of S. 3418, which will be stated by title.

The bill (S. 3418) was read by title, as follows:

S. 3418 to amend the Public Health Service Act to provide for the making of

grants to medical schools and hospitals to assist them in establishing special departments and programs in the field of family practice, and otherwise to encourage and promote the training of medical and paramedical personnel in the field of family medicine.

The Senate resumed the consideration of the bill.

Mr. DOLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The amendment of the Senator from Kansas will be stated.

Mr. DOLE. Mr. President, I ask unanimous consent to dispense with the reading of the amendment, and ask unanimous consent that it be printed in the RECORD at this point.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add the following:

TITLE III—NATIONAL INFORMATION AND RESOURCE CENTER FOR THE HANDICAPPED

SEC. 301. (a)(1) There is hereby established, within the Department of Health, Education, and Welfare, a National Information and Resource Center for the Handicapped (hereinafter referred to as the "Center").

(2) The Center shall have a Director and such other personnel as may be necessary to enable the Center to carry out its duties and functions under this section.

(b) (1) It shall be the duty and function of the Center to collect, review, organize, publish, and disseminate (through publications, conferences, workshops or technical consultation) information and data related to the particular problems caused by handicapping conditions, including information describing measures which are or may be employed for meeting or overcoming such problems, with a view to assisting individuals who are handicapped, and organizations and persons interested in the welfare of the handicapped, in meeting problems which are peculiar to, or are made more difficult for, individuals who are handicapped.

(2) The information and data with respect to which the Center shall carry out its duties and functions under paragraph (1) shall include (but not be limited to) information and data with respect to the following—

(A) medical and rehabilitation facilities and services;

(B) day care and other programs for young children;

(C) education;

(D) vocational training;

(E) employment;

(F) transportation;

(G) architecture and housing (including household appliances and equipment);

(H) recreation; and

(I) public or private programs established for, or which may be used in, solving problems of the handicapped.

(c) (1) The Secretary shall make available to the Center all information and data, within the Department of Health, Education, and Welfare, which may be useful in carrying out the duties and functions of the Center.

(2) Each other Department or agency of the Federal Government is authorized to make available to the Secretary, for use by the Center, any information or data which the Secretary may request for such use.

(3) The Secretary of Health, Education, and Welfare shall to the maximum extent feasible enter into arrangements whereby State and other public and private agencies and institutions having information or data which is useful to the Center in carrying out its duties and functions will make such information and data available for use by the Center.

(d) There is authorized to be appropriated for carrying out the purposes of this section for the fiscal year ending June 30, 1971, the sum of $300,000, and for each fiscal year thereafter such sums as may be necessary.

Mr. DOLE. Mr. President, I may say at the outset that I shall take only a moment or two.

Let me state what the amendment does, and then perhaps we can discuss it.

My amendment would establish within the Department of Health, Education, and Welfare a national information and resource center for the handicapped. It would authorize the expenditure of $300,000 for the first year ending June 30, 1971.

On many occasions I have commented on the severe difficulties and problems confronted by this Nation's handicapped citizens. A significant problem is that of information.

Greater availability and coordination of knowledge is essential to achieving meaningful solutions and progress for the disabled. Too often, information is incomplete, unavailable, or inaccessible. Too frequently, the person in immediate need does not know where to go to obtain information.

A tremendous number of resources, public and private, are available to help meet the needs of these millions of handicapped persons. The many services presently provided by the Federal Government in conjunction with the States in financial assistance, rehabilitation, research, education, and training have assisted millions of disabled Americans to live as normal and productive lives as possible.

The great voluntary agencies, the private economy, and the resources of many dedicated people have combined to greatly improve the quality of life for the handicapped.

In this framework of available resources for our disabled citizens, we must be sure that our efforts and money are most effectively used to fill their needs. It is the purpose of this amendment to insure that all the knowledge and information regarding services be consolidated and made available to the handicapped person in the form he can best use and when he most needs it. Presently, no one source exists. There is a lack of coordination and centrally available information.

The knowledge about resources, research findings, technical assistance, reports, and information about what other governmental units, communities, business and colleges have done to accommodate handicapped people is diffused and completely lacking in centralization and coordination. It is hoped that a national information and resource center for the handicapped will provide this most necessary point of contact to individual citizens, families of the handicapped, the handicapped themselves, as well as private organizations, professional organizations, city and state officials who desire information or direction. The creation of this center will fill a great void. It is an answer to a specific and well-defined need, and it will meet this need at a reasonable cost.

The estimated 42 million Americans belonging to the handicapped minority will benefit greatly from the services provided by this center. The country as a whole will benefit from the increased contribution, well-being and fulfillment of the handicapped.

This field is truly without partisanship. The establishment of a national center to better disseminate and coordinate available information can do much to alleviate problems and promote productive lives for the handicapped.

A list of organizations supporting the need for a national information and resource center for the handicapped include:

1. United Cerebral Palsy Association, Inc.
2. American Rehabilitalton Counseling Association.
3. American Speech and Hearing Association.
3. Goodwill Industries of America, Inc.
5. National Rehabilitation Counseling Association.
6. American Nursing Home Association.
7. Easter Seal Society of Crippled Children and Adults.
8. The Library of Congress, Division for the Blind and Physically Handicapped.
9. National Institutes on Rehabilitation and Health Services.
10. National Rehabilitation Association, Inc.

A list of several Kansas organizations supporting such a national center follows:

1. Kansas Association for Retarded Children, Inc.
2. Kansas Association for Mental Health, Inc.
3. Kansas Heart Association, Inc.
4. Deaf and Hard of Hearing Counseling Service, Inc.

Mr. President, there have been no hearings on the amendment. It has been discussed, however, with the senior Senator from New York (Mr. JAVITS) and with the Senator from Texas (Mr. YARBOROUGH).

I hope that if my amendment is not accepted, as I hope it will be, at least we can agree to have subcommittee hearings on the proposal.

I reserve the remainder of my time.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. YARBOROUGH. Mr. President, I yield myself one-half minute, and then I shall ask for a quorum call.

Mr. President, this amendment was introduced as Senate bill 4002 on June 23, 1970. We have not had hearings because we have not yet received the requested report from HEW as to their means of the bill. They have informally told us that they are spending more money now each year for these purposes than the $300,000 which is authorized in S. 4002.

I suggest the absence of a quorum, and ask unanimous consent that the time not be taken out of the time allocated to either side.

The ACTING PRESIDENT pro tempore. Is there objection? Without objection, it is ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. YARBOROUGH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. YARBOROUGH. Mr. President, I accept the amendment of the Senator from Kansas.

The ACTING PRESIDENT pro tempore. Does the Senator from Kansas yield back his time?

Mr. DOLE. I yield back the remainder of my time.

Mr. YARBOROUGH. I yield back the remainder of my time.

The ACTING PRESIDENT pro tempore. All remaining time having been yielded back, the question is on agreeing to the amendment of the Senator from Kansas.

The amendment was agreed to.

The ACTING PRESIDENT pro tempore. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The ACTING PRESIDENT pro tempore. Does the Senator from Texas yield time on the bill?

Mr. YARBOROUGH. Mr. President, a parliamentary inquiry.

The ACTING PRESIDENT pro tempore. The Senator will state it.

Mr. YARBOROUGH. Do we have 20 minutes to a side, or 20 minutes total?

The ACTING PRESIDENT pro tempore. Ten minutes to a side, or 20 minutes total time.

Mr. YARBOROUGH. Mr. President, if there is no one who wishes to speak in opposition to the bill, I am prepared to yield back all of the time.

Mr. DOMINICK. Mr. President, will my colleague yield me some time?

Mr. JAVITS. Mr. President, I am the ranking minority member of the committee, but I do not oppose the bill. I support the bill, but, in the absence of the leadership from the floor, I yield 5 minutes to the Senator from Colorado.

The ACTING PRESIDENT pro tempore. The Senator from Colorado is recognized.

Mr. DOMINICK. Mr. President, I thank the Senator from New York. I shall not take that much time.

I shall probably vote for the bill when we get to the vote, but I do think there are a couple of things we should point out in due course before we decide what we are going to do.

First of all, this is another of those categorical grant programs. The categorical grant has been pushed by each separate specialty, both in the educational field and in the health field, on the ground that if one group gets it, then the other one ought to have it also, in order to stay on a parity. So, one after another, the categorical grant programs for the benefit of a particular specialty, as I say, both in education and in health, have gone forward.

What we have been trying to do, as far as the administration is concerned, is turn this around, to try to group the health services on the basis that appropriations for both educational and health services should be a broad figure, encompassing a number of disciplines, with the emphasis at the same time being flexible enough so that the Department—for the National Institutes of Health, the Office of Education, or whatever it may be—can funnel funds into the items which are most needed at a particular moment, instead of being more rigidly confined by the terms of specific pieces of legislation.

So that is the first objection they have to it, and probably the major objection as far as the administration is concerned.

There is no doubt that we should get into the promotion of more generalized practice, both in the health field, and, it seems to me, in the educational field as well. There is no doubt that this bill will help to upgrade family practice, and it seems to me that is something we need so badly that it is worthwhile passing, notwithstanding the objections that I have mentioned.

For the benefit of those who voted against my amendment, let me outline again the problem I was trying to meet with it, so that we will have it in the RECORD and the House of Representatives can consider it, and so that eventually, when the bill goes to conference, we can talk about it again.

The problem is that there are only nine medical schools at the present time that have separate departments of family medicine. Establishing separate departments of family medicine in the other medical colleges will cost from $250,000 to $650,000 per school.

My staff and I called at least eight very prominent medical schools, including the Colorado Medical Center, the University of Oklahoma, Harvard, the University of Vermont, Stanford, Johns Hopkins, Texas, and the University of California at San Diego, and every single one of the deans or assistant deans of those schools said they thought it was a great mistake to require a separate department.

After all, a family practice physician must have instruction in a variety of different disciplines, ranging all the way from surgery to gynecology. All of these had previously been set up, so why set up a separate department to duplicate all the rest of it? The reason for requiring a separate department was that the American Academy of General Practice felt very strongly that the recently recognized family practice specialty should have the same prestige as other specialties which have been recognized for many years. Obviously, the separate department requirement would help them in that request. But I do not think the instant prestige of the family practice specialty is more important than the considerations I have already outlined. This does not really make very much sense so far as I am concerned, interested as I am in trying to promote general practice.

So, having made these comments, I think we will find some substantial changes in the bill before it passes the House. On the assumption that we will get those changes and that the amount of time authorized by this bill will be cut back from 5 years to 3 years through House action or through the conference, I am willing to go along with it in its present form, even though, as I have said, it seems to me that the measure has been rather unwisely drafted in certain significant features.

I yield back the remainder of my time to the Senator from New York.

Mr. JAVITS. I yield 2 minutes to the Senator from Delaware.

Mr. WILLIAMS of Delaware. Mr. President, it should be pointed out that this bill, S. 3418, is the 5-year extension of an act which does not expire until June 30, 1971. The Secretary of HEW advised the Senate Committee on Labor and Public Welfare by letter of July 7, 1970, that he opposed the enactment of S. 3418. In a letter dated August 20, 1970, Director Shultz said:

> On July 8, Dr. John Zapp of the Office of the Assistant Secretary for Health and Scientific Affairs testified against the bill at hearings held by the Subcommittee on Health.
>
> The Department pointed out that while it is in accord with the objectives of the bill, those objectives can already be furthered by the existing programs of assistance to medical schools and hospitals. It stressed the advantages of aiding activities in the field of family medicine under broad, flexible legislative authorities such as those contained in the Health Professions Educational Assistance Act. The latter Act is due to expire on June 30, 1971, and the Department indicated that it is in the process of developing its recommendations for modifying and extending the Act.
>
> Finally, the Department strongly opposed the enactment of another categorical grant authority which would duplicate authorities already available under which the purposes of S. 3418 could be achieved.

I ask unanimous consent that the entire letter, signed by George P. Shultz under date of August 20, in opposition to this bill, be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

EXECUTIVE OFFICE OF THE PRESIDENT,
OFFICE OF MANAGEMENT OF BUDGET,
Washington, D.C., August 20, 1970.

Hon. JOHN J. WILLIAMS,
U.S. Senate,
United States Senate,
Washington, D.C.

DEAR SENATOR WILLIAMS: This is in reply to your telegram of August 12 concerning the Administration's position on S. 3418, a bill which would authorize a program of categorical grants to medical schools and hospitals in order to promote the training of medical and paramedical personnel in the field of family medicine.

The Secretary of Health, Education, and Welfare has advised the Senate Committee on Labor and Public Welfare, by letter of July 7, 1970, that he opposes the enactment of S. 3418. On July 8, Dr. John Zapp of the Office of the Assistant Secretary for Health and Scientific Affairs testified against the bill at hearings held by the Subcommittee on Health.

The Department pointed out that while it is in accord with the objectives of the bill, those objectives can already be furthered by the existing programs of assistance to medical schools and hospitals. It stressed the advantages of aiding activities in the field of family medicine under broad, flexible legislative authorities such as those contained in the Health Professions Educa-

tional Assistance Act. The latter Act is due to expire on June 30, 1971, and the Department indicated that it is in the process of developing its recommendations for modifying and extending the Act.

Finally, the Department strongly opposed the enactment of another categorical grant authority which would duplicate authorities already available under which the purposes of S. 3418 could be achieved.

This Office has submitted a report on S. 3418 to the Senate Labor and Public Welfare Committee in which we concurred in the Department's views and joined it in recommending against enactment.

Sincerely,

GEORGE P. SHULTZ,
Director.

Mr. WILLIAMS of Delaware. Mr. President, in conclusion, I want to say that this is but one of several examples of bills that have been on the calendar in the last few days reported by the Senate Committee on Labor and Public Welfare which extend acts which do not expire—many of them—until 1971. In these closing days of the session it does not make sense that we extend an act that could be considered more advisedly by the next Congress. Particularly we should wait until we get recommendation of the administration on the extention of these acts.

In my 24 years service in the Senate I have never witnessed such enthusiasm by Senators on both sides of the aisle to spend money, yet when it comes to raising revenue to pay for these expanded programs they shun the decision as though it were a plague.

Decisions are being made now that will make a large tax increase necessary by the next Congress, and voters should be aware of that fact.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. JAVITS. Mr. President, will the Senator from Texas yield me 5 minutes on the bill?

Mr. YARBOROUGH. I yield 5 minutes to the Senator from New York.

Mr. JAVITS. I wish to announce to the Senate that whatever time remains in opposition—I think it probably is 3 or 4 minutes—is available to any Senator who wishes to oppose this bill. I control that time, but I will yield it gladly. That is why I asked the Senator from Texas to yield to me time on the bill.

Mr. President, I think there is a lot to the points made by the Senator from Colorado (Mr. DOMINICK) and the Senator from Delaware (Mr. WILLIAMS).

The fact is that the administration is not altogether happy about this bill. The fact is that they point out that it can be done as an amendment to an act which has not yet expired. However, it is a new program, and therefore the only way to do it at this time rather than wait until next year is the way we are proceeding here.

Mr. President, I think we would be begging this question, as we vote on it, if we did not understand what is happening in American medicine and in American health care. We are in very grave danger of imposing a cruel hoax upon the people of the United States by passing a proliferation of bills allegedly providing health care to our people, but without the services and facilities with which to deliver them and without the doctors, without the nurses, and without the paramedical personnel.

The other thing that represents an aspect of this cruel hoax, as I call it, is the fact that the medical schools are in terrible trouble. All the Department of HEW is doing in writing this letter is saying, "Let's stretch the rubberband further." They say that, somehow or other, the medical schools will find a way to carry it.

The answer is that we have passed a bill here previously, recognizing the emergency, which has not yet had action in the other body, for a $100 million rescue for medical schools, because many of them—there are only a little over 100 in the country—are going to close. I could not think of anything more devastating to the United States than if that happened. Yet, it is an imminent thing, also including the closing of dental schools.

What we have done is to be able to tell the people that we have passed this and passed that and passed the other, but there is no real money to back it up. So Senator YARBOROUGH, I think very properly, said here is a branch of medical science which threatens to die of atrophy unless we find some way of backing it up with the necessary resources to make it operative. The medical school rubberband can stretch no further. It is already in grave danger of breaking.

I added to it a title for nutrition education—title II of the bill—which falls in the same category, as we have uncovered such devastating facts in the country on the issues of hunger and malnutrition.

Thus, the reason for the bill is that we simply cannot find the resources any other way and that these medical schools do not have the resources themselves. Too many of them are going broke, as it is. So we must find some new aspect of their work which we are willing to finance, and that is what this bill is all about.

For that reason, I think the Senate should pass the bill. I honor my colleagues who have picked on flaws in the measure, for nothing here is ever black and white, and neither is this. In my judgment, on balance, it is something we ought to do, and I hope the Senate passes the bill.

Mr. YARBOROUGH. I yield myself 3 minutes.

Mr. President, this bill is aimed at trying to alleviate the great shortage of family practitioners among the medical doctors of America. In 1931, three of every four doctors were general practitioners, family doctors. Today, only one in five is a family doctor.

The reason for this bill, as was ably pointed out by the distinguished senior Senator from New York, is that the medical schools of this Nation are financially beleaguered. We want them to teach family medicine. The thrust of this bill is to say, "If you will establish a family medicine department in your medical school, we will support you."

There are 134 counties in the United States without a single medical doctor, and the despair of families who are unable to find a medical doctor is growing.

The objection was made by the Senator from Colorado (Mr. DOMINICK) that we would be legislating the curriculum of medical schools. Not at all. We just say, "If you will go back to teaching family medicine as you used to do 50 years ago, the Federal Government will assist you." Many of them want to do this but do not have the resources to do so. These schools are in desperate straits. A number of medical schools, mainly the nonprofit private schools, are about to collapse for lack of funds.

There is wide latitude for every medical school to establish such a department as it wishes. If we study the organization and curriculums of the various medical schools in the country, we marvel at their ability to build diversity into their programs. There is nothing rigid about the committee's bill.

The Academy of General Practice supports this bill. Contrary to what we said erroneously, but honestly, last week, the American Medical Association is not opposed to the bill in general and the provision, according to the telegram that was placed in the RECORD on Friday from Francis L. Land, of the University of Nebraska School of Medicine. So I submit that the objections are not tenable.

General practice has been downgraded. It will take time to reverse this unfortunate downgrading. Not every medical school will wish to establish a department of family medicine. There are only nine schools in America which have set up such schools on their own volition at this time. But we want more than nine schools.

Mr. SPONG. Mr. President, I am pleased to be a cosponsor of S. 3418. This legislation goes to the heart of two of the most pressing health problems facing our Nation.

First, S. 3418 seeks to encourage more physicians to enter family practice. We have heard many experts relate the lack of general practitioners. We have seen pictures in national magazines of signs erected by small towns which have no doctor at all. The testimony we hear and the signs we see indicate that the need for additional family doctors is great, but it is only those persons who are without available medical care who really know how severe the problem is. I believe this legislation will assist these people and will help us meet a national need.

Second, the bill authorizes grants to medical schools and other appropriate institutions for training and research in malnutrition. In 1969, I made a rather extensive study of malnutrition in Virginia. Time and time again, I was told of the need for more research, more knowledge and for more persons trained in nutrition. Subsequent to my study, I introduced legislation which would provide Federal funds for such training and research. I am pleased to note that title II of S. 3418 is similar to proposals which I made and which were also made by Senator JAVITS of New York, a member of the Committee on Labor and Public Welfare.

S. 3418 will, I believe, encourage and enable medical schools and other appropriate institutions to pursue work in the field of malnutrition and will hasten the discovery of new ways and means of

dealing with the often-subtle problems of malnutrition.

I commend the committee for reporting this legislation and thank the able chairman, Senator YARBOROUGH, for his leadership toward meeting these two important health needs.

Mr. HARRIS. Mr. President, enactment of S. 3418 will be a significant step in the efforts of Congress to meet the health crisis facing this Nation. The distinguished senior Senator from Texas (Mr. YARBOROUGH) is to be commended for his outstanding efforts on this legislation and other meaningful legislation designed to see that all Americans receive a decent level of health care.

The importance of having medical schools and hospitals establish departments and programs in the field of family practice and to encourage the training of medical and paramedical personnel in the field of family medicine, which S. 3418 would do, cannot be overestimated.

We are all familiar with statistics showing this country to be falling behind other industrialized countries in the infant mortality rate, the life expectancy of individuals, and in many other categories of health care. These statistics are even more disappointing for the rural areas, for the urban poor, and among the minority groups of this country. It is these people that generally have the most difficulty in obtaining medical care, and it is this bill, designed to train more family practice doctors and make better use of paramedical personnel, that will do much to give these people decent health care.

Recent figures indicated that 412,000 persons in 115 counties did not have access to doctors in those counties. In Oklahoma it is not uncommon to find a rural county having only one doctor per 2,000 to 3,000 persons, and, in fact, two Oklahoma counties at one time had no doctors at all. We know that in some of the poorer areas in New York City the ratio is one doctor per 10,000 people.

Because of the tremendous demand for medical services, and the shortage of doctors that is estimated by some people to approximate 50,000, doctors have been working 50 to 60 hours a week, with many of them seeing 50 patients a day. A rural doctor testified at a recent hearing I conducted in Tulsa, Okla., on the health crisis, as follows:

> We're tired; we're worn out. We work harder; we see our families disintegrate under these circumstances. We see patients day and night and are always interrupted by people's problems. We want you to know that we're working.

We know, as Senator YARBOROUGH has previously stated, that between 1963 and 1967, general practitioners decreased 7.3 percent, while the specialists increased substantially.

The need to emphasize the training of the family practice doctor and paramedical personnel is obvious. However, it is equally obvious that this cannot be accomplished without providing more assistance to our medical schools. Business Week of July 25, 1970, reported that:

> Forty-three out of the 107 (medical) schools of the U.S. are drawing federal "distress" funds so they can at least last through the current year.

These schools, many of them being private, depend heavily on endowment income and on federal research grants for faculty salaries. A sluggish economy, along with cuts by the Nixon administration in funds for medical research, have been disastrous for the medical schools.

The responses of the deans of certain medical schools are set forth in the Business Week article. Dean Robbins of Case Western Reserve said.

> As we struggle to meet the growing demand for health care, the resources we have are becoming less.

Dean James of Mount Sinai said:

> If the federal government has a long range, deliberate arrangement to cut medical schools by one-fifth they're on the right track.

While medical schools have filed over $215 million worth of grant applications with the National Institutes of Health, only $114 million have been budgeted for 1971 for this purpose.

I recently met with several faculty members of the University of Oklahoma Medical School and heard convincing arguments for the need to support our medical schools in every way possible.

Therefore, if we expect the medical schools to concentrate on the training of family doctors, we must provide financial support. S. 3418 authorizes $50 million for the fiscal year ending June 30, 1971, $75 million for the fiscal year ending June 30, 1972, and $100 million for each of the next 3 fiscal years.

Better use of existing manpower is also essential. The provision in S. 3418 directing the Secretary of Health, Education, and Welfare to appoint a 12-member advisory council on family medicine could play an important role in better planning for use of existing personnel, as well as for the training of additional personnel.

Mr. President, I believe this bill is an outstanding step for the Senate to take in meeting the health crisis, and I urge its passage.

MORE TRAINING OF FAMILY PHYSICIANS NEEDED

Mr. HATFIELD. Mr. President, I was pleased to join my friend and colleague from Texas as a cosponsor of this bill. I knew of the storage of doctors in Oregon from conversations with many Oregonians—both with members of the medical profession and with residents of Oregon's smaller towns and rural areas, where the shortage of family physicians is greatest. I share the concern of Senator YARBOROUGH, and I echo his sentiments as to the nationwide need for this bill.

I would like to point out a few things about the situation in my home State of Oregon.

The percentage of Oregon doctors that are in general practice has fallen from 44 percent in 1950 to 27 percent in 1969. This is in the face of an improving doctor-population ratio that fell from one physician per 920 people in 1950 to one physician per 805 people in 1969.

Recent statistics from the University of Oregon Medical School show an even lesser degree of general practice among its recent graduates. While 25 percent of all University of Oregon Medical School graduates are in general practice, in the 1960–64 classes, only 18.6 percent are in general practice.

This trend could produce a crisis in providing adequate medical care, especially in smaller towns. We should not let a gap grow between the medical profession and families needing generalized health information and care for a variety of maladies and injuries.

Additional support for this is pointed out by the need for 125 doctors in Oregon today, according to the Oregon Medical Association Placement Service.

Mr. President, I call on my colleagues here today to support this bill, S. 3418. I would presume that the situation in your States echoes that in Oregon.

I ask unanimous consent that a telegram from the Oregon Academy of General Practice, signed by its able president, Dr. Warren B. Thompson of Hood River, appear in the RECORD. The Oregon academy has over 450 members, many of whom are my good friends around Oregon. Also, members of my staff have discussed this bill with the academy's director, Mr. Roscoe Miller of Portland. The Oregon academy supports this bill strongly.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

Telegram

Senator MARK O. HATFIELD,
Senate Office Building,
Washington, D.C.

Oregon Academy of General Practice urges you seek early consideration S. 3418. Oregon like most States, urgently needs more family physicians. S. 3418 will encourage and assist medical schools and other training institutions to plan and develop essential training programs. Oregon medical school now making plans. Needs assistance of S. 3418. Your cosponsorship of bill appreciated. Would you now sponsor its early passage by Senate and in the form reported by Senate Labor and Public Welfare Committee.

WARREN B. THOMPSON, M.D.,
President, Oregon Academy of General Practice.

Mr. HATFIELD. Mr. President, in addition, I believe that this bill serves as a perfect complement to the recent bill I cosponsored with my colleague from California, Mr. MURPHY. That bill, S. 4208, the Family Physician Scholarship and Fellowship Program Act, would provide scholarships to young men and women who agree to practice medicine in areas designated as physician-short areas, or who agree to serve migrant agricultural workers and their families. As you know, this program provides that for each year of the scholarship, 1 year of service would be required by the student in a physician-short area. In addition, intern and residency fellowships would be granted. I bring this to the attention of my colleagues today to commend the senior Senator from California for his leadership in sponsoring this bill, and also to ask that this program to meet one facet of our Nation's health needs be given expeditious treatment by the Committee so that the full Senate can act on it.

Mr. President, I wish to focus for a moment on the reasons behind my support, and I presume the support of many of you here, regarding S. 3418. As has been pointed out previously, the reason for this assistance to our medical schools stems from the dramatic need for more general practitioners in many areas of our country. I mentioned earlier the situation in Oregon.

We also must remember that this shortage of general practitioners works an extra hardship on doctors currently practicing in doctor-short areas. I have many friends in the medical profession in Oregon who serve as general practitioners. Many are overworked because of the doctor shortage, and must treat far more patients than they have time for. Often a general practitioner is the only doctor in an area.

Often, the "family doctor," as many of us knew the GP as we grew up, has his office close to the homes of his patients. He prefers this to the high-rise medical center in a large city.

Mr. President, these comments are intended in no way to cast any aspersions on those talented doctors who achieve great expertise in areas of specialization. Too often, however, public attention is focused on this group, and we fail to recognize the many contributions of general practitioners across the country.

I could list Oregon towns and also list at the same time the numerous general practitioners in those towns who are community leaders in my State. Doctors in other States, I am sure, make similar contributions to the civic, cultural, and governmental affairs of their towns, as do the doctors in Oregon. It is easy to find doctors contributing their time and energies to numerous boards and associations.

I share these thoughts with you today as we discuss the doctor shortage, for we should recognize the many contributions of our general practitioners across the country.

In closing, Mr. President, I repeat how important I believe this legislation to be. We need to do more than talk about our medical manpower shortage; we need to act to meet this need. I urge my colleagues to give this bill their full support.

The ACTING PRESIDENT pro tempore. Do both Senators yield back their time?

Mr. YARBOROUGH. Mr. President, I yield back the remainder of my time.

Mr. JAVITS. Mr. President, I yield back the remainder of my time.

The ACTING PRESIDENT pro tempore. All time on the bill has now been yielded back. The question is on final passage of the bill, S. 3418.

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. BYRD of West Virginia: I announce that the Senator from Nevada (Mr. CANNON), the Senator from Connecticut (Mr. DODD), the Senator from Tennessee (Mr. GORE), the Senator from Indiana (Mr. HARTKE), the Senator from Washington (Mr. JACKSON), the Senator from North Carolina (Mr. JORDAN), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Washington (Mr. MAGNUSON), the Senator from Wyoming (Mr. McGEE), the Senator from New Hampshire (Mr. McINTYRE), the Senator from New Mexico (Mr. MONTOYA), the Senator from Utah (Mr. Moss), the Senator from Rhode Island (Mr. PASTORE), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Missouri (Mr. SYMINGTON), and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

I further announce that, if present and voting, the Senator from Washington (Mr. JACKSON), the Senator from North Carolina (Mr. JORDAN), the Senator from Washington (Mr. MAGNUSON), the Senator from New Hampshire (Mr. McINTYRE), the Senator from Rhode Island (Mr. PASTORE), the Senator from New Jersey (Mr. WILLIAMS), the Senator from West Virginia (Mr. RANDOLPH), and the Senator from New Mexico (Mr. MONTOYA), would each vote "yea."

Mr. GRIFFIN. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Oklahoma (Mr. BELLMON), the Senator from Delaware (Mr. BOGGS), the Senator from Massachusetts (Mr. BROOKE), the Senator from New Hampshire (Mr. COTTON), the Senator from New York (Mr. GOODELL), the Senator from Oregon (Mr. HATFIELD), the Senator from Arizona (Mr. GOLDWATER), the Senator from Idaho (Mr. JORDAN), the Senator from Iowa (Mr. MILLER), the Senator from California (Mr. MURPHY), the Senator from Kansas (Mr. PEARSON), the Senator from Illinois (Mr. PERCY), the Senator from Vermont (Mr. PROUTY), and the Senator from Texas (Mr. TOWER) are necessarily absent.

The Senator from Nebraska (Mr. CURTIS) is absent because of death in his family.

The Senator from Nebraska (Mr. HRUSKA), is absent to attend the funeral of a friend.

The Senator from Maryland (Mr. MATHIAS), is absent on official business.

The Senator from South Dakota (Mr. MUNDT), is absent because of illness.

If present and voting, the Senator from Massachusetts (Mr. BROOKE), the Senators from Nebraska (Mr. CURTIS and Mr. HRUSKA), the Senator from Oregon (Mr. HATFIELD), the Senator from Idaho (Mr. JORDAN), the Senator from Iowa (Mr. MILLER), the Senator from South Dakota (Mr. MUNDT), the Senator from California (Mr. MURPHY), the Senator from Kansas (Mr. PEARSON), the Senator from Illinois (Mr. PERCY), the Senator from Vermont (Mr. PROUTY), and the Senator from Texas (Mr. TOWER), would each vote "yea."

The result was announced—yeas 64, nays 1, as follows:

[No. 293 Leg.]

So the bill, S. 3418, was passed, as follows:

S. 3418

An Act to amend the Public Health Service Act to provide for the making of grants to medical schools and hospitals to assist them in establishing special departments and programs in the field of family practice, and otherwise to encourage and promote the training of medical and paramedical personnel in the field of family medicine, and to alleviate the effects of malnutrition, and to provide for the establishment of a National Information and Resource Center for the Handicapped

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—FAMILY MEDICINE

SEC. 101. Part D of title VII of the Public Health Service Act is amended to read as follows:

"PART D—GRANTS TO PROVIDE PROFESSIONAL AND TECHNICAL TRAINING IN THE FIELD OF FAMILY MEDICINE

"DECLARATION OF PURPOSE

"SEC. 761. It is the purpose of this part to provide for the making of grants to assist—

"(a) public and private nonprofit medical schools—

"(1) to operate, as an integral part of their medical education program, separate and distinct departments devoted to providing teaching and instruction (including continuing education) in all phases of family practice;

"(2) to construct such facilities as may be appropriate to carry out a program of training in the field of family medicine whether as a part of a medical school or as separate outpatient or similar facility;

"(3) to operate, or participate in, special training programs for paramedical personnel in the field of family medicine; and

"(4) to operate, or participate in, special training programs to teach and train medical personnel to head departments of family practice or otherwise teach family practice in medical schools.

"(b) public and private nonprofit hospitals which provide training programs for medical students, interns, or residents—

"(1) to operate, as an integral part of their medical training programs, special professional training programs (including continuing education) in the field of family medicine for medical students, interns, residents, or practicing physicians;

"(2) to construct such facilities as may be appropriate to carry out a program of training in the field of family medicine whether as a part of a hospital or as a separate outpatient or similar facility;

"(3) to provide financial assistance (in the form of scholarships, fellowships, or stipends) to interns, residents, or other medical personnel who are in need thereof, who are participants in a program of such hospital which provides special training (accredited by a recognized body or bodies approved for such purpose by the Commissioner of Education) in the field of family medicine, and who plan to specialize or work in the practice of family medicine; and

"(4) to operate, or participate in, special training programs for paramedical personnel in the field of family medicine.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 762. (a) For the purpose of making grants to carry out the purposes of this part, there are authorized to be appropriated $50,000,000 for the fiscal year ending June 30, 1971, $75,000,000 for the fiscal year ending June 30, 1972, and $100,000,000 for the fiscal year ending June 30, 1973, and for each of the next two succeeding fiscal years.

"(b) Sums appropriated pursuant to subsection (a) for any fiscal year shall remain available for the purpose for which appropriated until the close of the fiscal year which immediately follows such year.

"GRANTS BY SECRETARY

"SEC. 763. (a) From the sums appropriated pursuant to section 762, the Secretary is authorized to make grants, in accordance with the provisions of this part, to carry out the purposes of section 761.

"(b) No grant shall be made under this part unless an application therefor has been submitted to, and approved by, the Secretary. Such application shall be in such form, submitted in such manner, and contain such information, as the Secretary shall have prescribed by regulations which have been promulgated by him and published in the Federal Register not later than six months after the date of enactment of this part.

"(c) Grants under this part shall be in such amounts and subject to such limitations and conditions as the Secretary may determine to be proper to carry out the purposes of this part.

"(d) In the case of any application for a grant any part of which is to be used for major construction or remodeling of any facility, the Secretary shall not approve the part of the grant which is to be so used unless the recipient of such grants enters into appropriate arrangements with the Secretary which will equitably protect the financial interests of the United States in the event such facility ceases to be used for the purpose for which such grant or part thereof was made prior to the expiration of the ten-year period which commences on the date such construction or remodeling is completed.

"(e) Grants made under this part shall be used only for the purpose for which made and may be paid in advance or by way of reimbursement, and in such installments as the Secretary may determine.

"ELIGIBILITY FOR GRANTS

"SEC. 764. (a) In order for any medical school to be eligible for a grant under this part, such school—

"(1) must be a public or other nonprofit school of medicine; and

"(2) must be accredited as a school of medicine by a recognized body or bodies approved for such purpose by the Commissioner of Education, except that the requirement of this clause (2) shall be deemed to be satisfied if, (A) in the case of a school of medicine which by reason of no, or an insufficient, period of operation is not, at the time of application for a grant under this part, eligible for such accreditation, the Commissioner finds, after consultation with the appropriate accreditation body or bodies, that there is reasonable assurance that the school will meet the accreditation standards of such body or bodies prior to the beginning of the academic year following the normal graduation date of students who are in their first year of instruction at such school during the fiscal year in which the Secretary makes a final determination as to approval of the application.

"(b) In order for any hospital to be eligible for a grant under this part, such hospital—

"(1) must be a public or private nonprofit hospital; and

"(2) must conduct or be prepared to conduct in connection with its other activities (whether or not as an affiliate of a school of medicine) one or more programs of medical training for medical students, interns, or residents, which is accredited by a recognized body or bodies, approved for such purpose by the Commissioner of Education.

"APPROVAL OF GRANTS

"SEC. 765. (a) The Secretary, upon the recommendation of the Council, is authorized to make grants under this part upon the determination that—

"(1) the applicant meets the eligibility requirements set forth in section 764;

"(2) the applicant has complied with the requirements of section 763;

"(3) the grant is to be used for one or more of the purposes set forth in section 761;

"(4) it contains such information as the Secretary may require to make the determinations required of him under this section and such assurances as he may find necessary to carry out the purposes of this part;

"(5) it provides for such fiscal control and accounting procedures and reports, and access to the records of the applicant, as the Secretary may require (pursuant to regulations which shall have been promulgated by him and published in the Federal Register) to assure proper disbursement of and accounting for all Federal funds paid to the applicant under this part; and

"(6) the application contains or is supported by adequate assurance that any laborer or mechanic employed by any contractor or subcontractor in the performance of work on the construction of the facility will be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a–276a5). The Secretary of Labor shall have, with respect to the labor standards specified in this paragraph, the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176; 65 Stat. 1267), and section 2 of the Act of June 13, 1934, as amended (40 U.S.C. 276c).

"(b) The Secretary shall not approve any grant to—

"(1) a school of medicine to establish or operate a separate department devoted to the teaching of family medicine unless the Secretary is satisfied that—

"(A) such department is (or will be, when established) of equal standing with the other departments within such school which are devoted to the teaching of other medical specialty disciplines;

"(B) such department will, in terms of the subjects offered and the type and quality of instruction provided, be designed to prepare students thereof to meet the standards established for specialists in the specialty of family practice by a recognized body approved by the Commissioner of Education; or

"(2) a hospital to establish or operate a special program for medical students, interns, or residents in the field of family medicine unless the Secretary is satisfied that such program will, in terms of the type of training provided, be designed to prepare participants therein to meet the standards established for specialists in the field of family medicine by a recognized body approved by the Commissioner of Education.

"(c) The Secretary shall not approve any grant under this part unless the applicant therefor provides assurances satisfactory to the Secretary that funds made available through such grant will be so used as to supplement and, to the extent practical, increase the level of non-Federal funds which would, in the absence of such grant, be made available for the purpose for which such grant is requested.

"PLANNING AND DEVELOPMENTAL GRANTS

"SEC. 766. (a) For the purpose of assisting medical schools and hospitals (referred to in section 761) to plan or develop programs or projects for the purpose of carrying out one or more of the purposes set forth in such section, the Secretary is authorized for any fiscal year (prior to the fiscal year which ends June 30, 1975) to make planning and developmental grants in such amounts and subject to such conditions as the Secretary may determine to be proper to carry out the purposes of this section.

"(b) From the amounts appropriated for any fiscal year (prior to the fiscal year ending June 30, 1975) pursuant to section 762(a), the Secretary may utilize such amounts as he deems necessary (but not in excess of $10,000,000 for any fiscal year) to make the planning and developmental grants authorized by subsection (a).

"ADVISORY COUNCIL ON FAMILY MEDICINE

"SEC. 767. (a) The Secretary shall appoint an Advisory Council on Family Medicine (hereinafter in this section referred to as the 'Council'). The Council shall consist of twelve members, four of whom shall be physicians engaged in the practice of family medicine, four of whom shall be physicians engaged in the teaching of family medicine, and four of whom shall be representatives of the general public. Members of the Council shall be individuals who are not otherwise in the regular full-time employ of the United States.

"(b) Each member of the Council shall hold office for a term of four years, except that any member appointed to fill a vacancy prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term, and except that the terms of office of the members first taking office shall expire, as designated by the Secretary at the time of appointment, three at the end of the first year, three at the end of the second year, three at the end of the third year, and three at the end of the fourth year, after the date of appointment. A member shall not be eligible to serve continuously for more than two terms.

"(c) Members of the Council shall be appointed by the Secretary without regard to the provisions of title 5, United States Code, governing appointments in the competitive service. Members of the Council, while attending meetings or conferences thereof or otherwise serving on business of the Council, shall be entitled to receive compensation at rates fixed by the Secretary, but not exceeding $100 per day, including traveltime, and while so serving away from their homes or regular places of business they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons in Government service employed intermittently.

"(d) The Council shall advise and assist the Secretary in the preparation of regulations for, and as to policy matters arising with respect to, the administration of this title. The Council shall consider all applications for grants under this part and shall

make recommendations to the Secretary with respect to approval of applications for *and of the amounts of* grants under this part.

"DEFINITIONS

"SEC. 768. For purposes of this part—

"(1) the term 'nonprofit' as applied to any hospital or school of medicine, means a school of medicine or hospital which is owned and operated by one or more nonprofit corporations or associations, no part of the net earnings of which inures, or may lawfully inure, to the benefit of any private shareholder or individual;

"(2) the term 'family medicine' means those certain principles and techniques and that certain body of medical, scientific, administrative, and other knowledge and training, which especially equip and prepare a physician to engage in the practice of family medicine;

"(3) the term 'practice of family medicine' and the term 'practice', when used in connection with the term 'family medicine', mean the practice of medicine by a physician (licensed to practice medicine and surgery by the State in which he practices his profession) who specializes in providing to families (and members thereof) comprehensive, continuing, professional care and treatment of the type necessary or appropriate for their general health maintenance; and

"(4) the term 'construction' includes construction of new buildings, acquisition, expansion, remodeling, and alteration of existing buildings, and initial equipment of any such buildings, including architects' fees, but excluding the cost of acquisition of land or offsite improvements."

TITLE II—MALNUTRITION

SEC. 201. Part A of title III of the Public Health Service Act is amended by adding at the end thereof the following new section:

"SEC. 310c. (a) In order to reduce the incidence of malnutrition in the United States, to advance medical knowledge in the causes and effects of malnutrition, and to encourage and facilitate the provision of early detection and effective treatment of malnutrition and the conditions which result therefrom, the Secretary is authorized, out of the funds available for carrying out the purposes of this section, to:

"(1) make grants-in-aid to and enter into contracts with medical schools, appropriate graduate schools, and nursing schools to assist such schools in establishing courses dealing with malnutrition, its causes and effects, means for its early detection, and effective treatment of malnutrition and conditions resulting therefrom;

"(2) make grants-in-aid and enter into contracts with universities, medical schools, hospitals, laboratories and other public or private institutions, and individuals and groups of individuals for research into malnutrition, its causes and effects, means for its detection, and into the effective treatment of malnutrition and conditions resulting therefrom;

"(3) establish special projects designed to provide to students of courses in malnutrition practical training and experience in the field of malnutrition; and

"(4) provide fellowships and otherwise financially assist students to encourage and enable them to pursue studies and engage in activities in poverty areas relating to malnutrition.

"(b) In selecting schools and institutions to carry out the purposes referred to in paragraphs (1) and (2) of subsection (a), priority shall be accorded to those schools and institutions which are located in poverty areas.

"(c) For the purpose of carrying out the provisions of this section, there are hereby authorized to be appropriated $32,000,000 for the fiscal year commencing with the fiscal year ending June 30, 1971, and for each of the next four fiscal years thereafter."

TITLE III—NATIONAL INFORMATION AND RESOURCE CENTER FOR THE HANDICAPPED

SEC. 301. (a) (1) There is hereby established, within the Department of Health, Education, and Welfare, a National Information and Resource Center for the Handicapped (hereinafter referred to as the "Center").

(2) The Center shall have a Director and such other personnel as may be necessary to enable the Center to carry out its duties and functions under this section.

(b) (1) It shall be the duty and function of the Center to collect, review, organize, publish, and disseminate (through publications, conferences, workshops or technical consultation) information and data related to the particular problems caused by handicapping conditions including information describing measures which are or may be employed for meeting or overcoming such problems with a view to assisting individuals who are handicapped and organizations and persons interested in the welfare of the handicapped, in meeting problems which are peculiar to, or are made more difficult for, individuals who are handicapped.

(2) The information and data with respect to which the Center shall carry out its duties and functions under paragraph (1) shall include (but not be limited to) information and data with respect to the following—

(A) medical and rehabilitation facilities and services;

(B) day care and other programs for young children;

(C) education;

(D) vocational training;

(E) employment;

(F) transportation;

(G) architecture and housing (including household appliances and equipment);

(H) recreation; and

(I) public or private programs established for, or which may be used in, solving problems of the handicapped.

(c) (1) The Secretary shall make available to the Center all information and data, within the Department of Health, Education, and Welfare, which may be useful in carrying out the duties and functions of the Center.

(2) Each other Department or agency of the Federal Government is authorized to make available to the Secretary, for use by the Center, any information or data which the Secretary may request for such use.

(3) The Secretary of Health, Education, and Welfare shall to the maximum extent feasible enter into arrangements whereby State and other public and private agencies and institutions having information or data which is useful to the Center in carrying out its duties and functions will make such information and data available for use by the Center.

(d) There is authorized to be appropriated for carrying out the purposes of this section for the fiscal year ending June 30, 1971, the sum of $300,000, and for each fiscal year thereafter such sums as may be necessary.

The title was amended so as to read: "A bill to amend the Public Health Service Act to provide for the making of grants to medical schools and hospitals to assist them in establishing special departments and programs in the field of family practice, and otherwise to encourage and promote the training of medical and paramedical personnel in the field of family medicine, and to alleviate the effects of malnutrition, and to provide for the establishment of a National Information and Resource Center for the Handicapped."

Mr. YARBOROUGH. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. JAVITS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Berry, one of its reading clerks, announced that the House had passed the bill (S. 2808) to authorize the Secretary of the Interior to construct, operate, and maintain the Minot extension of the Garrison diversion unit of the Missouri River Basin project in North Dakota, and for other purposes, with an amendment, in which it requested the concurrence of the Senate.

ENROLLED BILL SIGNED

The message also announced that the Speaker has affixed his signature to the enrolled bill (H.R. 16539) to amend the National Aeronautics and Space Act of 1958 to provide that the Secretary of Transportation shall be a member of the National Aeronautics and Space Council, and it was signed by the Acting President pro tempore (Mr. METCALF).

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that all committees be authorized to meet during the session of the Senate today.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ADJUSTMENT OF GOVERNMENT CONTRIBUTION WITH RESPECT TO HEALTH BENEFITS COVERAGE OF FEDERAL EMPLOYEES AND ANNUITANTS

Mr. BURDICK. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on H.R. 16968.

The ACTING PRESIDENT pro tempore laid before the Senate the amendment of the House of Representatives to the amendments of the Senate to the bill (H.R. 16968) to provide for the adjustment of the Government contribution with respect to the health benefits coverage of Federal employees and annuitants, and for other purposes, which was in lieu of the matter proposed, insert the following:

That (a) section 8906(a) of title 5, United States Code, is amended to read as follows:

"(a) Except as provided by subsection (b) of this section, the biweekly Government contribution for health benefits for employees or annuitants enrolled in health benefits plans under this chapter shall be adjusted, beginning on the first day of the first pay period of each year, to an amount equal to 40 percent of the average of the subscription charges in effect on the begin-

ning date of the adjustment, with respect to self alone or self and family enrollments, as applicable, for the highest level of benefits offered by—

"(1) the service benefit plan;

"(2) the indemnity benefit plan;

"(3) the two employee organization plans with the largest number of enrollments, as determined by the Commission; and

"(4) the two comprehensive medical plans with the largest number of enrollments, as determined by the Commission.".

(b) The amendment made by subsection (a) of this section shall become effective at the beginning of the first applicable pay period which commences after December 31, 1970.

SEC. 2. (a) Section 8901(3)(B) of title 5, United States Code, is amended to read as follows:

"(B) a member of a family who receives an immediate annuity as the survivor of an employee or of a retired employee described by subparagraph (A) of this paragraph;".

(b) Section 8901(3)(D)(i) of title 5, United States Code, is amended by striking out ", having completed 5 or more years of service,".

SEC. 3. (a) Section 8701(a)(B) of title 5, United States Code, is amended by inserting "and the Panama Canal Zone" immediately before the semicolon at the end thereof.

(b) Section 8901(1)(ii) of title 5, United States Code, is amended by inserting "and the Panama Canal Zone" immediately before the semicolon at the end thereof.

SEC. 4. (a) The Retired Federal Employees Health Benefits Act (74 Stat. 849; Public Law 86-724) is amended as follows:

(1) Section 2(4) is amended by inserting immediately before the period at the end thereof a comma and the following: "and includes the Social Security Administration for purposes of supplementary medical insurance provided by part B of title XVIII of the Social Security Act";

(2) Sections 4(a) and 6(a) are each amended by adding at the end thereof the following sentence: "The immediately preceding sentence shall not apply with respect to the plan for supplementary medical insurance provided by part B of title XVIII of the Social Security Act"; and

(3) Section 9 is amended by adding at the end thereof the following subsection:

"(f) Notwithstanding any other provision of law, there shall be no recovery of any payments of Government contributions under section 4 or 6 of this Act from any person when, in the judgment of the Commission, such person is without fault and recovery would be contrary to equity and good conscience.".

(b) The amendments made by subsection (a) of this section shall become effective on January 1, 1971.

Resolved, That the House agree to the amendment of the Senate to the title of the bill.

Mr. BURDICK. Mr. President, I move that the Senate concur in the amendment of the House.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the motion of the Senator from North Dakota.

The motion was agreed to.

AUTHORIZATION OF CONSTRUCTION OF SUPPLEMENTAL IRRIGATION FACILITIES, YUMA MESA IRRIGATION DISTRICT, ARIZ.

Mr. BURDICK. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on S. 2882.

The ACTING PRESIDENT pro tempore laid before the Senate the amendment of the House of Representatives to the bill (S. 2882) to amend Public Law 394, 84th Congress, to authorize the construction of supplemental irrigation facilities for the Yuma Mesa Irrigation District, Ariz., which was to strike out all after the enacting clause, and insert:

That section 2 of the Act of January 28, 1956 (70 Stat. 5, Public Law 394, Eighty-fourth Congress), is amended by inserting after the word "buildings" the words "and irrigation works and facilities".

SEC. 2. Section 4 of the Act of January 28, 1956, is amended by changing the period at the end thereof to a comma and adding "but the contract executed on or prior to such date may be amended to include works authorized after such date by amendments to section 2." The Yuma-Mesa division shall be operated in such manner that identifiable return flows of water will not cause the Colorado River stream system to be in violation of water quality standards promulgated pursuant to the Water Quality Act of 1965 (79 Stat. 903).

Mr. BURDICK. Mr. President, I move that the Senate concur in the amendment of the House.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the motion of the Senator from North Dakota.

The motion was agreed to.

NAVAJO INDIAN IRRIGATION PROJECT

Mr. BURDICK. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on S. 203.

The ACTING PRESIDENT pro tempore laid before the Senate the amendment of the House of Representatives to the bill (S. 203) to amend the act of June 13, 1962 (76 Stat. 96), with respect to the Navajo Indian irrigation project, which was to strike out all after the enacting clause, and insert:

That the Act of June 13, 1962 (76 Stat. 96), is amended as follows:

(a) By deleting "and" in the first sentence of section 3(a) immediately preceding "townships 27" and by inserting immediately preceding "New Mexico principal meridian", the following: "townships 26 and 27 north, range 11 west, and townships 24, 25, and 26 north, ranges 12 and 13 west,";

(b) By deleting "$135,000,000 (June 1961 prices)" in the first sentence of section 7 and substituting in lieu thereof "$206,000,000 (April 1970 prices)"; and

(c) By adding the following subsection to 3:

"(d) Each permit that is in effect on lands declared to be held in trust for the Navajo Tribe pursuant to section 3(a) of this Act shall continue in effect for the terms thereof unless the land is needed for irrigation purposes, subject to regulations applicable to permits of Indian lands, and upon its expiration it shall only be renewed on an annual basis until the land is required for irrigation purposes. When, in the judgment of the Secretary of Interior, such land is required for irrigation purposes, the Secretary shall notify the permittee and the permit shall be deemed to be canceled, with no right of appeal. The permittee shall be compensated by the Navajo Tribe for the reasonable value of any range improvements of a permanent nature placed on the lands under authority of a permit or agreement with the United States, as determined by the Secretary of the Interior. Amounts paid to the United States by the Navajo Tribe out of tribal funds for the full appraised value of lands declared to be held in trust for the Navajo Tribe pursuant to section 3(a) of this Act shall be reduced by the amount of compensation paid by the Navajo Tribe to permittees pursuant to this subsection."

SEC. 2. The Navajo Indian irrigation project shall be operated in such manner that identifiable flows of water will not cause the project to be in violation of water quality standards promulgated pursuant to the Water Quality Act of 1965 (79 Stat. 903).

Mr. BURDICK. Mr. President, I move that the Senate concur in the amendment of the House.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the motion of the Senator from North Dakota.

The motion was agreed to.

REAUTHORIZATION OF THE RIVERTON EXTENSION UNIT, MISSOURI RIVER BASIN PROJECT

Mr. BURDICK. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on S. 434.

The ACTING PRESIDENT pro tempore laid before the Senate the amendment of the House of Representatives to the bill (S. 434) to reauthorize the Riverton extension unit, Missouri River Basin project, to include there in the entire Riverton Federal reclamation project, and for other purposes which was to strike out all after the enacting clause, and insert:

That the general plan for the Riverton extension unit, Missouri River Basin project, heretofore authorized under section 9 of the Flood Control Act of 1944 (58 Stat. 887), is modified to include relief to water users, construction, betterment of works, land rehabilitation, water conservation, fish and wildlife conservation and development, flood control, and silt control on the entire Riverton Federal reclamation project. As so modified the general plan is reauthorized under the designation "Riverton unit of the Missouri River Basin project". The Riverton extension unit shall be operated in such manner that identifiable return flows of water will not cause the Wind River to be in violation of water quality standards promulgated pursuant to the Water Quality Act of 1965 (79 Stat. 903).

SEC. 2. (a) The Secretary of the Interior is authorized to negotiate and execute an amendatory repayment contract with the Midvale Irrigation District covering all lands of the Riverton unit. This contract shall replace all existing repayment contracts between the Midvale Irrigation District and the United States.

(b) The period for repayment of the construction and rehabilitation and betterment costs allocated to irrigation and assigned to be repaid by the irrigation water users shall be fifty years from and including the year in which such amendatory repayment contract is executed.

(c) During the period required to construct and test the adequacy of drains and other water conservation works, the rates of charge to land classes and the acreage assessable in each land class in the unit shall continue to be as established in the amendatory repayment contract with the district dated June 26, 1952; thereafter such rates of charge and assessable acreage shall

be in accordance with the amortization capacity and classification of unit lands as determined by the Secretary.

SEC. 3. (a) Construction and rehabilitation and betterment costs of the Riverton unit which the Secretary determines to be assignable to lands classified now or hereafter as permanently unproductive shall be nonreturnable and nonreimbursable: *Provided*, That whenever new lands or lands now or hereafter classified as nonproductive, are classified or reclassified as productive, the repayment obligation of the district shall be increased appropriately.

(b) All miscellaneous net revenues of the Riverton unit shall accrue to the United States and shall be applied against irrigation costs not assigned to be repaid by irrigation water users.

(c) Construction and rehabilitation and betterment costs of the Riverton unit allocated to irrigation and not assigned to be repaid by irrigation water users not returned from miscellaneous net revenues of the unit shall be returnable from net revenues of the Missouri River Basin project within fifty years from and including the year in which the amendatory contract authorized by this Act is executed.

SEC. 4. The limitation of lands held in beneficial ownership within the unit by any one owner, which are eligible to receive project water from, through, or by means of project works, shall be one hundred and sixty acres of class 1 land or the equivalent thereof in other land classes, as determined by the Secretary.

SEC. 5. (a) Lands available for disposition on the Riverton unit, including property acquired pursuant to the Act of March 10, 1964, shall be sold at public or private sale at not less than appraised fair market value at the time of sale. The secretary may dispose of such lands in tracts of any size, so long as no such disposition will result in a total ownership within the unit by any one owner in excess of the limitation prescribed in section 4 above.

(b) In the disposition of lands on the Riverton unit, resident landowners on the unit who have not obtained relief under the Act of March 10, 1964, as amended, shall have a prior right to purchase tracts in order to supplement their existing farms.

SEC. 6. (a) The provision of lands, facilities, and project modifications which furnish fish and wildlife benefits in connection with the Riverton extension unit shall be in accordance with the Federal Water Project Recreation Act (79 Stat. 213).

(b) The interest rate used for purposes of computing interest during construction and interest on the unpaid balance of the capital cost allocated to interest-bearing features of the project shall be determined by the Secretary of the Treasury as of the beginning of the fiscal year in which construction of said interest-bearing features is initiated, on the basis of the computed average interest rate payable by the Treasury upon its outstanding marketable public obligations, which are neither due nor callable for redemption for fifteen years from date of issue.

SEC. 7. Appropriations heretofore or hereafter made for carrying on the functions of the Bureau of Reclamation shall be available for credits, expenses, charges, and cost provided by or incurred under this Act. The Secretary is authorized to make such rules and regulations as are necessary to carry out the provisions of this Act.

SEC. 8. There is hereby authorized to be appropriated for rehabilitation and betterment of the facilities of the first and second divisions of the Riverton unit, for completion of drainage works for said first and second divisions, and for fish and wildlife measures as authorized by this Act, the sum of $12,116,000 (based on July 1969 prices), plus or minus such amounts, if any, as may be justified by reason of ordinary fluctuations in construction cost indexes applicable to the types of construction involved herein. There are also authorized to be appropriated such additional sums as many be required for operation and maintenance of the Riverton unit.

Mr. BURDICK. Mr. President, I move that the Senate concur in the amendment of the House.

The ACTING PRESIDENT Pro tempore. The question is on agreeing to the motion of the Senator from North Dakota.

The motion was agreed to.

AUTHORIZATION OF CONSTRUCTION OF THE MINOT EXTENSION OF THE GARRISON DIVERSION UNIT, N. DAK.

Mr. BURDICK. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on S. 2808.

The ACTING PRESIDENT pro tempore laid before the Senate the amendment of the House of Representatives to the bill (S. 2808) to authorize the Secretary of the Interior to construct, operate, and maintain the Minot extension of the Garrison diversion unit of the Missouri River Basin project in North Dakota, and for other purposes which was to strike out all after the enacting clause and insert:

That the Secretary of the Interior is authorized to construct, operate, and maintain the Minot extension of the Garrison diversion unit in North Dakota under the Federal reclamation laws (Act of June 17, 1902; 32 Stat. 388, and Acts amendatory thereof and supplementary thereto) for the principal purposes of conveying, regulating, and furnishing water made available through facilities of the Garrison diversion unit for use by the city of Minot and other communities for municipal and industrial purposes; conserving and developing fish and wildlife resources; and enhancing outdoor recreation opportunities. The Minot extension to the Garrison diversion unit shall be operated in such manner that identifiable return flows of water will not cause the Souris River to be in violation of water quality standards promulgated pursuant to the Water Quality Act of 1965 (79 Stat. 903).

SEC. 2. The Secretary is authorized to construct appropriate portions of the Minot extension to assist in the interim delivery of water from ground water sources prior to the availability of water through the facilities of the Garrison diversion unit.

SEC. 3. (a) Costs of the project, or any unit or stage thereof, allocated to municipal water supply, shall be repayable, with interest, by the municipal water users over a period of not more than fifty years from the date that water is first delivered for that purpose, pursuant to contracts with municipal corporations or other organizations, as defined in subsection 2(g) of the Reclamation Project Act of 1939 (53 Stat. 1187). Such contracts shall be executed before the commencement of construction of the project. Contracts may be entered into with water users' organizations pursuant to the provisions of this Act without regard to the last sentence of subsection 9(c) of the Reclamation Project Act of 1939 (53 Stat. 1187).

(b) Expenditures for the Minot extension may be made without regard to the soil survey and land classification requirements of the Interior Department Appropriation Act of 1954 (67 Stat. 266).

(c) The interest rate used for computing interest during construction and interest on the unpaid balance of the reimbursable costs of the Minot extension shall be determined by the Secretary of the Treasury, as of the beginning of the fiscal year in which construction on the extension is commenced, on the basis of the computed average interest rate payable by the Treasury upon its outstanding marketable public obligations which are neither due nor callable for redemption for fifteen years from date of issue.

(d) The Secretary is authorized to transfer to a qualified contracting entity or entities the care, operation, and maintenance of the project works, and, if such transfer is made, to credit annually against the contractor's repayment obligation that portion of the year's joint operation and maintenance costs which, if the United States had continued to operate the project, would have been allocated to fish and wildlife and recreation purposes. Prior to assuming care, operation, and maintenance of the project works the contracting entity or entities shall be obligated to operate them in accordance with criteria established by the Secretary of the Interior with respect to fish and wildlife and recreation.

SEC. 4. The conservation and development of fish and wildlife resources and the enhancement of recreation opportunities in connection with the Minot extension shall be in accordance with the provisions of the Federal Water Projects Recreation Act (78 Stat. 213).

SEC. 5. There is authorized to be appropriated for the construction of the Minot extension the sum of $12,900,000 (January 1969 prices), plus or minus such amounts, if any, as may be justified by reason of ordinary fluctuations in construction costs as indicated by engineering cost indexes applicable to the type of construction involved. There are also authorized to be appropriated such additional sums as may be required for the operation and maintenance of the extension.

Mr. BURDICK. Mr. President, I move that the Senate concur in the amendment of the House.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the motion of the Senator from North Dakota.

The motion was agreed to.

THE PLIGHT OF AMERICAN PRISONERS IN NORTH VIETNAM

Mr. BYRD of Virginia. Mr. President, on September 10, the United Press International distributed to its member newspapers an excellent article on the plight of American prisoners in North Vietnam. The story was written by David J. Oestreicher.

This was a revealing and timely account of the inhumane treatment of our prisoners of war.

We must not permit those Americans held captive by Hanoi to become the forgotten men of the war in Vietnam.

The demands of the United States are simple and entirely reasonable. We are asking only that North Vietnam adhere to the Geneva Convention.

Specifically, we ask the immediate release of a list of prisoners, inspection of POW facilities by an impartial body, free flow of communications between the prisoners and their families, repatriation of the sick and wounded, and eventual release of all captives.

I know of nothing more inhumane than the cruel treatment which Hanoi

has given to those Americans it holds prisoner—and to the families of these men who are not even permited to know whether loved ones are alive or dead.

I commend the UPI and Mr. Oestreicher for the excellent account of the tragic situation of American prisoners of war.

I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE AMERICAN POW IN HANOI: HE WAITS AND WAITS

(By David J. Oestreicher)

The plight of American prisoners in North Vietnam is unique in the annals of modern war. Their number is unknown except to their captors, few from the outside world have seen them and their chances of freedom in the foreseeable future are dim.

They have been referred to as "the forgotten men" in the halls of Congress in Washington and as "war criminals" in the Communist capitals of Hanoi, Peking and Moscow.

Some have been in custody for more than six years—longer than any American captured in other wars in which U.S. troops have fought on foreign soil.

They are largely incommunicado. Brief, relatively uninformative letters trickle from time to time out of Hanoi to loved ones in the United States. Relatives write regularly, rarely knowing if their messages are delivered and read.

Defense Secretary Melvin R. Laird says there is "clear evidence that North Vietnam has violated even the most fundamental standards of human decency" in the treatment of the prisoners. There have been first hand reports of cruelty but these have been contradicted in part by some of the handful of outsiders who have visited prison camps in Hanoi.

It is a fact that North Vietnam has refused to publish an official government list of the men it holds in violation of international law.

The situation has changed little since the first American was shot down over North Vietnam in 1964 and captured.

The most graphic account of treatment accorded American POWs comes from Lt. Robert F. Frishman, one of the nine U.S. servicemen released by Hanoi over the years. The release of each has been accompanied by an outpouring of statements proclaiming Hanoi's "goodwill" and humanitarianism."

Frishman, a Navy pilot, was shot down by a Soviet-built antiaircraft missile that struck his jet fighter-bomber over North Vietnam on Oct. 24, 1967. Metal fragments cut through the fuselage and shattered his right arm. North Vietnamese doctors removed his elbow.

"If an elbow had to be removed," Frishman told a news conference two weeks after he was freed in August, 1969, "I guess they did a good job." But after the surgery, Frishman said, his wound was left to fester and his leg, where serum was administered, became infected.

Frishman told a harrowing tale of being trussed with rope before his arm was treated, of being confined in a cubicle 11 feet long and 10 feet wide with brick walls and a tin roof that turned the place into an oven.

Frishman also told about treatment given two fellow captives—Lt. Cmdr. Richard A. Stratton and Lt. Cmdr. John S. McCain III, son of the admiral commanding U.S. forces in the Pacific.

Frishman said Stratton, shortly after his capture, was bound with rope so tightly it burned his skin and produced festering wounds that were unattended. He said captors removed Stratton's fingernails and burned his flesh with cigarets.

McCain, Frishman said, was held in solitary confinement for more than a year despite serious injuries including "many broken bones."

Other information on the treatment of POWs comes from Mrs. Sybil Stockdale of San Diego, Calif., whose husband, Navy Capt. James Bond Stockdale, has been a captive since Sept. 9, 1965.

Mrs. Stockdale, 45-year-old mother of four sons ranging in age from 8 to 19, is the chairman of the board of the National League of Families of American Prisoners and Missing in Southeast Asia, an organization with headquarters in Washington.

"The treatment is extremely cruel," Mrs. Stockdale said, basing her statement on talks with Frishman and others who have been freed. "The men are kept in prolonged solitary confinement. Little or no communications from home are permitted. The diet is inadequate. There is no contact with the outside world. The medical treatment is basic and inadequate. I believe the men are tortured."

Mrs. Stockdale received her first letter from her husband, now 46, on April 15, 1966, more than seven months after he was captured. Since then, she has received 15 other letters, the most recent on July 6.

All are written on a form containing seven lines and each message has been similar, reporting that Stockdale hopes his wife and children are well and that he loves them. He has reported that he has never seen another American since he was shot down.

Mrs. Stockdale, like most of the POW wives, writes her husband every month, filling a typewritten page and addressing the letters to her husband in Hanoi by regular mail.

Mrs. Stockdale has been in the forefront of efforts on behalf of wives and loved ones to obtain information from the North Vietnamese delegation to the Vietnam peace talks in Paris. Her Paris missions have been fruitless to date.

A colony of Navy wives with husbands missing in action has grown up in Virginia Beach, Va., near the Oceana Naval Air Station where many of them were based before Vietnam assignments.

"It's good for us to live close together," said Mrs. William Tschudy, 32, whose husband was shot down in 1965. "When I go home to Michigan in the summer I just can't find anyone to relate to about the problem. Here, everybody understands, and we give each other moral support."

Some wives have heard from their husbands; others, like Mrs. Richard Nelson, 26, have not. Her husband was shot down 2½ years ago. The couple was married two days before he was sent overseas. She has been active in Mrs. Stockdale's organization and has traveled to Paris and elsewhere seeking news of her husband.

In June of this year, a group known as the Committee of Liaison with Families of Servicemen Detained in North Vietnam announced it had obtained from North Vietnam a "complete" list of 334 American prisoners.

The U.S. State Department immediately disputed the list, describing it as incomplete and unacceptable. The committee subsequently added a 335th name to the list.

The list was an outgrowth of a visit to Hanoi by a leader of the committee, Mrs. Cora Weiss, a woman who has been active in the peace movement.

She challenges reports that American POWs are mistreated, basing this on a trip she made to one prisoner camp in Hanoi just before Christmas last year.

Mrs. Weiss described the compound as well-built and said the men appeared to be treated well.

"The life of a prisoner is hardly the life anyone would want to lead anyway," Mrs. Weiss said in a recent interview. She said the climate and food in North Vietnam was a major cause in any discomfort encountered by the Americans.

"What's important is that North Vietnam has kept alive 335 American prisoners at a time when there was a shortage of food, clothing, medicine and shelter," she said. "In order to protect them from our bombs, they had to treat them like their own people."

Responding to Mrs. Weiss' list Mrs. Stockdale says it is not complete and does not include prisoners held by the Communists in South Vietnam and Laos. She says 15 of the men listed by Mrs. Weiss' group have not corresponded with relatives.

The U.S. Department of Defense says it has evidence that the North Vietnamese are holding 376 Americans, that 77 others are in Viet Cong hands in South Vietnam and that three more are prisoners of Communist forces in Laos.

The Pentagon bases its figures on a variety of sources including photos released by Communist News Agencies, interrogation of the nine returnees and examination of letters.

The Pentagon has never issued a list. A spokesman said recently that in the past six months there had been a "significant" increase in the flow of mail from POWs in North Vietnam but that the total was still far short of the limit permitted by the Geneva Convention.

The president of the International Red Cross, Marcel Naville, lashed out at both North Vietnam and South Vietnam in a recent statement for their position on Red Cross inspection of prison camps.

"It is profoundly regrettable," Naville said, "That South Vietnam grants prisoner-of-war status to only a small part of its detainees, and authorizes Red Cross delegates only with many restrictions to make visits to a large proportion of its other detainees.

"It is also deplorable that North Vietnam refuses to allow the international committee of the Red Cross to intervene at all in favor of prisoners, whom they detain without even consenting to give a list of their names."

American efforts to bring world pressure on Hanoi with regard to the POW issue was intensified last month by the global mission of Frank Borman, a former astronaut who traveled to Moscow, Paris, Geneva, Rome, New Delhi, Saigon and several other cities, seeking contracts and help for the prisoners.

"We had a lot of sympathy along the way," he said. But Borman added that he was not optimistic for any serious talks with the Communists on freeing American POWS.

"Some of them have been incarcerated for six years now, longer than any other prisoner in American history," Borman said. "I went through a prisoner of war camp in Laos where I saw North Vietnamese prisoners who've been there for six years. I think it's time we started making movement on this."

In Washington, Mrs. Stockdale sounded a similar theme and said she feared for the lives of her husband and others in Communist hands.

"Time is running out," she said.

ESTABLISHMENT OF FEDERALLY CHARTERED CORPORATION TO PROTECT SECURITIES INVESTORS

Mr. JAVITS. Mr. President, tomorrow before the Committee on Banking and Currency there will come a bill to establish a federally chartered corporation to protect securities investors against losses

arising out of financially distressed brokerage establishments.

This is one of the most important pieces of legislation Congress can pass to help the economic situation of this country and avert the grave dangers with respect thereto.

The board of governors of the New York Stock Exchange passed a resolution last week affirming this fact and the fact that this legislation is vital to the securities industry and the investors who use its facilities.

Mr. President, the New York Stock Exchange is probably the major element in the industry task force which has been working in this direction.

I pay tribute to the Senator from Maine (Mr. MUSKIE) who has piloted this legislation.

I ask unanimous consent that the resolution of the board of governors of the New York Stock Exchange be printed in the RECORD, as well as a list of the members.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Resolved: Whereas, the Board of Governors of the New York Stock Exchange on June 11, 1970, was advised by the Joint Industry Task Force Committee of a plan for a federally chartered corporation as the basis of a system to protect securities investors against losses arising out of financially distressed brokerage firms which it proposed be submitted to the Congress, and,

Whereas, the Board of Governors at that time voted its unanimous support for the SIPC program, now, therefore,

Be it resolved, that the Board of Governors hereby unanimously reaffirm its support of the Securities Investor Protection Corporation legislation now pending before the Congress and expresses its conviction that this legislation is vital to the securities industry and the investors who use its facilities.

Alternate for Mr. Michel; Otto Low, Goodbody.
Staff assistants representatives of various exchanges.

WE CAN CUT MILITARY SPENDING

Mr. PROXMIRE. Mr. President, in the past few weeks there has been a rash of official statements by highly placed administration officials claiming that not one more dime could be cut from the defense budget.

In a press conference on the 6th of August, Secretary of Defense Melvin Laird had this to say:

The Chairman of the House Appropriations Committee has indicated he believes our budget will be cut by one billion dollars.

I'm going to do everything I can to see that it isn't. I think we have submitted a rock bottom budget this year.

The New York Times carried on the front page for August 26 and headlined a UPI interview with Caspar W. Weinberger, the Deputy Director of Management and Budget,

Nixon Aide Sees Danger In New Defense Cutbacks.

And it quotes him as saying

I don't see a great deal of room with any commensurate degree of safety for a very substantial reduction in the defense budget.

This is the same Mr. Weinberger who only recently said he believed the budget should be in balance every year.

PENTAGON WANTS NO MORE CUTS

However, the latest defense of big military spending has come from Assistant Secretary of Defense for International Security Affairs, Mr. Warren Nutter, in an address before the Western Economic Association's Annual Meeting in Davis, Calif., on August 28.

After a lengthy citation of figures, which might even have been difficult for those at a convention of economists to absorb, Mr. Nutter concluded with this statement:

In brief we have cut defense enough for the present. It is time to look elsewhere for relief from the heavy burden of taxes and for resources better employed in meeting pressing domestic needs.

In this final sentence, he verbalized what we all now know to be true because of the statements of Secretary Laird, Mr. Weinberger, and others, namely:

Those whom you have entrusted with responsibility for the nation's security speak with one voice in sending this message to you.

The word has gone out, loud and clear, "No more defense cuts."

ADMINISTRATION ADAMANTLY OPPOSED TO MILITARY CUTS

That position is crystal clear. This administration is on the record time and time again opposing cuts in the defense budget.

In the process of defending the indefensible, Mr. Nutter and others have used some very specious arguments. While I do not intend to rebut his remarks line by line, he uses some figures and some comparisons which are highly selective and misleading. Defense officials have been using them time and again, so I believe it is time to point out their method and the misleading character of some of the arguments.

SELECTED STATISTICS

One of the arguments used by Mr. Nutter is that spending by Governments at all levels—Federal, State, and local, has increased far more since mid-1964 than has spending by the Defense Department. There are several comments to make about this.

First of all, why does he not compare the increase in the military budget with the increase in Federal spending? Why does he throw in the increases by State and local governments? The answer is that the biggest rise in both taxes and spending is at the State and local levels to meet the mushrooming needs for roads, police, urban transit, sewers, water, schools, and a myriad of other services during this last half decade.

But defense is not a responsibility of State and local governments. A more proper comparison is to compare the increase in defense spending with the increase in Federal spending as a whole. It is only by throwing in the tremendous increase in State and local spending that Mr. Nutter makes his case.

INCREASES ATTRIBUTED TO NONDEFENSE SPENDING CAUSED BY DEFENSE OUTLAYS

Second, some of the major items in Federal spending which have grown at a very fast pace and have outstripped the percentage increase in defense spending, are in fact themselves due in large part to the increase in defense spending and the war in Vietnam.

INCREASE IN INTEREST PAYMENTS CAUSED BY DEFENSE INDUCED INFLATION

For example. Since fiscal year 1964, interest on the national debt has increased from $9.8 billion to at least $17.8 billion, or almost a doubling. Interest on the national debt is about twice what it was in 1964. But that increase was due primarily to two war associated matters. First there were the huge deficits in fiscal years 1967 and 1968—deficits of $8.7 and $25.1 billion respectively. Second, there were the higher interest charges induced by the huge deficits and the ensuing inflation, caused largely by the Vietnam war.

INCREASE IN VETERANS' COSTS DUE TO VIETNAM WAR

For example. Veterans' benefits and services have risen from $5.6 billion in fiscal year 1964 to $8.5 billion in fiscal year 1971. That increase, too, is almost a direct consequence of the war and of the increase in defense spending for the war.

Thus, when Mr. Nutter claims that defense spending has not risen as fast as other spending in the Federal Government, he leaves out of the calculation some very important increases. He can only make his claim by attributing some of the fastest growing, most costly increases in Federal expenditures to "nondefense" activities when they are, in fact, due almost directly to defense outlays. Interest on the debt and veterans payments are only two such examples.

But they make Mr. Nutter's argument specious.

DEFENSE SPENDING AS A PERCENT OF GNP

Another argument which is constantly used by the Pentagon supporters of a bigger defense budget, is that Defense spending is now a smaller percentage of the gross national product than it has been recently.

The answer to that argument is "so what?" When did we have to spend any fixed amount or fixed percentage of our gross national product on defense? Defense spending should be calculated on the basis of our defense needs as they are related to other needs. In recent times the military has been getting more and more dollars. They have been surfeited with excesses as every independent study of defense spending has shown.

There was a $30 billion rise in defense spending from 1964 to 1969. Most of that was due to Vietnam spending. Now

that Vietnam spending is being cut, and should be cut, the military has no continued claim on either the absolute dollar increases they received or the percentage of GNP which the high level of Vietnam spending represented.

WHY NOT USE HISTORICAL PERCENT OF GNP?

If the Defense Department wants to use the percentage of GNP as an argument, perhaps someone will turn back the clock and argue that the present 7 percent of GNP spent on the military is far too high because in the 1930's or, historically, we have not spent that large a percentage on defense except in periods when we were fighting an all-out war.

MISLEADING ARGUMENT

The "defense spending as a percentage of GNP" argument is a double-edged sword. I urge the Pentagon to stop using it, for it is misleading, specious, and says nothing at all about what we need, what we should really spend, nor how efficiently we are spending.

Let me examine just one more specific figure before making a more general criticism of Mr. Nutter's and other Defense Department officials' line that we cannot and should not cut another dime from military spending.

MISUSE OF TROOP CUTBACK STATISTICS

In attempting to prove how much had been cut from the military budget and what a good job they are doing, Mr. Nutter cited the following example:

> The cutbacks may stand out more sharply when put in terms of people and things. Our military forces numbered 3.5 million in mid-1968 and will number 2.9 million in mid-1971, a decline of 639 thousand.

Those facts are correct. But it is also true that before the Vietnam buildup we had only 2.5 million men and women in our military forces. Even with the cut backs we still have 400,000 more men in the military than we had when Vietnam began.

We should cut back those 400,000 and return to a 2.5 million man level. I am told on good authority that that is the program. At $10,000 per person per year, which is what it costs to feed, clothe, and train one military person for a year, that would bring a yearly savings of $4 billion.

Thus, when Mr. Nutter and Mr. Weinberger, and Secretary Laird tell us that the military budget cannot be cut, they are also telling us that they intend either First, to keep a military force which is 400,000 men larger than before Vietnam, or second, to use the savings, from cutbacks in military personnel to a 2.5 million manpower level, for some other military purpose such as additional procurement.

QUESTIONABLE PREMISE—NO WASTE IN PENTAGON

These are just some of the specific examples which refute Mr. Nutter's own argument that we have cut defense spending enough. But fundamentally the position taken by Secretary Laird, Mr. Weinberger, Mr. Nutter, and others, is based on a questionable premise. It assumes that everything at the Defense Department is run efficiently and that there is no room for improvement. It assumes that there is no waste, that no reforms are needed in procurement, that the Department holds no excess supplies or bases, that it has no redundant unnecessary, duplicating weapons systems, that the present force levels will be maintained, that every program it now has should be continued or not cut back, and that every dime cut from defense would be cut from muscle rather than fat.

Those are the assumptions that must be made if it is said that we cannot cut back on defense or that to do so would endanger us in any way.

ROOM FOR IMPROVEMENT

But we should act on a different premise, based on solid fact. It is that vast improvement can be made in the efficiency of the Defense Department, that the Department is presently swollen and bureaucratic, that there are numerous redundant bases and programs, that procurment can be improved, and that fat can be turned into muscle with vast savings to the taxpayers. Much of the case can be made from the statements of those in the Department itself.

THE "MESS" IN PROCUREMENT

Let us pause for a moment and look where future cuts can be made. The first place to cut is in procurement. And here Secretary Packard and the Chairman of the Blue Ribbon Procurement Panel, Mr. Fitzhugh, make the case.

In the middle of August, Secretary Packard made a speech in which he had this to say about Defense procurement:

> We have a real mess on our hands.
>
> We don't need more supervision and more people in the act. We need fewer people.
>
> When we are not in a hurry to get things done right, we over-organize, over-man, overspend, and under accomplish.
>
> Let's face it—the fact is that there has been bad management of many Defense programs in the past. We spend billions of the taxpayers dollars: sometimes we spend it badly. . . . However, most of it has been due to bad management, both in the Department of Defense and in the Defense Industry.

Those are Secretary Packard's words, not mine.

Mr. Fitzhugh told a press conference on the release of his report that—

> Defense Department's policies have contributed to serious cost overruns, schedule slippage, and performance deficiencies.

Who are we to believe? Mr. Packard and Mr. Fitzhugh, who tell us procurement is a mess, that there is bad management, and that we need fewer people, or Mr. Nutter, who tells us we have cut defense enough for the present?

If there is a mess, waste, bad management, and if we need fewer people, why should we not cut the military budget or force some reform on them?

CUT REDUNDANT BASES

There are other places to cut. We have some 429 major and almost 3,000 minor bases scattered in 30 countries throughout the world. Many of them are redundant. Cannot we cut back here?

VIETNAM SAVINGS

The incremental costs of the Vietnam War have been cut from a high of $23 billion to $17 billion at the end of June 1970. We are told that by the end of this fiscal year, we will be spending at the rate of $11 billion. Why should not those additional cuts be reflected in next year's budget? And do we intend to continue to spend at the rate of $11 billion a year indefinitely in Vietnam?

Why should we not look to defense, as well as elsewhere, for relief from the heavy burden of taxation?

SHIFT FROM TWO PLUS WAR STRATEGY

What about the shift from a two-plus war strategy to a one-plus war strategy? We are told that is now our policy. But former Budget Director Charles Schultze tells us, on the basis of his experience at the Budget Bureau, that the one plus war strategy should cost us $14 billion less than is being spent the fiscal year for strategic and general purpose forces.

Why have we not received some of the savings from this shift which the Secretary of Defense tells us is already in effect?

MANPOWER REDUCTIONS

I have already mentioned manpower. But we should be getting a $4 billion reduction in present manpower costs as we reduce the strength of our forces to 2.5 million men.

UNNEEDED WEAPONS

What about specific unneeded weapons systems? There is a program called AWACS, which is a costly defense against a Russian manned bomber attack. It is now in the R. & D. stage, but the military has vast plans for expansion.

But the Russians have no manned intercontinental bombers worthy of the name. They are few in number—something like one quarter as many as we have—and they are years out of date. The danger we face is not from manned bombers but from submarines and missiles. But the military intends to go ahead with an elaborate defense against Russian bombers in any case. Only Congress can stop them. AWACS is a class example of an unneeded weapons system. It is a weapons system in search of a mission.

OTHER AREAS

Other savings could be made as well—in the procurement of food, in the more efficient use of personnel, in lengthening rotation periods outside of combat zones, in reducing the funds for public relations, in cutting back on free trips for visiting dignitaries, and in actually putting a Fly-Before-You-Buy Policy into effect, instead of making it a public relations gimmick. Up until now, that policy has been adopted only on paper.

CONTRADICTORY STATEMENTS AND ACTIONS

The Pentagon is suffering from a bad case of split personality. A statement that no cuts can be made in the military budget, by one spokesman, is contradicted by the statements elsewhere of a different spokesman. Essentially what they are trying to do is to have it both ways. While pretending to cut back hard on military spending, they are insisting on keeping the present budget level intact. Look at these examples.

While Secretary Laird states that he has submitted a "rock bottom budget" and that he is going to do everything

he can to see that it is not cut, his Deputy, Under Secretary Packard, tells us that with regard to military procurement "We have a real mess on our hands," that "We need fewer people," and that at the Pentagon "* * * we overorganize, overman, overspend, and underaccomplish."

While Mr. Weinberger over at the White House tells us that there is no room for a substantial reduction in the military budget, he also insists that the Government's budget must always be in balance. Thus, while Government sources leak the fact that we may face a $10 to $15 billion deficit next year—a deficit Mr. Weinberger insists we must never allow—he simultaneously tells us we can make no substantial cuts in the military budget—the only place where sufficient cuts can be made both to stop inflation and to bring the budget more closely in balance.

While Assistant Secretary of Defense Warren Nutter states that defense has been cut enough and that we should look elsewhere for cuts, the Defense Department announces that active military forces will be reduced by at least another 400,000 men, which in itself should bring a $4-billion reduction in military costs.

While we are told that "those whom you have entrusted with responsibility for the Nation's security speak with one voice" in resisting additional military cuts, the Pentagon reveals that the incremental Vietnam costs at the end of June 1971, will be $11 billion or $6 billion less than the incremental costs of the Vietnam war at the end of June 1970. If the Pentagon is cutting our troop strength by 400,000 men, cutting Vietnam war costs by $6 billion, and reforming procurement, why should not the hard-pressed American citizen and taxpaper get some benefit from those reduced costs?

The PRESIDING OFFICER (Mr. EAGLETON). The Senator's time has expired.

Mr. PROXMIRE. I ask unanimous consent to be permitted to proceed for 3 additional minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. How, on the one hand, can they propose these actions but on the other hand tell us the taxpayers will not benefit? The answer is simple. What they save in Vietnam and in troop reductions they intend to spend at the Pentagon for new military gadgets instead of returning the funds to the public.

IMF REPORT URGES TIGHT BUDGET

Not only can the military budget be cut but it is the single most important action we can take in the fight on inflation. And that fight is by no means over. In fact its seriousness was underlined only this week by a report from the International Monetary Fund in advance of its annual meeting in Copenhagen. The report said:

The importance of arresting the U.S. inflationary spiral and restoring price and cost stability can hardly be exaggerated.

The report said:

At stake, are the checking of the inflationary trend on a worldwide basis, the long-run stability and efficiency of the U.S. economy, the much-needed strengthening of the U.S. balance of payments position . . . and the sound functioning of the international monetary system.

The report called on the United States for a "tight budget" as one of the most important methods of combating inflation.

Mr. President, I think we should recognize that these are some of the outstanding economists in the world. They have a perspective that I think we in this country, particularly those of us in Congress and those of us who are advocates, do not have. The International Monetary Fund economists say in their report the United States should have a tight budget. That report and the inflation which still exists in this country are additional reasons why the military budget must be cut.

DEFENSE DEPARTMENT FLEXING ITS MUSCLES

Notwithstanding the need to cut military costs, we will be hearing more and more talk that the military budget cannot be cut. We will be told that the Russians are 10 feet tall, that we are spending smaller amounts of our GNP on defense than before, and that inflation and pay raises have taken every dime we have saved. And the highly efficient defense and industrial lobby will spend vast quantities of money to protect their present funds.

When those arguments are trotted out, we should remind the experts of the $23 billion overrun—imagine that; a $23 billion overrun—on only 38 major weapons systems, of Secretary Packard's statement that procurement is a mess, of the excess bases, and of proposed troop reductions.

Defense is still a mess. The discipline of cuts is the way to bring order out of chaos.

Let us turn a deaf ear to the siren song of those who speak for the Pentagon and their industrial allies. Let us cut back the fat and waste from the present system. To do this will strengthen our defense and add to our security.

Mr. Nutter, your real work is cut out for you.

Mr. President, I yield the floor.

The PRESIDING OFFICER. Pursuant to the previous order, the Senate will now proceed to the transaction of routine morning business, with a time limitation of 3 minutes.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The ACTING PRESIDENT pro tempore (Mr. METCALF) laid before the Senate the following communication and letters, which were referred as indicated:

PROPOSED AMENDMENT TO REQUESTS FOR APPROPRIATIONS FOR FISCAL YEAR 1971 FOR THE DEPARTMENT OF TRANSPORTATION (S. DOC. NO. 91-382)

A communication from the President of the United States, transmitting a proposed amendment to the request for appropriations transmitted in the budget for fiscal year 1971, in the amount of $28,000,000 for the Department of Transportation, Federal Aviation Administration (with an accompanying paper); to the Committee on Appropriations and ordered to be printed.

REPORT OF THE OFFICE OF COAL RESEARCH

A letter from the Secretary of the Interior, transmitting, pursuant to law, the report of the Office of Coal Research for calendar year 1969 (with an accompanying report); to the Committee on Interior and Insular Affairs.

TRANSFER OF LAND FROM THE UNITED STATES TO THE STATE OF NEVADA

A letter from the Secretary of the Interior, transmitting, pursuant to law, for review: (1) application for transfer of lands from the United States to the State of Nevada, pursuant to the Eldorado Valley Act; (2) proposed unit development and acquisition planning report; and proposed contract of sale and conveyancing instrument (with accompanying papers); to the Committee on Interior and Insular Affairs.

REPORT OF THE NATIONAL ADVISORY COMMITTEE ON HANDICAPPED CHILDREN

A letter from the Secretary of Health, Education, and Welfare, transmitting, pursuant to law, the report of the National Advisory Committee on Handicapped Children (with an accompanying report); to the Committee on Labor and Public Welfare.

PETITIONS

Petitions were laid before the Senate and referred as indicated:

By the ACTING PRESIDENT pro tempore (Mr. METCALF):

A resolution adopted by the town of Brookline, Mass., relating to the recent hijacking of planes; to the Committee on Foreign Relations.

A letter, in the nature of a petition, from the United Alien Association, of St. Croix, U.S. Virgin Islands, praying for the enactment of legislation relating to citizenship for certain immigrants; to the Committee on the Judiciary.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. YOUNG of Ohio:

S. 4336. A bill to provide some compensation to the students shot and wounded by Ohio national guard soldiers and to the parents of the students killed on the campus of Kent State University on May 4, 1970; to the Committee on the Judiciary.

(The remarks of Mr. YOUNG of Ohio when he introduced the bill appear below under the appropriate heading.)

By Mr. HOLLAND:

S. 4337. A bill to amend title 28, United States Code, to provide for the establishment of an 11th judicial circuit to be comprised of Florida, Georgia, Alabama, and Mississippi and for the circuit judges constituting the fifth and 11th circuits; to the Committee on the Judiciary.

By Mr. PROXMIRE:

S. 4338. A bill to amend the Department of Transportation Act to provide for a more adequate transportation investment analysis; to the Committee on Commerce.

(The remarks of Mr. PROXMIRE when he introduced the bill appear below under the appropriate heading.)

By Mr. HART:

S. 4339. A bill to regulate interstate commerce by requiring certain insurance as a condition precedent to using the public streets, roads, and highways, and for other purposes; and

S. 4340. A bill to promote the greater availability of motor vehicle insurance in interstate commerce under more efficient and beneficial marketing conditions; to the Committee on Commerce.

S. 4341. A bill to amend the Internal Revenue Code of 1954, and for other purposes; to the Committee on Finance.

(The remarks of Mr. HART when he introduced the bills appear below under the appropriate heading.)

By Mr. McGOVERN:

S. 4342. A bill for the relief of Maria de los Angeles Barahona; to the Committee on the Judiciary.

By Mr. HART:

S. 4343. A bill for the relief of Dimitrios G. Sklias; to the Committee on the Judiciary.

By Mr. CRANSTON (for himself and Mr. MAGNUSON):

S. 4344. A bill to amend the Act of August 24, 1966, relating to the care of animals used for purposes of research, experimentation, exhibition, or held for sale as pets; to the Committee on Commerce.

(The remarks of Mr. CRANSTON when he introduced the bill appear below under the appropriate heading.)

S. 4336—INTRODUCTION OF A BILL TO COMPENSATE THE SURVIVORS OF THE KENT STATE UNIVERSITY TRAGEDY

Mr. YOUNG of Ohio. Mr. President, regarding the tragedy at Kent State University on May 4, 1970, 100 FBI agents, following a most intensive investigation of 2 weeks, and also seven reporters from such newspapers as the Akron Beacon-Journal, the Miami Herald, and the Detroit Free Press, concluded that National Guard officers and men were guilty of the killings and woundings that occurred on the campus. In fact the Vice President of the United States, in California, stated that Ohio National Guard officers were guilty of murder—not murder in the first degree, but murder.

I am today introducing a bill to provide some compensation to the students shot and wounded by Ohio National Guard soldiers, and to the parents of the students killed on the campus of Kent State University on May 4, 1970.

My bill provides that: "The Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the estates of the late Allison Krause of Pittsburgh, Pa.; Sandra Scheuer of Youngstown, Ohio; William Schroeder of Lorain, Ohio; and Jeffrey Miller of Plainview, N.Y., all of whom at the time of death were students at Kent State University," and to 10 students I have named who were wounded by bullets fired by the Ohio National Guard, a total sum of $7 million, to be appropriated in full settlement of all claims made by the parents of those students.

The total sum of $7 million would be in full settlement of the claims they may have against the United States for the wounding, pain, and suffering, and medical and surgical expenses incurred by their parents, and the disability suffered by each of the 10 students. As to those wounded students who have attained the age of 21, their payments would be made to them personally. Payments would be made to the parents or guardians of those students who are minors, not yet having attained their majority.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. YOUNG of Ohio. I ask unanimous consent that I may proceed for 3 additional minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. YOUNG of Ohio. In addition, my bill provides that a panel or board of five be selected and designated by the President of the United States. This panel or board to include two officials of the Office of Attorney General of the United States—Civil Rights Division—and three U.S. district judges of the northern district of Ohio so designated by the President with instructions to study the medical and surgical testimony and other evidence and to direct the distribution of such sum of money equitably and justly in accord with the nature and extent of the injury sustained and permanence of disability arising from injuries received by each of the 10 who were not mortally wounded and that a full and fair distribution be made in settlement of the claims for wrongful death to the estates of those four who did not survive.

The payment and the receipt thereof by any of the injured or by the parents of those injured who are minors and by the administrators of the estates of the four who were killed will not prejudice or affect in any manner the claims for the wrongful deaths and claims for damages for injuries which they have or may have against the State of Ohio, James A. Rhodes, presently Governor of Ohio, or Sylvester Del Corso, adjutant general of Ohio, or any other officials or individual of the Ohio National Guard and is in settlement only of any and all claims against the United States of America.

This bill is introduced today for appropriate reference.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 4336) to provide some compensation to the students shot and wounded by Ohio National Guard soldiers and to the parents of the students killed on the campus of Kent State University on May 4, 1970, introduced by Mr. YOUNG of Ohio, was received, read twice by its title, and referred to the Committee on the Judiciary.

S. 4338—INTRODUCTION OF A BILL TO PROVIDE FOR A MORE ADEQUATE TRANSPORTATION INVESTMENT ANALYSIS

Mr. PROXMIRE. Mr. President, today I am introducing a bill to amend the act which established the Department of Transportation. The purpose of my amendment is, first, to remove the restrictions which hamper the ability of the Department to analyze the value of investment in different modes of transportation and, second, to make clear that it is the responsibility of the Department of Transportation to perform economic analysis of proposed investments and to present the results to Congress in a manner which will assist Congress in making wise decisions concerning the need for Federal aid for different types of transportation.

Four years ago when the legislation establishing the Department of Transportation was originally considered, the investment standards provisions were among the more controversial aspects of the legislation. The legislation as originally proposed was amended so as to exempt many types of transportation investments from section 7 of the law, the section which authorizes the Department to develop standards for the economic evaluation of proposed Federal transportation investments. The major exemptions were water resource projects and grant-in-aid programs. Grant-in-aid programs, of course, encompass the Federal-aid highway program. Once we exempted these programs from the Department's authority to set standards for economic analysis, not much was left for them to analyze.

The authority to set standards for evaluation of water resource projects was given to the Water Resources Council. However, the Council was not left with much discretion for working out evaluation standards, since Congress wrote into law a very specific method for measuring the navigation benefits of water resources projects, a method carefully designed to favor water transport over alternative means.

The Water Resources Council is presently engaged in a major effort to work out improved evaluation procedures for water resource projects. I heartily commend them for this effort, and I welcome the opportunity which has been given to interested Members of Congress to review and comment on the proposed new procedures. However, I am sadly disappointed that more progress has not been made in improving the measurement of the navigation costs and benefits of water resource projects. Of course, I do not blame the Water Resources Council for this, for they are required to follow the unsatisfactory method outlined in the Department of Transportation Act.

The amendment that I am introducing today would remove the language which spells out a specific method of comparing the benefits of water transport to rail transport. It would also give the primary responsibility for evaluating the transportation costs and benefits of water resource projects to the Secretary of Transportation, although the Secretary would remain a member of the Water Resources Council, and he would be required to develop transportation evaluation standards which were compatible with the standards established by the Water Resources Council for nontransportation features of water resource projects.

The legislation originally proposed in 1966 gave this responsibility for transportation features of water resource projects to the Secretary of Transportation. I felt strongly at that time that this was the right place for this responsibility. Indeed, I voted against the act establishing the Department of Transportation because I felt so strongly that Congress had made a mistake in transferring this responsi-

bility to the Water Resources Council and an even greater mistake in writing into the law such specific procedures for evaluating the navigation benefits of water resource projects.

The Department of Transportation has now been in existence for about 3 years, and we have had an opportunity to observe our progress in developing a unified national transportation policy. To date, this progress has been all too limited. I do not see how we can possibly expect to have a sensible national transportation policy unless the Department of Transportation is permitted to compare the benefits of water transportation to land transportation, and to do so within the context of a national transportation system.

That the present measurement of the benefits of water resource projects leaves a great deal to be desired is illustrated by the efforts of the Water Resources Council to test their new guidelines for the evaluation of water resource projects. These new guidelines were tested on 19 different water resource projects by a number of different teams of evaluators. Incidentally, I would like to point out that only three of these 19 projects involved navigation benefits at all, and that no one from the Department of Transportation was on the task force which developed the new guidelines. This would seem to indicate that navigation benefits are only one, and not the major one, of the many concerns of the Water Resource Council. I believe the Water Resource Council would welcome the transfer of the primary responsibility for the measurement of navigation benefits to the Secretary of Transportation.

One of the tests conducted by the Water Resource Council which did involve a transportation benefit was an evaluation of the planned improvements of the Trenton Channel of the Detroit River. The benefits of this project were evaluated independently by a team from Michigan State University and by a Corps of Engineers team. The Michigan State team estimated annual transportation benefits of about $2.6 million. The Corps of Engineers found transportation benefits of $10.8 million, or more than four times as much. On another project, the Columbia River project, the Corps of Engineers estimated transportation benefits of $5.6 million, while a consulting firm employed by area business interests discovered benefits of $11.2 million, exactly twice as much.

So estimates of benefits, made by competent groups of people, can vary by factors of 2 to 1 and 4 to 1, even though all these groups were supposedly staying within the procedures spelled out in the Department of Transportation Act. To me this illustrates how mistaken it is to believe that we can get intelligent and consistent estimates by writing detailed procedures into law. Far better to rely on placing the responsibility with the Department which has responsibility for estimating all our transportation needs and which has no built-in reasons to favor one type of transportation or one region of the country over another.

As I stated earlier, my amendment would also give to the Department of Transportation the authority to set evaluation standards for Federal-aid highway projects. This seems to me essential if we are ever to get any adequate understanding of the proper spot for Federal highway aid among our Federal spending priorities. Even in the few years since the Department of Transportation was established, the misallocation of funds between highways and other forms of transportation has become increasingly evident. The sentiment in Congress and among the public generally to shift funds from highways to more urgent needs is growing stronger daily. How are we to know how our funds can best be spent if the Department of Transportation is prohibited by law from comparing investment in highways with investment in other forms of transportation?

My amendment would not only remove this prohibition but would instruct the Department to present their studies to the Congress in a way which permits "a comparison of the relative public value of investment in alternative modes of transportation." The Department of Transportation has under way an elaborate study of our transportation needs, scheduled to be completed in 1972. But how can this study be of value unless the Department compares all modes of transportation, including, most importantly, the highways in which we invest so many billions of Federal funds?

Of course, studying and evaluating our transportation needs is only a first step. Our ability to allocate funds wisely is further hampered by the existence of the highway trust fund, which makes money available only for highways, no matter how pressing our other needs. Not only must we have better analysis of our transportation needs, but we must have the flexibility to shift funds where they are most needed. I have advocated doing away with the highway trust fund. Many of my colleagues have advocated instead a broadening of the fund so that the money could be put to transportation uses other than highways. The sentiment in Congress to do something about the trust fund is very strong. I intend to continue to press for improved flexibility to allocate funds. If improved flexibility can be accompanied by greater freedom for the Department of Transportation to analyze alternative investment possibilities, I believe major improvements in our national transportation system can be achieved.

I want to make it very clear that my amendment does not in any way weaken the role of Congress in establishing transportation policy. The language which Congress wrote into section 4 of the law reading "nothing in this Act shall be construed to authorize, without appropriate action by Congress, the adoption, revision, or implementation of any transportation policy" remains. This language makes clear that the final authority rests, as it should, with the Congress. My purpose is to insure that Congress has available from the executive branch the best possible analysis of the expenditure propoals on which we in Congress make the final decisions.

I ask unanimous consent that the bill I have introduced be printed in the RECORD.

The PRESIDING OFFICER (Mr. NELSON). The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 4338) to amend the Department of Transportation Act to provide for a more adequate transportation investment analysis, introduced by Mr. PROXMIRE, was received, read twice by its title, referred to the Committee on Commerce, and ordered to be printed in the RECORD, as follows:

S. 4338

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress hereby declares that the Department of Transportation has not yet fulfilled its promise with respect to promoting the efficient and equitable allocation of investment funds among the various modes of transportation; that the Department is handicapped in the performance of this duty by certain restrictive provisions of the Department of Transportation Act; and that it is the sense of Congress that the Department of Transportation should establish improved procedures for conducting economic analysis of the relative public value of investment in different modes of transportation and that to the extent feasible such analysis should take into account the external costs and benefits of proposed investments, including non-monetary costs and benefits, and the probable distribution of the costs and benefits among different groups in the population. It is the purpose of this Act to make clear the authority and responsibility of the Department of Transportation to establish the necessary standards and criteria for the economic evaluation of transportation investments.

SEC. 2. (a). Section 4(b)(2) of the Department of Transportation Act is amended to read as follows:

"(2) Nothing in this Act shall be construed to authorize, without appropriate action by Congress, the adoption, revision, or implementation of any transportation policy."

(b) Section 7(a) of the Department of Transportation Act is amended to read as follows:

"SEC. 7. (a) (1) the Secretary, subject to the provisions of section 4 of this Act, shall develop and from time to time in the light of experience revise standards and criteria consistent with national transportation policies for the formulation and economic evaluation of all proposals for the investment of Federal funds in transportation facilities or equipment, except such proposals as are concerned with (A) the acquisition of transportation facilities or equipment by Federal agencies in providing transportation services for their own use; and (B) programs of foreign assistance. The standards and criteria for economic evaluation of the transportation features of multipurpose water resource projects shall be developed by the Secretary after consultation with the Water Resources Council, of which the Secretary of Transportation shall remain a member, and shall be compatible with the standards and criteria for economic evaluation applicable to nontransportation features of such projects.

"(2) The standards and criteria developed or revised pursuant to this subsection shall be such as to insure that the resulting eco-

nomic evaluation permits to the maximum feasible degree a comparison of the relative public value of investment in alternative modes of transportation.

"(3) The standards and criteria developed or revised pursuant to this subsection shall be promulgated by the Secretary upon their approval by the President."

S. 4339, S. 4340, AND S. 4341—INTRODUCTION OF AUTO INSURANCE REFORM BILLS

Mr. HART. Mr. President, today, I plunge in where perhaps a wiser man would not tread. By introducing the first automobile liability insurance reform bill in Congress, I know I am volunteering as a lightning rod for the criticism that will come from those wedded to the status quo.

Nevertheless, it is clear that the status quo in the auto insurance fault field is not good enough.

Use whatever indicator you like—complaints to governmental agencies, complaints to newspapers, complaints to congressional offices—auto insurance is a major problem to millions of consumers both as policyholders and claimants.

Three years ago, the Senate Antitrust and Monopoly Subcommittee decided to determine both the validity and basis for these complaints. We launched an investigation that took us into the auto insurance fault system's innards.

Touched off by the complaints of cancellation, unavailability, high cost and claims practices, our study meandered through the technicalities of investment income, classifications, loss ratios, reserves, assigned risk plans and the fault-finding process itself.

At the end of it all, only one reasonable solution seemed possible: Reform.

The present insurance system evolved from common law and was designed to protect the assets of the few who could afford the very early cars.

Plastered on a society where there are more cars than households—where even the man with few assets to protect may find owning two cars essential—the old system does not meet the needs. Today, as a study done for DOT pointed out, the problem of auto crashes is a public health problem. "Only diseases of advancing age are more significant causes of death than auto crashes." Further, "only heart disease causes the loss of more man-years of productivity in the country each year."

To my view, the social benefit we seek from insurance today is not protection from the other fellow's losses, but compensation for our own.

The present auto liability insurance-fault system is not giving us that.

Of each dollar, consumers pay into the system for liability protection, only 40 cents goes to compensate accident victims. Of this 40 cents, only 13 cents actually ends up compensating for out-of-pocket losses. Seven cents goes for duplicate recovery and 20 cents for "pain and suffering."

This is the system that about 20 million Americans looked to for compensation from July 1965 to July of this year. It is the system that was to compensate 300,000 families in that period for death of a member.

The total economic loss—including insurance company overhead and all future income loss discounted—during that period was more than $61 billion.

The DOT Economic Consequences of Auto Accident Inquries study gives an idea of how much victims got back of their losses.

Of $5.1 billion of personal and family loss suffered by one-half million serious injury and fatality victims of auto accidents in 1967, the auto insurance fault system provided only $813 million. No-fault auto insurance coverages—medical payments and collision—provided another $248 million.

Thus, there was only 20 percent recovery from auto insurance.

Another study conducted for DOT by the insurance industry itself showed that claimants with a permanent total disability had an average total economic loss of $78,000, yet received an average insurance payment of $12,556—only 16 percent of economic loss.

That uncompensated loss took its toll on the victims. The DOT study—which covered 513,000 victims—showed that 27 percent of those victims—or 136,000—with losses over $5,000 accounted for 85 percent of the total loss.

The families of 37 percent of those 136,000 victims—or 50,300—had to change their way of life. Thirty-two percent—43,500—had to take money from savings or sale of property. Twenty percent—27,200—missed payments. And—9 percent—or 12,200—had to move to cheaper quarters.

Mr. President, if we are to make our insurance system one which truly protects auto accident victims and their dependents from economic catastrophe—if we are to avoid creating new social burdens—if we are to put fairness into the system—we must have the courage to change the system.

What we have now is not—has not been—and cannot be—good enough, or close to it.

Several days ago, as you know, I introduced legislation to cut the cost of auto insurance for protection of property.

Today, I introduce three bills aimed not only at bringing down the premium covering injury to people but at increasing compensation to accident victims. Both objectives are possible through a more fair and efficient allocation of the insurance premium dollar.

There are other benefits in the package—perhaps more psychological than economic.

The most important, to my mind, is the guarantee that any licensed driver—be he young or old, married or divorced, a minister or an oil-rig operator—would get and keep insurance.

During our hearings, insurance companies told us that such personal factors as age, sex, occupation, court and accidents records are valid criteria for identifying individual "bad" drivers or "bad" prospective court witnesses.

A recent study for DOT claims that—

Although such factors could be used to distinguish groups of drivers with significantly different accident rates, they were not reliable in predicting whether or not particular individuals would be involved in accidents.

Statistical tests "applied to random sample of all drivers, could eliminate all but the best drivers but could not identify only the worst."

Unavailability is perhaps the most universal complaint of consumers about auto insurance. In fact, in a study done by the University of Michigan, 14 percent said they either had been canceled, refused renewal, or knew someone who had.

That consumers would complain is understandable.

The insurance market is unusual. Consumers across the Nation—by various types of State laws—are virtually required to buy auto liability insurance. Yet, after guaranteeing the industry a market, we have allowed it to refuse to supply the product.

Under the Uniform Motor Vehicle Insurance Act, this no longer would be possible.

The only grounds for refusing or cancelling a policy would be loss of a driver's license or nonpayment of premium.

To me, those are the only valid reasons.

Unfortunately, in the past, insurance has been refused for reasons far more arbitrary—and in some cases, almost ludicrous.

For example, several companies flagged various occupations as "undesirable." Incredibly, these included law enforcement officers, doctors, lawyers, reporters, editors, and others normally considered the stabilizing elements of society. For many companies, thousands of applicants were either "too young or too old" and were refused.

Further, sections of cities have been blacked out as areas in which no residents could buy that company's auto policies.

In short, the overthink many companies engaged in as they sought out the "good risks" gave the impression that they really wanted to write insurance only for those who were likely never to file a claim.

The result was frustration of the system—with an estimated 20 percent uninsured cars on the road whose drivers offered little hope of compensation to their victims.

Perhaps the second most frequent complaint about insurance is the cost. Well it might be. From 1960 to July 1970, the cost of auto insurance went up 65 percent—compared to 39 percent for auto repairs, 28 percent for tires and 15 percent for gasoline. See tables 6 and 7. That 65 percent insurance hike came as take-home pay for nonsupervisory and factory workers went up only 40 percent.

In dollars, that 65 percent insurance hike means consumers in our 20 most populous cities are paying premiums ranging from $193 in Memphis to $617 in New York City to cover the average car. In San Francisco, the rate is $430;

in Chicago, $352; Detroit, $285, and Washington, D.C. $298.

Those are the base rates—which too many consumers have learned climb with surcharges for 3 years after minor accidents.

Further, those rates are climbing daily. For example, a major insurer recently raised its rates in Michigan by an average of 17.6 percent. That was the average increase. But, reportedly, a high risk driver in Detroit will find himself paying 39 percent more after the price hike.

One of the reasons for the high charges for auto insurance is the built-in expenses of handling each applicant on an individual basis. See chart 1 and table 1. Long ago, we learned that selling accident and health insurance on a group basis—with all members treated the same—cuts the selling price.

But, in about 36 States today the same type of sale of auto insurance as well as other forms of property and liability insurance is prohibited by regulations or law.

One of the bills I introduce today, the Property and Liability Group Insurance Act, would overturn this prohibition and allow group auto insurance.

The other insurance bill would amend the Internal Revenue Code by having group property and liability insurance treated the same as group accident and health insurance. This would encourage group auto insurance sales by allowing employees to get the same tax benefits from employers' contribution to auto plans as they do now with group accident and health plans.

This, I feel, is necessary since the savings of group auto are significant only when the vast majority of employees participate in the plan. Otherwise, the group might contain many drivers who would be surcharged on the open market—forcing the rate for the group too high.

One estimate is that simply converting to a group auto insurance plan—without any employer contributions—could save the average driver 15 percent each year.

Obviously, the savings would be much greater if the employer contributes—as many do with group accident and health.

The nonrefusal provisions and the encouragement of group plans, I suspect, are the aspects of this package which will most easily catch the attention of the public. This is because each person can identify with those situations.

However, the most significant change I propose today is the move away from the "fault" liability system of insurance.

Few consumers realize—until the accident happens—that the present insurance system will pay the bills caused by personal injury and death only if the driver of the car is totally free from blame for the accident. This is so in all but a handful of States which have adopted "comparative negligence" laws. Under these laws the errant driver may receive at least some compensation.

Those of us who are honest with ourselves know how many times in the shortest trips we avoid accidents more through dumb luck than driving skill. As one study pointed out, the driver must make 200 observations and 20 decisions each mile he drives. The potential is so great that it would be natural for even the most careful of drivers to make errors in judgment. In fact, the same study estimated that the average driver does make errors—one per each two miles driven.

The 1970 causation and culpability and deterrence study done for DOT explains that—

> A substantial but largely unmeasurable number of violations and crashes occur which involve generally competent drivers who are suffering temporary lapses from their normal adequate levels.

Yet these errors are the "outs" for the insurance companies under the present system—making it possible that passengers in neither car will be compensated because both drivers may have contributed to the accident.

And deciding who is to be paid—if anyone—becomes a "who shot John" finger-pointing contest which burdens our legal system, ties up our courts and keeps money out of the pockets of victims when they need it.

A study by the Federal Judicial Center points out that motor accident litigation requres 11.4 percent of judge time in Federal district courts and approximately 17 percent of judge time in State courts of general jurisdiction. Impact of motor vehicle accident litigation on the courts varies widely among States. In Iowa County, Iowa, it is 3 percent. In Wayne County, Mich., it is 40 percent.

Chief Justice Burger has warned that we have clogged our courts so much that justice in this country is more myth than reality. He suggests caution in passing new laws which would bring more cases to court.

I share his concern over the clogged courts. But it seems more rational—and fair—to reserve the courts for matters which merit adjudication by freeing them from problems that could be handled better under another system. Furthermore, we could free our doctors for more profitable uses—such as improving emergency accident treatment—rather than sitting in courthouses or otherwise being tied up in the fault-finding process.

The worst part of this clogging of the courts is the delay in payments for victims of accidents. A DOT study showed that victims with losses over $2,500 averaged a 19-month lag before they received any payment.

In Wayne County, the site of Detroit, a claimant must wait 4 years for trial. Unfortunately, rehabilitation expenses do not wait. So the seriously injured person has two choices: go without rehabilitation when it would help or risk bankruptcy to finance it. He faces similar problems with rent, food and clothing costs.

The Uniform Motor Vehicle Insurance Act seeks to overcome these hurdles and to guarantee a "sufficient, fair, and prompt" payment system.

Under the bill, injuries are divided into short and long-term.

Out-of-pocket expenses of injuries generally would be compensated on a first party, no-fault basis—in the manner of hospitalization policies.

The driver's own auto insurance policy would cover the net economic loss due to such injury or death—which is not covered by other sources.

Making the auto policy the "book balancer," as it were, would eliminate the need for consumers to pay the several billion dollars yearly they are now spending for coverage which duplicates what they may have—say in hospitalization plans or sick leave.

The bill provides that the victim would be made economically whole for his entire medical, hospital and rehabilitation costs. Incidental expenses—such as transportation for treatment or in-the-home assistance—also would be covered.

Lost income would be reimbursed—up to $1,000 a month for 30 months. An amount up to $30,000 would be paid for fatalities of wage earners. The death payment seeks to put ready cash in the hands of families who have lost their wage earner. Survivors of nonwage earners and those suffering economic loss in excess of $30,000 may still sue under the tort system.

The time limit on protection of income was set to assure that about 97 percent of all accident victims would be rehabilitated and back at work within its span. The other victims who are injured would have ample time for calm determination of ways of replacing the income lost due to permanent disability.

Those who are permanently disabled—or disfigured—and survivors of fatalities—in other words, the catastrophic injuries—under this bill would still be free to recoup damages over and above economic loss reimbursed by the bill by suing under the tort system. They could sue for all economic loss not reimbursed under the bill as well as for "pain and suffering."

Under the bill, a person committing a felony, using the vehicle with the specific intent of causing injury or without the permission of the owner, would not be compensated for his injuries and would have to reimburse any insurer for damages paid due to an accident.

Drunk drivers, as well as those under the influence of drugs, would be compensated for their injuries but would have to reimburse an insurer for damages paid to others. Alcohol-related accidents caused an estimated 25,000 deaths and 800,000 crashes in the United States each year, according to the DOT 1968 alcohol and highway safety report. Auto manufacturers are working on devices that would make it impossible for a drunk driver to start a car—and the DOT plans on requiring these devices on cars by 1975. This, I think, is the most realistic way to treat the problem of the drunk driver—that is, to prevent him from being on the road.

Payments for economic loss under the "no fault" section of the bill would be made as the loss occurs—eliminating the lengthy waits for settlements.

Pedestrians would be covered by the insurance on the car which hits them.

Because this basic insurance must be sold to any licensed applicant, there would no longer be need for assigned risk plans now in existence.

However, there would be cases where the victim would have no insurance company to turn to for payment—such as with hit and run victims. Therefore, the bill creates an "assigned claims" plan. Insurance companies in each State would share in these plans based on the percentage of business they write in that State. Each would pick up the tab for a percentage of uninsured losses.

The bill also recognizes the realities of the road in making special provisions for truck-car accidents. Because of the disparity of weight between the vehicles, passengers in the autos incur that most severe harm in such accidents.

In 1968, only 16 truck drivers were killed in truck-auto accidents. But, 1,017 auto passengers lost their lives in the same accidents. Truck driver injuries were 1,222—with 12,304 auto passengers injured. Trucks colliding with passenger autos accounted for almost one-half of all moving vehicle accidents involving trucks.

Therefore, the bill provides that the Secretary of Transportation will assign each vehicle larger than a passenger car a percentage of responsibility for net economic loss sustained in a collision with cars.

While the bill, as a general rule, foresees that the auto policy would pick up the economic loss left over after other sources are drawn upon, it does offer the consumer the option of making the auto policy primarily responsible—or the choice of duplicate payment.

This provision is included to increase the consumer's options and to make it possible for him to tailor an insurance package best suited to his needs.

The benefits provided for in the Uniform Motor Vehicle Insurance Act are basic. Consumers may buy any additional coverage they want.

Mr. President, there is one other significant section of the bill which I wish to comment on specifically today. This is the provision for meaningful price information so the consumer may shop intelligently for insurance.

In requiring that insurance companies sell a no-fault policy to any licensed driver who applies to them, we are, of course, leaving it to the company to set a rate which it feels will make that policy profitable.

We also are opening up a whole new world for most consumers—one where they do not take what they can get in auto insurance, but take what they want.

In order to know which company offers the soundest deal, a consumer must know not only the prices for his classification but the claims-paying practices of the company. Therefore, the bill provides that such information be reported to DOT. The Secretary, in turn, will make it available to the public.

Mr. President, my proposal that we reform the insurance system is not meant—and I hope will not be taken—as a criticism of companies now in the business.

As we were told by several of their representatives during our hearings, the industry has been supplying the protection they thought consumers wanted. Many members of the industry are aware that the present system no longer serves the public well—and have been proposing changes. They seem to agree that updating is needed and are willing to change—if they have some guarantee that the public truly wants these changes. I think it is clear that the public does want change. "No-fault" auto insurance is hardly a household word—and the public in general has not been made aware of its potential. Yet, a University of Michigan study showed that 44 percent queried were in favor of claiming damages from their own insurer and foregoing payment for pain and suffering.

But, no one company can turn this system around by itself. Nor, in fact, could many sizable ones working together.

If consumers are to be offered protection more than promises, economy more than inefficiency, then the industry reformers need an assist from government.

These bills are offered as that assist.

They seek to smooth the road, to knock down the barricades, to set fair and uniform rules so each company can offer consumers the most for their money in the best way it knows how.

In short, we would inject a note of competition—beneficial to all auto insurers and consumers—in an industry that has drifted away from this basic free enterprise theory.

If we accomplish that, the consumers and the industry will be better off. Of that, I am positive.

Given the sweep of these objectives, and the complexity of the subject area, I want to be the very first to say that these bills, although reflecting many reworked drafts, can and will be refined as hearings and discussion on them go forward. I invite all who are involved and concerned to join me in the search for the very best answer to a problem shared by all of us.

Because the need is great, I propose that hearings be scheduled on the Uniform Motor Vehicle Insurance Act in the next few weeks.

Mr. President, I ask unanimous consent that the three bills be appropriately referred and the bills and tables and charts accompanying them be printed at this point in the RECORD.

The PRESIDING OFFICER (Mr. SAXBE). The bills will be received and appropriately referred; and, without objection, the bills, charts, and tables will be printed in the RECORD.

The bills, introduced by Mr. HART, were received, read twice by their titles, referred as indicated, and ordered to be printed in the RECORD, as follows:

To the Committee on Commerce:

S. 4339

A bill to regulate interstate commerce by requiring certain insurance as a condition precedent to using the public streets, roads, and highways, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SEC. 1. That this Act may be cited as the "Uniform Motor Vehicle Insurance Act".

DECLARATION OF PURPOSE

SEC. 2. The Congress finds that—

(1) The great number of motor vehicles operated within the channels of interstate commerce upon the public streets, roads and highways of the States;

(2) The substantial amount of injury and death resulting therefrom;

(3) The insufficient, unfair distribution and untimely availability of monies under the present motor vehicle liability insurance system for the adequate rehabilitation and compensation of accident victims;

(4) The absence of uniform and sufficient requirements for—

(A) Insurance among the States as a condition to using the public streets, roads, and highways;

(B) Guaranteeing the continued availability of motor vehicle insurance supplied by private enterprise; and

(C) Meaningful price information to promote rational buying decisions and thus stimulate beneficial competition; and

(5) The failure to promote the general welfare by not recognizing sufficiently the plight of motor vehicle accident victims while promoting the national policy of accelerating the construction of the Federal-Aid Highway Systems;

obstruct the free flow of such commerce by increasing unnecessarily the hazards of travel within such channels and otherwise affecting such commerce.

It is the purpose of this Act to provide for the general welfare by requiring a system of motor vehicle insurance which will be uniform among the States, which will guarantee the continued availability of such insurance and meaningful price information; and which will provide sufficient, fair and prompt payment for rehabilitation and losses due to injury and death arising out of the operation and use of motor vehicles within the channels of interstate commerce, and otherwise affecting such commerce.

DEFINITIONS

SEC. 3. As used in this Act—

(1) The term "motor vehicle" means any vehicle of a kind required to be registered under the National Traffic and Motor Vehicle Safety Act of 1966, as amended.

(2) (A) The term "insured motor vehicle" means a motor vehicle insured under a policy of insurance which meets the requirements of section 5 of this Act.

(2) (B) The term "uninsured motor vehicle" means a motor vehicle with respect to which insurance provided under section 5 of this Act is not applicable at the time of the accident, or with respect to which the insurer nominally providing such insurance denies coverage, or is financially unable to fulfill its obligation.

(3) The term "owner" means a person who holds the legal title to a motor vehicle under the National Traffic and Motor Vehicle Safety Act of 1966, as amended, or in the event a motor vehicle is the subject of a security agreement or lease with option to purchase with the debtor or lessee having the right to possession, then the debtor or lessee shall be deemed the owner for the purpose of this Act.

(4) The term "person" means any individual, partnership, corporation, association, trust, syndicate, or other entity.

(5) "Operation or use of a motor vehicle" includes loading or unloading the vehicle, but does not include conduct within the course of a business of repairing, serving or otherwise maintaining vehicles unless the conduct occurs outside the business premises.

(6) The term "injury" means any bodily

injury, sickness or disease (including death at any time resulting therefrom) arising out of the operation or use of a motor vehicle.

(7) The term "catastrophic harm" means a bodily injury (including death at any time resulting therefrom) which results in a permanent partial or total loss of, or loss of use of, a bodily member, or a bodily function: *Provided, however,* That such permanent partial or total loss, or loss of use, need not affect earnings or earning power. The term "catastrophic harm" includes permanent disfigurement.

(8) The term "economic loss" means in the case of any injury or death:

(A) All expenses reasonably and necessarily incurred for medical, hospital, surgical, professional nursing, dental, ambulance and prosthetic services;

(B) All expenses reasonably and necessarily incurred for physical and occupational therapy and rehabilitation;

(C) The amount which would have been earned during the 30 months immediately following such injury or death but for such injury or death could not be earned: Except, That, in the case of injury, such amount shall not exceed $1,000 a month, and, in the case of death, such amount shall not exceed $30,000;

(D) All other expenses reasonably and necessarily incurred as a result of such injury.

(9) The term "net economic loss" means, in the case of any injury or death "economic loss" reduced (but not below zero) by the amount of:

(A) Taxes which would have been payable on the amount which would have been earned but for such injury or death; and

(B) Any benefit or payment received, or entitled to be received, for losses resulting from such injury or death under any provision of law or any insurance or other source of benefits: Except, benefit or payment received, or entitled to be received—

(i) in discharge of familial obligations of support;

(ii) by way of succession at death;

(iii) as proceeds of life insurance;

(iv) as gratuities, or

(v) as proceeds of any contract, policy of disability, health and accident, or other insurance or other source of benefits containing an explicit provision making its benefits supplemental to those in accordance with the provisions of section 5(a) of this Act, or making the benefits under section 5(a) deductible from the benefits under such contract, policy or other insurance or source.

(I) If any contract, policy of disability, health and accident, or other insurance or other source of benefits does not provide that its benefits shall be supplemental to those under section 5(a) of this Act, or that the benefits under said section 5(a) shall be deducted from its benefits, economic loss shall be reduced by the amount of any benefit or payment received, or entitled to be received, from such contract, policy or other insurance or source.

(10) The term "without regard to fault" means irrespective of fault as a cause of any injury or death, and without application of the principle of liability based on negligence.

(11) The term "Secretary" means the Secretary of Transportation.

(12) The term "State" means each of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, the Canal Zone and American Samoa.

CONDITIONS OF OPERATION: REGISTRATION AND FEES

SEC. 4(a). After the effective date of this section, no person shall register a motor vehicle under the National Traffic and Motor Vehicle Safety Act of 1966, as amended, nor shall any person knowingly operate or use a motor vehicle upon the public streets, roads and highways of any State at any time unless—

(1) Such motor vehicle is insured under a policy of insurance which meets the requirements of section 5 of this Act, pursuant to such rules and regulation (including those determining the manner and term of proof of such insurance) as the Secretary shall lawfully prescribe.

(A) The requirements of this section may be satisfied by any person other than an individual by providing a surety bond, proof of qualifications as a self-insurer, or other securities affording security substantially equivalent to that afforded under section 5 of this Act, as determined and approved by the Secretary.

(b) No State shall require the purchase or acquisition of insurance or any other security as a condition to the operation or use of any motor vehicle upon the public streets, roads and highways of such State.

(c) The provisions of this section shall take effect one year and six months after the date of enactment of this Act.

(d) Any person who knowingly violates the provisions of subsection (a) of this section shall be guilty of a misdemeanor and upon conviction thereof, shall be punished by a fine not to exceed $1,000, or imprisonment for a period of not to exceed one year, or both.

INSURANCE REQUIREMENTS

SEC. 5. In order to meet the requirements of Sec. 4(a) and (b) of this Act, an insurance policy shall provide—

(a) Net economic loss benefits for injuries and death as follows:

(1) Except as otherwise provided in paragraph (3), the insurer shall pay, without regard to fault, to any person, including the owner, operator or user of an insured motor vehicle, an amount equal to the net economic loss sustained by such person arising out of the operation or use of such motor vehicle.

(2) Except as otherwise provided in paragraph (3), the insurer shall pay, without regard to fault, to the legal representative of any person, including the owner, operator or user of an insured motor vehicle, whose death is the result of any injury arising out of the operation or use of such motor vehicle, for the benefit of the surviving spouse and any dependent (as defined in section 152 of the Internal Revenue Code of 1954) of such person, an amount equal to the net economic loss sustained by such spouse and dependent as a result of the death of such person;

(3) No payment shall be made for net economic loss sustained by—

(A) The occupants of another motor vehicle; or

(B) The operator or user of a motor vehicle while committing a felony, or operating or using with the specific intent of causing injury or damage, or operating or using a motor vehicle as a converter without a good faith belief that he is legally entitled to operate or use such vehicle.

(4) The operator or user of an insured motor vehicle shall be liable, without regard to fault, to reimburse the insurer of any motor vehicle for benefits payable to, or on behalf of, any person other than the operator or user described in paragraphs (A) and (B) of section 5(a)(4) for net economic loss arising out of the operation or use of such motor vehicle while—

(A) the operator or user was intoxicated, as defined in the Highway and Motor Vehicle Safety Act of 1966, as amended;

(B) the operator's or user's ability to operate or use such motor vehicle was impaired by the use of narcotic drugs, as defined in section 4731 of the Internal Revenue Code of 1954 (68A Stat. 557), including depressant and stimulant drugs, as defined in subsection (v) of section 201 of the Federal Food, Drug, and Cosmetic Act (79 Stat. 234, as amended);

(C) the operator or user committing or attempting to commit a felony; or

(D) the operator or user was operating or using such motor vehicle—

(i) with the specific intent of causing injury or damage; or

(ii) as a converter without a good faith belief that he was legally entitled to operate or use such vehicle.

(5) Payments for net economic loss shall be made as such loss is incurred except in the case of death: Provided, that amounts of such loss unpaid 30 days after the insurer has received reasonable proof of the fact and amount of loss realized, and demand for payment thereof, shall thereafter bear interest at the rate of 20 percent per annum.

(6) A claim for net economic loss based upon injury or death to a person who is not an occupant of any motor vehicle involved in an accident may be made against the insurer of any involved vehicle: Provided, That the insurer against whom the claim is asserted shall process and pay the claim as if wholly responsible: Provided, however, That such insurer is thereafter entitled to recover from the insurers of all other involved vehicles proportionate contribution for the benefits paid and the costs of processing the claim.

(7) Net economic loss sustained by any occupant, operator or user of a commercial motor vehicle shall be paid by the insurer of such commercial motor vehicle.

(8)(A) When one or more of the motor vehicles involved in an accident is larger than an ordinary passenger automobile, the insurer of the larger vehicle shall be responsible for a percentage of any net economic loss paid to occupants involved in the accident.

(8)(B) The Secretary shall classify, by rules and regulations in conformity with the Administrative Procedure Act, as amended, all motor vehicles larger than ordinary passenger automobiles into reasonable categories, and shall assign to each category a percentage of responsibility for net economic loss sustained by occupants of other vehicles: *Provided,* That such classifications and percentages of responsibility shall be based upon the increased severity of injury, caused by large vehicles in comparison to ordinary passenger automobiles: *Provided further,* That if a larger vehicle is liable for more than 70 percent of the net economic loss, such insurer may control the processing of any claims for such loss and be entitled to obtain contribution from insurers liable for the remainder of the benefits.

(9)(A) No owner, operator or user of an insured motor vehicle shall be liable for economic loss arising out of the operation or use of such vehicle, to any person to whom, or for the benefit of whom, insurance benefits are payable under the provisions of paragraphs (1) and (2) of subsection (a) of this section, or to whom payment is prohibited under the provisions of pargaraph (3) of subsection (a) of this section.

(9)(B) The owner, operator, or user of an insured motor vehicle shall be liable for damages for catastrophic harm, arising out of the negligent operation or use of such vehicle, only to the extent that such damages exceed economic loss.

(b) Optional castrophic harm insurance in excess of economic loss as follows—

(1) At the option of the insured, the insurer shall offer a provision for legal liability for catastrophic harm, arising out of the negligent operation or use of a motor vehicle, to a limit of, at least, $50,000 for any one person, and $300,000 for all persons in any one accident; and, at the option of the insured, the insurer shall offer a provision

undertaking to pay to the insured all sums, not in excess of the limits of liability provided by the insured's liability insurance, which such insured is legally entitled to recover as damages for catastrophic harm arising out of operation or use of an uninsured motor vehicle.

(c) Any such policy of insurance described in this section may contain—

(1) additional coverages and benefits with respect to any injury, death, property damage, or any other loss from motor vehicle accidents;

(2) terms, conditions and exclusions; consistent with the required provisions of such policy and approved by the Secretary, who shall only approve terms, conditions, exclusions, coverages and benefits which are fair and equitable, and which limit the variety of coverages available so as to give buyers of insurance reasonable opportunity to compare the cost of insuring with various insurers.

(d) An application for a policy of insurance described in subsection (a) of this section may not be rejected by an insurer, nor shall such policy of insurance once issued, be canceled or refused renewal, by an insurer except for (1) suspension or revocation of the license of an owner or principal operator to operate a motor vehicle, or (2) failure to pay the premium for such policy after reasonable demand therefor; *Provided*, That, 20 days written notice is given to the insured with respect to paragraphs (1) and (2) of this subsection.

UNIFORM STATISTICAL PLAN AND PRICE INFORMATION

SEC. 6(a). The Secretary shall, after consultation with the insurers and State insurance supervisory authorities, promulgate a common, uniform statistical plan for the allocation and compilation of loss experience data for each coverage under section 5 of this Act, and upon promulgation, such plan shall be followed by every insurer writing policies of insurance which meet the requirements of section 5 of this Act, and by every rating or advisory organization or statistical agent named by any such insurer to gather, compile or report loss experience data.

(b) Such statistical plan shall contain data pertaining to the pure loss experience for the classes of risk within each coverage under section 5 of this Act: Provided, however, That such plan shall not contain data pertaining to loss adjustment expenses, underwriting expenses, general administration expenses or other expense experience for any class of risk within the coverage under section 5 of this Act; Provided, further, That in carrying out the provisions of this section, no insurer, rating or advisory organization, or statistical agent, or any other association of insurers, shall pool, or in any manner combine, any such expenses or expense experience, or otherwise act in concert with respect thereto.

(c) Every insurer writing policies of insurance which meet the requirements of section 5 of this Act, and every rating or advisory organization or statistical agent named by such insurer to gather or compile loss experience data, shall report such data in accordance with the provisions of the statistical plan required by this section at such times and in such manner as the Secretary shall, by rules and regulations lawfully prescribe.

(d) The Secretary may require standard uniform and standard minimal—

(1) policy provisions for the coverages under section 5 of this Act;

(2) classes of risk within each coverage under section 5 of this Act;

to the extent that he deems it necessary to accomplish the purposes of the statistical plan required by this section.

(e) Every insurer writing policies of insurance which meet the requirements of section 5 of this Act, shall provide the Secretary with the actual rate or premium being charged for each class of risk within each coverage under section 5 of this Act at such times and in such manner as the Secretary shall by rules and regulations prescribe.

(f) From time to time, but not less than semi-annually, the Secretary shall analyze and freely and fully make available to the general public, with respect to every insurer writing policies of insurance which meet the requirements of section 5 of this Act, a comparison of such insurer's indicated rate based upon the loss experience data for each class of risk within each coverage with the actual rate or premium being charged by the insurer for such class or risk within such coverage.

ASSIGNED CLAIMS PLAN

Organization and maintenance

SEC. 7. (a) The Secretary shall, after consultation with the insurers and State insurance supervisory authorities, organize an assigned claims bureau and assigned claims plan in each State. Upon organization, each such bureau and plan shall be maintained, subject to regulation by the applicable State insurance supervisory authority, by the insurers authorized to write policies of insurance under section 5 of this Act in such State. In default of the continued maintenance of an assigned claims bureau and assigned claims plan in any State in a manner considered by the Secretary to be consistent with the provisions of this Act, the Secretary shall maintain such bureau and plan.

Costs of operation

(b) The costs incurred in the operation of each assigned claims bureau and assigned claims plan shall be assessed against insurers in each State by the applicable State insurance supervisory authority according to rules and regulations that assure fair allocations among such insurers writing policies of insurance under section 5 of this Act in the State, on a basis reasonably related to the volume of insurance under subsection (a) of section 5 of this Act.

Insurers required to participate

(c) Every insurer writing policies of insurance under section 5 of this Act is required to participate in the assigned claims bureau and assigned claims plan in each and every State in which such insurer is authorized to write such policies of insurance.

Persons entitled to claim through assigned claims plan; Benefits to which entitled

(d) Each person suffering loss because of injury or death arising out of the ownership, operation or use of a motor vehicle may obtain the insurance benefits under subsection (a) of Section 5 of this Act through the assigned claims bureau and assigned claims plan in the State in which such person resides if—

(1) no such insurance benefits are applicable to the injury or death; or

(2) no such insurance benefits applicable to the injury or death can be identified; or

(3) the only identifiable insurance benefits under subsection (a) of section 5 of this Act applicable to the injury or death are, because of financial inability of one or more insurers to fulfill their obligations, inadequate to provide such benefits.

Claims assigned to one insurer or the bureau

(e) A claim or claims arising from injury or death to one person sustained in one accident and brought through the applicable assigned claims plan shall be assigned to one insurer, or to the applicable assigned claims bureau, which after such assignment shall have rights and obligations as if having issued a policy of insurance containing the benefits under subsection (a) of section 5 of this Act.

Principle of assignment

(f) The assignment of claims shall be made according to rules and regulations that assure fair allocation of the burden of assigned claims among insurers doing business in the particular state or a basic reasonably related to the volume of insurance written under subsection (a) of section 5 of this Act.

Notification of bureau by claimant for assignment of his claim

(g) A person or his legal representative claiming through an assigned claims plan shall notify the applicable bureau of his claim within the time that would have been allowed for filing an action for the insurance benefits under subsection (a) of section 5 of this Act had there been in effect identifiable coverage applicable to the claim. The bureau shall promptly assign the claim and notify the claimant of the identity and address of the insurer to which the claim is assigned, or of the bureau if the claim is assigned to it. No action by the claimant against the insurer to which his claim is assigned, or against the bureau, if the claim is assigned to it, shall be commenced later than 60 days after receipt of notice of the assignment or the last date on which the action might have been commenced had it been against the insurer of identifiable coverage applicable to the claim, whichever is later.

Costs of assigned claims plan

(h) All reasonable and necessary costs incurred in the handling and disposition of assigned claims, including amounts paid pursuant to assessments under subsection (b) of this section may be considered in making the regulating rates for the insurance under subsection (a) of section 5 of this Act: Provided, however, That if such costs are considered in the rates or premiums for such insurance, the pure loss portion of such costs shall be reported separately under the uniform statistical plan provided for by section 6 of this Act, and that portion of the actual rate or premium being charged for such insurance attributable to the entire amount of such costs incurred in the handling and disposition of assigned claims shall be reported separately under subsection (e) of section 6 of this Act.

(i) An insurer who makes an assigned claims payment shall be reimbursed, without regard to fault, by the owner of a motor vehicle which was not insured under section 5(a) of this Act at the time of the accident out of which such assigned claim arose.

INSURERS' FRAUDULENT OR ARBITRARY DENIAL OF CLAIMS AND FRAUDULENT OR EXCESSIVE CLAIMS

SEC. 8. (a) Within the discretion of any court, a person making claim under a policy of insurance which meets the requirements of section 5 of this Act may be allowed an award of a reasonable sum for attorney's fee where the insurer's denial of all or part of the claim was fraudulent or so arbitrary as to have no reasonable foundation.

FRAUDULENT OR EXCESSIVE CLAIMS

(b) Within the discretion of any court, an insurer or any person who qualifies as a self-insurer under paragraph (A) of section 4 (a)(1) may be allowed an award of a reasonable sum as attorney's fee for its defense against a person making claim against such insurer or self-insurer where such claim was fraudulent or so excessive as to have no reasonable foundation, and such attorney's fee so awarded may be treated as an offset

against any benefits due or to become due to such person.

ADMINISTRATION

SEC. 9. In order to carry out the provisions of this Act, the Secretary shall—

(a) consult with representatives of State agencies charged with the regulation of the business of insurance, representatives of the private insurance business, and such other persons, organizations, and agencies of the Federal, State, or local governments as he deems necessary; and

(b) lawfully make, promulgate, amend, and repeal such rules and regulations as he deems necessary.

AUTHORIZATION AND APPROPRIATIONS

SEC. 10. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act, including the organization of assigned claims bureaus and assigned claims plans in each State.

SEPARABILITY CLAUSE

SEC. 11. If any provision of this Act is declared unconstitutional, or the applicability thereof to any person or circumstance is held invalid, the constitutionality of the remainder of the Act and the applicability thereof to other persons and circumstances shall not be effected thereby.

EFFECTIVE DATE

SEC. 12. This Act shall become effective one year after the date of enactment.

S. 4340

A bill to promote the greater availability of motor vehicle insurance in interstate commerce under more efficient and beneficial marketing conditions

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Motor Vehicle Group Insurance Act."

DEFINITIONS

SEC. 2. As used in this Act—

(1) The term "insurer" means any enterprise engaged in the business of issuing or reinsuring motor vehicle insurance policies in interstate commerce or engaged in the business of issuing motor vehicle insurance that is reinsured (in whole or in part) in interstate commerce.

(2) The term "group insurance" means any plan of motor vehicle insurance offered or provided to members of a group not organized solely for the purpose of obtaining insurance, under the terms of a master policy or operating agreement between an insurer and the group sponsor, and incorporating group average rating, guaranted issue with or without minimum eligibility requirements, group experience rating, employer contributions, or any other benefit to the members as insureds that they may be unable to obtain in the ordinary channels of insurance marketing on an individual basis. The term "group sponsor" means the employer or other representative entity of an employment based group or the administrative representative of any other type of group.

(3) The term "interstate commerce" means trade or commerce among the several states, or between the District of Columbia or any possession of the United States and any state or other possession, or within the District of Columbia.

(4) The term "state" means any state or possession of the United States, the District of Columbia, and the Commonwealth of Puerto Rico.

(5) The term "Attorney General" means the Attorney General of the United States.

REMOVING RESTRICTIONS ON GROUP INSURANCE

SEC. 3. (a) No state shall—

(1) prohibit, inhibit, restrict or condition, by means of fictitious group statutes or regulations, agency licensing requirements, application of prohibitions of unfair discrimination, eligibility provisions, or otherwise, the issuance and marketing of group insurance; or

(2) penalize or deny authority to an insurer because of its engagement or intention to engage in the marketing and issuance of group insurance.

(b) No state or group of insurers operating voluntarily shall, directly or indirectly, include insureds under a plan of group insurance in the base used in determining assignments to or assessments upon an insurer under an assigned risk plan if such plan of group insurance precludes any individual underwriting by the insurer and if the group is not defined to exclude members characterized as being bad risks, unless the assigned risk plan provides a reasonable system of credit to the insurer for insureds under the group insurance plan who would otherwise be eligible for coverage under the assigned risk plan.

AUTHORIZATION OF PAYMENTS TO TRUST FUNDS

SEC. 5. Section 302(c) of the Labor Management Relations Act, 1947, is amended by inserting immediately before the semicolon at the end of Clause (A) of the proviso to Clause (5) the following: "including group insurance as defined by the Motor Vehicle Group Insurance Act."

ENFORCEMENT

SEC. 6. (a) Whenever it shall appear to the Attorney General that any person is engaged or is about to engage in any Acts or practices that constitute or will constitute a violation of the provisions of this Act, he shall bring an action in the proper district court of the United States to enjoin such acts or practices, and upon a proper showing, a permanent or temporary injunction or restraining order shall be granted.

(b) Nothing in this section shall preclude an insurer or any other person from instituting legal process to enforce their rights under this Act or from using the provisions of this Act as an otherwise valid defense in any relevant legal action brought against them.

JURISDICTION

SEC. 7. The district courts of the United States shall have exclusive jurisdiction of violations of this Act and of all suits brought to enforce it.

To the Committee on Finance:

S. 4341

A bill to amend the Internal Revenue Code of 1954, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Section 104(a)(3) of the Internal Revenue Code of 1954 (68A Stat. 30) is amended to read as follows:

"(3) amounts received through accident or health insurance, or property or liability insurance, for personal injuries or sickness (other than amounts received by an employee, to the extent such amounts (A) are attributable to contributions by the employer which were not includible in the gross income of the employee, (B) are paid by the employer); and"

SEC. 2. (a) The heading of Section 105 (68A Stat. 30) is amended by adding after the word "plans" the language "and property and liability plans."

(b) Section 105(a) (69A Stat. 30) is amended to read as follows:

"(a) Amounts attributable to employer contributions.—Except as otherwise provided in this section, amounts received by an employee through accident or health insurance, or property liability insurance for personal injuries or sickness shall be included in gross income to the extent such amounts (1) are attributable to contributions by the employer which were not includible in the gross income of the employee, or (2) are paid by the employer."

(c) Section 105(e) (68A Stat. 30) is amended to read as follows:

"(e) Accident and Health plans, and Property and Liability Plans.—

For purposes of this section and section 104—

"(1) amounts received under an accident or health plan, or property or liability plan for employees, and

"(2) amounts received from a sickness and disability fund, or property or liability plan for employees maintained under the law of a State, a Territory, or the District of Columbia, shall be treated as amounts received through accident or health insurance, property or liability insurance."

SEC. 3. (a) The heading of Section 106 (68 A Stat. 32) is amended by adding after the word "plans" the language "and property and liability plans."

(b) Section 106 (68A Stat. 32) is amended to read as follows:

"Gross income does not include contributions by the employer to accident or health plans, or property or liability plans for compensation (through insurance or otherwise) to his employees for personal injuries or sickness."

SEC. 4. Section 7701(20) (68A Stat. 911) is amended by adding after the comma which follows the words "accident and health plans" the language "or property or liability insurance or property or liability plans".

SEC. 5. The amendments made by sections 1, 2, 3, and 4 shall become effective on the date of enactment.

The charts and tables, presented by Mr. Hart, are as follows:

CHART 1. *Where each $100 of automobile bodily injury liability insurance premiums goes*

Claimants lawyers fees	$15.90
Litigation costs	1.90
Net benefits to claimants	40.40
Insurance company expenses	27.80
Claim adjusting expenses	14.00
State taxes	3.05
Overhead	5.25
Selling expenses	19.50

S. 4344—INTRODUCTION OF LABORATORY ANIMAL WELFARE ACT AMENDMENTS OF 1970

Mr. CRANSTON. Mr. President, I introduce for appropriate reference, a bill to amend Public Law 89–544, an act of August 24, 1966, relating to the care of animals used for the purposes of research. I am pleased to announce that the distinguished senior Senator from Washington, (Mr. MAGNUSON) has joined as a cosponsor of this bill, which is entitled "Laboratory Animal Welfare Act Amendments of 1970."

The bill I introduce today is similar to two House bills, H.R. 13957 and H.R. 18637. There were hearings on H.R. 13957 on June 8 and 9, 1970. On July 27, 1970, H.R. 18637 was introduced as a working draft reflecting certain changes suggested in hearings and informal discussion. The bill I propose basically follows H.R. 18637 but contains additional changes, which I understand will be considered by the House Subcommittee on Livestock and Grains in its executive session tomorrow. My purpose in introducing this bill is to demonstrate interest and support for the legislation in this body, and to enable the Commerce Committee to commence its deliberative process with the hope of speeding consideration of the House bill when it is sent to this body.

Generally, this bill expands the provisions of the 1966 act to include exhibitors of animals, private or public, including zoos and circuses, and to dealers in the wholesale pet business. The bill elaborates in greater detail the standards to be promulgated and extends coverage to all warm-blooded animals. Research facilities, dealers, and exhibitors are required to maintain records of all dogs, cats, and animals not indigenous to the United States. Licensing of operators of dog and cat auction sales is provided.

The bill continues to exclude actual research and experimentation from the rules and regulations promulgated for animal welfare, although it does require that research facilities annually demonstrate compliance with professionally acceptable standards for animal care.

The bill specifically excludes local retail pet shops as well as State and county fairs, rodeos, and purebred dog and cat shows. Farm animals are not covered, nor are livestock and poultry used in agricultural related research.

There are new enforcement provisions covering penalties for persons who interfere with enforcement officials in the performance of their duties, and covering individuals who fail to obey a Department of Agriculture cease-and-desist order.

Mr. President, the unbelievable brutality we inflict on mammals and birds in the name of commerce, and recreation is a national disgrace. We stuff wild animals into small shipping crates and transport them without water, food, ventilation, or protection from the weather—always shipping too many in

callous deference to the fact that many die in passage. In the name of bringing the happiness of pets into our lives and the lives of our children, we turn God's creations into pieteous and abject creatures of fear and misery whose only recourse is to stare at man in sullen hatred and then to die.

Our roadside zoos demonstrate, not the wonders of nature, but the greed and indifference of man.

We terrorize animals into performing our bidding by inflicting physical pain and suffering with whips, electric shocks, heat, sharp hooks, loud noises—we pull out their teeth and claws—and then we talked euphemistically about trained animals and we applaud at the circus.

And if the poor animal tries to escape from the incredibly hostile environment we create for him, we beat him and often kill him.

Congress made an excellent start in 1966 with the passage of Public Law 89-544 which for the first time created Federal standards for animals destined for research laboratories. Clearly those same standards should be applied to exhibitors and dealers. That is the purpose of this legislation and I hope it will be possible to act favorably on this legislation in this session of Congress.

Mr. President, I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

The PRESIDING OFFICER (Mr. GRAVEL). The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 4344) to amend the act of August 24, 1966, relating to the care of animals used for purposes of research, experimentation, exhibition, or held for sale as pets, introduced by Mr. CRANSTON (for himself and Mr. MAGNUSON), was received, read twice by its title, referred to the Committee on Commerce, and ordered to be printed in the RECORD, as follows:

S. 4344

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Laboratory Animal Welfare Act amendments of 1970."

SEC. 2. That the first 18 sections of the Act entitled "An Act to authorize the Secretary of Agriculture to regulate the transportation, sale, and handling of dogs, cats and certain other animals intended to be used for purposes of research or experimentation, and for other purposes" approved August 24, 1966 (80 Stat. 350; 7 U.S.C. 2131 et seq.), are amended to read as follows:

"That, in order to protect the owners of animals from theft of their animals, to prevent the sale or use of animals which have been stolen, and to insure that certain animals intended for use in research facilities or for exhibition purposes or for use as pets are provided humane care and treatment, it is essential to regulate the transportation, purchase, sale, housing, care, handling, and treatment of such animals by persons or organizations engaged in using them for research or experimental purposes or for exhibition purposes or holding them for sale as pets or in transporting, buying, or selling them for any such purposes or use.

"SEC. 2. When used in this Act—

"(a) the term 'person' includes any individual, partnership, firm, joint stock company, corporation, association, trust, estate, or other legal entity.

"(b) the term 'Secretary' means the Secretary of Agriculture of the United States or his representative.

"(c) the term 'commerce' means trade, traffic, commerce or transportation among the several States, or between any State, territory, possession, or the District of Columbia, or the Commonwealth of Puerto Rico, and any place outside thereof; or between points within the same State, territory, or possession, or the District of Columbia, or the Commonwealth of Puerto Rico, but through any place outside thereof; or within any territory, possession, or the District of Columbia.

"(d) the term 'affecting commerce' means in commerce, or burdening or obstructing or substantially affecting commerce or the free flow of commerce, or having led or tending to lead to the inhumane care of animals used or intended for use for purposes of research, experimentation, exhibition, or held for sale as pets, by burdening or obstructing or substantially affecting commerce or the free flow of commerce.

"(e) the term 'research facility' means any school, institution, organization, or person that uses or intends to use animals in research, tests, or experiments, and that (1) purchases or transports animals affecting commerce, or (2) receives funds under a grant, award, loan, or contract from a department, agent, or instrumentality of the United States for the purposes of carrying out research, tests, or experiments.

"(f) the term 'dealer' means any person who for compensation or profit delivers for transportation, or transports, except as a common carrier, buys, or sells any animals, whether alive or dead, affecting commerce for research or teaching purposes or for exhibition purposes or for use as pets. The term 'dealer' as defined in this Act excludes local retail pet shops.

"(g) the term 'animal' means any live or dead dog, cat, monkey (nonhuman primate), guinea pig, hamster, rabbit, or such other warm-blooded animal, as determined by the Secretary, being used, or intended for use, for research, testing, experimentation, or exhibition purposes, or as pets; but not including livestock or poultry used or intended for use as farm animals for improving animals nutrition, breeding, management or production efficiency, or for improving the quantity or quality of food or fiber.

"(h) the term 'exhibitor' means any person (public or private) exhibiting any animals, which were purchased in commerce or the intended distribution of which animals affects commerce, or will affect commerce, to the public for compensation, as determined by the Secretary, and includes zoos exhibiting such animals whether operated for profit or not. The term 'exhibitor' as defined in this Act, excludes state and county fairs, rodeos, and purebred dog and cat shows.

"SEC. 3. The Secretary shall issue licenses to dealers and exhibitors upon application therefor in such form and manner as he may prescribe and upon payment of such fee established pursuant to section 23 of this Act: *Provided,* That no such license shall be issued until the dealer or exhibitor shall have demonstrated that his facilities comply with the standards promulgated by the Secretary pursuant to section 13 of this Act: *Provided, however,* That any local, retail pet shop or any person who derives less than a substantial portion of his income (as determined by the Secretary) from the breeding and raising of animals on his own premises and sells any such animals shall not be required to obtain a license as a dealer or exhibitor under this Act. The Secretary is further authorized to license, as dealers or exhibitors, persons who do not qualify as dealers or exhibitors within the meaning of this Act if such persons comply with the requirements specified above and agree, in writing, to comply with all the requirements of this Act and the regulations promulgated by the Secretary hereunder.

"SEC. 4. No dealer or exhibitor shall sell or offer to sell or transport or offer for transportation affecting commerce to any research facility or for exhibition or for use as a pet any animal, or buy, sell, offer to buy or sell, transport or offer for transportation affecting commerce to or from another dealer or exhibitor under this Act any animal, unless and until such dealer or exhibitor shall have obtained a license from the Secretary and such license shall not have been suspended or revoked.

"SEC. 5. No dealer or exhibitor shall sell or otherwise dispose of any dog or cat within a period of five business days after the acquisition of such animal or within such other period as may be specified by the Secretary.

"SEC. 6. Every research facility, and every exhibitor not licensed under section 3 of this Act, shall register with the Secretary in accordance with such rules and regulations as he may prescribe.

"SEC. 7. It shall be unlawful for any research facility to purchase any animal from any person except a person holding a valid license as a dealer or exhibitor issued by the Secretary pursuant to this Act unless such person is exempted from obtaining such license under section 3 of this Act.

"SEC. 8. No department, agency, or instrumentality of the United States which uses animals for research or experimentation or exhibition shall purchase or otherwise acquire any animal for such purposes from any person except a person holding a valid license as a dealer or exhibitor issued by the Secretary pursuant to this Act unless such person is exempted from obtaining such license under sections 3 of this Act.

"SEC. 9. When construing or enforcing the provisions of this Act, the act, omission, or failure of any person acting for or employed by a research facility, a dealer, or an exhibitor or a person licensed as a dealer or an exhibitor pursuant to the second sentence of section 3, within the scope of his employment or office, shall be deemed to be the act, omission, or failure of such research facility, dealer, exhibitor, or licensee as well as of such person.

"SEC. 10. Research facilities, dealers, and exhibitors shall make, and retain for such reasonable period of time as the Secretary may prescribe such records with respect to the purchase, sale, transportation, identification, and previous ownership of dogs, cats and animals not indigenous to the United States as the Secretary may prescribe, upon forms supplied by the Secretary. Such records shall be made available at all reasonable times for inspection and copying by the Secretary.

"SEC. 11. All animals included in section 10 of this Act or, in the case of small animals where individual identification is not feasible, as determined by the Secretary, groups of animals delivered for transportation, transported purchased or sold affecting commerce by a dealer or exhibitor shall be marked or identified at such time and in such humane manner as the Secretary may prescribe.

"SEC. 12. The Secretary is authorized to promulgate humane standards and record-keeping requirements governing the purchase, handling, or sale of animals, affecting commerce, by dealers, research facilities, and exhibitors at auction sales. The Secretary is also authorized to require the licensing of operators of auction sales, where dogs and cats are sold affecting commerce, under such conditions as he may prescribe, and upon payment of such fee as prescribed by the Secretary under section 23 of this Act.

"SEC. 13. The Secretary shall promulgate standards to govern the humane handling, care, treatment, and transportation of animals by dealers, research facilities, and exhibitors. Such standards shall include minimum requirements with respect to handling,

housing, feeding, watering, sanitation, ventilation, shelter from extremes of weather and temperatures, adequate veterinary care, including appropriate use of analgesic or transquilizing drugs, and separation by species when the Secretary finds such separation necessary for the humane handling, care, or treatment of animals. In promulgating and enforcing standards established pursuant to this section, the Secretary is authorized and directed to consult experts, including outside consultants where indicated. Nothing in this Act shall be construed as authorizing the Secretary to promulgate rules, regulations, or orders with regard to design, outline, guidelines or performance of actual research or experimentation by a research facility as determined by such research facility: *Provided, however*, That the Secretary shall require, at least annually, every research facility to show that professionally acceptable standards governing the care, treatment, and use of animals, including reference to the use of anesthetic, analgesic, and tranquilizing drugs, during experimentation are being followed by the research facility during actual research or experimentation.

"SEC. 14. Any department, agency, or instrumentality of the United States having laboratory animal facilities shall comply with the standards promulgated by the Secretary for a research facility under section 13. Any department, agency, or instrumentality of the standards promulgated by the Secretary under section 13.

"SEC. 15. (a) The Secretary shall consult and cooperate with other Federal departments, agencies, or instrumentalities concerned with the welfare of animals used for research, experimentation or exhibtion when establishing standards pursuant to section 13 and in carrying out the purposes of this Act.

"(b) The Secretary is authorized to cooperate with the officials of the various States or political subdivisions thereof in carrying out the purposes of this Act and the purposes of any State or local legislation or ordinance on the same subject.

"SEC. 16. (a) The Secretary shall make such investigations or inspections as he deems necessary to determine whether any dealer, exhibitor, research facility, or operator of an auction sale subject to section 12 of this Act, has violated or is violating any provision of this Act or any regulation or standard issued thereunder, and for such purposes, the Secretary shall, at all reasonable times, have access to the places of business and the facilities, animals, and records (as required in section 10 of this Act) of any such dealer, exhibitor, research facility, or operator of an auction sale. The Secretary shall promulgate such rules and regulations as he deems necessay to permit inspectors to confiscate or destroy in a humane manner any animal found to be suffering as a result of a failure to comply with any provision of this Act or any regulation or standard issued thereunder if (1) such animal is held by a dealer, (2) such animal is held by an exhibitor, (3) such animal is held by a research facility and is no longer required by such research facility to carry out the research, test, or experiment for which such animal has been utilized, or (4) such animal is held by an operator of an auction sale.

"(b) Any person who forcibly assaults, resists, opposes, impedes, intimidates, or interferes with any person while engaged in or on account of the performance of his official duties under this Act shall be fined not more than $5,000, or imprisoned not more than three years or both. Whoever, in the commission of such acts, uses a deadly or dangerous weapon shall be fined not more than $10,000, or imprisoned not more than ten years, or both. Whoever kills any person while engaged in or on account of the performance of his official duties under this Act shall be punished as provided under sections 1111 and 1114 of title 18, United States Code.

"(c) For the efficient administration and enforcement of this Act, the provisions (including penalties of sections 6, 8, 9, and 10 of the Act entitled "An Act to create a Federal Trade Commission, to define its powers and duties, and for other purposes," approved September 26, 1914 (38 Stat. 721–723, as amended; 15 U.S.C. 46, 48, 49, and 50) (except paragraphs (c) through (h) of section 6 and the last paragraph of section 9), and the provisions of subsection 409(1) of the Communications Act of 1934 (48 Stat. 1096, as amended; 47 U.S.C. 409(1)), are made applicable to the jurisdiction, powers and duties of the Secretary in administering and enforcing the provisions of this Act and to any person, firm, or corporation with respect to whom such authority is exercised. The Secretary may prosecute any inquiry necessary to his duties under this Act in any part of the United States, including any territory, or possession thereof, the District of Columbia, or the Commonwealth of Puerto Rico. The powers conferred by said sections 9 and 10 of the Act of September 26, 1914, as amended, on the district courts of the United States may be exercised for the purposes of this Act by any district court of the United States. The United States district courts, the District Court of Guam, the District Court of the Virgin Islands, the highest court of American Samoa, and the United States Courts of the other territories, are vested with jurisdiction specifically to enforce, and to prevent and restrain violations of this Act, and shall have jurisdiction in all other kinds of cases arising under this Act, except as provided in sections 19(b) and 20(b) of this Act.

"SEC. 17. The Secretary shall promulgate rules and regulations requiring dealers, exhibitors, research facilities, and operators of auction sales subject to section 12 of this Act, to permit inspection of their animals and records at reasonable hours upon request by legally constituted law-enforcement agencies in search of lost animals.

"SEC. 18. Not later than March of each year following the enactment of this Act, the Secretary shall submit to the President of the Senate and Speaker of the House of Representatives a comprehensive and detailed written report with respect to—

"(1) the identification of all research facilities, exhibitors, and other persons and establishments licensed by the Secretary under section 3 and section 12 of this Act;

"(2) the nature and place of all investigations and inspections conducted by the Secretary under section 16 of this Act, and all reports received by the Secretary under section 13 of this Act; and

"(3) recommendations for legislation to improve the administration of this Act or any provision thereof."

SEC. 3. Section 19 of the Act of August 24, 1966 (7 U.S.C. 2149) is amended to read as follows:

"SEC. 19. (a) If the Secretary has reason to believe that any dealer, exhibitor, or operator of an auction sale subject to section 12 of this Act, has violated or is violating any provisions of this Act, or any of the rules or regulations or standards promulgated by the Secretary hereunder, he may make such order that such person shall cease and desist from continuing such violation, and if such person is licensed under this Act, the Secretary may also suspend such person's license temporarily, but not to exceed twenty-one days, and after notice and opportunity for hearing, may suspend for such additional period as he may specify or revoke such license, if such violation is determined to have occurred. Any dealer, exhibitor, or operator of an auction sale subject to section 12 of this Act, who knowingly fails to obey a cease and desist order made by the Secretary under this section, shall be subject to a civil penalty of $500 for each offense, and each day during which such failure continues, shall be deemed a separate offense.

"(b) Any dealer, exhibitor, or operator of an auction sale aggrieved by a final order of the Secretary issued pursuant to subsection (a) of this section may, within sixty days after entry of such an order, seek review of such order in the United States court of appeals for the circuit in which such person has his principal place of business, or in the United States Court of Appeals for the District of Columbia Circuit, in accordance with the provisions of sections 701–706 of title 5, United States Code. Judicial review of any such order shall be upon the record upon which the final determination and order of the Secretary were based.

"(c) Any dealer, exhibitor, or operator of an auction sale subject to section 12 of this Act, who violates any provision of this Act shall, on conviction thereof, be subject to imprisonment for not more than one year, or a fine of not more than $1,000, or both."

SEC. 4. Subsection (a) of section 20 of the Act of August 24, 1966 (7 U.S.C. 2150(a)) is amended by inserting "or standards" after "regulations" in the place where such word appears.

SEC. 5. Subsection (b) of section 20 of the Act of August 24, 1966 (7 U.S.C. 2150(b)) is amended to read as follows:

"(b) Any research facility aggrieved by a final order of the Secretary, issued pursuant to subsection (a) of this Act, may within sixty days after entry of such order, seek review of such order in the United States court of appeals for the circuit in which such research facility has its principal place of business, or in the United States Court of Appeals for the District of Columbia Circuit, in accordance with the provisions of sections 701–706 of title 5, United States Code. Judicial review of any such order shall be upon the record upon which the final determination and order of the Secretary were based."

SEC. 6. The amendments made by this Act shall take effect one year after the date of enactment of the Act, except that the amendments made by section 2 of this Act to sections 16, 17, 19, and 20 of the Act of August 24, 1966 (7 U.S.C. 2146, 2147, 2149, and 2150), which shall become effective thirty days after enactment of this Act.

ADDITIONAL COSPONSORS OF BILLS

S. 39

Mr. HANSEN. Mr. President, last year I introduced S. 39, a bill to authorize the Secretary of the Interior to sell, under certain circumstances, mineral rights which have been reserved by the Federal Government to the individual who owns the surface rights which were patented under the Stockgrazing Homestead Act.

Mr. President, the Interior Committee has acted on other bills which would provide a sale of the mineral rights in specific cases. Those of us who represent public land States know that these problems often occur and justice and equity often require the transfer of the mineral rights to the surface owner.

It would be much more efficient to provide a general framework to transfer these mineral rights. I believe S. 39 provides the necessary general framework and a system of checks to insure that this power of the Secretary is not abused.

Mr. President, I am proud that three of my colleagues on the Senate Interior Committee have asked to cosponsor S. 39. I ask unanimous consent that, at

the next printing, the Senator from Nevada (Mr. BIBLE), the Senator from Arizona (Mr. FANNIN), and the Senator from Idaho (Mr. CHURCH) be added as cosponsors of the bill.

The PRESIDING OFFICER (Mr. NELSON). Without objection, it is so ordered.

S. 3311

At the request of the Senator from Maryland (Mr. TYDINGS), the Senator from New York (Mr. JAVITS), the Senator from Texas (Mr. YARBOROUGH) were added as cosponsors of S. 3311, the crime insurance bill, to assure the availability of crime insurance at reasonable rates to homeowners and shopkeepers.

S. 3785

Mr. FANNIN. Mr. President, on behalf of the Senator from Colorado (Mr. DOMINICK), I ask unanimous consent that, at the next printing, the name of the Senator from Illinois (Mr. SMITH), be added as a cosponsor of S. 3785, to amend title 38, United States Code, to authorize educational assistance and home loan benefits to wives of members of the Armed Forces who are missing in action or prisoners of war.

The PRESIDING OFFICER (Mr. NELSON). Without obligation, it is so ordered.

S. 3795

Mr. FANNIN. Mr. President, on behalf of the Senator from Colorado (Mr. DOMINICK), I ask unanimous consent that, at the next printing, the name of the Senator from Illinois (Mr. SMITH) be added as a cosponsor of S. 3795, to amend the Soldiers' and Sailors' Civil Relief Act of 1940, as amended, in order to extend under certain circumstances the expiration date specified in a power of attorney executed by a member of the Armed Forces who is missing in action or held as a prisoner of war.

The PRESIDING OFFICER (Mr. NELSON). Without objection, it is so ordered.

S. 3960

At the request of the Senator from Maryland (Mr. TYDINGS), the Senator from California (Mr. CRANSTON), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Wisconsin (Mr. NELSON), the Senator from Oregon (Mr. PACKWOOD), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from Texas (Mr. YARBOROUGH), were added as cosponsors of S. 3960, the Mass Transportation Financing Act, a bill to provide States the option of using Highway Trust Fund money for mass transit purposes.

S. 4055

At the request of the Senator from Kentucky (Mr. COOPER), the Senator from Vermont (Mr. PROUTY), and the Senator from New Mexico (Mr. MONTOYA), were added as cosponsors of S. 4055, the administration's proposed Federal-Aid Highway Act of 1970.

S. 4106

At the request of the Senator from West Virginia (Mr. BYRD), the Senator from Alaska (Mr. GRAVEL) and the Senator from Oregon (Mr. PACKWOOD) were added as cosponsors of S. 4106, to amend the Public Health Service Act in order to provide for the establishment of a National Health Service Corps.

SENATE RESOLUTION 460—RESOLUTION REPORTED AUTHORIZING THE COMMITTEE ON BANKING AND CURRENCY TO EXPEND ADDITIONAL FUNDS

Mr. SPARKMAN, from the Committee on Banking and Currency, reported the following original resolution (S. Res. 460); which was referred to the Committee on Rules and Administration:

S. RES. 460

Resolved, That the Committee on Banking and Currency is hereby authorized to expend from the contingent fund of the Senate, during the Ninety-first Congress, $5,000 in addition to the amount, and for the same purpose, specified in section 134(a) of the Legislative Reorganization Act approved August 2, 1946.

DIRECT POPULAR ELECTION OF THE PRESIDENT AND THE VICE PRESIDENT—AMENDMENTS

AMENDMENT NO. 897

Mr. BYRD of West Virginia. Mr. President, at the request of the able Senator from Nevada (Mr. CANNON), I am asked to state that he will propose an amendment in the nature of a substitute to Senate Joint Resolution 1. The Senator from Nevada (Mr. CANNON) will introduce and speak in behalf of his substitute later in the week. At this time, in order that Senators may study the proposed substitute, I ask unanimous consent, on behalf of the Senator from Nevada (Mr. CANNON), that the substitute be printed at this point in the RECORD.

The PRESIDING OFFICER (Mr. NELSON). The amendment will be received and printed, and will lie on the table; and, without objection, the amendment will be printed in the RECORD.

The amendment (No. 897) is as follows:

AMENDMENT NO. 897

Strike out all after the enacting clause and insert in lieu thereof the following:

That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution only if ratified by three-fourths of the legislatures of the several States:

"Article —

"SECTION 1. The Executive power shall be vested in a President of the United States of America. He shall hold his office during the term of four years, and, together with the Vice President, chosen for the same term, be elected as provided in this article. No person constitutionally ineligible for the office of President shall be eligible for the office of Vice President.

"SEC. 2. The President and Vice President shall be elected by the people of the several States and the District of Columbia. The electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislature, except that the legislature of any State may prescribe lesser qualifications with respect to residence therein. The electors in the District of Columbia shall have such qualifications as the Congress may prescribe. The places and manner of holding such election in each State shall be prescribed by the legislature thereof, but the Congress may at any time by law make or alter such regulations. The place and manner of holding such election in the District of Columbia shall be prescribed by the Congress. The Congress shall determine the time of such election, which shall be the same throughout the United States. Until otherwise determined by the Congress, such election shall be held on the Tuesday next after the first Monday in November of the year preceding the year in which the regular term of the President is to begin.

"SEC. 3. Each State shall be entitled to a number of electoral votes equal to the whole number of Senators and Representatives to which such State may be entitled in the Congress. The District of Columbia shall be entitled to a number of electoral votes equal to the whole number of Senators and Representatives in Congress to which such District would be entitled if it were a State, but in no event more than the least populous State.

"SEC. 4. Within forty-five days after such election, or at such time as Congress shall direct, the official custodian of the election returns of each State and the District of Columbia shall make distinct lists of all persons for whom votes were cast for President and the number of votes cast for each person, and the total vote cast by the electors of the State or the District for all persons for President, which lists he shall sign and certify and transmit sealed to the seat of the Government of the United States, directed to the President of the Senate. On the 6th day of January following the election, unless the Congress by law appoints a different day not earlier than the 4th day of January and not later than the 10th day of January, the President of the Senate shall, in the presence of the Senate and House of Representatives, open all certificates and the votes shall then be counted. Each person for whom votes were cast for President in each State and the District of Columbia shall be credited with such proportion of the electoral votes thereof as he received of the total vote cast by the electors therein for President. In making the computation, fractional numbers less than one one-thousandth shall be disregarded. The person having the greatest aggregate number of electoral votes of the States and the District of Columbia for President shall be President, if such number be at least 40 per centum of the whole number of such electoral votes. If no person has received at least 40 per centum of the whole number of such electoral votes, or if two persons have received an identical number of such electoral votes which is at least 40 per centum of the whole number of electoral votes, then from the persons having the two greatest numbers of such electoral votes for President, the Senate and the House of Representatives sitting in joint session shall choose immediately, by ballot, the President. A majority of the votes of the combined membership of the Senate and House of Representatives shall be necessary for a choice.

"SEC. 5. The Vice President shall be likewise elected, at the same time, in the same manner, and subject to the same provisions as the President.

"SEC. 6. The Congress may by law provide for the case of the death of any of the persons from whom the Senate and the House of Representatives may choose a President whenever the right of choice shall be devolved upon them, and for the case of death of any of the persons from whom the Senate and the House of Representatives may choose a Vice President whenever the right of choice shall have devolved upon them. The Congress shall have power to enforce this article by appropriate legislation.

"SEC. 7. The following provisions of the Constitution are hereby repealed: paragraphs 1, 2, 3, and 4 of section 1, article II; the twelfth article of amendment; section 4 of the twentieth article of amendment; and the twenty-third article of amendment.

"SEC. 8. This article shall take effect on the 1st day of February following its ratification, except that this article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the

legislatures of three-fourths of the States within seven years from the date of its submission to the States by the Congress.".

AMENDMENTS NOS. 898, 899, AND 901

Mr. ERVIN submitted three amendments, intended to be proposed by him, to the joint resolution (S.J. Res. 1) proposing an amendment to the Constitution to provide for the direct popular election of the President and Vice President of the United States, which were ordered to lie on the table and to be printed.

AMENDMENT NO. 900

Mr. ERVIN (for himself, Mr. COOPER, and Mr. MCGEE) submitted an amendment, intended to be proposed by them, jointly, to Senate Joint Resolution 1, supra, which was ordered to lie on the table and to be printed.

AGRICULTURAL ACT OF 1970—AMENDMENT

AMENDMENT NO. 902

Mr. MONDALE (for himself, Mr. MONTOYA, Mr. PROXMIRE, Mr. HARRISON, Mr. MCGOVERN, Mr. YARBOROUGH, Mr. HUGHES, Mr. ANDERSON, Mr. NELSON, Mr. SYMINGTON, Mr. EAGLETON, Mr. GORE, Mr. BURDICK, Mr. HARTKE, and Mr. BAYH) submitted an amendment, intended to be proposed by them, jointly, to the bill (H.R. 18546) to establish improved programs for the benefit of producers and consumers of dairy products, wool, wheat, feed grains, cotton, and other commodities, to extend the Agricultural Trade Development and Assistance Act of 1954, as amended, and for other purposes, which was ordered to lie on the table and to be printed.

(The remarks of Mr. MONDALE when he submitted the amendment appear later in the RECORD under the appropriate heading.)

ADDITIONAL COSPONSOR OF AN AMENDMENT

AMENDMENT NO. 756 TO H.R. 17550

Mr. BYRD of West Virginia. Mr. President, at the request of the Senator from New Jersey (Mr. WILLIAMS), I ask unanimous consent that, at the next printing, the Senator from Maryland (Mr. TYDINGS) be added as a cosponsor of Amendment No. 756 to H.R. 17550, to amend the Social Security Act to provide increases in benefits, to improve computation methods, and to raise the earnings base under the old-age, survivors, and disability insurance system, to make improvements in the medicare, medicaid, and maternal child health programs with emphasis upon improvements in the operating effectiveness of such programs, and for other purposes.

The PRESIDING OFFICER (Mr. NELSON). Without objection, it is so ordered.

ADDITIONAL STATEMENTS OF SENATORS

LEGISLATION REMAINING BEFORE SINE DIE ADJOURNMENT

Mr. SCOTT. Mr. President, in his message to Congress last Friday, President Nixon has made an eloquent call for cooperation between the executive and legislative branches. I would urge Senators—both on the Democratic side and on the Republican side of the aisle—to give this message careful thought. The President has asked for bipartisan consideration of his legislative program. It will serve no useful purpose if Congress reacts to this message in a partisan manner.

In truth, the President has been quite fair in pointing out those pieces of legislation which Congress has enacted. Particularly notable are the Tax Reform Act of 1969, the Economic Opportunity Act, the Postal Reorganization Act, and the Employment Security Amendments of 1970. All of these bills are fully qualified for the title "landmark legislation" and Congress can be justly proud of its role in bringing them to fruition.

In his message the President also points out the other meaningful legislation on which Congress has cooperated fully with the executive branch. Congress consented to the President's executive reorganization plan which provided for the establishment of the new Office of Management and Budget and the Domestic Council. It approved the President's proposal for the Commission on Population Growth and the American Future, and that Commission is now in operation.

Other major bills Congress has passed are the Emergency Home Finance Act and two pieces of legislation in the critical area of crime: the District of Columbia Court Reform and Criminal Procedure Act and an amendment to the Federal Youth Corrections Act which will provide more effective methods for dealing with young people in the Federal criminal justice system.

Finally, Congress just last week sent to the President for his signature the District of Columbia nonvoting delegate bill. This legislation is not a final remedy for the serious problems of the District of Columbia—that the President has called one of the truly unacceptable facts of American life—but it is a first and necessary step.

All of the bills I have mentioned are proposals put forth by the President on which my Senators have worked hard and diligently—both in committee and on the floor of the Senate. In his message, the President has commended Members for their action and to that I would like to add my personal thanks. Both the President and I recognize full well that most of this legislation would not have passed Congress without bipartisan support.

President Nixon has also noted in Friday's message some of the areas in which he has been able to achieve reforms by Executive action. Particularly in the field of education, the administration has created the Office of Child Development within HEW; the President's Commission on School Finance is now examining the problems associated with financial support to schools; the right to read has been established as a prime educational goal and a National Reading Council has been appointed to monitor the Nation's progress toward that goal.

However, my colleagues understand full well that under our system of government the reforms a President can make by Executive action are extremely limited. Major reforms require the consent of Congress. As the President noted, in an era when reform is so urgent, it is time now to act.

In his message the President mentioned the Federal Economy Act. I shall now discuss that proposal in some detail because I believe it is a good illustration of the dilemma which the President has addressed.

In his Federal Economy Act message in February of this year President Nixon listed 57 actions which could be taken to reduce unnecessary Federal spending. These changes would have saved $2.1 billion in fiscal year 1971. Of the total of 57 reductions, the President estimated that 42 could be taken by Executive action; the remaining 15 would require congressional action.

Despite prodding by the President last month, the record of Congress on the Federal Economy Act—as compared with that of the administration—is not good. In those areas where the President has been free to act he has accomplished 100 percent of the savings planned. However, more than half of the changes which require congressional action have not been put into effect. Further, the Congress is blocking over $170 million of the savings which the President proposed to achieve by executive action. Overall, the Congress is not acting on over $700 million in savings, or one-third of the President's proposals.

As an example, one item in the Federal Economy Act was the disposition of the Alaska Railroad. The administration has estimated that $100 million could be realized from the sale of the Alaska Railroad, which has become an attractive investment in light of the rapid development now taking place in Alaska. Bills to authorize this sale are pending in the Commerce Committees of both Houses of Congress—yet no hearings have been held in either committee.

Some Senators may have good reasons why the Federal Government should continue to subsidize the Alaska Railroad and not realize this $100 million saving. But I believe all will agree that the idea has sufficient merit to at least be considered in committee.

In a larger sense, consideration is what the President asked for Friday. Consideration of his legislative program. All Senators will not agree with that program—in fact, many will disagree very loudly—but that is not the point. The President's proposals deserve to be aired in free and open discussion. In the arena which only Congress can provide.

Mr. President, I would ask Senators to consider now some of the ideas which the President has proposed and Congress has not disposed.

At a time when the average American citizen is more concerned about crime than almost any other issue, Congress has had legislation to deal with this problem before it for almost a year, but has acted only on two of the President's bills. This fact might be understandable

if Congress had proposed its own legislation in this area—but it has not done so.

The administration has proposed the Controlled Dangerous Substances Act, the Organized Crime Control Act, wagering tax amendments, Bail Reform Act amendments, the Protection of Minors From Obscenity Act and the Prohibition of Transportation of Salacious Advertising Act, the Criminal Justice Act amendments, the omnibus crime control and safe streets amendment, and the explosives regulation proposals and amendments.

The President has asked for this legislation, the American people have clearly let it be known that they want such protection—but still there has been no action from the House of Representatives, although the Senate has disposed of almost all of the crime legislation proposals of major concern. Consider—among bills not yet enacted by Congress—the importance of the explosives regulation proposals and amendments, which would regulate the business of importing, manufacturing, or dealing in explosives and prohibit the purchase of explosives by mail.

Today bombings and the resulting deaths of innocent bystanders have become almost commonplace in America. Yet Congress has had the legislation necessary to control such acts of violence on its back shelf for almost a full year. Is it any wonder that public opinion polls show that American opinion of the Congress is at the lowest point in 5 years?

Another area of great concern to the American citizen is consumer protection. The President has sent to Congress the Consumer Representation Act, the Consumer Protection Act, the Consumer Product Testing Act, the Drug Identification Act, and the Consumer Warranty Act. Again, almost a year has passed, but not one of these bills, except a modified warranty bill passed by the Senate, has been acted on by either body of Congress.

The President has proposed legislation to create an Occupational Health and Safety Board, the Employee Benefits Protection Act, the Equal Employment Opportunity Enforcement Act, the Emergency Public Interest Protection Act, and the establishment of a National Special Industries Commission. Congress has not passed any of this proposed legislation.

In the vital field of education the administration has—as I have already noted—taken certain steps by executive action to achieve reforms. But much wider reform is needed here, and this will require action by Congress. In two major messages last March the President sent up a program for reform of elementary and secondary education and for reform of higher education. It is time now for Congress to consider the President's proposals for a National Institute of Education, the emergency school aid program, the National Student Loan Association, and the National Foundation for Higher Education.

The same holds true for the President's urban affairs proposals. The Senate has passed a bill which is similar to the President's Urban Mass Transportation Assistance Act but the House has not acted. Neither body of the Congress has acted on the Housing and Urban Development Act of 1970.

In the field of foreign trade neither the House or Senate has acted on the Trade Act of 1969. The Merchant Marine Act amendments have been passed by the House but still await Senate action.

In his message to Congress Friday, President Nixon said:

> The most neglected and the most rapidly deteriorating aspect of our national life is the environment in which we live.

The President has taken a number of executive actions designed to improve the quality of our environment but a great many of his proposals require congressional action, and they are still pending before the legislature.

It has not been my intention to bore the Senate today with the long lists of pending legislation which I have recounted. It was rather to impress upon the Senate the sheer bulk of the President's proposals we have not acted upon. In many cases, the need for this legislation cannot be doubted. As one example, the social security amendments proposed by the President, which would provide an automatic cost-of-living adjustment in social security amendments so that our elderly citizens will not be hurt by inflation they could do nothing to either prevent or to avoid. This legislation has passed the House but still awaits action in the Senate.

Other administration proposals before Congress include the Revenue Sharing Act of 1969 and the Manpower Training Act, which will be historic milestones if they are passed.

Whether we are dealing with basic reforms or broad questions of public policy, the fact remains that there is much to be done and time is slipping away. While it may be convenient to postpone or stall this legislation, that is not in the public interest and it is not why the voters of our States have sent us to Congress.

President Nixon has recognized that America is in an era of change. He has sent to Congress proposed legislation that will help cope with that change and it is now up to us to prove that we too can change—that we can provide leadership rather than being dragged by the heels into the decade of the 1970's.

The President expressed this thought better than I at the end of his call for cooperation, when he said:

> Matters press, we cannot wait for politics. We must seek a record of achievement all can share. It may be that none of us knows how fateful the outcome will prove.

Mr. President, as I indicated last Thursday during the discussion of the schedule of business, there may be other measures than those already scheduled which should be acted upon. The President has now listed a number of these proposals which he hopes Congress will consider.

I am realistic enough to realize that all of the unacted upon measures cannot be considered if we are to adjourn sine die in mid-October. It would, I feel, be possible to act on some of the measures requested by the President.

Accordingly, I ask the ranking members of all standing committees to attempt through the chairmen of the committees, to give consideration toward moving to the Senate floor as many of the President's proposals as possible.

In addition, I have asked all ranking minority members of the standing committees to give me by Wednesday their best estimate as to how many, if any, of the unacted upon measures in the President's message can be sent to the Senate for action, either by mid-October or, if we should be unfortunate enough to have to return, between mid-November and Christmas.

I think that I should point out that a considerable share of the proposals listed by the President either have already been passed by this body or are scheduled for action under the schedule announced last week by the majority leader.

As was mentioned last Thursday a number of times, while much remains to be done, with cooperation and diligence to our duties and by working long hours I, being the eternal optimist, feel we can, with discipline, meet the sine die adjournment date of mid-October.

URBAN GROWTH POLICY

Mr. MUSKIE. Mr. President, the August–September 1970, issue of City, the bimonthly magazine of the National Urban Coalition, contains a thought-provoking article by Donald Canty entitled "What Is This Thing Called Urban Growth Policy?" As its editor, Mr. Canty has sought to make City a more effective instrument of urban improvement. As a writer, Mr. Canty has told us what an "urban growth policy" is not and cautions us that it may be an idea whose time has come—and already is passing.

Mr. President, because of the perceptiveness of Mr. Canty's remarks, I ask unanimous consent that his article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WHAT IS THIS THING CALLED URBAN GROWTH POLICY?

The concept of a national urban growth policy may be an idea whose time has finally come—and is rapidly going. It began entering the public and political consciousness a scant two years ago (in large part because of the efforts of an ad hoc group of government officials and others called the National Committee on Urban Growth Policy; the oratorical interest of then-Agriculture Secretary Orville Freeman in achieving something called "urban-rural balance"; and a diligently researched, if less-than-lucidly expressed, report by the Advisory Commission on Intergovernmental Relations).

The idea reached its apogee early this year when it showed up first in the President's State of the Union Message and then in legislation bearing such sterling Democratic names as those of Senators Muskie and Sparkman. The Administration, it became known, was busily preparing legislation of its own. Enthusiastic expressions of support for urban growth policy came from Secretaries Romney of HUD and Stans of Commerce (see City for June–July).

Since then, interest in the idea has perceptibly subsided. The Administration made no secret of its distaste for the Democratic bill (principally sponsored in the House by

Rep. Thomas Ludlow Ashley of Ohio)—and, in late spring, let word out that there would be no Administration alternative offered this year. The reasons for the subsidence, which also was manifested in some skeptical commentaries in the press, were not entirely clear; but, in addition to political and economic considerations, they seemed to include overenthusiasm on the part of some proponents of the idea, obfuscation by some opponents, and a consequent confusion over just what this thing called urban growth policy might be, do, and cost.

It will be argued here that the idea is eminently worth reviving; that, indeed, the stakes riding on it are very high in terms of the nation's future. The first step in its revival must be the clearing away of the general confusion. A good place to start is by examining some of the things which an urban growth policy needs to do to significantly alter the future, and some of the things it is not.

First among the goals of an urban growth policy must be the opening of new options and opportunities for the poor and minorities.

The growth period just past—wartime to midcentury—has effectively diminished these options and opportunities.

The developmental history of the period is depressingly familiar in this respect. Both economic and population growth have occurred mainly in the suburbs. Yet the poor have been priced out of the suburbs and the minorities kept out by an ingenious variety of exclusionary devices. Combined with waves of rural-to-metropolitan migration, the result has been the continual and seemingly inexorable spread of slums and ghettos in the central cities—and our present metropolitan condition of de facto apartheid. Three-fourths of the nation now shares the precarious and unpleasant experience of living in a house divided.

A second goal of urban growth policy must be the less profligate use of natural resources—notably air, water, and land. We are at last awakening to the degree to which past growth has wasted and polluted these resources. The fact needs no elaboration; it is part of the daily life experience of the same three-fourths of the nation and is spreading to plague the rest.

A third goal must be to create a living environment that is more efficient and more nourishing to both body and spirit. The environment built in the process of past growth is perhaps the most unlovely agglomeration of unrelated objects ever assembled by civilized man. It not only assaults the eye; it also doesn't work, not even for those of a suitable color and degree of affluence to seek the satisfactions of suburbia. For all but the most affluent metropolitan Americans, choices of living arrangements involve a series of tradeoffs in which the price of convenience and amenity can be very high indeed.

For example, the choice of a suburban house and garden means leaving behind the kind of cultural, educational, and even medical facilities which only city-size concentrations of population can support. It also means, most often, a long commute on clogged highways or laggardly public transportation.

There are known ways, ways used for generations in other nations, to lower these prices and make the tradeoffs less painful. They involve something called planning, which in America has been a paper exercise, divorced from the realities of both development and politics. For the sakes of the built and the natural environment, then, a major goal of urban growth policy must be to make planning possible.

The following are some of the things which an urban growth policy designed to meet these goals is not.

1. *It is not simply a settlement policy.* Former Secretary Freeman, in his quest for "urban-rural balance," and Secretary Stans, in his warnings against the prospect of "an anthill society," essentially were arguing for a policy that would stem urban growth and divert population elsewhere.

Implicit in their and others' arguments was the traditional Jeffersonian-American view that the city is a place of evil, an unnatural and destructive environment for man. They expressed concern for the city, but mainly in terms of preventing its inundation by migration. Secretary Freeman advocated slowing this migration at its rural source by inducing growth in small nonmetropolitan communities. The Advisory Commission on Intergovernmental Relations also placed considerable stress on this approach, which it termed the creation of "alternate growth centers." Such an approach could properly be part of an urban growth policy, but not the whole. For one thing, experience elsewhere indicates that only limited success can be expected of any effort to put a lid on the growth of major metropolises. Britain, with its long and distinguished planning history, has not succeeded in stopping London from growing; and Russia, with its centralized state powers, has experienced similar frustration in respect to Moscow.

Also, migration has ceased to be the problem for the cities that it was in postwar decades. The Census Bureau, in fact, tells us that migration from the rural South to the urban North has almost entirely ceased.

But the major reason for distinguishing between a settlement policy and an urban growth policy that would meet the above goals is that a settlement policy would deal only with *where* growth occurs. The more crucial matters are *how* it occurs in terms of environmental quality and *whom* it serves. Without these qualitative and social components, a settlement policy could merely result in re-creation of the waste and divisiveness of past growth in new locations.

2. *An urban growth policy is not a "new towns" program.* When the National Committee on Urban Growth Policy released its report, the recommendation that dominated press attention was for "the creation of 100 new communities averaging 100,000 population each and 10 new communities of at least 1 million in population." The committee made clear that its specifications for the new communities would include the qualitative and social factors previously cited.

But the committee also had to admit that even its ambitious new-communities program would only accommodate 20 per cent of the growth anticipated in the remainder of this century. Once again, the fact must be accepted that most of this growth will occur in or around present metropolitan areas.

Like "alternate growth centers," then, new communities can only be expected to be a partial solution, not the whole of urban growth policy.

3. *An urban growth policy is not a public works program.* The question it addresses is not *whether* we build enough housing and other community facilities for the population increment in the coming decades of growth. Rather, such a policy addresses the aforementioned questions of *where, how, and for whom* we build.

This distinction impacts heavily upon the further question of what an urban growth policy would cost.

The Administration explained its decision to defer urban growth legislation on the grounds of economy. However, a HUD official acknowledged that no particular policy proposals had been "costed out" in detail, and that the decision was based mainly on concern for the "psychological impact" of introducing large new ideas at this inflationary moment in history.

Similarly, the Administration based its opposition to the Democratic bill on grounds that it would cost $22 billion. But an assiduous survey of HUD and White House sources by this magazine turned up no computation on which this figure had been based.

What would be the costs of an urban growth policy adequate to meet the goals above? Clearly no answer can be ventured without drafting such a policy in detail, which is a task beyond the purview of this essay.

But some general points about cost can be made.

In any computation, a careful breakdown must be made between those costs which the nation would face anyway and those which could be directly assigned to the urban growth policy in question. Thus, the matter of whether the nation meets its housing deficits and commitments, particularly for the poor, is not a matter of whether or not the nation has an urban growth policy.

The second point relates to the crucial resource of land. It is difficult to conceive how an urban growth policy could meet all of these goals without more direct and positive public involvement in land deployment. Until now, we have relied mainly on negative devices, such as zoning, to assert the public interest in the way land is used, and to make planning possible. The present metropolitan environment is sufficient evidence of the failure of this approach.

There is a growing body of opinion that the only way the public can effectively influence the deployment of land—and thus the course of future urban development—is to own it. The National Committee on Urban Growth Policy proposed a system by which states (or state-chartered agencies) would buy land in the path of urban growth with the help of federal loans or grants; put in the roads, utilities, and other public facilities that would make the land developable; make detailed plans for its use, including specifications for accommodation of the poor and minorities; then sell it to private developers, stipulating adherence to the plan.

Such a proposal could be the revenue-producing element of an urban growth policy. At present, the public pays the bill for making land suitable for development. This raises the value of the land, but the profit goes to private owners—often speculators. The committee's proposed system would return the profit to the public, along with benefits of a nourishing and humane environment.

FTC LOOKS AT LACK OF OIL PRICE COMPETITION

Mr. PROXMIRE. Mr. President, at long last, the Federal Trade Commission is going to investigate the lack of price competition in the oil industry.

Lawrence G. Meyer, the brilliant new Director of the Office of Policy Planning and Evaluation of the FTC, pointed out in a recent speech the lack of price competition in the oil industry and promised that the FTC would look into it. This lack of price competition is characteristic of oligopolic industries and only results in increasing consumer costs and squeezing out the small, independent businessmen who cannot match the gigantic oil companies which dominate the oil business.

I wish the Federal Trade Commission well in their efforts to investigate this blatant price fixing. I offer whatever help I or my staff can give because they are going to need all the help they can get in tackling the powerful oil lobby.

Mr. Meyer's speech gives me renewed hope that the FTC is emerging as an

effective consumer protector. I ask unanimous consent that the speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

SOME GENERAL OBSERVATIONS ON THE PETROLEUM INDUSTRY

(By Lawrence G. Meyer)

I welcome the opportunity to appear here with you today and discuss rather generally antitrust enforcement and the petroleum industry. As a newly appointed official of the Federal Trade Commission, I must add that these are my personal views.

The petroleum industry ranks near the top of any list of significant and vital industries in our economy. An agency charged with protecting the consumer, with preserving the competitive market place and with preserving small, competitively viable business, would simply not be doing its job if it did not devote a significant measure of its enforcement resources to an industry that accounts for about 5 percent of our gross national product and embraces the activities of about 11 percent of our nation's small business men.

All of us have a common interest in a petroleum industry that functions as competitively as possible; an industry in which prices reflect legitimately incurred costs and reasonable profits. And perhaps of highest importance, the Federal Trade Commission stands strongly for an industry in which the independent, be he producer, marketer, or dealers like yourselves, is a viable competitor and can operate as a true independent businessman.

A major Commission responsibility is to insure and to protect such business freedom. For example, you as independents should be free to elect or to refuse promotion devices such as games of chance or trading stamps, free to switch the brand of gas, either major or independent, that you handle, free to price as you wish without even a suggestion of coercion.

Obviously, as you are well aware, the petroleum industry does not always function in such desirable competitive fashion. Many observers believe that the basic fault lies in the fact that the petroleum industry is simply not competitively structured in a way that results in maximum benefit to consumers, to the industry and to the public. Certainly a competitive structure in any industry is of vital concern to the Commission. As the Supreme Court noted in the *Dupont* cellophane decision.[1] An industry that does not have a competitive structure will not have competitive behavior."

In the petroleum industry, some of the structural characteristics that lead to undesirable competitive conduct and performance are simply beyond the proscriptions of the anti-trust laws and the strictures of competition. And quite frankly, as such, there is little that an enforcement agency like the Federal Trade Commission can do about them. For example, state laws, which fix and allocate production, indirectly set the price of crude oil in a manner often unrelated to the interaction of actual market forces. Certain tax provisions such as the intangible drilling expense provision, the foreign tax credit, and the depletion allowance, tend to favor the large integrated refiner. These tax benefits often permit an integrated producer to bring an assured profit to the wholesale and retail market—an assured profit obviously not enjoyed by a non-integrated independent marketer.

Notwithstanding the limited ability of the Commission to meet such competitive conditions which tend to make the industry, in the words of economist Walter Adams, "a high-cost, high-price, over-capacity industry" [2]. It can tackle a number of problems in the industry with the anti-trust weapons at its disposal.

As you may know, the Commission has announced that it plans to study in considerable depth the structure and performance of the energy industry, which of course includes petroleum, as well as other major industries. In the petroleum industry, there is evidence that a number of structural characteristics carry a strong potential for anti-competitive behavior and prevent you and others in the industry as well as the consumer from having the competitive freedom to which you should be entitled.

Basically, the structural characteristic of the petroleum industry setting the competitive tone is the dominance of this industry by a relatively small number of large, vertically integrated major companies, marketing a well established brand of gasoline which is extensively advertised. Twenty such firms control over 80 percent of the value of shipments in the refining industry—with the top eight of these firms accounting for about 55 percent.

It would appear that these firms recognized long ago that price competition would not be in their self-interest. Accordingly, today we see a clearly identifiable substitution by the majors of less desirable non-price methods of competition. Rivalry is based almost entirely on advertising claims for mileage additives, engine additives, quality of station services such as tour maps, or on fierce competition for preferred retail outlets.

Too often a major intersection is dotted with outlets of four major firms, each operating at a relatively low capacity. Normally such a situation might be expected to precipitate a price reduction by at least one of the outlets—in an attempt to increase its business—but not in the petroleum industry. This is somewhat understandable. Where a dealer on a year to year lease faces the loss of his franchise and a possible black-ball by other major companies should his "independent" pricing decisions become unacceptable, can we really fault his lack of initiative?

Just as unacceptable is the situation where a so-called "independent" retail dealer is forced to reduce his price in order to meet the objectives of his major company franchisor rather than his own. And in a number of such instances, the dealer is also forced to absorb a large percentage of such price reductions.

In this connection, of serious concern to the Commission is the maintenance by some companies of pricing zones in a given community that really have no relationship to reasonable marketing areas. In Minneapolis, Minnesota, for example, it is alleged that over 100 such zones exist for pricing purposes in a community in which transportation and marketing costs are virtually identical. Is it reasonable for one of two dealers of the same company, one block apart but in different pricing zones, to pay a higher price? Such situations make it quite clear that where the majors involve themselves in anti-competitive methods of operation, everybody suffers, including the retail outlets of the major companies.

By launching predatory price wars, by moving in and selling their excess-capacity branded or unbranded gas at distress prices, by discriminatory pricing to independent marketers, the majors can dramatically affect the ability of the independent—including dealers like yourselves—to exist.

The majors are also perfectly capable of injecting a heavy anti-competitive hand unto other aspects of the decision making by retail dealers. In a number of cases, the Commission and the courts have found that the majors, without regard to the interests of their own retailers, dictate prices, dictate the carrying of particular TBA items or dictate the acceptance of promotional schemes.

In recent years, a number of major companies have acquired leading independent gasoline marketers and refiner-marketers. As a result of some of these mergers, there is reason to believe that even less price competition at the retail market exists today. Obviously where an independent refiner is acquired by a major company, independent retail outlets formerly served by the independent refiner could well find their available supply of gasoline rather limited, if not non-existent.

The catalog of actual and potential economic abuses—which some call a veritable "honeycomb of anticompetitive restraints" [3] in the petroleum industry is substantial. To meet this sometimes dismal picture of competition, both the Commission and the Justice Department have focused considerable attention on all mergers in the industry. The Commission's first phase report issued on conglomerate mergers details merger activity in the industry and its possible competitive significance. To quote the Report, "the mergers undertaken by the most active acquiring petroleum firms have brought about a significant restructuring of retail petroleum markets." [4]

In addition to the recent suits by the Justice Department against the British Petroleum-Sohio and Atlantic Richfield-Sinclair mergers, the Commission is investigating other major oil company acquisitions of leading independent marketers and refiner-marketers. Especially in those instances where a major firm acquired an "independent" and subsequently discontinued the discount price policy of the formerly "independent" firm, formal complaints to undo such mergers will be given serious consideration.

The Commission activity here in an area affecting the entire industry serves as a realistic guide to the Commission's role in enforcing the entire spectrum of antitrust laws in this industry. The Commission will always have a sympathetic ear for complaints by retailers, be they independent or affiliated, that they have little or no voice in matters affecting their economic welfare. In the past, for instance, the Commission has successfully sued on behalf of small independent dealers to eliminate supplier interference with their choice of TBA accessory items [5]. In addition, the Commission successfully sued to eliminate consignment selling systems where the supplier controls or fixes the retail price at which the dealer may elect to sell gasoline.[6]

But it should be remembered that in recent cases involving other industries, principles have been established which have applicability to your own competitive rights. In a significant decision, the Supreme Court held that U.S. Steel could not tie the financing services which it had offered to builders to the sale of its own brand of prefabricated houses.[7] Another decision involving the marketing arrangements of a bicycle manufacturer established firmly the principle that once a supplier relinquishes control over his goods he is no longer free to control any aspects of the competitive behavior of the independent merchants who sell his products.[8] Still another relevant decision to your competitive rights is one in which the Supreme Court found that a newspaper's attempt to coerce a distributor into adhering to suggested prices was illegal.[9] Under this case, it could be argued that a supplier could not lawfully use company owned or operated stations to exert coercive price pressures on affiliated although independently owned outlets.

Such cases are potent ammunition to dealers like yourselves striving to remain viable, independent businessmen. In the fight to preserve competition in your industry, of great importance are the private cases brought by members of the industry. In *Perkins* v. *Standard Oil of California*,[10] the

Footnotes at end of article.

Supreme Court upheld a triple-damage jury award of $1.3 million given to Perkins, an independent California dealer and wholesaler who suffered injury because Standard, from whom he bought nearly all his supplies, charged him a higher price for his gasoline and oil than it did its own branded dealers. Perkins also collected triple damages for injury suffered as a result of Standard's charging a lower wholesale price to another firm which then used still another dealer to pass on the lower price to a major competitor of Perkins.

In *Simpson* v. *Union Oil* [11], Simpson, a lessee of Union's who had also signed a one-year consignment agreement, sued and collected damages from Union for refusing to renew his lease agreement because he was selling gasoline for two cents below the retail price fixed by the company. The Court condemned consignment agreements where they serve merely as a coercive device to straight-jacket the ability of numerous small independent businessmen to engage in meaningful price competition with each other. The Court significantly took note of the imbalance in bargaining power between the large supplier and its relatively powerless nominal "consignees," whom it characterized as "small struggling competitors seeking retail gas customers." [12]

These cases clearly indicate that the Court is extremely sympathetic to competitive imbalances in your industry, and specifically, to the problems of economic coercion which retailers and dealers face on a day to day basis.

Gentleman, what is important here is not whether you are affiliated with a major company or with an independent company—or whether you are a lessee or an owner of your station. What is important, in my opinion, is your individual and collective resolve to preserve and, in some instances, to obtain business independence.

In this regard, the Commission is certainly one agency to present your pitch to. I hope I can promise you on its behalf that it will continue to try to do more than just listen.

Frankly, however, Commission resources are limited, and must spread over several fronts. And while this agency will do all it can, you can also help yourselves, as the private action cases which I have mentioned make clear. Such private relief should be taken advantage of by you in your fight against any and all trade-restraining coercive tactics. Perhaps it sounds strange for a public antitrust official to suggest that you take your business elsewhere, but the private lawsuits and threat of it can get the results which your equity demands just as well and perhaps even more effectively than public enforcement. As the Court indicated in *Simpson*, private legal action should be a permanent threat to deter anticompetitive behavior. But it cannot be unless you use it. By doing so, you will not only be helping yourself, you will be assisting the Commission in preserving a competitive economy in which we all have such a large stake.

REMARKS BY PROF. LEO KANOWITZ ON THE EQUAL RIGHTS AMENDMENT

Mr. COOK. Mr. President, last week the full Senate Judiciary Committee held hearings on the proposed equal rights amendment. The most persuasive witness I had the privilege of hearing was Prof. Leo Kanowitz of the University of New Mexico Law School who succeeded in a quite convincing fashion in refuting most of the "red herrings" which have been raised by opponents of this amendment.

He predicted that passage of the equal rights amendment would be a good first step toward the goal of liberation of American women but warned that it would not be "a cure-all for the Myriad problems of sex discrimination in law."

I urge all Senators, especially those who remain unconvinced of the necessity for the equal rights amendment, to read the remarks of Professor Kanowitz. I ask unanimous consent that the statement be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

THE EQUAL RIGHTS AMENDMENT AND THE OVERTIME ILLUSION

INTRODUCTION

Mr. Chairman, I should first like to thank the Committee for inviting me to state my views on the proposed equal rights amendment to the United States Constitution. As a citizen, a lawyer, and a law professor, I have been deeply concerned for a number of years with the status of women in the United States, or more precisely, with the question of sex roles in our society—as this question has come to be more accurately designated in Sweden.

Since 1965, I have studied this question to determine the role that has and can be played with respect to it by our legal institutions. The results of those studies have recently been published in my book, *Women and the Law: The Unfinished Revolution*,[1] a copy of which I have today taken the liberty of presenting to the Chairman and Committee members.

In *Women and the Law*, I explore major aspects of the legal status of American women and analyse some of the social causes and effects of sex-based discrimination in American law. Among the subjects examined are abortion, prostitution, marriageable age, age of majority, married women's names, support obligations within the family, divorce, special criminal penalties for women, jury service rules, domiciles of married women, marital property regimes in the common law and community property states, and contracts and torts of husband and wife.

Much of the book, however, deals with the law affecting women's employment in the United States, particular attention being paid to the Equal Pay Act of 1963 and to the history and effects of the prohibition against employment sex discrimination in Title VII of the 1964 Civil Rights Act. In addition, *Women and the Law* explores in considerable detail the principles of American constitutional law affecting this area of human rights.

Footnotes at end of article.

Rather than recapitulating the contents of *Women and the Law*, or even its exposition and analysis of persisting sex-based discriminatory legal rules and official practices, I would refer the Committee to the book itself—although I am sure that many instances of such discrimination have already been brought to your attention by other witnesses. But I would take this occasion to repeat the hopes I expressed for the book in its Preface.

"Perhaps," I wrote, "an awareness of the many areas of sex-based legal discrimination, whose continued existence this book seeks to identify, will stimulate, first, courtroom and legislative attacks upon those disparities or injustices, then, a much-needed national examination of the respective roles of the sexes in every sphere of American life, and finally, the active and continuing participation of all Americans in bringing about the needed changes." [2]

My investigation in this field has persuaded me that many irrational and harmful distinctions continue to be made in the legal, political and social treatment of the sexes in our country, that the resulting injustices have impeded our development as a nation, and that they have led to much personal unhappiness for American men as well as women.

By relegating women to special tasks, by perpetuating ancient myths about the alleged physical and psychological limitations of women, we American men have subjected ourselves to an awesome burden. For the doubtful joys of feeling superior to women, we have paid a terrible price. Not only have we suffered with respect to uneven laws in the field of support obligations within the family, child support and custody awards in divorce proceedings, and the frequent lack of protective labor legislation where such legislation exists for women, but our insistence that men and only men are entitled to be society's doers and shakers has led to our dying from eight to ten years earlier, on the average, than the women of our country. Perhaps even more important is that, because of arbitrary social and legal distinctions, both men and women are often prevented from relating to one another as people, as fellow members of the human race.

So, when I speak or write of the need to erase sex-based discrimination in American law, I am moved not only by the desire to end the injustices that American men have perpetrated upon our nation's women, but to end those we have imposed upon ourselves as well.

But recognizing that sex discrimination pervades American law and that it is pernicious does not tell us how best to bring about the needed changes. It is to this question—and specifically to whether the constitutional amendments proposed in either Senate Joint Resolution 61 or in Senate Joint Resolution 231 are appropriate steps to that goal—that I would now address myself.

Before I explain my reasons, however, let me state my position on these two proposed amendments. First, I support the Equal Rights Amendment as worded in Senate Joint Resolution 61. Secondly, I oppose the amendments to that Amendment that are set forth in Senate Joint Resolution 231.

Thirdly, I should also like to discuss with this Committee what I believe is the core question in the controversy over the Amendment's desirability namely the issue of state protective labor legislation. As I shall explain, I believe that much of the discussion of this question is at cross-purposes, that it proceeds from a basic fallacy in the thinking of proponents as well as opponents, and that if it can be cleared up, the spectacle of otherwise natural allies opposing one another may disappear. Finally, I would be glad to try to respond to any questions the Committee might care to ask about other aspects of this subject.

SENATE JOINT RESOLUTION 61

Senate Joint Resolution 61, if adopted and ratified by the requisite number of state legislatures, would add a new article to the United States Constitution, to take effect one year after the date of ratification. The crucial language of that proposed new article reads: "Equality of rights under the law shall not be denied or abridged by the United States or by any State on account of sex. Congress and the several States shall have power, within their respective jurisdictions, to enforce this article by appropriate legislation."

I have had occasion to consider the present desirability of such a constitutional amendment in my book, *Women and the Law*. Writing in 1969, I suggested that many proponents of the Equal Rights Amendment were mistaken in their belief that the United States Supreme Court and lower state and federal courts had in the past held existing provisions of the United States Constitution, in particular the Fifth and Fourteenth Amendments, inapplicable to women.

"The fact is," I wrote, "that the courts have not done this at all. Instead, they have generally held that existing constitutional provisions do apply to women, but that within the limits of those provisions, women in many situations constitute a class that can reasonably be subjected to separate treatment." [3]

I also suggested that the adoption of the Equal Rights Amendment would not fundamentally change the picture. "While the proposed amendment states that equality of rights shall not be abridged on account of sex," I wrote "sex classifications could continue if it can be demonstrated that though they are expressed in terms of sex, they are in reality based upon function. On the other hand, under existing constitutional provisions, particular classifications of men and women that cannot be shown to be based upon function, are vulnerable to attack—as has already been demonstrated in some lower state and federal courts with respect to discriminatory laws in the realm of jury service, differences in punishment for identical crimes, right to sue for loss of consortium and the like." [4]

This latter reference was to a series of recent cases in which sex-based discriminatory legal rules had already been struck down by various courts as violating the equal protection clause of the United States Constitution's Fourteenth Amendment. (*E.g., White* v. *Crook*, 251 F. Supp. 401 (1966); *Robinson* v. *York*, 281 F. Supp. 8 (1968); *Owen* v. *Illinois Baking Corporation*, 260 F. Supp. 820 (D.C. Mich 1966); *Clem* v. *Brown*, 3 Ohio Misc. 167, 207 N.E. 2d 398 (1965) etc.)

I also suggested that "as some of these cases make their way to the Supreme Court, the Court, influenced by the reasoning of the opinions below and perhaps more responsive to the present sociological climate surrounding the question of women's legal status than it has been in the past, may drastically revise its prior approach to determining the kind and extent of official sex discrimination that is allowable."

I continue to hold these views. I believe that there is a very high degree of probability that the United States Supreme Court, when it next confronts an equal protection or due process challenge to a sex discriminatory law, will drastically modify the undifferentiated principle originally enunciated in the 1908 case of *Muller* v. *Oregon*, 208 U.S. 412 (1908) that "Sex is a valid basis for classification,"—a principle I described in *Women and the Law* as being "often repeated mechanically by the courts without regard to the purposes of the statute in question or the reasonableness of the relationship between that purpose and the sex-based classification," [5] Indeed, I suggested, "the subsequent reliance in judicial decisions upon the *Muller* language is a classic example of the misuse of precedent, of later courts being mesmerized by what an earlier court had *said* rather than what it had *done*." [6]

But if I believe that the Equal Rights Amendment would not achieve anything that could not be achieved by the courts in interpreting existing constitutional provisions, the question arises as to why I am supporting the Equal Rights Amendment at this time, especially since my position on the Amendment has heretofore wavered between mild opposition and lukewarm support. The answer is simple. Although I still believe that there is a very high degree of probability that the Supreme Court will perform as I hope and expect in this area, there is no guarantee that it will do so. Moreover, I now believe that it is necessary for all branches of government to demonstrate an unshakeable intention to eliminate every last vestige of sex-based discrimination in American law. The adoption of the Equal Rights Amendment at this time would give encouragement to the many American women and men who now see the need for substantial reform in this area. Finally, should the next few years bear out my prediction that the Court will soon begin to interpret existing constitutional provisions so as to eliminate irrational sex discrimination in the law, no harm will have been achieved by the presence of the Equal Rights Amendment. Indeed, many examples can be cited in which laws and official practices may violate more than one constitutional provision at one time.

Moreover, should the Supreme Court *not* respond as I have suggested it ought to in this area, then the need for the Equal Rights Amendment will have become manifest. The time that will have been gained by sending it on its ratification road immediately would be precious.

There is one word of caution I would add at this point, however. And that is that this Committee and Congress, if it adopts the proposed Equal Rights Amendment as I hope it will do, will make sure that the record discloses that it does not thereby intend to discourage the United States Supreme Court from interpreting existing constitutional provisions—and especially the equal protection clause of the Fourteenth Amendment—so as to eliminate every sex-based discrimination in American law that cannot be sustained by overwhelming proof of functional differences between men and women.

I say this because there is a very real danger that if this is not done, the adoption of the Amendment at this time will ultimately represent a defeat rather than a victory for those of us who seek the eradication of irrational sex-based distinctions in American law and society. In the absence of such a clarifying declaration in the legislative history the Court, when faced with an equal protection or due process challenge to a sex-discriminatory legal rule or official practice within the next few years, may be prompted to reason as follows: Since a coordinate branch of the federal government, the Congress, has deemed it necessary to adopt the Equal Rights Amendment, then it must have believed that existing constitutional provisions were inadequate to provide the needed relief in this area. Though such a view is not determinative, it is at least persuasive. As a result, deferring to Congress' apparent wishes in this respect, the Court could withhold any modification of the *Muller* principle and simply await the ratification of the Equal Rights Amendment before providing the needed relief in this area.

The problem of course is that one cannot be sure that the Equal Rights Amendment will be ratified by the requisite number of State legislatures. Even if it is eventually ratified, this may occur many years from now. In the meantime, many litigants, both men and women, seeking to prevent unreasonable discrimination based upon sex, may find that no redress is available from the courts.

I am aware of course of the decision in *Gray v. Sanders*, 372 U.S. 368, wherein the Supreme Court at page 379, invoked the Fifteenth Amendment's prohibition against voting denials based on race and the Nineteenth Amendment's similar prohibition of denials based on sex to sustain a challenge to a county-unit voting system that was based on the Fourteenth Amendment's equal protection clause. *Gray v. Sanders* is no guarantee however that the Court would act the same way under the circumstances we are presently concerned with. For one thing, *Gray* was decided *after* the ratification of the Fifteenth and Nineteenth Amendments, while the fear that I have expressed concerns the Supreme Court's response while the ratification of the proposed Equal Rights Amendment would still be pending. For another thing, the *Gray* decision did not require the Court to overrule or substantially modify any of its recent decisions. But if the Court were to do as I hope and expect it will with respect to equal protection and due process challenges to sex-based legal discrimination, it would have to drastically modify several decisions that were rendered as recently as 1961 (*Hoyt v. Florida*, 368 U.S. 57) and 1954 (Goesart v. Cleary, 335 U.S. 464).

For these reasons, I believe it is of crucial importance that this Committee and Congress, in adopting the proposed Equal Rights Amendment, make clear their hope and expectation that forthcoming decisions of the United States Supreme Court will soon transform that Amendment into a constitutional redundancy.

Finally, before moving on to the proposed amendments to the Amendment that are contained in S.J. Res. 231, let me make one more observation.

Some proponents of the Equal Rights Amendment are undoubtedly convinced that its adoption will inevitably revolutionize judicial attitudes about sex roles in our society. Some opponents of the Amendment are equally convinced that its adoption will introduce chaos, uncertainty and confusion in our law and judicial processes.

My most recent studies in this area have persuaded me that neither view is correct. I have just returned from a seven-month sabbatical leave in Europe. While there, I began an examination of law-based sex discrimination problems in France, West Germany, Switzerland, England, Denmark, and Sweden.

My study is still incomplete and it shall be some time before I shall be able to publish my conclusions. For the moment, however, I think I can say with some assurance that the experience of the West German courts in interpreting a similar constitutional provision (*"Männer und Fraunen sind gleichberechtigt,"*—translated as "Men and women are equal before the law." Art. 3, sec. 2 Constitution of the German Federal Republic) demonstrates two important points. One is that our Courts will face no extraordinary difficulties in dealing with the Amendment. The other is that the Amendment will not of itself represent a cure-all for the myriad problems of sex discrimination in law and society—although it will be a step in the right direction. For as I suggested in *Women and the Law*, even after the adoption of the Equal Rights Amendment, "the crucial factor will continue to be the responsiveness of the judiciary to the social impulse toward equality of treatment without regard to sex." [7]

But in contrast to my former position, when I believed that, for *tactical* reasons, efforts to secure passage of the Amendment ought to be abated in favor of vigorous challenges under existing constitutional provisions, I now believe, for the reasons advanced earlier in these remarks, that, provided the adequate legislative history is

Footnotes at end of article.

made, passage of the Amendment at this time could do no harm and possibly could do much good.

SENATE JOINT RESOLUTION 231

Let me now turn my attention to Senate Joint Resolution 231. That Joint Resolution, introduced as a substitute to Senate Joint Resolution 61, would change the proposed Equal Rights Amendment in several respects. First, it would place a seven-year limitation on the ratification process. Secondly, it would become effective two years after ratification rather than one year after ratification as proposed in S.J. Res. 61. But most importantly, it would qualify the basic declaration of equality contained in S.J. Res. 61 by adding this second sentence:

This article shall not impair, however, the validity of any law of the United States or any state which exempts women from compulsory military service or which is reasonably designed to promote the health, safety, privacy, education, or economic welfare of women, or to enable them to perform their duties as homemakers or mothers.

As indicated earlier, I recommend the rejection of S.J. Res. 231.

First of all, I oppose the seven year limitation on the ratification process. Hopefully, the basic Equal Rights Amendment, as worded in S.J. Res. 61, will be ratified long before seven years have passed. But should that not be the case, I can see nothing that will be gained by imposing such a time limit—especially if, as I have suggested, the legislative history will clearly show Congress' hope and expectation that the Supreme Court will in the meantime render the Amendment unnecessary.

Second, while there is some merit to the idea that the State legislatures and Congress should be given more than one year to enact appropriate implementing legislation, a one year period would be adequate since both state and federal legislatures would have had time to prepare for their work while the ratification process was still pending.

My most severe reservations about S.J. Res. 231, however, go to the language in the second sentence of the first section that would qualify the basic declaration in favor of equal treatment in the law without regard to sex that is contained in the first sentence of that section.

I suggest that there are serious questions about the *meaning* of the second sentence. And even if the meaning of it can be ascertained, I fear that the interpretation probably intended by its sponsor would render that language objectionable to me as being incompatible with the needs of our society and the basic goal of equal treatment under law without regard to sex.

In ascertaining the meaning of the second sentence, I think it is important to note first the provision that it qualifies. That provision states, "Equality of rights under the law shall not be denied or abridged by the United States or by any State on account of sex." Then comes the sentence in question which states that the Article shall not impair the validity of certain knds of laws which presently are assumed to benefit women in a variety of ways.

One possible interpretation, resulting from this juxtaposition of the two sentences, would be as follows: Since the first sentence guarantees equality of treatment without regard to sex, and since the benefits presumably flowing to women from certain laws are held inviolate in the second sentence, then the only way to achieve the equality of treatment guaranteed in the first sentence is to extend those benefits to men. Under this construction, since women's present exemption from compulsory military service is to be preserved, the constitutional command of equal treatment can be obeyed only by extending the exemption to men. This would render unconstitutional our present Selective Service law which presently applies to men only.

While, personally, I would have no objection to such a construction of this language, I wonder if this would be acceptable to the Resolution's sponsor.

A similar analysis can be offered of the remaining language of the second sentence, i.e., up to the beginning of the last clause. For, it is not only women who have an interest in laws designed to promote their health, safety, privacy, education or economic welfare. Men are equally interested in being protected by government in these areas. A reasonable reconciliation of this language with the command of the first sentence would be to read it as requiring the extension of the benefits of such laws to men. Indeed, if this is intended by this language, I could support it—although, as I will explain, the Equal Rights Amendment, as worded in S.J. Res. 61, achieves this same goal and is preferable.

The last clause of the second sentence raises some difficulties, however. It states, "or to enable them to perform their duties as homemakers or mothers." Here the extension approach is clearly not intended. Though it is possible to think of men performing the function of homemakers, it is a little difficult to conceive of them as mothers in a biological sense. Moreover, this last clause would appear to lend constitutional dignity to the social presumption that the highest, if not the sole, life's work for women is that of wife and mother.

The apparent intention of this last clause provides a key, I believe, to the probable meaning and intention of the rest of the language in the second sentence. That is, rather than intending these benefits and protections to be extended to men, the Amendment's sponsor apparently intends, by the language of the second sentence, to preserve these for women alone. Not only would this represent a nullification of the spirit and intent of the proposed Equal Rights Amendment as worded in S.J. Res. 61, but it would be a substantial step backward from the encouraging recent trend of decisions in the state courts and lower federal courts.

Even if S.J. Res. 231 is intended to embrace the possibility of extending to men certain rights, privileges and benefits of law presently enjoyed by women only, the basic fallacy in its reasoning is its apparent assumption that the unadorned Equal Rights Amendment, as worded in S.J. Res. 61, would, if adopted and ratified, deprive women of many of these rights, privileges, and benefits.

But I suggest that this need not happen at all. In *Women and the Law*, I pointed out how it would be consistent with judicial precedent for the courts, in interpreting the Fourteenth Amendment's equal protection clause in sex discrimination cases, to cure the invalid inequality by extending the benefits of particular laws of the sex (male or female) that had not previously enjoyed those benefits rather than by removing them from the one that had. That analysis, I suggested, was equally applicable with respect to the Equal Rights Amendment.

The Supreme Court's recent decision in *Levy* v. *Louisiana*, 391 U.S. 68 (1968), I wrote had "held that a denial to illegitimate children of a right to recover for wrongful death of their mother, where her legitimate children could recover the same wrong, violated the equal protection guarantee. But the Court's remedy for such a violation was not to remove from the legitimate children the right to recover for their mother's wrongful death, but rather to extend this right to her illegitimate children."

"Even some state courts," I observed, "exercising their power to entertain federal constitutional challenges to state laws, have achieved similar results. Thus in *Clem* v. *Brown*, an Ohio Court of Common Pleas, holding that the state's rule permitting husbands but not wives to recover for loss of consortium deprives a wife of 'equal protection of the law' remedied this inequality by extending the right to wives rather than by removing it from husbands. Similarly, the decision of a federal district court in Michigan in *Owen* v. *Illinois Baking Corporation* was one more example of a . . . court curing what it regarded as a constitutionally infirm one-way consortium rule by extending the right to sue to married women.

"As long ago as 1871, the United States Supreme Court held that a state could not limit the right to sue on a cause of action created under state law so as to deprive the federal courts of the power to entertain such suits if jurisdiction was otherwise present . . . Though [this] result . . . was dictated by the requirements of Article III of the U.S. Constitution, conferring the Judicial Power upon the United States, rather than by the equal protection clause of the 14th Amendment, it is another illustration of the Court's past practice of implementing constitutional provisions by extending a state-created benefit beyond the limits intended by the state, while recognizing that the state could, if it wanted, remove the benefit from all."

This, I believe, is the spirit in which the Supreme Court, aided by the legislative history, will interpret the Equal Rights Amendment as worded in S.J. Res. 61. This, I believe, is the spirit in which the Court can and should interpret the Fourteenth Amendment's equal protection clause in forthcoming sex discrimination cases.

I would also stress that the Amendment as worded in S.J. Res. 61 empowers Congress and the States, within their respective jurisdictions, to enforce the new article by appropriate legislation. This, I suggest, is the ultimate corrective, the ultimate guarantee of social consensus with regard to decisions to extend one-way rules or abrogate them.

In sum, I believe that S.J. Res. 231 is based on an invalid assumption as to the probable effects of the Equal Rights Amendment as worded in S.J. Res. 61, and therefore recommend its rejection. Though I am absolutely certain that the sponsor of S.J. Res. 231 is as interested as I am in advancing the status of American women in law and society, he has proposed a way that I simply cannot support. The fact of the matter is that this is an extraordinarily difficult question about which reasonable men and women do differ. My hope is that, in the course of these hearings, understanding of all of us will be advanced, and that the ultimate decision is the right one.

EQUAL RIGHTS AMENDMENT, PROTECTIVE LABOR LAWS, AND THE OVERTIME ILLUSION

Finally, I should like to turn my attention to how the Equal Rights Amendment, if adopted, could work in the area that has been the subject of greatest controversy. I am referring specifically to the Amendment's effect upon the State's protective labor laws that presently apply to women only. Parenthetically, I would point out that my analysis here also applies to the effects of the equal protection clause, if and when the Supreme Court begins to interpret that clause vigorously in the sex discrimination area.

Reading the testimony presented to this Committee's Subcommittee on Constitutional Amendments during its earlier hearings this year, and the testimony presented at prior Senate committee hearings on the proposed Amendment, I am struck by what I regard as a peculiar fact. That fact is that certain groups or organizations that, according to all reasonable expectations, should be allied on the issue of equality without regard to

Footnotes at end of article.

sex are in fact divided over the desirability of the Amendment as a way of achieving that goal. I am of course speaking of the basic division between the women's organizations, who have for the most part supported the Amendment and organized labor which has, for the most part, opposed it.

By and large, representatives of organized labor have expressed a fear that, should the Amendment become part of our fundamental law, many of the protections that have been won for women workers over years of difficult struggle would be nullified. On the other hand, some supporters of the Amendment have expressed a suspicion that labor's principal motive in opposing it is to monopolize for men both jobs and other supposed benefits, which I shall soon discuss. Though this suspicion is understandable if we recall long-standing collective bargaining agreements providing substantial sex-based wage differentials for the same or similar jobs, it is not, in my opinion, an accurate reading of the motives of the Amendment's trade union opponents.

In *Women and the Law*, I quoted a 1964 statement by Congresswoman Martha Griffiths of Michigan which not only characterized organized labor's basic attitude in this area, but also pointed the way to what I believe is the ultimate solution to its knotty problems. "Some people," said Congresswoman Griffiths, "have suggested to me that labor opposes 'no discrimination on account of sex' because they feel that through the years protective legislation has been built up to safeguard the health of women. Some legislation was to safeguard the health of women, but it should have safeguarded the health of men, also." [10]

Basing my analysis upon the same principle, I suggested in *Women and the Law* how this could be done. Specifically, I demonstrated how, consistently with what had already been done in administrative and constitutional law decision, the equality of treatment required in this area could be achieved by *extending* protective laws to men rather than by removing them from women. The Equal Employment Opportunity Commission, I suggested, should pursue this approach in administering the anti-sex-discrimination provisions of Title VII of the 1964 Civil Rights Act. In areas that were beyond the jurisdictional reach of the EEOC, I urged reliance upon past judicial precedents such as those I have just referred to in my discussion of S.J. Res. 231, to achieve the same extension of those laws rather than their abrogation.

This analysis, I still believe, is a sound one. Not only has the Labor Department, in administering the Equal Pay Act of 1963, determined that where state law provides a minimum wage for women only, the Equal Pay Act entitles men in that state to the same minimum wage if they are covered by the federal law, but the EEOC also has taken the position that the benefits of state laws, presently applicable to women only—such as those requiring minimum wages, rest periods, seats at work—are required by Title VII to be extended to men. Even in those situations that are beyond the jurisdictional reach of Title VII and the Equal Pay Act, I suggested, the judicial extension technique employed in equal protection and other constitutional cases, could lead to the same results.

Moreover, these results can also be achieved under the proposed Equal Rights Amendment—especially if the legislative history disclosed that Congress intends this. The fears of some opponents of the Amendment that its adoption would nullify laws that presently protect women only is thus unfounded—since the equality of treatment required by the Amendment can be achieved by extending the benefits of those laws to men rather than removing them from women. Moreover, the failure of any court to do this can be corrected through the legislative process.

Thus, as I stated in a recent article in the *Family Law Quarterly*, "the current new concern with the legal status of women will in many respects result in improving the situation of men as well as women. Just as breakthroughs in the legal status of American blacks has benefitted other racial and ethnic 'minorities,' so the effort to provide women with equal employment opportunity can substantially improve the situation of male employees in industry and commerce." [11]

But the problem does not stop there. Essentially, I have been discussing the fate of certain protective labor laws—minimum wages, rest periods, seats at work—about which there can be little doubt that they provide valuable protections and benefits not only worth preserving for women but also worth extending to men.

But the major source of controversy concerns two types of state protective labor laws, presently applicable to women only, about which there is much confusion as to whether they in fact represent a burden or benefit. I am referring now to those state laws limiting the weights that women are permitted to lift or carry in industry, or restricting the number of hours that women may work in a day or a week.

It is with respect to these two types of laws that the extension approach begins to run into trouble. For if a state's weight-lifting limitations, presently applicable to women only, were extended to men, then, as I suggested in *Women and the Law*, "it would simply mean that certain objects would not get lifted in the course of that state's industrial life" [12] hardly a tolerable result. As for the extension of hours limitations laws, this would raise problems of another order—which I shall discuss in a moment.

Recognizing that the extension approach was not feasible in the weight-lifting area, I suggested an alternative solution. That solution was to reconcile such laws with either Title VII of the 1964 Civil Rights Act or with a constitutional requirement of equal legal treatment without regard to sex by holding that a state's weight-lifting limit for women workers "merely creates a burden of proof and of persuasion in individual women applicants to show that they can perform the work in question without harmful effects, though such work requires occasional lifting of weights in excess of those permitted by the rule. That burden could be satisfied by a certificate from a family physician or some other testing procedures." [13]

I now believe that this alternative solution was faulty in that it did not in fact conform to the equality principle, since the burden of proof and persuasion that I had proposed was applicable only to women and not to men.

A more acceptable solution, which cannot be achieved judicially but requests legislative action, is the replacement of such state statutes by others, such as the one now in force in Georgia that protects both men and women workers from being required to lift weights that could cause "strains or undue fatigue." Such a law implicitly recognizes that many individual women can, without harm, lift weights in excess of the limits previously imposed by state law, and that many individual men cannot. Thus, under the new law, people—both men and women—are protected against being required to lift weights that are excessive for them. At the same time, no artificial sex-based distinction, having the effect of depriving one sex of equal employment opportunities, is maintained.

I repeat, therefore, that with regard to state weight-lifting statutes presently applicable to women workers only, equality of treatment without regard to sex can be achieved by adopting the type of statute I have just cited.

But now let us consider what I think is the nub of the ideological controversy over the desirability of the Equal Rights Amendment. And that is the question of how the Amendment would affect those state laws which presently provide penalities for employers who permit or require their women employees to work in excess of a given number of hours in a day or in a week. Were such laws extended to cover male employees it would not, as in the case of extending weight-lifting restrictions, bring industry to a grinding halt, although it would create some dislocation and expense for management. But the fundamental difficulty in extending such laws to cover male employees is that, because of what I consider organized labor's failure to educate its membership about the problems of overtime work, it would be regarded by many male workers as the imposition of a burden and not a boon. Stated differently, were employers penalized for permitting or requiring their *male* workers to work overtime hours, many of those male workers would, in the present economic situation, regard this as a deprivation of their right to earn what they consider premium wages and not as the extension to them of a protection presently applicable to women.

Indeed, many women workers undoubtedly look upon the opportunity to work overtime from the same perspective. This, I suggest, explains much that has happened in the last few years in this area. It explains for example why all Title VII suits in the hours area have been brought by women workers seeking to invalidate state hours-limitation laws presently applying for women only. By doing so, they argue, they would, like men, be able to earn attractive overtime pay. Moreover, the elimination of the sex-based distinction in this area would also eliminate the inequality of job opportunity it creates. For many an employer has refused to hire or promote a woman employee for a job in states limiting women's working hours, claiming that the job in question ofter requires overtime work. This also explains, I suggest, the position taken by the EEOC in this area in seeking to invalidate such women-only hours-limitation laws in the states where they exist. And it explains why some states have been persuaded to repeal such laws in the past few years.

This entire trend, I submit, is deplorable and mistaken. It is simply the wrong way to achieve the desired equality of legal treatment and equality of job opportunity. It is a step backward from sensible policies toward overtime work.

"[W]ith victories like these," I wrote in a recent article, "women don't need many defeats. For success in these efforts not only removes limitations upon women's right to work extra hours . . . but also means that those women who do not wish to . . . work excessive hours—and I would suggest that they are many if not in the majority—can henceforth be *forced* to do so." [14]

The consternation these developments provoke in the breasts of trade union opponents of the Amendment is indeed understandable. But I submit that labor's own record with respect to overtime policy accounts for much of this trend. For the labor movement has permitted American workers to be lulled into a false sense of economic security by the overtime illusion—the feeling that they can attain their desired standard of living by working extra hours.

As I pointed out in *Women and the Law*, it is not uncommon for many workers to "work 48, 58, and perhaps 68 hours in a given week—a situation not unlike that prevailing at the turn of the century when organized labor was struggling to reduce the 12-hour, 6-day week to a 10-hour, 6-day week." [15] I also suggested that the requirements of time and one-half pay for overtime work under state and federal laws "were

Footnotes at end of article.

not enacted to reward workers for their willingness to work excess hours. Rather, they were designed to deter employers from requiring their employees to work such hours. The overtime rates provided for by such laws, rather than being denominated as premium rates, are therefore probably more accurately described as penalty rates, when they are viewed from the perspective of their intended objects—employers as a class. For the idea behind such provisions was that employers, faced with the prospect of having to pay one and a half times as much for each excess hour of work as they would pay for each hour of nonovertime work, would pause before requiring their employees to work such hours." [16]

But this legislative policy aimed at deterring overtime work has been distorted by certain economic facts. For one thing, as I noted in the book, "Many employers have found that it is often more economical to pay experienced workers a premium (penalty?) rate than to engage the services of inexperienced workers at straight-time rates (and to whom new fringe benefits would have to be paid) to complete a job at hand." [17] For another, I would now add that many American workers have grown to depend upon overtime work as a means of making ends meet or to improve their basic standard of living—an attitude that may make it easier to lead a trade union than if it didn't exist, but which makes little social sense.

That excess working hours *for both sexes* has for a long time been regarded as a social evil to be cured by legislation can be seen in the experience of New York at the turn of the century. But New York's efforts to place a ten-hour limit on the working hours of bakery employees of both sexes was rebuffed in 1905 by the Supreme Court in *Lochner v. New York*, 198 U.S. 45 (1905), because of its then existing notions of due process and liberty of contract. Three years later, however, the Court in *Muller v. Oregon*, 208 U.S. 412 (1908), upheld Oregon's maximum hours law for women only. As I suggested in *Women and the Law*, this sequence of judicial decisions led many states to enact hours limitations laws for women only on the theory that half a loaf was better than none—even though the Court's later decisions made it abundantly clear that the *Lochner* case would be decided differently today.

The combination of these factors suggests that it would be consistent with our nation's traditional policy toward overtime work to achieve equality of legal treatment for both sexes in the hours area by extending hours-limitations laws to men rather than by removing them from women. Among other things, such a step would provide protection for many male workers who, for a variety of reasons, prefer not to work overtime but whose refusal to do so today constitutes, even under many collective bargaining agreements, a cause for discharge.

For these reasons, I suggested in *Women and the Law* that the extension approach could be utilized in the hours-limitations field. Were this to be done, the fears of some labor opponents of the Equal Rights Amendment that these protections for women would be nullified would be without foundation. For not only would women retain this protection, but it would be extended to men as well.

But economic realities and the overtime illusion have not left us with an entirely free hand in this area. As a compromise, therefore, one designed to implement the principle of equal treatment and equality of job opportunity, I suggested the possibility of enacting on a wide scale state statutes that would embody the principle of *voluntary* overtime. "Such legislation," I wrote, "would permit both men and women to work a designated number of hours in excess of an established norm, but would provide that no employer subject to the coverage of the law would be allowed to discharge any employee for his or her refusal to work overtime." [18]

The path that is ultimately taken depends on many factors. But the point that I would stress is that the claim that the Equal Rights Amendment would nullify state protective laws in the hours-limitations area is unfounded. As I have explained, there are several ways in which the right not to work overtime—which, after all, is at the heart of the hours-limitation laws for women only—can not only be preserved for women, but can be made equally available to men. Above all, it is important for organized labor to begin to re-assess its overtime work policies. When that is done, the claim of many of us that the liberation of American women will lead to the liberation of American men as well will be understood for the truth that it is.

AN EXAMPLE FOR HANOI

Mr. ALLOTT. Mr. President, even desperate men occasionally bow to reason. The Arab hijackers have freed most of their prisoners. This was not a gesture of civility; the air pirates simply recognized the futility of holding their captives any longer. World opinion almost unanimously condemned these barbarous acts and when the commandos saw they had nothing to gain by continuing the atrocity, they released most of the passengers.

Hanoi should learn from this example. North Vietnam cannot forever flout world opinion. Hanoi initiated the war in the South by invading her neighbor. The invaded country resisted being conquered and called for help. America answered this call, and as a result about 1,500 American men are now prisoners of North Vietnam. The obligation of civilized society is that they be treated in accordance with the laws of war. This Hanoi refuses to do.

North Vietnam has nothing to gain by her intransigence. She should learn from the example at Dawson Field.

STILL NO ACTION FROM JUSTICE ON THE FITZGERALD CASE

Mr. PROXMIRE. Mr. President, 295 days have passed since I first wrote to Attorney General Mitchell requesting an investigation of the Fitzgerald case. Fitzgerald was the Air Force cost-efficiency expert who was fired after he told Congress about the vast overruns occurring on the C–5A transport plane.

Fitzgerald was fired because he was honest with Congress. Fitzgerald was fired because he blew the whistle on waste and inefficiency in the Defense Department. Fitzgerald was fired because what he told Congress proved extremely helpful in efforts to hold down the defense budget to more reasonable levels.

In short, Fitzgerald was fired because he rendered a great public service. Naturally, this type of retaliatory action is outlawed by the United States Code. Section 1505 of title 18 makes it a crime, punishable by up to 5 years in jail, to "threaten", "intimidate", or "injure" a witness who appears before Congress on account of his testimony. There is no doubt in my mind that whoever made the decision to fire Fitzgerald violated this statute.

I have written to the Attorney General to urge him to enforce the U.S. Code. That was nearly 10 months ago. But the Justice Department does not seem disposed to take action against members of the administration.

Mr. President, is the Criminal Code for Democrats only? Are Republicans exempt? Does the Justice Department's motto—"Equal Justice Under Law"—have any meaning for this administration?

RIVERTON RECLAMATION PROJECT, CENTRAL WYOMING

Mr. HANSEN. Mr. President, September 10, 1970, was an important day for the State of Wyoming. The House of Representatives passed, with amendments, S. 434, a bill which I cosponsored to reauthorize the Riverton reclamation project in central Wyoming as a part of the Missouri River Basin project and provide for the resale of certain lands on the third division of that project. The bill has been pending before the Congress since 1967, and the House action signals the end of the struggle to revitalize this project which is so essential to economic well-being of the State of Wyoming.

The House committee amendments are minor with the exception of an amendment which rejects the credit to the Midvale Irrigation District of nearly $1½ million which it has already paid to the Federal Government to reimburse the cost of the project. I am disappointed that the House refused to go along with the Senate and credit the district with these payments. A House floor amendment insures that this project will comply with present law controlling water quality standards.

Mr. President it is a blow to any irrigation district when it is not given credit for nearly $1½ million already paid the Federal Government. However, the Midvale Irrigation District is willing to bear the burden of this cost in an effort to get action now.

The important thing at the present time is to get the bill to the President for his signature immediately in order that the land on the third division can

be put on the tax rolls of Fremont County and help to pay for schools and other governmental services in that area as well as to contribute to the economic well-being of the State.

In addition, the road will be cleared for a $12 million rehabilitation and betterment project on the first two divisions. It is essential that this work begin as soon as possible. Structures on the project built 30 to 40 years ago must be restored and thus divert the potential for disasters during the irrigation season.

Mr. President, I wish to thank my colleagues on the Committee on Interior and Insular Affairs for their understanding and hard work in seeing that this legislation was acted upon during this Congress. I also wish to recognize the hard work contributed by members of the House committee. The people that truly deserve credit today are the members of the Midvale Irrigation District who have persevered these many years to get the congressional action necessary to give this project new life.

I strongly urge the Senate to pass promptly S. 434, as amended by the House of Representatives, so that we can begin immediately to implement the provisions of the bill.

FUTURE RIDES SST

Mr BENNETT. Mr. President, in the current debate on the SST it seems that we have heard every possible argument both for and against this new plane. Regardless of the merits of these arguments, however, it should be noted that refusal to go ahead with the SST would mark one of the few times in our history that America has turned its back on a technological challenge.

When this country reached for the moon, there were seemingly insurmountable problems. Yet we said that we would place a man on the moon in 10 years, and we did so. America has come further faster than any other people in human history because we were a breed of optimists who refused to give in to short-range problems.

Now there are pessimists who say that we cannot build an SST because it will pollute our environment. But these critics do not admit the possibility that we may be able to build an SST that will not pollute the environment. They fail to remember that what seems impossible today may well be old-fashioned a decade from now.

This same point was made very well in a recent editorial in the Salt Lake Tribune. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

FUTURE RIDES SST

It can be argued that modern subsonic jets get people where they want to go with all the speed necessary. So why spend billions of dollars and take additional risks of further upsetting the world's environment to build even faster planes?

That's the basic question behind the mounting debate over continuing federal financing of a prototype of an American supersonic transport plane (SST). Opponents of the 1,800 miles per hour SST have put together an impressive argument. They cite increased noise from the plane, sonic booms along its flight path, unjustified costs which will never be recovered; grave danger to the earth's upper air and even the possibility that all life could be wiped from the planet as a result of sustained SST flights.

Proponents discount these claims saying that some are exaggerated, others mere speculation unsubstantiated by evidence. Though conceding increased noise on take-off and annoyance from sonic booms they predict that in the years before the first SST flies it should be possible to neutralize or greatly reduce these drawbacks. Proponents rely heavily on the argument that it is necessary for the U.S. to retain its lead in aircraft manufacture and sales which currently is a major factor in the nation's balance of payments equation and they call attention to the fact that the Russians and the British and French working together, are already flying somewhat slower SST's with which they hope to capture the market.

Wednesday the economy in government subcommittee of Congress' Joint Economic Committee said that the SST development program should be shelved because of hidden cost burdens to both government and consumers and because of imponderable hazards to the environment. Soon the Senate will take up the debate when it considers a House approved bill to continue development of a prototype.

The subcommittee report, written mostly by longtime SST foe, Sen. William Proxmire, D-Wis., put great emphasis on the cost factor. It said there is slight chance the government, under existing contracts, would ever recoup all its investment and could even lose everything it puts into the program, a sum the subcommittee said would eventually exceed $3 billion. The subcommittee discounted the threat of British-French and Russian competition as mostly a myth.

Rep. Clarence Brown, R-Ohio, a subcommittee member who dissented from the Proxmire report, stayed closer to the basic question. He conceded there are technological and economic and environmental challenges facing the SST. But he recognized the one truth that all the others seem to shy from: supersonic transports will be built and they will be the workhorses of the future.

Rep. Brown wants tomorrow's planes to be made in America and we think he is correct. "If the Joint Economic Committee had been advising Queen Isabella," Rep. Brown observed, "we would still be in Barcelona waiting to prove the world round before daring the Atlantic."

It may be unreasonable, it may be contradictory, it may be overly expensive and it may be downright mad, but man has an uncontrollable urge to go faster and to push on. He has the technology to satisfy that urge. The United States may forever forfeit its dominance of the air age if it bucks this tide and opts out of SST competition.

ACTS TO EXTERMINATE CERTAIN GROUPS WOULD BECOME AN INTERNATIONAL CRIME UNDER THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, as all of us focus our attention on the crisis in the Middle East, I recall the testimony of Mrs. Hauser, before the Senate Foreign Relations Subcommittee hearings on the Genocide Convention, in which she maintained the convention would raise to a level of international crime certain acts that were designed to eliminate any ethnic, religious, or racial group within given areas. Certainly, we all are aware of the unrelenting pressure directed toward the Jews by Nazi Germany, as well as other countries today.

Therefore, it is important that we consider ratification of the Genocide Convention, which follows a "tradition of great human rights documents," and guarantees basic liberties for all people. In her excellent testimony, Mrs. Hauser, who is the U.S. Representative to the Human Rights Commission, said:

My final point, and my most important point, is that ratification of the convention would accord with the ideals of human liberty consistent with and in furtherance of the American tradition.

Mr. President, I ask unanimous consent that a portion of Mrs. Hauser's excellent testimony be printed in the RECORD.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

GENOCIDE TREATY FOLLOWS TRADITION OF GREAT HUMAN RIGHTS DOCUMENTS

My final point, and I really believe most important point, is that ratification of the convention would accord with the ideals of human liberty consistent with and in furtherance of the American tradition.

Under article I of the convention, the contracting parties confirm that:

"Genocide, whether committed in time of peace or in time of war, is a crime under international law which they undertake to prevent and punish."

This undertaking is an international commitment to decency and morality consistent with the American tradition. It does not, of course, stand alone. Like other efforts throughout history, from the Ten Commandments through the Magna Carta, the French Declaration of the Rights of Man and the Citizen, the U.S. Bill of Rights, and the United Nations Charter, the convention is above all a statement which advances individual rights and human dignity.

The United States, which was founded on the basis of protest against governmental excesses, and which grew great in substantial measure because it was a haven and the hope for oppressed persons everywhere, and still continues to be, should be in the lead in joining in the declaration of revulsion at the organized effort to eliminate whole groups of people during World War II, and of determination that such an effort shall never be undertaken ever again.

The great documents of human rights in our history have taken various forms. From the laws of Moses to the pact between King and nobles at Runnymede, to the charters of the English, American, and French Revolutions, the essential element was a statement of the rights of free men, coupled with punishment or threat of punishment to those who would abridge these rights. This pattern, too, was followed in the documents that grew out of the rebirth after World War II, among them the convention against genocide.

Until 1945, the efforts to legislate internationally were very limited. The idea that the practices of states themselves could be illegal or could be made illegal dates from the 20th century, and with one or two exceptions, from the end of the Second World War.

The Genocide Convention is designed to raise to the level of an international crime certain horrible acts, such as the effort of Nazi Germany to exterminate all the Jews within its domain, or attempts by other countries to exterminate all the Jews within its domain, or attempts by other countries to exterminate other racial, religious, or ethnic groups within a given country or area.

The definition of genocide as of international concern reflects also the recognition that genocide is typically associated with threats or breaches of the peace. The most flagrant cases of genocide have occurred in major and "total" wars.

Even lesser instances have tended to provoke retaliation, intervention by third parties, and a spread of war and devastation. Thus, steps to curb genocide are also steps in the direction of preservation or restoration of peace.

The Genocide Convention recognizes that both states and individuals must be determined in order to minimize the risk of genocide. Accordingly, states are made to answer in international organs—for example, the U.N. Security Council or the U.N. General Assembly—for actions taken by their governments that might constitute genocide, indeed actions taken in their territory, even without official government sanction, such as by guerrillas, commandos, or the like. In other words, a state is given—properly—the affirmative obligation to prevent and punish genocide within the area it controls.

In addition, individuals are told directly and explicitly that they cannot hide behind actions of governments in which they participate. All those who support or execute a policy of genocide are warned that the world will not tolerate or excuse their behavior.

Thus, while no one can be certain of the effectiveness of any given document, the Genocide Convention goes far to make genocide unattractive even for those who would not shrink from it on moral grounds.

The Genocide Convention is now 20 years old, but it is a living and important document. Our friends are confused and our enemies are delighted at continued U.S. hesitation about the convention. Adhering to the convention now would be a real step in the advancement of America's national interest.

IMPROPER EMPLOYMENT BY FORMER GOVERNMENT OFFICIALS

Mr. WILLIAMS of Delaware. Mr. President, the Washington Star of September 3, 1970, contains an article entitled "Thirty Million Dollars in Loans Backed by FHA for Teamsters Fund," written by Dick Barnes.

The article states that after the Federal Housing Administration guaranteed $30 million in loans for companies under the control of the Teamsters Union, of which James Hoffa is the convicted president, the official who approved this loan become president of a subsidiary of a corporation owned by the Teamsters Union pension fund.

This illustrates the need for the reinstatement of the law which would prohibit any Government official from accepting within a 2-year period employment with any company to which he as a Government official had rendered service.

Certainly, grave questions are raised as to the propriety of this transaction. I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THIRTY MILLION DOLLARS IN LOANS BACKED BY FHA FOR TEAMSTERS FUND

(By Dick Barnes)

SAN DIEGO.—The Federal Housing Administration has taken part in transactions totaling more than $30 million in the last two years involving a Teamsters Union pension fund which has often been investigated.

The government official who approved the arrangements—including one of the largest loan guarantees ever made by the FHA—since has become president of a subsidiary of a corporation partly owned by the pension fund.

The transactions, all involving the FHA's San Diego office, came to light during an Associated Press investigation.

The FHA in Washington says it does not believe it knew at the time of the transactions that they involved the Teamsters Union's Central States, Southeast and Southwest Areas Pension Fund—the nation's largest labor-management pension fund.

The transactions include:

Insuring a $6 million land development loan to a company whose stock is held by the pension fund. The guarantee constitutes 70 percent of all the loans ever made under the Title 10 federal program. It is among the 25 largest guarantees ever made by FHA under any program, the agency said.

Arranging at least $11.8 million in 3-percent-subsidized loans to San Diego corporations which, ultimately, are one-fifth owned by the pension fund.

Insuring a $3.26 million loan at market interest rates for another such corporation.

This Teamsters' pension fund, commonly called the Central States fund, has been the subject of numerous government investigations.

Teamsters President James R. Hoffa was convicted of mail fraud in connection with Central States fund dealings. A federal grand jury is probing the fund's financing of a massive Los Angeles land development project. A lengthy series of federal court trials in New York concerns alleged kickbacks paid to get fund loans.

Despite this attention from government investigators, the fund was able to benefit from FHA programs.

An FHA official in Washington said there is no prohibition against the agency dealing with a union, a union pension fund or a firm whose stock is held by either.

The San Diego transactions were approved by E. L. Tagwerker, then director of the FHA office there.

Tagwerker took early retirement in February and went to work as president of Great Western Mortgage Co., a wholly owned subsidiary of Penasquitos Inc., a land development firm. The president of Penasquitos is Irving J. Kahn, a major San Diego builder who, FHA officials said, negotiated the various loans and guarantees. Penasquitos is 20 percent owned by the Central States fund.

Asked if he had contemplated or received a job offer from Kahn while processing the loans, Tagwerker said "absolutely not."

In answer to questions, Tagwerker said: "I don't know whether FHA at that time (when the transactions were approved) knew anything about Central States, what their ownership position was. I think everybody was aware that Central States had made a loan to Penasquitos."

Leslie Carson, associate general counsel in the Department of Housing and Urban Development, said that, routinely, information on Central States ownership "would not have come to our attention in Washington. But it would be virtually impossible for anybody to certify that nobody knew about it when those transactions took place."

1970 POLICY POSITIONS OF THE NATIONAL GOVERNORS' CONFERENCE

Mr. MUSKIE. Mr. President, at its most recent annual meeting, held August 9–12, 1970, at the Lake of the Ozarks, Mo., the National Governors' Conference adopted a series of policy statements on several of the major issues confronting the Nation.

These policy positions reflect a strong consensus of thinking and attitudes among the elected chief executives of our State governments, and cover a wide range of functions in which effective Federal-State relationships play an important role. Because of their importance in providing both added insight and information on many of the issues before Congress, I ask unanimous consent that they be printed in the RECORD.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

POLICY POSITIONS OF THE NATIONAL GOVERNORS' CONFERENCE

INTRODUCTION

Policy positions on major issues facing the States and the Nation were adopted by the National Governors' Conference at its 62nd Annual Meeting held August 9-12, 1970, at the Lake of the Ozarks, Missouri.

Because these policy positions represent a significantly important consensus of the thinking and attitudes existing in the States' leadership, they are transmitted herein for your information, consideration and action, as appropriate.

In consonance with a resolution receiving unanimous support at this Conference, whenever reference is made in the policy statements to "the States," such language includes the fifty States and, when relevant, the Territories of American Samoa, Guam the Virgin Islands, and the Commonwealth of Puerto Rico.

The Conference Executive Committee ruled that the policy positions adopted at the 1969 Annual Meeting would remain in effect unless specifically amended or deleted by subsequent action.

Thus, these policy positions are the combined product of last year's Conference, the subsequent work of six standing committees, the Conference Executive Committee's review, and discussion and action at the 1970 Annual Meeting.

In addition to these policy positions, the Conference's committees and staffs have produced committee reports and analytical materials in the areas covered by the policy statements.

Additional copies of policy positions and other related materials are available from the offices of the National Governors' Conference.

ADOPTION OF A COMPREHENSIVE NATIONAL COMMUNITY DEVELOPMENT POLICY

Congress and the Administration should develop a comprehensive National Community Development Policy with the effectuating funds, agencies and programs. The Policy should provide the means whereby federal, state and local elected officials should participate directly in the formulation of national policies and goals and the establishment of major strategies and programs for implementation of such policies and goals. The formulation and implementation of such national community development policies in coordination and consonance with state development policies is essential to achieve the objectives of balanced growth.

A National Community Development Policy should embrace the major areas and issues of concern for the quality of life within the United States. The most basic components for consideration in the formulation of this policy are policies relating to population growth and distribution and to economic development. Other components are policies relating to allocation of natural resources, agriculture, transportation, housing, human resource development, and financing and administration—all established in a

manner that will support policies concerning these two basic components.

ADOPTION OF A NATIONAL POPULATION GROWTH AND DISTRIBUTION POLICY

There should be an adoption of a National Population Growth and Distribution Policy, developed in concert with state and local planning policies, to lessen the congestion, and reduce pressure, on the already overburdened resources of our cities, to offer opportunities for the free movement of all of our citizens to realize their maximum personal potential, to match manpower and job training programs with the needs for community development and to lessen the problems of transportation, environmental decay and social service delivery that are not being adequately dealt with for today's population. Such a policy shall be consonant with a rural-urban balance of needs and regional potentials.

ADOPTION OF A NEW COMMUNITIES DEVELOPMENT POLICY

To effectuate a population growth and distribution policy there should be the adoption of a comprehensive New Communities Development Program which would include expanded communities, new-towns-in-towns and new towns as major components of a national policy designed to relieve growth stresses upon existing metropolitan areas and to promote growth in appropriate areas which have growth potential.

ADOPTION OF A NATIONAL ECONOMIC DEVELOPMENT POLICY

A National Economic Development Policy should be adopted to coordinate economic assistance measures with a national population growth and distribution policy, thereby providing the employment concentrations and economic base that will make such a policy workable, offering more efficient operating environments for industry and concentrated employment centers accessible to workers in either rural or urban areas. Such policy should provide additional incentives to private business and look to new ways that public and private interests can be combined to meet public needs.

ADOPTION OF NATIONAL AGRICULTURAL DEVELOPMENT POLICY

There should be a National Agricultural Development Policy as an integral part of a National Community Development Policy to assure the Nation it can feed itself and meet its responsibilities to other people in the world. Such a policy should reflect the importance of and a system for the preservation and maintenance of agricultural land for future supplies and as necessary habitat for wildlife, water resources and hunting and fishing, all of which are a necessary part of providing quality environment in consonance with a population growth and distribution policy. Further, this Policy should focus attention on improving agricultural production capabilities, transportation, foreign market development, processing agricultural products near the source of production and efforts aimed at developing rural America.

In addition, Congress must act on a viable farm program to assure rural America "parity of opportunity" with the rest of the Nation.

A new farm bill by Congress should be shaped to give rural producers an equal opportunity to share in the Nation's prosperity and growth as all other areas. A federal farm program should be continued by the Federal Government until the market can maintain an adequate price for producers.

A strong farm program is recognized as a deterrent to further out-migration from rural areas to crowded metropolitan centers, a necessary element for a growing economy, and vital to providing reasonable food prices for consumers while assuring a fair return for all agriculture producers.

JOINT FEDERAL-STATE EVALUATION OF RURAL DEVELOPMENT PROGRAMS

The new Office of Intergovernmental Relations, in cooperation with the appropriate federal offices and the National Governors' Conference and local government groups, should evaluate the possibilities and mechanisms for better coordination and delivery of federal and State programs in rural areas. The joint evaluation should examine and make recommendations for action on the following issues:

a. Avenues of cooperation between existing HEW, Agriculture, Commerce and HUD programs and state community development programs.

b. Restructuring of federal field operations to support and complement emerging State and local efforts for comprehensive rural development. As federal departments decentralize, they should utilize to the fullest extent possible the personnel, administrative and technical service of state and local government rather than building up federal field staff to handle delegated authorities for decision-making accompanying the federal field office reorganization.

c. Recognition of state designated multi-county planning and development districts, primarily composed of local officials, as the primary delivery system for most state and federal programs in rural areas.

d. Recognition and support of several States as pilot projects for the purpose of coordinating federal and state programs into a package of rural development services.

ADOPTION OF A NATIONAL LAND DEVELOPMENT POLICY

There should be an adoption of a National Land Development Policy providing guidance as to what lands are appropriate for urban development, agricultural production, conservation and open space and recreation. Such national policies must be related to the allocation and conservation of water, air, minerals and other natural resources and be an integral part of a National Community Development Policy.

ADOPTION OF A NATIONAL HOUSING POLICY

There should be an adoption of a National Housing Policy to coordinate housing investment and construction programs with a National Community Development Policy to carry out social objectives of making a place for all social and economic groups, to take advantage of the environmental and efficiency advantages of such a policy, to provide needed governmental aids for supporting housing construction and marketing, with special support programs to assist those who cannot secure decent housing through normal channels, to make maximum use of new technologies, and to stimulate additional investment by private industry and home property owners, thus adding to the overall housing supply, and to insure the availability of sufficient long-term mortgage financing.

EXPANDING THE HOUSING MARKET

All levels of government, in cooperation with private industry, should take action to expand the market for housing production. Special attention should be given to new methods of production, technological innovation, and marketing institutions in the private sectors and to simplified and flexible state housing codes, increased subsidies for low-income housing, land aggregation and tenant relation programs in the public sector. States should assist in the aggregation of public and private land for housing purposes.

CONSOLIDATION AND COORDINATION OF FEDERAL HOUSING PROGRAMS

The Administration and Congress should undertake the immediate streamlining and coordination of federal housing programs: (1) provide for full cooperation with emerging State housing instruments; (2) phase out, merge, and consolidate the numerous federal low and moderate income housing programs and provide incentives and illustrations for program packaging and mixing; (3) substitute State certification of federal program requirements with only a post audit by HUD; and (4) provide federal operating subsidies, as are now provided to federal housing projects, to State public housing projects.

SUFFICIENT FUNDING OF THE HOUSING AND URBAN DEVELOPMENT ACT

Congress should provide sufficient funding for the Housing and Urban Development Act, especially for Section 236 Interest Reduction, Section 235 Home Ownership, Rent Supplement, Public Housing Programs, and Urban Renewal.

ADOPTION OF A POLICY ON THE MODEL CITIES PROGRAM

For a National Community Development Policy to be effective, it should include concepts for the coordinated delivery of services and financial assistance by both state and federal governments, as conceived in the Model Cities legislation. The entire effort must be a coordinated one which focuses the attention of agencies at all levels of government on specific problem areas within our municipalities.

Congress should amend the Model Cities legislation to provide for a legitimate and positive role for State Government in the operation of the program. Specifically, Section 105 of the "Model Cities and Metropolitan Development Act of 1966" should be amended to authorize the Secretary of Housing and Urban Development to make matching grants to the States to provide continuing planning, coordination, programing and technical assistance services to Model City Agencies.

In those States where the State contributes a substantial portion of the local non-federal financial share, the program should provide for State concurrence in the approval of the selection, program development and funding of all Model Cities applications.

HUD should immediately provide for State review and comment on Model City work programs and supplemental grants.

To assure balanced urban-rural growth, consideration should be given to a Model Rural Area Development program patterned after the Model Cities concept.

It is noted most of the poverty in America lies in the very urban and very rural areas of our Nation. Unless immediate steps are taken to develop the delivery system of federal, State, local, and private resources through the concept of model development areas, this gap will widen at the expense of all Americans in both the dominate urban and rural areas of the Nation.

COMPREHENSIVE STATE PLANNING AND COMMUNITY DEVELOPMENT PROGRAMS

Federal agencies should support the efforts of Governors and the appropriate State agencies designated by the Governors to begin coordinated planning of community development programs. The following specific measures should be undertaken by all federal agencies:

a. Federal administrative procedures and new legislation, where necessary, should be developed to provide financial incentives on a continuing basis to the States to "buy-in" to community development programs, specifically model cities and urban renewal. There should be increased federal provision for joint funding to encourage State efforts for the packaging of community development programs.

b. Both federal and state executives should seek sources of flexible funds for use as "glue money" in putting together and implementing coordinated development programs. At

the federal level, these funds could come from Section 701 of the Housing Act of 1954, Title VIII of the Housing Act of 1964, Title IX of the Demonstration Cities Act, from existing funds for state planning for federal programs in functional areas, or from new legislation.

c. States demonstrating a readiness to act in implementing a package of community development programs and to commit State funds should receive priority attention from federal agencies. Federal funds should also be available to encourage States to develop their own competence in community development planning and programming.

STATE PARTICIPATION IN THE RENEWAL AND NEIGHBORHOOD DEVELOPMENT PROGRAM

HUD should immediately issue an addendum to the Urban Renewal and Neighborhood Development Program Regulations that clearly recognizes the role of positive State participation in this program for: (1) local NDP conformity to State renewal policies; (2) State services to NDP's for application preparation, planning, and implementation measures as eligible project costs; and (3) whenever State laws and requirements for renewal exceed federal requirements, that HUD will accept State certification of local compliance without any further review by HUD.

UNIFORM FEDERAL RELOCATION AND LAND ACQUISITION POLICIES

The Uniform Relocation and Land Acquisition Act of 1969 (S. 1) should be enacted as soon as possible, but with the following amendments: (1) deletion of all cut-off dates for the federal funding of the first $25,000 of relocation expenses; (2) retention of shared funding for all costs above $25,000; and (3) provision of matching grant funds to all States that create uniform statewide relocation and land acquisition policies and programs covering all public programs. The July 1, 1970, cut-off date in the Highway Act of 1968 for federal assumption of the first $25,000 in relocation costs should be deleted.

POLICY FORMULATION MECHANISMS

In order that formulation of a meaningful National Community Development Policy may be undertaken, the procedures of the Domestic Council should provide formal means for bringing the President, the Governors and local elected chief executives together on a regular basis to secure an exchange of views and information on National Domestic Policy and priorities. Further, the Council should give due consideration to the inclusion of the Governors and chief local elected officials in the regular meetings of the Council.

Representation of State and local interests among the staff must be assured.

The President will transmit to Congress his annual report and such supplementary reports as he deems necessary to advise as to progress in formulating a National Community Development Policy and suggested implementing actions.

In addition a joint congressional committee on National Community Development Policy should be instituted. It shall make a continuing study of the annual report on National Community Development and its supplements, and study ways of coordinating programs in order to further the National Policy. The legislation shall require the committee to file a report annually containing the committee's findings and recommendations. The committee may make such other reports from the time as it deems advisable. To maximize citizen participation, the committee is encouraged to hold extensive hearings.

GRANTS FOR COMPREHENSIVE PLANNING AND COORDINATION

Assistance should be provided to plan comprehensively at the interstate, regional, metropolitan and local levels; to encourage local governments to cooperate in solving area-wide problems through comprehensive planning, review, and cordination; to foster intergovernmental attacks on problems of national urban and rural development; and to establish a method for exchange of development information among local, state and federal government.

Any legislation should provide that the grants be administered through the Executive Office of the President for distribution to the States, and through them to regions, metropolitan areas, counties and localities.

REVENUE SHARING

The National Governers' Conference went on record in 1965 in support of the principle that the Federal Government share a portion of its revenue with the States, unfettered as to functions for which it is to be used. The Conference reiterates its stand on this matter, and further recommends, consistent with the criteria approved by the Conference in 1968, that a revenue sharing plan be formulated on the following basis:

(1) Congressional appropriations for revenue sharing should be made on the basis of the federal individual income tax base.

(2) Congressional appropriations for revenue sharing should be made to a trust fund established in the Treasury of the United States.

(3) The sums appropriated should be allocated among the States, based primarily on population adjusted by relative state and local tax effort. The relationship between the taxing ability and the percentage of federally-held and administered land acreage in each State should also be considered.

(4) Congress in its appropriations to the States should specify a pass-through formula to local governments. Eighty percent of the monies which are for distribution to local governments should be passed through automatically according to formula to eligible local governments; twenty percent should be passed through to eligible local governments on application of these units to the States, and should be available for programs at the local level which encourage cooperative or joint efforts of local governmental units to solve a common problem.

(5) The federal pass-through formula should provide for sharing revenue only with general purpose units of government.

(6) The allocation by formula should be made to relatively populous cities and counties based on population and the ratio between the total receipts from all taxes imposed by eligible cities or counties and the total receipts from all taxes imposed by the State and its political subdivisions. The portion of any State's allocation which would be available for local governments within the State would depend upon the portion of total tax revenue raised by the State and that raised by the eligible local units in the State. An alternative state allocation plan of distribution should be accepted if (a) each city and county receive an amount equal to or greater than that allocated by formula, or (b) city and county councils or governing bodies representing fifty percent of those entities entitled to receive at least fifty percent of payments by formula concur in the State's alternative plan.

(7) No functions should be excluded from expenditures made from shared funds.

The Executive Committee is directed to employ every means available toward the immediate and favorable enactment of revenue sharing.

TAXATION OF STATE AND LOCAL BONDS

The National Governors' Conference affirms the basic constitutional principle that neither the federal nor state governments without mutual agreement has the authority to tax the other. The Conference therefore asserts that state and local bonds issued for general governmental purposes must remain tax exempt. The Conference commends the Congress for deleting provisions from the final version of the Tax Reform Act of 1969 which would have subjected their bonds to indirect federal income taxation.

We believe that the municipal bond market will and should continue to be an important source of the capital needs of state and local governments. However, the volume of new bond issues by state and local governments will likely grow substantially in the years ahead in order to finance the increasing demands for new and expanded capital facilities. At the same time, events of the last several years show that these bond issues are particularly vulnerable to anti-inflationary monetary policies and interest rate changes. Based on these facts, the National Governors' Conference recognizes the desirability of developing constructive proposals for broadening the market for state and local bonds. Such proposals should not in any way impair the access of state and local governments to the tax-exempt market or infringe upon these governments' independence in debt financing.

INTERSTATE TAXATION OF BUSINESS

For a number of years the National Governors' Conference has expressed opposition to federal legislation which would restrict the taxing jurisdiction of the State and provide preferential tax immunity to favored multistate businesses, and has expressed full support for legislation which would give congressional approval to the enactment of the Multistate Tax Compact by the States.

This Conference now goes one step further in supporting an expanded and/or specific version of a congressional consent bill for the Multistate Tax Compact to allay expressions of concern in the Congress that the original consent bill set out only a broad statement of purpose, and to counter claims that the States were seeking a sort of blank check in the area of multistate taxation.

The Conference therefore urges Congress to enact legislation, drafted by the Advisory Commission on Intergovernmental Relations in collaboration with the Council of State Governments, which incorporates the Multistate Tax Compact and expresses congressional consent to enactment by the States of a compact substantially the same thereto, plus the following additional provisions:

(1) The three-factor formula (Uniform Division of Income for Tax Purposes Act), developed by the National Conference of Commissioners on Uniform State Laws, is made mandatory for net income taxes upon States which have not enacted the Compact by July 1, 1971;

(2) States are given jurisdiction to require collection of sales tax by sellers making interstate deliveries into a State if the seller makes regular household deliveries there; and

(3) Income taxes may be imposed on congressional salaries only by the district and State represented by the Congressman.

TAXATION OF INDUSTRIAL DEVELOPMENT BONDS

The Conference recognizes that so-called industrial development bonds have been used for non-governmental purposes. Unfortunately, federal legislation adopted in 1968 to remove the tax-exempt status of industrial development bonds erroneously included in its definition some traditional governmental functions and thus made them taxable under this legislation. The Conference reiterates its 1968 resolution urging legislation properly to redefine industrial development bonds.

NEW APPROACHES TO FEDERAL-STATE PARTNERSHIP

Since social and economic problems transcend state boundaries, States have long worked together in efforts to solve them. Most major problems today, however, also require federal cooperation and assistance.

Federal-state partnership in regional problems has taken the form of the interstate compact and the regional commission. The

Appalachian Regional Commission has successfully brought thirteen States and the Federal Government together to plan and administer programs in health, education and transportation, assisted by substantial federal bloc grants.

The expiration date in 1971 of current legislative authorization for the Appalachian Regional Commission and five other regional commissions will necessitate a review of the regional concept. As problems of underdeveloped areas and interstate-metropolitan areas become more complex, it is certain there will be an increased demand for an extension of multi-state administration of programs dealing with these and other problems. The National Governors' Conference recognizes the vital need of effective mechanisms for solving such problems. Any new national legislation should include the following basic points:

Allow the establishment of regional commissions as agreed upon by the Federal Government and the States involved;

Provide for Governors to share decision-making authority equally with federal representatives;

Make federal participation directly responsible to the President, and State participation to the Governor;

Provide adequate funds for initial planning and policy development, and adequate authorization for the future appropriations after the priorities of each commission have been determined; and

Should not be used as a substitute for revenue sharing.

FEDERAL ROLE IN STATE PLANNING

Planning has always been a vital element in the decision-making process, and in recent years must effort has been made at the federal and state levels to improve the methods by which it is done. The Federal Government has shown its concern and interest by many programs of assistance to state and local governments for planning. However, many problems have arisen: a multiplicity of planning grants with different federal requirements; uncertain funding; and no integration of plans, especially at the federal level.

The National Governors' Conference urges that:

The Congress and the Administration should take immediate action to correct the confusing, contradictory, duplicative and overlapping mass of federal requirements and definitions concerning both long-range and annual operational plans. Federal agencies should recognize the Governor as the chief state policymaker and planner responsible for the coordination of all statewide and multi-jurisdictional sub-state planning. The elected heads of local government should be recognized in the same capacity for all state and federal programs operating within their jurisdictions.

An appropriate share of the funds of each functional federal grant program should be made available to the Governor for the purpose of relating functional plans to each other, to statewide goals and policies and to local development policies. This effort should begin with HEW which has thirty-nine programs, each requiring a statewide long-range or annual operating plan.

Major federal planning assistance programs should provide for forward funding on a two or three-year basis; minimum annual funding for each State; interprogram service agreements; evaluation machinery; technical assistance, training and tuition fees as eligible project costs; and minimum standardization and coordination of federal planning definitions and requirements.

INTERGOVERNMENTAL COOPERATION ACT

The National Governors' Conference commends the Congress for passage of the Intergovernmental Cooperation Act of 1968, which among other things, provides for keeping Governors and Legislatures informed of federal grant-in-aid rules and regulations, provides a means to obtain flexibility in administration of the "single state agency" requirement, provides flexibility in state banking of federal funds, authorizes federal agencies to render technical assistance and training services to state and local governments on a reimbursable basis, and provides for federal coordination with local authorities regarding land use.

The Conference is gratified at the action of the U.S. Bureau of the Budget in providing directives for implementation of this Act through Circulars A–95, A–96 and A–97. Governors should especially note Circular A–95, which encourages the establishment of clearinghouses and review procedures through which federally aided local and regional planning and development projects can be coordinated with State activities, and projects of different state agencies can be coordinated with one another. This Circular may potentially be used to enhance the ability of the Governor to coordinate the management of state programs.

The Conference urges Congress now to extend the principles of intergovernmental cooperation by enacting legislation which would establish procedures to allow the simplification of accounting, auditing and reporting of federal assistance funds; authorize the President, subject to congressional veto, to consolidate federal assistance programs within agencies; allow joint funding simplification for the packaging of grants for the same or related programs; and provide for periodic congressional and executive review of grant programs to determine their effectiveness.

TRAINING

The growing complexity of state government programs, and of the many intergovernmental programs in which States are involved, is placing an enormous burden upon state officials and employees responsible for the over-all management and unity of state operations. Training is a necessary part of equipping these officials and these employees to carry their burdens.

The National Governors' Conference commends the Council of State Governments for strengthening its training activities: the Conference notes the successful seminar held in December of 1968 for newly-elected Governors and their aides, the continuing work of the Council and the National Association of State Budget Officers in providing policy-oriented training for budget personnel, the newly established training program for legislators and legislative staff, the recent collaboration with organizations of local officials to provide training on matters of intergovernmental concern, and the scheduled 1970 seminar for Governors'-elect and their aides. The Conference urges further intensification of these efforts.

The Intergovernmental Personnel Act now before Congress should help to strengthen state and local training programs. The Conference endorses the objectives of this Act.

CLEARINGHOUSE FOR STATE CONSULTING HELP

All Governors have on occasion needed the temporary assistance of persons from outside their state governments to bring a different perspective to policy issues as well as to bring to bear technical knowledge and experience in various fields of state government. Although private consulting firms and universities have been used to help provide this assistance, a major reservoir of talent, largely untapped, is the State Governments of the Nation. The use of this talent would be of benefit both to the State receiving help and, through broadening the experience of the personnel involved, to the State supplying the expertise.

The National Governors' Conference requests that its Secretariat establish a clearinghouse to enable States to draw upon the experience and talents in the State Governments by helping States define their problems with precision and clarity, and identifying employees in state governments who are qualified to provide effective assistance.

FEDERAL AID INFORMATION SYSTEM

The National Governors' Conference has followed with interest the development of federal aid information systems in the States. States require such a system so that detailed information on federal aid program availability, plans and performance applicable to the State can be ascertained in response to the inquiries and needs of local governments, state officials and congressmen.

The development of information systems on the availability of federal grants-in-aid points up the fact that aggressive "grantsmanship" is required to obtain all funds to which a jurisdiction is entitled. This should not be necessary. Grants should be made on the basis of need, not on the basis of ability to obtain the grant. The Federal Government should provide each State the detailed information necessary for state and local governments to make and receive approval for grant applications.

The States in turn have an obligation to plan for effective use of funds and to report periodically on financial status and program accomplishments.

FEDERAL GRANT-IN-AID APPROPRIATIONS

The National Governor's Conference acknowledges the importance of federal grants-in-aid in the financing of state and local programs. These aids now amount to nearly one-fifth the total federal domestic budget and one-fifth of total state expenditures. Aid programs have proliferated in the past several years, and now number over 100 separately funded activities.

The number of programs and the large amounts of dollars involved make imperative the proper administration of these programs so that the national objectives toward which they are aimed can be achieved. Many of the policy statements of this Conference deal with this issue with respect to individual programs. The Federal Government—the President, Congress, and the administering agencies—should work closely with state officials in developing appropriation and administrative procedures to provide maximum flexibility in carrying out program objectives and maximum certainty of federal action. Specifically, the Conference endorses the following concepts:

block grant legislation to bring together all grants relating to broad functional areas;

grant consolidation, to allow the President to combine grant programs, subject to legislative veto;

joint funding simplification, to allow federal agencies to cooperate with State requests to combine several grants in the administration of one State program;

appropriations consonant with authorizations, to provide a greater degree of certainty in the amount of funding to be expected;

advance funding for at least two years, especially for construction projects, so that the necessary contracts can be let with assurance of fulfillment; and

annual appropriations prior to start of fiscal year, to provide the States sufficient lead time for planning the program and hiring staff.

REGULATION OF INSURANCE

It is long established national policy to leave to the States the basic task of regulating the insurance industry. The States have demonstrated an ability to do a creditable job of regulation, and in the aggregate the insurance industry is well regulated.

The National Governors' Conference opposes federal legislation which would create a federal bureaucracy for the regulation of insurance, and Congress should be ever-mindful of the States' role in this important area. If corrective national legislation is

necessary, the National Governors' Conference stands ready to work with Congress to achieve positive results.

PREAMBLE

At the request of the Executive Committee, the Committee on Human Resources has reviewed the Policy Statements adopted by the Conference in 1969 in the areas of Welfare, Manpower, Health and Education.

Based on this review and on our assessment of the current domestic problems, the Committee on Human Resources reaffirms the 1969 Policy Statements. In the Committee's view those statements continue to express the priorities for domestic action which we, as Governors, believe should guide the Federal Government in the development of domestic programs.

The continuing fiscal crisis faced by the States and their localities grows more urgent and the demand for the basic human services continues to mount. Thus, prompt and effective action remains a most urgent goal of the Committee on Human Resources.

In order to keep the Human Resources policy statements attuned to current developments, the Human Resources Committee submits for adoption by the 1970 Annual meeting of the National Governors' Conference the following indicated amendment and additions to the policy statements on human resources.

WELFARE REFORM

1. Substitution, on a phased basis, of a federally financed system of welfare payments for the current federal-state program for the aged, blind, disabled, and deepndent children, and including also the general assistance programs now financed by the States themselves. Eligibility and grants would be determined by the Federal Government; the system would be state administered under federal guidelines. The system should include realistic income exemptions to provide incentives for persons to seek employment. Adequate day care for children of working mothers and an expanded federal job training program should also be assured.

2. Increase in the present levels for all payments under the Old Age Survivors Disability Insurance Program, with a minimum payment of $100 per month.

3. Transfer of the present Old Age Assistance, Aid to the Permanently and Totally Disabled and Aid to the Blind programs to the Social Security Program, with payments being made from federal general revenues to the Social Security Trust Fund to cover the increased cost.

4. Review by the Secretary of Health, Education, and Welfare of Federal regulations as to their adverse effect with respect to the following.

a. The use of the declaration system for determining welfare eligibility. Any such system, if mandated by the Federal Government, should provide the States with appropriate options and flexibility as to form and content.

b. The continuation of welfare payments during the pendency of appeal to persons whose grants are reduced or who are determined ineligible.

5. To combat hunger and malnutrition:

a. Increased federal funds for the Food Stamp Program so that welfare recipients and low-income persons in all States could be covered by the Food Stamp Program. We commend the Administration and the Congress for the action taken to date and continue to urge full funding for the Food Stamp Program.

b. Removal of existing provisions prohibiting counties and cities from participating in both the Food Stamp Program and the Federal Commodities Distribution Program.

c. Reduction of the purchase requirements for food stamps and, where necessary, provision of free stamps to welfare recipients.

d. Consideration of providing food stamps in lieu of a portion of welfare payments, subject to the approval of the recipient. We commend the Administration for its proposed amendments to the Family Assistance Act in regard to food stamps and urge their adoption.

e. Transfer of the Food Stamp Program, programs under the School Lunch Act and the Commodity Distribution Program from the Department of Agriculture to the Department of Health, Education, and Welfare. We support the Administration's proposal in regard to Food Stamps and urge its adoption by Congress. We also urge that flexibility be provided for unified state administration where desired.

f. Expansion of federal, state and local programs to provide nutrition education.

6. The Federal Government, in cooperation with the States, should work toward the development of a rational assistance system which takes into account the full impact of the total range of direct and indirect aid to the poor. Such a system should include a national eligibility policy which takes into account all sources of income and which provides for a workable work incentive.

7. The Federal Government should establish reasonable national standards of assistance with required regional or geographic differentials.

HEALTH

1. Adoption by the Federal Government of a national universal health insurance program coupled with hospital cost controls as the primary method of keeping rising health costs from preventing all people from receiving the medical care they need. Such a program should utilize the existing private enterprise medical system. Publicly paid programs such as Medicaid should be used only as a secondary program for those who have used up their insurance benefits. Medicaid should be 100 percent federally financed.

2. Adequate funding by the Federal Government of (a) the Federal Supplementary Food Program for low-income groups vulnerable to malnutrition to make selected nutritious foods available to infants, pre-school children, pregnant women and nursing mothers, and (b) programs to provide free or reduced-price lunches and breakasts through schools, summer recreational programs and day care centers to assure all children from low-income families one or two nutritious meals per day. We strongly urge that attempts to curtail the Supplementary Food Program be stopped and that instead it be further expanded to include adolescent children.

3. Expansion of federal and State programs of grants and loan payments to encourage the development and rehabilitation of health facilities particularly in low-income areas where maternal and child health care is inadequate.

4. Review of the formula for the allocation of federal funds for the construction and modernization of health facilities to assure that the funds are being devoted to meeting the Nation's most urgent needs.

5. Assurance that the allocation within a State of federal funds for the construction and modernization of the various types of health facilities be based on priorities developed by the State and be in accordance with plans developed through state comprehensive health planning.

6. Placement of responsibility for comprehensive health planning in the Office of the Assistant Secretary of Health and Scientific Affairs of the U.S. Department of Health, Education, and Welfare. Such a designation by the Secretary of HEW would be complementary to the major responsibility and reliance placed on such efforts by Governors and enhance the possibilities of achieving a federal-state "partnership" for the improvement of health services.

7. We support restoration of proposed cuts in federal funds for the Medicaid Program or assurance that steps will be taken to insure that these cuts are not merely passed back to state and local governments in the form of increased expenditures or result in reduced services for recipients.

8. Removal of ceilings on the amount of federal expenditures for Medicaid in Puerto Rico.

EDUCATION

1. Assumption by the Federal Government of far greater responsibility for the financing of education. Such increased federal financial participation should take the form of general grants to the States for educational purposes. Both the legislation and federal regulations for such a program should leave maximum flexibility to States and localities to develop programs to meet their most urgent needs. The basic purpose of such a program would be to help meet the rapidly rising basic cost of education, not to stimulate new supplementary programs. Such programs should not mandate the creation of any new state or local administrative mechanisms.

2. Adequate advance funding of existing federal programs commensurate with critical education needs.

3. Consolidation of existing federal grant-in-aid programs for education into broad functional categories, thereby increasing the ability of States and localities to design programs within broad federal policy guidelines to meet critical needs in individual States and localities.

4. Maximum administrative simplification of planning, application, allocation, accounting and reporting procedures for all consolidated grant-in-aid programs to assure that the intended purpose of consolidation of grants is not subverted through detailed administrative requirements.

5. We support the President's proposal to establish an intergovernmental commission on education broadly representative of local, state and federal officials and educational personnel to furnish guidance to the Congress, the executive branch of the Federal Government and the States, for most effective educational programs, and to continually review the goals, quality and cost of our educational system.

6. Provision in federal programs for joint federal-state-local development of standardized statistical data and other information necessary for sound analysis of educational needs and programs. Such standardized and comparable data is essential for educational planning at all levels of government. We commend the Administration for its support of this position and continue to urge adequate funding for the National Center for Educational Statistics and for state efforts to redesign and clarify state and local inputs into the National Center.

7. Immediate funding of student loan program by guarantying interest at the prime rate on student loans.

8. The Federal Government should not cut back the funding of the National Defense Education Loan.

9. We support enactment of a comprehensive program of federal support for community colleges, vocational—technical schools, and comprehensive community colleges or their equivalents. Such legislation should assure:

That any such legislation take into account the diversity of State higher and post-secondary education structures.

That community colleges be an integral part of the total higher and post-secondary education programs of the States.

That programs be administered through state agencies designated as responsible for post-secondary and higher educational planning.

That such legislation not call for the creation of new and additional competing state higher educational agencies.

MANPOWER TRAINING AND DEVELOPMENT

1. Enactment of federal legislation which would consolidate federal manpower programs, provide for flexible funding of these programs, and enable the States to coordinate all manpower training and development activities within a State.

2. Review by Governors of the state administrative structure for manpower programs to assure that each State has (a) an effective mechanism to develop a comprehensive statewide manpower plan, and (b) an agency which has the capability to administer a unified system of manpower services.

3. Establishment of a national computerized job bank which would provide information regarding available jobs and job applicants.

4. Provision for systematic review and assessment of the effectiveness of manpower programs.

5. Establishment of State Manpower Training Staffing Centers with federal financial support to assure an adequate supply of trained personnel to plan and administer manpower programs.

6. Increased efforts by States to work with private business to increase job opportunities for the disadvantaged. Specifically, Governors should work with the National Alliance of Businessmen in the development of a statewide "JOBS" program.

7. The National Governors' Conference has called for the enactment of comprehensive federal manpower legislation which would coordinate federal manpower programs. The Conference also endorses a strong State role in manpower programs so that they can be effectively coordinated. If, however, the State is to be given a major responsibility in the area of manpower, it must also be given adequate authority to meet this responsibility. Federal legislation must assure that States are allowed sufficient flexibility to develop, in close cooperation with local officials, the most effective administrative structures possible.

8. We urge an additional federal program for creating new federally financed job opportunities and related employability development and training.

NARCOTICS AND DANGEROUS SUBSTANCES

1. The National Governors' Conference recognizes the growing epidemic of drug abuse and addiction and the need for consideration of this problem by this Committee as well as the Committee on Law Enforcement, Justice, and Public Safety. It further recognizes that this problem is a national crisis and not limited to any geographic, social, or economic group. Therefore, the following steps are recommended:

Federal and state government should cooperate in the development of a coordinated attack on the narcotics and dangerous substances problem. Such an effort should include law enforcement, prevention and treatment. Toward this end, a joint federal-state coordinating committee should be established.

Prompt diplomatic action should be taken by the Federal Government to reduce the illegal importation of narcotics and other drugs.

States, in cooperation with local governments, should undertake a major public preventive education campaign involving a broad range of community resources including local schools to assure that the true nature of drugs and addiction is well-known.

A full range of treatment resources should be made available to all addicts who can benefit from it. Substantial federal financial resources should be devoted to the funding of a broad range of flexible state and local programs.

The States should join with the Federal Government in an effort to determine the basic underlying causes of the growing drug abuse problem. Such a study should examine the underlying social issues which may lead to addiction as well as the causal processes which promote initiation, continuance, termination, and relapse in drug usage.

THE STATE ROLE IN BALANCED TRANSPORTATION PLANNING AND DEVELOPMENT

The Governors of the States pledge their continued action to deal with the expanding and changing transportation needs in the decade of the Seventies.

1. We commend the U.S. Transportation Department for its development of a National Transportation Policy which centers the responsibility and power for priority decision-making in the chief executives of the States.

2. We call upon all States to study the need to develop administrative and legal mechanisms to plan, develop, finance, construct, administer and regulate the comprehensive transportation system which the citizens of our States deserve. Many States have taken such action by creating state departments of transportation.

3. We strongly endorse the continuation of the Highway Trust Fund as an inviolate source of revenue to the States. We strongly urge the early completion of the Interstate System, with funds thereafter being available to the States for the updating and renewal of our primary and secondary highways, as well as urban systems.

4. We endorse the creation of the Airport/Airways Development Trust Fund, supported by a separate fund source and not from the Highway Trust Fund.

5. We urge the creation of an Urban Mass Transportation Trust Fund, supported by a separate fund source and not from the Highway Trust Fund.

6. We urge the continuation of federal financial assistance programs dealing with railroads, waterways, and highway safety.

7. Each State should be guaranteed that its proportionate share of funds under each trust fund will not be reduced. Furthermore, the Federal Government should not be permitted to divert any trust funds.

8. The Governor, as the elected chief executive of his State, is in the best position to determine the transportation needs and priorities of his own State. Therefore, the Governor must be free from federally imposed restrictions in determining transportation priorities. Federal legislation should be amended to allow each state chief executive the flexibility to carry out the state-determined priorities and needs for transportation development. The Governor should be permitted to exercise his executive prerogatives in meeting the needs of his State by having the ability to transfer, upon a limited basis, funds among the various federal transportation trust funds and grant programs to meet his own State's priority transportation needs.

TRANSPORTATION AND THE ENVIRONMENT

The National Governors' Conference pledges a continued fight against the pollution of our environment by the wastes and by-products of our growing transportation system.

The Governors believe the following problems should be the subject of a sustained anti-pollution effort by the States and the Federal Government:

1. Air pollution caused by gasoline powered automobiles, diesel trucks, locomotives and ships, and aircraft fueled with kerosene and gasoline;

2. Water pollution caused by the spillage from vessels of untreated sewage, oil from machinery and bilges, and crude petroleum spills from tankers;

3. Land pollution caused by sewage discharge from railroad trains, by abandoned automobiles, by litter, and the scarring of landscape from removal of coal and other fuel sources;

4. Noise pollution and nuisance caused by aircraft, autos, trucks, railroad trains, and ships, and by heavy construction associated with transportation.

Perhaps in no other aspect of transportation is there a greater need for States to be free from restrictive federal pre-emption. The Governors call upon the federal government to provide effective minimum standards to protect the basic health and safety of every citizen, while leaving state governments free to deal with problems that have reached extraordinary severity, or to respond to citizen demands for a higher level of environmental quality than that which would be supported nationwide.

The Governors pledge a sustained effort to develop a combination of laws and programs which will punish pollutors of the environment, while providing incentives where necessary to those whose efforts can combat environmental decline. The Governors call upon the Federal Government to join with the States in a vast research effort to measure pollution and to apply innovative technology in discovering new sources of energy and new techniques of reducing and dispensing of wastes produced by our transportation system.

The Governors pledge increased emphasis in the design of highways and other transportation systems so that these facilities complement rather than conflict with the total environment in both its natural and man-made aspects. Further, programs for the preservation and development of historic and scenic vistas along transportation corridors should be encouraged by the reward of additional federal financial assistance for increased state and local action, rather than by the present threat contained in the Highway Beautification Act, of a ten percent penalty in highway funds.

HIGHWAYS

The National Governors' Conference supports continued development of a national, state and local network of highways, streets and roads which are well planned, coordinated, and safe. Highways will continue to be the principal mode in America's transportation system even as it becomes more flexible and balanced in the future.

The Governors urge the following action as part of the partnership between State and Federal Governments in highway construction:

1. Funds from the Highway Trust Fund should not be suspended or withheld; and we hereby request the Executive Committee to take necessary steps to provide that court action be undertaken to challenge the authority of the Executive Branch of the Federal Government to withhold distribution of Highway Trust Funds.

2. Apportionments from the Highway Trust Fund should be made as soon as possible after the 1st of July for the following fiscal year to enable the States to adequately plan their highway construction program.

3. The revolving fund within the Highway Trust Fund, set aside for the advance purchase of right-of-way, should be made available as soon as possible, and continued as a measure of economy and planning.

4. Federal fuel taxes should not be increased to the detriment of the States' ability to use the fuel tax as a source of revenue for the construction and maintenance of the highway system.

5. Primary authority for coordination, planning and flexible distribution of trust funds within the States should continue to be at the State Government level.

6. After completion of the present Interstate System, the Highway Trust Fund should be continued as part of the flexible fund described above. The basic purpose of the Highway Trust Fund in the post-Interstate period should be to strengthen the primary and secondary system, as well as urban systems. Completion of the Interstate System has linked the Nation together as never before, thereby encouraging addi-

tional travel which has placed a heavy burden on those portions of the urban primary and secondary streets and road system that are outdated and inadequate.

7. We endorse the concept of developing a system of scenic highways to allow access to national and state parks and improved recreation areas.

8. We recommend that further study be given for methods by which States can implement the provisions of the Relocation Assistance Program contained in the Federal Highway Act of 1968. Intergovernmental cooperation is needed to overcome the many legal and administrative problems created by this program.

HIGHWAY AND MOTOR VEHICLE SAFETY

The National Governors' Conference views with alarm the tragic number of preventable highway and traffic accidents. We urge the following action to strengthen the intergovernmental effort to make our streets and highways safe:

1. We support the National Highway Safety Administration and commend its creation as recognition of the severity of this problem, and the need for a coordinated attack upon the causes of highway deaths and injuries.

2. The Congress should give its full support to the highway safety program by appropriating the funds necessary to accomplish the mandate of the National Highway Safety Act.

3. The Congress should amend the Act so that funds for highway safety will be allocated in a bloc grant directly to the appropriate state agency designated by the Governor.

4. An incentive program should be developed to reward States with progressive highway safety programs. This would replace the present ten percent penalty clause in the Act.

5. The President should seek the advice and consent of the Governors when selecting representation from individual States for his National Highway Safety Advisory Committee.

6. There should be greater coordination of research conducted by the National Highway Safety Administration, the States and private industry. The Bureau should act as a clearinghouse and information source for such an exchange of information. The Administration should consult with the vehicle equipment safety commissioners of the States when determining minimum standards for vehicle equipment, and should design standards which are sufficiently flexible to permit States to impose additional requirements where conditions warrant.

7. The Bureau should work with the Governors in encouraging the efforts of the private sector in each State to develop public awareness of highway safety.

AIRPORT DEVELOPMENT

The States pioneered in the development of comprehensive airport plans and construction of aviation facilities. Following World War II, cities, counties, and public authorities began the construction of large airport facilities, using excess military airports. In 1946 the Federal Government for the first time began a program of limited financial assistance for airport construction. Forty-eight States have state aviation agencies with varying responsibilities. Twenty-five States own and operate more than 700 airports. Forty-three States have budgeted nearly $180 million for fiscal year 1970 for airport development.

Despite this considerable effort, the National Governors' Conference expresses its great concern over the growing over-loading of our national airways and airport system to meet the air transportation needs of the United States. We commend the Congress for enacting a major new program of financial assistance for airport development. However, this initial step must be supported by the following additional action:

1. Federal legislation imposing new or increased taxes and user charges, particularly taxes on aircraft fuel and terminal use fees, must not preempt but rather preserve the power of States and localities to collect appropriate taxes and fees to support their share of costs for airport development and improvement.

2. The development of a comprehensive National Airport System Plan should be based upon individual State Airport Systems Plans, developed in cooperation with federal and local governments.

3. Sufficient funds must be made available from the new federal legislation for airport planning activities at the state government level. We urge the Secretary of Transportation to set aside not less than one-third of all planning funds in the new Act for use solely by state aviation and planning agencies.

4. We urge all States to join the twenty-seven States which have adopted the "Uniform State Channeling of Federal Airport Funds Act" as drafted by the Federal Aviation Administration in cooperation with the Council of State Governments.

5. We urge all States to consider provisions for connecting ground transportation when preparing airport plans.

URBAN MASS TRANSPORTATION [1]

States are employing broad and varied tools to aid public transportation systems. Every State has exercised its authority to form areawide mass transit districts, and to grant them taxing authority and bonding powers. Several States are now providing direct capital grants for the construction of mass transit facilities. States are involved in providing operating subsidies, and States have used their powers of taxation and tax exemption to stimulate the development of transit service.

State action is a must because of the nature of mass transit problems. The State has the responsibility to give each urban region the attention it requires, but also a responsibility to coordinate among the individual units in that region. The State can usually help resolve conflicts between city and suburban political subdivisions.

The development of adequate, modern systems of urban mass transit is essential to the continued life of the urban areas within our States. To accomplish this purpose, the National Governors' Conference urges the following action:

1. The establishment of a National Public Transportation Trust Fund. The program should be adequately funded by the Federal Government to meet the needs of both the large urban areas requiring subway or rail transit systems, and the growing urban areas requiring bus transportation facilities.

2. The federal assistance program should provide for channeling of transportation assistance funds through an appropriate state agency. The applicant for assistance under the Act should first receive state approval certifying his proposed project as part of or consistent with a statewide or regional comprehensive transportation plan.

3. The Governor or his designee should have authority to set priorities for the funding of public transportation projects within the State, and these priorities should be honored by the Federal Department of Transportation.

4. The establishment of a major federal grant program to States for public transportation planning and development should require recipient States to have a program of tax exemption or financial assistance to public and private transit systems, a specific statewide agency responsible for public transportation development, and a statewide transportation program in progress.

5. The Congress should act to exempt public and private transit systems from the federal gasoline tax, thereby providing these systems with a form of badly needed financial relief that has already been provided at the state level in several cases.

RAILROADS

The National Governors' Conference is concerned about the decline of the railroads as a major element in the American transportation system. The railroads are essential to the continued economic role to fill in the movement of persons. To strengthen our Nation's rail system, we urge the following:

1. Federal legislation which would provide for the establishment of a national rail passenger system, with financial assistance from the Federal Government and private industry, and a significant role for the States in the determination of necessary services and facilities for a balanced rail transportation system.

2. Federal legislation to create a federal-state partnership in regulating the safety of our railroad system. We urge legislation providing for State regulation of all stationary railroad facilities including roadbeds, grade crossings, and station installation, and for federal financial assistance in this intergovernmental effort.

3. The Congress should conduct a complete investigation of present federal laws, regulations and policies now governing the railroad industry to determine what unnecessary burdens and impediments are placed upon the industry, inhibiting its adequate maintenance and development. This study should include an examination of the role and policies of the Interstate Commerce Commission and the Department of Transportation, and it should study methods for maintaining inter-city service.

4. State and local governments should completely review their laws and regulations affecting taxation of railroad property and imposition of unneeded manpower requirements. A careful study should be made of the cost burden paid by railroads for construction and maintenance of grade separations and crossings to determine an equitable method of sharing the costs between the beneficiaries.

5. We commend the Congress for its farsighted action in creating the research and development programs for railroads and high-speed ground transportation. We urge continued, adequate funding for these programs.

6. We call upon the railroad industry to recognize its responsibility to the American people to use new initiative and energy in improving passenger service. Better management techniques and creative investment of resources can strengthen this vital component of the Nation's transportation network.

WATERWAYS

The National Governors' Conference supports the establishment of national, uniform standards for safety in the manufacture and maintenance of boats. We support continued State licensing and regulation of boat operators and operations.

We recognize the growing need for ferry

---

[1] Scheduled for consideration on August 10, this policy position was referred back to the Committee on Transportation, Commerce, and Technology, at the request of the Committee Chairman, to be considered in the context of revisions to policy position D.—1 which had been previously referred back to the Committee for further study and final action on August 12. Although not brought to the floor as a separate policy proposal in the Conference's final actions on August 12, it was the Committee's intent that this policy position be considered in conjunction with policy position D.—1 which was approved by the Conference. Technically, this policy position (D.—6) may be considered as policy of the Committee on Transportation, Commerce, and Technology.

boat and water surface transportation systems where these are the least expensive and most practical way of extending transportation connections. We call upon the Federal Department of Transportation to initiate an action program to give aid to those parts of the Nation in need of such water transportation development.

COMMUNICATIONS

The National Governors' Conference recommends to the Congress and to the Federal Communications Commission the full reexamination of the present allocation of the frequency spectrum.

Special attention should be given to the increasing need to allocate radio frequencies for emergency and public services. A special frequency, common throughout the Nation, should be established for emergency medical services to facilitate communications between ambulances and hospitals.

COMMERCE

The National Governors' Conference endorses development of a commercial freight rate structure which is non-discriminatory and does not promote inefficiency, and we urge Congress to undertake a study to this end.

ADMINISTRATION AND IMPLEMENTATION OF THE OMNIBUS CRIME CONTROL AND SAFE STREETS ACT

(a) *Condemnation of LEAA*

The National Governors' Conference commends the administrators and staff of the Law Enforcement Assistance Administration for their extensive and helpful cooperation with the States in implementing the Omnibus Crime Control and Safe Streets Act of 1968. Their actions in fostering the development of qualified staff at the state level, providing wide latitude to the States in developing plans for improving the entire criminal justice system, and generally supporting the general state partnership required in a bloc grant program sets an outstanding example that could well be emulated by other federal departments. Their efforts to insure the success of this first program embodying a true bloc grant approach to an intergovernmental problem are noteworthy.

(b) *Fiscal policies*

The National Governors' Conference strongly urges the Congress of the United States to provide full funding for the Omnibus Crime Control Act to insure the effective accomplishment of intergovernmental crime control action in dealing with one of the Nation's most serious domestic problems. We urge uniform matching requirements for all of the programs under the Omnibus Crime Control Act, including discretionary money, at a ratio of ninety percent federal and ten percent non-federal matching.

We oppose the mandating by Congress of bloc grant funds for any specific program purpose thus limiting the States' flexibility.

We oppose the administration of bloc grant funds in so restrictive a manner as to, in effect, make them into a categorical program.

We also oppose any action by the Congress which would mandate a specific percentage of State appropriated funds to match local crime control programs.

STATE-CITY COOPERATION

The National Governors' Conference restates and reemphasizes its commitment to vigorous and effective action to control the burdening crime problem in the urban areas of our States. Recognizing that the plague of crime knows no jurisdictional boundaries, the Governors of the States pledge their active support to the comprehensive planning and intergovernmental action called for in the Omnibus Crime Control Act of 1968. The Governors are firmly committed to the need for a working partnership with elected and other policy-making officials in the counties and municipalities of our States to accelerate efforts in developing comprehensive metropolitan crime control programs and facilities. We support and encourage voluntary State assistance to local governments for criminal justice programs.

CRIMINAL CODE REVISION

The National Governors' Conference finds that one of the most critical needs in the improvement of many States' criminal justice systems in the revision, modernization and simplification of the criminal code, including a model sentencing code. The Governors of the States pledge their commitment to request the State legislatures, in cooperation with the appropriate state and local criminal justice officials and members of the bar, to review and, where necessary, revise the State criminal code immediately, and at least once each decade thereafter.

The National Governors' Conference requests that the American Bar Association, together with other national organizations of the criminal justice bar and bench, provide professional leadership by assisting the States in this code revision effort. We urge careful consideration by all States of the American Bar Association Standards for the administration of Criminal Justice.

The Governors urge the United States Department of Justice to establish a clearinghouse for state criminal code revision efforts. This office should serve only as a source of advice and information-sharing among the States.

CRIMINAL JUSTICE SYSTEMS IMPROVEMENTS

The National Governors' Conference expresses its strong commitment to the integration and cooperation of all state and local criminal control efforts into a streamlined efficient system of criminal justice administration:

A. To this end, the Governors of the States support, encourage and will pursue the following steps to aid law enforcement officials:

1. Personnel:

a. Development of minimum statewide professional standards for police recruitment, training and performance, and improvement in law enforcement officers' salaries.

b. Development of incentive or merit systems to insure recognition and advancement of those who excel.

c. Recruitment and training of staff and auxiliary service personnel to relieve the law enforcement officers from clerical and support duties.

d. Development of comprehensive law enforcement officer training programs to include operations, public administration, law, technology, available social services and human relations.

e. Encouragement of educational advancement to work-study programs, in-service training, and scholarships for full and part-time professional study.

2. Resources:

a. Development of a statewide integrated information and communication system to facilitate intergovernmental cooperation in crime control.

b. Development of statewide or regional crime laboratories.

3. Relationship to the community:

a. Programs of public support and education to improve understanding and cooperation between the citizen and the law enforcement officer, including education programs at the junior and senior high school levels, to develop understanding of the criminal justice system.

b. Increased recruitment for police service careers from among persons of all races and economic situations.

B. To this end, the Governors of the States support, encourage and will pursue the following steps to improve the judicial process:

1. Personnel:

a. Request legislation establishing statewide professional and educational standards for all judges and court administrative officials, elected or appointed, to state or local courts.

b. Establish statewide minimum salaries for all judges and court administrative officials.

c. Establish procedures for the administration of judicial conduct, discipline and retirement.

d. Institute statewide assigned counsel or defender systems, financed by the jurisdiction which has the responsibility for prosecution.

2. Organization:

a. Create unified systems with specialized branches where appropriate.

b. Urge the Congress to ratify the Interstate Agreement on Detainers on behalf of the Federal Government.

3. Procedures:

a. Improve jury selection systems by modernizing criteria for exclusion from duty, instituting better record-keeping, and increasing compensation for public service.

b. Modernize archaic court procedures in areas such as providing expanded pre-trial discovery, extending prosecution's right to appeal from pre-trial rulings suppressing evidence, and providing simple state post-conviction procedure.

c. Institute statewide procedures for promoting just and uniform sentencing.

d. Institute procedures to require counsel for a parole violator.

C. To this end, the Governors of the States encourage, support and will pursue the following steps to aid and improve the corrections system:

1. Personnel:

a. Commit additional resources to probation and parole sources to reduce the existing imbalance between institutional maintenance and field services.

b. Improve recruitment, training and retention of correctional personnel by increases in salary, scholarships for professional training and intensive in-service training programs.

c. Institute probation and parole services which make use of volunteers and some professional aides, including ex-offenders.

d. Develop improved standards and procedures for parole decision-making.

2. Institutions:

a. Establish and enforce statewide standards for jails and detention institutions.

b. Provide separate detention facilities for juveniles and women.

c. House and process persons awaiting trial separately from convicted offenders.

d. Provide separate treatment for individuals requiring specialized rehabilitation, such as narcotics addicts or alcoholics, on a regional or statewide basis.

3. Programs:

a. Development of more intensive community treatment programs as alternatives to institutionalization.

b. Upgrade basic education and vocational training for inmates, and institute programs for job development, placement, and follow-up.

c. Design all rehabilitation programs so that they improve the re-entry of offenders into the community.

d. The consolidation of the administration of state correctional programs.

e. Adoption of the Interstate Correctional Compact providing for regional and interstate cooperation for the development of correctional institutions and programs.

D. Total system needs:

Development of mandatory statistical data collection and analysis for all components of the criminal justice system including police administration, court caseload, correctional data, and expenditures by state and local governments for criminal justice institutions.

THE PREVENTION AND CONTROL OF JUVENILE DELINQUENCY

The National Governors' Conference believes that any attempt to comprehensively

prevent and control juvenile delinquency calls for bold, broad, basic and new approaches including redeployment of personnel and resources.

Commitment to the task of preventing juvenile delinquency requires:

a. Commitment to long-term research and development adequate to cope with the complexity of the delinquency problem.

b. A conscious broadening of the framework within which the problems are analyzed and remedies sought. There must be a willingness to examine and challenge all traditional operations.

c. The significant involvement of youth in any community's effort to understand and prevent juvenile delinquency.

d. Coordination of private and public services to youth including character building efforts and those geared to correction and rehabilitation.

e. Focusing attention and efforts on youth at an earlier age than we have previously.

f. A careful reevaluation of the unique role of the family in American societies.

g. Realism about the cost of long-range preventive efforts.

h. Establishment of vocational schools without severe standards and criteria to give every boy and every girl an equal education in the area of high rate unemployment.

In recognition of the key role which State Governments play in the intergovernmental effort to prevent and control juvenile delinquency, the Governors of the States urge that each State undertake to provide leadership and funding for the coordination of planning and services of all state agencies which contribute to the prevention, control, and treatment of juvenile delinquency. Such coordination should encompass the States' effort under the Omnibus Crime Control and Safe Streets Act. Each State should emphasize and strengthen its commitment to programs designed to prevent delinquency, giving particular emphasis to home and school-centered programs aimed at youth who are in danger of becoming delinquent.

Because of the seriousness of the problem of juvenile delinquency and the need for major governmental action, the National Governors' Conference expresses its concern with the Juvenile Delinquency Prevention and Control Act of 1968. We find that it is poorly drafted as enacted, that it is inadequately funded, and that its administration is not properly coordinated with that of the Omnibus Crime Control Act. We urge that the Congress of the United States amend the Crime Control Act to provide for the transfer of the responsibility for administration of Title I of the Juvenile Delinquency Prevention and Control Act to the Law Enforcement Assistance Administration.

ORGANIZED CRIME

The National Governors' Conference pledges full support and cooperation in the intergovernmental war on organized crime. To this end, the Governors of the States recommend the following actions by federal, state and local authorities:

a. Enactment of general witness immunity statutes at federal and state levels.

b. Formation of organized crime intelligence units in the offices of appropriate state agencies designated by the Governor and in local law enforcement agencies.

c. The continuation of federal technical assistance and training programs designed to assist in the development of competent staff for state and local jurisdictions, and the funding of federal assistance for development of state intelligence systems.

d. The creation and financing of state level programs to investigate the problems of organized crime, including the infiltration by crime syndicates into legitimate businesses and state and local governments, by focusing public attention upon the problem by means of crime commissions and grand jury investigations.

e. The drafting and publication by the Suggested State Legislation Committee of the Council of State Governments of a Model State Corrupt Business Practices Act to aid States in preventing the infiltration and takeover of legitimate businesses by organized crime forces. Such a proposed law should include provisions for cancelling the State charters and licenses for any businesses so undermined.

f. The drafting and publication by the same Committee of a Model State statute to implement appropriate procedures for wiretapping and electronic surveillance and investigation by authorized law enforcement agencies, and to implement the provisions to Title III of the Omnibus Crime Control and Safe Streets Act of 1968.

DRUG ABUSE

The National Governors' Conference is concerned with the extensive proliferation of the narcotics and drug abuse problem. Because of its multi-faceted nature and complexity, it is both proper and necessary that the problem be addressed by this Committee as well as the Committee on Human Resources. To combat the pervasive problem of narcotics and drug abuse, the Governors of the States recommend the following urgent efforts:

1. Federal and State Government should cooperate in the development of a coordinated attack on the narcotics and dangerous substances problem. Such an effort should include law enforcement, prevention, and treatment. Toward this end, a joint federal-state coordinating committee should be established.

2. Enactment by the States of the Uniform Controlled Dangerous Substances Act, as well as other drug control legislation which:

a. Grants courts and correctional authorities sufficient flexibility with user to permit individualized sentencing and treatment, and the imposition of appropriately severe sentences for pushers and sellers.

b. Requires prompt disposition of the offender's case.

c. Effectively unified all state drug control programs and coordinates all private and public efforts to control drug abuse.

3. Development of state programs for the rehabilitation and treatment of offenders requiring close supervision and control while correcting problems of drug abuse by providing alternative methods for disposition of drug users by the establishment of adequate facilities for both voluntary and involuntary admissions and for out-patient treatment programs.

4. Development of more aggressive efforts in customs and law enforcement by the Federal Government in cooperation with state officials in the border states to halt the illegal importation and smuggling of drugs, narcotics, and other dangerous substances. The Federal Government should simultaneously undertake efforts at the diplomatic level to achieve this purpose.

5. The enactment by the Congress of the proposed Controlled Dangerous Substances Act of 1970, as proposed by the U.S. Department of Justice.

6. The enactment of interstate compacts to further cooperation among the States in the control of drug and narcotics abuses.

THE CRISIS OF UNREST

The National Governors' Conference recognizes and supports the historic and constitutional right of all citizens to dissent from public policies, and to seek to change such policies through public assembly, and through the peaceful expression and exchange of views.

Violence and disorder are not justified in a democratic society. We condemn lawlessness on all sides, be it by those who dissent from public policies, those who support them, or those who are called upon to keep or restore the peace. We affirm that the first responsibility of the peace-keepers is to protect the safety and lives of all those involved; however, we recognize also the correlative right of the peace-keepers in the discharge of this responsibility to use such force as may be necessary for their own self-protection.

We believe that change in a democratic society must be achieved through the calm and reasonable exchange of views. And to that end we urge greater dialogue and understanding among all segments of our society so that we might prevent the polarization of views, and the escalation of differences to the point of violence.

On the campus, we believe that the faculty and administration have the primary responsibility for the prevention of disorder and the preservation of the tranquility of the learning community. But we also affirm the right and responsibility of the State to act to restore peace both on the campus and in the larger community when other means have been tried and have failed.

We also pledge our efforts toward the constant renewal and revitalization of the institutions of our society . . . not only in education but in government and business as well . . . to prevent them from becoming impersonal toward the citizen, neglectful of the society, and brittle or unresponsive to each generation of Americans.

FIREARMS CONTROL

The National Governors' Conference, recognizing the varying requirements for firearms legislation in each State, recommends and will pursue legislative enactment of:

1. Federal and State laws controlling the transportation and possession of military-type firearms and ordnance, other than small arms.

2. State laws prohibiting certain categories of persons, such as habitual alcoholics, drug addicts, mental incompetents, persons with a history of substantial mental disturbance, and persons convicted of felonies, from buying, owning, or possessing firearms.

NATIONAL GOALS ARE NEEDED

There is a need for the President and Congress to set national goals in the fields of ecology, environment, conservation, and population. It would simplify the direction of state and local efforts if they could mesh their goals with national goals. These goals should stand out as signal flags on the halyards of our ship of state so that all could see them and understand them.

STRONG STATES IN THE FEDERAL SYSTEM ARE NEEDED

There must be a constant recognition of the need to place as much responsibility as possible in planning and action at the state and local levels, including such action that might necessitate interstate compacts. The unique abilities of State and local government to recognize priorities at the grass roots level should be respected and understood by the Federal Government. State governments should be permitted to set higher minimum standards than the Federal Government in the fields of environmental management and conservation.

The States need as much flexibility as possible in adjusting state and local programs to those needs unique to the area, economy, etc. Therefore, the bloc grant approach to federal planning and action funds disbursement is preferred over categorical grants.

MORE RELEVANT EDUCATIONAL EFFORTS IN ENVIRONMENT, CONSERVATION, AND POPULATION ARE NEEDED

We must recognize the urgent need for the teaching of environment, conservation, and population as a major basic educational requirement in primary, secondary, and higher education. Curricula of traditional offerings at all levels of education need to be ex-

amined for their relevance to the rapidly changing conditions of environment, natural resources, and population.

The competition for students' attention to a wide range of study matter should not be allowed to prevent a full understanding of the natural forces at play on this planet. Too often in the past, students have not been adequately taught the subjects of environment, conservation, and population, and have not learned the interrelationship of these subjects. Yet failure to understand this relationship could possibly spell mankind's doom if informed action based on knowledge is not taken by the public.

States should require a constant updating of educational curricula in order to strengthen the offerings in environment, conservation, and population.

A NATIONAL VOLUNTARY POPULATION DISTRIBUTION POLICY IS NEEDED

The United States needs to develop a national policy on voluntary population distribution. It is now projected that the population of the United States will rise from 200 million people at present to more than 300 million people by the year 2000.

Our Nation has practiced population distribution incentives in the past through such devices as the Homestead Act. A new and fresh approach to population distribution at the present time is needed.

The social and economic problems of overpopulated areas include ghettos; poverty; mass transit demands; overloaded educational, health, and recreational services; pollution of air and water; increased crime; and a growing level of individual frustration and nervous tensions.

On the other hand, underpopulated areas are suffering high economic and social costs as well. These costs are brought on by an inadequate tax base and too few people to support necessary institutions on a community basis such as schools, churches, hospitals, recreational areas, etc.

Environmental management and conservation become excessively costly because of the severe population imbalance between the overpopulated States and those which are underpopulated.

The Federal Government, through its inadvertent and uncoordinated planning and programs, is one of the major factors in creating population imbalance.

There are remedies that should be attempted to alleviate population imbalance. Subsidized low interest rates could be offered on loans for industrial expansion in under populated areas. Manpower training programs to assure an employee supply to industries which would expand outside of congested areas could be implemented. A revamping of the Interstate Commerce Commission freight rates, which now make economic expansion virtually impossible in some underpopulated areas, could be adjusted to permit industrial expansion in underdeveloped areas.

Federal tax incentives might be given to industries that locate away from overpopulated areas. Special federal grant programs to strengthen the desirability of living in underpopulated areas might be made. Grants for educational, health and recreational services necessary in order to attract people to live in areas now considered underpopulated would lessen the cost and burden of trying to provide these same services to the same people if these people are attracted to densely populated areas.

NATIONAL AND STATE COASTAL ZONE POLICY PLANNING AND MANAGEMENT ARE NEEDED

A. National coastal zone management

The coastal zone presents one of the most perplexing environmental management challenges. The thirty-one States which border on the oceans and the Great Lakes contain seventy-five percent of our Nation's population. The pressures of population and economic development threaten to overwhelm the balanced and best use of the invaluable and irreplaceable coastal resources in natural, economic, and aesthetic terms.

To resolve these pressures, two actions are required. First, an administrative and legal framework must be developed to promote balance among coastal activities based on scientific, economic, and social considerations. This would entail mediating the differences between conflicting uses and overlapping political jurisdictions.

Second, efforts must be made to gain additional knowledge of the nature of the coastal zoning and the multiple effects that different uses would have upon our environment.

States must assume primary responsibility for assuring that the public interest is served in the multiple use of the land and water of the coastal zone. Local government cannot be expected to cope with the broad spectrum of interrelated coastal problems, nor can local political subdivisions be expected to make their judgments consistent with those of many interlocking political jurisdictions.

Coastal states, because of unique conditions existing along their shorelines, have advantages in coping with coastal zone planning and management that the Federal Government does not have. The Federal Government, however, should establish incentives and assistance to help the coastal states prepare plans and action.

The ultimate success of a coastal management program will depend on the effective cooperation of federal, state, regional, and local agencies. At the federal level, this would require the development of goals and an administrative framework which would avoid the existing duplication, conflict, and piecemeal approach that is too often typical of federal planning assistance programs. Any federal legislation which attempts to establish a coastal program must allow States the necessary flexibility for creating management instruments most suited to their specific conditions.

Basic to a coastal management program are the funds necessary to plan and take action. The requirements for coastal zoning management are so urgently needed in the Nation's interest that federal monies must be made available to the States at a level which will not only provide incentive, but will allow an adequate program to be developed based on federal, state and local participation.

Any attempt to diminish the federal financial participation or to shift the burden to the States will result in irreparable delay and inadequacy in bringing under control the serious coastal environment and natural resource conservation problems.

B. Coastal States organization

In recognition of the need for preserving the invaluable and irreplaceable marine resources of the Nation, and in response to the National Governors' Conference, policy statement calling for the formation of a maritime states organization to pursue those ends, the Coastal States Organization was established.

Among its responsibilities, the Organization will:

(a) contribute to the development of common policy regarding national coastal zone management legislation and programs, and serve as spokesman for the maritime states, territories, and trust territories on marine and coastal affairs;

(b) provide mutual assistance in solving common State and intermarine resource problems; and

(c) serve as a clearinghouse for information relative to marine activities of the member States.

In affirmation of the responsibilities and powers of the States in the management of marine and coastal affairs, and in recognition of the purpose of the Coastal States Organization to further these goals, the Governors urge all eligible States to become members of the Organization, and encourage the full cooperation of all States, inland as well as coastal, in the efforts of the Organization.

A CHANGE IN NATIONAL ATTITUDES TOWARD NON-REPLACEABLE NATURAL RESOURCES IS NEEDED

There is a growing need to establish a new attitude in America among consumers which differentiates between quality of living and standards of living, as well as quantitative consumption and quality of life.

For example, we should examine the wisdom of our present system of reduced electric power rates as a reward for heavy consumption when that consumption might be beyond the electric consumption needed for a specific business or residence.

A flat rate for an adequate amount of electric energy based on the size of family or industrial need could be established. Sharply rising rates for electric consumption above the adequate standard set would provide a penalty for that waste which does not contribute to our economy or to the quality of living.

The consumption of non-replaceable coal in the thermo-generation of electricity which is wasted does not add to the quality of life and is an example of squandering natural resources without significant benefits to mankind.

Waste of fresh water cannot be tolerated indefinitely. Less than one percent of the water on the face of the earth is potable. In the face of rising populations and per capita water use, we are faced with the need to conserve our precious water resources by eliminating unnecessary waste. Wasted water adds nothing to our quality of living.

The same principle which applies to the wasteful use of electric energy and potable water can be applied to the use of petroleum products in our automobile engines. States should consider a policy of encouraging smaller but adequate engines through sharply graduated license fees which discourage larger than necessary engines that do not contribute to the quality of living. There are far too many vehicles in use today which wastefully consume the non-replaceable crude oil resource and add unnecessary pollutants to the air.

The national attitude which equates some forms of waste with a high quality of life needs to be changed. Waste does not add to the quality of life, but in fact denies a high quality of life to future generations.

STATE LAND USE PLANNING IS NEEDED

There is an interest and need for a more efficient and comprehensive system of national and statewide land use planning and decision-making. The proliferating transportation systems, large-scale industrial and economic growth, conflicts in emerging patterns of land use, the fragmentation of governmental entities exercising land use planning powers, and the increased size, scale and impact of private actions have created a situation in which land use management decisions of national, regional and statewide concern are being made on the basis of expediency, tradition, short-term economic considerations, and other factors which are often unrelated to the real concerns of a sound land use policy.

Across the Nation, a failure to conduct sound land use planning has required public and private enterprise to delay, litigate, and cancel proposed public utility and industrial and commercial developments because of unresolved land use questions, thereby causing an unnecessary waste of human and economic resources and a threat to public services, often resulting in decisions to locate utilities and industrial and commercial activities in the area of least public and political resistance, but without regard to

relevant environmental and economic considerations.

The land use decisions of the Federal Government often have a tremendous impact upon the environment and the patterns of development in local communities; that the substance and the nature of a national land use policy ought to be formulated upon an expression of the needs and interests of state, regional, and local government, as well as those of the Federal Government. Federal land use decisions require greater participation by state and local government to insure that they are in accord with the highest and best standards of land use management and the desires and aspirations of state and local government.

The promotion of the general welfare, and to provide for the full and wise application of the resources of the Federal Government in strengthening the environmental, economic and social well-being of the people of the United States, we believe, is a continuing responsibility of the Federal Government, but should be consistent with and recognize the responsibility of state and local government for land use planning and management.

There should be undertaken the development of a national policy, to be known as the National Land-Use Policy, which shall incorporate environmental, economic, social and other appropriate factors. Such policy shall serve as a guide in making specific decisions at the national level which affect the pattern of environmental and industrial growth and development on the federal lands, and shall provide a framework for development of interstate, state and local land use policy.

The National Land Use Policy should:

1. Foster the continued economic growth of all States and regions of the United States;

2. Favor patterns of land use planning, management and development which are in accord with sound environmental principles and which offer a range of alternative locations for specific activities and encourage the wise and balanced use of the Nation's land and water resources;

3. Favorably influence patterns of population distribution in a manner such that a wide range of scenic, environmental and cultural amenities are available to the American people;

4. Contribute to carrying out the federal responsibility for revitalizing existing rural communities and encourage, where appropriate, new communities which offer diverse opportunities and diversity of living styles;

5. Assist State Government to assume responsibility for major land use planning and management decisions which are of regional, interstate, and national concern;

6. Facilitate increased coordination in the administration of federal programs so as to encourage desirable patterns of environmental, recreational, and industrial land use planning; and

7. Systematize methods for the exchange of land use, environmental and economic information in order to assist all levels of government in the development and implementation of the National Land Use Policy.

Intelligent land use planning and management provides the single most important institutional device for preserving and enhancing the environment and for maintaining conditions capable of supporting a quality life while providing the material means necessary to improve the national standard of living.

FULL FUNDING AND IMPLEMENTATION OF STATE COMPREHENSIVE OUTDOOR RECREATION PLANS IS NEEDED

Remaining undespoiled natural areas of wetlands, forests, plains, deserts, and mountains are being exploited and despoiled at an alarming rate. The expenditure of outdoor recreational funds should not be diverted from the urgent need to acquire and protect these natural areas.

Crash funding programs that seek to carve urban parks in the midst of urban glut are dramatic examples of inadequate planning. The overcoming of inadequate planning in the past through crash programs should not be allowed, through the monopoly of limited funds, to perpetuate inadequate planning, insufficient preservation, and too late acquisition for future generations.

Meanwhile, however, we must also recognize that these long range plans are being eroded by present and increasing pollution of our water resources.

The National Governors' Conference, therefore, calls upon the Congress and the Administration to support also the appropriation of the full 1.25 billion dollars authorized by the Congress for the construction of waste water treatment plants. Any retreat from this promised federal commitment will further delay the way when American citizens will have access to adequate supplies of unpolluted water for recreational and other uses. Further delay will also increase the construction costs involved in bringing about clear waters, and it will represent a betrayal of those States which have, through prefunding, relied on past federal promises that funds would be forthcoming by now.

Full funding and implementation of state comprehensive outdoor recreation plans and national sewage treatment plant construction programs is the best means of solving both short-run and long-run recreational problems of megalopolis.

A REVITALIZATION OF FORESTRY BY ALL OWNERSHIPS IS NEEDED

There is an urgent need to revitalize forestry efforts nationally on all ownerships. The timber supply situation has pointed up the need for strong direction by the Administration.

The future demands for lumber and forest products will provide increased competition between the many uses of a shrinking forest land base. There are presently substantial acreages of state, private and federal lands potentially capable of producing forest products, but are in need of reforesting.

Proven timber management practices could be instituted by the Forest Service and the Bureau of Land Management and other public and private forest management agencies to promote increased or high yield timber growth on existing timber-producing lands, provided funds were made available for this purpose.

The Federal and State Governments need to establish a policy to encourage reforesting of denuded publicly-owned commercial forest lands.

Existing programs need to be strengthened to offer greater inducements for private landowners to reforest their lands. A great number of public values would thus accrue, beyond those to the landowner individually. Such benefits as establishing and improving watersheds and water quality, arresting soil erosion, improving flood control and stream sedimentation, wildlife habitat and recreational opportunities would result. The increased fiber would contribute to the housing needs of a growing Nation.

NATIONAL CLEARINGHOUSE AND REGISTRATION OF CHEMICALS

Whereas, over 6,000 chemicals are released into our air, water and land; and

Whereas, there is a need to study and analyze all chemicals before they are introduced into our environment; and

Whereas, there is a need to continuously monitor all chemicals in the environment:

Now, therefore, be it resolved that the National Governors' Conference urges that a national clearinghouse be established to 1) register all chemical compounds released into our environment, 2) pre-screen each chemical as to its ecological effects prior to its introduction, and 3) continuously monitor these chemicals in our environment, and that this action by the member Governors be transmitted to the President as evidence of our sincere and genuine concern.

VIETNAM PRISONERS

The National Governors' Conference is united in expressing outraged indignation at the consistently inhumane treatment of United States soldiers held captive in North Vietnam.

Identities of prisoners are kept secret. Mail from relatives is not delivered. Representatives of internationally recognized agencies are not permitted access to prisoners. All these things are in blatant violation of the Geneva and Laos agreements.

We condemn this despicable circumstance which causes unnecessary anguish to the men, their families and friends. And we urge United States authorities and those in other civilized nations to mobilize all agencies at their disposal to correct these abominable conditions.

UNITED STATES TERRITORIES AND COMMONWEALTH OF PUERTO RICO

All policy statements of the National Governors' Conference, wherever, reference is made to "The States," or "The Fifty States," etc., shall also include where relevant the additional words "and the Territories and the Commonwealth of Puerto Rico".

PRESIDENTIAL VOTE FOR PUERTO RICO

Section 5 of the Organic Act of 1917, an Act to provide a civil government for Puerto Rico, extended American citizenship to the people of Puerto Rico. However, United States citizens residing in the Commonwealth of Puerto Rico who are eligible to vote cannot do so for President and Vice President of the United States.

Equally, residents of Puerto Rico who move to the States and who otherwise qualify as voters become eligible to vote for President and Vice President of the United States. Residents of the several States who are otherwise qualified to vote become ineligible to vote for President and Vice President of the United States if they move to Puerto Rico. Purely geographical considerations should not control the right of American citizens to vote for their President and Vice President.

Since 1917 the people of Puerto Rico, under the same obligation as citizens of a State, have served in the Armed Forces of the United States with distinction.

Considering that effective participation in the political process of the government is an integral part of American citizenship, the President of the United States and the Governor of Puerto Rico have appointed a Joint Committee to study the Presidential vote for Puerto Rico.

In view of the above, the National Governors' Conference assembled in Lake of the Ozarks, Missouri, in recognition of the contributions made to our Nation by the U.S. citizens of Puerto Rico, recommends that should they request it, the people of Puerto Rico be granted the right to vote for President and Vice President of the United States.

A copy of this statement should be transmitted to the President of the United States, the Speaker of the House of Representatives, the President of the Senate, and the Chairman of the Ad Hoc Committee on the Presidential Vote for Puerto Rico.

EARTH WEEK

Whereas, there is an urgent need to promote a broader awareness and understanding of the environmental crisis facing each and every state in the United States; and

Whereas, there is a compelling need to encourage a continuing commitment by all interests including education, agriculture, business, labor, and civic and private organizations, to work to solve these fundamental environmental problems:

Now, therefore, be it resolved that we as Governors assist in focusing the Nation's attention on environmental problems and their solutions by declaring the third week in April "Earth Week" in our respective States and seek the broadest participation in its activities.

MERCURY CONTAMINATION STANDARDS

Mercury contamination of the Nation's streams poses danger to the health and well-being of our people and has brought forth expressions of protests and dismay from all parts of our Nation.

Approximately one-third of the States have streams which are involved with mercury contamination, thus indicating a need for corrective activity on the federal level.

The States directly involved with this grave problem have, by their respective separate actions, diligently pursued diverse courses of remedial and corrective measures, all well intentioned but lacking in uniformity so essential in interstate matters. Thus, due to the interstate nature of our streams, any corrective activity involving regulatory measures should emanate on the federal level and should afford a just and equal criteria for all of the States involved.

It is imperative that certain measurable minimum amounts of allowable mercury outflow should be established which would not constitute a health hazard to the people of America. The Federal Water Quality Administration is the appropriate agency to initiate corrective measures which would be effective and binding throughout the several States; therefore, the National Governor's Conference urges the Federal Water Quality Administration to immediately initiate action for the determination of minimum amount of mercury outflow which would not constitute a hazard to public health, and upon such determination promulgate regulations having equal application throughout the Nation sufficient to insure that such minimum mercury outflow is not exceeded and that such regulations contain appropriate enforcement provisions.

RED CROSS DISASTER RELIEF NEEDS

Whereas, the American Red Cross is the established agency for the provision of family relief in the event of disaster and catastrophe, providing assistance that is not duplicated by any public or private program; and

Whereas, the emergency relief funds of the American Red Cross have been seriously depleted by the provision of disaster relief to the victims of Hurricane Camille in Mississippi one year ago and to those who suffered in the great tornado that struck Lubbock, Texas, in May, 1970; and

Whereas, the people of Corpus Christi and of the Central Texas Gulf Coast were devastated by Hurricane Celia on Monday, August 4, 1970; and

Whereas, more than 65,000 families in this area suffered loss, 8,950 homes being destroyed, and 55,650 homes being damaged; and

Whereas, 30,000 of our fellow citizens have received emergency assistance from the American Red Cross in the form of food, clothing, temporary housing, and medical care; and

Whereas, the need is very great for additional funds to permit the American Red Cross to carry out its mission of mercy for the victims of Hurricane Celia with a minimum of $6 million being needed at once:

Now, therefore, be it resolved by the National Governors' Conference that all citizens of the United States are urged to assist the victims of Celia by making generous voluntary contributions through their local Red Cross chapters to sustain the disaster relief program thereby showing their sincere and genuine concern for their fellow men.

RESOLUTION OF APPRECIATION

The National Governors' Conference expresses its sincere gratitude to Governor and Mrs. Warren E. Hearnes, Mr. and Mrs. Gene Sally, and Mr. and Mrs. Frank J. Iuen, III, for their untiring efforts in making its 62nd Annual Meeting, August 9 to August 12, at Lake of the Ozarks, Missouri, an inspiring and memorable experience. To the very special guests, the Conference offers its heartfelt thanks for their excellent contribution and participation. To all those that took part in the thoughtful and beneficial program session, the Conference expresses deep gratitude. And to all others who helped plan and carry out the myriad array of activities, the Conference extends its appreciation and thanks for cooperation and friendly attitude exhibited by everyone involved in presenting the Annual Meeting.

The National Governors' Conference also expresses its appreciation to Governor John A. Love for his tremendous job and great leadership as Chairman.

We are grateful to Governor and Mrs. Hearnes and Governor and Mrs. Love for making this a productive and thoroughly enjoyable Conference.

We express appreciation to Charles Byrley and the staff of the National Governors' Conference and to Brevard Crihfield and his staff for the efficient and orderly manner in which this Conference has been handled.

The "Red Carpet" hospitality that was rolled out for the Governors, their families and staffs beautifully demonstrated that "Missouri *does* love company"—and we love Missouri hospitality and the Missourians who have made this Conference possible.

We further express our appreciation to the members of the news media for their extensive coverage of our deliberations and the courtesy they have shown to the Governors and their families. We appreciate their professional efforts to inform the public regarding the matters of serious concern which have been the subject of our discussions.

THE DISECONOMIES OF AIR POLLUTION

Mr. NELSON. Mr. President, the massive cloud of polluted air which hung over a large part of the east coast during the last week in July was an ominous harbinger of the type of environmental crisis which we can expect to experience with increasing frequency throughout the metropolitan regions of our country unless we are willing to make the national commitment to take the necessary steps to bring a halt to air pollution. In particular, this means a direct confrontation with the source of over 60 percent of the entire Nation's air pollution—the internal combustion engine.

The health of millions of Americans is presently being compromised by air pollution and auto emissions. These health costs are difficult to measure because human lives are involved, but Dr. Lester B. Lave and Eugene P. Seskin, of Carnegie-Mellon University of Pittsburgh, have made a dollar estimate of the quantitative effect of air pollution and human health in the lead article of the August 21 issue of Science. Also, the August 17 issue of U.S. News & World Report contains an exclusive study of that magazine's economic unit which documents in hard dollar terms the enormous pollution price tag which this country must pay each year in damage caused by air, water, and solid waste pollution.

I call the attention of the Congress to the diseconomies of air pollution and other attacks upon the environment and ask unanimous consent that the U.S. News & World Report article entitled "Pollution Price Tag: $71 Billion" and the Science article entitled "Air Pollution and Human Health" be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

[From U.S. News & World Report, August 17, 1970]

POLLUTION PRICE TAG: $71 BILLION

Controversy is boiling up anew over what to do about polluted air, water and land in the U.S.—and how much the cleanup job is going to cost.

Now an authoritative study puts a price tag on the task: 71 billion dollars of new spending in the next five years.

Of that total, about 54 billions is required to clean up waterways, 13 billions to combat dirty air and 4 billions to improve methods for disposing of solid wastes.

The study, just completed by the Economic Unit of "U.S. News & World Report," notes that even 71 billions may not be enough to do the job. And it makes this additional point: Ultimately, consumers everywhere are the ones who will foot the bill, whatever it turns out to be.

Spending to save. The outlays, large as they loom, will not be money down the drain, the study points out.

Cleansing the environment actually will save the country vast sums, in addition to enhancing the quality of day-to-day living.

Polluted air costs 13.5 billions a year in property damage from soiling, corrosion and abrasion of materials. Nobody knows how many more billions should be added for healthcare bills and the loss of farm crops.

Similarly, polluted water costs the nation 12 billion dollars a year. The five-year economic loss of 60 billion is more than the estimated tab for making waterways cleaner. And improving the disposal of solid wastes, authorities say, would contribute to better public health, save money on trash collection, incineration and dumping.

"A national obsession." Regardless of cost, it seems clear that Americans suddenly have decided it is time to tackle the environmental crisis head on.

In the words of one expert: "What for years was the concern of only a handful of scientists and conservationists suddenly has become a national obsession."

A raft of menacing developments has spurred demands for action. For example—

Major cities along the East Coast were smothered in choking smog in late July and early August.

Streams and lakes in seven States have been closed to commercial fishermen because of evidence of mercury poisoning of fish.

An oil spill, described as the worst in New England's history, smeared beaches on Cape Cod as the summer vacation season moved toward its peak.

Autos and trucks, the single biggest source of contaminated air, are coming in for heightened criticism. Fifteen States filed suit in the Supreme Court on August 5 seeking to force auto makers to produce pollution-free cars "at the earliest possible date."

If the fight against polluted air, water and solid waste is to be won, officials say, it must be waged simultaneously on all three fronts. Here, from the Economic Unit Study, is a detailed look at each aspect of the problem.

AIR POLLUTION

Just coming to light is the fact that cleaner air can save the U.S. economy about

11 billion dollars a year. That is because the expense of freshening the atmosphere is figured at 2.6 billion annually, compared with damage estimated at 13.5 billion a year.

Says John T. Middleton, Commissioner of the National Air Pollution Control Administration:

"Government and industry together are spending only millions annually to fight air pollution.

"When we consider the priceless benefits of clean air to our health, adequate control of pollution is a bargain."

Air pollution corrodes steel 200 to 400 per cent faster in urban, industrial areas than in the countryside. Cleopatra's needle, an ancient Egyptian obelisk, has been more deeply eroded since coming to New York City 89 years ago than it was in the 3,000 years it spent in Egypt.

Farm losses caused directly by air pollution are put at 500 million dollars annually, not to mention indirect costs that have never been reckoned. For example, growth of cattle has been stunted in areas where pollution is bad.

California farmers and ranchers suffer the most from dirty air. Their losses last year alone were put at 132 millions. Half of the citrus crop was lost.

Property values are depressed in residential areas where air is dirty. A new analysis by air-pollution-control authorities compares selling prices of homes in various neighborhoods in Washington, D.C., Kansas City, and St. Louis. Homes in areas of greatest air pollution generally bring $300 to $500 less than comparable dwellings in cleaner communities.

Widespread medical surveys confirm the health hazards of polluted air. A recent study by the Albert Einstein College of Medicine in New York shows that daily mortality rises in New York City when the level of air pollution goes up. Another report, on elementary-school children living in the most heavily polluted areas of London, shows a higher incidence of respiratory disease than for children in less-polluted areas of the same city.

What causes air pollution in this country? Sources of contamination include 103 million motor vehicles, as well as factories, power plants, municipal dumps and incinerators. Toxic pollutants from all these are released into the atmosphere at a rate of 214 million tons a year—more than a ton for every American.

The National Air Pollution Control Administration lists the five worst air contaminants this way:

Carbon monoxide: 100 million tons a year. This tasteless odorless lethal gas comes largely from autos, trucks and buses. Even in small doses it affects reflexes and judgment.

Particulates: 28 million tons. These are tiny bits of solid matter, some of which are dangerous irritants. They come mainly from smokestacks.

Sulfur oxide: 33 million tons. An irritating gas, it comes mostly from the burning of coal and oil. It affects the lungs and throat and aggravates respiratory ailments.

Hydrocarbons: 32 million tons. Half originates in discharges from trucks and autos. These chemicals are a key ingredient in smog. Some hydrocarbons are suspected as cancer-producing agents in cigarettes.

Nitrogen oxide: 21 million tons. Another smog ingredient, this gas pours out of motor-vehicle tailpipes and also comes from fuel burned at stationary sources.

Says a public-health official:

"Air pollution costs each American $65 a year. For those who live in the most highly polluted areas, the cost per person, including higher medical bills, household maintenance and other expenses, can be more than $200 yearly."

Autos spew some 91 million tons of toxic gases annually into the atmosphere. The fight against this source of contamination is gaining momentum as control standards become more stringent year by year. Proposed 1975 standards call for a cut of 97 per cent in hydrocarbons and 91 per cent in carbon monoxide below the levels in 1963, when cars had no pollution-control devices.

Motorists already are beginning to shoulder the expense of cleanup of the internal-combustion engine. Pollution-control devices to meet standards through 1974 will cost the driving public an additional $48 per unit, or a total of 2.6 billion dollars. Maintenance bills for these devices will total an additional 300 million over the same period.

By 1975, when stricter standards for auto emissions are expected to become effective, the cost per unit is estimated by industry sources at $200—a total of 2 billion dollars. Motorists will pick up another 1-billion-dollar tab in higher prices for nonleaded gasoline.

Apart from autos, the next-largest amount of air pollution comes from fuels—coal, oil, gas-burned in the nation's 60 million residential heating units, 100,000 commercial and institutional heating plants, 307,000 industrial boilers and 410 power plants producing steam and electricity. All told, these sources annually pour 46 million tons of pollutants into the air. Estimated cost of control over the next five years: 4 billion dollars.

Industrial plants put some 29 million tons of toxic pollutants into the air each year. Seventeen industries, ranging from iron and steel to cement and fertilizers, are classified as "major air polluters." For some businesses, cost of upgrading facilities to cut air contamination, will be substantial.

For example, in terms of cost per $100 of sales at the factory, pollution control will cost $1.94, on average, for iron and steel mills; $2.89 for iron foundries; $3.92 for nonferrous-metal plants; 1 cent for petroleum refineries; 21 cents for grain mills and 95 cents for cement plants. Over the long run, customers probably will pay in the form of higher prices. The total bill for five years: 1.3 billions.

WATER POLLUTION

Cleaning up waterways will be a monumental and expensive task, the Economic Unit study notes. Money alone will not be enough to accomplish it. More research is needed to uncover sources of pollutants in rivers, bays and lakes.

Laments one Government official:

"Few people thought thermal water pollution, resulting from discharge of heated water from power plants, would be a problem until five or 10 years from now. All of a sudden, the issue has become urgent because of an increase in present and projected nuclear power-plant construction."

Mercury pollution is another example of a new danger just coming to public attention. Only recently have abnormal concentrations of mercury been found in major waterways.

Problems of maintaining water quality are complex. More than 500 new chemicals are developed each year. Many enter and contaminate both surface and ground water. Warns Dr. Harold Wolf of the U.S. Bureau of Water Hygiene: "For most of these new chemicals, we simply do not know what the health effects will be."

The two chief sources of water pollution are municipal sewers and industrial plants. Together they pour more than 45 trillion gallons of waste each year into U.S. waterways.

Consider the problem of inadequate sanitary sewers: about 68 per cent of the population lives in communities with sewers, but almost half the plants serving those places already are overloaded. Some 1,000 communities a year are outgrowing their treatment systems. Seven per cent of all U.S. communities provide no sewage treatment at all.

Raw municipal wastes increase the concentration of bacteria in water, decrease oxygen—this kills fish and creates odors—and promote growth of algae. Fighting the municipal-waste problem will be a continuing struggle, since loads are expected to increase by 400 per cent in the next 50 years.

Industry discharges a huge volume of toxic substances into rivers and streams. More than half comes from four major industries—papermaking, petroleum refining, organic-chemical manufacturing, and iron and steelmaking.

Sediments—washed from croplands, overgrazed pastures, highway construction and bulldozed urban developments—are the most extensive pollutants of surface waters. Cost of controlling such erosion is figured at about $1,000 per mile of new highway, and anywhere from $100 to $1,000 for a single-family home site. All told, erosion control will cost 6.8 billion dollars in the next five years.

Other major water-pollution threats include oil spills, mine drainage, runoff of fertilizers and pesticides from farms, and rubbish and sewage from ships.

SOLID WASTE

Fifty years ago, the typical American generated a bit less than 3 pounds of trash per day. The figure now is about 6 pounds, and by 1980 will rise to an estimated 8 pounds. All told, the country accounts for 3.5 billion tons of rubbish annually. Demand for throwaway containers and other hard-to-destroy convenience products is accelerating the trend.

Richard D. Vaughan, director of the Bureau of Solid Waste Management, comments: "Current disposal practices are unsatisfactory, and upgrading the present system alone will not provide a long-range solution."

The Bureau estimates that a minimum of 4.2 billion dollars in new money is needed between now and 1975 to modernize trash-collection systems, eliminate open dumps and improve incinerator capacity.

At present, solid-waste disposal follows this pattern: 46 per cent is handled by open burning, 16 per cent by incineration and 38 per cent by landfill or dumping in the sea.

These disposal methods have two major drawbacks. They contribute more than 11 million tons of pollutants to the air each year, and most of the practices are unsanitary.

Cost of cleaning up air pollution from solid-waste disposal is estimated at 325 million dollars in the five-year period covered by the Economic Unit study—or 39 cents per ton of refuse. That is relatively small in relation to the cost of the air and water-cleanup bills. It is likely to be reduced even further, because industry is finding profitable ways to reuse many products formerly discarded. Programs are under way to reclaim aluminum from cans, to salvage "one way" glass bottles, to make fertilizer from garbage and trash.

The Nixon Administration is committed to provide leadership and "seed money" to help cope with the environmental crisis. One official notes, however, that the Government is limited in how far it can go. Says this authority:

"Industries that are releasing waste products into the air or water cannot escape the responsibility for cleaning up their own pollutants. State and local governments, too, must do their share, because most programs for curbing pollution are outside the jurisdiction of federal agencies."

All in all, the effort to provide a better environment is shaping up as a job of mammoth proportions. Latest developments point to costly programs involving individuals, business and Government alike.

[From Science magazine, Aug. 21, 1970]

AIR POLLUTION AND HUMAN HEALTH

(Lester B. Lave and Eugene P. Seskin)

(NOTE.—The quantitative effect, with an estimate of the dollar benefit of pollution abatement, is considered.)

Air pollution is a problem of growing importance; public interest seems to have risen faster than the level of pollution in recent years. Presidential messages and news stories have reflected the opinion of scientists and civic leaders that pollution must be abated. This concern has manifested itself in tightened local ordinances (and, more importantly, in increased enforcement of existing ordinances), in federal legislation, and in extensive research to find ways of controlling the emission of pollutants from automobiles and smokestacks. Pollutants are natural constituents of the air. Even without man and his technology, plants, animals, and natural activity would cause some pollution. For example, animals vent carbon dioxide, volcanic action produces sulfur oxides, and wind movement insures that there will be suspended particulates; there is no possibility of removing all pollution from the air. Instead, the problem is one of balancing the need of polluters to vent residuals against the damage suffered by society as a result of the increased pollution.[1] To find an optimum level, we must know the marginal costs and marginal benefits associated with abatement. This article is focused on measuring one aspect of the benefit of pollution abatement.

Polluted air affects the health of human beings and of all animals and plants.[2] It soils and deteriorates property, impairs various production processes (for example, the widespread use of "clean rooms" is an attempt to reduce contamination from the air), raises the rate of automobile and airline accidents[3] and generally makes living things less comfortable and less happy. Some of these effects are quite definite and measurable, but most are ill-defined and difficult to measure, even conceptually. Thus, scientists still disagree on the quantitative effect of pollution on animals, plants, and materials. Some estimates of the cost of the soiling and deterioration of property have been made, but the estimates are only a step beyond guesses.[4] We conjecture that the major benefit of pollution abatement will be found in a general increase in human happiness or improvement in the "quality of life," rather than in one of the specific, more easily measurable categories. Nonetheless, the "hard" costs are real and at least theoretically measurable.

In this article we report an investigation of the effect of air pollution on human health; we characterize the problem of isolating health effects; we derive quantitative estimates of the effect of air pollution on various diseases and point out reasons for viewing some earlier estimates with caution; we discuss the economic costs of ill health; and we estimate the costs of effects attributed to air pollution.

THE EFFECT OF AIR POLLUTION ON HUMAN HEALTH

In no area of the world is the mean annual level of air pollution high enough to cause continuous acute health problems. Emitted pollutants are diluted in the atmosphere and swept away by winds, except during an inversion; then, for a period that varies from a few hours to a week or more, pollutants are trapped and the dilution process is impeded. When an inversion persists for a week or more, pollution increases substantially, and there is an accompanying increase in the death rate.

Much time has been spent in investigating short-term episodes of air pollution.[5] We are more concerned with the long-term effects of growing up in, and living in, a polluted atmosphere. Few scientists would be surprised to find that air pollution is associated with respiratory diseases of many sorts, including lung cancer and emphysema. A number of studies have established a qualitative link between air pollution and ill health.

A qualitative link, however, is of little use. To estimate the benefit of pollution abatement, we must know how the incidence of a disease varies with the level of pollution. The number of studies that allow one to infer a quantitative association is much smaller.

Quantifying the relation. Our objective is to determine the amount of morbidity and mortality for specific diseases that can be ascribed to air pollution. The state of one's health depends on factors (both present and past) such as inherited characteristics (that cause a predisposition to certain diseases), personal habits such as smoking and exercise, general physical condition, diet (including the amount of pollutants ingested with food), living conditions, urban and occupational air pollution, and water pollution.[6,7] Health is a complex matter, and it is exceedingly difficult to sort out the contributions of the various factors. In trying to determine the contribution of any single factor one must be careful neither to include spurious effects nor to conclude on the basis of a single insignificant correlation that there is no association. Laboratory experimentation is of little help in the sorting process.[8]

The model implicit in the studies we have examined is a simple linear equation wherein the mortality or morbidity rate is a linear function of the measured level of pollution and, possibly, of an additional socioeconomic variable. In only a few cases do the investigators go beyond calculating a simple or partial correlation.

A number of criticisms can be leveled at this simple model. No account is taken of possibly important factors such as occupational exposure to air pollution and personal habits. These and other factors influencing health must be uncorrelated with the level of pollution, if the estimated effect of pollution is to be an unbiased estimate. In addition, the linear form of the function is not very plausible, except insofar as one considers it a linear approximation over a small range.

Both because of the rather crude nature of the studies and because of the statistical estimation, there is a range of uncertainty concerning the quantitative effect of pollution on human health. This range is reflected in the estimate of the benefit of pollution abatement, discussed below.

Epidemiological studies. Epidemiological data are the kind of health data best adapted to the estimation of air pollution effects. These data are in the form of mortality (or morbidity) rates for a particular group, generally defined geographically.[9] For example, an analyst may try to account for variations in the mortality rate among the various census tracts in a city. While these vital statistics are tabulated by the government and so are easily available, there are problems with the accuracy of the classification of the cause of death (since few diagnoses are verified by autopsy and not all physicians take equal care in finding the cause of death). Other problems stem from unmeasured variables such as smoking habits, occupations, occupational exposure to air pollution, and genetic health factors. Whenever a variable is unmeasured, the analyst is implicitly assuming either that it is constant across groups or else that it varies randomly with respect to the level of air pollution. Since there are many unmeasured variables, one should not be surprised to discover that some studies fail to find a significant relationship or that others find a spurious one. For the same reason, one should not expect the quantitative effect to be identical across various groups, even when the relationship in each group is statistically significant.

Sample surveys are a means of gathering a more complete set of data. For example, a retrospective analysis might begin with a sample of people who died from a particular disease. Through questionnaires and interviews, the smoking habits and residence patterns of the deceased can be established. The analysis would then consist of an attempt to find the factors implicated in the death of these individuals. Two types of problems arising from such a study are the proper measurement of variables such as exposure to air pollution (there are many pollutants and many patterns of lifetime exposure) and the possible contributions of variables which still are unobserved, such as occupational hazards, socioeconomic characteristics, and personal habits.

Whatever the source of data, the investigators must rest their cases by concluding that the associations which they find are so strong that it is extremely unlikely that omitted variables could have given rise to the observed correlations; they cannot account for all possible variables.

Episodic relationships. Another method of investigating the effects of pollution involves an attempt to relate daily or weekly mortality (or morbidity) rates to indices of air pollution during the interval in question.[10] The conclusions of these studies are of limited interest, for two reasons. First, someone who is killed by an increase in air pollution is likely to be gravely ill. Air pollution is a rather subtle irritant, and it is unlikely that a healthy 25-year-old will succumb to a rise in pollution levels. Our interest should be focused on the initial cause of illness rather than on the factor that is the immediate determinant of death. Thus, morbidity data are more useful than mortality data. Second (and more important for the morbidity studies), there are many factors that affect the daily morbidity rate or daily rate of employee absences. Absence rates tend to be high on Mondays and Fridays for reasons that have nothing to do with air pollution or illness. One would expect little change in these absence rates if air pollution were reduced. Other factors, such as absence around holidays, give rise to suprious variations; this can be handled by ignoring the periods in question or by gathering enough data so that this spurious variation is averaged away. Some of these factors (such as high absence rates on Fridays and seasonal absence rates) may be correlated with variations in air pollution and no amount of data or of averaging will separate the effects. We have chosen to disregard the results of these episodic studies, with a few exceptions, cited below.

It is difficult to isolate the pollutants that have the most important effects on health on the basis of the studies we survey here. Measurement techniques have been crude, and there has been a tendency to base concentration figures on a single measurement for a large area. A more important problem is the fact that in most of these studies only a single pollutant was reported. Discovering which pollutants are most harmful is an important area, where further exploration is necessary. We have tried, nevertheless, to differentiate among pollutants in the survey that follows.[11] The problem is complicated, since pollution has increased over time, and since lifetime exposure might bear little relation to currently measured levels. These problems are discussed elsewhere.[12]

A REVIEW OF THE LITERATURE

We will proceed with a detailed review of studies made in an attempt to find an association between mortality or morbidity and air pollution indices.

Air pollution and bronchitis. Studies link morbidity and mortality from bronchitis to air pollution in England[13], the United States[14, 15], Japan[16], and other countries.[17] Mortality rates by country boroughs in England and Wales have been correlated with pollution (as measured by the sulfation rate, total concentration of solids in the air, a

Footnotes at end of article.

deposit index, and the density of suspended particulates) and with socioeconomic variables (such as population density and social class). The smoking habits of the individuals studied have also been investigated. The conclusion of these studies is that air pollution accounts for a doubling of the bronchitis mortality rate for urban, as compared to rural, areas.

We took data reported by Stocks [18, 19], and by Ashley [20] and performed a multiple regression analysis, as shown in Table 1. We fit the following equation to the data

$$MR_i = +a_1P_i + a_2S_i + e_i \quad (1)$$

where MR_i is the mortality rate for a particular disease in country borough i, P_i is a measure of air pollution in that borough, S_i is a measure of socioeconomic status in borough i, and e_i is an error term with a mean of zero. (We also fit other functional forms, as discussed below.) Under general assumptions, the estimated coefficients (a_0, a_1, a_2) will be best linear, unbiased estimates,[21]. Only if we want to perform significance tests must we make an assumption about the distribution of the error term (for example, the assumption that it is distributed normally).

The first regression in Table 1 relates the bronchitis mortality rate for men to a deposit index (see Table 1, footnote †), and the population density in each of 53 country boroughs. Thirty-nine percent of the variation in the mortality rate (across boroughs) is "explained" by the regression. It is estimated that a unit increase in the deposit index (1 gram per 100 square meters per month) leads to an increase of 0.18 percent in the bronchitis mortality rate (with population per acre held constant). An increase of 0.1 person per acre in the population density is estimated to lead to an increase of 0.02 person per acre in the population density is estimated to lead to an increase of 0.02 percent in the mortality rate (with air pollution held constant). As indicated in Table 1 by the t statistics (the values in parentheses below the estimated coefficients), the air pollution variable is extremely important, whereas the socioeconomic variable contributes nothing to the explanatory power of the regression.

The first ten regressions in Table 1 are an attempt to explain the bronchitis death rate. Four different data sets are used, along with three measures of pollution and two socioeconomic variables. The coefficient of determination, R^2 (the proportion of the variation in the mortality rate explained by the regression), ranges from .3 to .8. Air pollution is a significant explanatory variable in all cases. In only three cases is the socioeconomic variable significant.

TABLE 1.—MULTIPLE REGRESSIONS BASED ON DATA FROM ENGLAND

Category	R^2*	Index†	
		Air pollution	Socioeconomic
Bronchitis mortality rate:			
1. Males, 53 county boroughs‡ (deposit index, persons/acre)	0.386	0.182	0.016
t statistic		4.80	.22
2. Females	.332	.182	−.031
t statistic		4.55	−.42
3. Males, 28 county boroughs§ (smoke, persons/acre)	.433	1.891	.180
t statistic		3.79	1.86
4. Females	.412	1.756	.252
t statistic		3.23	2.40
5. Males, 26 areas (smoke, persons/acre)	.766	.310	.062
t statistic		3.77	.53
6. Females	.559	.303	−.038
t statistic		2.85	−.25
7. Males, 26 areas (smoke, social class)	.783	.301	.176
t statistic		5.86	1.44
8. Females	.601	.213	.248
t statistic		3.31	1.59
9. Both sexes, 53 urban areas§ (smoke, persons/acre)	.377	.199	.159
t statistic		4.07	3.02
10. Both sexes, 53 urban areas (SO_2, persons/acre)	.300	.161	.151
t statistic		3.05	2.64
Lung cancer mortality rate:			
11. 53 county boroughs (deposit index, persons/acre)	.445	.041	.154
t statistic		2.09	4.23
12. 28 county boroughs (smoke, persons/acre)	.576	.864	.161
t statistic		4.08	3.89
13. Male, 26 areas (smoke, persons/acre)	.781	.137	.115
t statistic		2.86	1.70
14. Male, 26 areas (smoke, social class)	.805	.161	.172
t statistic		5.62	2.47
15. 53 Urban areas (smoke, persons/acre)	.344	−.086	.184
t statistic		−2.42	4.83
16. 53 Urban areas (SO_2 persons/acre)	.378	−.105	.197
t statistic		−3.00	5.23
Other cancers:			
17. Stomach, male, 53 county boroughs (deposit index, persons/acre)	0.167	0.070	0.005
t statistic		3.08	.12
18. Stomach, female	.175	.070	−.023
t statistic		3.08	−.56
19. Stomach, male, 28 county boroughs (smoke, persons/acre)	.257	.714	.065
t statistic		2.57	1.21
20. Stomach, female	.454	.883	.066
t statistic		4.13	1.60
21. Intestinal, 53 county boroughs (deposit index, persons/acre)	.041	.018	−.012
t statistic		1.45	−.52
22. Intestinal, 28 county boroughs (smoke, persons/acre)	.129	.174	.036
t statistic		1.26	1.35
23. Other cancer, male 26 areas (smoke, persons/acre)	.454	.019	.073
t statistic		.59	1.60
24. Other cancer, female, 26 areas (smoke, persons/acre)	.044	.039	−.062
t statistic		.93	−1.03
25. Other cancer, male, 26 areas (smoke, social class)	.396	.060	.017
t statistic		2.75	.33
26. Other cancer, female, 26 areas (smoke, social class)	.002	.005	−.013
t statistic		.17	−.19
Pneumonia mortality rate:			
27. Male, 26 areas (smoke, persons/acre)	.477	.118	.121
t statistic		1.34	.97
28. Female	.253	.068	.137
t statistic		.58	.83
29. Male, 26 areas (smoke, social class)	.475	.158	.126
t statistic		2.82	.93
30. Female	.242	.124	.106
t statistic		1.65	.58

*The coefficient of determination: a value of 0.386 indicates a multiple correlation coefficient of 0.62, and indicates that 39 percent of the variation in the death rate is "explained" by the regression.

†The t statistic: for a 1-tailed t-test with 23 degrees of freedom, a value of 1.71 indicates significance at the 0.05 level; for 25 or 50 degrees of freedom, the critical values are 1.71 and 1.68.

‡Data for 53 county boroughs in England and Wales as reported by Stocks (18). Air pollution is measured by a deposit index (in grams per 100 square meters per month) whose observed range is 96 to 731, with a mean of 375. The socioeconomic index is expressed in number of persons per acre (multiplied by 10); the range is 69 to 364, and the mean is 163. Death rates are measured as index numbers, with the mean for all boroughs in England and Wales equal to 100. Ranges within this sample are as follows: bronchitis (males), 73 to 259; bronchitis (females), 72 to 268; lung cancer, 70 to 159; stomach cancer (males), 67 to 168; stomach cancer (females), 84 to 161; intestinal cancer, 87 to 123.

§Data for 28 county boroughs in England and Wales as reported by Stocks (18). Air pollution is measured by a smoke index (suspended matter, in milligrams per 100 cubic meters); the range is 6 to 49. Again, the socioeconomic index is expressed in numbers of persons per acre (×10); the range is 83 to 342.

‖Data for 26 areas in northern England and Wales as reported in Stocks (19). Air pollution is measured by a smoke index, as for category 3; the range is 15 to 562 mg, 1000 m³ and the mean is 260. 1 socioeconomic variable is the number of persons per acre (×10); the range is 1 to 342 and the mean is 102. The other socioeconomic variable is social class; the range is 61 to 295. Death rates are measured as for category 1; within this sample, the range for lung cancer is 23 to 165; for other cancer, 6 to 122 (males) and 88 to 154 (females); for bronchitis, 18 to 259 (males) and 12 to 240 (females); for pneumonia, 61 to 227 (males) and 40 to 245 (females).

¶Data for 53 areas as reported by Ashley (20). Air pollution is measured (i) by a smoke index (as for category 3), with a range of 23 to 261 μg/m³ and a mean of 124, or (ii) by an SO_2 index (apparently in the same units), with a range of 33 to 277 and a mean of 124. Death rates are measured as for category 1; within this sample, the range for lung cancer is 70 to 146, and for bronchitis, 64 to 186.

The implication of the first regression is that a 10 percent decrease in the deposit rate (38 g 100 m^{-2} $month^{-1}$) would lead to a 7 percent decrease in the bronchitis death rate. Another way of illustrating the effect of air pollution on health is to note that, if all the boroughs were to improve the quality of their air to that enjoyed by the borough having the best air of all those in sample (a standard deposit rate for all boroughs of 96 g 100 m^{-2} $month^{-1}$), the average mortality rate (for this sample) would fall from 129 to 77. Thus, cleaning the air to the level of cleanliness enjoyed by the area with the best air would mean a 40 percent drop in the bronchitis death rate among males in the fifth regression. The pollution index is a smoke index (Table 1, footnote §), and a different set of areas is considered. This is a more successful regression in terms of the percentage of variation explained. As before, the air pollution coefficient is extremely significant, and the implication is that cleaning the air to the level of cleanliness currently enjoyed by the area with the best air (15 mg/100 m^3) would lower the average bronchitis mortality rate from 106 to 30, a drop of 70 percent. Results of the other regression analyses based on bronchitis mortality data have similar implications. Note that the effect is almost the same for males and females. This indicates reliability and suggests that the effect is independent of occupational exposure.

Winkelstein *et al.*[14] collected data on 21 areas in and around Buffalo, New York. A cross tabulation of census tracts by income level and pollution level shows that the mortality rate for asthma, bronchitis, and emphysema (in white males 50 to 69 years old) increases by more than 100 percent as pollution rises from level 1 to level 4 (see [22]).

These studies indicate a strong relationship between bronchitis mortality and a number of indices of air pollution. We conclude that bronchitis mortality could be reduced by from 25 to 50 percent depending on the particular location and deposit index, by reducing pollution to the lowest level currently prevailing in these regions. For example, if the air in all of Buffalo were made as clean as the air in those parts of the area that have the best air, a reduction of approximately 50 percent in bronchitis mortality would probably result.

Air pollution and lung cancer. The rate of death from lung cancer has been correlated

Footnotes at end of article.

with several indices of pollution and socioeconomic variables in studies that provided controls for smoking habits and other factors. For English nonsmokers, Stocks and Campbell [23,24] found a tenfold difference between the death rates for rural and urban areas. Daly [25], in comparing death rates in urban and rural areas of England and Wales, found the urban rate twice as high. Evidence for other parts of Europe also shows an association between lung cancer and air pollution.[26]

Regressions 11 through 16 (Table 1) show our reworking of the data for lung cancer mortality for England and Wales (there is no control for smoking). Regressions 11 through 14 imply that, if the quality of air of all boroughs were improved to that of the borough with the best air, the rate of death from lung cancer would fall by between 11 and 44 percent. Regressions 15 and 16 show a relationship between air pollution and lung cancer which is either insignificant or inverse. The only contrary results come from Ashley's data. In the absence of more complete evidence, we must remain curious about these results. Use of such small samples and inadequate controls is certain to lead to some contrary results, but they are disconcerting when they appear.

In a study of 187,783 white American males (50 to 69 years old), Hammond and Horn [27] reported that the age-standardized rate of death due to lung cancer was 34 (per 100,000) in rural areas as compared to 56 in cities of population over 50,000. When standardized with respect both to smoking habits to age, the rate was 39 in rural areas and 52 in cities of over 50,000.

Haenszel *et al.*[28] analyzed 2191 lung cancer deaths among white American males, that had occurred in 46 states, and data for a control group consisting of males who died from other causes. They found the crude rate of death from lung cancer to have been 1.56 times as high in the urban areas of their study as in the rural areas in 1958 and 1.82 times as high in the period 1948–49 (in subjects 35 years and older, with adjustments made for age). When adjustments are made for both age and smoking history, the ratio is 1.43. Also the ratio increased with duration of residence in the urban or rural area, from 1.08 for residence of less than 1 year to 2.00 for lifetime residence. Haenszel and Taeuber [29] report similar results for white American females. In a number of additional studies the association between air pollution and lung cancer is examined.[30]

Buell and Dunn [31] review the evidence on lung cancer and air pollution; a summary of their findings is given in Table 2. For smokers, death rates (adjusted for age and smoking) ranged from 25 to 123 percent higher in urban areas than in rural areas. For nonsmokers, all differences exceeded 120 percent. "The etiological roles for lung cancer of urban living and cigarette smoking seem each to be complete," they say, "in that the urban factor is evident when viewing nonsmokers exclusively, and the smoking factor is evident when viewing rural dwellers exclusively." They argue that differences in the quality of diagnosis could not account for the observed differences for urban and rural areas.

Nonrespiratory-tract cancers and air pollution. Our reworking of data from England on rates of death from nonrespiratory-tract cancer is presented in Table 1 (regressions 17 through 26). In the regressions, stomach cancer is significantly related to a deposit index and a smoke index. The effects are nearly identical for males and females. Intestinal cancer appears to be only marginally related to indices of either deposit or smoke. For 26 areas in northern England and Wales, there appears to be little relationship between nonrespiratory-tract cancers and a smoke index. The single exception in the four regressions occurs for males when the socioeconomic variable is social class; here the smoke index explains a significant amount of the variation in the cancer mortality rate. (Apparently population density and smoke index are so highly related in these 26 areas that neither has significant power to explain such variation.)

Winkelstein and Kantor [32] investigated rates of mortality from stomach cancer in Buffalo, New York, and the immediate environs. Their measure of pollution is an index of suspended particulates averaged over a 2-year period. They found the rate of mortality due to stomach cancer to be more than twice as great in areas of high pollution as in areas of low pollution.[33]

Hagstrom *et al.*[34] tabulated rates of death from cancer among middle class residents of Nashville, Tennessee, between 1949 and 1960, using four measures of air pollution. They found the cancer mortality rate to be 25 percent higher in polluted areas than in areas of relatively clear air.[35] They also found significant mortality-rate increases associated with individual categories of cancer, such as stomach cancer, cancer of the esophagus, and cancer of the bladder. The individual mortality rates are more closely related to air pollution after the data are broken down by sex and race.

Levin *et al.*[36] report, for all types of cancer, these relationships: The age-adjusted cancer-incidence rates for urban males was 24 percent higher than that for rural males in New York State (exclusive of New York City) (1949–51), 36 percent higher in Connecticut (1947–51), and 40 percent higher in Iowa (1950); the incidence rate for urban females was 14 percent higher than that for rural females in New York State, 28 percent higher in Connecticut, and 34 percent higher in Iowa. For both males and females, the incidence rate for each of 16 categories of cancer was higher in urban that in rural areas.

Cardiovascular disease and air pollution. Enterline *et al.*[37] found that mortality from heart disease is higher in central-city counties than in suburban counties, and, in turn, higher in suburban counties than nonmetropolitan counties. Zeidberg *et al.*[38] found that both morbidity and mortality rates for heart disease are associated with air pollution levels in Nashville. The morbidity rate was about twice as high in areas of polluted air as in areas of clean air. The mortality rate was less closely associated; it was 10 to 20 percent higher in areas of polluted air than in areas of clean air.[39]

Friedman [40] correlated the rate of mortality from coronary heart disease in white males aged 45 to 64 with the proportion of this group living in urban areas. The simple correlation for 33 states is .79. When cigarette consumption is held constant, the partial correlation is .67.

On the basis of these studies we conclude that a substantial abatement of air pollution would lead to 10 to 15 percent reduction in the mortality and morbidity rates for heart disease. We caution the reader that the evidence relating cardiovascular disease to air pollution is less comprehensive than that linking bronchitis and lung cancer to air pollution.

Total respiratory disease.[41] Daly [25] found significant correlations between air polution and death rates for all respiratory diseases (and for nonrespiratory diseases as well) in England. Douglas and Waller [42] found significant relationships between air pollution and respiratory disease in 3866 British school children. Fairbairn and Reid [43] found significant correlations between air pollution and morbidity rates (for bronchitis, pneumonia, pulmonary tuberculosis, and lung cancer) in England. Regressions 27 through 30 in Table 1 show pneumonia mortality to be related only marginally to a smoke index.

TABLE 2.—A-SUMMARY OF LUNG CANCER MORTALITY STUDIES. NUMBER OF DEATHS FROM LUNG CANCER PER 100,000 POPULATION [FROM BUELL AND DUNN (31)]

Study	Standardized for age and smoking			Nonsmokers		
	Urban	Rural	Urban/rural	Urban	Rural	Urban/rural
Buell, Dunn, and Breslow (67) [1]	101	80	1.26	36	11	3.27

[4] Northern Ireland.
[5] England; no adjustment for smoking.
[6] American men.

Zeidberg *et al.*[44] questioned 9313 Nashville residents about recent illnesses. Among males aged 55 and older from white middle-class families, the numbers of illnesses per respondent during the past year were 1.92, 1.15, and 1.26 for areas of high, moderate, and low pollution, respectively. There are a number of other comparisons, based on other measures of air pollution and on data for females and nonwhites (some of these are given in [45]). However, we should add a word of caution: although the sample size in this study was large and controls for many socioeconomic variables were included, many important factors were ignored—for example, smoking habits and length of residence. Nonetheless, the finding is extremely strong and seems unlikely to be an artifact of unmeasured variables.

Hammond [46] studied over 50,000 men to find the relationships between emphysema, age, occupational exposure to pollution, urban exposures, and smoking. His results indicated that the effect of air pollution is significant and that heavy smokers have a much higher morbidity rate in cities than in rural areas; the effect becomes more marked as age increases.

Ishikawa, *et al,*[47] estimated the incidence of emphysema in Winnipeg (Canada) and St. Louis. They examined the lungs of 300 corpses in each city (the samples were comparable). Findings for each age group (over 25 years old) indicated that the incidence and severity of emphysema is higher in St. Louis, the city with the more polluted air. (In the 45-year-old group 5 percent of those in Winnipeg and 46 percent of those in St. Louis showed evidence of emphysema.)

A number of studies have been made in England on homogeneous occupational groups, such as postmen. The results are relatively pure in that all members of the sample have comparable incomes, working conditions, and social status. Holland and Reid [48] found that the rates of occurence of severe respiratory symptoms were 25 to 50 percent higher for London postmen than for small-town postmen (sample size, 770), Reid [49] found that, in the postmen of his

Footnotes at end of article.

study, absences due to bronchitis rose from an index number of 100 for the area of least air pollution, to 120 for an area of moderate pollution, to 250 and 283 for the areas of highest pollution. Corresponding figures for absences due to other respiratory illness were 100, 100, 150, and 151, respectively, and for absences due to infections and parasitic diseases, 100, 115, 130, and 140. Cornwall and Raffle [50] made a similar study of bus drivers in London. They found that 20 to 35 percent of absences due to sickness of any kind could be ascribed to air pollution (they used a fog index as a measure of pollution). Fairbairn and Reid [43] tabulated absences due to sickness for postmen, for males working indoors, and for females working indoors. They found that the age-standardized morbidity rate for bronchitis and pneumonia in the postmen of their study rose from 40 man-years, per 1000 man-years, for the area of lowest air pollution (of the four acres studied) to 122 for the area of highest air pollution. Corresponding figures for morbidity from colds were 75 and 171 man-years, and for morbidity from influenza, 131 and 184 man-years. For males working indoors, the low and high morbidity rates were as follows: bronchitis and pneumonia, 32 and 39; colds, 53 and 64; influenza, 88 and 102.

Dohan [51] studied absences (of more than 7 days) of female employees in eight Radio Corporation of America plants. He found a correlation of .96 between atmospheric concentrations of SO_2 and absences due to respiratory disease in the five cities for which complete data were available. During Asian flu epidemics there was a 200 percent increase in illness in cities with polluted air and only a 20 percent increase in those with relatively unpolluted air.

Infant mortality and total mortality rates. Sprague and Hagstrom [52] compared air-pollution data for Nashville with fetal and infant mortality rates for Nashville as given in census tracts (for 1955 through 1960). Controls for socioeconomic factors were not included. For infant death rates (ages 28 days to 11 months), the highest correlation was with atmospheric concentrations of SO_2 (in milligrams per 100 square centimeters per day) and was .70. For the neonatal death rates (ages 1 day to 27 days), the highest correlation was with dustfall and was .49. For infants dying during their first day whose death certificate includes mention of immaturity, the highest correlation was with dustfall and was .45. The correlation of the fetal death rate with dustfall was .58.

In a study just being completed [53], we have collected data for 114 Standard Metropolitan Statistical Areas in the United States and have attempted to relate total death rates and infant mortality rates to air pollution and other factors. Socioeconomic data, death rates, and air-pollution data were taken from U.S. government publications [54]. Regression 1 (Table 3) shows how the total death rate in 1960 varies with air pollution levels and with socioeconomic factors. As the (biweekly) minimum level of suspended particulates increases, the death rate rises significantly. Moreover, the death rate increases with (i) the density of population of the area, (ii) the proportion of nonwhites, (iii) the proportion of people over age 65, and (iv) the proportion of poor families. Eighty percent of the variation in the death rate across these 114 statistical areas is explained by the regression.

TABLE 3.—REGRESSIONS RELATING INFANT AND TOTAL MORTALITY RATES FOR 114 STANDARD METROPOLITAN STATISTICAL AREAS IN THE UNITED STATES TO AIR POLLUTION AND OTHER FACTORS. FOR MEANS AND STANDARD DEVIATIONS (S.D.) OF THE VARIABLES. SEE †

Category	R^2‡	Air pollution (minimum concentrations)	Socioeconomic: P/m²§	Socioeconomic: Nonwhite (percent)	Socioeconomic: Over 65 (percent)	Socioeconomic: Poor (percent)

8. Sulfates	.434	.171	.004	.181	----------	.085
t statistic*		1.95	1.82	5.87	----------	1.71

*The t statistic: for a 1-tailed t-test, a value of 1.65 indicates significance at the 0.05 level.

†Total death rate per 10,000: mean, 91.5; S.D., 15.2. Infant death rate (age, <1 year) per 10,000 live births: mean, 255.1; S.D., 36.1 Infant death rate (age, <28 days) per 10,000 live births: mean, 188.0; S.D., 24.4. Fetal death rate per 10,000 live births; mean, 153.9; S.D., 34.4. Suspended particulates ($\mu g/m^3$), minimum reading for a biweekly period: mean, 45.2; S.D., 18.7. Total sulfates ($\mu g/m^3$) (× 10), minimum reading for a biweekly period: mean, 46.9; S.D., 30.6. Persons per square mile: mean, 763.4; S.D., 1,387.9. Percentage of nonwhites in population (× 10): mean, 125.2; S.D., 102.8. Percentage of population over 65 (× 10): mean, 84.2; S.D., 21.2. Percentage of families with incomes under $3,000 (× 10): mean, 181.6; S.D., 65.7.

‡The coefficient of determination: a value of 0.804 indicates a multiple correlation coefficient of 0.90, and indicates that 80 percent of the variation in the death rate is "explained" by the regression.

§ Persons per square mile.

Regression 3 shows how the 1960 infant death rate (age, less than 1 year) varies. A smaller proportion (55 percent) of the variation in the death rate is explained by the regression, although the minimum air-pollution level, the percentage of nonwhites, and the proportion of poor families continue to be significant explanatory variables. Regression 5 is an attempt to explain variation in the neonatal death rate. The results are quite similar to those of regression 3. The fetal death rate is examined in regression 7. Here the minimum air-pollution level, population density, the percentage of nonwhites, and the percentage of poor families are all significant explanatory variables.

Regressions 2, 4, 6, and 8 are an atttempt to relate these death rates to the atmospheric concentrations of sulfates for the 114 statistical areas of the study. Regression 2 shows that the total death rate is significantly related to the minimum level of sulfate pollution, to population density, and to the percentage of people over age 65; 81 percent of the variation is explained. Regressions 4, 6, and 8 show that the minimum atmospheric concentration of sulfates is a significant explanatory variable in three categories of infant death rates.

One might put these results in perspective by noting estimates on how small decreases in the air-pollution level affect the various death rates. A 10 percent decrease in the minimum concentration of measured particulates would decrease the total death rate by 0.5 percent, the infant death rate by 0.7 percent, the neonatal death rate by 0.6 percent, and the fetal death rate by 0.9 percent. Note that a 10 percent decrease in the percentage of poor families would decrease the total death rate by 0.2 percent and the fetal death rate by 2 percent. A 10 percent decrease in the minimum concentration of sulfates would decrease the total death rate by 0.4 percent, the infant mortality rate by 0.3 percent, the neonatal death rate by 0.4 percent, and the fetal death rate by 0.5 percent.

Each of the relations in Tables 1 and 3 was estimated in alternative ways, including transformation into logarithms, a general quadratic, and a "piecewise" linear form as documented elsewhere.[12] The implications about the roles of air pollution and of the socioeconomic variables were unchanged by use of the different functional forms. Another result to be stressed is that, in Table 1, comparable regressions for males and females show almost precisely the same effects for air pollution. This suggests that occupational exposure does not affect these results; the result lends credence to the estimates. A result that we document elsewhere [53] is that it is the minimum level of air pollution that is important, not the occasional peaks. People dealing with this problem should worry about abating air pollution at all times, instead of confining their concern to increased pollution during inversions.

SOME CAVEATS

In preceding sections we have described a number of studies which quantify the relationship between air pollution and both morbidity and mortality. Is the evidence conclusive? Is it possible for a reasonable man still to object that there is no evidence of a substantial quantitative association? We believe that there is conclusive evidence of such association.[55]

In the studies discussed, a number of countries are considered, and differences in morbidity and mortality rates among different geographical areas, among people within an occupational group, and among children are examined. Various methods are used, ranging from individual medical examinations and interviews to questionnaires and tabulations of existing data. While individual studies may be attacked on the grounds that none manages to provide controls for all causes of ill health, the number of studies and the variety of approaches are persuasive. It is difficult to imagine how factors such as general habits, inherited characteristics, and lifetime exercise patterns could be taken into account.

To discredit the results, a critic would have to argue that the relationships found

Footnotes at end of article.

by the investigators are spurious because the level of air pollution is correlated with a third factor, which is the "real" cause of ill health. For example, many studies do not take into account smoking habits, occupational exposure, and the general pace of life. Perhaps city dwellers smoke more, get less exercise, tend to be more overweight, and generally live a more strained, tense life than rural dwellers. If so, morbidity and mortality rates would be higher for city dwellers, yet air pollution would be irrelevant. This explanation cannot account for the relationships found.

Apparently there is little systematic relationship between relevant "third" factors and the level of air pollution. An English study [19] in which smoking habits are examined reveals little evidence of differences by residence. There is evidence in the United States that smoking is more prevalent among lower socioeconomic groups [56] but income or other socioeconomic variables would account for this effect and still leave the pollution coefficient unbiased. More importantly, the correlations between air pollution and mortality are better when one is comparing areas within a city (where more factors are held constant) than when one is comparing rural and urban areas.[57] It is especially hard to believe that the apparent relation between air pollution and ill health is spurious when significant effects are found in studies comparing individuals within strictly defined occupational groups, such as postmen or bus drivers (where incomes and working conditions are comparable and unmeasured habits are likely to be similar).

When there are uncontrolled factors, some studies may show inconclusive or even negative results; only by collecting samples large enough to "average away" spurious effects can dependable results be guaranteed. In the main, each of the studies cited above was based on a substantial sample. It is the body of studies as a whole that we find persuasive.

An examination of contrary results. Uncontrolled factors, together with small samples, are certain to lead to some results contrary to the weight of evidence and to our expectations. For example, in some studies [58] no attempt is made to control even for income or social status. From the evidence of studies which did provide such controls, we know that failure to control for income leads to biased results, and so we place little credence in either the positive or negative findings of studies lacking these controls.

Sampling error can be extremely important. For example, Zeidberg *et al.*[59] find mixed results in crosstabulating respiratory disease mortality with level of air pollution and with income class. In general the relationships are in the expected direction, but they are often insignificant. Insignificant results might occur often, if the samples are small, even if air pollution is extremely significant, since sampling errors dominate the explanatory variables.

Another study in which sampling error is important is reported by Ferris and Whittenberger.[7] They compared individuals in Berlin, New Hampshire, with residents of Chilliwack (British Columbia), Canada, and—not surprisingly in view of the small samples—failed to find significant differences in the occurrence of respiratory disease. Prindle *et al.*[60] compared two Pennsylvania towns in the same fashion. These two studies are admirable in that individuals were subjected to careful medical examinations. However, only a few hundred individuals were studied, and this means that sampling errors tend to obscure the effects of air pollution. Moreover, there were no controls for other factors, such as smoking. Also, one must be careful to control for a host of other variables if the sample is small. For example, the ethnic origins of the population and their general habits and occupations are known to affect mortality rate. It is exceedingly difficult to control for these factors; use of carefully constructed large samples seems the best answer. Finally, air pollution is measured currently, and it is generally assumed that relative levels have been constant over time and that people have lived at their present addresses for a long period. It is hardly surprising that statistical significance is not always obtained when such assumptions are necessary.

Since investigators are more reluctant to publish negative results than positive ones, and since it is more difficult to get negative results published, it is probable that we are unaware of other studies that fail to find a strong association between air pollution and ill health. We are somewhat reluctant to come to strong conclusions without knowledge of such negative results. However, there seems to be no reasonable alternative to evaluating the evidence at hand and allowing for uncertainty. Thus, we conclude that an objective observer would have to agree that there is an important association between air pollution and various morbidity and mortality rates.

THE ECONOMIC COSTS OF DISEASE

Having found a quantitative association between air pollution and both morbidity and mortality, the next question is that of translating the increased sickness and death into dollar units. The relevant question is, How much is society willing to spend to improve health (to lower the incidence of disease)? In other words, how much is it worth to society to relieve painful symptoms, increase the level of comfort of sufferers, prevent disability, and prolong life? It has become common practice to estimate what society is willing to pay by totaling the amount that is spent on medical care and the value of earnings "forgone" as a result of the disability or death.[61] This cost seems a vast underestimate for the United States in the late 1960's. Society seems willing to spend substantial sums to prolong life or relieve pain. For example, someone with kidney failure can be kept alive by renal dialysis at a cost of $15,000 to $25,000 per year; this sum is substantially in excess of forgone earnings, but today many kidney patients receive this treatment. Another example is leukemia in children; enormous sums are spent to prolong life for a few months, with no economic benefit to society. If ways could be found to keep patients with chronic bronchitis alive and active longer, it seems likely that people would be willing to spend sums substantially greater than the foregone earnings of those helped. So far as preventing disease is concerned, society is willing to spend considerable sums for public health programs such as chest x-rays, inoculation, fluoridation, pure water, and garbage disposal and for private health care programs such as annual physical checkups.

While we believe that the value of earnings forgone as a result of morbidity and mortality provides a gross underestimate of the amount society is willing to pay to lessen pain and premature death caused by disease, we have no other way of deriving numerical estimates of the dollar value of air-pollution abatement. Thus, we proceed with a conventional benefit calculation, using these forgone earnings despite our reservations.

Direct and indirect costs. Our figures for the cost of disease are based on *Estimating the Cost of Illness*, by Dorothy P. Rice.[61] Unfortunately, Rice calculated disease costs in quite aggregate terms, and so the category "diseases of the respiratory system" must be broken down. It seem reasonable to assume that both direct and indirect costs would be proportional to the period of hospitalization (total patient-days in hospitals) by disease category.[62]

Rice defines a category of direct disease costs as including expenditures for hospital and nursing home care and for services of physicians, dentists, and members of other health professions. "Other direct costs" (which would add about 50 percent to those just enumerated) consist of a variety of personal and nonpersonal expenditures (such as drugs, eyeglasses, and appliances), school health services, industrial in-plant health services, medical activities in federal units other than hospitals, medical research, construction of medical facilities, government public health activities, administrative expenditures of voluntary health agencies, and the net cost of insurance. Since Rice does not allocate "other direct costs" among diseases, we omit it from our cost estimates. However, we conjecture that respiratory diseases represent a substantial portion of this category. Thus, our direct cost estimate is likely to be a substantial underestimate of "true" direct costs (probably more than 50 percent too low).

Estimating indirect cost is an attempt to measure the losses to the nation's economy caused by illness, disability and premature death. We would argue that such a calculation gives a lower bound for the amount people would be willing to pay to lower the morbidity and mortality rates. These costs are calculated in terms of the earnings forgone by those who are sick, disabled, or prematurely dead.[63]

THE HEALTH COST OF AIR POLLUTION

The studies cited in this article show a close association between air pollution and ill health. The evidence is extremely good for some diseases (such as bronchitis and lung cancer) and only suggestive for others (such as cardiovascular disease and nonrespiratory-tract cancers). Not all factors have been taken into account, but we argue that an unbiased observer would have to concede the association. More effort can and should be spent on refining the estimates. However, the point of this exercise is to estimate the health cost of air pollution. We believe that the evidence is sufficiently complete to allow us to infer, roughly, the quantitative associations. We do so with caution, and proceed to translate the effects into dollars. We have attempted to choose our point estimates from the conservative end of the range.

We interpret the studies cited as indicating that mortality from bronchitis would be reduced by about 50 percent if air pollution were lowered to levels currently prevailing in urban areas with relatively clean air. We therefore make the assumption that there would be a 25 to 50 percent reduction in morbidity and mortality due to bronchitis if air pollution in the major urban areas were abated by about 50 percent. Since the cost of bronchitis (in terms of forgone income and current medical expenditures) is $930 million per year, we conclude that from $250 million to $500 million per year would be saved by a 50 percent abatement of air pollution in major urban areas.

Approximately 25 percent of mortality from lung cancer can be saved by a 50 percent reduction in air pollution, according to the studies cited above. This amounts to an annual cost of about $33 million.

The studies document a strong relationship between all respiratory disease and air pollution. It seems likely that 25 percent of all morbidity and mortality due to respiratory disease could be saved by a 50 percent abatement in air pollution levels. Since the annual cost of respiratory disease is $4887 million, the amount saved by a 50 percent reduction in air pollution in major urban areas would be $1222 million.

There is evidence that over 20 percent of cardiovascular morbidity and about 20 percent of cardiovascular mortality could be saved if air pollution were reduced by 50 percent. We have chosen to put this saving

Footnotes at end of article.

at only 10 percent—that is, $468 million per year.

Finally, there is a good deal of evidence connecting all mortality from cancer with air pollution. It is difficult to arrive at a single figure, but we have estimated that 15 percent of the cost of cancer would be saved by a 50 percent reduction in air pollution—a total of $390 million per year.

Not all of these cost estimates are equally certain. The connection between bronchitis or lung cancer and air pollution is much better documented than the connection between all cancers or all cardiovascular disease and air pollution. The reader may aggregate the costs as he chooses. We estimate the total annual cost that would be saved by a 50 percent reduction in air-pollution levels in major urban areas, in terms of decreased morbidity and mortality, to be $2080 million. A more relevant indication of the cost would be the estimate that 4.5 percent of all economic costs associated with morbidity and mortality would be saved by a 50 percent reduction in air pollution in major urban areas.[24] This percentage estimate is a robust figure; it is not sensitive to the exact figures chosen for calculating the economic cost of ill health.

A final point is that these dollar figures are surely underestimates of the relevant costs. The relevant measure is what people would be willing to pay to reduce morbidity and mortality (for example, to reduce lung cancer by 25 percent. It seems evident that the value used for forgone earnings is a gross underestimate of the actual amount. An additional argument is that many health effects have not been considered in arriving at these costs. For example, relatively low levels of carbon monoxide can affect the central nervous system sufficiently to reduce work efficiency and increase the accident rate.[25] Psychological and esthetic effects are likely to be important, and additional costs associated with the effect of air pollution on vegetation, cleanliness, and the deterioration of materials have not been included in these estimates.[26]

[9] Chronic effects, where the incidence of the disease is small, can be studied only for large samples (millions of man-years of exposure); see J. R. Goldsmith, *Arch. Environ. Health* 18, 516 (1969); J. Rumford, *Amer. J. Public Health* 51, 165 (1961). Morbidity data would be more useful than mortality data, since death may result from a cause having no direct relationship to the original pollution-induced disease.

[10] For example, M. McCarroll and W. Bradley [*Amer. J. Public Health Nat. Health* 56, 1933 (1966)] correlate the daily mortality rate in New York City with daily pollution indices. See also J. R. McCarroll, E. J. Cassell, W. A. B. Ingram, D. Wolter, "Distribution of families in the Cornell air pollution study" and "Health profiles vs. environmental pollutants," papers presented at the 92nd annual meeting of the American Public Health Association, New York, 1964; ———, *Arch. Environ. Health* 10, 357 (1965); W. Ingram, J. R. McCarroll, E. J. Cassell, D. Wolter, *ibid.*, p. 364; E. J. Cassell, J. R. McCarroll, W. Ingram, D. Wolter, *ibid.*, p. 367. Other workers have attempted to explain daily variations in hospital admissions [see L. Greenburg, F. Field, J. I. Reed, C. L. Erhardt, *J. Amer. Med. Ass.* 182, 161 (1962); W. W. Holland, C. C. Spicer, J. M. G. Wilson, *Lancet* 1961–II, 338 (1961); G. F. Abercrombie, *Ibid.* 1953–I, 234 (1953); A. E. Martin, *Mon. Bull. Min. Publ. Health Lab. Serv. Directed Med. Res. Counc.* 20, 42 (1961); R. Lewis, M. M. Gilkeson, Jr., R. O. McCaldin, *Public Health Rep.* 77, 947 (1962); T. D. Sterling, S. V. Pollack, D. A. Schumsky, I. Degroot, *Arch. Environ. Health* 13, 158 (1966); T. D. Sterling, S. V. Pollack, J. Weinkam, *ibid.* 18, 462 (1969)] absence rates (see J. Ipsen, F E. Ingenito, M. Deane, *ibid.*, p. 462); symptoms in school children [see B. Paccagnella, R. Pavanello, R. Pesarin, *ibid.*, p. 495; T. Toyama, *ibid.*, 8, 1953 (1964)] the incidence of asthma attacks [see L. D. Zeidberg, R. A. Prindle, E. Landau, *Amer. Rev. Resp. Dis.* 84, 489 (1961); C. E. Schoettlin and E. Landau, *Public Health Rep.* 76, 545 (1961); R. Lewis, *J. La. State Med. Soc.* 115, 300 (1963)]; and other morbidity [see J. T. Boyd, *Brit. J. Prev. Soc. Med.* 14, 123 (1960); R. G. Loudon and J. F. Kilpatrick, *Arch. Environ. Health* 18, 641 (1969)].

[11] The most complete investigation of various pollutants was that of the Nashville studies. See L. D. Zeidberg, R. A. Prindle, E. Landau, *Amer. Rev. Resp. Dis.* 84, 489 (1961); L. D. Zeidberg and R. A. Prindle, *Amer. J. Public Health* 53, 185 (1963); L. D. Zeidberg, R. A. Prindle, E. Landau, *ibid.* 54, 85 (1964); L. D. Zeidberg, R. J. M. Horton, E. Landau, *Arch. Environ. Health* 15, 214 (1967); ———, *ibid.*, p. 225; R. M. Hagstrom, H. A. Sprague, E. Landau, *ibid.*, p. 237; H. A. Sprague and R. Hagstrom, *ibid.* 18, 503 (1969). It is conceptually possible to differentiate among pollutants, since, for example, the correlation between mean level of suspended particulates and mean level of sulfates for 114 U.S. Standard Metropolitan Statistical Areas is only .20.

[21] That the least-squares method provides the best linear unbiased estimates is the conclusion of the Gauss-Markov theorem, for which $E(ee') = \sigma^2 I$ and $E(e) = 0$ are the basic assumptions. These assumptions are that the basic model must be linear and that the distribution of the errors must have an expected value of zero, have finite variance, have a constant distribution over the various observations, and be independent. In addition, no explanatory variables may be omitted which are correlated with included variables. It is also convenient to assume that the explanatory variables are measured without error, although the framework can easily be adjusted to handle errors. In order to perform significance tests, one must make an assumption about the distribution of the error term. For all the relations we estimated, we plotted the residuals and discovered that all distributions were unimodel, symmetric, and basically consistent with the normal distribution. Thus, in the discussion that follows, we have assumed that the error term is distributed normally.

[22] For example, for economic level 1 (defined below), the death rates (per 100,000) for pollution levels 2 to 4 (defined below) are 126, 271, and 392. For economic level 2, the death rates for air pollution levels 1 to 4 are 136, 154, 172, and 199. For economic level 4, the death rates for pollution levels 1 to 3 are 70, 80, and 177. The five economic levels, based on median family income in a census tract, are as follows: $3005–$5007; $5175–$6004; $6013–$6614; $6618–$7347; and $7431–$11,792. The four air pollution levels (in micrograms) of suspended particulates (per cubic meters per 24 hours) are as follows: less than 80, 80–100, 100–135, and more than 135.

[23] P. Stocks and J. M. Campbell, *Brit. Med. J.* 2, 923 (1955).

[24] In most of the early studies, pollution measures were not available, and so urban mortality rates were contrasted with rural rates. In these studies a substantial "urban factor" was found, which, unfortunately, was a compound of air pollution and many other factors. In the later studies the portion ascribable to air pollution is separated out.

[25] C. Daly, *Brit. J. Prev. Soc. Med.* 13, 14 (1959).

[26] Buck and Brown [*Tobacco Res. Counc. Res. Paper No. 7* (1964)], in examining data from England, control for population per acre, for social class, and for smoking habits. They find no relationship between smoking and lung cancer, and a relationship between SO_2 and lung cancer that is not consistent.

Stocks uses three sets of data to isolate the effect of air pollution on lung cancer. Contrasting data for eight northern European cities, he finds a correlation between lung cancer and air pollution of .60, and correlations between lung cancer and smoking that range between .27 and .36. Contrasting data for 19 countries, he finds that an index of solid fuel consumption is a much stronger variable than cigarette consumption per capita. Finally, with data from northern England, he finds confirmation of an association between lung cancer and air pollution. See P. Stocks, *Brit. J. Prev. Soc. Med.* 21, 181 (1966).

[27] E. C. Hammond and D. Horn, *J. Amer. Med. Assn.* 16, 1294 (1958).

[28] W. Haenszel, D. B. Loveland, M. G. Sirken, *J. Nat. Cancer Inst.* 28, 947 (1962).

[29] Haenszel and Taeuber analyzed data for 683 white American females who died of lung cancer, and for a control group. They found the crude rate of death from lung cancer to be 1.32 times as high in urban areas as in rural areas for 1958–1959 and 1.29 times as high for 1948–1949 (in subjects 35 years and older, with adjustments made for age). When adjustments were made for both age and smoking history, the ratio was 1.27. This ratio increased with the duration of residence in the urban or rural area, from 0.80 for residence of less than 1 year to 1.76 for lifetime residence. See W. Haenszel and K. E. Taeuber, *J. Nat. Cancer Inst.* 32, 803 (1964).

[30] L. D. Zeidberg, R. J. Horton, and E. Landau [*Arch. Environ. Health* 15, 214 (1967)] are not able to isolate an air pollution effect on mortality from lung cancer from data for Nashville for the years 1949 through 1960; C. A. Mills [*Amer. J. Med. Sci.* 239, 316 (1960)] investigated rates of death from lung cancer in Ohio. Stratifying according to the amount of driving done by the deceased, he found that the death rate varied with driving and urban exposure; L. Greenburg, F. Field, J. I. Reed, M. Glasser [*Arch. Environ. Health* 15, 356 (1967)] investigated 1190 cancer deaths that occurred on Staten Island between 1959 and 1961 and found a relationship between lung cancer and air pollution; M. L. Levin, W. Haenszel, B. E. Carroll, P. R. Gerhardt, V. H. Handy, S. C. Ingraham II [*J. Nat. Cancer Inst.* 24, 1243 (1960)] found significant differences between urban and rural mortality rates (for periods around 1950) in New York State, Connecticut, and Iowa. For males, the death rates were 41 percent higher in urban areas in New York, 57 percent higher in Connecticut, and 184 percent higher in Iowa. For females, the differences were 7 percent, 24 percent, and 47 percent, respectively; P. Buell, J. E. Dunn, L. Breslow [*Cancer* 20, 2139 (1967)] utilized 69,868 questionnaires covering 336,571 man-years, in their study of lung cancer in California veterans. They found rates of death from lung cancer (adjusted for differences in age and smoking habits) to be 25 percent higher in the major metropolitan areas than in the less urbanized areas. Among nonsmokers, the rates of death from lung cancer were 2.8 to 4.4 times as high for major metropolitan areas as for more rural areas.

[31] P. Buell and J. E. Dunn, Jr., *Arch. Environ. Health* 15, 291 (1967).

[32] W. Winkelstein, Jr., and S. Kantor, *ibid.* 18, 544 (1969).

[33] For economic level 2 (see 22), the mortality rate per 100,000 for gastic cancer in white males 50 to 69 years old changed from 45 to 41, 48, and 84 as the pollution level (see 22) rose. For economic level 4, the rates were 15, 88, and 63 for the first three pollution levels. For white women 50 to 69 years old, the death rates for economic level 2 were 8, 18, 25, and 40 per 100,000. For economic level 4, the death rates were 5 and 21 for the first two pollution levels.

[34] R. M. Hagstrom, H. A. Sprague, E. Landau, *Arch. Environ. Health* 15, 237 (1967).

[35] The four measures of pollution are suspended particulates (soiling), dustfall, SO_3 and SO_2. For all cancer deaths, the number per 100,000 for middle class residents (defined to include about 75 percent of all residents) fell from 153 for high-pollution areas, to 130 for moderate-pollution areas, to 124 for low-pollution areas when a soiling index (concentration of haze and smoke per 1000 linear feet) was used to classify air pollution. When SO_3 (milligrams per 100 square centimeters per day) was used as a basis for classification, the corresponding death rates were 150, 129, and 145, respectively. With dustfall as a measure, the figures were 145, 130, and 131, and with 24-hour SO_2, in parts per million, they were 141, 129, and 138.

[38] L. D. Zeidberg, R. J. M. Horton, E. Landau, *Arch. Environ, Health* 15, 225 (1967).

[39] When air-pollution level was measured on the basis of sulfation (SO_3, in milligrams per 100 square centimeters per day), the morbidity rates (for white, middle-class males aged 55 and older) were 64.0 man-years per 1,000 man-years for high-pollution areas, 34.1 for moderate-pollution areas, and 36.8 for low-pollution areas. Measurement of air pollution on the basis of 24-hour concentrations of SO_2 gave morbidity rates of 47.2, 36.8, and 22.2, respectively. For these same white, middle-class males, in areas of high atmospheric concentrations of SO_3, the mortality rate was 425.6 per 100,000 population; in moderate-concentration areas, 327.41; and in low-concentration areas, 361.97. With SO_2 concentrations as a measure, the corresponding figures were 424.87, 319.19, and 364.93. When soiling (smoke or suspended particles) was used as the pollution index, the figures were 376.65, 339.13, and 399.88, respectively.

[40] G. Friedman, *J. Chronic Dis.* 20, 769 (1967).

[41] The effect of air pollution on pneumonia, tuberculosis, and asthma has also been investigated. C. Daly (see *25*) reports simple correlations of .60 for pneumonia mortality and pollution from domestic fuel and .52 for pneumonia mortality and pollution from industrial fuel. For tuberculosis mortality the correlations are .59 and .22, respectively. The death rates for pneumonia rise from 30 to 52 per 100,000, and those for tuberculosis rise from 47 to 89, as one goes from rural setting to conurbations. Stocks (*19*) reports data on pneumonia mortality, by sex, for 26 areas of northern England and Wales. As shown by regressions 27 through 30 in Table 1, there appears to be a strong relationship between a smoke index and pneumonia mortality. The relationship is much stronger for men than for women. C. A. Mills [*Amer. J. Hyg.* 37, 131 (1943)], in a classic study of wards in Pittsburgh and Cincinnati for 1929–30, reports substantial correlation between pneumonia death rates and local pollution indices. He found the correlation between dustfall and rates for pneumonia mortality in white males to be .47 for Pittsburgh and .79 for Cincinnati. The actual variation in these death rates is 41 to 165 per 100,000 population for Cincinnati and 0 to 7852 for Pittsburgh. Mills argues that omitted socioeconomic variables could not account for these correlations, but he made no attempt to control for such variables in his studies. He also found that death rates fell significantly as the altitude of an individual's residence increased; there was a drop of approximately 10 percent in death rate for every 100 feet (30 meters) of elevation [see also C. A. Mills, *Amer. J. Med. Sci.* 224, 403 (1952); E. Gorham, *Lancet* 1959–II, 287 (1959)]. Zeidberg, Prindle, and Landau [*Amer. Rev. Resp. Dis.* 84, 489 (1961)] studied 49 adult and 35 child asthma patients for a year. They found that the attack rate (attacks per person per day) for adults rose from .070 during days when atmospheric concentrations of sulfates were low to .216 when concentrations were high. In children, the effect of increased concentrations of sulfates was insignificant. Schoettlin and Landau [*Public Health Rep.* 76, 545 (1961)] investigated 137 asthma patients in Los Angeles during the fall months. They found that 14 percent of the variance in daily attacks ($n=3435$) could be explained by the maximum atmospheric concentrations of oxidants for that day. These two studies document a strong relationship between asthma and air pollution; Lewis, Gilkeson, and McCaldin [*Public Health Rep.* 77, 947 (1962)] found no association between the daily frequency of visits to charity hospitals for treatment of asthma attacks and measures of air pollution.

[44] L. D. Zeidberg, R. A. Prindle, E. Landau, *Amer. J. Public Health* 54, 85 (1964).

[45] Morbidity rates associated with a soiling index were 140, 122, and 96, respectively, for high, moderate, and low pollution; corresponding rates associated with an SO_2 index were 177, 117, and 81. For white females, morbidity rates associated with an SO_3 index were 169, 134, and 160; with a soiling index, 158, 139, and 127; and with an SO_2 index, 172, 136, and 116. For nonwhite males, the morbidity rates associated with an SO_2 index were 86 for high concentrations and 84 for moderate and low concentrations; corresponding rates associated with a soiling index were 94 and 67, and with an SO_2 index, 84 and 88. For nonwhite females, morbidity rates of 136 and 140 were associated with high and with moderate and low SO_2 concentrations, respectively; corresponding rates associated with soiling were 140 and 129, and with SO_2 concentrations, 145 and 126. The effects for working women and for housewives, between the ages of 14 and 65, were similar.

[57] This might be explained by noting that farmers tend to be exposed to a high level of pollution in the course of their work (from fertilizers, insecticides, and the exhaust fumes from farm equipment), which causes more deaths from respiratory disease than would be expected from the low level of general air pollution in rural areas.

[58] See, for example, T. Toyama (*16*) and F. L. Petrilli, G. Agnese, S. Kanitz, *Arch. Environ. Health* 12, 733 (1966).

[61] D. P. Rice, "Estimating the Cost of Illness," *Public Health Serv. Publ. No. 947–6* (1966).

[62] The category "diseases of the respiratory system" encompasses numbers 470 through 527 of the 1962 International Classification of Diseases, Adapted (ICDA). A report of the Commission on Professional and Hospital Activitives, entitled Length of Stay in Short-Term General Hospital (1963–1964) (McGraw-Hill, New York, 1966), gives details on the average lengths of stay and number of patients in 319 U.S. general hospitals for 1963 and 1964 by specific ICDA classifications. From these figures we were able to compute the ratio of total hospitalization by specific disease to total hospitalization for all respiratory diseases. Of the 2,410,900 impatient days for all respiratory diseases, 232,222 were for acute bronchitis and 177,232 were for "bronchitis, chronic and unspecified." Thus, approximately 17 percent of all inpatient days for respiratory diseases were for some form of bronchitis. On the basis of current hospitalization rates, we find the direct cost of diseases of the respiratory system to be $1581 million annually. An estimated 17 percent of this amount is due to bronchitis; thus, the direct cost of bronchitis is about $268.8 million annually.

[63] To calculate the indirect cost of bronchitis, we must do more than take 17 percent of the total indirect cost ($3,305,700) of all diseases of the respiratory system. Almost 50 percent of respiratory disease patients are hospitalized for "hypertrophy of tonsils and adenoids" (ICDA 510). Hospitalization is categorized by age of patient in the Commission on Professional and Hospital Activities report, and we note that 80 percent of these "tonsil and adenoid" patients were under 20 years of age. Thus, it seems clear that the "forgone earnings" of these patients is negligible, and so no indirect costs should be allocated to this group. We therefore excluded the hospitalization of "tonsil and adenoid" patients before computing the percentage of hospitalization due to bronchitis. Thus, we estimated that 20 percent of the indirect cost of respiratory disease can be ascribed to bronchitis.

[64] There is one bit of evidence that 25 to 50 percent of total morbidity (and therefore mortality) can be associated with air pollution; see L. D. Zeidberg, R. A. Prindle, E. Landau, *Amer. J. Public Health* 54, 85 (1964). If one accepted this evidence as conclusive, it would follow that the annual cost of air pollution, because of health effects, would run between $14 billion and $29 billion.

[65] See J. H. Schulte, *Arch. Environ. Health* 7, 524 (1963); A. G. Cooper, "Carbon Monoxide," *U.S. Public Health Serv. Publ. No. 1503* (1966); *Effects of Chronic Exposure to Low Levels of Carbon Monoxide on Human Health, Behavior, and Performance* (National Academy of Sciences and National Academy of Engineering, Washington, D.C., 1969).

[66] Another way to estimate the cost of air pollution is to examine the effect of air pollution on property values. See R. J. Anderson, Jr., and T. D. Crocker, "Air Pollution and residential property values," paper presented at a meeting of the Econometric Society, New York, December 1969; H. O. Nourse, *Land Econ.* 43, 181 (1967); R. G. Ridker, *Economic Costs of Air Pollution* (Praeger, New York, 1967); R. G. Ridker and J. A. Henning, *Rev. Econ. Statist.* 49, 246 (1967); R. N. S. Harris, G. S. Tolley, C. Harrell, *ibid.* 50, 241 (1968).

AMERICAN PRISONERS OF WAR

Mr. GORE. Mr. President, during and after every war in which the United States has been engaged, Congress has concerned itself with the prisoner-of-war problem. This is surely the case today. Every Member of Congress is concerned and troubled over the treatment of Americans held prisoner by the various elements engaged in the fighting in Southeast Asia. It is particularly distressing that North Vietnam, claiming to be a sovereign nation and wanting to take its place in the family of nations, has so consistently and coldly refused to follow established practices of civilized man in caring for Americans held prisoner by them. It is particularly distressing, heartless on their part, that we are unable to determine with certainty just who is being held, and under what conditions.

I think we must face the fact that we live in an age of neobarbarity in several respects. The cruel handling of prisoners of war, the actions of guerillas in the Middle East, where established and recognized governments are not in control of their own territories or people, the kidnaping of diplomats in some South American countries, the easy resort to weapons of mass destruction, the disregard of the sovereignty and boundaries of small nations, the thoughtless threats or proposals of would-be leaders to "send in Marines" at every provocation, riots in our cities and on the campuses of our colleges, as well as disrespect for due process of law and justice generally, portend a general retrogression of the gravest sort in our civilization, in the way we treat our fellow man, in the way we view ourselves. This is a matter of the greatest gravity, at home and world over, and ought to be a matter of concern to everyone in a position of leadership in every country of the world. This retrogression is at work in warfare and in disorder in our own society.

In ancient times, wars were generally undertaken for purposes of economic exploitation. Additional lands and peoples were acquired primarily to add to the taxes collected by the ruling group. Soldiers were often paid in booty. One needs only to read casually of the destruction of Thebes, Carthage, Samaria, or Jerusalem, for example, to be impressed with the awful cruelties then so generally practiced.

Under such circumstances, it could not reasonably be expected that prisoners of war would be treated well. Prisoners were a part of the picture of exploitataion. They were sometimes ransomed, if they had sufficiently wealthy connections, but generally they were sold into slavery, into whatever kind of bondage the people of the time and place practiced.

But with the approach of modern times, particularly with the rise of nationalism, both the purpose and conduct of warfare generally changed. So did the handling and disposition of prisoners taken in war. Civilization moved to a higher level of conduct in this regard. Even with the rise of nationalism and its attendant conflicts, the increased reliance on militarism—Prussia adopted universal, peacetime military conscription in the 1860's—the acceleration of the cost of war and size of armies, prisoners of war began to receive better treatment, and it became customary to release and repatriate prisoners of war as a part of all general conflict settlements.

Warfare is, by its very nature, brutal. I know of no way to negate the brutality of armed conflict. But the unarmed, wounded, or captured former combatant who is now no longer a combatant can, should, and I hope always will be treated with humane consideration.

As I have said, mankind has made great strides in this sort of humaneness. And so we find that, insofar as prisoners of war and their final disposition are concerned, the general practice in modern times has been to release prisoners of war without ransom at the conclusion of a conflict. We can date this practice from the Treaty of Westphalia in 1648, which brought to a close the bloody and ideologically bitter 30-year war. And this, despite the fact that Grotius, writing in his monumental work, "On the Law of War and Peace," just a few years earlier had set out the general practice then prevailing with respect to prisoners of war. He maintained that the legalities of warfare recognized the right of captors to enslave prisoners of war. Grotius, himself, however, felt that this was not proper, and that prisoners should be ransomed or exchanged.

So, Mr. President, I think we can see that the step taken in the Treaty of Westphalia to release prisoners of war as a part of that overall settlement was truly a giant step forward for mankind. And, ever since 1648, it has been the general practice to release all prisoners of war with the settlement of a conflict.

During the continuation of a war or an armed conflict, prisoners of war have often been treated abominably. Without going too far afield, we might recall the conditions on British ships where American prisoners were held during much of the Revolutionary War. It was charged that 20,000 American prisoners of war died on those ships. And Andersonville keeps cropping up in our literature. But on the whole, those nations pretending to be civilized have improved their treatment of prisoners of war. We have had plenty of practice. Between 1480 and the outbreak of World War II, there were 278 wars, with some 2,700 battles—if one classifies as a battle those clashes on land involving at least 1,000 casualties and at least 500 for naval engagements.

Today we are concerned with the plight of our fellow countrymen who are held by the North Vietnamese and by various groups operating in South Viet-

nam or elsewhere in Southeast Asia. The frustration of our Government is matched, and surely exceeded, by the sorrow, the uncertainty, the cold fear felt by the relatives and loved ones of members of our Armed Forces who are missing from the ranks of their comrades in Vietnam, but whose fate cannot be definitely determined due to the stubborn intransigence of those against whom we are fighting in Southeast Asia.

Despite the best efforts of our Government, of some foreign governments, of international organizations, of certain U.S. citizens and officials acting in unofficial capacities, Hanoi refuses to abide by the rules of civilized nations governing the treatment of prisoners of war. This is despicable.

The most expeditious way to bring about the identification and release of our men held captive in Southeast Asia is to negotiate a general settlement of the war. This is the surest way, perhaps the only way, to bring about their early release.

As I have pointed out, ever since the Treaty of Westphalia in 1648, it has been customary to release all prisoners upon the negotiation of a general settlement following an armed conflict. Partial exchanges, releases, and paroles have sometimes occurred, but these have been rare. There have been limited releases of badly crippled and diseased prisoners in wars as recent as World War II, but this is a definite exception to the general rule. During the American Civil War, there were exchanges, particularly of officers, and in December 1864, prisoners of war officers were paroled by both sides to arrange for food and supplies to be sent to prisoners still held. Generally, these limited releases have been based on bartering between the opposing sides.

It has been proposed by some that we try to barter for our men held by the North Vietnamese. We do this sort of thing in connection with hijackings and exchanges of high-level spies. Perhaps it would work with prisoners of war, or so it is thought by some. In my opinion, although I would be willing to have our Government try this, it would be fruitless. I base this on the lack of interest displayed by the North Vietnamese in getting their own people released from South Vietnamese prisons and stockades.

Furthermore, both North Vietnam and the Vietcong have stated that release of prisoners and information about them must be a part of a general settlement of the war.

I have joined with other Senators in sponsoring various resolutions deploring the conditions under which our men are held by enemy groups in Southeast Asia. I have urged, through various channels, that an accounting be made by North Vietnam, through the International Red Cross or otherwise, of all Americans held by them or their associates and underlings. Thus far I have seen few tangible results. Some names have been released. Some films have been shown. These teasers only tantalize sorrowing and uncertain relatives and friends.

And we, of course, do not entirely trust the accuracy of what the other side out there has to say. Based on the brainwashing and brutalization practiced in Korea, we can be on guard against the same kind of thing in Vietnam. Of course, this kind of treatment and possibly enforced defection must be placed in the "nothing-new-under-the-sun" category. During our own Civil War, the Yankees captured some 476,149 prisoners and "allowed" 5,452 of these captives to join the Union Army. Senators from the North may point out in rebuttal that 3,170 Yankees captured by Confederate forces—out of a total of 188,145—joined the Confederate Army.

Without a negotiated settlement of some sort, our prisoner-of-war problem is discouraging.

For about 6 years, I have publicly urged, as I had privately urged for many years prior to that time, that the President of the United States, beginning with Mr. Eisenhower, negotiate a settlement of the political problems in Southeast Asia. Now that President Nixon has "ruled out" winning the war militarily, I see no reasonable alternative to a compromise. Such a settlement should and must include an early release of all prisoners of war.

ADDRESS BY SENATOR KENNEDY

Mr. MONDALE. Mr. President, the turbulence on our Nation's campuses is one of the most disturbing and perplexing developments we face.

We are in very real danger of losing that essential bond between the university and society at large. And with it, we stand to lose much of the potential for our future as a free and progressive nation.

We begin to repair that bond with a new understanding—a new understanding by students of the society in which they live, as well as a better understanding of students by their elders.

The distinguished senior Senator from Massachusetts has made a major contribution to this mutual understanding in an address delivered last night at Boston University. I ask unanimous consent that Senator KENNEDY's wise reflections be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY SENATOR EDWARD M. KENNEDY

I am honored to be with you this evening and to have the privilege of inaugurating this year's lecture series at Boston University.

We all know that every campus in every city, town and village across the country is apprehensive as the new academic year begins.

The events of last May, at home and abroad, are behind us, but not forgotten. The war continues.

The intensity of the public debate has lulled after the strenuous summer lobbying and the optimistic vote on the McGovern-Hatfield amendment. Many persons feel that we may be passing through the eye of the hurricane, with yet another round of unrest and disturbances to beseige us on the road ahead. The embattled university in Wisconsin has felt the murderous, senseless shock of a bomb heard round the country.

Public tolerance has been severely strained, and public indignation is clearly being played to by some political figures.

Everyone awaits the recommendations of the President's Commission on Campus Unrest. Everyone hopes that we are pulling back from the brink on which we have stood.

In the midst of this strife and of our deep concern over the future of our Nation, it is important to pause and note that in recent times, we have seen the system respond.

Changes, both great and small, can be directly attributed to the involvement of young people. They began in the McCarthy and Robert Kennedy campaigns of 1968. There the movement against the war was crystallized into hard political activity. Whether or not we are pleased with the rate of American withdrawal from Southeast Asia, it cannot be denied that American policy is now different.

Men and women have been elected to public office in the past two years, or will be this November, who would not have had a chance a few years ago. And men have been deprived of office by the strength of the new political vitality of the young and the concerned.

Surely, the rejection of Judge Haynesworth and Judge Carswell cannot be overlooked in measuring the responsiveness of our system.

I well recall the influx of thousands of young Americans into Washington following the invasion of Cambodia and the tragedies at Kent and Jackson.

I met with many of you in this audience on the steps of the Capitol, and together we discussed the war and the other great issues of our day. The progress we sought last spring can be measured in results this summer.

In areas like the debate on the Church-Cooper amendment and the McGovern-Hatfield amendment, the Senate clearly began to respond to the voice of the people. A President who resists a timetable to end the war was forced to set a timetable for withdrawal from Cambodia. Congressional investigators and a presidential commission have visited Kent and Jackson, and grand juries are still meeting.

So there is responsiveness to constructive pressure.

And, in another extremely important area, the American political system itself has reached out to embrace the young.

Last June, culminating more than a quarter century of debate in the Halls of Congress and throughout the Nation, Congress passed a historic statute lowering the voting age to 18 in all elections, Federal, State and local—thereby bringing your generation of Americans into the mainstream of the political process of the United States.

By lowering the voting age to 18, the Nation has passed another important milestone in our long march toward extending the franchise to all our people.

Not for fifty years—not since 1920, when the Constitution was amended to give the right to vote to women—have we taken a comparable step to broaden the base of our democracy and increase the responsiveness of our Government.

Last Thursday, in the United States District Court for the District of Columbia, I had the opportunity to participate in the oral arugment of the first judicial case testing the constitutionality of this statute.

Although there were some legal arguments raised against the bill in the course of the congressional debate, I believed then, and I continue to believe, that Congress had ample constitutional authority to lower the voting age by statute.

As a result, when the statute first goes into effect, millions of young Americans between the ages of 18 and 21 will be eligible to go to the polls for the first time, and thereby begin a lifetime of participation in the political process of America.

On January 1, the Supreme Court willing, they will have that right.

Whether they use it, and how they use it, is up to them. The answer will be part of the promise of this decade.

Yet, even beyond the potential of the

youth franchise, the opening year of the 70's has brought America's student population to another important fork in the road.

As we saw last May, and as we will see this fall, there are two clear choices for every student, every organization, and every campus.

They can choose destructive violence and physical coercion, rioting, burning, occupying, bombing, and trashing, at their schools and in the community.

Or they can choose concerted and constructive political action to restructure university governance, to change laws and policies at every level of government, to elect progressive officials in city halls and State houses, in Congress and in the White House.

In the past few years, and especially since May, some students have pursued each of these paths.

But so we are still at the fork in the road, because so many students have yet to choose their course.

And for most of those who have started on the road of violence, it is still not too late to reassess, restart, and turn the other way.

Let me state forcefully, briefly, and simply where I stand, for the hour is much too late for hedging, and the stakes much too high for equivocation.

There is no room, no role, no reason for violence at America's colleges and universities. Those who seek change by the threat or use of force must be identified and isolated, and subjected to the sanctions of the criminal law.

They are hijackers of the university, holding hostage its peace and tranquility, its students and faculty, its research and scholarship, to be ransomed for their particular demands.

And like hijackers, they must be deterred and repudiated, even—or especially—by those who may share their goals. Any person who lends them aid and comfort, any person who grants them sympathy and support, must share the burden of guilt.

For, like the Arab Commandos, the campus commandos can only operate if the environment allows them to.

I fully recognize that the apostles of force and destruction on campus are very few in number, and that the vast majority of students and faculty totally reject violence as a conscious tool of progress.

Yet there is a collective responsibility. It is partly real—to the extent that the few are followed, encouraged, and tolerated by their peers and teachers—and it is partly imagined by those in the public who lump all students together.

Surely the time has come to face these facts, and to face the other realities which student activism in all its forms has visited upon us all.

By their methods, their appearance, and their rhetoric, students have managed to obscure their noble goals in the public's consciousness, and to replace them with the issue of student unrest itself. Instead of being the medium for vital messages about society's ills, for ending war, racism, poverty and repression, the students on the campus are seen in the public eye as one of the principal ills in today's society.

Instead of producing leadership for new solutions to the Nation's problems, campus activists are producing fear and outrage and reaction.

They are pushing the public in the opposite political, philosophical, and social direction. For every American who blamed the National Guard for the killings at Kent State, there were two who thought the students were at fault. There are probably another two for whom the tragedy at Madison was the last straw.

Perhaps the force of public opinion is not, and should not be, enough alone to affect the young. But force of public opinion cannot be ignored, for its results are real and important. Because public opinion is focused on this new and complex problem of "campus unrest", students are convenient and welcome scapegoats.

Turmoil on the campus lends itself to the wildest and basest forms of political rhetoric. The kind of demagoguery we hear from our Vice President and others provides a thick smokescreen behind which some elements in our society can hide what they themselves are really doing to this Nation.

For those who pander to public emotion and perplexity at events on campus are also those who allow the war to continue, and who disorder our national priorities so that we invest in S.S.T.'s and A.B.M.'s instead of teachers for our children and health care for our sick.

And so, in large part because mainstream America is preoccupied with concern about the campus, we all suffer.

While the politicians of panic get their way, leaders with conscience and foresight find the institutions of power—and the public—less receptive and responsive to their programs, priorities, and values, perhaps partly because these are also shared by student America. Thus the deep problems of society go unsolved and short-sighted policies endure.

Moreover, as those who look backward are emboldened by the polarization between the community and the campus, and as those who look forward are resisted, the ones who really suffer most are the ones most in need; the working people who need more and better health care and public education; the unemployed who need training and jobs; the growing families who need housing; the elderly for whom inflation is a constant pickpocket; the union men and women whose sons are dying in Vietnam in larger numbers than any other group in society; and the poor—white, black, and Indian—who need help to lift themselves from deprivation and discrimination. They are the ones who are the real losers when "town" takes on "gown" on a national scale.

For students themselves, there are also some distressing signs of change. Two years ago you could go anywhere to canvass for candidates at election time. Now some candidates feel that student canvassers may be a liability, and the scope of their activities is being curtailed.

Students have become suspect. America is beginning to fear and blame them as a group, without making distinctions between those who seek violent change and those who seek peaceful change.

In many minds, a student is a radical, a radical is a revolutionary, and a revolutionary is a bomb thrower.

Students of all stripes thus suffer the pains of prejudice.

Their lives on campus have been changed. There is an aura of tension and control, instead of calm and freedom.

They have lost some of their natural allies in the university. Many professors feel that student activists are diluting the tradition of academic freedom and interrupting the scholarly and educational functions of the university, causing damage from within that rivals the potential damage from without.

Some students have also alienated most of those who could, and should, be the beneficiaries of their reform efforts—the salaried and hourly employees, the blue collar workers, the hard hats, the commission salesmen, the policemen and all the other middle Americans whose taxes are unbearably high, whose children go to overcrowded and underfunded public schools, whose sons went to war because they could not get deferments, who cannot afford B.U.'s $1700 tuition—let alone next year's $2,000—who can be wiped out by the costs of a major illness, whose automobile insurance and automobile repair costs are getting out of reach, who rely for their leisure on inadequate public park and recreation systems, who inhabit cities where pollution, traffic, utility service, and crime are daily challenges.

These are people who have very real and very immediate complaints about the system and its institutions, as you do, and if you succeed in making the system more responsive, it will respond to their needs as well as yours.

They are also the ones whom you must persuade if new national values and priorities and ideals are to be adopted. But the gap between them and the student is too wide now for these processes to go on.

The worker who could not go to college thinks students should be grateful that they can. He cannot understand why the privilege of college is being abused, why the opportunity is not being fully pursued, why the educational process, which can be the key to success, is being interfered with, and thus he has little respect for anything the activist student might have to say on any subject.

He is not prepared to accept the life-style of the students he sees on the streets of Beacon Hill, Back Bay, or Cambridge.

There is no basis for him to understand or empathize with the needs and drives which bring some young Americans to beards and long hair, beads and pot, and fringed vests and free love.

And so he turns off when the student speaks.

And the student not only loses a vital audience, and potential ally, but also gains an antagonist.

I need not remind you, as well, of the constant backlash from state and national legislators seeking to tie strings to funds and to legislate their own version of discipline on the campus. Or the backlash from alumni and boards of trustees, whose pressures all too often encourage the forces of repression.

That is a dismal picture, and I regret I have to paint it. But you are the ones who can brighten it.

If violence and interference with the rights of others are to be eliminated from the campus, then you yourselves, the vast majority of students, will have to take the lead. You must make clear that violence and coercive tactics are unacceptable.

It is not enough merely to *avoid* violence and interference with rights of others. The time has come to *do* something about it, to play an active role in calming the campus, and to do it with care, with thought, and with courage.

And you must analyze within your own groups whether you have become too narrow-minded in your commitment. Are you merely talking to and persuading those who already agree with you? Have you invested enough thought and time in broadening your appeal and seeking to convince your natural allies and your potential constituencies outside the campus? Or have you acted as though you don't believe outsiders can understand, as if only the college-educated, or the young, can truly identify with your underlying goals, and your immediate purposes?

Already the feeling is too widespread that students are out for a self-indulgent ego-trip, for adventure, for excitement, for a closed game of "how much self-satisfaction can I get?"

You must disprove that notion. You must communicate with others, persuade them, broaden your base of support and their base of hope. You must listen to the hard hat, the firemen, and the bus driver.

You must understand their problems, and not just vent your problems on them.

And you must measure your own priorities. If you are to persuade others, you must be able to reach out to them beyond your own life. Too often, the trappings and habits of youth preclude the opportunity for any contact whatever. It may be unjust and irra-

tional and maddening that the length of someone's hair should influence the effect of his discourse, but it is fact of today's life.

If you are going to move out beyond the campus, you have the choice:

You can maintain your lifestyle and appearance, and bear the double burden of persuading your listeners of the validity of both the medium and the message, with the risk that if you fail on the first, you get no chance on the second.

Or you can move right to the message, by sacrificing, at least temporarily, some of the trappings that antagonize others.

It is simply a matter of priorities. How important is it to you that your message get through? How much time and energy do you want to spend convincing people that students with beards are really normal citizens, before you can start convincing them that the war and other abuses in society are immoral?

And finally, I think it is vital to realize that successful political action involves changing institutions not only from the outside but from the inside as well.

There are many public service functions where direct participation by America's youth could not only revitalize the institutions, but also help produce the generational dialogue and understanding which the Nation needs so badly.

In our hospitals and health centers, in our city and county governments, in our police departments and criminal justice agencies, in poverty programs and educational systems, the problems of our society can be exposed to daylight. They can be confronted and attacked.

These areas are the front lines, where actions have direct and measurable results, where hard work can bring personal gratification and social contribution at the same time.

For surely there is a clear element of snobbery in constant criticism of institutions and agencies without any willingness to enter them and see if a better job can be done.

Dissent, like so many things in the America of 1970, has become too comfortable.

It takes 5 minutes to draw the letters on a protest sign, but it takes a lifetime of dedicated service to make a contribution to society.

In the decade of the sixties, students in North and South joined together to awaken the Nation's conscience.

A generation of freedom rides, sit-ins, and voter registration helped to launch the drive to banish racism from our social structure.

Those who came before you in recent years were the first to call attention to the critical moral issue of our day, our participation in the Vietnam war.

As troop levels and bombing raids began to escalate, it was the academic community which first raised the voice of protest, which first questioned the validity of our means and ends in Vietnam, and which began to transform the nature of all our international commitments.

In hundreds of respects, our students of the past have made vital and lasting contributions to the quality of our life.

What difference will you make? What challenge will you meet? What burden will you carry? What service will you give? Will it be enough to shout your protest, or will you also help the rest of us to bring your dreams to life?

A man of Massachusetts, one of the greatest prophets in the history of our Nation, put this thought very simply, in words as timely now as they were on Memorial Day in 1884:

It was Justice Oliver Wendell Holmes who said:

"As life is action and passion, it is required of a man that he should share the passion and action of his time, at peril of being judged not to have lived."

Indeed, we are in a time of change, of new problems, and new answers. You must help your university to remain a place of scholarship and learning, a place of growth and wisdom, a springboard for new ideas and new ways.

It is you and millions like you around the country who will determine how your university and your Nation will continue to exist. The responsibility is yours. I hope you will bear it well.

OUR SLUGGISH ARMY NEEDS DRASTIC REFORM

Mr. YOUNG of Ohio. Mr. President, in the editorial section of the Washington Post, on September 13, was published a most informative and penetrating article written by former lieutenant colonel of the U.S. Army Edward L. King. This article is important, and is a factually correct assessment of what is wrong with our Army, and in particular as to what is wrong with the topmost generals and other officers from the Joint Chiefs of Staff down.

Lieutenant Colonel King, the author, who had requested retirement last year because of his opposition to our involvement in Southeast Asia and doubtless for other very valid reasons set forth in his statement, served overseas in the Korean war. Recently, before his voluntary retirement, he was with the Office of the Joint Chiefs of Staff at the Pentagon.

Mr. President, I hope that millions of Americans, including Members of Congress, our GI's and officers and men now serving in our Armed Forces, particularly the draftees, read this article, entitled "Sluggish Army Needs Drastic Reform."

Mr. President, I ask unanimous consent to have this article printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SLUGGISH ARMY NEEDS DRASTIC REFORM

(By Edward L. King)

The United States Army needs reform. One aspect of this need has been examined by the President's commission to establish an all-volunteer armed force, and public debate about reform has focused almost exclusively on the volunteer army.

But little critical thinking has been devoted to two other areas crying—so far, in the wilderness—for public attention: the officer corps and the armed services' organization. If both of these are ignored, the U.S. Army will continue to be badly led and badly organized, regardless of whether the enlisted men are volunteers or draftees.

For roughly the last 15 years, the quality of military leadership has been declining. The deterioration has been all too vividly revealed by the Vietnam war. The Army developed the concepts of "limited brushfire wars" and counterinsurgency to ensure a military component for the international political realities of the late 1950s and early 1960s. These doctrines found natural application in Vietnam. That conflict began as a counterinsurgency situation that quickly grew into a "brushfire" war with the Green Berets as the limited warriors.

But they couldn't win, and the Army was forced into a crash program in 1964 to form an air mobile division—the First Air Cavalry Division—which was essentially a forerunner for largescale conventional war. The Air Cavalary was unable to stop the "brushfire," so the buildup of standard infantry divisions began and Vietnam became a small-scale replica of World War II—hardly what the limited war proponents had sold to Presidents Kennedy and Johnson.

A further deception in Army thinking is the oft repeated assertion by high-ranking officers that political, not military, constraints have inhibited the Army's success in Vietnam. Yet the limited war concept itself is sharply restricted to achieving specific tactical objectives within a narrowly defined geographic area. It would not include offensive operations such as attacking across the DMZ, bombing Haiphong or invading Cambodia.

Vietnam has revealed the limited war concept for what it really is—a mercenary expedient to assure military participation in international affairs, and the money to go with it, without any meaningful adjustment in large war force structures or any relationship to contemporary political priorities.

In short, the Army first urged and now perpetuates the war for its own parochial internal purposes, with little sense of national responsibility. And from a purely military viewpoint, the command of our forces in Southeast Asia has been egregiously mismanaged because it has been guided by the wish to maximize career opportunities for senior officers rather than maximize the effectiveness of our forces.

TOLERABLE CASUALTIES

For example, a single combat command assignment is today an unwritten prerequisite for promotion from colonel to brigadier general, and additional such assignments are virtual guarantees of further rapid promotion. To accommodate the eagerness for promotion, combat command assignments are rotated every six months. This results in more promotions for career officers. It also means that combat in Vietnam is generally led by green officers inexperienced in local battlefield command, in the past tactics and characteristics of the enemy's troops, in the experience and ability of their own troops and in the climate and terrain over which they must fight.

Under such circumstances, it is virtually inevitable that more promotions for eager commanders would be accompanied by more dead enlisted soldiers than would have been the case had the Army been given stable, experienced combat leadership at all levels as a matter of policy. But the casualties of such a policy would have been career improvements for hundreds of officers. In the eyes of today's general officers, such casualties are less tolerable than the lives of soldiers who died in superfluous agony.

The situation has grown unchecked because of complete internal conformity; deviating from the Army party line is discouraged and punished. Internal criticism and disagreement are nonexistent. And needless to say, the reprisals against criticism in public are swift and vigorous. Consequently, the uniform face put on for the public and Congress by the Army's officer corps is not that of healthy consensus but of strict and sterile convention.

The futility of the war and the personal self-interest of most commanding officers have not been lost on lower ranking junior officers and GIs. Many continue to serve and toe an undeviating line out of fear of court-martial and jail or because of a strong desire not to let their buddies down. Officers remain silent and seek promotions in the only way available because they, like other men, have home mortgages to pay, children to send to college and higher paid retirement to anticipate.

Yet the doubts are growing daily, particularly among younger officers. Among these young men, service to the nation and their subordinates, and dedication to justice, individual dignity and self-respect, would be more appealing attributes of military life than service to their own careers first and to the existing system a close second.

It is difficult to imagine that bitterness

that is beginning to permeate the lower enlisted and officer ranks of the Army or the creeping paranoia against the press, TV, politicians and liberal segments of our society that afflicts the senior ranks. Such conditions, if left unattended, pose a serious danger to the future of the republic.

TOO MUCH SUPPORT

Not only is the Army badly led, it is badly structured. For example, in Europe approximately 200,000 Army troops include only about 85,000 actual combat troops. There is no valid military reason why these 85,000 combat soldiers could not be adequately commanded and supplied by an additional 65,000 men. Thus, either the total force of 200,000 could be cut by 50,000 troops or that total should contain a much higher proportion of combat elements.

Since the mid '50s, the proportion of noncombat manpower has been growing. In Vietnam it has required an Army force of over 400,000 men to provide 100,000 actual combat troops. The present "combat slice" (the percentage of troops available actually to fire on the enemy) is under 40 per cent for all Army units. This compares unfavorably to the 60 per cent combat slice of the Soviet army and 70 per cent combat slice of the North Vietnamese army.

Only a fraction of the vastly increased support forces are required by the new military technology. Most are merely the baggage that go along with sending the Army "first-class" and with the proliferation of headquarters commands which do nothing more than pass orders to lower commands and provide slots for general officers and their retinues. The present U.S. Army is a dragon with a huge tail and tiny teeth.

The implications of this situation are several. First, economically, the U.S. Army is far too expensive compared to its combat potential. In Western Europe, for example, at least two and probably three senior command levels between the Pentagon and the combat commanders could be eliminated. These headquarters contribute little to military effectiveness.

Second, tactically, the dragon is reasonably mobile and can travel in the luxury to which it has become accustomed only when it has absolute air superiority. Yet in Western Europe, it is not assumed that the Air Force will have absolute air superiority.

Third, strategically, when only limited conventional combat forces are available against superior conventional forces in Eastern Europe and the Soviet Union, greater motivation exists for U.S. forces to resort quickly to first use of nuclear weapons with the inherent danger of nuclear escalation rather than flexible response to aggression.

The foregoing implications are, of course, mere suggestions of the need for a hard look at the organization of the U.S. Army and the military unified and specified staff concepts. Resistance to that hard look comes from career officers who feel that they personally have nothing to gain from a restructuring of the Army and considerable to protect by perpetuating the system that provides comfortably for professional advancement and retirement.

SECOND-RATE SCHOOLING

Reforming the Army is not a contradiction in terms, but it does pose obvious obstacles of entrenched service and congressional attitudes and habitual bureaucratic inertia, as well as the added problem that any criticism of the military is characterized by some as patriotically suspect if not quasitreasonable.

Nevertheless, the obstacle course and the risk of obscurantist slander must be run. To improve leadership:

Better education. The service academies are in fact only engineering schools and, on the basis of faculties and curricula, second-rate ones at that. They and the career officer training schools need improved and broadened curricula and more civilian instructors. Now is the time to establish national priorities clearly and to emphasize that military service is a way of providing national service and not a personal end in itself.

Internal dissent and debate must be encouraged; public comment by military men on matters of ordinary concern to citizens should be restrained only when substantive evidence exists that such comment seriously prejudices true order and discipline of the Army.

The Uniform Code of Military Justice should be revised to bring it more in accord with accepted principles of justice. Court-martial should not be used in lieu of leadership, as was the case at the Presidio of San Francisco. The rights of the soldier must be better protected.

Nondiscriminatory promotions. Promotions should be made solely because of demonstrated merit and ability, without regard to source of commission (e.g., West Point, ROTC, OCS), component of service (regular, reserve), family background, race or religion. Discrimination on all these grounds now exists.

A less conformity-conscious rating system. Efficiency report ratings should be more oriented to demonstrated and potential ability and less weighted by the opinion of one individual on whether or not an officer is constantly conforming to the wishes of that individual.

Civilian surveillance. Civilian leaders, especially in the Pentagon and White House, must unceasingly seek out and reward officers who lead by their personal example and performance of duty rather than by force of rank. The service secretaries should be men with experience in military affairs, but with unquestioned independence. (This requirement should not exclude former military men from serving in civilian capacities. Examples: Gen. James Gavin could probably be a more effective civilian Secretary of the Army than most civilians. President Eisenhower probably better preserved civilian control over the armed forces than any other recent president.)

To improve organization:

Tough civilian leadership. Even though many officers would welcome a more streamlined and austere Army, they will certainly not succeed in achieving it unless supported by vigorous congressional and executive action.

Reduction in noncombat forces. Western Europe provides obvious examples, but the continental U.S. command structure could be greatly reduced without the slightest reduction in preparedness or effectiveness. Present top-heavy unified command structures and unproductive specified commands must be reduced in accord with changing national priorities.

To reform is to prosper. Yet the armed services show few signs of reform vitality. This state of affairs is beginning to be appreciated by the public through the dark glass of recent history: vast overspending on the C–5A, ill-fated defense systems such as the F–111 and the Cheyenne Helicopter, the cover-up of Mylai, the Green Beret murder accusations, the legal "overkill" of courts-martial at Ft. Jackson, Ft. Dix and the Presidio, and the apparent futility and questionable judgment of such bloody incidents as the Hamburger Hill assault (for which the commander was rewarded with a third star and a choice job with the Joint Chiefs of Staff.)

These are now in the public domain and have disillusioned and alienated much of the civilian community. But what is not yet at public issue is the inflexibility, shortsightedness and selfishness within the armed services which have allowed these incidents to occur.

ORDER OF BUSINESS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that I may proceed for approximately 7 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATE LEGISLATIVE ACHIEVEMENTS: "A CALL FOR COOPERATION"

Mr. MANSFIELD. Mr. President, under the heading "A Call for Cooperation," the President last Friday transmitted a message to the Senate. With it he takes Congress to task for apparently failing to attend fully to what he defines as his legislative program. I have read through this message and I am somewhat puzzled. I am puzzled first of all because—at least as far as the Senate is concerned—just about every single item mentioned by the President has been, is now being, or will soon be, considered and disposed of on the merits.

Indeed, the only explanation for such a message is that it has arrived on the eve of campaign time—not an unusual time and not an unusual ploy. It has been a tactic employed by many Presidents. It is thus a message that should have been anticipated. But even if this is a document aimed at the Senate, it misses the mark by a wide margin. Whatever may be the reasons for criticizing the U.S. Senate, attention to the legislated items mentioned in this message is not one. Many of these items were initiated right here in the Senate and only later were embraced by the administration. All or nearly all of them have been, or soon will be, considered. Some will no doubt be rejected as unfeasible or poorly conceived. Some will be changed drastically to do the job intended. And it is true that some—such as the National Institute for Education proposal—simply cannot be considered at all. Many reasons apply. In the case of this education measure, it is because the administration fired its education chief on the eve of Senate hearings. No successor has been named, and therefore hearings would be futile with no administration spokesman.

What is apparent from this message is that is does not reflect the record, at least the record as far as the Senate is concerned. Speaking on behalf of the Senate, the only way to correct the record at this time, would be to take the proposals cited, item by item, and recall the action taken by the Senate.

Under the caption "Reforming the Institutions of the Past," for example, the message mentions the Tax Reform Act, the Economic Opportunity Act, and the Postal Reorganization Act. All of these measures were considered by the Senate. All passed the Senate. Each, as I recall, was initiated right here in Congress, and it was only later that the proposal was embraced by the administration. Most notable among them, perhaps, was the reform of our income tax laws. With this action, Congress—and especially the Senate—acting on its own initiative, rewrote the tax laws to provide more equity and a greater distribution of the overall

tax burden for the benefit of the lower- and middle-income groups.

Draft reform is then cited in the message. Of course, the reform of our draft was undertaken by Executive order with the institution of the lottery system. The President should be commended for that first step. But when his own proposal for a volunteer army was under consideration in the Senate as an amendment to the military authorization bill, the administration opposed it. It called for delay and urged rejection. I, along with many of my colleagues on this side of the aisle, as well as the other, supported the President on that occasion. Members of his own party in the Senate sought to defeat his volunteer proposal. Strangely missing in this reference to the military field were the cold war GI bill benefits initiated by Congress; and, even more important, the whole attitude of Congress toward military expenditures. For example, it was Congress that cut so severely the administration's requests for military spending in order to provide more money for the poor, for environmental needs, for urban problems, and for education.

Reform of the welfare system is mentioned prominantly, and of course, the family assistance proposal backed so strongly by the President is on the Senate's schedule to be considered, hopefully, later this month. I, personally, may have doubts about some of the reforms he suggests, but the President is to be greatly commended for his tenacity regarding this measure. Particularly gratifying were his special efforts to get the approval of key Members of his own party who for so long have been blocking consideration of the measure.

The food stamp proposal has passed the Senate, as have all of the major health proposals. The measure that would provide revenue sharing with the States is one of those bills which the Constitution requires the House to originate. If and when such a proposal is received in the Senate, it will be considered—and expeditiously.

Manpower training is on the Senate schedule and will be considered this week. It should be pointed out, however, that this is a far different proposal from that suggested by the President. By contrast, this measure goes a long way to solve the unemployment crisis that is now facing this Nation by creating an additional 300,000 jobs. Also scheduled are the social security amendments.

The electoral reform proposal is now pending. As for the District of Columbia, Congress has gone at least part of the way with the adoption of the delegate measure. There is talk that a constitutional amendment proposal to provide for elected representatives may be offered later this month. There is no telling what will be received from the other body in the way of foreign trade proposals. If and when they arrive in the Senate, they will be given consideration.

The Merchant Marine Act amendments are on the Senate schedule for action next week.

When the message speaks of unacted upon crime proposals, it does not refer to the Senate's record. On the matter of crime, I need only reiterate what I have stated so often in the past. The Senate has passed all but one major administration crime, drug and obscenity bills plus several that it originated itself.

With regard to education, the President should be advised of the fact that none of the ongoing education programs expire until next year. The Education Subcommittee is now considering 14 higher education proposals, only one of which was submitted by the administration. Many hearings have been held already and more expected. Many of the education experts who have testified have felt that the administration's proposals are neither practical nor feasible. On the matter of the emergency school aid program, I recall that the Senate appropriated $75 million for such a program during the fiscal year 1971. It included Senate-written guidelines as well. To state again for the record, hearings were scheduled on the National Institute for Education proposal. They subsequently had to be cancelled because the administration's Commissioner of Education was asked to resign. There has since been no new Commissioner of Education appointed to fill this vacancy; and without an Education Chief in the Nation, it is felt that any further efforts to hold hearings on the bill would be futile.

The deemphasis given education by the administration was best demonstrated with the vetoes of two educational bills. It is no wonder then that this message failed to mention the outstanding record this Congress has compiled in the education area. It produced the Elementary and Secondary Education Act amendments of 1969, the Emergency Student Loan Act of 1969, the National Center of Educational Media for the Handicapped, the National Commission on Libraries and Information Sciences, and the National Foundation of the Arts and Humanities Act amendments. And that is only part of the record. Ready for action is the environmental quality education proposal and the library services and construction amendments.

In the area of urban affairs the Senate has passed the Urban Mass Transportation Assistance Act and the Housing and Urban Development amendments are scheduled for Senate action. The Senate has passed or is scheduled to act on every proposal in the consumer area, including the Consumer Protection Act, the Consumer Warranty Act, and the Consumer Representation Act. All delays in this most important area were requested by the administration. It should be pointed out as well that the warranty measure has already passed and was a Senate-initiated proposal. Indeed, it was far more comprehensive than the proposal submitted by the administration.

With regard to the environment, again the Senate record is truly outstanding. Not only have each of the proposals cited been disposed of or scheduled, but the Senate on its own has added a good many. It is surprising that the message even mentions this area since it has been the Senate which has taken the leadership in this field. It is recalled that the administration requested only nominal, if any, funds to finance municipal waste treatment facilities. There is a vital need for these facilities today. We are told that drinking water in parts of the land is severely threatened. The Senate saw to it that upward of $300 million was made available.

Of its air pollution record alone, the Senate may be particularly proud. It strengthened greatly the President's proposal; most notably by requiring fully clean cars by the year 1975.

As for oil pollution, the Congress provided rigid standards. Tragically, those standards would be weakened by the treaties that the President has transmitted to the Congress for ratification. I hope the Senate will withhold the ratification of any treaty that would make it easier to contaminate further any ocean, river, or lake waters.

The reference to the Federal oil leases in the Santa Barbara Channel is also a matter of great controversy. Certainly the goal of terminating these leases is most desirable; but not at the expense of giving away valuable Federal resources.

As for Indian legislation, public broadcasting, the stockpile proposals, those measures have been acted upon. The one-bank holding company measure is scheduled this week and consideration of the farm bill begins this evening. Each revenue-producing measure that is pending in the Senate will be acted upon. To repeat, however, under the Constitution, the House is required to act first on all such proposals.

Finally, I would only refer to the list of all measures passed by the Senate during this session of the Congress. I submitted that list for printing in the RECORD on September 1. It shows that, as of that date, the Senate passed 535 measures this session; 200 of those have been signed into law. There have been five treaties ratified.

Mr. President, I ask unanimous consent that the list, updated, be printed in the RECORD at the conclusion of my remarks. It is there for all to read. It is the record of the Senate for this session of the Congress. It is an outstanding record. One for which we may all be proud—both Democrats and Republicans in this body. One for which the American people may be proud. One for which the President may be proud.

The PRESIDING OFFICER (Mr. NELSON). Without objection, it is so ordered.

(See exhibit 1.)

Mr. MANSFIELD. Mr. President, we have cooperated and we will continue to cooperate with the President because we think the Republic must come first—and must come first at all times.

EXHIBIT 1

SENATE LEGISLATIVE ACTIVITY, 91ST CONGRESS, 2D SESSION

(By Senate Democratic Policy Committee)

Symbols: P/H, Passed House; P/S, Passed Senate.

Following is a brief summary of major Senate activity:

AGRICULTURE

Apple marketing orders.—Extended to apples those provisions of the marketing law which now authorize paid advertising to be provided for in marketing orders for cherries, carrots, citrus fruits, onions, Tokay grapes, fresh pears, dates, plums, nectarines, celery, sweet corn, limes, olives, pecans, and avocados. Public Law 91-363.

Conservation and development projects.—

Authorized the Secretary of Agriculture to bear part of the cost of installing public fish and wildlife or recreational developments in so-called resource conservation and development projects but not to exceed one-half the cost of the land and minimum basic public facilities needed in connection with such development. Public Law 91-343.

Custom slaughtering.—Amended the Federal Meat Inspection Act to permit custom slaughterers to engage in buying and selling meat and meat food products without losing their exemption as custom slaughterers; exempted from inspection requirements the custom preparation for the use of the owners and their households of carcasses and parts of carcasses of (i) cattle, sheep, swine and goats slaughtered by their producers, and (ii) game animals; and permitted the Secretary of Agriculture to exempt custom slaughtering and processing performed by an inspected establishment. Public Law 91-342.

Dairy products donation.—Amended the Agriculture Act of 1949 to provide that dairy products acquired by the Commodity Credit Corporation through price support operations may be donated, prior to any other disposition, for use in the United States in nonprofit school lunch and other non-profit child feeding programs, in the assistance of needy persons, and in charitable institutions, including hospitals. Public Law 91-233.

Egg Products Inspection Act.—Prohibits the distribution of unwholesome shell eggs or their use in food products and makes mandatory continuous inspection of egg product processing plants; applies regulatory provisions to intrastate as well as interstate and foreign commerce; provides for specific exemptions, identification of egg products not intended for human food, recordkeeping, and Federal-State cooperation; prohibits States from imposing requirements conflicting with the act or certain other Federal laws; requires imports to meet the same requirements as domestic products; makes the cost of inspection, with certain exceptions, a Federal Government expense, at an estimated cost of about $5 million annually; and prescribes penalties for violations under the act. S. 2116. P/S 2/2/70.

Emergency assistance to provide nutritious meals to needy children.—Amended the National School Lunch Act, as amended, to provide funds and authorities to the Department of Agriculture for the purpose of providing free or reduced-price meals to needy children not now being reached; authorized the Secretary of Agriculture to use $30 million of funds from Section 32 of the Act of August 24, 1935, to supplement funds heretofore made available to carry out programs during the fiscal year 1970 to improve the nutrition of needy children in public and nonprofit private schools participating in the National School Lunch Program under this Act or the school breakfast program under the Child Nutrition Act of 1966. Public Law 91-207.

Guam agricultural services.—Continues through June 30, 1975, authority for the Secretary of Agriculture to maintain an agricultural program in Guam, which authority expired September 7, 1969. S. 2991. P/S 5/11/70.

Hawaiian papayas—advertising.—Amended the Agricultural Marketing Agreement Act of 1937 to add Hawaiian papayas to the list of commodities for which paid advertising can be provided for in marketing orders. Public Law 91-384.

International animal quarantine station.—Authorized the Secretary of Agriculture to establish an international animal quarantine station within the territory of the United States, through which animals may be moved from any foreign country into this country to make it possible to improve livestock breeds; provided measures to prevent the introduction of and dissemination within this country of livestock or poultry disease or pests; and set penalties applicable to the bringing in of animals to the station or subsequent movement of animals therefrom to other parts of the United States contrary to regulations to be issued by the Secretary of Agriculture. Public Law 91-239.

Production research.—Amended the Agricultural Marketing Agreement Act to authorize inclusion in marketing orders for commodities other than milk of provisions for production research supported by handler assessments and to make such research and development projects as now authorized by the Act, a purpose of the Act. Public Law 91-292.

Rural telephone bank.—Creates a Rural Telephone Bank to provide supplemental financing for rural telephone systems and provides that the rural telephone account is to consist of such net collections from the 2-percent telephone loan program received after July 1, 1968, as may be necessary to provide for the Government's investment in the Bank. S. 3387. P/S 4/2/70. H.R. 7. H. Cal.

School lunch and child nutrition amendments.—Improved and revised the child feeding programs conducted under the National School Lunch Act and the Child Nutrition Act of 1966 to provide better child feeding operations reaching all children, particularly the poor. The bill provided: authorization of appropriations 1 year in advance; school lunch apportionment based on lunches served 2 years prior; apportionment of nonfood assistance based on need; nutritional training and education and studies of food service requirements; direct distribution of foods to schools and service institutions; matching requirements (beginning at 4 percent and rising to 10 percent); free and reduced price (not more than 20 cents) lunch for any public school child in a household which has an income below the poverty level, determined by the Secretary of Agriculture; publicly announced policies regarding free or reduced price lunches; no overt identification of children receiving free or reduced cost meals; apportionment of funds to States based on the number of children aged 3 to 17 in households with incomes of less than $4,000 per year and to schools on the basis of need; Federal funding of 100 percent of the program costs; annual plans describing the proposed extended State lunch program; semi-annual estimates of eligible children; monthly reports of the numbers receiving free lunches and reduced price lunches; special developmental projects; a National Advisory Council on Child Nutrition; an increased appropriation authorization for fiscal 1971 for the breakfast program (from $12 million to $25 million); and other changes. Public Law 91-248.

Special milk program extension.—Permanently extended the authority for the special milk program which would expire June 30, 1970, at the current authorization level of $120 million. Public Law 91-295.

Tobacco allotments.—Made permanent the authority for leasing of tobacco acreage allotments as provided by section 316 of the Agricultural Adjustment Act of 1938; subjected such leasing to the discretion of the Secretary of Agriculture and to a determination by him that it will not impair the operation of the marketing quota or price support program; provided for extension of such leasing authority; excepted specified tobaccos from section 316; and extended the maximum duration of leases to 5 years. Public Law 91-284.

Tomato advertising.—Amends the Agricultural Adjustment Act to add tomatoes to the list of commodities for which paid advertising can be provided in promotional programs under marketing orders. S. 1862. P/S 1/3/70.

Wheat referendum deferral.—Permitted the wheat marketing quota referendum for the 1971 crop to be deferred until the earlier of October 15, or 30 days after the adjournment of Congress. Public Law 91-348.

APPROPRIATIONS: 1970

Continuing appropriations

Continued appropriations through February 28, 1970. Public Law 91-193.

Made further continuing appropriations for the fiscal year 1970 to provide for authorized salary and compensation payments provided for in the Second Supplemental Appropriations Act, 1970. Public Law 91-257.

Foreign aid.—Appropriated a total of $2,502,413,000 for foreign assistance and related agencies. Public Law 91-194.

Labor-HEW.—Appropriated a total of $19,747,153,200 for the Departments of Labor and Health, Education, and Welfare, and related agencies. H.R. 13111. President vetoed 1/26/70. House sustained veto 1/28/70.

Labor-HEW.—Appropriated a total of $19,381,920,200 for the Departments of Labor and Health, Education and Welfare, and related agencies. Public Law 91-204.

Second supplemental.—Appropriated $6,021,535,005 for the fiscal year ending June 30, 1970, for various program supplementals, pay increase costs due to comparability adjustments and resulting from the enactment of the Federal Employees Salary Act of 1970; and revised the ceiling on 1970 budget outlays. Public Law 91-305.

1971

Agriculture.—Appropriated a total of $8,475,935,100 for the Department of Agriculture and related agencies. H.R. 17923. P/H 6/9/70. P/S amended 7/9/70.

Continuing appropriations

Continued appropriations through July 31, 1970. Public Law 91-294.

Continued appropriations through October 15, 1970. Public Law 91-370.

District of Columbia.—Appropriated a total of $636,118,200 for the District of Columbia. The appropriated Federal payment is $108,938,000. Public Law 91-337.

Education.—Appropriated a total of $4,420,145,000 for the Office of Education. Public Law 91-380. Congress overrode Presidential veto.

Independent Offices—Housing and Urban Development.—Appropriated a total of $18,655,019,500 for sundry independent executive bureaus, boards, commissions, corporations, agencies, offices, and the Department of Housing and Urban Development. H.R. 17548. President vetoed 8/11/70. House sustained veto 8/13/70.

Interior.—$2,028,524,700 grand total, new budget (obligational) authority and appropriations to liquidate contract authority. Public Law 91-361.

Legislative.—Appropriated a total of $413,054,220 for the Legislative Branch. Public Law 91-382.

Public Works—Atomic Energy Commission.—Appropriates a total of $5,258,695,000 for public works for water, pollution control, and power development and the Atomic Energy Commission. H.R. 18127. P/H 6/24/70. P/S amended 8/24/70.

State, Justice, Commerce, the Judiciary, and Related Agencies.—Appropriates a total of $3,122,080,500 in new budget (obligational) authority for the fiscal year 1971. H.R. 17575. P/H 5/14/70. P/S amended 8/24/70. In conference.

Treasury, Post Office, and Executive Office.—Appropriates $9,537,429,000 for the Treasury and Post Office Departments, the Executive Office of the President, and certain independent agencies. H.R. 16900. P/H/4/13/70. P/S amended 9/1/70. In conference.

Atomic Energy

Atomic Energy Commission authorization, 1971.—Authorized appropriations of $2,290,907,000 for fiscal year 1971 ($2,013,307,000 for operating expenses and $277,600,000 for plant and capital equipment). Public Law 91-273.

Western Interstate Nuclear Compact.—Gives congressional consent and approval to a compact between the States of Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming to enter the western interstate nuclear compact. S. 1628. P/S 6/26/70.

Congress

Library of Congress—James Madison Memorial Building.—Increased from $75 million to $90 million the authorization contained in the Act of 1965 providing for the construction of the third Library of Congress Building to be known as the James Madison Memorial Building and provided that nothing in the Act shall be construed to authorize the use of the building for general office building purposes. Public Law 91–214.

Library of Congress—Office equipment and furniture.—Transferred from the Architect of the Capitol to the Librarian of Congress the authority to purchase office equipment and furniture for the Library of Congress. Public Law 91–280.

Library of Congress security.—Extended the present authority of the Library of Congress for policing the Library of Congress buildings to embrace the rental space it utilizes at certain other locations in Washington, D.C. Public Law 91–281.

Senate office space.—Authorizes the Architect of the Capitol to acquire on behalf of the United States, the Plaza Hotel property in square 724 in the District of Columbia to be held to meet future office needs of the Senate. S. 3594. P/S 5/21/70.

Crime

Controlled Dangerous Substances Act.—Authorizes Federal regulation and control over defined "controlled dangerous substances" to help manage the drug abuse problem and criminal traffic in drugs on the international, national and State levels and repeals essentially all of the existing narcotic and dangerous drug laws. The bill vests authority for control of the enumerated substances with the Attorney General and requires that he seek advice from the Secretary of Health, Education, and Welfare and from the newly-established Scientific Advisory Committee concerning certain matters; establishes criteria for the control and classification of drugs into several schedules based largely on the degree of their abuse potential, known effect, harmfulness and level of accepted medical use; provides requirements for registration of persons involved in the manufacture, distribution, and dispensing of controlled drugs; controls and restricts importation and exportation of controlled dangerous substances; designates offenses and penalties for unlawful manufacture, distribution, dispensing, possession with intent to manufacture, distribute, or dispense, importation, exportation, and simple possession of controlled dangerous substances, and eliminates mandatory minimum penalties for all violations except for a newly-created and defined class of professional criminals involved mainly in the distribution, sale and importation of controlled dangerous substances; vests enforcement personnel of the Bureau of Narcotics and Dangerous Drugs with broader enforcement powers; provides, under certain conditions, for "no knock" search warrants for felonious violations; authorizes the appointment of a Committee on Marihuana to conduct a study on all aspects of marihuana use and also establishes a Committee on Nongovernmental Drug Abuse Prevention; authorizes the appropriation of sums necessary to carry out the Act; and specifies the date the act shall take effect. S. 3246. P/S 1/28/70.

Criminal Justice Act Amendments.—Amends the Criminal Justice Act of 1964 (relating to representation of defendants financially unable to obtain an adequate defense in criminal cases in United States courts), by expanding its coverage from the arrest stage to appeals, post-conviction proceedings, and ancillary proceedings related to the criminal trial; provides for the creation of Federal defender offices operating under the guidance of the district and appellate courts, but independent of both the Federal judicial and prosecution systems; increases the hourly rate to $30 an hour and the total compensation limits available to attorneys providing representation; and changes various other provisions to improve the operation of the Act. S. 1461. P/S 4/30/70.

Executive Protective Service.—Changed the name of the White House Police force to the Executive Protective Service; placed the force under the direction of the Director of the U.S. Secret Service; increased the scope of the Protective Service's duties to include protection of foreign diplomatic missions located in the metropolitan area of the District of Columbia and such other areas of the United States, its territories, and possessions, as the President, on a case-by-case basis, may direct; and provided that the size of the new Executive Protective Service may consist of up to 850 members. Public Law 91–217.

Organized Crime Control Act.—Embodies a comprehensive, integrated program designed to deal with the menace of organized crime in the United States. Establishes, in addition to regular grand juries, special grand juries to sit in major population areas or elsewhere by designation of the Attorney General; unifies and expands existing Federal law dealing with the granting of immunity from self-incrimination in legislative, administrative, and court proceedings; deals with recalcitrant witnesses; creates a new false declaration provision applicable in grand jury and court proceedings; authorizes the Attorney General to protect and maintain Federal or State organized crime witnesses and their families; authorizes, subject to constitutional safeguards, the taking of depositions in criminal cases; provides a statute of limitations on determining the derivative evidentiary consequences of law enforcement conduct; respecting syndicated gambling—contains special findings dealing with the effect of such gambling on interstate commerce, makes it unlawful to engage in a scheme to obstruct the enforcement of State law to facilitate an "illegal gambling business," as defined, or to engage in the operation of such a business, and provides penalties for violations, as well as providing electronic surveillance in aid of enforcement of the prohibited "business" activities; establishes, effective in 2 years, a Presidential Commission to conduct a comprehensive review of present Federal and State gambling law enforcement policies and their alternatives; makes unlawful certain "racketeering activity" and provides penalties for violations; and provides for increased sentencing (up to 30 years) for defined dangerous adult special offenders. S. 30. P/S 1/23/70.

Defense

Civil Defense Act.—Amended the Federal Civil Defense Act of 1950 to extend from June 30, 1970, to June 30, 1974, the President's standby authority to deal with the effects of an enemy attack upon this Nation. Public Law 91–299.

Coast Guard Authorization, 1971.—Authorized appropriations of $100 million for the Coast Guard for fiscal year 1971 ($62,295,000 for vessels, $12,865,000 for aircraft, and $24,840,000 for shore facilities and aids to navigation and pollution control equipment). Public Law 91–261.

Coast Guard Officers—Interservice transfers.—Placed the Coast Guard on the same parity as their counterparts in the military departments by providing that the Coast Guard officers be included within the stipulation that the President may, within authorized strengths, transfer any commissioned officer with his consent from his service branch to, and appoint him in, another service branch. Public Law 91–392.

Coast Guard Omnibus.—Revised titles 14, 10 and 37 of the United States Code to make more uniform the laws relating to the Coast Guard and the other Armed Forces. Public Law 91–278.

Coast Guard Reserve laws.—Modified the law affecting the Coast Guard Reserve, the modifications generally not only being designed to meet the particular problems of the Coast Guard, but also to conform more closely to practices obtaining in the other Armed Services. H.R. 13716. Public Law 91– .

Command of the U.S.S. "Constitution" by retired U.S. Navy officers.—Permitted a retired officer of the U.S. Navy to command the U.S.S. "Constitution," a historic naval vessel maintained "in commission, active status," and permanently berthed at the Boston Naval Shipyard. Public Law 91–394.

Defense Production Act extensions.—(See Economy and Finance)

Disposals from national and supplemental stockpiles.—Authorized disposal from the national and supplemental stockpiles of various materials, as follows:

Asbestos.—Chrysotile, 2,844 short tons. Public Law 91–329.

Bauxite.—Surinam-type metallurgical grade, 2,600,000 long dry tons. Public Law 91–326.

Bismuth.—300,000 pounds. Public Law 91–318.

Cadmium.—4,180,000 pounds. Public Law 91–314.

Castor oil.—18,500,000 pounds. Public Law 91–319.

Chromite.—Refractory grade, 826,000 short dry tons. Public Law 91–328.

Cobalt.—40,200,000 pounds. Public Law 91–317.

Corundum.—1,952 short tons. Public Law 91–330.

Fluorspar.—Acid grade, 212,637 short dry tons. Public Law 91–320.

Graphite.—Natural Ceylon amorphous lump, 386 short tons. Public Law 91–327.

Magnesium.—12,000 short tons. Public Law 91–321.

Manganese, type A.—Chemical grade, 111,900 short dry tons. Public Law 91–322.

Manganese, type B.—Chemical grade, 65,800 short dry tons. Public Law 91–323.

Manganese ore.—Natural battery grade, 173,800 short dry tons. Public Law 91–331.

Molybdenum.—3,500,000 pounds. Public Law 91–333.

Shellac.—4,300,000 pounds. Public Law 91–324.

Tungsten.—100 million pounds. Public Law 91–325.

Headstones or markers for medal of honor recipients.—Authorized the furnishing of headstones to mark the graves of Medal of Honor recipients regardless of the character of the discharge granted for their last term of service. Public Law 91–396.

Leave for uniformed services members in hostile fire areas.—Extended until June 30, 1972, the authority to grant a special 30-day leave for members of the uniformed services who voluntarily extend their tours of duty in hostile fire areas. Public Law 91–302.

Marine Corps Band.—Removed the restrictions on the grades of the director and assistant director of the Marine Corps band (now limited to lieutenant colonel and captain, respectively) to eliminate an inequity in their promotion opportunities. Public Law 91–197.

Military claims.—Provided that the authority for payment of military claims under title 10 of the United States Code be increased to $15,000, the amount authorized for foreign claims, and that a similar provision for partial payment be provided for such claims. Public Law 91–312.

Military procurement authorization, 1971.—Authorizes appropriations of $11,892,389,000 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles; $7,016,500,000 for research, development, test, and evaluation; and $334,000,000 for military

construction authority for the Safeguard antiballistic missile system; continues the authority for merging military assistance financing for South Vietnam and other free world forces and local forces in Laos and Thailand, with the funding of the Department of Defense; authorizes the personnel strengths for fiscal year 1971 for the Selected Reserve of each of the Reserve components of the Armed Forces; imposes certain limitations with regard to specific procurement actions; provides certain additional legislative authorities; and contains other provisions. H.R. 17123. P/H 5/6/70. P/S amended 9/1/70.

Naval flight officers' command.—Amended title 10, United States Code, to permit naval flight officers, in addition to naval aviators, to be eligible for command of naval aviation schools, naval air stations, or naval aviation units organized for flight tactical purposes; provided eligibility for similar Marine Corps commands by naval flight officers of the Marine Corps. Public Law 91–198.

Savings deposit program for certain uniformed services members.—Removed the $10,000 limit on deposits which may be made to the Uniformed Services Savings deposit program in the case of any member of the uniformed services who is a prisoner of war, missing in action, or in a detained status during the Vietnam conflict. Public Law 91–200.

Selection boards.—Provided that the number of active duty officers who serve on selection boards for the grades of rear admiral to captain may be increased from the current number of nine, and removed the requirement that members of selection boards for nonactive duty promotions have a permanent grade higher than those being considered for promotion, in order to make a greater number of officers eligible to serve on such boards. Public Law 91–199.

Transportation to home ports.—Entitled a member of the Navy, Coast Guard, or Environmental Science Services Administration, whose dependents are residing at his home port to round trip transportation to the home port where he is permanently attached to a ship overhauling away from the home port. Public Law 91–210.

United States flags—Presentation to parents of deceased servicemen.—Provided that United States flags may be presented to parents of deceased servicemen, in addition to flags presented to the surviving spouse or next of kin. Public Law 91–397.

War Claims Act amendments.—Authorized payment under the War Claims Act of 1948 to members of the Armed Forces captured and held prisoner by the forces of North Vietnam, and to persons captured by North Korea while assigned to duty on board the U.S.S. *Pueblo*, for the period of their captivity at the rate of $5 per day of captivity, and provided for payment to civilian American citizens held by the forces of North Vietnam at the rate of $60 per month. Public Law 91–289.

District of Columbia

Anatomical Gift Act.—Provided in the District of Columbia a comprehensive and uniform legal environment for organ donation and transplantation consistent with the recommendations of the National Conference of Commissioners on Uniform State Laws made in 1968. Public Law 91–268.

Bail Agency Act.—Removed the ceiling of $130,000 on the annual authorization of appropriations for the District of Columbia Bail Agency. Public Law 91–232.

Blood components transfer.—Authorized the Commissioner of the District of Columbia to determine that blood platelets and other blood components in general use in the States may be transferred from local licensed blood banks in which they are produced to licensed physicians, to District of Columbia hospitals, and to licensed private hospitals and other medical facilities within the District, thereby placing the District in the same position as the States, all of which permit the intrastate transfer of blood components within their borders. Public Law 91–256.

Cooperative Association Act amendments.—Exempted from the District of Columbia laws regulating the loaning of money and interest rates cooperative associations formed under the District of Columbia Cooperative Association Act and their financing transactions with members. Public Law 91–385.

Court reform and criminal procedure act.—Completely reorganized the present court system in the District of Columbia, including provision for a local court system for the adjudication of all local criminal and civil matters, and added a number of new judgeships, as well as providing for modern court administration; transformed the Legal Aid Agency into a Public Defender Service to provide legal counsel for up to 60 percent of all indigent criminal defendants and to aid the courts in establishing an effective court-appointed counsel system for the remaining 40 percent; expanded the Bail Agency and enables it to make recommendations to the courts on the full range of pretrial release conditions and to supervise persons released on non-financial conditions; replaced the existing three-judge juvenile court with an expandable Family Division; established a modern juvenile code; made various changes in criminal procedure and provided revisions in sentencing practice, including new sentencing alternatives for habitual criminals; contained an improved wiretapping and electronic surveillance law; provided for no-knock search warrants under certain conditions; permitted a pretrial detention alternative for certain dangerous defendants; authorized an additional $5 million Federal payment to the District of Columbia to defray the first-year costs of court reorganization and to aid in the payment for other crime control provisions of the legislation; and made other reforms. Public Law 91–358.

Delegate to House of Representatives—Commission on D.C. Organization.—Provided a 12-member District of Columbia Government study commission, said Commission to report to Congress within 12 months those changes necessary in any facet of the organization and practices of the District Government, in the interest of the congressionally approved goals of economy, efficiency, and improved municipal services; provided a nonvoting Delegate to the U.S. House of Representatives from the District of Columbia, said Delegate to be chosen biennially by the qualified voters of the District, following nomination either (1) by a political party in a party primary, or (2) by the submission of a nominating petition signed by 5,000 voters or 2 percent of the total District electorate (whichever is less); and made technical amendments to the election laws of the District of Columbia. H.R. 18725. Public Law 91– —.

Fees.—Vests authority in the District of Columbia Council, after public hearing, to set a variety of municipal fees, including fees for certain licenses and permits; license and user fees are presently fixed by statute, and many fees have not been adjusted over the years to reflect current costs for performing the governmental duties related to the activity for which the fee is charged. S. 3906. P/S 8/13/70.

Freeway airspace utilization.—Authorizes the Commissioner of the District of Columbia to lease airspace above and below freeway rights-of-way within the District of Columbia to allow fuller utilization of space by making available for private and public purposes such airspace as will not impair the full and safe use of freeways. S. 3647. P/S 7/30/70.

Health services improvement.—Improves health services and regulatory functions of the Public Health Department of the District of Columbia; authorizes commitment of mentally ill persons, previously sent only to public hospitals, to other equally suitable health facilities; eliminates duplication of inspection of milk producers and dairy farms between the District and other jurisdictions within the Washington "milk shed"; provides for detection of tuberculosis for school children in the District through mandatory tuberculin testing of all children entering school for the first time; allows the District government to enforce liens against recoverable moneys as to persons under care at Glenn Dale Hospital, Maryland; allows physicians licensed in another State to obtain a license in the District, although once failing the District examination. S. 3648. P/S 7/30/70.

Housing Revolving Fund and Unclaimed Property Act.—Establishes in the District of Columbia a revolving fund for the development of housing for low- and moderate-income persons and families in the District of Columbia and provides for the disposition of unclaimed property in the District of Columbia. S. 3011. P/S 5/13/70.

Industrial Safety Act Amendments.—Provides for a more general application of the rules and regulations of the safety code of the District of Columbia to protect employees and restores the jurisdiction of the Industrial Safety Board to enforce the code. S. 2820. P/S 5/5/70.

Metropolitan Area Transit Act.—Grants congressional consent to the public acquisition and operation of mas transit bus facilities in the Washington metropolitan area and authorizes payments by the District of Columbia government to assist in maintaining reasonable fares for District residents. S. 1814. P/S 4/15/70.

Mortgages and loans.—Temporarily permits, through March 31, 1971, mortgages insured by the Federal Housing Administration and the Veterans' Administration to be made in the District of Columbia even when the effective rate of interest therein exceeds the 8 percent ceiling provided in the District of Columbia interest and usury laws. S. 3313. P/S 4/1/70.

Pay increase for police, firemen, and teachers.—Increased by an average of 13 percent retroactive to July 1, 1969, the salaries of police and firemen and Executive Protective Service; increased by an average of 13 percent, retroactive to September 1, 1969, the salaries of teachers; revised the personal income tax of District of Columbia residents and authorized a special Federal payment of $8 million to the District of Columbia to help defray the costs of the pay increases; and made other changes in existing law. Public Law 91–297.

Protective eye devices.—Requires students, teachers and observers in the District of Columbia to wear protective devices while participating in or observing certain courses of study or types of training in public or private facilities wherever there is a condition hazardous to the eyes in connection with educational or training programs. H.R. 9528. P/H 11/24/69. P/S amended 5/7/70.

Protestant Episcopal Church Vestry Act.—Conforms applicable law to changes recently enacted by the General Assembly of Maryland with respect to the Protestant Episcopal Church to repeal those anachronistic sections of the so-called Vestry Act which deal with the internal organization and operation of the Church, but to leave intact those provisions which establish general corporate powers and which may affect title to property held by the church. S. 2336. P/S 8/13/70.

Rental of space for District of Columbia agencies and activities.—Enables the government of the District of Columbia to more efficiently lease privately owned space in buildings or in improved or unimproved property for the accommodation of District agencies and activities, thus allowing the District government to compete for space

in the open market on the same terms as the Federal Government. S. 3649. P/S 7/1/70.

Revenue.—Provides that the annual Federal payment authorization be established at 30 percent of the District of Columbia general fund tax revenues and authorizes a special one-time Federal payment supplement of $5 million for fiscal year 1970 to be used for law enforcement activities in the District. The new formula proposal would authorize a 1971 Federal payment estimated at $130.4 million or an increase of $25.4 million over the present annual $105 million authorization. S. 3903. P/S 8/13/70.

Taxation of regulated investment companies.—Conformed the provisions of the District of Columbia Income and Franchise Tax Act of 1947 to the provisions of the Federal Internal Revenue Code relating to the treatment to be given to dividends paid by regulated investment companies which qualify for the dividends-paid deductions under section 852(b)(2)(D) and section 852(b)(3)(A)(ii) of the Internal Revenue Code of 1954 to make clear that investment companies domiciled in the District of Columbia will be accorded treatment under the laws of the District similar to that they are accorded under Federal law. Public Law 91–391.

Teachers' retirement amendments of 1970.—Amended the District of Columbia Teachers' Retirement Act so as to provide the same retirement benefits for the teachers and other professional employees of the District of Columbia Board of Education as are presently afforded the classified employees of the Federal and District of Columbia governments who retire under the Civil Service Retirement Act as amended by Public Law 91–93. Public Law 91–263.

Voluntary admission of patients to Forest Haven Institution.—Authorizes voluntary admission of substantially retarded persons to the District Training School, whose name is changed to Forest Haven; requires that a prerequisite to such voluntary admissions be a financial arrangement with the District of Columbia on behalf of such persons when they or their relatives are financially able to pay for all or a part of the expenses involved; deletes certain archaic terminology in the present law and substitutes modern terminology in its place. H.R. 4182. P/H 4/28/69. P/S amended 9/11/70.

Water and sanitary sewer rates.—Makes it possible for the District of Columbia City Council, by appropriate increases in the rates to be charged for water and sewer services, to meet operating costs and debt retirement need involved in furnishing these municipal services; and eliminates the maximum rate restrictions imposed on water and sewer rates and leaves the setting of such rates to the discretion of the District of Columbia Council on the basis of recommendations by the Commissioner. S. 3905. P/S 8/13/70.

Economy and Finance

Consumer Products Warranty and Guaranty Act.—Require a supplier of a consumer product or service actually costing more than $5 who decides to warranty or guaranty his product against defect or malfunction to follow certain guidelines; requires a clear and conspicuous disclosure of the contents of warranties and guaranties and requires that a written warranty or guaranty must be designated a "full" or "partial" warranty; and provides remedies for failure to comply with certain provisions of the legislation. S. 3074. P/S 7/1/70.

Credit unions Federal share insurance.—Provides a Federal system of share insurance for savings in credit unions and the regulatory authority necessary to operate such a share insurance system; provides mandatory coverage for federally chartered credit unions for State-chartered credit unions and for credit unions operating under the Department of Defense jurisdiction if they elect to be covered and agree to comply with the requirements of the program; changes regular reserve requirements of Federal credit unions; authorizes Federal credit unions to invest in other insured credit unions; and authorizes certain Federal credit unions serving low-income persons to accept funds from non-members. S. 3822. P/S 9/2/70.

Credit unions—Independent agency status.—Elevated the Bureau of Federal Credit Unions (currently in the Department of Health, Education and Welfare) to the status of an independent agency in the executive branch to be known as the "National Credit Union Administration," and provided for an Administrator to be the chief executive officer of the Administration and to function in close and constant cooperation with a newly created National Credit Union Board to consist of a chairman and one member from each of the Federal credit union regions, the Administrator and Board members to be appointed by the President by and with the advice and consent of the Senate. Public Law 91–206.

Defense Production Act extension; standby wage, price, salary, and rent controls.—Extended the Defense Production Act until June 30, 1972; provided for the establishment of uniform cost accounting standards for certain defense contracts to be promulgated by a five member Cost-Accounting Standards Board appointed by the Comptroller General who would be designated as Chairman of the Board; limited loan guarantees under the Act to a maximum of $20 million per contractor, except with congressional approval; and gave the President standby authority until February 28, 1971 to stabilize prices, wages, salaries, and rents at levels not less than those prevailing on May 25, 1970, except that adjustments can be made to avoid inequities. Public Law 91–379.

Defense Production Act temporary extensions:

Extended the effectiveness of the Defense Production Act of 1950 to July 30, 1970. Public Law 91–300.

Extended the effectiveness of the Defense Production Act of 1950 until August 15, 1970. Public Law 91–371.

Eisenhower dollar.—Authorizes the minting of not to exceed 150 million silver dollars, 40% silver content, to be minted only as uncirculated coins and proof coins and sold at a premium price, and authorizes the simultaneous minting of cupro-nickel dollars, expected to circulate as a medium of exchange, all bearing the likeness of the late President of the United States, Dwight David Eisenhower. S. J. Res. 158 P/S 10/15/69. P/H amended 10/15/69. Senate concurred in House amendment with an amendment in the nature of a substitute 3/19/70.

Eligibility of American Samoa Banks for Federal deposit insurance.—Establishes the eligibility of the banks in American Samoa for Federal deposit insurance by amending sections 3 and 7 of the Federal Deposit Insurance Act in accordance with the provisions governing U.S. territories. S. 3366. P/S 7/1/70.

Federal National Mortgage Association.—Clarifies the payment of certain accounts owed by the Federal National Mortgage Association (FNMA) to the Secretary of the Treasury in connection with the reorganization of the FNMA. S. 3207. P/S 1/30/70.

Gold and silver content.—Amended the National Gold and Silver Stamping Act to protect consumers by providing a civil remedy for misrepresentation of the quality of articles composed in whole or in part of gold or silver. Public Law 91–366.

Public debt limit increase.—Provided an increase in the permanent debt limitation from $365 billion to $380 billion, and provided for a temporary additional increase of $12 billion, making an overall limitation of $395 billion for fiscal year 1971. Public Law 91–301.

Public Works and Economic Development Act extension.—Amended the Public Works and Economic Development Act of 1965 to extend the authorization of funds for titles I through IV through fiscal year 1971, and authorized to be annually appropriated $770 million through June 30, 1971 ($500 million for grants for public works and development facilities and $170 million for other financial assistance; $50 million for technical assistance research and information; and $50 million for economic development districts). Public Law 91–304.

Purchase of U.S. obligations by Federal Reserve banks.—Extended for 1 year, from June 30, 1970, to June 30, 1971, the authority of of the Federal Reserve banks to purchase U.S. obligations directly from the Treasury. Public Law 91–360.

Savings bonds—Interest increase.—Increased from 5 to 5½ percent the rate of interest payable on series E savings bonds. Public Law 91–388.

Securities Act exemption from registration for small businesses.—Amends the Securities Act of 1933 to assist small businesses in raising capital by giving the Securities and Exchange Commission power by rule or regulation to increase the size of an offering of securities that may be made without compliance with the full registration requirements of the Securities Act from the present amount of $300,000 to $500,000. S. 336. P/S 8/13/70.

Securities Exchange Act—Additional consumer protection.—Amends the Securities Exchange Act to provide additional protection for investors by augmenting the provisions of Public Law 90–439 to encompass acquisitions of and tender offers for equity securities of insurance companies; to extend the act's full disclosure provision to acquisitions and tender offers of over 5 percent of a company's stock; to extend the substantive provisions which protect stockholders involved in cash acquisitions and tender offers to stock for stock exchange offers; to give the Securities and Exchange Commission additional rulemaking power to deal with certain types of fraudulent, deceptive, and manipulative practices; and to give the Commission rulemaking power to differentiate between control persons and issuers in applying certain requirements of section 13(e) of the Securities Exchange Act. S. 3431. P/S 8/18/70.

Silver certificates.—Authorizes further adjustments in currencies outstanding which were issued after June 30, 1929; permits the writeoff of Federal Reserve bank notes and national bank notes; and removes the limitation of $200 million on the aggregate face value of silver certificates outstanding that the Secretary of the Treasury is authorized by law to write off after he has determined that they have been lost or destroyed, or are held in collections, and will never be presented for redemption. S. 3825. P/S 6/17/70.

Unsolicited credit cards.—Prohibits the issuance of unsolicited credit cards except in renewal of, or in substitution for, an accepted credit card; limits consumer liability for a lost or stolen card to not more than $50, unless there is a lesser liability under other applicable law or under an agreement with the card issuer; amends the definition of a card issuer to include not only the person who issues the card but also any agent of the issuer; sets penalties for unauthorized use of credit cards. S. 721. P/S 4/15/70. H.R. 16542. P/H 9/9/70.

Education

Demonstration elementary school for the deaf.—Authorizes the Board of Directors of Gallaudet College to maintain and operate, including necessary renovation, construction and equipment, the Kendall School as a demonstration elementary school for the deaf

to serve primarily the National Capital region and authorizes the School to provide day and residential facilities for elementary education for persons who are deaf in order to prepare them for high school and other secondary study, and to provide an exemplary educational program to stimulate the development of similar excellent programs throughout the Nation. S. 4083. P/S 8/11/70.

Elementary and secondary education amendments.—Authorized approximately $24.5 billion for fiscal years 1971 through 1973 for carrying out various educational programs; amended the Elementary and Secondary Education Act of 1965 (special educational needs of educationally deprived children; school library resources, textbooks, and other printed and published materials; supplementary educational centers and services; strengthening State departments of education; bilingual education programs; school dropout prevention; school nutrition and health services for children from low-income families); extended and amended impacted areas programs legislation; amended the Adult Education Act; enacted a "General Education Provisions Act" relating to the administration of education programs and the operation of the Office of Education; extended and revised provisions of present law relating to cancellation and repayment of loans under Federal student loan programs; created, as an independent act, the "Education of the Handicapped Act"; amended and extended vocational education programs; and made miscellaneous amendments to various education laws. Public Law 91–230.

Impacted areas aid.—Authorized the Secretary of Health, Education and Welfare to make to local educational agencies emergency payments for the current school year to provide 100 percent funding for fiscal year 1970 for the education of 3–A children (children whose parents live or work on Federal property) under Public Law 874, the aid to impacted areas program; and authorized for this purpose the expenditure of $2.5 million out of existing appropriations. Public Law 91–237.

Land-grant status for College of the Virgin Islands and the University of Guam.—Gives land-grant status to the College of the Virgin Islands and the University of Guam; authorizes endowment grants of $1,019,000 to the University of Guam and $714,000 to the College of the Virgin Islands; provides eligibility for annual grants to each college. S. 1148. P/S 4/15/70.

National Commission on Libraries and Information Science.—Established a 15-member National Commission on Libraries and Information Science as an independent agency in the executive branch to develop and recommend overall plans for carrying out the national policy with respect to libraries and information science, and authorized $500,000 for fiscal year 1970 and $750,000 for fiscal year 1971 and each succeeding year to carry out the provisions of the Act. Public Law 91–345.

Federal Employees

Air traffic controllers.—Changes the computation factor for determining civil service retirement benefits from 1.0 to 1.4 for each year of air traffic controller service and provides that the special provision apply only to air traffic controllers and "first-line" supervisors directly supervising such controllers; makes a controller or a supervisor eligible to retire after completing 30 years of service regardless of age if he has at least 10 years of service in such a capacity. S. 3959. P/S 7/13/70.

Civil service retirement.—Provides that when an employee retires he may elect to take a reduced annuity and provide a lifetime survivor benefit equal to 55 percent of his reduced annuity for his spouse in the event he dies before his spouse. S. 437. P/S 9/10/70.

Federal firefighters.—Extends to Federal employees whose duties "are primarily to perform work directly connected with the control and extinguishment of fires or the maintenance and use of firefighting apparatus and equipment" the same hazardous-duty retirement provisions of title 5, United States Code, now provided for certain Federal law-enforcement officers. S. 578. P/S 8/18/70.

Federal pay legislation.—Provided 6-percent across-the-board increases for the salaries of Federal employees who are paid under statutory salary systems (the postal field service, the general schedule of the classified civil service, the Department of Medicine and Surgery in the Veterans' Administration and the Foreign Service) and employees paid under other salary systems (legislative employees; judges of the District of Columbia, Court of General Sessions, Court of Appeals, and Tax Court; and staffs of former Presidents), except wage board employees in the legislative, executive and judicial branches of the Government; and provided a 6-percent increase to military personnel under the provisions of Public Law 90–207; made pay retroactive to the first day of the first pay period which began December 27, 1969. Public Law 91–231.

Foreign Service retirement adjustments.—Brought the retirement benefits and financing of the Foreign Service Retirement and Disability System into line with those contained in legislation relating to the Civil Service Retirement System which became effective on October 20, 1960 (Public Law 91–93). Public Law 91–201.

Government Printing office—Overtime compensation.—Authorized the Public Printer to grant employees paid on an annual basis compensatory time off from duty instead of overtime pay for overtime work. Public Law 91–369.

Government Printing Office—Special policemen.—Authorized the Public Printer or his delegate to designate employees of the Government Printing Office to serve as special policemen to protect persons and property in premises and adjacent areas occupied by or under the control of that office. Public Law 91–359.

Health benefits.—Increases the amount paid by the Federal Government toward the cost of the premium charged for health insurance authorized by the Federal Employees Health Benefits Act from $1.62 (for self only) or $3.94 (for family coverage) for each biweekly pay period (which in practice is about 24 percent of the average cost of high option family insurance) to a permanent level of 40 percent of the average premium charged for high option coverage offered by the six largest insurance programs operating under the act. H.R. 16968. P/H 7/9/70. P/S amended 9/9/70. H. agreed to Senate amendment with an amendment 9/10/70.

Job Evaluation Policy Act.—Improved position classification systems within the executive branch by establishing an orderly procedure for the study of ways to improve current classification with a view to the establishment of a comprehensive plan for the establishment of a coordinated system of job evaluation and ranking and by providing for the appointment by the Civil Service Commission of a special organizational unit within the Commission to prepare the plan and requiring the Commission to submit to the President and Congress within one year an interim report and to complete its activities within two years at which time it shall submit its recommendations to the President who shall submit recommendations to Congress. Public Law 91–216.

Protecting privacy and the rights of Federal employees.—Prohibits indiscriminate executive branch requirements that employees and applicants for Government employment disclose their race, religion or national origin; attend Government-sponsored meetings and lectures or participate in outside activities unrelated to their employment; report on their outside activities or undertaking unrelated to their work; submit to questioning about their religion, personal relationships or sexual attitudes through interviews, psychological tests, or polygraphs; support political candidates or attend political meetings; makes it illegal to coerce an employee to buy bonds or make charitable contributions; prohibits officials from requiring an employee to disclose his own personal assets, liabilities, or expenditures, or those of any member of his family unless, in the case of certain specified employees, such items would tend to show a conflict of interest; provides a right to have a counsel or other person present, if the employee wishes, at an interview which may lead to disciplinary proceedings; accords the right to a civil action in a Federal court for violation or threatened violation of the act; and establishes a Board on Employees' Rights to receive and conduct hearings on complaints of violation of the act and to determine and administer remedies and penalties. S. 782. P/S 5/19/70.

Wage board employees.—Provides an equitable system for fixing pay scales for prevailing rate employees of the Government by establishing one system of rules under one agency's jurisdiction to insure that Federal employees in the same area working for different agencies will be paid the same rate for doing the same kind of work, that the same criteria are used by one agency as by another in surveying prevailing rates to establish Federal wages, and that employees have adequate and fair representation within the groups vested with carrying out the established policies. H.R. 17809. P/H 9/9/70. P/S amended 9/10/70.

General Government

Alaska Native Claims Settlement Act of 1970.—Provides for final legislative settlement of the claims of the Alaska Native people to the lands which now comprise the State of Alaska and extinguishes all Native claims to said lands; provides as compensation for the extinguishment of these claims substantial land grants to both individuals and to Native village corporations; appropriates Federal funds of $500 million to be paid over a 12-year period; grants the Alaska Native people a right to share in revenues derived from the mineral resources of Alaska until $500 million has been received; provides for the organization of corporate enterprises to administer funds granted by the bill; protects subsistence resources used by Alaska Native people; and authorizes the Secretary of the Interior to dispose of oil and other leasable minerals on the public lands in Alaska by competitive bid where there is competitive interest in the lands to be leased. S. 1830. P/S 7/15/70.

American Revolution Bicentennial Commission.—Authorizes appropriations of $373,000 for fiscal year 1971, for the Commission's activities. S. 3630. P/S 6/26/70. H.R. 16408. H. Cal.

Bankruptcy Laws Commission.—Established a Commission on the Bankruptcy Laws of the United States to study, analyze, evaluate and recommend changes in the Bankruptcy Act and to submit a comprehensive report of its activities and recommendations to the President, Chief Justice, and Congress within 2 years of enactment. Public Law 91–354.

Canal Zone government.—Cash relief payments: Amended the Canal Zone Code to adjust cash relief payments (to be paid from Canal tolls at no cost to the Federal government) to noncitizen former employees of the Canal Zone Government whose services terminated prior to 1958 by providing for adjustment of future payments on the basis of cost-of-living under provisions of the United States Code pertaining to civil service retirement annuities; and extended the eligibility

for cash relief payments to surviving widows of such former employees. Public Law 91–355.

Coalinga Canal, Calif.—Changed the name of the Pleasant Valley Canal, a feature of the San Luis unit of the Central Valley project in California, to the Coalinga Canal. Public Law 91–336.

Commission on Population Growth and the American Future.—Established a commission to be called the Commission on Population Growth and the American Future to conduct and sponsor studies and research and to make such recommendations as may be necessary to provide information and education to all levels of government in the United States, and to the public, regarding a broad range of problems associated with population growth and their implication for America's future. Public Law 91–213.

Disaster assistance.—Provides a permanent, comprehensive program for Federal disaster assistance and strengthens the organization and administrative machinery needed to implement the program in an orderly and effective manner; enables the extension of needed emergency relief and recovery assistance to individuals, organizations, businesses, and States and local communities suffering from a major disaster; authorizes Federal assistance for private as well as public losses suffered in a major disaster which the President determines to be of "sufficient severity and magnitude to warrant disaster assistance by the Federal Government to supplement the efforts and available resources of States, local governments and relief organizations in alleviating the damage, loss, hardship or suffering caused thereby and respecting which the Governor of any State in which such catastrophe occurs or threatens to occur certifies the need for disaster assistance under this Act and gives assurance of expenditure of a reasonable amount of the funds of such State, its local governments, or other agencies for the same or similar purposes with respect to such catastrophe"; consolidates into one Act and repeals the three major existing Federal disaster assistance laws; makes changes in the Small Business disaster loan program, Farmers Home Administration emergency loans, and Veterans' Administration loans. S. 1619. P/S 9/9/70.

Disposition of executive records.—Abolished the Joint Committee on the Disposition of Executive Papers and transferred its functions to the General Services Administration, operating in collaboration with the National Archives, and provided for the disposal of Government records insufficiently valuable to merit retention. Public Law 91–287.

Family planning services and population research activities.—Makes comprehensive, voluntary family planning services and related information available to all persons in the United States desiring such services; provides greatly increased support for biomedical, behavioral, and operational research relevant to family planning and population; provides for development and dissemination of information on population growth; provides for coordination and centralization of the administration of family planning and population research programs conducted by the Department of Health, Education, and Welfare (HEW); authorizes $89.750 million in fiscal year 1971, rising in increments of $53.250 million per year to $307.750 million in fiscal year 1975 for a new 5-year program of grants and contracts administered by HEW; establishes an Office of Population Affairs in HEW, headed by the Deputy Assistant Secretary for Population Affairs, to exercise direct authority and control over family planning grant and population research programs operated by HEW, to coordinate and evaluate other HEW family planning and population-related programs, and to provide liaison with other Federal agencies carrying out programs in this field; requires HEW to submit to Congress a 5-year plan for extension of services to all persons having need of them, for research programs, and for training programs and provides for annual reports to Congress on progress under the plan. S. 2108. P/S 7/14/70.

Fire protection contracts on public lands.—Confers on the Secretary of Interior authority parallel to that of the Secretary of Agriculture with respect to the suppression of fires on large areas of the public lands and allows him to enter into contracts for tanker aircraft, and for other kinds of aircraft, supplies, and services, for an entire fire season, and to renew such contracts not more than twice. S. 3777. P/S 7/1/70.

Fire research and safety act authorization.—Authorizes to be appropriated to the Department of Commerce such sums as may be necessary for fiscal years 1971 and 1972 (not to exceed a total of $5 million) and such sums as may be necessary for succeeding fiscal years to carry out the purposes of the Fire Research and Safety Act of 1968. S. 3766. P/S 7/31/70. H.R. 16538. H. Cal.

Franklin Delano Roosevelt Memorial Commission.—Authorized $75,000 for the continued operation of the Franklin Delano Roosevelt Memorial Commission. Public Law 91–398.

Full Opportunity Act.—Establishes full social opportunity for all Americans as a national goal, and declares this goal to be a continuing responsibility of the Federal Government, consistent with the primary responsibilities of State and local governments; describes the goal as embracing such areas as educational and vocational opportunities, access to housing and health care, and the provision of special assistance to the handicapped and other less fortunate members of society; establishes institutions and procedures for advancing this broad social goal, specifically: (1) a Council of Social Advisers in the Executive Office of the President; and (2) an annual Social Report by the President to the Congress; and establishes within Congress an Office of Goals and Priorities Analysis to submit an annual report to Congress setting forth goals and priorities in the general context of needs, costs, available resources, and program effectiveness. S. 5. P/S 9/10/70.

Government systems and equipment purchasing.—Authorizes the Administrator of General Services to determine the system and equipment required for standard passenger motor vehicles (sedans and station wagons) to be completely equipped for operation, and to purchase such additional systems and equipment as he finds to be other than customary for standard passenger motor vehicles, without regard to the maximum price limitations established by law. S. 2763. P/S 5/28/70. H. Cal.

"Johnny Horizon" symbol.—Protects the symbol of Johnny Horizon (created by the Bureau of Land Management as part of an intensive public service antilitter program, with the theme: "This Land Is Your Land—Keep it Clean") from unauthorized use and permits the Department of the Interior to license its use for commercial purposes with the provision to collect royalties. S. 3838. P/S 7/7/70. H. Cal.

Land Conveyance, Eglin Air Force Base, Fla.—Authorized the Secretary of the Air Force to donate, grant, and convey to the Board of Public Instruction of the county of Okaloosa, Florida, all right, title, and interest of the United States in and to approximately 135 acres of land; such land shall be used for the construction of school facilities in the vicinity of Eglin Air Force Base to alleviate the severe overcrowding of schools in that area. Public Law 91–347.

Mountain Standard Time Zone.—Authorized the Secretary of Transportation to place El Paso and Hudspeth Counties, Texas, in the mountain standard time zone. Public Law 91–228.

National Foundation on the Arts and the Humanities Act amendments.—Authorized $40 million, $60 million, and $80 million for fiscal years 1971, 1972, and 1973, respectively, for the National Foundation on the Arts and the Humanities, provided that from the sums appropriated for any fiscal year, not less than $65,000 shall be allotted to each State and that any funds remaining after such an allotment shall be distributed among the States in equal amounts; and made other amendments to the Act. Public Law 91–346.

National Science Foundation authorization.—Authorized appropriations to the National Science Foundation for the fiscal year 1971 in the amount of $537,730,000 out of money in the Treasury not otherwise appropriated and $2 million in foreign currencies which the Treasury Department determines to be in excess to the normal requirements of the United States. Public Law 91–356.

Oil and gas leases.—Conferred discretionary authority on the Secretary of Interior to prevent, administratively, termination of certain oil and gas leases on Federal lands and to reinstate terminated leases under certain limitations and conditions. Public Law 91–245.

Plymouth-Provincetown Celebration Commission.—Creates a commission to develop suitable plans for and conduct of the celebration in 1970 of the 350th anniversary of the landing of the Pilgrims at Provincetown and Plymouth, and authorizes $100,000 for the Commission's work. S. 2916. P/S 6/26/70.

Postal Reorganization Act.—Established the United States Postal Service as an independent establishment within the executive branch; provided that all powers of the Postal Service shall be directed and exercised by an eleven-member Board of Governors, nine of whom shall be appointed by the President (no more than five of whom may be members of the same political party), the Postmaster General to be appointed a governor by the nine, and the Depuy Postmaster General to be a governor chosen by those ten; established a thirteen member Advisory Council to advise the Postal Service on all aspects of postal operations; authorized collective bargaining over wages, hours, grievance procedures, seniority rights, promotions and other matters subject to collective bargaining in the private sector, with final and binding arbitration to resolve impasses in lieu of the right to strike; provided that right-to-work laws shall be applicable to postal employees; made postal employees members of the Postal Career Service, which shall be a part of the Civil Service; prohibited political influence in the selection or promotion of postal personnel; empowered the Postal Service to raise up to $10 billion through the issue of bonds; required that postal rates to afford the annual revenues necessary to operate the Postal Service be recommended to the Board of Governors by an independent five-member Postal Rate Commission, subject to veto by a unanimous decision of the Board or by the Courts; prescribed an annual appropriation of approximately 10 percent of the postal budget to be phased out over a 12-year period; and provided an 8 percent salary increase to postal employees to be effective retroactively to the first day of the first pay period that begins on or after April 16, 1970. Public Law 91–375.

Postal service.—Makes technical changes in the reference to certain provisions of law relating to the postal service which are codified in the United States Code; made no substantive changes in law. S. 3396. P/S 3/4/70.

Sea Grant College and Program Act amendments.—Provided for further funding of the National Sea Grant College and Program Act through fiscal year 1973, authorizing $20 million, $25 million, and $30 million for fiscal years 1971, 1972, and 1973, respectively.

SMITHSONIAN INSTITUTION

Additional members of Board of Regents.—Authorizes the appointment of three additional citizen regents to the Board of Regents

of the Smithsonian Institution, increasing the membership of the Board from 14 to 17 members. H.R. 14213. P/H 12/16/69. P/S amended 8/18/70.

Facilities construction.—Authorized the Board of Regents of the Smithsonian Institution to plan and construct museum support and depository facilities; limited the authorized appropriations to $500,000; specified that the proposed museum facilities be constructed on land presently within the metropolitan area of the District of Columbia; and limited the use of the appropriated funds to preliminary planning and design of the facilities. S 209. P/S 7/17/70.

Museum programs authorization.—Authorizes $1 million for each of fiscal years 1972, 1973, and 1974 for purposes of the National Museum Act of 1966, and an additional $300,000 for each of those fiscal years for museum assistance programs to be allocated equally among specified museum assistance programs of the Smithsonian Institution, the National Foundation on the Arts, and the National Foundation on the Humanities. S. 704. P/S 8/7/70.

Trust Territory of the Pacific Islands.—Increases the authorization from $50 million to $60 million for the fiscal year 1971 and authorizes $60 million for fiscal year 1972 for the Trust Territory of the Pacific Islands for civil works and administrative programs. S. 3479. P/S 5/18/70. H.R. 15978. H. Cal.

Use of Personal Checks To Pay Postal Services.—Permits the acceptance of checks and nonpostal money orders in payment for postal charges and services; relieves postal employees of personal financial liability for accepting personal checks from postal patrons in the course of business; provides penalties for presenting bad checks and bad postal money orders in payment for postal charges and services. S. 3397. P/S 3/4/70.

Health

Air Pollution Compacts

Mid-Atlantic States.—Gives Congressional consent and approval to a compact between the States of Connecticut, New Jersey, and New York to enter into an interstate compact on air pollution and grants consent to the Commonwealth of Pennsylvania and the State of Delaware to join in such compact. S.J. Res. 53. P/S 6/2/70.

Ohio-West Virginia.—Gives Congressional consent to the interstate compact on air pollution between the States of Ohio and West Virginia and grants to the Commonwealth of Pennsylvania and the State of Kentucky to join in the compact. S. 2707. P/S 2/2/70.

Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970.—Establishes a National Institute for the Prevention and Control of Alcohol Abuse and Alcoholism within the Public Health Service, through which the Secretary of Health, Education, and Welfare shall coordinate all Federal health, rehabilitation, and other social programs related to the prevention and treatment of alcohol abuse and alcoholism and administer the programs established by the bill; provides for extensive Federal assistance to State and local programs in order to promote effective treatment and rehabilitation programs for alcoholics throughout the country; authorizes for formula grants to States $20 million, $25 million, and $30 million for fiscal years 1971, 1972, and 1973, respectively, for project grants to State and local agencies $60 million, $100 million, and $160 million for fiscal years 1971, 1972, and 1973, respectively; requires the utilization of all existing Federal legislation providing for Federal or federally assisted research, prevention, treatment, or rehabilitation programs in such fields as health, education, welfare, and highway safety in order to effectively reduce the incidence of alcohol abuse and alcoholism throughout the Nation. S. 3835. P/S 8/10/70.

Cancer conquest.—Expresses the sense of Congress that the conquest of cancer is a national crusade to be accomplished by 1976 as an appropriate commemoration of the two hundredth anniversary of the independence of our country and that sufficient funds be appropriated to carried out said crusade so that the citizens of this land and other lands may be delivered from the greatest medical scourge in history. H. Con. Res. 675. P/H 7/15/70. P/S amended 8/28/70.

Community mental health centers amendments.—Improved and extended for 3 years the Community Mental Health Centers Act; authorized for construction grants $80 million, $90 million, and $100 million for fiscal years 1971, 1972, and 1973, respectively; authorizes for grants for initial operation of community mental health centers $45 million, $50 million, and $60 million for fiscal years 1971, 1972, and 1973, respectively; extended the program for facilities and services for alcoholics and narcotic addicts for 3 years and authorized therefor $30 million, $35 million, and $40 million for fiscal years 1971, 1972, and 1973, respectively; and reduced the authorization for fiscal 1970 from $25 million to $15 million; added a program of special facilities, personnel and services for children and authorized therefor $12 million, $20 million and $30 million, for fiscal years 1971, 1972, and 1973, respectively. Public Law 91-211.

Developmental Disabilities Services and Facilities Construction Act.—Extends and amends the Mental Retardation Facilities Construction Act of 1963; authorizes $100 million, $125 million, and $150 million for fiscal years 1971, 1972, and 1973, respectively, for grants to assist States in developing and implementing a comprehensive and continuing plan for providing services to persons affected by mental retardation and other developmental disabilities; expands the program for the construction and development of university-affiliated facilities and authorizes therefor $7 million, $11 million and $15 million for fiscal years 1971, 1972, and 1973, respectively, for demonstration and training grants, and $20 million for each of fiscal years 1971 through 1975 for construction grants; and places special emphasis on the need for facilities and services for the retarded in areas of urban and rural poverty. S. 2846. P/S 4/13/70. P/H amended 7/30/70. In conference.

Family Practice of Medicine Act of 1970.—Authorizes a 5-year program of grants through fiscal year 1975 to medical schools to operate separate departments devoted to teaching and instruction in all phases of family practice, to construct facilities appropriate to carry out family practice training programs whether as a part of a medical school or as a separate outpatient or similar facility, to operate or participate in special training programs for paramedical personnel in the field of family medicine, to operate or participate in special training programs for medical personnel to head departments of family practice or otherwise teach family practice in medical schools; authorizes grants to public or private nonprofit hospitals for the operation of special professional training programs in family medicine for medical students, interns, or residents, to construct facilities appropriate to carry out these programs whether as part of a hospital or as a separate outpatient or similar facility, to provide scholarships, fellowships, or stipends to interns, residents, or other medical personnel who are in need of such assistance to participate in accredited training programs in the field of family medicine and who plan to specialize or work in the practice of family medicine, to operate or participate in special programs for training paramedical personnel in the field of family medicine; authorizes for grants to medical schools and hospitals appropriations of $50 million for fiscal year 1971, $75 million for fiscal year 1972, and $100 million each for fiscal years 1973, 1974, and 1975; enables the Secretary of HEW to assist medical schools, graduate schools, universities, hospitals, and other public or private institutions in more effectively dealing with the problems of malnutrition and for such programs authorizes $32 million for each of 5 fiscal years beginning with fiscal year 1971. S. 3418. P/S 9/14/70.

Health Training Improvement Act of 1970.—Extends for 5 years and improves the Allied Health Professions Personnel Training Act of 1966 and authorizes for training of allied health professions personnel $79.25 million for fiscal year 1971, $97 million for fiscal year 1972, $118.25 million for fiscal year 1973, $138.5 million for fiscal year 1974, and $158.75 million for fiscal year 1975. Such funds are allocated to the categories of construction grants, basic improvement grants (formula), special project grants, advanced traineeships, development of new methods, utilization of educational talent, scholarship grants, work-study programs, and student loans; additionally creates a new emergency 1-year $100 million program of special project grants for certain medical and dental schools in financial distress. S. 3586. P/S 7/13/70. P/H amended 7/30/70. In conference.

Heart disease, cancer, stroke, and kidney disease amendments.—Extends regional medical programs for 5 years through June 30, 1975 and authorizes therefor $1.1 billion for grants; adds "kidney disease" and "other major diseases and conditions" to the original three programs covered—heart disease, cancer, and stroke—and provides that a maximum of $15 million of the amount appropriated in fiscal year 1971 be available for kidney disease activities; authorizes $1.987 million for comprehensive planning and services; authorizes $503 million for health services research and development; creates a National Council on Health Policy and authorizes through fiscal year 1975 $4 million therefor; facilitates the group practice of medicine; and makes other changes in, and additions to, existing law. H.R. 17570. P/H 8/12/70. P/S amended 9/9/70.

Medical facilities construction and modernization amendments.—Authorized $1.29 billion in grants to the States for construction or modernization of hospitals and other health facilities for fiscal years 1971, 1972, and 1973; established a new 3-year program of guaranteed loans to cover up to 90% of the cost to private nonprofit agencies for medical facility construction or modernization and a program of direct loans for construction or modernization of public facilities and for such loans authorized $1.5 billion for fiscal years 1971, 1972, and 1973, but not more than $500 million per year; provided a new 3-year $20 million per year program of project grants to assist in the modernization or construction of emergency rooms in general hospitals and transportation systems; provides for reports on the health consequences of the use of marihuana; and made other legislative changes. Public Law 91-296.

Medical Library Assistance Extension Act.—Extended for 3 years the current program to provide financial assistance for the construction of health library facilities; to support training of health librarians and other information specialists; to expand and improve health library services through the provision of grants for library resources; to support projects of research and development in the field of health communications, and related special scientific projects; to support the development of a national system of regional medical libraries; and to support selected biomedical scientific publications projects; and authorized for funding these

programs $63 million for fiscal years 1971 through 1973. Public Law 91–212.

Migrant health services.—Extended until June 30, 1973, the authority of the Public Health Service Act to improve health services and the health conditions of domestic agricultural migratory workers and their families, and provided for this purpose increased funding authorizations of $20 million for fiscal year 1971, $25 million for fiscal year 1972, and $30 million for fiscal year 1973. Public Law 91–209.

Poison Prevention Packaging Act.—Amends the Federal Hazardous Substances Act to provide for child-resistant packaging to protect children from serious personal injury or serious illness resulting from handling, using, or ingesting any hazardous household substance; authorizes the Secretary of Health, Education and Welfare to determine those substances to be specially packaged and to establish packaging performance standards; sets penalties for failure to conform to those standards; and creates a technical advisory committee to advise the Secretary. S. 2162. P/S 5/11/70.

Public Health Cigarette Smoking Act.—Prohibited all broadcast advertising of cigarettes after January 1, 1971; strengthened the warning on cigarette packages by changing it from "Caution: Cigarette Smoking May Be Hazardous to Your Health" to "Warning: The Surgeon General Has Determined That Cigarette Smoking is Dangerous to Your Health"; prohibited States from regulating cigarette advertising; and suspended until July 1971 a Federal Trade Commission rule which would require warnings in print cigarette advertising. Public Law 91–222.

Public health training.—Amended the Public Health Services Act to extend for three additional fiscal years the authority to make formula grants to schools of public health and authorized therefor $9 million, $12 million and $15 million for fiscal years 1971, 1972 and 1973, respectively; to extend through fiscal year 1973 project grants for graduate or specialized training in public health and authorized therefor $14 million, $15 million and $16 million for fiscal years 1971, 1972, and 1973, respectively; to extend for two fiscal years project grants for traineeships for professional health personnel and authorized therefor $16 million and $18 million for fiscal years 1972 and 1973, respectively. Public Law 91–208.

Water Pollution Compact

Potomac Valley Conservancy District Compact amendments.—Grants the consent of Congress to the States of Maryland and West Virginia and the Commonwealths of Virginia and Pennsylvania and the District of Columbia, as signatory bodies, for certain amendments to the compact creating the Potomac Valley Conservancy District and establishing the Interstate Commission on the Potomac River Basin. S.J. Res. 67. P/S 8/14/70. H.J. Res. 1179. H. Cal.

Housing

College housing debt service grants.—Provides an additional $2.6 million authorization for college housing interest subsidy grants, thereby making the total available for fiscal year 1971 $6.8 million. S.J. Res. 196. P/S 5/15/70.

Emergency Home Finance Act.—Increased the availability of mortgage credit for the financing of urgently needed housing; authorized $250 million to subsidize the interest on loans made by Federal home loan banks to savings and loan associations and other member borrowers of the Federal Home Loan Bank Board (FHLBB) system, and required the FHLBB to establish a maximum "spread" between the rate charged by the home loan bank and that charged by the savings and loan association, thus passing maximum benefits to the home buyer; expanded the scope of the Federal National Mortgage Association (FNMA) to include conventional as well as Federally insured and guaranteed mortgages in its secondary market operations; established an identical secondary market institution through the FHLBB for conventional and Federally insured and guaranteed mortgages; contained new Government National Mortgage Association (GNMA) special assistance authority amounting to $750 million and transferred another $750 million from the congressional authority to Presidential authority, and removed the existing par purchase restriction on the use of the $2 billion balance of funds now under congressional authority of the GNMA, thus making available for immediate use a total of $2.750 billion for Federally assisted low and moderate income housing; established a new interest subsidy program for middle-income housing through FNMA; renewed the authority of the Secretary of Housing and Urban Development to set the maximum allowable interest rates for FHA and VA mortgages; made technical changes designed to assist savings and loan associations to increase their deposits and thus make more mortgage funds available to the housing market. Public Law 91–351.

Loans to lessees of nonfarm rural land.—Authorizes the Farmers Home Administration to make rural housing loans under title V of the Housing Act of 1949 to lessees of nonfarm rural land. S. 3330. P/S 8/28/70.

Paraplegic housing program.—Authorizes the Veterans' Administration to make direct loans to eligible disabled veterans for assistance in acquiring specially adapted housing as defined in chapter 21 of title 38, United States Code. S. 3775. P/S 8/28/70.

Indians

Chemehuevi Tribe.—Authorizes the disposition of funds appropriated to pay a judgment in the amount of $996,834.81 awarded to the Chemehuevi Tribe of Indians in Indian Claims Commission dockets which funds were appropriated April 30, 1965. S. 4033. P/S 9/1/70.

Cherokee, Chickasaw, Choctaw, and Seminole Nations of Oklahoma.—Provided that when a member, or the descendant of a member, of the Cherokee, Chickasaw, Choctaw, and Seminole Nations of Oklahoma dies without a will and has no heirs, his interests in any trust or restricted land, or in the rents therefrom, will escheat to the tribe. Public Law 91–240.

Choctaw Tribe, Oklahoma.—Repealed the act of August 25, 1969, with respect to the final disposition of the affairs of the Choctaw Tribe, Oklahoma. Public Law 91–386.

Coeur D'Alene Indian Reservation.—Authorizes the Secretary of the Interior to approve the sale, exchange, or encumbrance of tribal lands and to sell or exchange individually owned trust lands or interests therein held in multiple ownership to other Indians if the sale or exchange is authorized by the owners of at least a majority of the interests in such lands. S. 3487. P/S 9/1/70.

Confederated Tribes of the Umatilla Indian Reservation.—Authorized the Confederated Tribes of Umatilla Indian Reservation to use a $2,450,000 judgment recovered against the United States in the Indian Claims Commission, and accumulated interest. Public Law 91–259.

Confederated Tribes of Weas, Piankashaws, Peorias and Kaskaskias.—Provided for a per capita distribution of 3 judgments by the Indian Claims Commission totaling $2,049,273 that have been recovered on behalf of the Confederated Tribes of Weas, Piankashaws, Peorias and Kaskaskias and provided that any per capita share the Secretary of Interior is unable to deliver within two years shall revert to the Peoria Tribe. Public Law 91–364.

Educational facilities for Indian children.—Authorizes the appropriation of $27,400,000 annually for each of fiscal years 1971, 1972 and 1973 to aid public school districts near Indian reservations in the construction of classrooms, housing and other necessary educational facilities for Indian children attending these schools. S.J. Res. 144. P/S 5/19/70.

Five Civilized Tribes and Osage Tribe of Oklahoma.—Amends certain Federal laws relating to the administration of the affairs of members of the Five Civilized Tribes and of the Osage Tribe in Oklahoma to remove a hiatus brought about by the adoption in Oklahoma of a constitutional amendment establishing a new judicial department for that State. S. 2362. P/S 4/30/70.

Five Civilized Tribes of Oklahoma.—Authorizes the Secretary of the Interior to convey to certain individual members of the Five Civilized Tribes interests in former restricted lands that were acquired by the United States pursuant to the Oklahoma Indian Welfare Act of 1936. S. 1498. P/S 4/27/70.

Five Civilized Tribes of Oklahoma.—Authorizes each of the Five Civilized Tribes of Oklahoma (Cherokee, Choctaw, Creek, Seminole and Chickasaw) to popularly elect their principal officers and makes clear that for purposes of developing election procedures the current leadership shall bear responsibility. S. 3116. P/S 4/27/70.

Fort Belknap Indian irrigation project, Montana.—Authorized the Secretary of the Interior to transfer title for the facilities of the Brown unit of the Fort Belknap Indian irrigation project to the owners of the lands served by the unit; provided that the landowners assume responsibility for operation and maintenance; cancelled all outstanding operation and maintenance charges and deferred construction charges on the project. Public Law 91–251.

Fort Belknap Indian Reservation, Montana.—Amends the Act of March 3, 1921, which provided for allotment of lands on the Fort Belknap Reservation, to provide for the reservation of all minerals for the benefit of tribal members in common. S. 786. P/S 5/15/70.

Fort Berthold Reservation, North Dakota.—Authorizes the mortgaging of tribal land on the Fort Berthold Reservation acquired after the date of enactment of this legislation and provides that resulting funds are to be used to buy lands within the reservation to improve the tribal land base. S. 774. P/S 5/11/70.

Hopi Indian Tribe, Arizona.—Gave the governing body of the Hopi Tribe the authorities it needs to develop the Hopi Industrial Park. Public Law 91–264.

Hualapai Tribe, Arizona.—Authorized the use of a judgment recovered against the United States by the Hualapai Tribe of Indians in Indian Claims Commission Docket No. 90. The net amount available is $2,974,612. H.R. 13434. Public Law 91–

Inter-Tribal Council, Inc., Miami, Oklahoma.—Authorizes and directs the Secretary of the Interior to convey without consideration 114 acres of surplus Federal land in Oklahoma to an organization known as the Inter-Tribal Council Incorporated, Miami, Oklahoma, which will encourage labor-oriented industries to locate on this acreage, thus raising the socioeconomic level of the tribal members residing in the area through the creation of jobs and better housing. S. 886. P/S 5/15/70.

Lac du Flambeau Band of Lake Superior Chippewa Indians, Wisconsin.—Conveys the beneficial interest in 40 acres of federally owned land to the Lac du Flambeau Tribe of Wisconsin, subject to valid existing rights-of-way and the right of the State of Wisconsin to use the fire observation tower located on the land for so long as needed and provides that the Indian Claims Commission will determine the extent to which the value of the beneficial interest conveyed should or should not be set off against any claims against the United States Government determined by the Commission. S. 1751. P/S 4/30/70.

Loans to Indian tribes.—Provided authority for the Farmers Home Administration (FHA) to make loans to Indian tribes for the purchase of land within their reservations; permitted any tribe to mortgage its land as security for such a FHA loan; permitted the tribe to waive immunity from suit without its consent as a part of its loan agreement; excepted trust lands from the FHA Act provision that land mortgaged to secure a loan shall be subject to local taxation; permitted the title to land acquired with loan funds to be taken in trust; provided that in addition to making direct loans from its direct loan account the FHA may insure loans to tribes made by commercial lending institutions; specified that the eight Indian Reorganization Act corporations in Alaska are eligible for loans to buy land although they do not have reservations. Public Law 91–229.

Potawatomi Indians.—Authorized the use of a judgment against the United States recovered by the Citizen Band of Potawatomi Indians of Oklahoma in an Indian Claims Commission Docket, the net amount available being $723,111. H.R. 14097. Public Law 91– .

Quapaw Indians, Oklahoma.—Extended for an additional period of 25 years from March 3, 1971, the restrictions, tax exemptions, and limitations affecting lands of the Quapaw Indians in Oklahoma that were extended to that date by the act of July 27, 1939. Public Law 91–290.

Reno-Sparks Indian Colony, Nevada.—Grants to the Reno-Sparks Indian Colony in Nevada the beneficial interest in and to 28.38 acres of land the colony has been using and occupying since the land was acquired by the Federal Government by purchase from private individuals for use as homesites for nonreservation Indians, and authorizes the governing body of the colony, with the approval of the Secretary of the Interior, to make long-term leases of land to members for homesites, dedicate lands for public purposes, contract for public facilities and other services, enact zoning, building, and sanitary regulations, and take action to establish proper boundaries of the colony lands. S. 3196. P/S 9/1/70.

Sac and Fox Tribes of Oklahoma.—Authorized the use of a judgment against the United States recovered by the Sac and Fox Tribes of Oklahoma in an Indian claims Commission Docket, the net amount available, including accrued interest, amounting to $703,345. H.R. 14827. Public Law 91– .

Sioux Tribe of the Fort Peck Indian Reservation, Montana.—Provided for a per capita distribution among the members of the tribe of a judgment of $1,161,354.41 against the United States recovered by the tribe. Public Law 91–283.

Snohomish, Upper-Skagit, and Snoqualmie-Skykomish Tribes.—Disposes of three separate awards of the Indian Claims Commission to the Snohomish, Upper Skagit, and Snoqualmie-Skykomish Tribes, in the total amount of $779,335.50. S. 4078. P/S 9/1/70.

Tlingit and Haida Indians of Alaska.—Authorized the disposition of funds (previously appropriated, invested and amounting to $7 million) awarded to the Tlingit and Haida Indians of Alaska by a judgment against the United States for land taken, principally the Tongass National Forest. Public Law 91–335.

Tulalip Reservation, Washington.—Gave the Tulalip Tribes of the Tulalip Reservation in Washington additional authority to acquire, manage, and dispose of tribal property. Public Law 91–274.

Ute Tribe.—Authorized by the Secretary of the Interior to reimburse the Ute Indian Tribe of the Uintah and Ouray Reservation for tribal funds that have been used for construction, operation, and maintenance of the Uintah Indian irrigation project, Utah; authorizes the payment of interest on the tribal funds used; and transfers the title to four pieces of land purchased by the United States in connection with this project to the United States to be held in trust for the tribe. H.R. 16416. Public Law 91– .

Ute Tribes.—Provides for the disposition of funds appropriated to pay a judgment in favor of the Confederated Bands of Ute Indians in the Court of Claims, and a judgment in favor of the Ute Tribe of the Uintah and Ouray Reservation for and on behalf of the Uncompahgre Band of Ute Indians in an Indian Claims Commission docket. S. 3997. P/S 9/1/70.

Washoe Tribe of Nevada and California.—Set aside 80 acres of public domain in Alpine County, California to carry out a program to assist certain Washoe Indians. Public Law 91–362.

Yakima tribes.—Provides for the disposition of three awards totaling $2,210,991.40 awarded to the Yakimas by the Indian Claims Commission as comparison for the value of reservation lands omitted through erroneous surveys of the boundaries of the Yakima Indian Reservation established by the treaty of June 9, 1855. S. 3337. P/S 5/15/70. H.R. 15469. H. Cal.

Yavapai-Prescott Community Reservation, Arizona.—Authorized lands on the Yavapai-Prescott Community Reservation to be leased for periods up to 99 years if a long-term lease will be in the best interest of the Indian owner. Public Law 91–275.

International

American prisoners of war in Southeast Asia.—Placed the Congress on record in support of humane treatment for the United States prisoners of war and focused world attention on the failure of North Vietnam and the National Liberation Front to comply with the provisions of the Geneva convention on the treatment of prisoners of war. H. Con. Res. 454. House adopted 12/15/69. Senate adopted 2/18/70.

Arms Control and Disarmament Act amendments.—Authorized the appropriation of $17.5 million for fiscal years 1971 and 1972 for operations of the Arms Control and Disarmament Agency. Public Law 91–246.

Convention on offenses and certain other acts committed on board aircraft—Implementing legislation.—Amends the Federal Aviation Act of 1958 to permit the United States to implement certain provisions of the Tokyo Convention, which was approved by the Senate on May 13, 1969 and is designed to promote aviation safety through establishment of continuity of jurisdiction over criminal acts occurring onboard aircraft. S. 2176. P/S 8/13/70.

Convention relating to arbitral awards—Implementing legislation.—Implemented the Convention on the Recognition and Enforcement of Foreign Arbitral Awards which was approved by the Senate on October 4, 1968, creating a new chapter under title 9 of the United States Code (the Federal Arbitration Act) dealing exclusively with the recognition and enforcement of awards pursuant to the provisions of the convention. Public Law 91–368.

Gulf of Tonkin Resolution—Termination.—Provides that under the authority of section 3 of the joint resolution commonly known as the Gulf of Tonkin Resolution and entitled "Joint resolution to promote the maintenance of international peace and security in Southeast Asia", such joint resolution shall be terminated effective upon approval of both Houses of Congress. S. Con. Res. 64. Senate adopted 7/10/70.

International biological program.—Authorize all Federal departments and agencies having functions or objectives related to the International Biological Program (IBP) to obligate or transfer money from appropriate funds and to provide such other support as may be appropriate to that effort; expresses the support and endorsement of the Congress for the International Biological Program; and declares that the provision by the United States of adequate financial and other support for the IBP is a matter of priority. H.J. Res. 589. P/H 11/12/69. P/S amended 8/3/70.

International expositions.—Established a Federal procedure for determination of endorsement of and participation in international expositions held in the United States; called on the President to make findings as to official recognition of a domestically proposed exposition and to submit to Congress such proposals considered appropriate for Federal participation; and authorized appropriations not to exceed $200,000 in any fiscal year. Public Law 91–269.

Military sales—Limitations on U.S. involvement in Cambodia.—Authorizes $250 million for foreign sales for each of fiscal years 1970 and 1971 and sets a credit ceiling of $300 million in each of those fiscal years; places limitations on United States involvement in Cambodia; repeals the Gulf of Tokin resolution effective at the end of the second session of the 91st Congress; requires that any sale or grant of the "International Fighter" aircraft, other than to Vietnam or sales through commercial channels, be made under the regular military grant aid and sales programs; places a $35 million ceiling on the amount of excess defense articles that may be given to foreign countries in any fiscal year; and makes other changes in, or additions to, existing law. H.R. 15628. P/H 3/24/70. P/S amended 6/30/70. In conference.

Pan American Institute of Geography and History.—Authorized an increase in the United States annual contributions to the Pan American Institute of Geography and History from $90,300 to $200,000 and authorized the appropriation of $386,050 for the payment of arrearages incurred during fiscal years 1965–1969. Public Law 91–340.

Peace Corps Act amendments.—Authorized $98.8 million for activities of the Peace Corps in fiscal year 1971; proposed new authorities to attract more highly skilled married volunteers with children; broadened the language of the Peace Corps Act to encourage the development of, and participation in, international voluntary service programs and activities and authorized up to $300,000 therefor in fiscal year 1971. Public Law 91–352.

Retirement age for foreign service career ministers.—Amends the Foreign Service Act of 1946 to lower the mandatory retirement age of career Ministers from age 65 to 60 except while serving in positions to which they have been appointed by the President, by and with the advice and consent of the Senate; and to provide for a retirement schedule for those career Ministers who are now past the mandatory retirement age. S. 3691. P/S 6/19/70.

Suspension of further deployment of offensive and defensive nuclear strategic weapons systems.—Expressed the sense of the Senate that prompt negotiations between the Governments of the United States and the Soviet Union to seek agreed limitations of both offensive and defensive strategic weapons should be urgently pursued, and that the President of the United States should propose to the Government of the Soviet Union an immediate suspension by the United States and the Soviet Union of the further deployment of all offensive and defensive nuclear strategic weapons systems, subject to national verification or such other measures of observation and inspection as may be appropriate. S. Res. 211. Senate adopted 4/9/70.

TREATIES

Convention on the Privileges and Immunities of the United Nations.—Accords certain privileges and immunities to the United Nations, as an organization, and to the representatives of its Members, officials of the United Nations and experts on missions for the United Nations; for the most part, these privileges and immunities have already been conferred upon the United Nations through

the International Organizations Immunities Act of 1945 and the Headquarters Agreement of 1947. Ex. J(91st, 1st). Resolution of ratification agreed to 3/19/70.

Extradition treaty with New Zealand.—This treaty follows generally the form and content of extradition treaties recently concluded by the U.S. Government. Under its coverage are 32 extraditable offenses including, for the first time, aircraft hijacking and offenses relating to narcotics and other dangerous drugs. Ex. C (91st, 2d). Resolution of ratification agreed to 5/27/70.

Intellectual and industrial property conventions.—Both of the following refer to patents and copyrights: (1) The Convention Establishing the World Intellectual Property Organization is to be responsible for the overall administrative activities of related organizations and the promotion of the protection of intellectual property on a worldwide basis, and (2) the Paris Convention for the Protection of Industrial Property Convention revised the Industrial Property Convention to bring its finances and structure and that of its Secretariat into line with the more modern principles of international organization. Ex. A (91st, 1st). Resolution of ratification agreed to 2/28/70.

Protocol to the Northwest Atlantic Fisheries Convention.—Provides for the removal of the Convention's current restrictions relating to (1) the number of commissioners on each of the special panels established by the Convention; and (2) the kinds of measures which the International Commission for the Northwest Atlantic Fisheries may propose in order to achieve optimum utilization of fish stocks in the Convention area. Ex. I (91st, 1st). Resolution of ratification agreed to 3/19/70.

Radiotelephone stations agreement with Canada.—Provides for the reciprocal issuance of permits by the United States and Canada to licensed private operators of radiotelephone stations of one country while temporarily in the jurisdiction of the other. Ex. A (91st, 2d). Resolution of ratification agreed to 5/27/70.

United Nations Headquarters expansion.—Authorizes a $20 million appropriation to the Secretary of State for a grant to be made to the United Nations to defray a portion of the cost of the expansion and improvement of its headquarters in New York City. S.J. Res. 173. P/S 7/10/70.

U.S.-U.S.S.R. political exchange program.—Assists governmental officials of the United States and the Soviet Union through means of exchange of visits in making better informed judgments about world affairs involving the two countries; authorizes travel to the U.S.S.R. for not more than 1,000 elected U.S. officials—including Members of Congress—and their spouses during a period of 5 years beginning February 1, 1971; provides for efforts to facilitate comparable trips to the United States by Soviet officials; authorizes up to $5 million for the program over the 5-year period. S. 3127. P/S 4/20/70.

Water pollution research—Fifth international conference.—Seeks the cooperation of the Federal and State Governments and all interested persons and organizations to assist in the Fifth International Conference on Water Pollution to be held in San Francisco, California, from July 26 through August 1, 1970, and which will be reconvened in Honolulu, Hawaii, from August 2 through August 5, 1970. S.J. Res. 162. P/S 3/19/70.

JUDICIAL

Additional district judges.—Provided for the creation of 58 new permanent district judgeships throughout the United States and made amendments to the Judicial Code to enable the Federal courts more efficiently and expeditiously to handle the business brought before them. Public Law 91–272.

Civil Rights Commission authorization.—Increases the annual authorization of the Civil Rights Commission from $2,650,000 to $3,400,000 for each fiscal year, beginning with fiscal year 1970, and ending with January 31, 1973, the termination date of the Commission, to reflect statutory pay increases and other increases in expense; increases the per diem amount payable to Commission members and consultants from $75 to $100; amends the Civil Rights Act of 1957 to provide that any person defamed, degraded, or incriminated by a Commission report shall be provided an opportunity to answer the charges or allegations contained therein, and that said answer shall be annexed to the Commission report. S. 245. P/S 7/14/70. H. Cal.

Copyright protection extension.—Continues until December 31, 1971 the renewal term of any copyright subsisting on the date of this resolution, or the term as previously extended by Public Law 87–668, Public Law 89–442, Public Law 90–141, Public Law 90–416, Public Law 91–147. S.J. Res. 230. P/S 8/17/70.

Customs Courts Act.—Modernized procedures in the Customs Court and related administrative processes in the Bureau of Customs so that the Court and the Bureau will be better able to cope effectively and expeditiously with their rapidly expanding workload. Public Law 91–271.

Federal Youth Corrections Act.—Amended the Federal Youth Corrections Act to permit examiners to conduct interviews with youth offenders. Public Law 91–339.

Immigration and Nationality Act amendments.—Facilitated the entry into the United States of certain classes of non-immigrant aliens and altered the provisions of the Act regarding the applicability of the two-year foreign residence requirement for aliens in the United States as exchange visitors. Public Law 91–225.

Immigration and Nationality Act amendments.—Struck from section 213 of the Immigration and Nationality Act the requirement that cash accepted by the Attorney General, under his discretionary authority to admit certain excludable aliens upon the giving of a bond or posting of cash, be deposited in the postal savings system and provided instead that the cash received as security on bonds be deposited in the Treasury with interest thereon payable at a rate not to exceed 3 percent per annum. Public Law 91–313.

Jurisdiction of U.S. courts—Contract claims.—Provided courts of the United States with jurisdiction over contract claims against the following nonappropriated fund activities: Army and Air Force Exchange Service; Navy, Marine Corps, and Coast Guard exchanges; and exchange councils of the National Aeronautics and Space Administration and required that the United States be reimbursed for any judgments it pays as a result of a contract claim against one of the specified instrumentalities of the United States. Public Law 91–350.

Mississippi District Court

Provided for holding terms of the United States District Court for the Southern District of Mississippi at Gulfport, Mississippi. S. 3122. P/S 6/26/70.

Provided for holding terms of the United States District Court for the Western Division of the Southern District of Mississippi at Natchez, Mississippi. S. 3225. P/S 8/20/70.

Newspaper Preservation Act.—Provided, under certain conditions, for exempting from the antitrust laws, price fixing, profit pooling, and market division by competing newspapers if not more than one newspaper involved is a newspaper other than one "in probable danger of financial failure" or at the time a joint newspaper operation was entered into not more than one of the newspapers involved "was likely to remain or become a financially sound publication." Public Law 91–353.

U.S. land titles.—Amends section 355 of the Revised Statutes, as amended, to provide that the Attorney General is to be responsible for the approval of the sufficiency of titles to land acquired by the United States and that he may delegate this authority to other departments and agencies subject to his general supervision and regulation; to preserve the existing law permitting the Tennessee Valley Authority to approve land titles as to land acquired by that Authority; and for other purposes. Public Law 91–393.

Voting Rights Act extension.—Extended the Voting Rights Act of 1965 for 5 years; extended the suspension of literacy tests and of other tests and devices to all states; limited residence requirements for voting in presidential elections by establishing nationwide, uniform standards for such elections; and lowered the voting age to 18 in Federal, State and local elections. Public Law 91–285.

Labor

Railroad Adjustment Board.—Amended the Railway Labor Act to revise the organizational structure of the first division of the National Railroad Adjustment Board made necessary by the merger of unions representing the trainmen, firemen, conductors, and switchmen into a new union, the United Transportation Union. Public Law 91–234.

Railroad retirement.—Provided for a tax on railroad employers to cover the costs of the supplemental annuity program for employees; placed that program on a permanent basis; and provided that any individual who renders service as an employee for compensation after the "supplemental annuity closing date" applicable to him will not be entitled to a supplemental annuity. Public Law 91–215.

Railroad Retirement Act amendments.—Amended the Railroad Retirement Act of 1937 to provide temporarily (until June 30, 1972) a 15 percent increase in annuities retroactive to January 1, 1970; provided that a study of the railroad retirement system and its financing shall be made by a 5-member Commission which is to submit its recommendations to the President and to Congress no later than July 1, 1971; and, in order to produce additional income for the retirement account, provided for a change in the procedure under which special obligations issued to the retirement account are redeemed to make benefit payments, as well as a change in the interest computation rate on obligations to the account. Public Law 91–377.

Railway labor-management dispute.—Prevented a nationwide strike on railroads throughout the United States scheduled to occur at midnight, March 3, 1970, and provided that for the 37-day period beginning with the enactment of this legislation (until April 11, 1970), strikes and lockouts occurring as a result of this dispute were prohibited. Public Law 91–203.

Railway labor-management dispute.—Prevented a nationwide strike on railroads throughout the United States which was previously prohibited by Public Law 91–203 by putting into effect a "memorandum of understanding," dated December 4, 1969, which memorandum was agreed to by the railroads and negotiators for the four shopcraft unions involved in the dispute and which is subject to renegotiation commencing September 1, 1970, for changes effective on or after January 1, 1971. Public Law 91–226.

Memorials and Tributes

Apollo 13 astronauts.—Expressed the Senate's commendation of the Apollo 13 astronauts—James Lovell, John L. Swigert, Jr., and Fred W. Haise, Jr.—for their fortitude and courage; extended support to their families, friends and all involved in their mission; and urged all who wished to and could comply to pause at 9 p.m., April 14, 1970, to ask the help of God in assuring the safe return of

the astronauts. S. Res. 388. Senate adopted. 4/14/70.

Commendation of heroism of airline pilots.—Expressed the sense of the Senate that Eastern Airlines Captain Robert M. Wilbur, Jr., and his co-pilot, the late James E. Hartley, be commended for their heroic action in averting a major air disaster on March 17, 1970. S. Res. 375. Senate adopted 3/24/70.

Everett McKinley Dirksen Building.—Named the existing Federal Office Building and United States Courthouse in Chicago, Illinois, in memory of the late Everett McKinley Dirkson, who served as a Member of Congress from Illinois from 1933 to 1969. Public Law 91–237.

Goddard Rocket and Space Museum.—Provides congressional recognition of the Goddard Rocket and Space Museum of the Roswell Museum and Art Center, Roswell, New Mexico, as a fitting memorial to Dr. Robert H. Goddard, an outstanding pioneer in American rocketry. S. Con. Res. 49. Senate adopted 4/7/70. H. Cal.

Harry S. Truman Dam and Reservoir, Missouri.—Renamed the Kaysinger Bluff Dam and Reservoir, Osage River Basin, Missouri, in honor of the 33rd President of the United States, the Honorable Harry S. Truman. Public Law 91–267.

Honor America Day.—Granted Congressional recognition to the importance of the July 4, 1970, Honor America Day celebrations and called upon the people of the United States to observe such celebrations with appropriate ceremonies and activities. H. Con. Res. 669. House adopted 6/29/70. Senate adopted 7/1/70.

Jose Antonio Navarro commemorative medals.—Authorized the Secretary of the Treasury to strike and furnish to the San Antonio Conservation Society, without cost to the Federal Government, not more than 100,000 medals in commemoration of the many contributions to the founding and early development of the State of Texas and the city of San Antonio by Jose Antonio Navarro. Public Law 91–244.

Mary McLeod Bethune Memorial.—Extended for 4 years the existing authority for the erection in the District of Columbia of a memorial in honor of Mary McLeod Bethune, a prominent Negro educator, and in commemoration of the 100th anniversary of the signing of the Emancipation Proclamation. Public Law 91–277.

Newt Graham Lock and Dam.—Designates lock and dam No. 18 on the Verdigris River, Oklahoma, as the Newt Graham lock and dam, and the lake created thereby as the Newt Graham Lake, in honor of Newton R. Graham who contributed to the comprehensive development of the Arkansas River Basin. S. 1500. P/S 5/25/70.

Ohio Northern University commemorative medals.— Authorized the Secretary of the Treasury to strike and furnish to Ohio Northern University not more than 16,000 national medals commemorating the 100th anniversary of the founding on August 15, 1871, of Ohio Northern University, located in Ada, Ohio. Public Law 91–381.

Ohio Northern University's 100th anniversary.—Extended Congress' congratulations and greetings to Ohio Northern University on the occasion of the 100th anniversary of its founding. H. Con. Res. 575, House adopted 4/29/70. Senate adopted 6/26/70.

Ohio State University's 100th anniversary.—Extended Congress' congratulations and greetings to Ohio State University on the occasion of the 100th anniversary of its founding. H. Con. Res, 573. House adopted 4/29/70, Senate adopted 6/26/70.

Peruvian earthquake.—Extended the sympathy of the Senate to the President and the people of Peru in the hour of their suffering and distress resulting from an earthquake on May 31, 1970, causing loss of thousands of lives and destruction or devastation of many towns and villages, rendering homeless and destitute many thousands of people. S. Res. 424. Senate adopted 6/29/70.

Pick-Sloan Missouri River Basin program.—Designates the comprehensive Missouri River Basin development program as the Pick-Sloan Missouri Basin program in honor of W. G. Sloan and General Lewis A. Pick who contributed to the development of the water resources of the Nation and the Missouri River Basin. S. 1100. P/S 5/25/70.

Senate Majority Leader Mike Mansfield.—Extended to Mike Mansfield the gratitude and admiration of the Senate for his outstanding performance as a Senator and as a Majority Leader, whereas he completed, on June 19, 1970, 9 years and 167 days as Majority Leader of the United States Senate, a period of service exceeding that of any previous Majority Leader in the history of the United States Senate. S. Res. 423. Senate adopted 6/25/70.

Stone Mountain Memorial medals.—Authorized the Secretary of the Treasury to strike and furnish to the Stone Mountain Memorial Foundation, without cost to the Federal Government, not more than 500,000 medals in commemoration of the completion of the carvings on Stone Mountain, Georgia, depicting heroes of the Confederacy. Public Law 91–254.

Tribute to Gen. Omar N. Bradley and allied World War II victory in Europe.—Expressed the sense of Congress that, on the occasion of the 25th anniversary of V-E Day, and the formal opening of the General Omar N. Bradley historical collection, appropriate ceremonies be conducted at Carlisle Barracks, Pennsylvania. H. Con. Res. 207. House adopted 5/19/69. Senate adopted 2/10/70.

U.S.S. "Utah".—Authorizes the Secretary of the Navy to take such action as is necessary to provide for erection of a flagpole on the remains of the battleship, U.S.S. "Utah", the flying of the American flag over the remains of such battleship and the raising and lowering of such flag each day—such action in honor of the heroic men entombed in her hull on December 7, 1941. S. 583. P/S 7/10/70.

William "Bill" Dannelly Reservoir, Alabama.—Changes the name of the Millery Ferry lock and dam, Alabama River, Alabama, as a tribute to Judge William "Bill" Dannelly, for his role in the development of the water resources of the Alabama-Coosa River Basin. S. 528. P/S 5/22/70.

William G. Stone Navigation Lock, California.—Designates the lock on the Sacramento deepwater ship channel in the State of California as the William G. Stone navigation lock in honor of the late William G. Stone, whose efforts contributed so much to the development of this important project. S. 3192. P/S 7/21/70.

Nominations (Action by Rollcall Vote)

Harry A. Blackmun to be an Associate Justice of the Supreme Court of the United States.—Nomination confirmed 5/12/70 (94–0).

George Harrold Carswell to be an Associate Justice of the Supreme Court of the United States.—Nomination rejected 4/8/70 (45–51).

Adm. Thomas H. Moorer to be Chairman of the Joint Chiefs of Staff for a term of two years.—Nomination confirmed 6/17/70 (78–2).

Proclamations

American prisoners of war and servicemen missing in action in Southeast Asia.—Expressed the sense of Congress that May 1, 1970, be commemorated as a day for an appeal for international justice for all American prisoners of war and servicemen missing in action in Southeast Asia; that avenues be sought to insure treatment of these men in accord with the Geneva Convention standards; that every possible effort be made to secure their early release from captivity; and that the President designate Sunday, May 3, 1970, as a National Day of Prayer for humane treatment and the same return of these brave Americans. H. Con. Res. 582. House adopted 4/23/70. Senate adopted 4/27/70, amended. House agreed to Senate amendments 4/28/70.

Clean Waters for America Week.—Authorizes the President to issue annually a proclamation designating the first full calendar week in May of each year as "Clean Waters for America Week." S.J. Res. 172. P/S 2/17/70.

International Clergy Week.—Authorized and directed the President to issue a proclamation designating the week commencing February 1, 1970, as "International Clergy Week in the United States." Public Law 91–192.

International Petroleum Exposition.—Authorizes and requests the President to invite by proclamation or otherwise the States and foreign nations to participate in the International Petroleum Exposition to be held in Tulsa, Oklahoma, from May 15 through May 23, 1971, for the purposes of exhibiting machinery, equipment, supplies, and other products used in the production and marketing of oil and gas and bringing together buyers and sellers for the promotion of foreign and domestic trade and commerce for such products. S.J. Res. 127. P/S 2/17/70.

Mineral Industry Week.—Authorized and requested the President to issue a proclamation designating the period of February 13–19, 1970, as "Mineral Industry Week." Public Law 91–195.

National Arbor Day.—Authorized the President to proclaim the last Friday of April 1970 as "National Arbor Day" and called upon the people of the United States to observe such day with appropriate ceremonies and activities. Public Law 91–236.

National Machine Tool Week.—Authorized the President to designate the period beginning September 20, and ending September 26, 1970, as "National Machine Tool Week." Public Law 91–395.

National Park Centennial Year.—Requested the President to issue a proclamation designating 1972 as "National Park Centennial Year" and created a special commission to prepare and execute the plans for the commemoration of the 100th anniversary of the establishment of the world's first national park, Yellowstone, on March 1, 1872. Public Law 91–332.

Resource Buildup

Anadromous Fish Conservation Act amendments.—Extended and expanded the program for the conservation, development, and enhancement of the Nation's anadromous fish and the fish in the Great Lakes that ascend streams to spawn; and authorized for the program $6 million, $7.5 million, $8.5 million and $10 million for fiscal years 1971, 1972, 1973, and 1974, respectively. Public Law 91–249.

Arches National Park, Utah.—Establishes the Arches National Park in the State of Utah, consisting of some 73,154 acres, the greater part of which are now in Federal ownership, and protects, for a limited period, existing uses respecting grazing and the trailing and watering of livestock, S. 532. P/S 7/1/70.

Canyonlands National Park, Utah.—Extends the boundaries of the Canyonlands National Park by adding to the park approximating 257,640 acres four additional tracts which, for the most part, are public lands totaling approximately 79,618 acres. S. 26. P/S 7/15/70.

Cape Cod National Seashore, Massachusetts.—Authorized the appropriation of an additional $17,401,000 to assure the acquisition of all remaining non-Federal lands needed to make the Cape Cod National Seashore a meaningful unit of the national park system. Public law 91–252.

Capitol Reef National Park, Utah.—Establishes the Capitol Reef National Park in the

State of Utah and provides for a total park area of 230,837 acres. S. 531. P/S 7/1/70.

Central and Western Pacific Tuna Fishery Development Act.—Authorizes the Secretary of the Interior to institute a 3-year program for the development of latent tuna resources of the central and western Pacific and authorizes to be appropriated for the period July 1, 1970, to June 30, 1973, the sum of $3 million to remain available until expended. S. 3176. P/S 5/22/70.

Classification and Multiple Use Act and the Public Land Sale Act extensions.—Extends the Classification and Multiple Use Act and the Public Land Sale Act for a period of 5 years to December 31, 1975. S. 3728. P/S 7/8/70.

Clean Air Act and Solid Waste Disposal Act extensions.—Extended the authorization for the Clean Air Act and Solid Waste Disposal Act programs for 60 days through August 31, 1970, at their present level. Public Law 91–316.

Extends the authorization for the Clean Air Act and Solid Waste Disposal Act programs at their present level through November 30, 1970. S. 4319. P/S 9/1/70.

Coral reefs conservation.—Authorizes the Secretaries of Interior and the Smithsonian Institution to expend $4.5 million until June 30, 1970 in cooperation with the territories of Guam, American Samoa, the Trust Territory of the Pacific Islands, other United States territories in the Pacific Ocean, and the State of Hawaii, for the conservation of their protective and productive coral reefs. The bill is designed to control the devastating crown of thorns starfish which has been destroying coral reefs. S. 3135. P/S 4/27/70. H. Cal.

Craters of the Moon National Monument, Idaho.—Designates 40,785 acres of the Craters of the Moon National Monument in Idaho as part of the national wilderness preservation system, pursuant to provisions of the wilderness act (Public Law 88–577). S. 1732. P/S 6/15/70.

East Greenacres Unit, Rathdrum prairie project, Idaho.—Authorized construction, operation, and maintenance of the East Greenacres unit of the Rathdrum Prairie Reclamation Project in northwest Idaho, which unit would supply irrigation water to 5,230 acres and municipal and industrial water, and provide fish and wildlife conservation and public recreation benefits. Public Law 91–286.

Everglades National Park, Florida.—Provides for acquisition by the National Park Service of the remaining inholdings within the Everglades National Park boundaries consisting of some 58,400 acres of privately owned lands and for such land purchases authorizes an additional $20 million. S. 2565. P/S 7/10/70.

Falls of the Ohio Interstate Park Compact.—Granted the consent of Congress to the Falls of the Ohio Interstate Park Compact to carry out an agreement between Indiana and Kentucky to create and develop an interstate park known as Falls of the Ohio Interstate Park, located on the Ohio River in Clark and Floyd Counties, Indiana, and Jefferson County, Kentucky, and to create a six-member commission to operate the park. Public Law 91–390.

Federal Water Pollution Control Act amendments.—Amended the Federal Water Pollution Control Act to declare a U.S. policy that there should be no oil discharges into navigable waters of the U.S., adjoining shorelines or waters of the contiguous zone; to authorize the President to determine by regulation what harmful quantities of oil cannot be discharged without violation of the Act, and to designate those discharges, other than oil, which constitute dangerous substances; to provide penalties for failure to give proper notification of a knowing discharge of oil and violation of restrictions; to authorize the President to act to remove oil unless properly done by the responsible owner or operator; to provide for a National Contingency Plan for removal of oil; to provide, in the event a marine disaster has created a substantial threat of a pollution hazard, for removal of the threat; and, unless an act of God, war, U.S. government negligence or an act or omission of a third party be shown, liability to the U.S. for a discharge shall be not to exceed $100 per gross ton or $14 million, whichever is lesser, for a vessel and $8 million for an onshore or offshore facility, unless the discharge resulted from willful negligence or misconduct, when there shall be full liability for the costs. The Act also includes provisions for control of sewage from vessels, area acid and other mine water pollution control demonstrations; pollution control in the Great Lakes; training grants and contracts with institutions for training in water quality control; Alaska village demonstration projects; cooperation by all federal agencies in the control of pollution; and establishment of an Office of Environmental Quality. Public Law 91–224.

Fisheries loan fund extension.—Amended the Fish and Wildlife Act of 1956 to extend the life of the fisheries loan fund an additional 10 years, from June 30, 1970, until June 30, 1980. Public Law 91–387.

Ford's Theatre National Historic Site.—Designated Ford's Theatre, the Lincoln Museum, and the House Where Lincoln Died, as the Ford's Theatre National Site, and added to that complex certain property in the District of Columbia adjacent to the Theatre. Public Law 91–288.

Glen Canyon National Recreation Area, Arizona and Utah.—Affords permanent, statutory protection to the scenic Glen Canyon National Recreation Area, which is presently administered under an Executive Order. S. 27. P/S 7/15/70.

Golden eagle program.—Renewed until December 31, 1971, the Golden Eagle passport program but increased from $7 to $10 the annual cost of the permit allowing entry into Federally administered outdoor recreation areas and provided advance contract authority to enable Federal agencies to acquire land for outdoor recreation. Public Law 91–308.

Historic properties.—Extended the national historic preservation program established by Congress in 1966 (Public Law 89–655) and authorized appropriations of $7 million, $10 million and $15 million for fiscal years 1971, 1972 and 1973, respectively; provided for an increase in the size of the Advisory Council on Historic Preservation; authorized limited United States participation in the International Centre for the Study of the Preservation and Restoration of Cultural Property, and in this connection, authorized a maximum appropriation of $100,000 in each of fiscal years 1971, 1972, and 1973. Public Law 91–243.

Homestead National Monument, Nebraska.—Provides for the addition of the Freeman School and the 1.2 acres of land on which it is situated to the Homestead National Monument of America in Nebraska. S. 58. P/S 4/27/70.

Hudson River compact negotiations.—Extended until 1973 provisions of the act of September 26, 1966, which expired on September 26, 1969, with respect to applications for a license for an activity which may affect the resources of the Hudson Riverway and required the Secretary of the Interior to report on the progress of the negotiations on the Hudson River Compact by July 1, 1970, and annually thereafter. Public Law 91–242.

Lake Tahoe, Nevada and California.—Authorizes the Secretary of the Interior to study the feasibility and desirability of establishing a national lakeshore on Lake Tahoe in the States of Nevada and California with the objective of providing legislation to preserve in perpetuity the superb scenic and recreational facilities available in the Lake Tahoe area. S. 2208. P/S 5/13/70. H. Cal.

Marine Resources and Engineering Development Act amendments.—Designed to extend to June 30, 1971 the National Council on Marine Resources and Engineering Development which expired on June 30, 1970. S. 3617. P/S 7/10/70. H.R. 16607. H. Cal.

Middle Snake River.—Suspends for 8 years the authority of the Federal Power Commission to accept applications or grant licenses or permits under the Federal Power Act for the construction of hydroelectric power projects on the reach of the Middle Snake River extending along the Idaho-Oregon and Idaho-Washington borders for 100 miles between the existing Hells Canyon Dam and the authorized Asotin Dam. S. 940. P/S 5/15/70.

Missouri River Basin.—Authorized appropriations of $32 million for fiscal years 1971 and 1972 (including $13,838,000 in the fiscal year 1971 budget) to continue the program of the Bureau of Reclamation for investigations and construction of the comprehensive plan for the Missouri River Basin project. Public Law 91–218.

Missouri River Basin project, Minot extension, Garrison diversion unit, North Dakota.—Authorizes construction, operation, and maintenance of the Minot extension of the Garrison diversion unit, Missouri River Basin project. S. 2808. P/S 7/10/70. P/H amended 9/10/70.

Mount Baldy, Pine Mountain, and Sycamore Canyon wilderness, Arizona.—Designates areas in three national forest primitive areas in Arizona as the Mount Baldy Wilderness, the Pine Mountain Wilderness, and the Sycamore Canyon Wilderness, as part of the national wilderness preservation system, in accordance with the provisions of the Wilderness Act of September 3, 1964. S. 710. P/S 6/12/70.

Narrows Unit, Missouri River Basin Project, Colorado.—Authorized construction, operation, and maintenance of the Narrows unit of the Missouri River project, which would be located on the South Platte River in northwestern Colorado to supply supplemental irrigation water to 166,370 acres and to provide flood control, fish and wildlife conservation, and recreation benefits and potential future municipal and industrial water supplies; authorized $68,050,000 for construction of the Narrows unit. Public Law 91–389.

National park system administration.—Updated and clarified the law with respect to the administration by the Secretary of the Interior of the various units of the national park system. Public Law 91–383.

Pacific Marine Fisheries Compact amendments.—Granted the consent and approval of the Congress to amendments to the Pacific marine fisheries compact as follows: by recognizing the adherence of the States of Idaho and Alaska to the compact in addition to the three original member States (California, Oregon, and Washington); modifying the reference to the Pacific Ocean by the additional wording "and adjacent waters" in recognition of the State of Alaska's jurisdiction over the Bering Sea; and providing a more equitable way of apportioning costs of the activities of the Pacific Marine Fisheries Commission. Public Law 91–315.

Point Reyes National Seashore, California.—Authorized the appropriation of an additional $38,365,000 to assure the acquisition of all remaining non-Federal lands needed to make the Point Reyes National Seashore a meaningful unit of the national park system. Public Law. 91–223.

Public ownership of lands in Federal reclamation projects.—Clarified the acreage limitation provisions of the Federal reclamation laws with respect to lands owned by a State or local government entity or subdivision. Public Law 91–310.

Resource Recovery Act of 1970.—Amends the Solid Waste Disposal Act to emphasize recycling, local planning, and training func-

tions; authorizes research programs of $31.5 million, $40.5 million, $40 million and $38.5 million for fiscal years 1971, 1972, 1973 and 1974, respectively; replaces 50 percent State grants for planning activities with 66⅔ percent grants to single municipalities and States, and 75 percent grants for planning solid waste programs in the area of more than one municipality or State; provides that grants may be used for (1) making surveys of solid waste problems, (2) preparing solid waste disposal plans for the area (especially those emphasizing recycling), (3) developing proposals for demonstration system grants, and (4) preparing plans for collecting and recovering abandoned motor vehicle hulks; provides for grants to varying sizes of communities to demonstrate resource recovery systems and authorizes therefor annual appropriations of $20 million, $30 million, $50 million and $55 million for fiscal years 1971, 1972, 1973, and 1974, respectively; directs the Secretary of Health, Education and Welfare to prepare guidelines on solid waste management practices for circulation to State and local governments and requires him to recommend model codes and ordinances and issue technical information on solid waste and resource recovery methods to solid waste agencies; provides training grants to assist in the development of personnel trained in the design, operation and maintenance of solid waste disposal and recovery equipment and systems; requires Federal installations and federally licensed activities to meet solid waste guidelines; authorizes a two-year study to create a system of national disposal sites for hazardous materials; creates and authorizes $2 million for a National Commission on Materials Policy which is to make a report by June 30, 1973; authorizes $2 million for a 2-year study of issues in resource recovery; and authorizes such sums as may be necessary through June 30, 1964 to carry out the purposes of the Act, excluding those funds specifically provided therein. H.R. 11833. P/H 6/4/70. P/S amended 8/3/70.

River basin plans and civil works.—Authorized additional appropriations of $810 million to cover a period of two years ending calendar year 1971 for certain comprehensive river basin plans previously approved by Congress for flood control, navigation, and other purposes. Public Law 91–282.

Riverton extension unit of the Missouri River Basin project, Wyoming.—Consolidates the Riverton reclamation project, presently in operation, and the lands of the former Riverton extension unit of the Missouri River Basin Project now in Federal ownership within a single authorized unit of the Missouri River Basin Project to provide a new repayment plan for the entire unit including necessary rehabilitation and betterment of existing facilities, write-off of costs associated with the development of lands found to be nonproductive, and provision of repayment assistance from power revenues of the Missouri River Basin Project. S. 434. P/S 4/27/70. P/H amended 9/10/70.

Rogue River Basin project, Oregon.—Authorized the construction, operation, and maintenance of the Merlin division, Rogue River Basin reclamation project in Josephine County, Oregon, which division is a multiple-purpose water resource development serving irrigation water to more than 9,000 acres, for public outdoor recreation, fish and wildlife conservation, area redevelopment, and flood control. Public Law 91–270.

Saline water conversion program.—Authorized an appropriation of $28,873,000 for fiscal year 1971 to continue the desalting research program of the Office of Saline Water, Department of the Interior. Public Law 91–221.

Toiyabe National Forest, Nevada.—Extended the boundaries of the Toiyabe National Forest to include 12,920 acres along the Nevada side of Lake Tahoe to aid in the protection and management of the various resources of the area, including the protection, improvement, and maintenance of the watershed, wildlife, recreation, and natural environment values of the lands in the Lake Tahoe Basin, and to promote the management and protection of these lands under the principles of multiple use and sustained yield. Public Law 91–372.

Touchet-Walla Walla project, Oregon-Washington.—Authorized $22,774,000 for the construction and operation of the Touchet division of the Walla Walla reclamation project in southeastern Washington which will supply irrigation water to approximately 9,960 acres of land. Public Law 91–307.

Volunteers in the park program—establishment.—Authorized the Secretary of the Interior to enlist the services of volunteers in programs directly related to the public service mission of the National Park Service and authorized $100,000 annually for this purpose. Public Law 91–357.

Water Resources Research Act amendments.—Amends the Water Resources Research Act to increase the amount authorized to be appropriated for a water resources research center in each of the States from $100,000 to $200,000 annually for each center; provides for the establishment of information retrieval and dissemination activities at each research center; and makes the District of Columbia, Guam, and the Virgin Islands eligible to receive grants. S. 3553. P/S 9/1/70.

Wichita Mountain Wilderness, Oklahoma.—Places 8,900 acres of the 59,000 acre Wichita Mountains National Wildlife Refuge in Oklahoma within the National Wilderness Preservation System, including the 5,000 acre Charons Garden Unit and the 3,900 acre North Mountain Unit. S. 3222. P/S 4/27/70.

Youth Conservation Corps.—Established a 3-year pilot Youth Conservation Corps program for young men and women, 15 through 18 years of age, who would participate in summer work and educational projects in our national parks, forests, recreation areas, wildlife refuges and other public lands administered by the Departments of Interior and Agriculture. Public Law 91–378.

Yuma Mesa irrigation district, Arizona.—Amends Public Law 394, 84th Congress, to authorize for the Yuma Mesa Irrigation District, Gila Project, Arizona, "irrigation works and facilities" to be constructed in addition to drainage facilities and to authorize the existing repayment contract to be amended accordingly. S. 2882. P/S 3/18/70. P/H amended 9/10/70.

Space

NASA authorization, 1971.—Authorized the appropriation of $3,410,878,000 for fiscal year 1971 to the National Aeronautics and Space Administration ($2,693,100,000 for research and development, $34,478,000 for construction of facilities, and $683,300,000 for research and program management). Public Law 91–303.

National Aeronautics and Space Council.—Provided that the Secretary of Transportation shall be a member of the National Aeronautics and Space Council. H.R. 16539. Public Law 91– .

Taxation

Discriminatory State taxation of interstate carriers.—Eliminates the long-standing burden on interstate commerce resulting from discriminatory State and local taxation of common and contract carrier transportation property by (a) amending the Interstate Commerce Act to declare unlawful as an unreasonable and unjust discrimination against and an undue burden upon interstate commerce, a State or local tax rate, assessment, or collection upon the transportation property of a common or contract carrier at a higher level than upon property in the same taxing district, and (b) procedurally, by providing a remedy in the Federal courts for common and contract carriers against the collection of the excessive portion of any tax based upon such unlawful assessment or rate. S. 2289. P/S 1/30/70.

Duty Suspensions

Copper.—Continued from July 1, 1970, through June 30, 1972, the present suspension of duties applicable to unwrought copper (except nickel silver), copper waste and scrap, and copper articles imported to be used in remanufacture by melting; and continued the suspension of the additional duties applicable to the copper content of certain copperbearing ores and materials for the same period. Public Law 91–298.

Dyeing and tanning materials.—Continued for 3 years, until the close of September 30, 1972, the period during which certain dyeing and tanning materials may be imported free of duty. Public Law 91–388.

L-Dopa.—Amended the Tariff Schedules of the United States by adding a new item to suspend for a period of 2 years the duty on L-Dopa, a new drug used in the treatment of Parkinsonism. Public Law 91–309.

Manganese ore.—Continued until June 30, 1973, the existing suspension of duties on manganese ore. Public Law 91–306.

Employment security amendments.—Extended coverage of the unemployment compensation program to more than 4.7 million additional jobs; established a permanent program of extended benefits for people who exhaust their regular State benefits during periods of high unemployment; improved the financing of the unemployment compensation program; and made other changes to strengthen the unemployment compensation system. Public Law 91–373.

U.S.S. "Pueblo" crew—Taxes.—Provided that, for purposes of the Internal Revenue Code of 1954, members of the crew of the U.S.S. "Pueblo" who were illegally detained during 1968 by the Democratic People's Republic of Korea shall be treated as serving in a combat zone and will receive an exclusion from income tax for their pay for service in the Armed Forces; waived unpaid income taxes and Federal death taxes for the member of the crew killed during this period; and extended the time for filing tax returns, paying taxes, etc. for all personnel on the ship. Public Law 91–235.

Transportation and Commerce

Accessibility of public facilities to physically handicapped.—Provided that buildings and structures which must be used by the general public such as subway stations and surface stations constructed under the authority of the National Capital Transportation Acts of 1960 and 1965, or title III of the Washington Metropolitan Area Transit Regulation Compact, be so designed and constructed as to be accessible to the psysically handicapped. Public Law 91–205.

Airport and Airways Development Act.—Provided for the expansion and improvement of the Nation's airport and airway systems; repealed the Federal Airport Act; required the Secretary of Transportation to formulate and recommend to Congress within one year a national transportation policy; established a Presidential Aviation Advisory Commission; authorized expenditures of $75 million for planning grants, at $15 million each year; $250 million for air carrier and reliever airport development for each of 5 fiscal years beginning in fiscal year 1971, and $30 million for non-air carrier airport development for each of such fiscal years, and beginning in fiscal year 1971, contract authority up to $840 million for 5 fiscal years, with each obligation of $280 million restricted to 3 years, and $250 million for air navigation facilities for each of 5 fiscal years; imposed new or increased user taxes as follows: 7 cents a gallon tax on gasoline and other fuels used in non-commercial aviation; 8 percent on gross amounts of domestic airline passenger fares; 5 percent tax on air

freight waybills; $3 tax per person using international travel facilities; an annual civil aircraft user tax, plus an additional poundage tax in the case of certain aircraft. Revenues from the aviation user taxes are to be placed in a new Airport and Airway Trust Fund similar in nature to the existing Highway Trust Fund. Public Law 91–258.

Aviation war risk insurance extension.—Extended the authority to provide aviation war risk insurance and reinsurance under title XII of the Federal Aviation Act of 1958 for 5 years through September 7, 1975. Public Law 91–399.

Cruise ship regulations.—Amended the Merchant Marine Act of 1936, as amended, to eliminate certain provisions of existing law which unnecessarily restrict cruise operations of subsidized American-flag passenger vessels, to enable these vessels to compete more effectively with foreign-flag passenger vessels, and to vest permissive authority in the Secretary of Commerce to make available regularly scheduled vessel passenger service to the public, including service in some areas which now have none. Public Law 91–250.

Federal Low-Emission Vehicle Procurement Act.—Channels and augments the motor vehicle procurement expenditures of the Federal Government in such a way as to stimulate the development, production and distribution of motor vehicle propulsion systems which emit few or no pollutants; seeks to achieve this stimulation by requiring the Federal Government to purchase available low-emission vehicles in lieu of other vehicles, thereby creating a guaranteed market which additionally provides controlled conditions for field testing of new concepts in automotive propulsion; authorizes annual appropriations of $50 million to carry out the provisions of this Act. S. 3072 P/S 3/26/70.

Fishing fleet improvement.—Extended and broadened the construction asistance program under the United States Fishing Fleet Improvement Act to include reconditioning, conversion, and remodeling; increased the authorization for appropriations from $10 million annually to $20 million for fiscal years 1970, 1971, and 1972; provided for a class differential rather than the present individual determination, and eliminated several time-consuming provisions resulting in savings of time and administrative costs. Public Law 91–279.

High-Speed Ground Transportation Act extension.—Extends the High-Speed Ground Transportation Act for an additional year, until June 30, 1972, and authorizes $21,700,000 for fiscal year 1971. S. 3730. P/S 7/30/70. H.R. 17538. H. Cal.

International Travel Act amendment.—Amends the International Travel Act of 1961 in order to improve the balance of payments by further promoting travel to the United States; provides Federal grants to assist States, cities, and regional groupings of States in attracting foreign visitors, and sets the Federal share of cost of any relevant program at 50 percent of its cost; establishes in the Commerce Department a United States Travel Service to be headed by an Assistant Secretary of Commerce for Tourism (to replace the present Travel Service headed by a Director); creates a National Tourism Resources Review Commission to study and make recommendations to the President and Congress regarding travel needs and policies and authorizes $1,250,000 for this purpose; and authorizes appropriations of $15 million for each of fiscal years 1971, 1972 and 1973 to carry out the provisions of the Act. S. 1289. P/S 3/26/70. H.R. 14685. P/H 5/14/70; P/S amended 5/21/70. Senate agreed to conference report 7/15/70. House rejected conference report 7/16/70.

Maritime authorization, 1971.—Authorized the appropriation of $429,420,000 to the Maritime Administration for the fiscal year 1971 ($199,500,000 for acquisition, construction or reconstruction of vessels, and construction—differential subsidy and cost of national defense features incident to the construction, reconstruction or reconditioning of ships; $193 million for payment of obligations incurred for shipping operation subsidies; $19 million for research and development expenses; $4,675,000 for reserve fleet expenses; $6.8 million for operation of the Merchant Marine Academy at King's Point, New York; $2,445,000 for financial assistance to State marine schools; and $4 million for continued operation of the nuclear ship "Savannah"). Public Law 91–247.

National Traffic and Motor Vehicle Safety Act amendments.—Authorized appropriations of $23 million for fiscal year 1970 and $40 million for each of fiscal years 1971 and 1972; broadened the definition of "motor vehicle equipment" to include related automotive safety devices used exclusively to safeguard motor vehicles and passengers, and other highway users from risk of accident, injury or death; provided that the Secretary of Transportation obtain information relating to agricultural tractor safety and report findings and recommendations thereon to Congress; and amended the act in several other respects. Public Law 91–265.

Political broadcasting.—Amends section 315 of the Communications Act of 1934, as amended, to repeal the equal-time broadcasting requirement relative to presidential and vice-presidential candidates; limits the charges for use of broadcasting stations by candidates for public office to no more than the station's lowest unit charge for the same amount of time; and places a ceiling of $20,000 on the amount candidates for Federal elective office, or others on their behalf, may spend on electronic media in a general election. S. 3637. P/S 4/14/70. P/H amended 8/11/70. Conference report filed 8/13/70.

Public Broadcasting Financing Act of 1970.—Amends the Communications Act of 1934 to authorize annual appropriations of such sums as may be necessary for fiscal years 1971, 1972 and 1973 for the continued financing of the Corporation for Public Broadcasting, and to direct the Federal Communications Commission to prescribe regulations for broadcast stations receiving assistance under Title II of the Public Broadcasting Act. S. 3558. P/S 5/19/70. P/H 9/10/70.

Rail Passenger Service Act of 1970.—Establishes a National Rail Passenger Corporation to provide for the operation of passenger trains, to commence service on March 1, 1971, and authorizes for fiscal year 1971 appropriations of $40 million to the corporation, as well as a guarantee of $60 million in 20-year loans to the corporation to finance the upgrading of roadbeds and the purchase and rehabilitation of rolling stock and for other corporate purposes. The bill also authorizes the appropriation of $75 million for loans or loan guarantees to provide emergency financial assistance for railroads operating passenger service. S. 3706. P/S 5/6/70.

Railroad Safety Act and Hazardous Materials Transportation Control Act.—Designed to promote safety in all areas of railroad operation, to reduce railroad related accidents, and to reduce death and injuries to persons and to reduce damage to property caused by accidents involving any carrier of hazardous materials. S. 1933. P/S 12/19/69. P/H amended 8/6/70. In conference.

Shipper's recovery of a reasonable attorney's fee.—Puts the shipping public, especially small shippers, householders, and travelers in a more equal bargaining position with carriers in settlement negotiations for recovery of damages sustained in the transportation of property by permitting a successful plaintiff to recover his attorney's fees if he allowed the carrier a reasonable period of time to settle the claim. S. 1653. P/S 1/26/70.

Urban Mass Transportation Assistance Act.—Provides a Federal commitment for $10 billion in funds over a period of 12 years for urban mass transportation programs; authorizes the Secretary of Transportation to incur contractual obligations up to $3.1 billion for all authorized programs under the amended 1964 act, restricting disbursement by limitations from a maximum of $80 million prior to July 1, 1971, which is increased by specified limitations for subsequent years reaching a maximum of $1.86 billion on July 1, 1975, and $3.1 billion thereafter, with further authorization requests, and recommendations for adjustment in the schedule of liquidating appropriations, to be submitted by the Secretary at 2-year intervals before July 1, 1972 through 1982. Changes use of the discretionary fund from $12.5 million to 1.5 percent of the aggregate amount of funds authorized to be obligated, except that an additional 6 percent may be used if it shall not prejudice or delay pending projects of other States, but in such case no State shall receive more than 25 percent of the grant funds made available by the exception, and authorizes a new program of 1-year loans to States and local public bodies, and agencies thereof, for the acquisition of real property reasonably expected to be needed and used for urban mass transportation purposes within a reasonable period. S. 3154. P/S 2/3/70. H.R. 18185. H. Cal.

Veterans

Definition of "Child" for Veterans' Benefit Purposes.—Revised the definition of "child" for veterans' benefit purposes to recognize an adopted child as a dependent from the date of issuance of an interlocutory decree. Public Law 91–262.

Group Life Insurance.—Increased from $10,000 to $15,000 the amount of servicemen's group life insurance for members of the uniformed services. Public Law 91–291.

Medical Benefits for Older Veterans.—Provides that a veteran who is in receipt of a Veterans' Administration pension would no longer be required to sign under oath a statement of inability to defray the necessary expenses of hospital or domiciliary care in order to gain admission to a VA hospital for a non-service-connected disability. H.R. 693. P/H 6/2/69. P/S amended 10/21/69. House agreed to Senate amendment with an amendment 5/4/70.

Rcoupment of disability severance pay.—Liberalized the conditions under which the Administrator of Veterans' Affairs is required to effect recoupment from disability compensation otherwise payable to certain disabled veterans. Public Law 91–241.

Special health care benefits for certain surviving dependents.—Permits the surviving dependents of members of the Armed Forces who die while eligible for receipt of hostile fire pay, or from a disease or injury incurred while eligible for such pay, who are receiving benefits under the special program for the physically handicapped or mentally retarded provided the civilian health and medical program of the uniformed services (CHAMPUS) to continue to receive such benefits until they pass their 21st birthday. S. 4148. P/S 8–14–70. H.R. 8413. P/H 2–16–70.

Specialized medical resources.—Provides greater flexibility in the Veterans Administration hospital and medical care program by providing the Administrator with greater administrative discretion in the appointment of nurses, in the internship and residency program, and in the appointment of dentists of high academic and research standing on a temporary full-time or part-time basis. H.R. 9634. P/H 6–2–69. P/S amended 10–21–69. House agreed to Senate amendments with amendments 5–4–70.

Veterans' Administration regional office in the Philippines.—Extended for 4 years, until July 3, 1974, the authority of the Veterans' Administration to operate and maintain a

regional office in the Philippines. Public Law 91-338.

Veterans' disability compensation increase.—Increased by 8 percent the compensation payments to veterans rated 10, 20 and 30 percent disabled; increased by 11 percent the compensation payments to veterans rated 50 percent to 90 percent disabled; increased by 12 percent the compensation payments for the totally disabled; increased the allowances to dependents of disabled veterans whose disability is rated at 50 percent or higher; made the compensation increases effective July 1970; established a presumption in the case of any veteran who served for 90 days and who was held as a prisoner of war for not less than 6 months during World War II, the Korean conflict or the Vietnam era that a disability suffered from dietary deficiencies, forced labor, or inhumane treatment is service connected if the disability is related to malnutrition, or if the veteran became psychotic within 2 years of separation from military service; permitted a remarried widow to revert to her earlier eligibility for compensation, pension and education benefits when her second marriage is ended by death or divorce; clarified Congressional intent that all decisions of the Administrator of Veterans' Affairs on questions of entitlement are final and not subject to judicial review. Public Law 91-376.

Veterans' Education and Training Amendments Act.—Increased by 34.6 percent the basic "GI bill" monthly educational assistance allowance rates for veterans, and the allowances for farm training and apprenticeship programs; increased by 22.7 percent the vocational rehabilitation training subsistence allowance; provided a special supplementary assistance allowance for educationally disadvantaged veterans; established a predischarge educational program to assist servicemen in preparing for future education while still on active duty; and expanded the veterans' outreach service program covering the Veterans Administration's counseling service to advise veterans of their entitlements and assist them in gaining employment. Public Law 91-219.

Welfare

Social security and railroad retirement benefits.—Extends for 4 months the period for States to assure aged, blind, and disabled social security beneficiaries who also receive welfare an increase of at least $4 in their combined income from social security and welfare, and accords similar treatment to increases in railroad retirement benefits which may become law in 1971. Public Law 91-306.

Mr. GRIFFIN. Will the distinguished majority leader yield?

Mr. MANSFIELD. I am delighted to yield to the Senator from Michigan.

Mr. GRIFFIN. I want to thank the majority leader, first of all, for making a copy of his speech available to me so that I could have the opportunity to look it over.

Obviously, as it is the President's prerogative to send such a message to Congress, it is certainly the prerogative of the majority leader to make such comments as he has this morning. It would not be surprising if he does not agree with the President in every respect and it would not be surprising if the minority leader does not agree with the majority leader insofar as some aspects of his comments are concerned.

I shall not take time to offer any rebuttal but would call attention to the fact that the minority leader has a statement also concerning the President's message. Because of the unusual situation this morning, he was not able to read the statement, but it will be submitted for the RECORD.

The minority leader's statement calls attention to the fact that many of the measures, particularly in the area of crime legislation, have been passed by the Senate. The President's message, as I read it carefully, speaks generally in terms of the failure by the Congress. I think that the leadership on both sides would agree that in some areas the Senate has been more active and more vigorous than the other body.

On the other hand, we must also face up realistically to the fact that legislation is not legislation until it is placed on the President's desk and he has an opportunity to sign it. Many times, even though a bill passes this body, it must come back, usually in the form of a conference report, after it clears the other body, so that sometimes there is further action the Senate has to take.

But the majority leader is perfectly correct in pointing out some areas where the Senate has done all it can possibly do, and it is up to the other body as to whether some of the bills become law.

I thank the majority leader for yielding to me.

Mr. MANSFIELD. I thank the distinguished Senator from Michigan. I thank the minority leader for his temperate and understanding remarks. What he says it true, so far as what the Senate has done is concerned. The joint leadership has tried its best to cooperate with the President.

I think the record of this body is outstanding and that the degree of cooperation has been excellent. I am very proud of all the Members of this body, both Republicans and Democrats, for the way they have accommodated themselves as far as they could to taking up this legislation.

Any proposals sent by the President will, I want to assure my distinguished friend, the acting minority leader, and the President, be given the consideration which they deserve. I do not and the Senate does not take Presidential recommendations lightly.

ORDER FOR CONTINUATION OF TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the unfinished business be not laid before the Senate and that the period for the transaction of routine morning business be extended briefly, with statements therein limited to 3 minutes.

The PRESIDING OFFICER (Mr. NELSON). Without objection, it is so ordered.

THE SPACE PROGRAM

Mr. SPARKMAN. Mr. President, on September 10, there was published in the Anniston, Ala., Star an editorial entitled "Cutting the Space Muscle."

Not long ago, I made a few comments on the floor of the Senate regarding some of the disturbances being brought about by the drastic treatment of the space program.

This editorial deals with it in a practical and understandable way, pointing out, as I did previously, that a great part of the well known, historic Von Braun team is being broken up by the action that has been taken and that a great deal of unemployment has resulted.

Let me quote just one paragraph from the editorial:

One wonders what the reaction would be if a slump of similar scale hit a major industry such as auto or steel. It is difficult to imagine government or public showing so little urgency.

Mr. President, I ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

CUTTING THE SPACE MUSCLE

Chagrin of the space-science community at the latest cut-backs in funds and programs is understandable enough.

The elimination of two more moon landings—down three now, not counting unsuccessful Apollo 13, from the original 10-mission schedule—will mean a savings of some $42 million, but also a rejuggling of lunar exploration priorities and the inevitable canceling of some treasured experiments.

But there are still four landings on the schedule through mid-1972, plus Skylab, the prototype space station in permanent orbit. And even after the congressional cuts, the space budget is still $3.2 billion for the current fiscal year, scarcely a starvation diet when a mounting federal deficit is going no one knows how high.

But there is more than projects and hardware to the space story. Viewed in human terms, the situation should be very disturbing indeed, and not only to the spacemen.

NASA chief Dr. Thomas O. Paine says the cuts mean 700 of his own people will have to go plus some 2,300 employes of the agency's civilian contractors.

No one, apparently, is immune from the ax. At least seven, and possibly more, of the German rocket experts brought to the United States a quarter of a century ago—the famed Wernher von Braun team, the naturalized founding fathers of the American space effort, so to speak—are among those being let out.

In a generally ailing aerospace industry—midsummer employment down more than a quarter of a million from a 1968 high of 1,418,000—the purely space segment stands out as a disaster area.

With NASA now down to about 30,000 and its civilian associates dropping to 142,000, according to Paine's estimate, total space employment has been cut in half. At Cape Kennedy two out of every five jobs are gone. All in a short three years.

This state of affairs is scarcely a secret. The media has kept us well informed of the laid-off engineers operating dairy stands, the mathematicians taking care of the house while wives work. In such individual terms, the situation is disturbing enough. In the mass, this waste of human resources is appalling.

One wonders what the reaction would be if a slump of similar scale hit a major industry such as auto or steel. It is difficult to imagine government or public showing so little urgency.

We have been brilliantly successful in placing men on the moon. We must be able to do better than this in utilizing the brain and muscle power that got them there.

EXECUTIVE SESSION

Mr. SPARKMAN. Mr. President, I ask unanimous consent that the Senate pro-

ceed to consider a nomination on the executive calendar.

The PRESIDING OFFICER (Mr. NELSON). Is there objection to the request of the Senator from Alabama?

There being no objection, the Senate proceeded to the consideration of a nomination on the executive calendar.

NATIONAL CREDIT UNION ADMINISTRATION

The assistant legislative clerk read the nomination of Herman Nickerson, Jr., of Maine, to be Administrator of the National Credit Union Administration.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FANNIN obtained the floor.

CONCLUSION OF MORNING BUSINESS—DIRECT POPULAR ELECTION OF THE PRESIDENT AND THE VICE PRESIDENT

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent, with the consent of the Senator from Arizona, that morning business be closed and that the unfinished business be laid before the Senate without the Senator from Arizona losing his right to the floor.

The PRESIDING OFFICER. Is there objection to the request of the Senator from West Virginia? The Chair hears none, and it is so ordered.

The clerk will state the joint resolution by title.

The assistant legislative clerk read as follows: Calendar No. 1135 (S.J. Res. 1) proposing an amendment to the Constitution of the United States relating to the election of the President and the Vice President.

The Senate resumed the consideration of the joint resolution.

UNANIMOUS-CONSENT REQUEST

Mr. GRIFFIN. Mr. President, I have discussed this matter with the majority leader, the acting majority leader, the distinguished Senator from West Virginia (Mr. BYRD), and others who have an interest one way or the other in the pending amendment which the junior Senator from Michigan offered on Friday with the cosponsorship of the Senator from Maryland (Mr. TYDINGS).

As best we can determine, there is no objection to a vote on that amendment tomorrow at 2 o'clock.

Mr. President, I ask unanimous consent that a vote on the pending amendment be taken tomorrow at 2:30 p.m.

Mr. BYRD of West Virginia. Mr. President, reserving the right to object, and I shall not object, would the Senator agree to amend his request to include 1 hour of controlled time beginning at 1:30 tomorrow afternoon, the time to be equally divided between the able acting minority leader and the Senator from Indiana (Mr. BAYH), the vote to occur at 2:30 tomorrow afternoon?

Mr. GRIFFIN. Mr. President, that is an excellent suggestion and I amend my request accordingly.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Michigan as modified?

Mr. BYRD of West Virginia. Mr. President, would the Chair withhold for just one moment?

Mr. GRIFFIN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. FANNIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FANNIN addressed the Chair.

The PRESIDING OFFICER. The unanimous-consent request is still pending before the Senate. Is there objection?

Mr. BAYH. Mr. President, reserving the right to object, I have a great feeling of camaraderie for the purpose the Senator from Michigan is trying to accomplish. I am very anxious to see his amendment come to a vote. I am hopeful that in the next hour or two we can reach an agreement by which the Senate can set a time certain, not just for the amendment of the Senator from Michigan, but also with respect to other possible amendments and final passage so we can put this matter behind us and move on with other business. I think the Senate should be given the right to vote on this matter.

It is to this end that with great reluctance I feel compelled to object to the unanimous-consent proposal of the Senator from Michigan. Later in the day, however, I may make the same proposal or a similar proposal, or be prepared to agree to a similar proposal.

The PRESIDING OFFICER. Objection is heard.

Mr. FANNIN. Mr. President, some of those beating the drums for the direct popular election amendment have pointed out that the matter has been discussed for decades.

In an editorial arguing for the direct election amendment, the Washington Evening Star pointed out:

> The proposal in fact has been examined and debated in the most pervasive depth by the foremost authorities during the past few years, time and again.

Yes, it is true that the idea of the direct popular election amendment is nothing new.

But the fact that the idea has been around for a long time is hardly any recommendation for it.

Indeed, I would like to point out that constitutional experts throughout the years of discussion have found numerous pitfalls in the proposal. That is why it has not been adopted before; that is why we should not endorse it now.

We have heard all these problems discussed here.

The amendment would encourage splinter parties and could destroy the two-party system.

The amendment would necessitate national control of every aspect of the electoral process.

There would be an irresistible temptation to electoral fraud.

We are trying to avoid any election crisis, but what would happen in an extremely close vote count where there might be calls for a national recount. There could be chaos.

All of these are valid arguments against the amendment.

But I am more concerned about what the amendment could do to the Federal system of government. This amendment would simply be another step in breaking down the State as a unit of our Government, at a time when we are trying to restore States to the rightful place in the American system.

Our Founding Fathers established the electoral college as an integral part of our federal system. Certainly there have been changes in the electoral college—and there should be more. But to abolish the concept entirely would be a change in the basic fiber of our Nation and a slap at the integrity of the States.

That is why I back the district plan. It would guarantee that each State would have two electoral votes which would go to the Presidential candidate winning the popular election within the State. Then, the winning candidate within each congressional district would get one more vote.

This would do away with the current "winner-take-all" system by which the presidential candidate polling the most votes within a State gets all that State's electoral votes. It also would bind the electoral votes to the candidate winning them.

From a practical standpoint, I do not see any likelihood a direct popular election amendment would ever be ratified by the necessary three quarters of the State legislatures even if it should make it through Congress.

Thirty-four States would lose influence in presidential elections if the direct amendment were ratified. Why should their legislatures approve such a proposal.

In my own State of Arizona, there would be a 29-percent loss of influence. Under the electoral college system, the State has reasonably close to 1 percent of the vote that chooses the President—the exact figure is 0.93 percent. But if the direct popular election concept were in force 2 years ago, Arizona would have had only two-thirds of 1 percent of a voice in this election.

This loss of influence in choosing the President would be accompanied inevitably by a decline in representation at the national conventions where candidates are selected and platforms written.

The amendment also would bring fundamental changes in campaigning. Presidential candidates would concen-

trate on the eastern corridor and the populous industrialized cities, ignoring the more sparsely settled areas.

It might be expected that Federal programs also would neglect the smaller States because they would have little political clout in choosing the executive branch.

Which brings us right back to one of the issues debated by framers of our Constitution nearly two centuries ago. I think we should maintain the concepts of that Constitution, even though we may have to make some simple technical adjustments in it occasionally.

NO GREATER FRAUD INCENTIVE UNDER DIRECT ELECTION

Mr. COOK. Mr. President, one of the seven points raised against direct election in the minority report and stressed by Senator HRUSKA recently on the floor is the question of vote fraud and other irregularities. Relying heavily on Theodore White and Alex Bickel and Ernest Brown, the minority argued that direct popular election would "create an irresistible temptation to electoral fraud." The reason for this, according to Bickel, is that under direct election every popular vote would count. From this point, he goes on to ask, with a great lack of logic:

If everything depended on the total popular vote, would we not likely face in each close election . . . re-examination of every ballot box and voting machine in the country, not to mention also the records of registration and qualifications of voters?

The minority also argues, moreover, that the present electoral system minimizes the risks of vote fraud and other irregularities. They have reached this conclusion on the basis of White's testimony that the present system discourages fraud because it "seals off" and "compartmentalizes" voting irregularities within each State.

On the basis of the same set of factual data, I think it is very easy to suggest that the exact opposite is likely to be the case; namely, that direct popular election would tend to discourage fraud. And, I might add, for the very same reason that the minority claims will cause it to proliferate. The present system actually places a premium on the kind of voting irregularities that most often occur—the casting of fraudulent ballots—because this type of activity can exist only where it is either, first, far removed from the public's eye; second, is condoned by the public; third, is sanctioned by the opposing political party. By "compartmentalizing" fraud, the present system creates these very conditions.

There is, in addition, an even more fundamental point and that concerns the incentive to fraud in the first place. Again, by "compartmentalizing" fraud, the present system offers a healthy reward because a relatively small number of fraudulent popular votes can swing a large block of electoral votes. In short, under the present system, fraudulent popular votes are likely to have a greater impact than a like number of fraudulent popular votes under direct election.

Under direct popular election, if fraud were to occur it would affect only the actual number of fraudulent popular votes cast. It could not, as under the present system, produce a distorted statewide electoral result. Instead, by commingling those fraudulent popular votes in a nationwide total of more than 75 million their impact will have greatly diminished. The net effect of direct popular election, therefore, is to minimize the effect of voting irregularity by diluting its impact through the nationwide popular vote count—in contrast to the present system, where its impact is magnified precisely because it is "sealed off" within a State.

Once again, I want to make the point as strongly as I am able: Fraud is encouraged or discouraged by its likely impact. The incentive is the result and, second, the ease with which it can be brought off. The present system provides that incentive; that is, a State's electoral vote and also the conditions under which it can flourish, that is, lack of public scrutiny, or one-partyism.

The following is a mathematical comparison of the impact of fraud under the present system as compared to the effect the same number of fraudulent votes would have under direct election. In California in 1960, a change of only 25,000 popular votes would have changed the statewide result and tipped 40 electoral votes from one column to another. Let us assume it was possible to have cast 25,000 fraudulent votes in California in 1960. Would those 25,000 votes have had a greater impact under the present system or direct election?

By tipping California's 40 electoral votes, as would have occurred under the present system, 25,000 fraudulent votes would have decisively affected 7 percent of the electoral vote total. Under direct popular election, in contrast, 25,000 fraudulent votes would have been diluted in a nationwide popular vote total of about 65 million votes—an effect on the outcome of 0.000385 percent. Thus, the difference in impact is nearly 200 times greater under the present system.

Again, I think the point that must be emphasized and reemphasized is that fraud is more likely to take place where the impact of such fraud is magnified—and as we have just seen, the impact of fraud is magnified under the present system.

Furthermore, in terms of impact, it is absolute nonsense to argue that by sealing off fraud within a State it will have no meaning for the national outcome. Remember, this is not a gubernatorial election but a Presidential election within a State and if a Statewide result is fraudulently procured, then it means in the national counting of State electoral votes some fraudulent State results will be tabulated. That, in short, means it could affect the national electoral count. To argue that a "sealed off" fraudulent State result will have no impact on the choice of a President is just not accurate. If the election is close it very well might affect the result—just as a few popular votes fraudulently secured under direct election might affect the outcome in a very close race.

That leads me to another point: The Statewide results that might be influenced by fraud are likely to require less effort than would be needed to influence a nationwide count. For example, the popular vote difference between Nixon and Humphrey in 1968 was about 500,000 but the number of popular votes fraudulently procured that would have been necessary to turn the electoral result around was only 41,000 under the present system.

The Theodore White argument, so ardently embraced by the senior Senator from Nebraska, it is interesting to note, really fails to come to grips with the question of how to prevent fraud. In essence, what Mr. White and Senator HRUSKA are saying is that we ought to stick with the present electoral system because the fraud it engenders is a known commodity. Thus, White could say:

Under the present electoral system . . . crooks in such areas are limited to toying with the electoral vote of one State only; and then only when margins are exceptionally tight, even then, when the dial riggers, ballot stuffers, late counters and recounters are stimulated to play election night poker with the results, their art is balanced by crooks of the other party playing the same game.

It is incredible to me that both the Senator from Nebraska and Theodore White would have put themselves in a position of defending this kind of system.

Furthermore, Mr. White has neglected to point out that the kind of fraud and voting irregularities he so vividly depicts has been occurring in those places that are controlled by one party. And fraud will continue in those places because under the present electoral system there is no incentive for the other party to watch the polls.

Professor Freund has said, in response to the charge that direct popular election would increase the incentive to fraud because in a close election every vote would count, that

If this prognosis were true, it would underscore the virtue of the popular vote. Surely, it is a poor way of dealing with potential fraud to discourage it by detracting from the value of honest votes in the electoral count.

What Freund has argued, and I agree, is that under direct election—precisely because every vote will count—we will have better policing by the parties themselves and possibly even better electoral counting and procedural safeguards. Thus, he contends:

If direct popular election serves as a stimulus to more expeditious and trustworthy procedures for casting and counting ballots and settling contests, it will have produced a welcome by-product in the electoral process.

According to White himself, it should be pointed out:

Over most of the United States votes are cast and counted honestly. No one anymore can steal an election that is not close to begin with, and in the past generation vote fraud has diminished dramatically.

One of the reasons it has "diminished dramatically," it is safe to suggest is that the increase in the total number of votes cast has tended to diminish the impact of fraud and as the two-party system has spread the number of votes cast has risen—and this is precisely what direct election would do.

One final look at White: To say that because a popular vote cast in one State will count the same as a vote cast in another State "The pressure to cheat or call recounts must penetrate everywhere" is a conclusion that does not follow logically from the facts. The fact is that under a nationwide popular vote the extent of the fraud necessary to change an outcome would have to be so massive, cut across so many State lines, permeate nor-

mally honest counting units, and require so many crooks, that such a concerted effort to steal an election could not withstand public scrutiny. What White is saying, in effect, is that if we had direct election overnight we would become a nation of ballotstuffers.

As Richard Scammon has said, "Fraud is more tied to the mores of the community" than to any other factor. In conclusion, there is simply no reason to anticipate that there will be an increased incentive to commit fraud under direct election.

Just this past Friday, President Nixon reiterated his support for direct election in a message to Congress. He sounded a note of urgency as he said:

No one subject more profoundly involves the issue of popular sovereignty than the method of electing the president. For almost two centuries the system of the electoral college has somehow worked, albeit just barely at times, and at other times even doubtfully. Every four years the American democracy places a large, unacceptable, and unnecessary wager that it will work one more time, that somehow an institution that never in any event functioned the way the framers of the constitution anticipated, will somehow confer the presidency on that candidate who obtains the largest number of votes. The electoral college need not do so. Indeed on occasion it has not done so. But far more importantly—whatever the popular vote—it need not confer the presidency on any candidate, if none has a majority of the electoral vote.

Our ability to change this system in time for the 1972 elections is a touchstone of the impulse to reform in America today. It will be the measure of our ability to avert calamity by anticipating it.

As I stated in my October 1969 message, I originally favored other methods of reforming the electoral college system, but the passage by the House of a direct popular election plan indicated that this thoroughly acceptable reform could be achieved, and I accordingly supported it. Unfortunately, the Senate has not completed action. Time is running out. But it is still possible to pass the measure and to amend the Constitution in time for the 1972 elections.

Mr. President, illustrative of the arguments of opponents of direct election was an article by syndicated columnist Kevin Phillips, published in the Washington Post of September 11, 1970. In part he says:

To illustrate the southern and western loss of power, consider that in 1968 (per the 1960 census), Connecticut, Oklahoma, and South Carolina each enjoyed 8 electoral votes, but in terms of popular vote, Connecticut sent 1.26 million to the polls in 1968, Oklahoma 943,000, and South Carolina only 667,000.

It should be apparent to any fair-minded Senator that the argument here is that some States should continue to have disproportionate power in the selection of the President regardless of population. This, Mr. President, is precisely what electoral reform in the form of direct election is all about—to let each vote of each citizen count equally. The President of the United States is the President of the people, not of the States, and each of these people should be allowed to participate in his election under a system of election which guarantees equal weight to each vote.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Sept. 11, 1970]

ELECTORAL COLLEGE POLITICS

(By Kevin P. Phillips)

The Senate has begun debate on an amendment to the U.S. Constitution that would abolish the Electoral College method of choosing a President in favor of direct, nationwide popular election.

Two-thirds support will be necessary to push this change through the Senate, and a close fight is expected. The balance of power is generally thought to rest with an undecided bloc of Farm Belt Republicans (Dole, Pearson, Young, and Miller), small-state Northeastern Republicans (Prouty, Cotton, Boggs, and Williams), Southern Democrats (Spong, Byrd, Fulbright, Hollings and Long) and Rocky Mountain Democrats (Cannon, McGee, Moss, and Anderson).

Such indecision is surprising because the amendment in question, pushed by the Senate's leading liberals, would operate to reduce the national political muscle of the more conservative South, Farm Belt, Rocky Mountains, and other lightly populated states. The detriment to these areas can be measured in three ways: (1) diminished local power in President elections; (2) reduced representation and influence in both parties; and (3) decreased local orientation of national party platforms and administration.

To illustrate the Southern and Western loss of power, consider that in 1968 (per the 1960 census), Connecticut, Oklahoma, and South Carolina each enjoyed 8 electoral votes, but in terms of popular vote, Connecticut sent 1.26 million to the polls in 1968, Oklahoma 943,000, and South Carolina only 667,000.

Secondly, the change to direct election would greatly affect the regional distribution of power within the two parties, especially at presidential conventions.

Delegates are now apportioned to states on the basis of Electoral College strength, with bonuses for partisan performance. Abolition of the Electoral College would presumably shift delegate apportionment to a system based either on total vote cast in the prior election or total vote cast for the party's nominee.

In the Democratic Party, such a change, which may come regardless as "reform," would greatly weaken moderate-to-conservative influence. The South, Plains, and Rocky Mountains had 30 percent of the 1968 delegates, but cast only 20 per cent of Humphrey's vote, whereas the liberal big-city states of Massachusetts, New York, Pennsylvania, Michigan, California, and Ohio had only 28 per cent of the delegates but cast 43 per cent of Humphrey's November ballots.

A delegate reapportionment of this magnitude would put the Democratic Party in the hands of left-liberals whose stance would injure party candidates in the South, Border, Plains, and Rocky Mountains. (Direct election would also promote this liberal bias by dispelling Democratic electoral vote concern with eking out three-way pluralities in Texas, say, or Missouri or Georgia.)

If electoral reform shifts the Democrats to the left, pushing conservatives and Wallaceites into the GOP, the Republicans would probably remain conservative-oriented. However, if Electoral College abandonment were to cause GOP delegates to be apportioned by votes cast for the last party Presidential candidate, this would sharply reduce the convention power of the low turnout and now bonus-weighted South, Plains, and Rocky Mountains.

Under present ideological circumstances, now that American politics is no longer divided by the Civil War, the Electoral College favors a Republican coalition based in the South, Midwest, West, and small states. GOP Senators from these areas would be foolish to abandon a system that has a built-in bias toward such a coalition in favor of one which, at best, sacrifices these regional advantages.

For these reasons, Southern, Farm Belt, Rocky Mountain, and other small states have good reason to oppose abolition of the Electoral College, and if such a constitutional amendment passes the Senate, it will probably not be ratified by the states.

Mr. THURMOND. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR TRANSACTION OF FURTHER ROUTINE MORNING BUSINESS

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the unfinished business be temporarily laid aside to permit further transaction of routine morning business, with statements limited to 3 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

RESOURCE RECOVERY ACT OF 1970

Mr. BYRD of West Virginia. Mr. President, at the request of the Senator from West Virginia (Mr. RANDOLPH) I ask the Chair to lay before the Senate a message from the House of Representatives on H.R. 11833.

The PRESIDING OFFICER (Mr. NELSON) laid before the Senate a message from the House of Representatives announcing its disagreement to the amendment of the Senate to the bill (H.R. 11833) to amend the Solid Waste Disposal Act in order to provide financial assistance for the construction of solid waste disposal facilities, to improve research programs pursuant to such Act, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. BYRD of West Virginia. I move that the Senate insist upon its amendment and agree to the request of the House for a conference on the disagreeing votes of the two Houses thereon, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. RANDOLPH, Mr. MUSKIE, Mr. EAGLETON, Mr. BOGGS, and Mr. BAKER conferees on the part of the Senate.

ORDER FOR ADJOURNMENT TO TOMORROW AT 9:30 A.M.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in adjournment until 9:30 o'clock tomorrow morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR FULBRIGHT TOMORROW

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that on tomorrow, after the disposition of the reading of the Journal and following the disposition of any unobjected to items on the legislative calendar, the able Senator from Arkansas (Mr. FULBRIGHT) be recognized for not to exceed 30 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR TRANSACTION OF ROUTINE MORNING BUSINESS TOMORROW

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that following the remarks of the able Senator from Arkansas (Mr. FULBRIGHT) on tomorrow, there be a period for the transaction of routine morning business, with statements therein limited to 3 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ADJOURNMENT FROM TUESDAY TO WEDNESDAY, SEPTEMBER 16, 1970, AT 10 A.M.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that, at the conclusion of business tomorrow, Tuesday, the Senate stand in adjournment until 10 a.m. on Wednesday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ADJOURNMENT FROM WEDNESDAY TO THURSDAY, SEPTEMBER 17, 1970, AT 10 A.M.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that at the conclusion of business on Wednesday next, the Senate stand in adjournment until 10 a.m. on Thursday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ADJOURNMENT FROM THURSDAY TO FRIDAY, SEPTEMBER 18, 1970, AT 10 A.M.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that when the Senate completes its business on Thursday next, it stand in adjournment until 10 o'clock Friday morning next.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ADJOURNMENT FROM FRIDAY TO MONDAY, SEPTEMBER 21, 1970, AT 10 A.M.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that when the Senate completes its business on Friday next, it stand in adjournment until the following Monday at 10 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the morning business be closed and that the Senate resume the consideration of the unfinished business.

The PRESIDING OFFICER. Without objection, it is so ordered.

DIRECT POPULAR ELECTION OF THE PRESIDENT AND THE VICE PRESIDENT

The Senate resumed the consideration of the joint resolution (S.J. Res. 1) proposing an amendment to the Constitution of the United States relating to the election of the President and the Vice President.

THE TYDINGS-GRIFFIN AMENDMENT

Mr. TYDINGS. Mr. President. I rise in support of Senate Joint Resolution 1, which provides for the direct election of the President. I am asking the Senate today to consider an amendment to the direct election plan which would replace the runoff provisions. Unless we modify Senate Joint Resolution 1 with the pending Tydings-Griffin amendment, I fear that we will be encouraging the growth of one-issue and extremist political parties and perhaps accelerating the fragmentation of our political structure. I also believe that the direct election amendment will not pass the Senate by the necessary two-thirds majority or receive ratification by enough States without this short but important change.

Many supporters as well as critics of Senate Joint Resolution 1 have admitted that the runoff provisions are the weakest and most controversial part of the proposed constitutional amendment. Senator GRIFFIN and I hope to strengthen the amendment by replacing this weak link. If this is done, I think the understandable fears of some of our colleagues will be assuaged enough so that we can have their support.

THE ELECTORAL COLLEGE

The electoral college was created as a compromise between those who feared the voice of the people and those who were vigorously pushing for more democratic forms of government in our emerging Nation. It was born at a time when political parties did not exist and were not anticipated. Also the Presidency was envisioned as an office so much weaker than it is at present as to be almost a different conception of an executive branch.

Since that time nearly two centuries ago the Presidency has become the central office in our Nation. The President's direct constituency is the entire population, not merely an aggregation of States. Communication, commerce, military power, and a myriad of other factors have made the Presidency an office of immense power, the responsibility of which now derives directly from the people of the United States.

As the power and the functioning of the Presidency became more national and directly related to our citizenry, democratic institutions permeated our society. The increasing franchise, direct election of Senators, political parties—all of these were dramatic evidence of a change in the democratic expectations of our Nation. Our idea of democratic government has been matured and refined; it is more sensitive and sweeping.

These two developments—a new kind of Presidency and a new standard of democracy—demand that we revise our presidential election machinery. It is time for the direct election of the President because our present situation and standards demand it. This is not some idealistic scheme drawn to reform and revive society by a wishful few. Rather it is merely the institutionalization of changes that have already taken place over the past 50 or 100 years. Our own beliefs and standards compel this change—the logic of the office of the Presidency as it now stands allows no other reasoned solution.

Many say that since it has worked well, leave the electoral college alone. But it has not worked well. In recent years its cumbersome and archaic machinery have threatened constitutional crisis and election chaos. Divisive political movements have gathered much of their strength not from the beliefs of their followers, but from the potential of invoking electoral procedures that are so illogical and unworkable that our entire election process could be overwhelmed.

But I think that there is another fundamental problem with the electoral college: Its legitimacy is weakening. People have begun to question its logic and structure. Why elect a President that way? Why should a second-place candidate win? Why should electors be allowed to ignore the clearly stated will of the voters in any State because of personal whim? These questions are being asked by so many. And the answers are inadequate. Tradition alone is not a sufficient reply.

Tradition that grows from enduring principles and that rests upon institutions that reflect and enforce those principles should be treasured and maintained. And because those underlying principles and values are still held and because it can be demonstrated that institutions uphold those beliefs, such traditions can be and are maintainable even in our swiftly moving society.

But when traditions merely reflect an unthinking repetition of past behavior, when they embody principles long since changed, and when they rest upon hollow institutions, then they are, and should be, swept away. The strength of our society is its preservation of deep values and its evolution of outmoded and archaic traditions.

Because the electoral college reflects a different conception of the Presidency and an older standard of democracy, it

no longer preserves enduring values. It does not provide the one acceptable criterion for the selection of our national leader: A majority vote.

Besides these fundamental problems—a constitutional crisis due to a third-party candidacy and diminishing legitimacy—the operation of the electoral college itself is inherently unjust:

The faithless elector problem is simply without justification in a democratic society.

Voting by States, without regard to voter turnout, inherently gives unequal power to individual voters. This ignores the one-man, one-vote principle which is now fundamental in our democratic society.

The unit rule in States gives an artificial distortion to electoral college majorities: it wastes the votes of State minorities even if they are substantially greater than majorities in many other States; and it leads to the atrophy of the two-party system in many areas of the Nation.

DIRECT ELECTION

For all of these reasons I am a strong supporter of Senate Joint Resolution 1. I am a cosponsor and voted for this amendment in the Subcommittee on Constitutional Amendments and in the full Judiciary Committee. I want to commend the Senator from Indiana for his brilliant leadership of this difficult fight for reform.

Direct election has no cumbersome machinery. It rests upon the simple logic and legitimacy of majority rule. All voters are counted equally. No one has a wasted vote, no matter where he resides.

As I said earlier, however, I believe Senate Joint Resolution 1, as presently proposed, contains a serious weakness that should be corrected.

Senate Joint Resolution 1 as it is before us now does not eliminate the electoral college's most glaring and threatening weakness—the possibility of crisis due to a third-party candidacy. Under the electoral college, third-party candidates are generally discouraged from running for the Presidency because of the unit rule; unless a splinter party leader can receive a majority of votes in a State, he will not receive any electoral college votes. This unit rule has thus successfully discouraged ideological third parties. Regional candidates, also, are presented with significant barriers, although these barriers are only of national scope. At the regional level, candidates such as Governor Wallace can attract State majorities and break into the electoral college; yet, chances of obtaining an ultimate majority in the electoral college from such a base remain slim. The prospect of eventual failure serves to channel votes away from this type of candidate to "second choice" candidates because it becomes clear to the average third-party voter that his vote will be "wasted" if he votes for his first preference.

Yet, in spite of the existing institutional barriers to third parties, the prospect of continued third and fourth-party and even fifth-party candidacies continues. This is a function of the "spoiler" role that a third-party candidate can play. Under our electoral college, a third-party candidate has no effect upon the election outcome unless he can deny an electoral college majority to the election winners. Because of the peculiarities of the electoral college, this is a possibility for sectional candidates. The possibility of triggering the unknown and awkward procedures of selecting the President in the House of Representatives is enough of a threat to any regular candidate's chance of victory and to the legitimacy of the entire election process that the third-party candidate has extraordinary bargaining leverage. A refusal to deal with the outsider can mean defeat and/or crisis for the regular party candidates and the certainty of more wholesale political bargaining in the House.

Thus under our present electoral college system, the mechanism of resorting to a House election, when the electoral college fails to produce a majority, is enough of an incentive to create meaningful third-party challenges and the threat of a constitutional crisis, in spite of the inhibiting unit rule of the States.

The provisions of Senate Joint Resolution 1, although otherwise laudatory, create the same problem of an incentive for third-party candidacies. In this case the trigger device is the 40-percent plurality required for direct election. A candidate outside the two regular parties need only approach 20 percent of the popular vote in order to reach a strong bargaining position. This incentive would apply to ideological as well as to regional candidates because there is no unit rule under the direct election proposal. The 20-percent figure becomes very much in reach of splinter parties when more than one outsider is running. The prospect of two splinter-party candidates, one regional and one ideological, amassing 20 percent of the vote amongst them, is quite realistic in the near future of American politics.

Under the direct election plan, the opportunity for crude political bargaining and threats are as available as under the electoral college. In both, an outsider can offer to withdraw immediately preceding the election and attempt to swing his followers toward a would-be victor in return for a significant political concession. While the haunting threat of a debacle in the House of Representatives does not offer itself under Senate Joint Resolution 1, the maneuvering and dealing in a runoff race between the two surviving candidates would certainly be intense as they desperately wooed the disappointed followers of the third-party or fourth-party candidates. If experience under the French electoral system is any guide, the runoff makes the first election a test of bargaining strength, leads to a further ideological hardening, and creates an atmosphere of shameless deals preceeding the runoff. Given the fact that this kind of bargaining would take place under conditions of division and disappointment—it would be used only if no candidate has amassed 40 percent of the vote—cynical political moves might in themselves lead to a crisis of respect and legitimacy in the selection of the President.

It would appear that this incentive to use the 40-percent trigger and runoff is just as great as is the present temptation to deny an electoral college majority and go to the House of Representatives to bargain. However, under Senate Joint Resolution 1, the initial restraint of the States' unit rule system is absent. Thus, the direct election amendment will increase the attractiveness of third-party presidential candidacies. If present political trends continue, Senate Joint Resolution 1 might well bring a constitutional crisis closer to reality.

Presidential election systems do not cause splinter parties, they merely encourage or discourage them. It is the underlying problems and conflicts in our society which create new parties and political movements. As our Nation continues to feel the effects of both major domestic and foreign crises, it will no doubt experience greater pressure for splinter party groups. This is a function of the deep divisions in our society that have finally emerged and burst into the political arena.

In part, this trend of political fragmentation reflects the increase in ideological and rigid political doctrines that threaten to drive the traditional American pragmatism and compromise into the past. No doubt the general politicalization of issues in our society draws into the political fray fringe groups that previously suffered silently or remained dormant without hope of change. Perhaps the widespread frustration and malaise in the Nation plus a feeling of inability to influence the events that shape our destiny drives concerned groups into strong political movements. Certainly there is little hope in the next few decades that the major schisms and problems that confront our Nation will vanish in thin air; it is more likely that our political parties will be the ones to vanish—at least, as we know them now.

For many, substantial weakening of the two-party system would be a serious, if not a crippling, blow to the functioning of the America political process. A stable dual party structure serves many vital tasks of our democracy. Two strong parties are essential to maintain the competition for office among leaders that provides the honesty and innovation in American politics. Two stable parties provide the continuity of program needed to accomplish major changes in a relatively slow moving political process. Most important, with only two parties, there is a need to create a real majority or large plurality for electoral victory. This fact requires that each party provide a political program that attracts a broad spectrum of voters.

Thus, in a two-party system, the parties are forced to create programs that satisfy a broad range of groups and interests. In the United States, the two major political parties have become the central institutions for moderating and resolving conflicts in our society. Our national conventions, fault-ridden as they may be, and party machinery serve to mitigate and lessen the divisions of the Nation. Without these institutions, the whole burden of resolving conflict would be thrust into the legislature. Under a multiparty system, dogmatic ide-

ology would flourish and compromise would disappear. Executive leadership would be difficult because there would be no institution to aggregate enough political support to form a majority President. If the example of modern European parliamentary systems is of any relevance, multiparty government means bitter conflict and frequently governmental immobility.

Of course, ours is a society that is in desperate need of change and innovation of its policies and its institutions. Many believe that the two-party system and barriers to third parties have impeded these needed reforms. However, historical precedent seems convincing that reform, if it is to be successful, is best directed by a major party. Only the major parties offer the strength of broad support and the structure of continuity that is a prerequisite for meaningful change. This is not to say, however, that the parties do not require major internal reform and that we should not move within our parties ourselves.

It is difficult to gather the support of large and differing groups in any party for significant change; but this is the cost of governing by consent rather than decree. The only other alternative in such a diverse society as ours is political fragmentation. And fragmentation without coercion would be stagnation.

In short—at least, it is the judgment of this U.S. Senator—our political system desperately needs all its institutions that moderate conflict and provide for the means to change that do not stress division. The enactment of Senate Joint Resolution 1 would alter the presidential elections to encourage third parties and undermine one of the key institutions of conflict resolution and change in our system. We should change our electoral system, but in a way that avoids crisis and supports our two-party system.

Of course, our system of Presidential elections is not the only institutional structure that maintains our two-party structure. Political tradition, single member districts, lack of majority requirements for election all contribute. But the party structure on the Presidential level has a profound impact upon the entire political structure.

The brief appearance of the split in the Democratic Party on the issue of the Vietnam war, when crystallized on the presidential level with rival campaign organizations, has left major institutional schisms 2 years after that election. This is the effect of a bitter primary fight. If a peace candidate had gone on to the general election, surely the break would be greater. This effect can be seen on the other side of the spectrum: The continued existence of a party that institutionalizes dissent on the racial issue has deep effects upon our most fundamental policies. It is by no means clear that the resolution of the racial issue can be handled within our party structure. And I am certain that any resolution that occurs from competing one-issue, ideological splinter parties on this issue will be a more costly and tragic one for our Nation.

I fear that those who rest confident in the stability of our two-party system critically underestimate the power of separate splinter-party structures on the presidential level, especially in these explosive times. I would think that the major stresses of our times would lead to a search for more structures to resolve conflict within our system and without ideological overlay. But here we have a laudable reform that massively reduces the protections we have against splinter one-issue and extremist parties.

TYDINGS-GRIFFIN AMENDMENT

It was because of these concerns that I began thinking of modifying the runoff provisions of Senate Joint Resolution 1 as early as last fall. I had the opportunity at that time to talk at length with some of the academic and legal scholars who have contributed so much to this debate. I found that almost all of them agreed with me that the runoff provisions of the direct election plan presented the prospect of increased party fragmentation.

Some of these scholars were so worried about the problem that they have supported alternatives to direct elections. However, they all felt that the amendment that Senator GRIFFIN and I are offering today is a vast improvement. Professor Bickel of Yale and Professor Brown of Havard particularly found this approach a very substantial improvement over Senate Joint Resolution 1.

The amendment we are offering replaces only the runoff provisions of the direct election plan. I ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

S.J. RES. 1

In the committee substitute, beginning with line 1, page 5, strike out all to and including line 7, page 5, and insert in lieu thereof the following:

"SEC. 3. The persons joined as candidates for President and Vice President having the greatest number of votes shall be declared elected President and Vice President, if such number be at least 40 per centum of the total number of votes certified. If none of the persons joined as candidates for President and Vice President shall have at least 40 per centum of the total number of votes certified, but the persons joined as candidates for President and Vice President having the greatest number of votes cast in the election received the greatest number of the votes cast in each of several States which in combination are entitled to a number of Senators and Representatives in the Congress constituting a majority of the whole number of Members of both Houses of the Congress, such persons shall be declared elected President and Vice President. For the purposes of the preceding sentence, the District of Columbia shall be considered to be a State, and to be entitled to a number of Senators and Representatives in the Congress equal to the number to which it would be entitled if it were a State, but in no event more than the number to which the least populous State is entitled.

"If, after any such election, none of the persons joined as candidates for President and Vice President can be declared to be elected pursuant to the preceding paragraph, the Congress shall assemble in special session, in such manner as the Congress shall prescribe by law, on the first Monday of December of the year in which the election occurred. The Congress so assembled in special session shall be composed of those persons who are qualified to serve as Members of the Senate and the House of Representatives for the regular session beginning in the year next following the year in which the election occurred. In that special session the Senate and the House of Representatives so constituted sitting in joint session shall choose immediately, from the two pairs of persons joined as candidates for President and Vice President who received the highest numbers of votes cast in the election, one such pair by ballot. For that purpose a quorum shall consist of three-fourths of the whole number of Senators and Representatives. The vote of each Member of each House shall be publicly announced and recorded. The pair of persons joined as candidates for President and Vice President receiving the greatest number of votes shall be declared elected President and Vice President. Immediately after such declaration, the special session shall be adjourned sine die.

"No business other than the choosing of a President and a Vice President shall be transacted in any special session in which the Congress is assembled under this section. A regular session of the Congress shall be adjourned during the period of any such special session, but may be continued after the adjournment of such special session until the beginning of the next regular session of the Congress. The assembly of the Congress in special session under this section shall not affect the term of office for which a Member of the Congress theretofore has been elected or appointed, and this section shall not impair the powers of any Member of the Congress with respect to any matter other than proceedings conducted in special session under this section."

On page 3, line 16, immediately after the period, insert the following new sentence: "No such election shall be held later than the first Tuesday after the first Monday in November, and the results thereof shall be declared no later than the third Tuesday after the first Monday in November of the year in which the election occurs.".

Mr. TYDINGS. I note that this is a slightly changed version of the same amendment which Senator GRIFFIN and I submitted earlier in the Senate, No. 711, and as is reproduced in our separate views in the Judiciary Committee report on Senate Joint Resolution 1.

Under the Tydings-Griffin amendment, the direct election system would continue unmodified in 99 percent of all presidential elections, since it is a historical rarity for the winning Presidential candidate to receive less than 40 percent of the popular vote.

In the rare case when no one received 40 percent of the popular vote, our amendment would first turn to the time honored electoral college system, the one which everyone knows and understands. If the front runner receives a majority of votes in States which can have a majority of electoral votes, he becomes President. In no case can the second place candidate in the popular vote win the Presidency. The reasons for this option are clear: If no one garners 40 percent of the popular vote, there will be no majority President. The question is one of selecting a minority President who has widespread support in a manner that has respect and legitimacy. The electoral system has such legitimacy, and it is a means of demonstrating great support in our States, which are important political units in our system.

Some have pointed out that any use of the discredited electoral college system would raise questions of legitimacy. This does not seem to follow under analysis.

First, there is no possibility of either a faithless elector or the wholesale bargaining in the House—which would vote by State amongst all the candidates—two of the major objections to the present electoral college system.

Second, the electoral college, in spite of its faults, retains a tremendous amount of political legitimacy. Its use as an emergency provision would not seem to draw too deeply on the reservoir of legitimacy now available.

Third, this contingency would be employed rarely; and if it were used, it would be under conditions of division and dissent which would raise questions of legitimacy under any contingency proposal. Under either the amended or unamended Senate Joint Resolution 1, the contingency provisions only operate if the leading candidate has less than 40 percent of the vote. Thus, large groups in the society will already have registered dissatisfaction with both regular parties.

Under a runoff, these splinter party voters are forced to vote for second choices or register their protest by abstentions. Further, the political bargaining inherent in this situation will add to the mood of dissatisfaction and discontent. It must be conceded that this route of choosing a candidate who is the first choice of only a minority of voters will raise at least as much dissatisfaction with the method of selection as the Tydings-Griffin proposed alternative.

Fourth, only the popular vote winner could be elected under this modified electoral system. Of course, it may also be asked what are the chances of a popular vote winner who gets less than 40 percent of the vote obtaining a majority of the electoral vote. If we examine the 26 presidential elections between 1868 and 1968, we find that the winning candidate received on the average of 52 percent of the popular vote and 71 percent of the electoral vote.

During the same period, eight Presidents were minority Presidents—that is, they were elected with less than 50 percent of the popular vote. In three of these elections where some type of major third-party challenge occurred, the average percent of the electoral vote received by the winner was 67 percent, while in the other five contests where no third-party candidate received any electoral vote the average percent of the electoral vote obtained by the winner was 55 percent.

According to these statistics, the results of past elections would indicate two things: The popular vote winner is usually blessed with a fairly comfortable electoral vote cushion and third-party challenges have frequently widened the margin of electoral victory by drawing votes away from one of the two major candidates. The clearest example of this was the 1912 election where Theodore Roosevelt's Bull Moose Party split the Republicans and enabled Woodrow Wilson to be elected with 82 percent of the electoral vote but only 42 percent of the popular vote. Furthermore, in the 1860 election, the only election where the winner got less than 40 percent of the popular vote, Abraham Lincoln was elected with 39.9 percent of the popular vote but garnered 59 percent of the electoral vote. This 20-percent margin is consistent with the average margin between the popular vote—52 percent—and the electoral vote—71 percent—during the 100 years between 1868 and 1969.

Thus, the electoral type alternative is a realistic way of selecting a candidate who has widespread support even though he has not received 40 percent of the popular vote.

If the leading candidates failed to receive 40 percent of the popular votes and failed to receive a majority of the electoral college, it would be clear that popular election mechanism is not enough, in itself, to select a minority President. For this reason, the Tydings-Griffin amendment would then turn to a special Joint Session of the newly elected Congress to select a President from the two front runners in the popular vote. Each Congressman would have one vote. No third- or fourth-place candidate would be eligible to become President.

The new Congress, reflecting the most recent manifestation of the popular will, would choose amongst the two leading minority presidential candidates. The winner would have to receive the majority support of the representative branch of government. The winner would be assured of having the support of Congress.

Again, this provides a means of selecting a minority President with widespread support and by a legitimate institution.

The whole point of the change is that the Tydings-Griffin contingency, unlike the run-off in Senate Joint Resolution 1, discourages its own use. Its success will be its preventative effect. Under this plan, no third-party candidate, ideological or sectional, has a chance of winning the presidential election, unless he can amass an electoral college majority and be front runner or unless he could receive a majority of votes in the new Congress. There is no incentive for the two front-runners to bargain with minor party candidates. The incentives for third-parties under this amendment to Senate Joint Resolution 1 will be similar to those of an ideological party under our present system; there is little encouragement to run unless a third-party candidate can attract more votes than the two leading parties and an electoral college majority or if the third-party candidate can take second place in the popular vote to be eligible for election by the Joint Session of Congress. If third-party candidates come close to attracting 20 percent of the vote, the two leading candidates would merely switch to an election strategy aimed at an electoral college majority—the same strategy used today. This allows a genuine, national third-party movement such as the Bull Moose Party to succeed, but discourages small sectional and ideological parties.

Thus, under the Tydings-Griffin amendment, the loss of the unit rule in the States as a barrier to splinter parties is replaced with another support of the two-party system without the undesirable effects of the winner-take-all method except in rare cases.

The whole issue of the run-off against our plan revolves around the question of selecting a minority President. Neither of these alternatives will be used unless there is such division in our Nation that no candidate can approach majority support. In this situation, we should seek a mechanism that will select a minority President who has enough widespread support so he can govern effectively. Such a selection mechanism should be legitimate in the eyes of our people. And such a mechanism should discourage its own use, thus bolstering a stable two-party system. I believe that only the Tydings-Griffin plan fulfills all three of these requirements.

I believe that in this instance, political reality and intrinsic merit are joined. The adoption of this slight modification of Senate Joint Resolution 1 has great importance to our political stability. It also may very well mean the difference between victory or defeat for the entire direct election plan. Both here in the Senate, and in the State legislatures, concern over the run-off and party proliferation is great. This concern, added to other doubts over direct election, can easily add up to failure.

So I urge the Senate to adopt this amendment—for the sake of the stability of our political system and for the sake of the ultimate success of Senate Joint Resolution 1.

Mr. ALLEN. Mr. President, will the Senator from Maryland yield?

Mr. TYDINGS. I yield.

Mr. ALLEN. As I understand the amendment, provision is made for possibly three steps in choosing the winning candidates for President and Vice President, the first step being that if the leading candidates receive as many as 40 percent of the popular votes, then they would be declared elected. That is the first step. Then, if no two candidates running as a team win as many as 40 percent of the popular vote, resort is had to step two, which in effect is the automatic electoral college system. Under this provision the winning candidates must carry sufficient States that have a majority of Senators and Representatives and then, if no two candidates running for President and Vice President are elected by step two, we would go to step three, which would be a joint session of the Congress, a special session in December, where each Representative and Senator would have one vote and would choose from the top two candidates. Is that correct?

Mr. TYDINGS. That is correct.

Mr. ALLEN. It does eliminate the runoff provided by Senate Joint Resolution 1?

Mr. TYDINGS. That is right.

Mr. ALLEN. It would be a combination of several of the various plans. I read with a great deal of interest the scathing attacks the Senator from Maryland and the Senator from Michigan made on the runoff proposal provided by Senate Joint Resolution 1 and also the fact that the runoff would result in a fragmentation of political parties. The Senator from Maryland makes such a strong case against the runoff, and such a strong case in pointing out the proliferation of splinter parties that would result from the procedure set forth in Senate Joint

Resolution 1, I would hope that if the Senator's amendment is not adopted, that he would then see fit to vote against Senate Joint Resolution 1 in the unlikely event it comes to a vote.

Mr. TYDINGS. Mr. President, I can understand the Senator's wish. However, I cannot encourage him in that premise.

I am very concerned about the runoff. I am concerned over the runoff in Senate Joint Resolution 1 for the same reasons I am concerned with the probability that a third party, a sectional party, could throw the Presidency into the House of Representatives today.

I think it is not a salutary or strengthening feature of our democratic system. However, I do feel it is absolutely vital that we have a direct election for the Presidency of the United States. I only have doubts about one part of the direct election plan—the runoff. As I stated at length in my remarks, I strongly support the rest of the proposed constitutional amendment.

Mr. President, I would hope that we would be able to agree to the amendment which the Senator from Michigan and I have worked out.

We had some support for the amendment within the Judiciary Committee itself. The Senator from Indiana (Mr. BAYH), however, elected to support his own proposal without modification and to bring it up on the floor of the Senate for debate.

It is my hope that the Senator from Indiana will reappraise the situation and see that additional support could be secured by his accepting the amendment of the Senator from Michigan and myself and thus strengthen the original direct election proposal.

Mr. ALLEN. Mr. President, the distinguished Senator is of the opinion, though, that under the runoff provision in Senate Joint Resolution 1, there is a greater danger of the proliferation of splinter parties and the fragmentation of our two-party system than under the present system.

Mr. TYDINGS. Mr. President, I think there is at least as great a danger and perhaps more. As stated in my original views, I consider that one of the weaknesses of the present electoral system is the possibility of a constitutional crisis arising by virtue of throwing the presidential election into the House of Representatives.

I also consider this a weakness of the proposal of the Senator from Indiana. Of course, the proposal of the Senator from Indiana provides for the direct election of the President which, I think, is a much needed institutional reform. It remedies many of the other weaknesses of the present electoral college.

Mr. ALLEN. Mr. President, under the present system, is it not necessary that a third party or a splinter party, in order to have any effect on the election, carry the electoral vote of at least one State?

Mr. TYDINGS. The Senator is correct.

Mr. ALLEN. And that discourages the incidence of splinter parties.

Mr. TYDINGS. That does discourage the ideological splinter party, but not necessarily the sectional splinter party.

Of course, my concern today is that we preserve the two-party system in this country. Whenever we have a time of division and crisis, I think that the more of the division and conflict we can absorb and work out within our party system without leaving the Congress as the only mediating institution, the better the country will be.

Mr. President, considering some of the bitterness that has existed within parties, including my own party, I think that it is better to have the bitter fights take place within the convention or party rather than to have them brought out in a parliamentary body and institutionalized as interparty conflicts as is seen in some of the European countries.

Mr. ALLEN. Mr. President, under the runoff provision provided by Senate Joint Resolution 1, which is not included in the Senator's amendment, with the knowledge on the part of the electorate that in all probability there would be a runoff, does that not encourage the electorate to vote possibly more with its heart than with its head, and that they can vote for the man they think will be the successful candidate or the man they think might possibly make a better President. Knowing there would be a runoff, they might vote for a splinter party that comes closer to their thinking on an ideological basis.

Mr. TYDINGS. Mr. President, let me say that I again agree with the feeling of the Senator from Alabama that the runoff is a weakness.

Mr. ALLEN. Mr. President, I feel that it is such a weakness that I will vote against Senate Joint Resolution 1. I would hope that the Senator from Maryland would do likewise.

Mr. TYDINGS. Mr. President, would the Senator from Alabama vote for Senate Joint Resolution 1 if the Griffin-Tydings amendment were agreed to?

Mr. ALLEN. No. I would say, that if one or the other were going to become part of the basic law of the land, I would prefer the procedure provided by the amendment of the distinguished Senator from Maryland. However, I would prefer the present system, the district system, the proportional system, or the automatic system to the system proposed by the distinguished Senator from Maryland.

I prefer the amendment of the distinguished Senator from Maryland only in preference to Senate Joint Resolution 1, which provides for a runoff. I would prefer it to that extent.

The PRESIDING OFFICER. What is the pleasure of the Senate?

Mr. CHURCH. Mr. President——

The PRESIDING OFFICER. The Senator from Idaho is recognized.

IT IS TIME THE PEOPLE ELECTED THE PRESIDENT

Mr. CHURCH. Mr. President, as the senior Senator of a sparsely populated State, I intend to examine the pending constitutional amendment in terms of its political impact on Idaho.

Coming from a small State, I am well aware of the argument of those who maintain that popular election of the President would deprive the less populous States of the relative mathematical advantage they presently possess in the electoral college. They contend, for example, that Alaskan voters, with three electoral votes, now wield more power than New Yorkers, with 43, because a much smaller number of Alaskans control the casting of each of their electoral votes than is the case in New York.

This is a classic example of how mathematical ratios can distort political reality. For the fact is that the emergence of political parties, which destroyed the original function intended for the presidential elector, also destroyed such advantage as the mathematical ratio of the State's electors to its population—in number equal to each State's sum of Senators and Representatives in Congress—might otherwise have given the smaller States in the electoral college.

With the advent of political parties, it became the practice for the States to cast all their electoral votes for the candidate who carried the largest number of popular votes in the State, regardless of the size of his margin. This "unit rule system" governs to the present day. It has completely undermined the apparent mathematical advantage of small States in the electoral college. Indeed, populous States, such as New York and California, obtain greater importance than they should, since carrying them—even by the smallest margin—delivers their entire electoral vote to the prevailing candidate. Consequently, these large States have come to exercise a disproportionate influence over our public policy.

At the present time, it takes 270 electors to compose a majority of the electoral college. That number of electors can be secured by carrying as few as a dozen of the largest States. It has, therefore, become the practice of our political parties to lavish their attention upon the most populous States in their quest for an electoral majority.

So it is that the present electoral college actually gives the preponderant advantage to the big States. The importance of carrying them, if only by a handful of votes, in order to secure their entire electoral vote, is mandatory. Consequently, the big States have come to dominate our national conventions, unduly influence our party platforms, and exercise an inordinate power over the selection of our national candidates.

On the other hand, if the President were elected by direct popular vote, such States as New York, California, Pennsylvania, and Illinois would not loom so large in the national political picture. A presidential candidate could lose them all by several hundred thousand votes and easily make up the difference in the intermountain West. Carrying the big States would no longer be so essential, thus giving the smaller States a better break in the politics of the Nation.

But the issue before us transcends States rights; it reaches the cardinal principle of popular sovereignty itself. Seldom are we in the Senate afforded an opportunity to respond to so clear an expression of "the will of the people" as in the case of the electoral reform which we are now considering. A recent Harris poll showed 79 percent of the

American people favoring the direct election of the President. A Gallup poll indicated the support of 81 percent of our people for the same plan. Expressed in its simplest terms, eight out of every 10 Americans favor the election of the President by direct popular vote. It is obvious that a mandate for change confronts us—a mandate so clear that to ignore it would be to deny our role as representatives of the people.

The reason for the strong public sentiment favoring electoral reform stems from the uncertainties engendered by the closeness of recent presidential elections, in which the people have witnessed the near possibility of a candidate winning the Presidency by capturing a majority of the electoral votes while his principal opponent garners the largest number of popular votes. Never in recent times has this anomaly been brought so close to home as in the election of 1968.

As the American people watched on their television screens through the night of November 5, 1968, and into the morning of November 6, the possibility of one candidate receiving the most votes of the people, while another gained the White House, came near to becoming reality.

It had happened before. In 1876, Samuel J. Tilden received a majority of 250,000 votes over his opponent and yet was denied the Presidency which fell into the hands of Rutherford B. Hayes by one electoral vote. It happened again in 1888, when Grover Cleveland received 100,000 more popular votes than did Benjamin Harrison and yet by an electoral vote of 233 to 168, Harrison became President.

The fact that a man not receiving the largest number of popular votes can nevertheless be elected President is, in itself, enough to justify electoral reform. It is a contradiction of the sovereign right of the people to govern themselves.

But 1968 did not only expose again the dire defect in our electoral process which allows one man to claim the popular vote and another the Presidency. It also made clear that, under the present system, there exists no guarantee that electors who have held themselves out to the people as supporting a given presidential candidate will, in fact, vote for the candidate to whom they pledged their support. As Congress itself interprets the Constitution, a free agency still exists; an elector, if he chooses, may cast his vote for a different party's candidate.

In 1968, we saw it happen. When Dr. Lloyd Bailey, an elector from the State of North Carolina, cast his vote in favor of third party candidate George Wallace, even though he was pledged to support President Nixon, who had carried his State in the November election, he became one of five electors in our Nation's history to disregard the wishes of the people who selected him. This latest case of a "faithless elector" should give us pause, particularly when we contemplate the potential for mischief in a closely divided electoral college. The very fact that such things can and do happen under the present system further underlines the need for reform.

The popular election amendment now before the Senate meets these problems head on. By placing the power to elect the President directly in the hands of the people, where it belongs, we would never again need fear the election of a President who lacks even the approval of a plurality of the people. By elimination of the free agency of intervening electors, we abolish the possibility, in a close contest, that our people may be actually disfranchised by the capricious action of faithless men.

Mr. ALLEN. Mr. President, will the Senator yield?

Mr. CHURCH. I am happy to yield.

Mr. ALLEN. I would like to ask the distinguished Senator if the point he is making now, the point of the "faithless elector," could not be handled by the automatic plan which, for some time, I believe, was espoused by the distinguished Senator from Indiana (Mr. BAYH).

Mr. CHURCH. Yes, I think it could. I have been trying to point out a series of defects in the present system. I think the direct election proposal addresses itself to all these defects and corrects them all. But obviously it would be possible to amend the Constitution to eliminate the "faithless elector" without otherwise modifying the electoral college.

Mr. ALLEN. That is called the automatic plan; is that correct?

Mr. CHURCH. The Senator is correct.

Mr. ALLEN. And it has been recommended by Mr. Katzenbach, the former Attorney General of the United States, and it has had a great deal of support in the Senate, I believe.

Mr. CHURCH. Well, if it were the only choice available, I would prefer the automatic plan to the present system; but other defects in the present system would also be corrected by the proposed amendment. For that reason, I am supporting the direct popular election amendment.

Mr. ALLEN. I thank the Senator for yielding.

Mr. CHURCH. Mr. President, moreover, the proposed amendment is in harmony with the historic trend toward broadening the role of the people in their Government. We have moved, since the time of our creation as a nation, from a system in which only the propertied few had the right to vote to a time when universal suffrage is the rule. This is only proper in a country blessed by the best educated and politically sophisticated electorate on earth. Surely, we have reached that stage when the people can be wholly entrusted with the power to directly elect their President and Vice President.

It was not so very long ago, in terms of history, that the 17th amendment became part of our Constitution. That amendment, as we all know, provided for the direct popular election of U.S. Senators. The arguments raised against its adoption were strikingly similar to the ones we hear now being voiced against the current amendment. Nevertheless, since that time, the Senate has not changed its essential character.

It remains the bastion of the States as it was intended to be. It stands not less, but greater in stature, because its legitimacy rests upon the direct vote of the people of the 50 States. If it is best for a Senator to be directly elected by the people of his State, then it must follow that it is best for the President to be directly elected by the people of the Nation.

Under the direct popular vote amendment, all of our people would be given the same treatment. Different weights would no longer attach to the votes cast by the citizens of one State, as compared to those of another; no State would command special influence or advantage; each voter would stand equal with every other.

As the President of the United States represents all Americans, let us take the action that will allow all Americans equally to choose the President.

The PRESIDING OFFICER. What is the pleasure of the Senate?

Mr. BAYH. Mr. President, will the Senator yield?

Mr. CHURCH. I am happy to yield to the Senator from Indiana.

Mr. BAYH. It is not a surpise to the junior Senator from Indiana to hear the perceptive discussion of the problem by his friend and distinguished colleague from Idaho. As one who has been laboring with this problem for a number of years, I would personally like to express for the record my deep appreciation for the advice and counsel and cooperation of the Senator from Idaho in this joint effort. I think the Senator from Idaho very eloquently stressed the important points of the problem before us.

I hope the Senator will yield for a question or two. One of the matters of greatest concern to the Senator from Indiana deals with some of the questions being asked in the country today. These questions indicate a considerable lessening of faith, or at least a lessening of the ardor of the quality of faith, in some of the basic tenets of our system. The Senator from Indiana feels we are living in a great country and our responsibility is not to sit idly by and ignore some of the shortcomings which, if overcome, would make the Nation a greater place in which to live.

Does the Senator from Idaho share the concern of the Senator from Indiana over what would happen in this country, or indeed how the credibility of the President would be affected, if we were to see, in 1972, or 1976, or 1988, an election like the 1948 election? Then we saw an election in which, if there had been a change of less than 33,000 votes in the right three States, the man who won under the electoral college system, President Truman, would have been denied the victory, and victory would have been given to his opponent, Governor Dewey. This would have happened even though 2 more million people had supported the loser than had supported the winner under the electoral college system.

Does the Senator have any concern about the ability of a President to govern under such circumstances?

Mr. CHURCH. I do indeed. I think, in the aftermath of such an election, the

people of the country would experience a sense of shock and dismay, realizing that a President who had received a lesser number of popular votes occupied the White House while the man for whom the largest number of people had voted had been denied the office. This would reach to the very wellspring of strength from which democratic government draws its nourishment: its legitimacy.

We often overlook the fact that the strength democratic government possesses stems from it source of legitimacy. People honor democratic government because they exercise the sovereign choice. It is, after all, a government that the people themselves choose.

If ever an election should end up, as it might under the present system, with more people voting for the loser than voting for the winner, we would have, for the first time in this century, a President who could not claim to be the legitimate choice of the people. Nothing could be more disabling to the President than that.

We must remember that our system of government does not rest, as earlier systems did, upon divine right. The kings ruled for many, many centuries in Europe upon a very different theory—the theory that by right of birth, they were entitled to reign.

The whole democratic concept overturned the legitimacy of kings, and substituted in its place the legitimacy of popular sovereignty. The people were made sovereign. The people would choose and having chosen, the government was thus able to rest its claim to rule on the strongest possible foundation of popular acceptance and popular approval.

If that kind of legitimacy were frustrated by the electoral college, you would of course, disable the Presidency. You would greatly weaken the position of the President, who could not exercise power upon the basis of the mandate given him by a majority of the people.

Mr. BAYH. I appreciate the Senator's further explanation on this point. I think it is fair to say that the Senator from Idaho joins the Senator from Indiana in saying that one of the basic tenets of any electoral reform is that the man who wins should be the man who has the most support among the people. For that reason we share common bond in support of direct popular vote, which is the only plan that supplies that guarantee.

Mr. CHURCH. The Senator is correct. He has taken the leadership by endeavoring to remove from the Constitution, by way of amendment, the last anachronism that could prove an obstacle to popular sovereignty. Though the Constitution commences with the words "We the People," and though the preamble makes clear that the people are regarded as the ultimate source of sovereign power, nevertheless, there were originally placed in the Constitution a number of hurdles which separated the people from the actual choice of their leaders.

For example, under the original Constitution, Senators were chosen by the State legislatures instead of by direct vote of the people. Indeed, even though the people were to choose their Congressmen, the franchise was actually exercised only by a small number of voters, those who owned property, those who held positions of substance in their communities.

In the course of our history, we have witnessed a steady trend toward fuller realization of the ideal of popular sovereignty. We have seen it in the removal of many barriers that restricted the right to vote to the propertied few. We have seen it when the right to vote was extended to women. We have seen it when the system for selecting Senators changed, with the adoption of the 17th amendment, to direct election by the people.

So, step by step, we have moved toward the implementation of popular sovereignty. The remaining hurdle, it seems to me, is the one presented by the electoral college.

If the Senator's amendment is adopted by the Senate and then ratified by the legislatures of three-quarters of the States, we will have finally achieved full-fledged democracy in this country.

Mr. BAYH. I appreciate the Senator's remarks. We have had a great deal of discussion on the floor of the Senate, and also by some very well intentioned and learned writers and scholars, to the effect that the direct popular election proposal would subject us to a great amount of fraud.

I pass over the problem of unaccounted votes at the precinct level because I think it an insignificant problem. But, speaking of fraud, does the Senator from Idaho think there could possibly be a bigger fraud perpetrated on the people of this country than to have elevated to the Presidency a man who really lost?

Mr. CHURCH. As I have said, I think that the impact of such an eventuality—we came very close to it in 1968 and in other recent elections as well—would be very disabling on the Office of the Presidency. People would feel they had been defrauded, because they generally believe they elect the President. It is the opinion of the average citizen that the American people elect the President and Vice President of the United States. It is natural that people should so believe, since we have been lucky enough thus far in this century to have had the candidate who received the electoral majority also receive the popular majority. But there is nothing in the Constitution to guarantee this result, and if an election should come out differently, people throughout the country would suddenly awaken to the fact that they have not been permitted to place in office the man for whom the majority had voted. They would not only feel disappointed, but they would feel dismay, and a great many would feel they have been defrauded.

Mr. BAYH. Would the Senator permit me to pursue another area of this whole problem with him a bit further?

Mr. CHURCH. Surely.

Mr. BAYH. One of the major thrusts or concerns of the opposition has been the concern that this might penalize the less populated States. I know the Senator from Idaho, as a Senator from one of those less populated States, has expressed his opinion to the contrary, as has our distinguished colleague, the junior Senator from Oklahoma.

Does the Senator really believe there is any reason for the citizens of Idaho, New Mexico, or Oklahoma to feel that they are going to be penalized? Or, on a broader scale, is there any reason why we ought to have a system which gives to any one group of voters a larger voice in determining who their President is going to be?

Mr. CHURCH. No. As I have said, I think this question transcends States rights. This question reaches the fundamental rights of the people. I would find it hard to defend a system which gives greater weight to an American citizen's vote in Nevada, let us say, than in Maryland. This would be difficult to justify on any principle of democratic government of which I am aware. But the truth is that the present system actually does not work in favor of the small States. The argument itself is fallacious.

Mr. BAYH. Will the Senator yield just briefly? To be a bit more specific, on page 19 and continuing on page 20 of the committee hearings, there is a table introduced by our distinguished colleague from Nebraska (Mr. HRUSKA), which contains a great deal of discussion and mathematics about the impact of direct election on the voting strength of midland, southwestern, and Southern States. This document goes on to say that 34 States and the District of Columbia would lose political power. Idaho is one of those States listed.

Mr. CHURCH. Yes, but the Senator from Idaho believes that, under a direct popular election of the President, States like Idaho would gain power, not lose power. Under the present system, the small States operate at a distinct disadvantage. The table to which the Senator refers presents no more than a purely mathematical calculation.

It is true, on the basis of this kind of calculation, that it can be demonstrated that the voters in a small State have a theoretical advantage over the voters in a large State. Fewer Alaskans are required to vote each of the three electoral votes of Alaska than New Yorkers in casting each of New York's 43 electoral votes. Therefore, it is argued that, mathematically, Alaskan voters have greater weight than New York voters, and that the present system, therefore, works in favor of the smaller States.

Theoretically, such an argument can be made. But in the world of practical politics, it is the reverse that turns out to be the case. Ever since political parties were established and the unit rule adopted, it has been the practice for all the electoral votes of a given State to be cast in favor of the presidential candidate who wins the popular vote of that State. Even though he wins it by a dozen popular votes, or by a single vote, all of the electoral votes are cast for the winning candidate.

The effect of this is perfectly clear. It did not take long for political parties to figure out that, in order to win a national election, it was mandatory to secure the

support of the big States. A candidate can be elected President on the strength of the electoral votes cast by the 12 largest States.

Therefore, these States have inordinately large importance in a national election. Anyone who has regularly attended national conventions of either political party, as the Senator from Indiana well knows, comes to appreciate the tremendous influence exercised by the big States; the extent to which they dominate the various convention committees; the degree to which they control the drafting of the platform, and the extent to which they govern the choice of the party's candidate for President.

The reason is obvious. Both parties recognize that the big States must be carried, regardless of what happens in the other States. The big States must be carried because their electoral votes, bestowed in massive blocks, must be secured, if the party's candidate is to win.

Let us suppose that, in place of this system, we were to adopt a direct popular election of the President. How different the whole political climate at the national conventions would become. With a direct popular election, a candidate could lose New York, Pennsylvania, Illinois, and California. He could lose them by half a million votes, and still make up the difference in the sparsely populated intermountain West. So the importance of carrying the big States would no longer weigh so heavily in the consideration of our political parties.

Therefore, Mr. President, I believe the amendment before us would restore to the small State its proper position in the scheme of things, and it would take from the large State the inordinate amount of political power that such States actually exercise today by virtue of the unit rule in the electoral college.

Mr. BAYH. I appreciate the Senator's compelling argument as to why he, as a Senator from a less populous State, could in good conscience support such a plan.

After hearing the prepared speech and extemporaneous remarks of the Senator from Idaho, the Senator from Indiana feels that the Senator from Idaho might feel very much as the Senator from Indiana felt during the closing days of our hearings, when he heard the last two witnesses of the last day. One, a very eminently qualified man, suggested that the small States had an advantage; and the very next man, equally qualified, suggested that the large States had an advantage. The Senator from Indiana wondered why any State, any voter, should have an advantage. Everybody ought to be given an equal opportunity to determine his President, and the Senator from Idaho, of course, has stressed this most eloquently.

Mr. CHURCH. I certainly agree wholeheartedly. We ought not perpetuate a system that gives any advantage to one set of voters as against another. The smaller States, when the matter is measured in purely mathematical terms; though, when measured in practical political terms, it actually favors the large State over the small. Nevertheless, a system that places the election of the President in the hands of the people at large would give equal weight to the votes cast by all voters, which conforms with the democratic ideal.

If anyone has any doubts about how the present system tends to favor the large State over the small, just let him review the itineraries of our presidential candidates in recent elections and observe the extent to which their time and attention were given over to the large States of the country. That is proof enough of how the men who are actually running view the process, and fully corroborates what I have said about how the present system militates in favor of the large States of the country.

So, Mr. President, as one Member of the Senate representing a State of small population, I am happy to give my full endorsement and support to the pending constitutional amendment.

Mr. ALLEN. Mr. President, will the Senator yield?

Mr. CHURCH. I yield.

Mr. ALLEN. The Senator has told us how he feels about Senate Joint Resolution 1. I believe that the pending question, however, is on agreeing to the amendment offered by the Senators from Michigan and Maryland. Would the Senator be good enough to state his position on the pending question?

Mr. CHURCH. Yes; my reference was, of course, to Senate Joint Resolution 1, which I support. My present intention is to vote against the amendment offered by the Senators from Michigan and Maryland.

Mr. ALLEN. I was also interested in the colloquy between the distinguished Senator from Idaho and the distinguished Senator from Indiana, pointing out that a successful candidate for President who may possibly have carried a majority of the electoral votes while being somewhat behind the defeated candidate in popular votes might suffer some credibility deterioration or depreciation on account of the failure to carry the popular vote. Yet, it is noted that under Senate Joint Resolution 1, a candidate can be elected by carrying as few as 40 percent of the popular vote, which would not seem to be a great deal of a mandate from the people—if he carried only 40 percent. Why not make it 50 percent and really get a mandate from the people?

Mr. CHURCH. The amendment merely takes into account the problem presented by third-party candidates. It attempts to draw a reasonable line where any candidate having 40 percent or more of the vote, having that large a plurality in a three-way contest, could take office without suffering serious disability. I think the 40-percent line is reasonable. I also favor the solution contained in the amendment, in the event that no candidate receives as much as 40 percent of the vote, because it would assure that in any runoff, the winning candidate would command a majority.

Mr. ALLEN. The distinguished Senator from Idaho has expressed himself as being apprehensive that the people's second choice in the presidential race might become President. Yet, does not the runoff provision give the people's second choice a very good possibility of becoming President?

I have just jotted down some suggested percentages. The distinguished Senator from Indiana spoke about what would have happened if a certain number of votes were shifted in this State and that State and the other. Let us assume that in a four-way race for the Presidency, the top candidate received 39 percent of the vote, thereby guaranteeing a runoff; the next candidate received 21 percent; the next candidate received 20.5 percent; and the fourth candidate received 19.5 percent—adding up to 100 percent. Would it not be possible for this 21-percent candidate, by making trades with the other two losers to become President of the United States in the runoff, even though when the people were casting their first choice votes he received only 21 percent of the popular vote of the country? Would that not be possible, and would not the people thereby be choosing their second choice for the Presidency?

Mr. CHURCH. I remind the Senator that the final choice would be made by the people between the two candidates in any runoff election, and that the winning candidate would have to receive a majority of the votes. This is a practice, as the Senator well knows, that we often follow in State primary elections, in order to reduce a field of candidates to two opponents in a runoff. The people are well aware of this procedure. It is a democratic one. In the end, the two candidates receiving the highest number of votes run against one another in a final election, and the outcome of that election is determined by a majority.

Mr. ALLEN. By the way, when would that runoff election be held?

Mr. CHURCH. This is a matter that could be readily worked out by statutory implementation of the amendment.

Mr. ALLEN. It is not part of the amendment?

Mr. CHURCH. It would be a function of Congress to implement the amendment with appropriate legislation.

Mr. ALLEN. The 40-percent figure suggested for the winning candidate would certainly indicate, especially since Mr. Humphrey and Mr. Nixon each got 43 percent or so in 1968—and this amendment is said to be designed to prevent a repetition of what might have happened in 1968—that it must be the belief of the sponsors of the amendment that the amendment will result in a proliferation of third parties; or the figure would not have been placed so low. Does the Senator anticipate, if Senate Joint Resolution 1 becomes part of the basic law of the land, that a number of splinter parties would run candidates for the presidency?

Mr. CHURCH. No; I do not think that would happen. I am inclined to believe that the present system encourages third-party candidacies. This figured publicly into the considerations which led Governor Wallace to run for the Presidency in 1968. He often commented on the fact that a third-party candidate, even one with little chance of winning the election outright, could nonetheless win sufficiently support to deny an electoral majority to either major candidate, thus throwing the final outcome of the election into the House of Representatives where, as the Senator knows, under

the present Constitution, each State, regardless of its size or population, would cast one vote. So I would say to the Senator that, based upon the public record, it is the present system that tends to encourage third-party candidates.

Mr. ALLEN. Does the Senator not realize that for a third-party candidate to have any effect or to be counted in the electoral college, he must receive the vote of at least one State, whereas in a direct election if he receives only 100,000 votes throughout the country, still it would be used as part of the overall figures in the election, and he would still be a part of computing what it took to make a majority. That is not true as a third party carrying no States at all under the present system. Would that not make the Senator feel that the present system discourages third parties rather than proliferating them?

Mr. CHURCH. I would say, with all respect to the Senator's argument, that weighing it in on one side of the scale, and weighing in the effect of the present electoral system on the other, I believe the present system has the heavier tendency to encourage third-party candidates.

Mr. ALLEN. I should like to point out to the distinguished Senator that, under the present system, where a runoff would be if not certain, then very likely, would that not encourage the proliferation of third parties, because the electorate would be able to vote for the ideological third party of their choice, or the regional third party of their choice, in the first election, knowing full well that they would have an opportunity in the runoff to vote for one of the two major parties they wished to support, and would that not tend to encourage third or splinter parties?

Mr. CHURCH. Well, I can only repeat what I have said before to the Senator. I think there would be a lesser tendency toward third parties in a direct popular election of the President than under the electoral college system, for the reason that if a third-party candidate can secure enough electoral votes to throw the election itself into the House of Representatives, then that candidate, and those who support him, would achieve tremendous bargaining power since election in the House of Representatives is not weighted by population. Each State, large or small, casts a single vote, and thus the political struggle within the House would be subject to easier manipulation than any situation that might be presented under a direct-vote system. I conclude, for this reason, that greater inducement is given to third-party candidates under the existing electoral-college method of choosing a President than would be the case if the choice were left to the direct vote of the people.

Mr. ALLEN. He would have to carry one full State, though, to be effective in the electoral college; is that not correct?

Mr. CHURCH. That is correct.

Mr. ALLEN. Whereas in the direct popular vote, any number that he got would be sufficient. These third parties that might be formed under the direct system, would they be national third parties, would they file with some bureau in Washington to become candidates for the Presidency—how would that be worked out? I think that the people would like to know these things when this amendment is submitted back to them for ratification.

Mr. CHURCH. The traditional methods for establishing political parties are not set aside by this amendment. They stay the same. In other words, they would be governed by State law. Third party candidacies would materialize and the names of third party candidates would be placed on the ballot, as is now the case.

Mr. ALLEN. The Senator realizes that the amendment gives Congress the right to prescribe uniform laws and regulations and procedures, and that Congress could pass a provision for a national board to conduct a national election, the whole country being only one precinct under the terms of Senate Joint Resolution 1.

Mr. CHURCH. I think that Congress can be entrusted with the responsibility of implementing the amendment in a reasonable way. After all, we are fully conscious of the political process in the country, and I doubt very much that Congress would intrude upon that process any further than absolutely necessary to secure the objectives of the amendment. Therefore, I am not concerned, as the Senator may be, that Congress would overreach itself in enacting legislation that would have any great disruptive effect in the various States.

Mr. ALLEN. I thank the distinguished Senator for the information he has given me on this subject.

Mr. CHURCH. I thank the Senator from Alabama for his questions.

Mr. ALLEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. CASE). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE AGRICULTURAL ACT OF 1970—UNANIMOUS-CONSENT AGREEMENT

Mr. BYRD of West Virginia. Mr. President, later this afternoon the unfinished business will be laid aside, under the previous order, and the farm bill will be laid before the Senate. This will be done somewhere in the area of 4:30 o'clock between that time and 5.

After discussions with the able minority and majority leaders and the manager of the bill, Mr. ELLENDER, and with the Senator from Vermont (Mr. AIKEN), the Senator from North Dakota (Mr. YOUNG), and the Senator from Delaware (Mr. WILLIAMS), I make the following unanimous-consent request anent the farm bill, H.R. 18546: That time on each amendment be limited to one-half hour, the time to be equally divided between the mover of the amendment and the manager of the bill, with the exception of the Smith-Williams amendment dealing with limitation on price-support payments, the time on that amendment to be limited to 1 hour and a half, the time to be equally divided between the authors of that amendment and the manager of the bill, and also with the exception of the Montoya amendment.

I am unable to state at this time any suggestion for time on the Montoya amendment. I would except that one for now and proceed with the unanimous-consent request to include 1 hour on the bill, the time to be equally divided between the manager of the bill, the Senator from Louisiana (Mr. ELLENDER), and the minority leader or his designee, with the further understanding that the time on the bill would not begin running until tomorrow when action is resumed on the farm bill in the evening session.

I think that about sums it up.

The PRESIDING OFFICER. The time on the Montoya amendment is not specified?

Mr. BYRD of West Virginia. The time on the Montoya amendment would be excepted at this point. The time on all other amendments, with the exception of the Smith-Williams amendment, would be limited to one-half hour, to be equally divided, but the time on the amendment to be offered by the Senators from Illinois (Mr. SMITH) and Delaware (Mr. WILLIAMS), respectively, would be limited to 1 hour and a half, the time to be equally divided.

The PRESIDING OFFICER. Is there objection?

Mr. BAYH. Mr. President, reserving the right to object, I would like to address a brief parliamentary inquiry. Does the Senator from Indiana correctly understand that the request made by our distinguished colleague from West Virginia puts a time curtain on each amendment, and on the bill itself, with the exception of the Montoya amendment?

The PRESIDING OFFICER. That is correct.

Mr. BAYH. Further reserving the right to object, Mr. President, the pending order of business is electoral reform, as all of us know. The Senator from Indiana and several others have been working on this particular measure for a number of years. It has been a subject of discussion in the Congressional Halls since the beginning of this session.

The Senator from Indiana, who is normally a reasonably tolerant Member of this body, who does not normally resort to some of the parliamentary rights available to each Senator, has nevertheless witnessed those rights used. I certainly do not criticize any Senator for using those rights, but I recognize that, if one Senator uses certain rights to the detriment of a bill, or to oppose that bill, then on occasion it is necessary for those who would otherwise disdain to use those rights, to work a counterbalance in order to let the Senate work its will.

Having seen at least one Member of this body delay for months the measure which is now before the Senate and to deny committee action on it, the Senator from Indiana would like to respectfully suggest that he does not intend to avail himself of the right to object to what he thinks is a very proper request by our acting leader, the distinguished Senator from West Virginia. But I think the Sen-

ate should be put on notice that those of us who feel there should be some basic reform in our electoral process might have to use a little fire to fight fire, if indeed a few individual Senators are going to take advantage of their parliamentary rights. Vote it up or down, but the Senator from Indiana feels it is the right of the Senate to speak on this measure before this session is over.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield, reserving the right to object?

Mr. BYRD of West Virginia. I yield.

Mr. WILLIAMS of Delaware. I join the Senator from Indiana in urging the Senate to go about its business, and I suggest the best way to do it is to sit down and stop talking and start voting this afternoon. I have nothing to say on it.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request? The Chair hears none, and the order is entered.

Mr. BYRD of West Virginia subsequently said: Mr. President, I ask unanimous consent that the time on the amendment to be offered by the Senator from New Mexico (Mr. MONTOYA) to the farm bill be limited to 3 hours, the time to be equally divided between the author of the amendment (Mr. MONTOYA) and the manager of the bill (Mr. ELLENDER).

The PRESIDING OFFICER. Without objection, it is so ordered.

The unanimous-consent agreement was subsequently reduced to writing, as follows:

Ordered, That during the further consideration of H.R. 18546, an act to establish improved programs for the benefit of producers and consumers of dairy products, wool, wheat, feed grains, cotton, and other commodities, to extend the Agricultural Trade Development and Assistance Act of 1954, as amended, and for other purposes, debate on any amendment (except an amendment to be offered by the Senator from Illinois, Mr. Smith and the Senator from Delaware, Mr. Williams, which will be limited to 1½ hours, and an amendment by the Senator from New Mexico, Mr. Montoya which will be limited to 3 hours), motion, or appeal, except a motion to lay on the table, shall be limited to ½ hour, to be equally divided and controlled by the mover of any such amendment or motion and the manager of the bill, Mr. Ellender.

Ordered further, That on the question of final passage of the said bill, controlled debate (which shall be effective beginning tomorrow, Tuesday, September 15), shall be limited to 1 hour, to be equally divided and controlled, respectively, by Mr. Ellender and the minority leader or his designee.

Provided, That the manager of the bill and the minority leader, or either of them, may, from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any amendment, motion, or appeal.

Mr. BYRD of West Virginia. Mr. President, I thank the Senator from Indiana and all other Senators who participated and cooperated in reaching this agreement.

Mr. BAYH. Mr. President, in response to the usually wise remarks of our distinguished colleague from Delaware, the Senator from Indiana would like to suggest that some time in the next few minutes he would like to pursue, after consultation with a few Senators present and some who are not present. We have these interrogatories still out as far as long-distance calls from a couple of our brothers who are unfortunately not able to be with us for personal reasons are concerned; but I would like to propose a unanimous-consent request to do just what the Senator suggests. I wish that it were feasible to deal with a unanimous-consent request such as he specifically mentioned; namely, to start to vote today.

After touching a few bases, the Senator from Indiana is persuaded that that would be the right thing to do, but it is not within the realm of possibility. However, I hope we can pursue one or two requests that might enable us at least to start voting early this week.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield further?

Mr. BAYH. I yield.

Mr. WILLIAMS of Delaware. Do I correctly understand that when the acting majority leader decides to move to the farm bill, there will be a live quorum call to notify Senators of that fact?

Mr. BYRD of West Virginia. Mr. President, with that suggestion in mind, I think attachés should get word out to Senators on both sides of the aisle that there will be a live quorum today when the Senate proceeds to the consideration of the farm bill, at approximately 4:30 p.m.

RECESS

Mr. BYRD of West Virginia. Mr. President, I move that the Senate stand in recess subject to the call of the Chair, with the understanding that the recess not extend beyond 3 p.m. today.

The motion was agreed to; and at 2:40 p.m., the Senate took a recess subject to the call of the Chair.

The Senate reassembled at 2:50 p.m. when called to order by the Presiding Officer (Mr. CASE).

MESSAGE FROM THE HOUSE— ENROLLED BILL SIGNED

A message from the House of Representatives, by Mr. Berry, one of its reading clerks, announced that the Speaker had affixed his signature to the enrolled bill (H.R. 16968) to increase the contribution by the Federal Government to the cost of health benefits insurance, and for other purposes, and it was signed by the Acting President pro tempore (Mr. METCALF).

THE FUELS CRISIS IN THE UNITED STATES

Mr. BYRD of West Virginia. Mr. President, as a Senator from West Virginia, I have been extremely interested in the recent rash of stories on the energy shortage. Suddenly, the metropolitan newspapers and the national news magazines have discovered that we stand in grave danger of running short of electric power, and that many of our fuels are in short supply. In other words, the abundant supplies of low-cost energy which have made this Nation great are suddenly becoming neither so abundant nor so low cost.

I am particularly interested, as I have said, because West Virginia is a leading coal producing State in the Nation. And some of the biggest users of power—most notably the Tennessee Valley Authority—are suddenly making the coal industry a whipping boy for the shortage of power.

Mr. President, the coal industry has been warning for years that a fuel shortage was impending. It has said that shortsighted policies of Government and some of the major fuel consuming industries were heading the Nation for trouble. Now that the crisis is upon us, to attempt to blame it all on the coal industry does not make sense.

The real question, however, is not how we got into this mess but how we get out. We look at how we got here only as a guide toward the exit. But I think it is clear that to have any permanent solution to the problem is going to require some drastic policy changes. All the common fuels are in short supply—oil, natural gas, and coal; that is to say, they are in short supply for the consumer—delivered where he wants them. But when we come to reserves, there is a difference between the fuels. Proved reserves of petroleum and natural gas in this country are alarmingly low, but the reserves of coal are enormous. The problem with coal is a shortage of productive capacity, coupled with a shortage of rail cars to haul coal to market.

Nevertheless, the shortage is likely to continue for a long time, quite probably for the rest of this century, unless we have some new strata of cost. Energy has been one of the low-cost items in the American economy. The energy shortage can be solved, but adequate supplies are going to cost more than they have in the past.

I am particularly interested in the fuel shortage as a Senator from West Virginia because it is most acute in fuel for the electric utility industry, and because that fuel is principally coal. Coal generates about half of all the electricity in this country.

Mr. SAXBE. Mr. President, will the Senator yield?

Mr. BYRD of West Virginia. I yield.

Mr. SAXBE. Would the Senator care to comment on the charges made that one of the reasons for this power shortage is that so much of our coal from West Virginia and the rest of the coal area is going to export and that if so much of this coal were not taken advantage of by increased prices they could get at export, we would not have this shortage and that perhaps the exports should be curtailed, so that we would be guaranteed coal supplies? In other words, if they are not permitted to renege on some of these contracts—which I understand there is some talk of—it will become increasingly more difficult.

Mr. BYRD of West Virginia. Mr. President, the Senator has raised a very incisive and pertinent question. If he will allow me, I do intend a little later in my prepared statement to address some remarks to this very question.

Coal is in short supply now, but the

coal industry is guardedly optimistic about the rest of this year. It believes it can produce enough coal to meet the forecast demand for the rest of the year if it encounters no further trouble. This means if there are no more work stoppages in the mines, if there is no railroad strike, and if bad weather does not interrupt the production. Output so far this year is running ahead of 1969, and may be able to keep pace with demand.

The industry devoutly hopes it will be lucky enough to do this. However, I want to discuss some other solutions to the problem of fuel shortage, first, I wish to talk about some short-term problems and possible solutions to them. And by short-term, I mean assuring an adequate supply of coal in the coming year.

If the coal industry is not fortunate enough to meet the demands upon it, there will be increasing clamor from the public and in the Halls of Congress for the Government to step in and see that essential customers, such as electric utilities, have adequate coal supplies. The Government cannot permit defense installations to shut down nor the economy to be greatly slowed for lack of coal, when the United States is sending coal to customers abroad. On the other hand, we must be sure that we do not confuse the complaints of those who cannot get coal with the cries of those who cannot get coal at the price they are willing to pay for it. I know that the coal industry is doing all it can in cooperation with the Government to see that defense contractors and defense installations have adequate coal supplies. Before adopting stronger solutions, the Government should be sure they are really necessary.

We have already heard demands from some consumers that the Government restrict exports in order to assure more coal for domestic use. This is to the question which has just been raised by the able and distinguished Senator from Ohio. Not all of these demands are realistic. Three-quarters of the coal the United States sends to other countries is premium quality metallurgical coal, much of it from West Virginia. This is high-priced coal for a specialized purpose, and utilities are generally reluctant to pay metallurgical coal prices for boiler fuel. Not all of them have equipment that can burn that kind of coal, because their furnaces may have been deliberately designed to burn lower quality coal, which is lower in cost.

There is another consideration when we speak of Government intervention to reduce exports. Much of the coal being exported has been sold on valid long-term contracts. If the Government of the United States breaks these contracts by fiat, I think we can say farewell to the export market, which contributes more than half a billion dollars a year to our balance of payments and helps sustain the economy of much of the free world. Therefore, if the day should come when we must think seriously of restrictions on coal exports, those restrictions should apply first to shipments which have diverted from traditional markets to the export trade.

It is ironical that many of the persons who are now attacking the coal industry for not producing enough coal for electric utilities were only a few months ago attacking the utilities for burning coal, because they said it caused air pollution. It is unfortunately true that the kinds of coal which are low in sulfur content are also most prized for steelmaking and are high in price and least abundant. If producing coal enough to meet all the Nation's demands for it is difficult, it is fairly impossible to fill all those demands with low sulfur coal to meet strict air pollution control standards. However, this does not mean we must forever make a choice between electric power and clean air. Processes are being perfected to take the sulfur out of the stacks of coal-burning powerplants. Pilot installations are now being installed, and most authorities believe that in 2 or 3 years these facilities will be commercially acceptable. The administration has recently and wisely decided to share in the funding of some of these large-scale demonstration plants. I think it will not be too long before utilities are able to install sulfur removal equipment and burn high sulfur coal well within the limits of our pollution control regulations. But that day is not at hand here in the late summer of 1970. And if low sulfur coal is scarce, so is low sulfur oil. And natural gas is in such short supply that some utilities, such as Commonwealth Edison in Chicago, are already having to substitute coal for the gas they would normally burn.

Meanwhile, Federal, State, and local governments have been imposing restrictions on sulfur emissions from powerplants and on the sulfur content of fuels. I suggest that it may be time for government at all levels to consider a temporary readjustment of these severe restrictions until equipment to remove sulfur from the stack gases is commercially acceptable and available. I am not suggesting that we abandon the clean air act, but I am suggesting that we pay some mind also to the prospect of power brownouts and blackouts. I think as a matter of national policy we may have to thread our way between these two demands until the equipment is available.

I think we in Congress must face up to the fact that our passage of the Federal Coal Mine Health and Safety Act last year has had some effect on coal production and on the cost of mining. The bill may have an even greater impact when the rigid limits on respirable dust in coal mines take full effect and are lowered still further.

All social legislation has a price tag, and this may be the price we must pay for adequate protection for the health and safety of coal miners. We must never put production and cost ahead of health and safety. Responsible coal operators do not wish to do so, and, of course, Congress does not wish to do so. On the other hand, I think we have a responsibility to keep an eye on the enforcement of the act and if it begins to seriously inhibit production we have a duty to reexamine it, in the light of experience, to see if the health and safety of miners can be as adequately protected by measures that will not inhibit production.

Still another factor in the coal shortage is a shortage of railway cars on some lines. Mr. President, the railroads are short of coal cars for the same reason that the coal industry is lacking in excess productive capacity and the electric utility industry is near the limits of its generating capacity. At least one reason central to the problem of all three industries is the fact that the Government oversold atomic power. The great promises of the Atomic Energy Commission, echoed by the makers of reactor equipment, have not come true.

Only a few years ago we heard a lot about how atomic power was going to take over the electric utility industry. Some of the biggest utilities in the country said they had built their last coal plant. They flooded the manufacturers with orders for atomic plants. They failed to sign long-term contracts for coal.

Today most of those atomic power plants are not producing power. If they were scheduled to be producing by 1970, the most optimistic estimates are that they may make it in 1972. Meanwhile, the utilities are caught in a triple bind. They are having to run their coal-fired plants to replace the power that is not being produced by their atomic reactors. They seriously underestimated the amount of power they would need this year, and so for that reason also they are having to run their older plants longer than they expected. And for both of these reasons, inasmuch as they did not sign a long-term coal contract, they are having trouble getting adequate fuel supplies.

And the reason for this is plain—with the Government and their best customers telling them that the utility market is going to vanish, the coal companies and the railroads slowed down or halted their investments in expensive new mines and coal cars. And if their confidence was not shaken, surely that of the banks was. The investment for these purposes, to serve a market that the customers and the Government said was not going to exist, just was not forthcoming.

It costs a good many million dollars to open a new coal mine these days, and no prudent businessman is going to venture that sort of investment without some assurance of a market. And railroads which have plenty of other troubles, were reluctant to invest in rolling stock which might have nothing to carry.

Nevertheless, it is essential to get more railroad cars to carry coal. It is obvious that some of the railroads are in no position to finance them. I believe if Government money or loan guarantees were made available, the railroads would get new cars as fast as they could be built, which would mean the new equipment would start carrying coal in about 6 months. I make this suggestion knowing that Government aid to the railroads is a controversial subject. I do not make it for the purpose of aiding the railroads, but of helping all of the Nation's economy to get the coal it needs.

Mr. President, those are a few suggestions which may help the Nation through the coal shortage of the next few months. They are not long-term solutions, and long-term solutions are urgently needed.

The Nation's consumption of energy is growing so fast that a continuing shortage of fuels seems likely unless we take some steps to prevent it. These steps involve some questions of long-term national policy. The cost of energy is an important segment of the national economy and as I have said, energy seems likely to become more costly than it now is. To let any major slice of that energy bill go to foreign producers would have such a profound effect on our balance of payments that it would cripple national economy. Therefore, the United States must place its primary reliance on domestic sources of energy.

Therefore, the Congress should adopt a national energy policy as a matter of law. It should decide what percentage of our future energy requirements was allowed to come under foreign control. Aside from the effect on the balance of payments, we have a recent illustration of the dangers of depending too heavily on foreign sources of oil—reportedly, a bulldozer broke an important pipeline in the Middle East, and as a consequence, tankers have been having to bring oil to the United States around the Cape of Good Hope instead of from the Mediterranean. If one takes the prospect of more misguided bulldozers and adds to that the prospect of misguided or hostile foreign governments, or even those just seeking a diplomatic advantage, one begins to have cogent reason for placing the main reliance on domestic fuels.

Another reason for making that decision, and writing it firmly into law is that investors will be discouraged from risking their money in new coal mines or oil and gas wells if they have no assurance that the market will not be suddenly flooded by low-priced foreign oil. And I think, realistically, we must realize that we will ultimately require synthetic fuels from coal or from oil shale, and the plants to produce these fuels will be quite expensive. Again, investors must have some confidence that there will be a market for their product before they will put money into such plants. And I submit that it is in the national interest to give that assurance.

There is another step which we in Congress can take. We should strike a better balance between the funds the Government spends for research in fossil fuels and for research in atomic power. As of now, they are wildly out of balance. I do not suggest that more Government-sponsored research in fossil fuels would solve the energy shortage in the next few months, but in the long term I think there are great advantages to the public if we are able to bring about production of synthetic fuels from coal and oil shale, or find means of using our reserves of fossil fuels more efficiently and with less effect on the environment.

Mr. President, I suggest that Government financing or loan guarantees be considered as possible steps to increase the coal-car supply over the short term. However, I think we must be looking also for a long-term assurance of adequate car supply. Whether this be achieved by additional tax incentives to the railroads, direct government funding, or other measures, I do not know. But it is certain that the problem must be solved, because producing coal does no good unless we get it to the consumer.

The Government could also increase the incentive to invest in coal mines by increasing the depletion rate for coal. This rate is now only 10 percent of the gross income from the property, with a limit of 50 percent of the net. And if synthetic fuel is to be derived from coal, certainly it would be equitable to advance the depletion valuation point to some stage past the mining process. This was recently done with oil shale. Certainly synthetic fuel from coal should have depletion treatment of the same sort as that given to competing fuels.

Another minor adjustment of the tax laws which would help solve the energy shortage would be to allow rapid amortization of sulfur abatement facilities. This would encourage their construction, and thus encourage the use of high-sulfur fuels which cannot now be burned in some areas under air pollution control regulations. It would encourage a fuller use of all of our resources.

When we passed the Federal Coal Mine Health and Safety Act last December, we authorized funds for research in new methods of mining coal with less risk to the health and safety of miners. We should be sure that Congress appropriates the funds it has authorized to carry this research to completion. I suggest there may be a particular need for more research in means of producing coal efficiently within the rigid dust limits set by the new law, or finding some means of adequately protecting the health and safety of miners without strangling the output of coal which the Nation so greatly needs.

Mr. President, coal is the most important industry in West Virginia. More importantly, however, it is the most abundant fuel in the United States. It makes up about 88 percent of all proved reserves of fuel of any kind, including uranium and oil shale, and three-quarters of all the fuel which the geologists think we will ever find anywhere within the limits of the United States or its continental shelf. Therefore, it is our best long-term bet for an adequate energy supply, and we had better be taking steps now to assure that supply in the months ahead and in the long-term future.

Mr. SAXBE. Mr. President, will the Senator from West Virginia yield?

Mr. BYRD of West Virginia. I yield.

Mr. SAXBE. The Senator has no doubt observed the acquisition by large oil companies of substantial holdings in the coalfields. The question arises as to whether this in itself indicates an effort to corner the fossil fuel market in this country, or its marketing and producing. Has the Senator considered that idea?

Mr. BYRD of West Virginia. I must say this is an appropriate question, but, at the same time, we have to recognize that the opening of modern, new mines is a most expensive and risky venture. Not every coal operator has that kind of money to invest in the operation of a modern, new mine. The requirements of a new mine, under the Health and Safety Act, impose still greater costs than ever before upon the mine operator. I venture to say that the kind of capital required to open a modern, new, producing mine can come only from some of the very large companies.

Mr. SAXBE. Mr. President, the distinguished Senator from West Virginia has touched on another point in which I am greatly interested, and that is the rapid amortization of pollution control equipment that not only utilities but also a great many other plants could utilize so as to be able to use coal.

I am thinking particularly of the steel plants that use this same type of high-sulfur coal. They would rather not use it, but are forced to do it.

I have suggested that there should be a 5-year writeoff on this type of scrubbing equipment, as it is called, to clean up the pollution. If that can be accomplished, it would open up markets for what is presently unacceptable coal; would it not?

Mr. BYRD of West Virginia. It would.

Mr. SAXBE. And in that way it would permit plants, especially those located in urban centers, to use the coal not now readily available to them.

Mr. BYRD of West Virginia. It would. And it would greatly encourage those plants to invest the kind of money that is needed to purchase this costly equipment.

Mr. SAXBE. The bill which I introduced is now before the Committee on Finance. It has the approval of the Public Works Committee and others, as I understand it. It is now before the Finance Committee with the hope that it will get the kind of support that is necessary so that we can do something in the immediate future to encourage these companies to go into the purchase of this air pollution equipment.

Another part of the same bill is the granting of Federal guarantees, not direct loans, to small companies who cannot find the financing through banks to go into the purchase of this pollution control equipment.

With a combination of loans, and these are small—they do not go to the large industries—we could handle small industries with a quick writeoff and also provide bank financing on a guaranteed basis. Otherwise, we will have a closing-down of the plants and losing of the jobs.

We want smoke abatement. We want smog out of the air. But we have to cooperate with these plants, too, if we expect them to be able to do this.

Mr. BYRD of West Virginia. Mr. President, the Senator is correct. We want to get on with the control of air pollution. But at the same time that this is being done, we must keep in mind the continued operation of the coal mines and the employment of the people who work in them.

Mr. President, I compliment the Senator on his bill. I think it is typical of the foresightedness and vision which he has displayed so many times during his service in the Senate.

I would certainly hope that if the Finance Committee is not able to give attention to the Senator's bill this year, the Senator will reintroduce it in the new Congress which convenes in January.

It appears to me, without having stud-

ied the bill, that it certainly is worthy of very careful and prompt attention.

I thank the Senator.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ALLEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. SAXBE). Without objection, it is so ordered.

DIRECT POPULAR ELECTION OF THE PRESIDENT AND THE VICE PRESIDENT

The Senate continued with the consideration of the joint resolution (S.J. Res. 1) proposing an amendment to the Constitution of the United States relating to the election of the President and the Vice President.

Mr. ALLEN. Mr. President, debate on this issue has been proceeding for almost a week. Frankly, I am amazed at the lack of enthusiasm for this so-called great basic change in the law of the land, a change which, it is said, a great majority of the people of this country want and demand. Why this lack of enthusiasm? The Senator from Indiana has spoken, the Senator from Idaho spoke, the Senator from Maryland spoke, both the Senator from Michigan and the Senator from Tennessee spoke. Certainly no extended debate on the part of opponents of this measure has taken place.

Mr. President, I must conclude from this lack of enthusiasm on the part of proponents of the measure that there is not nearly so much demand for the direct election of the President and Vice President as has been made to appear, else why do we not have debaters come to the Senate Chamber and express their views with respect to the measure? The junior Senator from Alabama had not intended to speak on this issue but he had expected to hear from some of those who favor the direct election of the President.

Mr. President, actually what is the hurry? Why are we considering this measure to the exclusion of the many measures and issues that need to be discussed and decided by the Senate? What is the hurry? The resolution itself provides that it shall not go into effect until 1 year after the first April 15 following its ratification. That would mean that for this suggested change in the Constitution to be used in the 1972 elections it would have to pass the Senate, be agreed to by the House, or by a conference, the report approved, and the resolution then ratified by three-fourths of the State legislatures, all before April 15 of next year, a physical impossibility.

So it is suggested, if it passes—and I have my serious doubts that it will—it could not become effective until the 1976 presidential election.

Mr. President, some of the distinguished Senators who have discussed this issue have said that we need to choose the best plan, we need to submit back to the State legislatures the very best possible plan, if we are to change the basic law of the land.

There seems to be a great deal of difference of opinion as to what is the best plan to submit back to the States. The distinguished Senator from Indiana (Mr. BAYH), who now pushes Senate Joint Resolution 1, providing for the direct election of the President, with a runoff provision, at one time supported what is loosely called the Katzenbach plan, which is the automatic casting of the electoral votes.

The Senate of the United States at one time passed the Lodge-Gossett proportional plan.

Two of the distinguished Senators whose names appear as cosponsors of Senate Joint Resolution 1, the direct election measure, have offered the amendment that is now under discussion—the distinguished Senator from Michigan (Mr. GRIFFIN) and the distinguished Senator from Maryland (Mr. TYDINGS)—and they criticize, in the report of the Judiciary Committee, of which they are both members, in most scathing terms, the runoff provision provided by Senate Joint Resolution 1.

They point out that they do not favor the runoff plan and criticize it most severely.

Another sponsor, the distinguished Senator from Tennessee (Mr. BAKER), said that he would prefer a 50-percent requirement for the successful candidates for President and Vice President rather than the 40 percent provided by Senate Joint Resolution 1, in order to prevent a runoff.

So what is the hurry? Why insist on the passage of this measure when there is apparently no unanimity of opinion on what is the best plan to submit?

Let me point out that under the provision of Senate Joint Resolution 1, if it is passed by a two-thirds vote of each House, it will be submitted to the States, and it will have 7 years to be accepted, ratified, or agreed to, by three-fourths of the States.

So if it is later decided, after it is ratified, that the runoff provision is bad, and if there is a presidential election and a runoff is required and it works in such an unfortunate way as to indicate that certainly it is not what we want, it will take another constitutional amendment to change it.

Then, too, pending the ratification by the States of the measure, a 7-year period being allowed, in all likelihood there would be no change possible at that point on the method of choosing the President and Vice President of the United States as long as the measure was before the State legislatures.

I do not maintain that it would be impossible to submit another amendment different from this amendment, but the chances are that if the Senate and the House should submit Senate Joint Resolution 1, providing for the 40-percent requirement and the runoff when no candidate received as much as 40 percent, as long as it was pending before the States there could be no hope of submitting another plan, because the reaction would be, "Well, let us see what the States are going to do with this plan before we submit another."

So we find numerous views with respect to the best possible change of the electoral college.

Back in 1824, John Quincy Adams, who received, supposedly, fewer popular votes than did Andrew Jackson, was chosen President of the United States by action of the House of Representatives, because no candidate received a majority in the electoral college. So if anybody had any right to object to the electoral college system, it certainly would have been President Andrew Jackson, who won the Presidency 4 years later.

The plan he proposed was not direct election, but the district plan. I feel that as soon as action has been taken on the Griffin-Tydings amendment, the district plan and the proportional plan will probably be offered as amendments.

The plan favored by President Andrew Jackson was the district plan. Under the present system, as we all know, each State has the same number of electors as it has Senators and Representatives. Under the district plan each State would retain the same total number of electors—two for the two Senators and then the same number of electors as it has Members of the House.

Under the present system, all of those votes are handed as a unit to the winner of the popular vote in the respective States. But under the district plan, the votes of only two of the electors, in effect representing the two Senators, would go to the winner in the State vote, and the other electors would be divided out among the candidates for President based on their votes in the respective congressional districts. That is called the Mundt plan because of its chief sponsor, the distinguished Senator from South Dakota (Mr. MUNDT).

That was the plan suggested by President Andrew Jackson—not the direct plan.

Under the Lodge-Gossett plan—and I believe that an amendment of that sort is going to be offered by the distinguished Senator from North Carolina (Mr. ERVIN)—the electoral vote of a State is divided among the candidates in proportion to the popular vote of the various candidates in the respective States. That would eliminate the office of elector, and would divide the electoral votes out among the candidates in proportion to their popular vote in each State.

Mr. President, much has been said about the fact that a candidate for President who wins in the electoral college and does not win the popular vote will not have a proper mandate from the people, that he cannot govern effectively because of not having received a majority of the popular votes or a plurality of the popular votes.

Yet Senate Joint Resolution 1 provides for the election of a President and Vice President, without a runoff, with as few as 40 percent of the popular votes of the country.

What sort of mandate is that—40 percent of the popular vote? Mr. President, they are concerned about whether the winning candidate for the Presidency in the electoral college also has a majority

of the popular vote. Under the direct system, in a three-way race for the Presidency, it would be possible for the winner of the Presidency and the popular vote leader not to carry a single State in the United States, and still be the popular vote leader.

How could that be? How could the candidate who receives the most popular votes not carry a single State?

It is very easy. Assume a three-way race for the Presidency. The popular vote leader runs behind the second man in the popular vote in 49 States by the margin of 1,000 votes. Then in the 50th State, he runs behind the third candidate, but 50,000 votes ahead of the second candidate.

That, then, would have him carrying not one single State of the Union, but still the popular vote leader.

How much of a mandate does anyone think that a President who did not carry a single State in the Union would have? I call attention to this outside possibility because the argument has been made time and time again on this floor that if a few thousand in this State and a few thousand in that State had been switched in 1968 or in 1948, it would have resulted in the second man in the popular vote being elected by carrying a majority in the electoral college. Senators have expressed great apprehension lest the man who received some thousands or hundred thousands of popular votes less should receive a majority in the electoral college.

Mr. President, there is a much better chance of the Nation's second choice being elected President under the direct election system than under the electoral college system, because under the direct system, if the leading candidate receives fewer than 40 percent—say he gets 39 percent—the second candidate receives 21 percent, and the third candidate—and there will be a third one, a fourth one, a fifth one, and a sixth one, if we ever pass this ill-conceived measure—but if the leading candidate gets 39 percent, the second 21 percent, the third 20.5 percent, and the fourth 19.5 percent, we would then have a runoff between the 39-percent candidate and the 21-percent candidate.

Mr. President, as the distinguished Senator from Maryland (Mr. TYDINGS) and the distinguished Senator from Michigan (Mr. GRIFFIN) pointed out in their separate views expressed with regard to Senate Joint Resolution 1—this is not the junior Senator from Alabama making this suggestion; this is two distinguished Senators who joined as cosponsors of Senate Joint Resolution 1, providing for a runoff if no candidate receives as many as 40 percent of the votes in the first election—quoting from the bottom paragraph of page 16 of the report of the Committee on the Judiciary:

> In view of this attractive political framework, the direct election plan, as embodied in Senate Joint Resolution 1, opens the door to public political bargaining with the most far-reaching consequences. Concessions wrung from major party candidates either before or after the first election would be made in a heated atmosphere conducive to the creation of public distrust. Given the fact that bargaining before the runoff election would take place under conditions of division and disappointment, cynical political moves might in themselves lead to a crisis of respect and legitimacy in the selection of the President. Undoubtedly, the aura of legitimacy would be all the more in doubt where the runner-up in the initial contest wins the runoff by wooing third-party support. In such a case, the question of legitimacy is sharpened even further if the turnout in the second election is substantially lower than in the first election.

Talking about a second choice, that is what we will end up with under the direct election plan. At least, under the electoral plan, carrying a majority in the electoral college shows that you are carrying either a majority of the States or a sufficient number of States that their Representatives and Senators constitute a majority of all of the Representatives and Senators.

Mr. President, the figure was set by the author of the bill which would elect a candidate as President at 40 percent. It has always been traditional in American politics, in American government, that the man elected to political office gets a majority of something. He has to have a majority of something. If he is a school superintendent, chosen by a schoolboard, he gets a majority of the school board. If he is appointed to a position by any board, he has to get a majority of the members of the board to be named. Under the electoral system, at least he has to get a majority in the electoral college; and if he does not get a majority in the electoral college, he has to get a majority of the States in the House of Representatives. So it takes a majority, a majority of something, to elect a President under the present system.

Under the present system, there is a runoff. The runoff is held in the House of Representatives, where each State delegation votes one vote. But it is a majority of something. So if the distinguished Senator from Indiana is worried about the successful candidate for the Presidency not receiving a majority of the votes, he can rest assured that he receives a majority of something; whereas, under the resolution which he is sponsoring, a candidate can be elected President of the United States without receiving a majority of anything.

So let us have majority rule. Let us not stand for 40-percent rule, and that is what we would have under Senate Joint Resolution 1.

Mr. President, the status of the question before the Senate at this time is that Senate Joint Resolution 1 is before the Senate and the amendment of the distinguished Senators from Michigan and and Maryland is pending. The amendment of the distinguished Senators from Michigan and Maryland eliminates the runoff provided for by Senate Joint Resolution 1. It does it by, at one step, invoking again the electoral college.

There must be something splendid, something admirable, something highly commendable, something efficacious in the electoral system, because in more than 180 years there has not been sufficient sentiment behind any other plan to do away with the electoral college. Under the various plans to which I have alluded which are being considered in addition to Senate Joint Resolution 1, the electoral college or some reasonable facsimile thereof or counterpart thereof is employed. Under the district plan which has been suggested, the electoral college is retained, divided up somewhat differently, breaking it down a little, where the votes that any candidate for President gets in a State will have representation in the electoral college if it is as much as leading the vote in one congressional district. Yes, the automatic system, by which the office of elector is abolished and the votes of electors are automatically cast for the winning candidate in the respective States, but still employing the Federal principle, the division of the electors among the respective States on the basis of their representation in the House and in the Senate of the United States.

Yes, even the proportional plan uses the electoral college or a modification of it. It still retains the voting strength of the electoral college, and it retains the principle of a candidate receiving electoral votes on the basis of the popular votes that he receives in the respective States, instead of the winner-take-all policy. It would provide that the electoral vote of each State would be divided among the candidates in proportion to the votes that the candidates receive in the respective States. But they are still using the electoral college system. They are still using counterparts to the electors. They are just putting it on a computer, more or less. It is a computerized electoral college—that is what the proportional plan is.

The so-called Federal plan is sponsored by the distinguished Senator from Kansas (Mr. DOLE) and the distinguished Senator from Missouri (Mr. EAGLETON).

Senator EAGLETON is one of the sponsors of Senate Joint Resolution 1; yet, apparently, he differs with it, because he has a different plan of his own which he is going to offer separately or possibly as an amendment to the present bill.

What is the so-called Federal system? I believe that is Senate Joint Resolution 181. What does it provide, and how does it use the electoral college? It provides that the winner of the popular vote throughout the country—it is not 50 percent, it is not 40 percent, as stated in the amendment—is declared elected provided he carries a majority of the States or he leads in those States which cast a majority of the popular votes in that particular election. So if he was the popular leader and he either carried 26 States or led in the States that cast the majority of the votes, he would be declared elected. Then if that does not produce a winner, the contest goes to the electoral college, and if any one of the candidates receives a majority in the electoral college , he is declared the winner; and then it goes one step forward, still in the electoral college, that if none of the candidates obtains a majority in the electoral college, then we dismiss all the candidates except the top two, and divide the electoral votes of the other candidates who are eliminated among the top two in proportion to the vote which the

candidates got in the States represented by those electors.

So, Mr. President, we have all sorts of plans, all sorts of suggestions, and practically every one of them, except the direct plan, is built around the electoral college plan in some way, showing that the electoral college has merit, that it is recognized it has merit, and that it should not be done away with.

Mr. President, we were talking about the amendment of the distinguished Senator from Michigan (Mr. GRIFFIN) and the distinguished Senator from Maryland (Mr. TYDINGS). The junior Senator from Alabama was suggesting that they, too, use the electoral college to build their plan around. Yet they are for Senate Joint Resolution 1, but they find fault with the resolution they are sponsoring and suggest an alternative plan.

I am pointing these things out to show that there is no unanimity of opinion, that there is no agreement that this plan and this plan alone is the one that should be submitted back to the people. As I suggested, the Senate itself has passed, by more than a two-thirds vote, the Lodge-Gossett plan which was and is the proportional system. Thus, the Senate, just a few years ago, thought that the proportional plan should be submitted to the States. Now they are talking about direct election with just 40 percent—a minority not a majority. We have always heard about majority rule, let the majority rule. But a 40-percent rule is what this amendment that is being discussed would provide.

Now what does the Griffin-Tydings amendment do? That is what is actually being discussed, I assume, at this time, because the pending question is whether it should be adopted as an amendment to Senate Joint Resolution 1.

It provides for the election of the President and Vice President in as many as three steps. It could be accomplished on the first step, by complying with the first and second steps, or it might take all the steps, 1, 2, and 3. As the junior Senator from Alabama understands the Griffin-Tydings amendment, it does eliminate the runoff and, in that respect, it is a much better provision than Senate Joint Resolution 1.

Mr. ERVIN. Mr. President, would the Senator from Alabama yield now, or at an appropriate time?

Mr. ALLEN. I will, at an appropriate time, if the Senator would excuse me, as I wish to try to point out what the Griffin-Tydings amendment provides.

Mr. ERVIN. Certainly.

Mr. ALLEN. The Griffin-Tydings amendment provides for the President and Vice President to run as a team—and Senate Joint Resolution 1 also does that, to run as a team—and you could not vote for one without voting for the other. That is certainly an innovation right there from the original Constitution. If one of these teams of two should get 40 percent of the popular vote, they would be declared elected President and Vice President. If no team of two candidates got as many as 40 percent, then they would go to step 2 to see if they could comply with that. There again comes in the electoral college. They do not get too far from it because it is the best system that has yet been offered. They come to the electoral college, or a reasonable counterpart of it, which provides that if one of the teams of two carries a sufficient number of States, and the total number of Senators and Representatives from those particular States constitute a majority of all of the Senators and Representatives in the Congress, then that would comply and that, then, would elect the top team of two which had not received the 40 percent. That, in effect, is resort to the automatic plan which, I believe, is included now in Senate Joint Resolution 191. So that they do not have this danger that has been pointed out this afternoon by the distinguished Senator from Idaho (Mr. CHURCH), of the possibility of so-called faithless elector—an elector who is elected on one ticket but exercises his independent judgment and decides to vote for someone else. That could not happen. That would just be an adding machine transaction, to add up and see who got the votes of the electors or who carried a sufficient number of States to constitute a majority of the House and Senate. If they comply with that, if the top two—it has to be the top two—fail to get 40 percent, if they do get a majority in this facsimile of an electoral college, they are declared elected President and Vice President.

But, then, suppose no team of candidates got as many as 40 percent—no team of candidates gets a majority in the facsimile or counterpart of an electoral college, then they go to step three. That is just a modification of the present plan, Mr. President. That is where the runoff is. It is not a popular election runoff, but a runoff in the House of Representatives.

Mr. President, it changes the existing plan of having the top three names submitted to the House of Representatives, in which event the House of Representatives must vote as State delegations, each State having one vote to decide who should be elected President. That is the present system. And, of course, the Vice President would be elected by the Senate from the top two names under the present system.

As I suggested, under Senate Joint Resolution 1 and under the Griffin-Tydings amendment, they run as a team of two. So, if they do not get elected by step one or by step two, they go to step three, which is a selection by the House of Representatives from the top two candidates, that selection to be made by the incoming Congress which would be called into special session in early December. I do not recall the exact date. There, in joint session, the members of the new House and Senate would choose the President and Vice President from the top two teams of candidates.

That is an improvement, probably, over Senate Joint Resolution 1. But just because it is an improvement over Senate Joint Resolution 1 does not mean that it is a good measure. It is not. It still has the 40 percent provision in there. It has provision for a minority President, a President not elected by a majority of anything. So it does not provide the proper method of choosing a President and Vice President. But it is better than the infamous runoff provision contained in Senate Joint Resolution 1.

Mr. President, I am delighted to yield to the distinguished Senator from North Carolina for a question or for comments, provided I do not lose my right to the floor.

Mr. ERVIN. Mr. President, does not the Senator from Alabama agree with the Senator from North Carolina that the Griffin-Tydings amendment has some of the manifestations of intellectual schizophrenia?

Mr. ALLEN. The Senator is correct. It has three different things grouped together.

Mr. ERVIN. In order words, we would have, first, the popular election.

Mr. ALLEN. The Senator is correct.

Mr. ERVIN. Mr. President, instead of the proponents sticking to the popular election throughout, where they have to provide population, they forthwith flee from the population matter to what is presently in the electoral college system.

Mr. ALLEN. In effect, the Senator is correct.

Mr. ERVIN. And then they flee from the disguised form of the present electoral system to the selection by Congress, the two Houses sitting together.

Mr. ALLEN. The Senator is correct.

Mr. ERVIN. Is there anything contained in either Senate Joint Resolution 1 or the Griffin-Tydings amendment to Senate Joint Resolution 1 which specifies who will determine what candidates for President and Vice President would have to be joined together on the ticket, having received 40 percent or more of the popular vote?

Mr. ALLEN. There is not. Both measures are as silent as a tomb on that point.

Mr. ERVIN. Mr. President, does not the Senator think that is a very grave omission, because it is just as important to determine who has been elected President as it is to vote for a President?

Mr. ALLEN. That is true. The Senator is correct.

Mr. ERVIN. Mr. President, as far as Senate Joint Resolution 1 declares and as far as the Griffin-Tydings amendment declares, both proposals leave somewhere in the womb of uncertain future any provision for determining who got elected President or whether anyone was elected President by the popular vote system.

Mr. ALLEN. The Senator is correct.

Mr. ERVIN. The present Constitution in amendment 12 prescribes a specific method by which is to be determined who is elected President, and it provides that the returns in each State shall be certified and sent to the President of the Senate and sent to the seat of the government and that when Congress convenes in joint session, the Congress thus determines who has the majority of the electoral votes, and who, as a consequence, is elected President and who has the majority of votes for Vice President and who is elected Vice President.

Mr. ALLEN. The Senator is correct. And that system has worked mighty well.

Mr. ERVIN. Mr. President, as far as

Senate Joint Resolution 1 or the proposed Griffin-Tydings amendment to Senate Joint Resolution 1 are concerned, they make absolutely no provision for determining whether anyone has received 40 percent or more of the popular vote for President and Vice President. They leave that matter to be determined at some future time by some act of Congress.

Mr. ALLEN. The Senator is correct. They do. They do provide for election by 40 percent. They nail that down in the Constitution. They nail the runoff provision down in the Constitution. The two most undesirable features of the entire measure are written into the basic law of the land.

Mr. ERVIN. And then it leaves for the future the determination of how we determine that. It says:

> The Congress shall prescribe by law the time, place, and manner in which the results of such elections shall be ascertained and declared.

Mr. ALLEN. The Senator is correct.

Mr. ERVIN. Mr. President, if Congress does not act, we could have court proceedings either under Senate Joint Resolution 1 or under the Griffin-Tydings amendment to Senate Joint Resolution 1, if we have a controversy respecting the vote, in every precinct in the United States, which could be carried into the courts.

Mr. ALLEN. That is certainly true.

Mr. ERVIN. Mr. President, if my memory serves me correctly, it seems to me that there are 184,000 election precincts in the United States.

Mr. ALLEN. Mr. President, I have seen that number suggested, yes, sir.

Mr. ERVIN. So we have a possibility of controversies resulting in lawsuits in State courts and Federal courts involving the question of how the votes were cast in as many as 184,000 electoral precincts.

Mr. ALLEN. That is certainly true.

Mr. ERVIN. Does that not indicate the real, serious problem which Senate Joint Resolution 1 presents both in its original form and in the form in which it would be if the pending amendment were added to it. That is, they convert entirely in Senate Joint Resolution 1 and as a first step in the amendment the 184,000 election precincts under the presently existing 50 States and the District of Columbia into one great big single election precinct.

Mr. ALLEN. That is true. Yes, sir. One of the beauties of the present plan is that the votes in each State are isolated and insulated. If there are any irregularities they can be settled and handled on a State basis rather than, as the Senator has said, to throw into consideration and into the contest the votes in 184,000 precincts.

Mr. ERVIN. All this is being done, according to the first provision of the pending amendment, for the avowed purpose of allowing the man who gets the most votes to be President of the United States.

Mr. ALLEN. The Senator is correct.

Mr. ERVIN. I ask the Senator if the history of the United States does not show that the candidate receiving the largest popular vote for President has been elected in every election this country has had with the exception of the election in which Grover Cleveland was the Democratic candidate for the second time, and when he was confronting Benjamin L. Harrison, and if it did not happen that he received 100,000 fewer popular votes but more electoral votes.

Mr. ALLEN. I understood from the Senator that that was his understanding. Of course, that leaves out the contests of 1824 and 1876. I would be happy if the Senator would give his views on those two instances.

Mr. ERVIN. It was not until after the election of 1824, if I recall correctly, that all States had popular elections.

Mr. ALLEN. Yes. New York at that time had electors chosen by the State legislature, which they have a right to do since this provision is in the Constitution.

Mr. ERVIN. Is it not true that in the early days of the Republic many States had their presidential electors chosen by the State legislature rather than by popular vote within the State?

Mr. ALLEN. The Senator is correct.

Mr. ERVIN. So the answer implied to the question I put to the Senator from Alabama a moment ago is that in every case the States went fully to popular election of presidential electors; that in every election since that time the candidate receiving the largest popular vote was elected by the electoral college system, except in the case of Grover Cleveland.

Mr. ALLEN. As has already been suggested, in 1876 the Tilden-Hayes election by hijinks went to an electoral commission.

Mr. ERVIN. I ask the Senator from Alabama if these words—

> The Congress shall prescribe by law the time, place, and manner in which the results of such elections shall be ascertained and declared—

Do not make it constitutional for a partisan Congress to emulate the example of New York which, in effect, stole the 1876 election from Samuel Tilden, the Democratic candidate, and gave it to Rutherford B. Hayes, the Republican candidate.

Mr. ALLEN. Yes, it would leave that door open. It should be nailed down in the Constitution, as the Senator from North Carolina pointed out is the case now under the 12th amendment under which we are still operating.

Mr. ERVIN. The Senator from Alabama recalls, does he not, that after the 1876 election Congress provided that the determination of the question of whether Tilden or Hayes had a majority of votes should be determined by a commission which Congress created.

Mr. ALLEN. Yes, sir.

Mr. ERVIN. And which Congress took pains to see had a majority of at least one which belonged to the majority party which controlled Congress.

Mr. ALLEN. The Senator is correct, and they voted 8 to 7 along party lines.

Mr. ERVIN. And in so doing they apparently disregarded testimony they took with respect to the election in the State of Louisiana and the evidence relating to the election in the State of Florida.

Mr. ALLEN. The Senator is correct.

Mr. ERVIN. So we have here in Senate Joint Resolution 1, which is submitted by Congress to the States and ratified by a requisite number of States, an instance where we would make it constitutional for a partisan majority in Congress—I started to say "pilfer" but that is too mild a form of larceny for such a thing as stealing a presidential election—which enables them to establish a system under which a majority of Congress could thwart the will of the people and declare a man to be President who receives less than the popular vote to be President and at the same time prescribe there can be no inquiry to determine the accuracy of their decision.

Mr. ALLEN. Yes, sir.

Mr. ERVIN. In addition to authorizing such chicanery on the part of Congress, Senate Joint Resolution 1 and the first stage of the Griffin-Tydings amendment converts the entire United States into one election precinct.

Mr. ALLEN. It certainly does.

Mr. ERVIN. And makes it crucial, or makes it possible to have a contest as to whether the votes were irregularly cast and whether there was fraud or corruption, or a miscount in 184,000 different election precincts.

Mr. ALLEN. It would be a monumental task just to recount without any allegation of fraud, but just to recount the votes would be a monumental task.

Mr. ERVIN. Does the Senator recall that the election of 1960 and the election of 1968 were exceedingly close and that considering the magnitude of the number of votes cast, for all practical purposes just a mathematical percentage separated the winner from the loser.

Mr. ALLEN. That is all.

Mr. ERVIN. Does not the Senator from Alabama infer from that there is a possibility, a real possibility, that under Senate Joint Resolution 1, and also under the first step described in the pending amendment, that it might possibly be months and months or even years before it could be determined who, if anyone, received 40 percent of the votes.

Mr. ALLEN. The Senator is correct. It very well could be.

Mr. ERVIN. Does the Senator from Alabama agree with the Senator from North Carolina that the proponents of the pending amendment are not willing to abide by the old adage that we should make everything fish, fowl, or red herring and, therefore, they offer three alternative methods of selecting the President?

Mr. ALLEN. They have. They have given us our choice. Let us take the second choice, which is the electoral college.

Mr. ERVIN. If the electoral college is a sufficient criterion to determine the question when a controversy arises as to whether a candidate received 40 percent of the popular vote, does not the Senator think it would be well for us to abide by the old ship and sail these troubled seas without confusing the situation further?

Mr. ALLEN. I thank the distinguished Senator.

Mr. ERVIN. I thank the distinguished Senator from Alabama.

Mr. ALLEN. Mr. President, I have a prepared address on this subject that I did not get around to using, for the distinguished Senator from West Virginia has called my attention to the fact that at this time we are supposed to have the farm bill laid before the Senate. With the thought in mind that an opportunity may present itself later to make use of the prepared address that I have, I will yield the floor to the distinguished Senator from West Virginia for the purpose to which I have alluded.

Mr. ERVIN. Mr. President, I would like to suggest to the Senator from Alabama that before he does that, he make a unanimous-consent request to the Senate that the remarks he has thus far made shall not count as a separate speech on the issue before the Senate, but that the subsequent remarks on this subject by the Senator from Alabama shall be counted as the first speech.

Mr. ALLEN. Mr. Presiden, I ask unanimous consent that the continuation of my remarks at a later time in conjunction with these remarks be considered as one speech, inasmuch as I have yielded the floor at the request of the acting majority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER SETTING ASIDE THE PENDING BUSINESS

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the pending business be temporarily laid aside and that it remain in that status until the close of morning business tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF TIME FOR FILING REPORT ON CONSUMER PROTECTION ACT OF 1969

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the time for reporting S. 3201, the "Consumer Protection Act of 1969," which was referred to the Judiciary Committee and was supposed to have been reported today, be extended up to and including Friday, September 18, 1970. I do this, as I recall, with the full knowledge and consent of the chairman of the Committee on Commerce (Mr. MAGNUSON), who is unable to be here today. It is my understanding that before that time, contact will be made with the Senator from Washington (Mr. MAGNUSON) and the Senator from New Hampshire (Mr. COTTON), ranking Republican member of the Commerce Committee.

The PRESIDING OFFICER. Without objection, the time will be so extended.

AGRICULTURAL ACT OF 1970

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 1172, H.R. 18546.

The PRESIDING OFFICER. The bill will be stated by title.

The title of the bill was read, as follows: H.R. 18546, a bill to establish improved programs for the benefit of producers and consumers of dairy products, wool, wheat, feed grains, cotton, and other commodities, to extend the Agricultural Trade Development and Assistance Act of 1954, as amended, and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from West Virginia?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Agriculture and Forestry with an amendment to strike out all after the enacting clause and insert:

That this Act may be cited as the "Agricultural Act of 1970".

TITLE I—PAYMENT LIMITATION

SEC. 101. Notwithstanding any other provision of law—

(1) The total amount of payments which a person shall be entitled to receive under each of the annual programs established by titles IV, V, and VI of this Act for the 1971, 1972, or 1973 crop of the commodity shall not exceed $55,000.

(2) The term "payments" as used in this section includes price-support payments, set-aside payments, diversion payments, public access payments, and marketing certificates, but does not include loans or purchases.

(3) If the Secretary determines that the total amount of payments which will be earned by any person under the program in effect for any crop will be reduced under this section, the set-aside acreage for the farm or farms on which such person will be sharing in payments earned under such program shall be reduced to such extent and in such manner as the Secretary determines will be fair and reasonable in relation to the amount of the payment reduction.

(4) The Secretary shall issue regulations defining the term "person" and prescribing such rules as he determines necessary to assure a fair and reasonable application of such limitation: Provided, That the provisions of this Act which limit payments to any person shall not be applicable to lands owned by States, political subdivisions, or agencies thereof, so long as such lands are farmed primarily in the direct furtherance of a public function, as determined by the Secretary.

TITLE II—DAIRY

DAIRY BASE PLANS

SEC. 201. (a) The Agricultural Adjustment Act, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended, is further amended by striking in subparagraph (B) of subsection 8c(5) all that part of said subparagraph (B) which follows the comma at the end of clause (c) and inserting in lieu thereof the following:

"(d) a further adjustment to encourage seasonal adjustments in the production of milk through equitable apportionment of the total value of the milk purchased by any handler, or by all handlers, among producers on the basis of their marketings of milk during a representative period of time, which need not be limited to one year; (e) a provision providing for the accumulation and disbursement of a fund to encourage seasonal adjustments in the production of milk may be included in an order; and (f) a further adjustment, equitably to apportion the total value of milk purchased by all handlers among producers on the basis of their marketings of milk; which may be adjusted to reflect the utilization of producer milk by all handlers in any use classification or classifications, during a representative period of one to three years, which will be automatically updated each year. In the event a producer holding a base allocated under this clause (f) shall reduce his marketing, such reduction shall not adversely affect his history of production and marketing for the determination of future bases, or future updating of bases, except that an order may provide that, if a producer reduces his marketings below his base allocation in any one or more use classifications designated in the order, the amount of any such reduction shall be taken into account in determining future bases, or future updating of bases. Bases allocated to producers under this clause (f) may be transferable under an order on such terms and conditions, including those which will prevent bases taking on an unreasonable value, as are prescribed in the order by the Secretary of Agriculture. Provisions shall be made in the order for the allocation of bases under this clause (f)—

"(i) for the alleviation of hardship and inequity among producers; and

"(ii) for providing for dairy farmers not delivering milk as producers under the order upon becoming producers under the order who did not produce milk during any part of the representative period, and these new producers shall within ninety days after the first regular delivery of milk at the price for the lowest use classification specified in such order be allocated a base which the Secretary determines proper after considering supply and demand conditions, the development of orderly and efficient marketing conditions and to the respective interests of producers under the order, all other dairy farmers and the consuming public. Producer bases so allocated shall for a period of not more than three years be reduced by not more than 20 per centum; and

"(iii) dairy farmers not delivering milk as producers under the order upon becoming producers under the order by reason of a plant to which they are making deliveries becoming a pool plant under the order, by amendment or otherwise, shall be provided bases with respect to milk delivered under the order based on their past deliveries of milk on the same basis as other producers under the order; and

"(iv) such order may include such additional provisions as the Secretary deems appropriate in regard to the reentry of producers who have previously discontinued their dairy farm enterprise or transferred bases authorized under this clause (f); and

"(v) notwithstanding any other provision of this Act, dairy farmers not delivering milk as producers under the order, upon becoming producers under the order, shall ninety days later be provided with respect to milk delivered under he order, allocations based on their past deliveries of milk during the representative period from the production facilities from which they are delivering milk under the order during the representative period on the same basis as producers under the order on the effective date of order provisions authorized under this clause (f): Provided, that bases shall be allocated only to a producer marketing milk from the production facilities from which he marketed milk during the representative period, except that in no event shall such allocation of base exceed the amount of milk actually delivered under such order.

The assignment of other source milk to various use classes shall be made without regard to whether an order contains provisions authorized under this clause (f). In the case of any producer who during any accounting period delivers a portion of his milk to persons not fully regulated by the order, provision shall be made for reducing the allocation of, or payment to be received by, any such producer under this clause (f) to compensate for any marketings of milk to such other persons for such period or

periods as necessary to insure equitable participation in marketing among all producers. Notwithstanding the provisions of section 8c (12) and the last sentence of section 8c(19) of this Act, order provisions under this clause (f) shall not be effective in any marketing order unless separately approved by producers in a referendum in which each individual producer shall have one vote and may be terminated separately whenever the Secretary makes a determination with respect to such provisions as is provided for the termination of an order in subparagraph 8c(16)(B). Disapproval or termination of such order provisions shall not be considered disapproval of the order or of other terms of the order.

"In the administration of this section 8c(5) after the enactment of the Agricultural Act of 1970, the Secretary shall maintain the same policy with respect to the exemption of producer-handlers from the provisions of marketing orders that was maintained prior to such enactment."

(b) Nothing in subsection (a) of this section 201 shall be construed as invalidating any class I base plan provisions of any marketing order previously issued by the Secretary of Agriculture pursuant to authority contained in the Food and Agriculture Act of 1965 (79 Stat. 1187), but such provisions are expressly ratified, legalized, and confirmed and may be extended through and including December 13, 1971.

(c) It is not intended that existing law be in any way altered, rescinded, or amended with respect to section 8c(5)(G) of the Agricultural Adjustment Act, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended, and such section 8c(5)(G) is fully reaffirmed.

SUSPENSION OF BUTTERFAT SUPPORT PROGRAM

SEC. 202. Effective only with respect to the period beginning April 1, 1971, and ending March 31, 1974—

(a) The first sentence of section 201 of the Agricultural Act of 1949, as amended (7 U.S.C. 1446), is amended by striking the words "milk, butterfat, and the products of milk and butterfat" and inserting in lieu thereof the words "and milk".

(b) Paragraph (c) of section 201 of the Agricultural Act of 1949, as amended (7 U.S.C. 1446(c)), is amended to read as follows:

"(c) The price of milk shall be supported at such level not in excess of 90 per centum nor less than 75 per centum of the parity price therefor as the Secretary determines necessary in order to assure an adequate supply. Such price support shall be provided through purchases of milk and the products of milk."

TRANSFER OF DAIRY PRODUCTS TO THE MILITARY AND TO VETERANS HOSPITALS

SEC. 203. Section 202 of the Agricultural Act of 1949, as amended (7 U.S.C. 1446a), is amended by changing "December 31, 1970" to read "December 31, 1973" both places it appears therein.

DAIRY INDEMNITY PROGRAM

SEC. 204. (a) Section 3 of the Act of August 13, 1968 (Public Law 90-484; 82 Stat. 750), is amended by striking out the word "June 30, 1970.", and inserting in lieu thereof the word "June 30, 1973.".

(b) The first sentence of section 1 of said Act is amended by inserting "and manufacturers of dairy products" after "dairy farmers", and by inserting "or dairy products" after "their milk", and the second sentence is revised to read: "Any indemnity payment to any farmer shall continue until he has been reinstated and is again allowed to dispose of his milk on commercial markets.".

TITLE III—WOOL

SEC. 301. The National Wool Act of 1954, as amended, is amended as follows:

(1) Designate the first two sentences of section 703 as subsection "(a)", and, in the second sentence, delete "1970" and substitute "1973".

(2) In the third sentence of section 703, delete the portion beginning with "The support price for shorn wool shall be" and ending with "Provided further, That the" and substitute "The", designate the third sentence as subsection "(b)", change the period at the end thereof to a colon and add the following: *Provided*, That for the three marketing years beginning January 1, 1971, and ending December 31, 1973, the support price for shorn wool shall be 72 cents per pound, grease basis."

(3) Designate the fourth and fifth sentences of section 703 as subsection "(c)", change the period at the end of the fifth sentence to a colon and add the following: "*Provided*, That for the three marketing years beginning January 1, 1971, and ending December 31, 1973, the support price for mohair shall be 80.2 cents per pound, grease basis.".

(4) Designate the sixth sentence of section 703 as subsection "(d)".

(5) Designate the last sentence of section 703 as subsection "(e)".

TITLE IV—WHEAT

SEC. 400. Subtitle A of this title shall be effective for the 1971 crop of wheat. The Secretary shall conduct a referendum, by secret ballot, of farmers to determine whether for the 1972 and 1973 crops of wheat they favor the program provided for by subtitle A or the program provided for by subtitle B. Any producer who has a farm acreage allotment shall be eligible to vote in such referendum. The Secretary shall proclaim the results of such referendum within thirty days after the date of such referendum and if the Secretary determines that the program provided for by subtitle B is favored by

(i) a majority of the producers voting in such referendum, and

(ii) the producers of more than 50 per centum of the wheat produced by producers voting in the referendum during the most recent calendar year for which production records are available.

subtitle B shall be effective for the 1972 and 1973 crops of wheat. Otherwise subtitle A shall be effective for the 1972 and 1973 crops.

Subtitle A—Program Similar to 1970 Program

SEC. 401. (a) The Food and Agriculture Act of 1965, as amended, is amended—

(1) by deleting "through 1970 crops" wherever it appears in section 506 and substituting "through 1973 crops";

(2) by deleting "years 1966 through 1970" wherever it appears in sections 501 and 502 and substituting "years 1966 through 1973";

(3) by deleting "in the calendar years 1964 through 1970" in section 501 and substituting "in the calendar years 1964 through 1973";

(4) by deleting "through 1970" in section 505 and substituting "through 1973";

(5) by deleting "years 1967 through 1970" and substituting "years 1967 through 1973" in section 506;

(6) by deleting "through the 1970" and substituting "through the 1973" in section 516.

(b) Section 107(1)(b) of the Agricultural Act of 1949, as effective through the 1973 crop, is amended by inserting after "not in excess of the parity price therefor" the following: "nor less than $1.25 per bushel".

(c) Price support loans with respect to the 1971 through 1973 crops of wheat shall be made available on wheat stored on the farm where produced, and price support loans on wheat of such crops and prior crops so stored shall be renewed to the maximum extent practicable consistent with the effective and efficient conduct of the price support programs for wheat.

(d) The Secretary shall advance to producers, within sixty days following signup for the 1971 wheat program, an amount equal to not less than 50 per centum of

(i) the Secretary's estimate of the face value of certificates to be issued under section 379c(a) of the Agricultural Adjustment Act of 1938 with respect to the 1971 crop of wheat (to be repaid through the withholding of certificates for such crop having a face value equal to such advance), and

(ii) the payments to become due under section 339 of such Act with respect to such wheat.

Subtitle B—Set-Aside Program

SEC. 402. Effective only with respect to the 1972 and 1973 crops of wheat and only if this subtitle is effective with respect to such crops, section 107 of the Agricultural Act of 1949, as amended, is further amended to read as follows:

"SEC. 107. Notwithstanding any other provision of law—

"(a) Loans and purchases on each crop of wheat shall be made available at such level, not in excess of the parity price therefor nor less than $1.25 per bushel, as the Secretary determines appropriate, taking into consideration competitive world prices of wheat, the feeding value of wheat in relation to feed grains, and the level at which price support is made available for feed grains.

"(b) If a set-aside program is in effect for any crop of wheat under section 379b(c) of the Agricultural Adjustment Act of 1938, as amended, certificates, loans, and purchases shall be made available on such crop only to producers who comply with the provisions of such program.

"(c) Price support loans with respect to the 1972 and 1973 crops of wheat shall be made available on wheat stored on the farm where produced, and price support loans on wheat of such crops and prior crops so stored shall be renewed to the maximum extent practicable consistent with the effective and efficient conduct of the price support programs for wheat."

SEC. 403. Effective only with respect to the 1972 and 1973 crops of wheat and only if this subtitle is effective with respect to such crops, sections 379b and 379c of the Agricultural Adjustment Act of 1938, as amended, are further amended to read as follows:

"SEC. 379b. (a) The Secretary shall provide for the issuance of wheat marketing certificates for the purpose of enabling producers on any farm for which certificates are issued to receive, in addition to the other proceeds from the sale of wheat, an amount equal to the face value of such certificates. The face value per bushel of domestic marketing certificates for the 1972 and 1973 crops of wheat shall be in such amount as, together with the national average market price received by farmers during the first five months of the marketing year for such crop, the Secretary determines will be equal to the parity price for wheat as of the beginning of the marketing year for the crop.

"(b) The domestic wheat marketing certificates shall be made available for a farm on the number of bushels determined by multiplying the domestic allotment for the farm for the crop to which such certificates relate by the projected yield established for the farm with such adjustments as the Secretary determines necessary to provide a fair and equitable yield.

"(c)(1) The Secretary shall provide for a set-aside of cropland if he determines that the total supply of wheat or other commodities will, in the absence of such a set-aside, likely be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency. If a set-aside of cropland is in effect under this subsection (c), then as a condition of eligibility

for loans, purchases, and certificates on wheat, the producers on a farm must set aside and devote to approved conservation uses an average of cropland equal to (i) such percentage of the domestic wheat allotment for the farm as may be specified by the Secretary (not to exceed 75 per centume of such allotment), plus (ii) the acreage of cropland on the farm devoted in preceding years to soil-conserving uses, as determined by the Secretary. The Secretary is authorized for the 1972 and 1973 crops to limit the acreage planted to wheat on the farm to such percentage of the domestic wheat allotment as he determines necessary to provide an orderly transition to the program provided for under this section. The Secretary shall permit producers to plant and graze on the set-aside acreage sweet sorghum, and the Secretary may permit, subject to such terms and conditions as he may prescribe, all or any of the set-aside acreage to be devoted to grazing or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, platago ovato, flaxseed, or other commodity, if he determines that such production is needed to provide an adequate supply, is not likely to increase the cost of the price support program, and will not adversely affect farm income.

"(2) To assist in adjusting the acreage of commodities to desirable goals, the Secretary may make land diversion payments, in addition to the certificates authorized in subsection (b), available to producers on a farm who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in addition to that required to be so devoted under subsection (c)(1). The land diversion payments for a farm shall be at such rate or rates as the Secretary determines to be fair and reasonable taking into consideration the diversion undertaken by the producers and the productivity of the acreage diverted. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to adversely affect the economy of the county or local community. The Secretary shall make not less than 50 per centum of any payments under this subsection to producers within sixty days following signup for the program.

"(3) The wheat program formulated under this section shall require the producer to take such measures as the Secretary may deem appropriate to protect the set-aside acreage and the additional diverted acreage from erosion, insects, weeds, and rodents. Such acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies. The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm as the Secretary may prescribe by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(4) If the operator of the farm desires to participate in the program formulated under this subsection (c), he shall file his agreement to do so no later than such date as the Secretary may prescribe. Loans and purchases on wheat, marketing certificates, and payments under this section shall be made available to producers on such farm only if the producers set aside and divert an acreage on the farm equal to the number of acres which the operator agrees to set aside and divert, and the agreement shall so provide. The Secretary may, by mutual agreement with the producer, terminate or modify any such agreement entered into pursuant to this subsection (c)(4) if he determines such action necessary because of an emergency created by drought or other disaster, or in order to prevent or alleviate a shortage in the supply of agricultural commodities.

"(d) The Secretary shall provide for the sharing of certificates issued and of payments made under this section for any farm among producers on the farm on a fair and equitable basis.

"(e) In any case in which the failure of a producer to comply fully with the terms and conditions of the program formulated under this section preclude the issuance of certificates and the making of loans, purchases, and payments, the Secretary may, nevertheless, issue such certificates and make such loans, purchases, and payments in such amounts as he determine to be equitable in relation to the seriousness of the default.

"(f) The Secretary shall advance to producers, within sixty days following signup for the program, an amount equal to 75 per centum of the Secretary's estimate of the face value of certificates to be issued with respect to such crop and such advance shall be repaid through the withholding of certificates for such crop having a face value equal to such advance. If the face value of the certificates as finally determined is less than the advance, the difference shall not be required to be repaid.

"(g) The Secretary is authorized to issue such regulations as he determines necessary to carry out the provisions of this title.

"(h) Marketing certificates issued under this Act and transfers thereof shall be represented by such documents, marketing cards, records, accounts, certifications, or other statements or forms as the Secretary may prescribe.

"(i) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"SEC. 379c. (a)(1) The farm domestic allotment for each crop of wheat shall be determined as provided in this section. The Secretary shall proclaim a national domestic allotment for the 1972 and 1973 crops of wheat not later than April 15 of each calendar year for the crop harvested in the next succeeding calendar year. The national domestic allotment for any crop of wheat shall be the number of acres which the Secretary determines on the basis of the estimated national yield will result in marketing certificates being issued to producers participating in the program in an amount equal to the amount of wheat which he estimates will be used for food products for consumption in the United States during the marketing year for the crop. The national domestic allotment for any crop of wheat shall be apportioned by the Secretary among the States on the basis of the apportionment to each State of the national domestic allotment for the preceding crop (for the 1972 crop, on the basis of the apportionment of the national acreage allotment for the 1971 crop), adjusted to the extent deemed necessary by the Secretary to establish a fair and equitable apportionment base for each State, taking into consideration established crop rotation practices, the estimated decrease in farm domestic allotments, and other relevant factors.

"(2) The State domestic acreage allotment for wheat, less a reserve of not to exceed 1 per centum thereof for apportionment as provided in this subsection, shall be apportioned by the Secretary among the counties in the State, on the basis of the apportionment to each such county of the domestic wheat allotment for the preceding crop (for the 1972 crop, on the basis of the apportionment of the wheat acreage allotment for the 1971 crop), adjusted to the extent deemed necessary by the Secretary in order to establish a fair and equitable apportionment base for each county taking into consideration established crop-rotation practices, the estimated decrease in farm domestic allotments, and other relevant factors.

"(3) The farm domestic allotment for each crop of wheat shall be determined by apportioning the county domestic wheat allotment among farms in the county which had a domestic wheat allotment for the preceding crop (for the 1972 crop, among farms in the county which had a wheat acreage allotment for the 1971 crop), on the basis of such allotment, adjusted to reflect established crop-rotation practices and such other factors as the Secretary determines should be considered for the purpose of establishing a fair and equitable allotment. Notwithstanding any other provision of this subsection, the farm domestic allotment shall be adjusted downward to the extent required by subsection (b).

"(4) Not to exceed 1 per centum of the State domestic allotment for any crop may be apportioned to farms for which there was no domestic allotment for the preceding crop (for the 1972 crop, to farms which had no acreage allotment for the 1971 crop) on the basis of the following factors: suitability of the land for production of wheat, the past experience of the farm operator in the production of wheat, the extent to which the farm operator is dependent on income from farming for his livelihood, the production of wheat on other farms owned, operated, or controlled by the farm operator, and such other factors as the Secretary determines should be considered for the purpose of establishing fair and equitable farm domestic allotments. No part of such reserve shall be apportioned to a farm to reflect new cropland brought into production after the date of enactment of the set-aside program for wheat.

"(5) The planting on a farm of wheat of any crop for which no farm domestic allotment was established shall not make the farm eligible for a domestic allotment under subsection (a)(3) nor shall such farm by reason of such planting be considered ineligible for an allotment under subsection (a)(4).

"(6) The Secretary may make such adjustments in acreage under this Act as he determines necessary to correct for abnormal factors affecting production, and to give due consideration tillable acreage, crop rotation practices, types of soil, soil and water conservation measures, and topography, and in addition, in the case of conserving use acreages to such other factors as he deems necessary in order to establish a fair and equitable conserving use acreage for the farm.

"(b)(1) If for any crop the total acreage of wheat planted on a farm is less than the farm domestic allotment, the farm domestic allotment used as a base for the succeeding crop shall be reduced by the percentage by which such planted acreage was less than such farm domestic allotment, but such reduction shall not exceed 20 per centum of the farm domestic allotment for the preceeding crop. If no acreage has been planted to wheat for three consecutive crop years on any farm which has a domestic allotment, such farm shall lose its domestic allotment. Producers on any farm who have planted to wheat not less than 90 per centum of the domestic allotment for the farm shall be considered to have planted an acreage equal to 100 per centum of such allotment. An acreage on the farm which the Secretary determines was not planted to such wheat because of drought, flood, or other natural disaster or a quarantine imposed by the county, State, or Federal Government shall be considered to be an acreage of wheat planted for harvest. For the purpose of this subsection, the Secretary may permit producers of wheat to have acreage devoted to soybeans or to feed grains for which there is a set-aside program in effect considered as devoted to the production of wheat to such extent and subject to such terms and conditions as the Secretary determines will not impair the effective operation of the program.

"(2) Notwithstanding the provisions of subsection (b) (1), no farm domestic allotment shall be reduced or lost through failure to plant the farm domestic allotment, if the producer elects not to receive certificates for the portion of the farm domestic allotment not planted, to which he would otherwise be entitled under the provisions of this Act."

Subtitle C—General

SEC. 404. Effective only with respect to the marketing years beginning July 1, 1971, July 1, 1972, and July 1, 1973, the Agricultural Adjustment Act of 1938, as amended is further amended as follows:

(1) by deleting in the first sentence of section 379d(b) the words "During any marketing year for which a wheat marketing allocation program is in effect," and substituting "During each marketing year,";

(2) by inserting a comma in lieu of the period at the end of the first sentence of section 379d(b) and adding the following: "and (iii) all persons processing or using any flour second clears, gluten or other products or byproducts of wheat for which domestic marketing certificates have not been acquired in the commercial production of food products for human consumption shall, prior to the marketing or the removing of such product for sale or consumption, acquire domestic wheat marketing certificates equivalent to the number of bushels of wheat required to produce or used in the production of the flour second clears, gluten or other product or byproduct used in the production of, or ingredient in, such food product."

(3) by adding at the end of section 379d (b) the following:

"Notwithstanding the foregoing, the Secretary is authorized, if subtitle B of title IV of the Agricultural Act of 1970 is effective with respect to the 1972 and 1973 crops of wheat, to temporarily suspend the requirement for export marketing certificates for the period beginning July 1, 1972, and ending June 30, 1974.

(4) by adding at the end of section 379e the following:

"Notwithstanding any other provision of this Act, if subtitle B of the title IV of the Agricultural Act of 1970 is effective with respect to the 1972 and 1973 crops of wheat, Commodity Credit Corporation shall sell marketing certificates for the marketing years for the 1972 and 1973 crops of wheat to persons engaged in the processing of food products but in determining the cost to processors the face value shall be 75 cents per bushel."

SEC. 405. Effective only with respect to (i) the 1972 and 1973 crops of wheat and only to such crops if subtitle B of this title is effective with respect to such crops and (ii) the 1971, 1972, and 1973 crops of feed grains, the Agricultural Adjustment Act of 1938, as amended, is further amended as follows:

(1) sections 331 through 339 shall not be applicable to the 1972 and 1973 crops of wheat;

(2) by adding in section 378 a new subsection (e) to read as follows:

"(e) The term 'allotment' as used in this section includes the domestic allotment for wheat."

(3) by adding at the end of section 379 the following sentence: "The term 'acreage allotments' as used in this section includes the domestic allotment for wheat." and

(4) by adding in the first sentence of section 385 after the words "parity payment," the words "payments (including certificates) under the wheat and feed grain set-aside programs,".

SEC. 406. Effective only with respect to the 1972 and 1973 crops of wheat, and only if subtitle B of this title is effective with respect to such crops, section 706, Public Law 89-321 (79 Stat. 1210), is amended as follows:

(1) by adding in the first sentence after the words "the Soil Conservation and Domestic Allotment Act, as amended," the words "or the Agricultural Act of 1949, as amended." and

(2) by adding at the end thereof the following sentence: "The term 'acreage allotments' as used in this section includes the domestic allotment for wheat."

SEC. 407. Public Law 74, Seventy-seventh Congress (68 Stat. 905), shall not be applicable to the crops of wheat planted for harvest in the calendar years 1972 and 1973.

SEC. 408. If subtitle B of this title is effective with respect to the 1972 and 1973 crops of wheat, the amount of any wheat stored by a producer under section 379c(b) of the Agricultural Adjustment Act of 1938, as amended, prior to the 1972 crop of wheat may be reduced by the amount by which the actual total production of the 1972 or 1973 crop on the farm is less than the number of bushels determined by multiplying three times the domestic allotment for such crop on the farm by the yield established for the farm for the purpose of issuance of domestic marketing certificates. The provisions of such section shall continue to apply to the wheat so stored to the extent not inconsistent therewith.

SEC. 409. Effective only with respect to the 1971, 1972, and 1973 crops of feed grains, and if subtitle B of this title is effective with respect to such crops the 1972 and 1973 crops of wheat the Agricultural Act of 1949 as amended is further amended by adding in section 408 a new subsection (k) as follows:

"REFERENCES TO TERMS MADE APPLICABLE TO WHEAT AND FEED GRAINS

"(k) References made in sections 402, 403, 406, and 416 to the terms 'support price,' 'level of support,' and 'level of price support' shall be considered to apply as well to the level of loans and purchases for wheat and feed grains under this Act; and references made to the terms 'price support,' 'price support operations,' and 'price support program' in such sections and in section 401(a) shall be considered as applying as well to the loan and purchase operations for wheat and feed grains under this Act."

SEC. 410. Section 407 of the Agricultural Act of 1949, as amended, is further amended effective only with respect to the marketing years for (i) the 1971, 1972, and 1973 crops of feed grains, and (ii) if subtitle B of this title is effective with respect to such crops, the 1972 and 1973 crops of wheat as follows:

(1) by deleting in the third sentence the language following the third colon and substituting the following: *"Provided,* That the Corporation shall not sell any of its stocks of wheat, corn, grain sorghum, barley, oats, and rye, respectively, at less than 115 per centum of the current national average loan rate for the commodity, adjusted for such current market differentials reflecting grade, quality, location, and other value factors as the Secretary determines appropriate, plus reasonable carrying charges."

(2) by deleting in the fifth sentence "current basic county support rate including the value of any applicable price-support payment in kind (or a comparable price if there is no current basic county support rate)" and substituting "current basic county loan rate (or a comparable price if there is no current basic county loan rate)", and

(3) by deleting in the seventh sentence "but in no event shall the purchase price exceed the then current support price for such commodities." and substituting "or unduly affecting market prices, but in no event shall the purchase price exceed the Corporation's minimum sales price for such commodities for unrestricted use."

SEC. 411. In the event that no new legislation is enacted in advance of the planting season for the 1974 crop of fall seeded wheat, and the Secretary determines that it will best accomplish the purposes of section 379a of the Agricultural Adjustment Act of 1938, as amended, and is otherwise in the interest of wheat producers and the United States, he is authorized to carry out a program for the 1974 crop of wheat on the same basis as the program for the 1973 crop, in which event references made in titles I and IV of this Act to the 1973 crop of wheat and to the marketing year for such crop beginning July 1, 1973, shall be considered as applying as well to the 1974 crop of wheat and to the marketing year beginning July 1, 1974, and the period beginning July 1, 1971, and ending June 30, 1974, referred to in section 403 shall be considered as extended to June 30, 1975.

TITLE V—FEED GRAINS

SEC. 501. Effective only with respect to the 1971, 1972, and 1973 crops of feed grains, section 105 of the Agricultural Act of 1949, as amended, is further amended to read as follows:

"SEC. 105. Notwithstanding any other provision of law—

"(a) (1) The Secretary shall make available to producers loans and purchases on each crop of corn at such level, not less than $1.00 per bushel nor in excess of 90 per centum of the parity price therefor, as the Secretary determines will encourage the exportation of feed grains and not result in excessive total stocks of feed grains in the United States.

"(2) The Secretary shall make available to producers loans and purchases on each crop of barley, oats, and rye, respectively, at such level as the Secretary determines is fair and reasonable in relation to the level that loans and purchases are made available for corn, taking into consideration the feeding value of such commodity in relation to corn and the other factors specified in section 401(b), and on each crop of grain sorghums at such level as the Secretary determines is fair and reasonable in relation to the level that loans and purchases are made available for corn, taking into consideration the feeding value and average transportation costs to market of grain sorghums in relation to corn.

"(3) Price support loans with respect to the 1971 through 1973 crops of feed grains shall be made available on grains stored on the farm where produced, and price support loans on grains of such crops and prior crops so stored shall be renewed to the maximum extent practicable consistent with the effective and efficient conduct of the price support programs for such grains.

"(b) (1) In addition, the Secretary shall make available to producers payments for each crop of corn, grain sorghums, and barley. The payment rate for corn shall be at such rate as, together with the national average market price received by farmers for corn during the first five months of the marketing year for the crop, the Secretary determines will not be less than $1.35 per bushel. The payment rate for grain sorghums and barley, shall be such rate as the Secretary determines fair and reasonable in relation to the rate at which payments are made available for corn.

"(2) The payments with respect to a farm shall be made available on 50 per centum of the feed grain base for the farm and shall be computed on the basis of the yield established for the farm for the preceding crop with such adjustments as the Secretary determines necessary to provide a fair and equitable yield.

"(3) If for any crop the total acreage on a farm planted to feed grains included in the program formulated under this subsection is less than the portion of the feed grain base for the farm on which payments are available under this subsection, the feed grain base for the farm for the succeeding crops shall be reduced by the percentage by which the planted acreage is less than such portion of the feed grain base for the farm, but such reduction shall not exceed 20 per

centum of the feed grain base. If no acreage has been planted to such feed grains for three consecutive crop years on any farm which has a feed grain base, such farm shall lose its feed grain base: *Provided*, That no farm feed grain base shall be reduced or lost through failure to plant, if the producer elects not to receive payment for such portion of the farm feed grain base not planted, to which he would otherwise be entitled under the provisions of this Act. Any such acres eliminated from any farm shall be assigned to a national pool for the adjustment of feed grain bases as provided for in subsection (e)(2). Producers on any farm who have planted to such feed grains not less than 90 per centum of the portion of the feed grain base on which payments are made available shall be considered to have planted an acreage equal to 100 per centum of such portion. An acreage on the farm which the Secretary determines was not planted to such feed grains because of drought, flood, or other natural disaster or condition beyond the control of the producer shall be considered to be an acreage of feed grains planted for harvest. For the purpose of this paragraph, the Secretary may permit producers of feed grains to have acreage devoted to soybeans or to wheat considered as devoted to the production of such feed grains to such extent and subject to such terms and conditions as the Secretary determines will not impair the effective operation of the feed grain or soybean program.

"(c)(1) The Secretary shall provide for a set-aside of cropland if he determines that the total supply of feed grains or other commodities will, in the absence of such a set-aside, likely be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices of feed grains and to meet a national emergency. If a set-aside of cropland is in effect under this subsection (c), then as a condition of eligibility for loans, purchases, and payments on corn, grain sorghums, and barley, respectively, the producers on a farm must set aside and devote to approved conservation uses an acreage of cropland equal to (i) such percentage of the feed grain base for the farm as may be specified by the Secretary, plus (ii) the acreage of cropland on the farm devoted in preceding years to soil-conserving uses, as determined by the Secretary. The Secretary is authorized for the 1971, 1972, and 1973 crops to limit the acreage planted to feed grains on the farm to such percentage of the feed grain base as he determines necessary to provide an orderly transition to the program provided for under this section. The Secretary shall permit producers to plant and graze on the set-aside acreage sweet sorghum, and the Secretary may permit, subject to such terms and conditions as he may prescribe, all or any of the set-aside acreage to be devoted to grazing or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, or other commodity, if he determines that such production is needed to provide an adequate supply, is not likely to increase the cost of the price-support program, and will not adversely affect farm income. Notwithstanding any other provision of this subsection, the Secretary may provide that no producer of malting barley shall be required as a condition of eligibility for a loan or purchase to participate in the set-aside program for feed grains if such producer has previously produced a malting variety of barley and plants barley only of an acceptable malting variety for harvest.

"(2) To assist in adjusting the acreage of commodities to desirable goals, the Secretary may make land diversion payments, in addition to the payments authorized in subsection (b), to producers on a farm who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in addition to that required to be so devoted under subsection (c)(1). The land diversion payments for a farm shall be at such rate or rates as the Secretary determines to be fair and reasonable taking into consideration the diversion undertaken by the producers and the productivity of the acreage diverted. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to adversely affect the economy of the county or local community.

"(3) The feed grain program formulated under this section shall require the producer to take such measures as the Secretary may deem appropriate to protect the set-aside acreage and the additional diverted acreage from erosion, insects, weeds, and rodents. Such acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies. The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm as the Secretary may prescribe by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(4) If the operator of the farm desires to participate in the program formulated under this section, he shall file his agreement to do so no later than such date as the Secretary may prescribe. Loans and purchases on feed grains included in the set-aside program and payments under this section shall be made available to producers on such farm only if the producers set aside and divert an acreage on the farm equal to the number of acres which the operator agrees to set aside and divert, and the agreement shall so provide. The Secretary may, by mutual agreement with the producer, terminate or modify any such agreement entered into pursuant to this subsection (c)(4) if he determines such action necessary because of an emergency created by drought or other disaster, or in order to prevent or alleviate a shortage in the supply of agricultural commodities.

"(d) The Secretary shall provide for the sharing of payments under this section among producers on the farm on a fair and equitable basis.

"(e)(1) For the purpose of this section, the feed grain base shall be the average acreage devoted on the farm to corn, grain sorghums, and barley in 1959 and 1960.

"(2) The Secretary may make such adjustments in acreage under this section as he determines necessary to correct for abnormal factors affecting production, and to give due consideration to tillable acreage, crop-rotation practices, types of soil, soil and water conservation measures, and topography, and in addition, in the case of conserving use acreages to such other factors as he deems necessary in order to establish a fair and equitable conserving use acreage for the farm. The Secretary shall, upon the request of a majority of the State committee established pursuant to section 8(b) of the Soil Conservation and Domestic Allotment Act, as amended, adjust the feed grain bases for farms within any State or county in order to establish fair and equitable feed grain bases for farms within such State or county: *Provided*, That except for acreage provided for in subsection (b)(3), adjustments made pursuant to this sentence shall not increase the total State feed grain acreage. The Secretary is authorized to draw upon the acreage pool provided for in subsection (b)(3) in making such adjustments. Notwithstanding any other provision of this subsection, the feed grain base for the farm shall be adjusted downward to the extent required by subsection (b)(3).

"(3) Notwithstanding any other provision of this subsection not to exceed 1 per centum of the estimated total feed grain bases for all farms in a State for any year may be reserved from the feed grain bases established for farms in the State for apportionment to farms on which there were no acreages devoted to feed grains in the crop years 1959 and 1960 on the basis of the following factors: suitability of the land for the production of feed grains, the extent to which the farm operator is dependent on income from farming for his livelihood, the production of feed grains on other farms owned, operated, or controlled by the farm operator, and such other factors as the Secretary determines should be considered for the purpose of establishing fair and equitable feed grain bases. No part of such reserve shall be allocated to a farm to reflect new cropland brought into production after the date of enactment of the set-aside program for feed grains. An acreage equal to the feed grain base so established for each farm shall be deemed to have been devoted to feed grains on the farm in each of the crop years 1959 and 1960 for purposes of this section.

"(f) In any case in which the failure of a producer to comply fully with the terms and conditions of the program formulated under this section precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as he determines to be equitable in relation to the seriousness of the default.

"(g) The Secretary shall make a preliminary payment to producers, within sixty days following signup for the program, at a rate equal to 32 cents per bushel of corn, with comparable rates for grain sorghum and barley, and the payment so made shall not be reduced if the rate as finally determined is less than the rate of the preliminary payment.

"(h) The Secretary is authorized to issue such regulations as he determines necessary to carry out the provisions of this section.

"(i) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation."

TITLE VI—COTTON

SEC. 601. The Agricultural Adjustment Act of 1938, as amended, is amended effective beginning with the 1971 crop of upland cotton as follows:

(1) Section 342 is amended by adding at the end thereof the following: "Notwithstanding any other provision of this Act, for each of the 1971 through 1973 crops (1) the national marketing quota for upland cotton shall be not less than the number of bales required to provide a national acreage allotment for such crop of fourteen million five hundred thousand acres; and (2) each farm acreage allotment (computed without regard to clause (3)) shall bear the same relationship to its farm base acreage allotment (as finally effective after adjustment for release and reapportionment, transfers, and all other factors) as the national acreage allotment bears to the national base acreage allotment and (3) if the Secretary determines such action to be necessary to provide an adequate supply of cotton, the Secretary may (i) increase each farm cotton acreage allotment to permit the planting of cotton on all or any part of the acreage required to be set aside pursuant to section 103(e)(4) of the Agricultural Act of 1949, and (ii) apportion additional acreage not exceeding an acreage equal to 25 per centum of the national acreage allotment to farm operators who apply for such additional acreage and give such assurance as the Secretary deems appropriate that they will make all appropriate efforts to produce and harvest cotton on acreages equal to their increased allotments. Such additional acreage shall be apportioned

in such manner as the Secretary deems appropriate to assure an adequate supply, giving special consideration to farms having cotton acreage allotments, the amounts of such allotments, and the production history of such farms. Producers on any farm receiving increased allotments under clause (3) shall be entitled to price support loans and purchases only on an amount of cotton determined by multiplying the yield used in computing payments for such farm by the acreage allotment computed without regard to clause (3)."

(2) A new section 342a is added to read as follows:—

"NATIONAL COTTON PRODUCTION GOAL

"SEC. 342a. The Secretary shall, not later than November 15, of the calendar years 1970, 1971, and 1972, proclaim a national cotton production goal for the 1971 and subsequent crops of upland cotton. The national cotton production goal for any year shall be the number of bales of upland cotton (standard bales of four hundred and eighty pounds net weight) equal to the estimated domestic consumption and estimated exports for the marketing year beginning in the calendar year for which such national cotton production goal is proclaimed, plus an allowance of not less than 5 per centum of such estimated consumption and estimated exports for market expansion except that the Secretary shall make such adjustments in the amount of such production goal as he determines necessary after taking into consideration the estimated stocks of upland cotton in the United States (including the qualities of such stocks) and stocks in foreign countries, which would be available for the marketing year, to assure the maintenance of adequate but not excessive carryover stocks in the United States (not less than 50 per centum of the average offtake for the three preceding marketing years) to provide a continuous and stable supply of the different qualities of upland cotton needed in the United States and in foreign cotton consuming countries and, in addition, to provide an adequate reserve for purposes of national security."

(3) Effective only with respect to the 1971, 1972, and 1973 crops, section 344a is amended as follows:

(A) Subsection (a) is amended (i) by striking "cotton acreage allotment" and inserting "farm base acreage allotment for cotton", and (ii) by striking "1970" and inserting "1973".

(B) Subsection (b) is amended by striking clause (ii) and by inserting before the period at the end of the next to last sentence the following: "; and (viii) no allotment may be sold or leased except to a person who furnishes such county committee with satisfactory evidence that he is dependent upon the production of cotton for a livelihood and will make all appropriate efforts to produce and harvest cotton on an acreage equal to his full farm base acreage allotment as constituted after such transfer. Any temporary transfer of farm acreage allotment by lease or by owner approved by the county committee to take effect during the period 1966 through 1970 for a term extending beyond 1970 shall be approved pro rata on the basis of the farm base acreage allotment for the farm from which the transfer is made, but no temporary transfer by lease entered into after March 15, 1970, shall be approved for 1974 and subsequent crops".

(4) Section 350 of the Act is amended to read as follows:

"BASE ACREAGE ALLOTMENTS

"SEC. 350. (a) The Secretary shall establish for each of the 1971, 1972, and 1973 crops of upland cotton a national base acreage allotment. Such national base acreage allotment shall be announced not later than November 15 of the calendar year preceding the year for which the national base acreage allotment is to be effective. The national base acreage allotment for any crop of cotton shall be the number of acres which the Secretary determines on the basis of the expected national yield will produce an amount of cotton equal to the estimated domestic consumption of cotton (standard bales of four hundred and eighty pounds net weight) for the marketing year beginning in the year in which the crop is to be produced, plus not to exceed 25 per centum thereof if the Secretary, taking into consideration other actions he may take under the Agricultural Act of 1970, determines that such additional amount is necessary to provide for a production which will equal the national cotton production goal, except that such national base acreage allotment shall be not less than fourteen million five hundred thousand acres less a percentage thereof equal to the percentage of the farm acreage allotment used in determining set-aside requirements under section 103(e)(4) of the Agricultural Act of 1949, as amended.

"(b) The national base acreage allotment for each crop of upland cotton shall be apportioned by the Secretary to the States on the basis of the acreage planted (including acreage regarded as having been planted) to upland cotton within the farm acreage allotment or the farm base acreage allotment if a farm base acreage allotment was in effect, during the five calendar years immediately preceding the calendar year in which the national cotton production goal is proclaimed, with adjustment for abnormal weather conditions or other natural disaster during such period.

"(c) The State base acreage allotment for each crop of upland cotton shall be apportioned to counties on the same basis as to years and conditions as is applicable to the State under subsection (b): Provided, That the State committee may reserve not to exceed 2 per centum of its State acreage allotment which shall be used to make adjustments in county allotments for trends in acreage, for counties adversely affected by abnormal conditions affecting plantings, or for small or new farms, or to correct inequities in farm allotments to prevent hardships.

"(d) The Secretary shall adjust the apportionment base for each county as may be necessary because of transfers of allotments across county lines.
